This SLO and observation assignment will continued to be assessed. The Developmental Children Center is an invaluable facility which provides for the opportunity for students in ECE-249 to be able to complete their practical Early Childhood Education training and perform observations of children in the Center. The Mentor sites, funded by the Mentor grant provide similar opportunities. Ece-249 will continue to utilize these facilities. The Professional Development Program, along with First 5 provides invaluable support for ECE-249 students, in terms of text books and lost wage funding. Students will continue to be directed to utilize the PDP services.

Plan for topic "Students completing the course will be able to demonstrate competencies of entry level ECE teachers on general work habits; personal qualities; interaction skills; and professional work ethics and skills"

New SLOs have been developed for this course since it has been completely revamped to match the current course description in the College Catalog. The Developmental Children Center is an invaluable facility which provides for the opportunity for students in ECE-249 to be able to complete their practical Early Childhood Education training. The Center's Lab staff meets with the individual students along with the ECE-249 Instructor twice a semester to make this evaluation. A new final assessment rubric was developed to indicate the necessary skills that need improvement and success in ECE-250, this will continue to be assessed as a better and more accurate rubric. A number of students fell behind in their lab hours due to life events; the instructor will emphasize the importance of maintaining meeting of lab hours during student orientation. The Center needs to continue to have funds to provide classroom substitute teachers to make these evaluations possible. The Mentor sites, funded by the Mentor grant provide similar opportunities. Ece-249 will continue to utilize these facilities.

Plan for topic "Students completing the course will be able to apply observation and assessments to create appropriate environments."

Students will continue to be directed to utilize the PDP services.

Plan for topic "Students completing the course will be able to complete and interpret a child observation in order to plan a curriculum activity." : 2009/10

2010-12-13: The success completion rate did not meet criteria by 10%. The students preforming assessments in the infant toddler rooms had a 78% completion rate and they were using a 21 item assessment measure. The Preschool room observation was a 50 item scale. The Preschool observation measure should be modified to reflect a more equitable amount of measurable items.
2011-06-16: This SLO and observation assignment will continued to be assessed. The Developmental Children Center is an invaluable facility which provides for the opportunity for students in ECE-249 to be able to complete their practical Early Childhood Education training and perform observations of children in the Center. The Mentor sites, funded by the Mentor grant provide similar opportunities. Ece-249 will continue to utilize these facilities. 554. Practicum in Early Childhood Education [ECE-250] belonging to Early Childhood Education [ECE]

Plan for topic "Students completing this course will be able to plan, implement and evaluate developmentally appropriate curriculum experiences for young children.": 2018/19

The SLO assessment was successful however, the professor found that students entering the field struggle with setting curriculum goals. The plan is still to have students identify specific developmental domains using the CA Preschool/infant/Toddler Frameworks, but to wait on setting specific goals until enough observation has occurred. Class discussions will focus more deeply on using the reflective process (watch; ask; adapt) to reinforce the relationship between development, childrenâ€™s interests and curriculum planning.

This SLO will be assessed during the next assessment cycle. This SLO clearly supports the program SLOâ€™s.

Plan for topic "Students completing ECE-250 will be able to assess children's development and progress through observation and documentation.": 2015/16

After reviewing the results, and obtaining student feedback, it was determined to make a few changes in the assignment. In the interest of quality vs quantity the number of children required to be observed will be reduced. In addition, the frequency of instructor review and feedback will be increased in order to support continuous learning. This change will be implemented during the fall, 2015 semester.

Plan for topic "Students completing this course will be able to design an in-depth emergent curriculum project.": 2015/16

Curriculum planning is an important component of this capstone course. Because students needed feedback throughout this assignment, it was determined that assigning the project in segments would benefit learning. This would allow for teacher input at various intervals of the project. The instructor will implement this change during the fall, 2015 semester.

Plan for topic "Students completing the course will be able to demonstrate knowledge of developmentally appropriate practice.": 2011/12

This was a second assignment using the same rubric. Feedback and practice result in increased student success in this area.

Plan for topic "Students completing ECE-250 will be able to evaluate personal teaching competencies to guide and inform practice performed during lab by arrangement.": 2011/12

The tool utilized for this assessment was redesigned in conjunction with other faculty and the ECE Department Advisory Committee to align with the newly created statewide early childhood education teacher competencies. It might be useful to focus future assessment on each area of competency.

Plan for topic "Students completing ECE-250 will be able to assess children's development and progress through observation and documentation.": 2011/12
This lab assignment has been utilized to afford students a way to document development while teaching. The new ECE 249 Observation and Assessment course (beginning in Fall 2012) will better prepare future ECE 250 students in this area of competency.

### Plan for topic "Students completing the course will be able to demonstrate knowledge of developmentally appropriate practice."

#### 2010/11

This was the second planned activity assignment. Student teaching experience in the Children's Center practicum setting provided opportunities in planning and implementation of developmentally appropriate practice reflected in this assessment.

### Plan for topic "Students completing the course will be able to create developmentally appropriate learning environments for young children."

#### 2010/11

A higher percentage of students averaged 2.5-3 than in the previous assessment. Use of the draft statewide teacher competencies in this area, assessed at the end of the semester, provided useful information of the student teacher skill levels. Student teaching experience in the Children's Center has a strong bearing in the skill improvement between mid and end of the semester assessment. The early childhood education teacher competencies in more areas are now available and might be useful in developing future course rubrics.

### Plan for topic "Students completing the course will be able to apply positive guidance skills with young children."

#### 2010/11

2011-11-23: This was close to the goal set for this SLO, but the same percentage as the previous assessment in 2010. The assessment tool will be revised for Spring 2012 to make the criteria more specific. Review of expectations at the beginning of the semester and a detailed video self-assessment of these skills will be utilized. Practice with these skills in the Children’s Center lab is essential to obtaining high competency levels in this area.

2012-11-27: This was close to the goal set for this SLO, but the same percentage as the previous assessment in 2010. The assessment tool will be revised for Spring 2012 to make the criteria more specific. Review of expectations at the beginning of the semester and a detailed video self-assessment of these skills will be utilized. Practice with these skills in the Children's Center lab is essential to obtaining high competency levels in this area.

### Plan for topic "Students completing the course will be able to demonstrate knowledge of developmentally appropriate practice."

#### 2009/10

The assignment demonstrated students' ability to apply developmentally appropriate practice. Student teaching experience in the Children's Center practicum setting provided opportunities in planning and implementation of developmentally appropriate practice reflected in this assessment.

### Plan for topic "Students completing the course will be able to create developmentally appropriate learning environments for young children."

#### 2009/10

Use of the draft statewide teacher competencies in this area, assessed at mid-semester and at the end of the semester, provided useful information of the student teacher skill levels. Student teaching experience in the Children's Center has a strong bearing in the skill improvement between mid and end of the semester assessment. The early childhood education teacher competencies in more areas are now available and might be useful in developing future course rubrics. It is critical to our program to utilize the

Plan for topic "Students completing this course will be able to administer and score an evaluation tool for program administrators": 2018/19

The previous SLO assessment was reviewed and followed.

Current Action Plan: The professor will move onto another SLO topic again next cycle. The reason for this is that there are limited evaluation tools for ECE program administrators and the assignment was sufficient to help students learn it. During the next cycle, the professor recommends assessing the SLO that addresses the evaluation of components in quality programs, facilities, and operations.

These findings were reviewed with the ECE department in December 2019. This assessment supports the learning outcomes for the site supervisor certificate.

Plan for topic "Students completing the course will be able to create a program budget": 2016/17

Positive changes were made this fall to both the lecture and the SLO budget assignment. This resulted in increased student scores and comprehension from the previous semester. Thus, this assignment will be used again next semester.

The Plan: A different SLO will be assessed during the next assessment cycle.

Reviewed by department 2/23/17.

SLOs discussed at C-contract and advisory meeting 1/19/17.

Plan for topic "Students completing the course will be able to identify current state licensing requirements": 2013/14

Currently there is no real plan for any changes to this assessment. The instructor finds this to be a helpful instrument and will use it again in the future.

Plan for topic "Students completing ECE-251 will be able to relate how adult interactions with media influence children": 2013/14

Currently there is no real plan for any changes to this assessment. The instructor finds this to be a helpful instrument and will use it again in the future.

Plan for topic "Students completing the course will be able to apply professional standards to personnel policies": 2013/14

The instructor plans to devote more lecture time to the topic and provide additional small group activities to enhance learning.

Plan for topic "Students completing the course will be able to create a program budget": 2013/14
### Plan for topic "Students completing the course will be able to apply professional standards to personnel policies."
2011/12

As a result of the high percentage of incorrect answers the instructor reviewed the material with the students to increase understanding and memory of course material.

Continue to use this assignment in the class.

### Plan for topic "Students completing the course will be able to create a program budget."
2011/12

Although the scores for the criteria exceeded anticipated outcomes, the 19% of failure or incompletion is a concern. The next time this class is offered, steps for success with this assignment should be reviewed.

### Plan for topic "Students completing the course will be able to identify current state licensing requirements."
2010/11

Students are learning the required licensing regulations. This assessment should be continued.

### Plan for topic "Students completing ECE-251 will be able to relate how adult interactions with media influence children."
2010/11

Students are learning the required licensing regulations. This assessment should be continued.

### Plan for topic "Students completing the course will be able to apply professional standards to personnel policies."
2010/11

Attention to the phrasing of question #1 and student understanding of the concept should be considered in the next assessment cycle.
### Plan for topic "Students completing this course will be able to evaluate factors needed to create a diverse and inclusive work environment.": 2018/19

The instructor will use the assignment again to demonstrate the need for diverse opinions regarding company policies/issues to create an inclusion environment. In the future, the plan is to add two additional assignments in order to evaluate additional factors. Also, a different SLO will be evaluated during the next SLO assessment cycle.

### Plan for topic "Students completing the course will be able to analyze personal supervisory style.": 2017/18

Review of the previous assessment was done prior to the current assessment.

As a result of this review the instructor decided to allow more class time for students to review and discuss their individual self-assessment with each other. The interactive class discussion was found to be more critical to student learning than the individual assessment alone.

Historically this class has been taught by the same instructor every year. This instructor is now retiring.

THE PLAN is to have the new instructor refer to a reference text if they plan to use the same assignment. This text is: Blueprint for Action by Paula Jorde Bloom. Also, the retiring instructor has offered to assist the new instructor with questions about this assignment. As a result of this change, the new instructor may also choose to assess a different SLO. This SLO assessment addresses the ECE program / certificate SLOâ€™s.

Discussed with the ECE Department in April, 2018 at a department meeting.

### Plan for topic "Students completing the course will be able to implement a training plan.": 2014/15

Students showed proficiency in being able to use a process including discussion, observation and evaluation of another teacher as a director would using specific criteria (e.g. teacher's performance in the completion of a lesson for children in an early childhood setting). Students were also able to complete a written paper on the process for both themselves and the teacher they worked with. To enhance learning, future classes will use more small group discussion.

### Plan for topic "Students completing the course will be able to analyze personal supervisory style.": 2014/15

The students were able to assess themselves using 6 different rating scales provided in class. They were able to complete the questionnaires well, analyze the results and apply them to their own views of their values, beliefs and directors capabilities. The students were also able o to share what they learned with each other and use the results in follow-up activities for the course. The future plan is to use a new self assessment form to broaden the understanding of self-assessment.

### Plan for topic "Students completing the course will be able to apply professional ethics code to program policies.": 2014/15
Students showed a knowledge of, and ability to put into practice the guidelines of the NAEYC Code of Ethical Conduct for Administrators. They were able to analyze classroom situations, decide if the teacher's responses were ethical, or not, and quote sections of the code to support their conclusions. The plan is to incorporate more small group discussion around this topic in the class. In addition, it was suggested that the instructor consider assessing a different SLO during the next round of assessments.

Plan for topic "Students completing this course will be able to examine policies and procedures for appropriate staffing and scheduling.": 2018/19

The professor felt that the online students would benefit with more explicit directions to complete the interview. Face-to-face sections get more direction with the interview process. The plan is to convert this interview information to an online module, video or other format for the online class. This SLO will be assessed during the next SLO cycle then to move on to a different SLO after the next assessment.

This SLO course assessment directly supports the PLO related to theory and methodology for effective supervision.

Plan for topic "Students completing ECE-253 will be able to evaluate various personnel, program and environmental assessment tools.": 2017/18

Review of the previous assessment of this course (2014-15) was done. One action plan addressed the importance of students understanding the ECERS since the tool is linked with the department’s mentoring program. Therefore, the focus of this assessment is on the use of the ECERS.

Current Analysis:

Although most students met this SLO, scoring the items correctly, and giving enough examples, was where the students struggled.

THE PLAN:

In the future the professor plans to provide more samples for scoring while watching additional observation clips from a video. She also plans to provide students with a blank form and have them practice recording examples of the video observations. Lastly, the professor will make sure students understand how to add up each total score.

These results were discussed with the ECE department on Wednesday November 29, 2017.

This assignment met the instructor’s learning goals however, there are suggestions to improve the depth of learning next time.

The action plan:

1. Provide more in-class time for small group work to discuss and design activities.
2. Discuss more with students how to identify and connect literacy skills found in story books.

This SLO will be assessed next time the class is offered since this is a new course.

561. Occupational Work Experience Education in ECE [ECE-295] belonging to Early Childhood Education [ECE]
Plan for topic "Students completing this course will be able to increase competencies in present occupation": 2019/20

Although this course is “housed” in ECE, the workforce development office is responsible for the SLO assessment. They are responsible for entering that data.
562. Internship in Occupational Work Experience Education in ECE [ECE-296] belonging to Early Childhood Education [ECE]
Plan for topic "Students completing this course will be able to identify the factors that contribute to specific behaviors in children."

Plan for topic "Students completing ECE-298 will be able to integrate gardening into the Children's Center curriculum."  

Plan for topic "Students completing ECE-298 will be able to develop play spaces conducive to nature connections."
564. Student Instructional Assistant [ECE-299] belonging to Early Childhood Education [ECE]
Plan for topic "Students completing this course will be able to appraise student questions/concerns and respond appropriately as a teacher's assistant.": 2017/18

The past assessment of ECE 299 was done in 2014 and results were reviewed. The professor continues to do extensive small group work in the classes

Plan:

In the future the professor plans to keep a written log of specific student challenges in order to increase clarity of direction for assignments/TA interactions with students. Next assessment cycle of this course, the professor plans to assess a different SLO.

Plan for topic "Students completing ECE-299 will be able to assist in demonstrating individual activities for young children.": 2014/15

The T.A. conducted small groups reflections for these assignments and it was successful. I would like to add more time for this kind of exercise in future semesters. T.A. involvement in all group activities seems to be very beneficial.

Plan for topic "Students completing ECE-299 will be able to assist with appropriate clerical support activities for this college course.": 2014/15

This SLO seems satisfactory and will continue next semester.

Plan for topic "Students completing ECE-299 will be able to assist students with their questions they may have about assignments.": 2014/15

Will continue next semester.
### 565. Economics of Public Issues [ECON-101] belonging to Social Science [ECON]

#### Plan for topic "Students completing the course will be able to apply the concepts of scarcity, choice, and marginalism to analyze economic issues."
: 2018/19

Prior to the exam, the instructor distributed a handout with the definitions and explanations. Included in the handout was the State of California definition of unemployment published on their website.

Instructor believes that students would have done better if they had quizzed each other on the definitions + discussion.

#### Plan for topic "Students completing the course will be able to apply cost-benefit analysis to evaluate public policy options."
: 2018/19

Instructor lectured extensively on the difference between fiscal and monetary policy. A chart illustrating the sequence of steps moving the economy from recession to recovery was handed out. Students should not only know the steps but understand the consequences on the economy, short and long term.

Suggestion for better understanding of the policies: class work in discussing what could be done under different economic conditions. Less memorization and more student interaction and analysis.

#### Plan for topic "Students completing the course will be able to demonstrate an understanding of basic economic concepts."
: 2018/19

More group classwork will help to guide the students to more complicated and multi-faceted situations. Yes, students know that lower interests will increase spending but students should expand on why and how this will impact employment and economic growth.

#### Plan for topic "Students completing the course will be able to apply the concepts of scarcity, choice, and marginalism to analyze economic issues."
: 2017/18

In consultation with the co-chairs of SLOAC, the Econ department will assess this course in SPRING 2019.

#### Plan for topic "Students completing the course will be able to demonstrate an understanding of basic economic concepts."
: 2014/15

Department faculty discussed increasing the number of hands-on activities involving applications of the basic economic concepts and having students do more small-group activities focused on applying these concepts.

#### Plan for topic "Students completing the course will be able to demonstrate an understanding of basic economic concepts."
: 2013/14

We were satisfied that students are doing well on this SLO. We will evaluate a different topic in Fall 2014.
DVC Instructional Course SLO Action Plans

566. Introduction to Economics [ECON-200] belonging to Social Science [ECON]

Plan for topic "Students completing the course will be able to demonstrate a comparative understanding of core theories of economics.":: 2016/17

Instructor used lots of in-class work by students to allow them to practice these concepts. While students struggled with 2 of the 5 questions, they did well or very well on the other 3.

Plan for topic "Students completing ECON-200 will be able to understand the basic concepts of Economics, including opportunity cost, comparative advantage, and marginal analysis.":: 2016/17

Instructor used lots of in-class work by students to allow them to practice these concepts. While students struggled with 2 of the 5 questions, they did well or very well on the other 3.

Plan for topic "Students completing ECON-200 will be able to understand the basic concepts of Economics, including opportunity cost, comparative advantage, and marginal analysis.":: 2012/13

We will share this information with faculty and share best practices on how to communicate this concept to students.

Plan for topic "Students completing the course will be able to demonstrate a comparative understanding of core theories of economics.":: 2012/13

We will share this information with faculty and share best practices on how to communicate this concept to students.

Plan for topic "Students completing the course will be able to compare U.S. economic institutions and processes with those in use elsewhere.":: 2012/13

We will share the results with faculty and we will share best practices on how to help students understand this concept.

Plan for topic "Students completing ECON-200 will be able to explain macroeconomic policy approaches using standard economic graphical models.":: 2012/13

We will share the results with faculty and we will share best practices on how to help students understand this concept.

Plan for topic "Students completing ECON-200 will be able to explain the operation of markets using standard economic graphical models.":: 2012/13

We will share the results with faculty and we will discuss best practices on how to help students understand this concept.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the social and political phenomena important in any economy.":: 2012/13

We will share the results with faculty and we will discuss best practices on how to help students understand this concept.

Plan for topic "Students completing the course will be able to demonstrate a comparative understanding of core theories of

Plan for topic "Students completing the course will be able to demonstrate mastery of the vocabulary of macroeconomics.": 2018/19

The short questions were very focused and that is probably what helped correct answers.

Plan for topic "Students completing the course will be able to demonstrate numerical and computational skills required for macroeconomic problem solving.": 2018/19

The explanation may be the technical difficulty of graphing for online students and so many missed it all together, which affected the overall average for this class.

We will be looking at these technical issues during our Flex meeting in January.

Plan for topic "Students completing the course will be able to apply economic theory and reasoning to analyze macroeconomic questions and policy issues.": 2018/19

Overall, the results were satisfactory even though some of the students did not submit the graphing exercises and that affected the overall average. We will continue to assign current events articles/analysis and encourage more writing and assessment of economic policy consequences.

Plan for topic "Students completing the course will be able to demonstrate mastery of the vocabulary of macroeconomics.": 2014/15

Faculty discussed having students do more short written assignments using economic vocabulary and having students do more small-group work using economic vocabulary.

Plan for topic "Students completing the course will be able to demonstrate numerical and computational skills required for macroeconomic problem solving.": 2014/15

Faculty discussed having students do more problem-solving and computation, both in class and using online tools.

Plan for topic "Students completing the course will be able to compute key macroeconomics statistics and draw conclusions about the performance of an economy using economic principles.": 2014/15

Faculty discussed having students do more problem-solving and computation, both in class and using online tools.

Plan for topic "Students completing the course will be able to apply economic theory and reasoning to analyze macroeconomic questions and policy issues.": 2014/15

Faculty discussed having students do more small-group discussion of macroeconomic questions and policy issues as well as having students deal with these questions and issues using online tools.
Plan for topic "Students completing the course will be able to demonstrate mastery of the vocabulary of macroeconomics.": 2013/14
We will share this information at our Spring 2015 department meeting. We will continue to assess this topic in Fall 2014 and Spring 2015. After that, our Objectives/Student Learning Outcomes for this course will be revised.

Plan for topic "Students completing the course will be able to demonstrate numerical and computational skills required for macroeconomic problem solving.": 2013/14
We will share this information at our Spring 2015 department meeting. We will continue to assess this topic in Fall 2014 and Spring 2015. After that, our Objectives/Student Learning Outcomes for this course will be revised.

DVC Instructional Course SLO Action Plans

568. Principles of Microeconomics [ECON-221] belonging to Social Science [ECON]

Plan for topic "Students completing the course will be able to demonstrate mastery of the vocabulary of microeconomics.": 2018/19

We will be re-examining the questions where the scores were very low.

Plan for topic "Students completing the course will be able to demonstrate numerical and computational skills required for microeconomic problem solving.": 2018/19

SLO results will be the topic of our Econ Department meeting in January (flex activity). We notice that some of the answers were too short and thus downgraded. Students were not able to allocate their time efficiently and so the last questions were not answered fully.

We will be looking at how to modify or re-organize our questions during the Flex meeting.

Plan for topic "Students completing the course will be able to apply the tools and core principles of microeconomics to analyze issues facing individual consumers and producers.": 2018/19

These questions were very specific so scores were more unified and higher than on some of the other questions.

Plan for topic "Students completing the course will be able to apply the tools and core principles to analyze microeconomic policy questions and social issues.": 2018/19

Assignments were students related changes in price and resulting change in total revenue are credited for these results

Plan for topic "Students completing the course will be able to demonstrate numerical and computational skills required for microeconomic problem solving.": 2017/18

SLO results will be the topic of our Econ Department meeting in January (flex activity). We notice that some of the answers were too short and thus downgraded. Students were not able to allocate their time efficiently and so the last questions were not answered fully.

569. Topics in Economics [ECON-255] belonging to Social Science [ECON]
570. Independent Study [ECON-298] belonging to Social Science [ECON]
### Plan for topic "Students completing this course will be able to increase learning through involvement as a teacher's aide.": 2018/19

This is the first time that this course is assessed. The professor will continue to hold regular weekly meetings with the TA and to assign classroom responsibilities.

**Plan:**

In the future the professor plans to elicit and formalize feedback from the TA by keeping a written log of specific student challenges (as noted by the TA) and, the areas where the TA feels s/he needs more support. This will enable the professor to revise pedagogy to foster content-level engagement and also create opportunities for TA to engage in deep learning and develop a professional identity.

### Plan for topic "Identify new and expanded learning objectives, which are measurable and within the studentâ€™s range of accomplishment.": 2018/19

This is the first time that SLOs for Econ 299 are assessed. Traditionally, faculty do not report to the department when they offer Econ 299 to a student(s) serving as instructional aide(s) to faculty. As such, we have not been able to systematically evaluate this course nor do we have a concrete SLO assessment plan in place. Hereon, we will request that faculty report when they offer Econ 299. We will discuss with faculty to identify methods used to assess outcomes and to clarify the goals and objectives of the course. In the next cycle, remaining SLOs will be assessed.
Plan for topic "Students completing this course will be able to identify examples of teaching events that implement some elements of the California Standards for the Teaching Profession (CSTP) using fieldwork observation notes.": 2018/19

Past assessments were reviewed.

The professor found that students were effectively able to reflect on, and write about, their fieldwork experiences in relation to one of the California Standards for the Teaching Profession on an in-class essay exam.

The Plan:

In the future, the professor plans to allow students additional processing opportunities with the California Standards for the Teaching Profession (CSTPs) by assigning the CSTPs as a topic of exploration in fieldwork journals prior to the midterm to increase practice making connections to the CSTPs. In addition, the professor plans to assess a different SLO next cycle.

Plan for topic "Students completing this course will be able to research, define, and give examples of Differentiated Instruction from their fieldwork experience.": 2017/18

Past course assessments were reviewed.

The professor found that students were effectively able to reflect on, and write about, their field work experiences when the midterm was given as an in-class essay exam.

The Plan:

In the future, the professor plans to allow students additional processing opportunities with the concept of Differentiated Instruction by assigning an online discussion, prior to the midterm, in which students can share their research findings and learn from one another in a low-stakes learning environment. In addition, the professor plans to assess a different SLO next cycle.
### Plan for topic "Students completing this course will be able to research, define, and give examples of Differentiated Instruction from their fieldwork experience.": 2016/17

Past course assessments were reviewed.

The professor found that students were effectively able to reflect on, and write about, their field work experiences when the midterm was given as a take home exam. The Plan:

In the future, the professor plans to frontload the concept of Differentiated Instruction with the foundation of a research article so that all students have a basic and common understanding of the term as an anchor.

### Plan for topic "Students completing EDUC-120 will be able to Evaluate an instructional style for the first day of class": 2014/15

This was a successful assignment that allowed be to better understand each student’s perspective and then watch the student with children to mentor and other classes to volunteer in at the elementary school. To improve student learning in the future, I plan to allow students the opportunity to do a pair-share and then do an in-class brainstorm prior to assigning the essay.

### Plan for topic "Students completing EDUC-120 will be able to Define personal motives to teach": 2014/15

This was a successful assignment that allowed be to better understand each student’s perspective and then watch the student with children to mentor and other classes to volunteer in at the elementary school. To improve student learning in the future, I plan to allow students the opportunity to do a pair-share and then do an in-class brainstorm prior to assigning the essay.

### Plan for topic "Students completing EDUC-120 will be able to Identify effective classroom management techniques.": 2014/15

This assignment was successful in allowing students to work collaboratively. To improve student learning in the future, I would change the assignment to a "ojig-sawa" (students get into expert groups and master one concept and then divide into different groups with each member teaching about a different concept).

### Plan for topic "Students completing EDUC-120 will be able to Describe the foundations of teaching as a profession.": 2014/15

This assignment was successful in allowing students to work collaboratively. To improve student learning in the future, I would change the assignment to a "ojig-sawa" (students get into expert groups and master one concept and then divide into different groups with each member teaching about a different concept).

### Plan for topic "Students completing EDUC-120 will be able to Apply the levels of "Depth of Knowledge" to lesson planning.": 2014/15

This assignment was not as successful as the instructor would have hoped, possibly because of the computer interface component. Based on the results of the assessments, in future classes it is recommended to have a follow-up in-class discussion based on the D2L discussions each week to show the importance of the D2L discussions as a

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing EDUC-120 will be able to Describe the experiences and expectations of a new teacher." : 2013/14

2014-07-24: Plan: To increase submission of SLO's from High Schools it will be suggested that SLO results accompany grades. It will be recommended that grades only be entered if SLO results are present. Students connected well with this passage. We had a group reading of the document, which allowed students to share examples from their own experiences. Perhaps, I would assign a rule to a group to have them help explain and give examples of the rules. No changes except possibly adding a group component.

Plan for topic "Students completing EDUC-120 will be able to Identify effective classroom management techniques." : 2012/13

DVC is excited to be working with the local high schools in order to support their students in fulfilling the CTE requirements for EDUC 120 (Teaching as a Profession). DVC full-time faculty has been meeting with the high school education instructors to define the requirements and write the final exam. The goal at the next couple of meetings is to work on the rubrics that will be used by the different high schools to meet the exit requirements and SLO's for this course.

### 573. Survey of Electricity [ELECT-110] belonging to Electronics/Electricity/Energy Systems [ELECT]

#### Plan for topic "Students completing this course will be able to identify basic components in an electrical circuit or device": 2019/20

Dept. Chair will assess class next time it is offered - posted by SLO Chair

#### Plan for topic "Students completing this course will be able to identify basic components in an electrical circuit or device": 2015/16

Results are positive. Need to increase enrollment in the future by targeted outreach. Instructor will be creating and documenting additional labs and other tools to clearly target skills objective.

#### Plan for topic "Students completing this course will be able to use ohm's and Kirchoff's Laws to solve for resistance, voltage, current, and power.": 2015/16

Results are positive. Need to increase enrollment in the future by targeted outreach.

#### Plan for topic "Students completing this course will be able to build simple electrical circuits and wire devices.": 2015/16

Results are positive. Need to increase enrollment in the future by targeted outreach. Instructor will be (improving) and documenting the lab exercises to clearly target skills objective. Discussed several additional potential lab exercises with instructor and identified equipment to be purchased to execute such exercises. Instructor will write up additional labs.
Plan for topic "Students completing the course will be able to correctly calculate electrical quantities in DC circuits containing resistive devices."

- **2017/18**
  - Results indicate that overall the students are able to understand the material sufficiently to move to the next topic. There was some student feedback that more students struggled with series/parallel combination circuits. Additional handouts, exercises, and explanations were and continue to be developed to assist students with this topic as it is necessary to master this material to move to the next course in the sequence.

Plan for topic "Students completing the course will be able to correctly calculate electrical quantities in DC circuits containing resistive devices."

- **2014/15**
  - Results acceptable, but continually reworking labs and examples to increase student learning.
  - Plan for topic "Students completing the course will be able to use digital meters to measure voltage, resistance, and current."**: 2014/15
    - Acceptable results. Have incorporated more hands-on equipment for students to practice with. Working with instructors to introduce additional materials.
  - Plan for topic "Students completing the course will be able to use computer software to simulate electric circuits."**: 2014/15
    - Results acceptable. Have since made the simulation software (multi-sim) available in computer labs in the ET area so students can use outside class time to improve their skill level.

Plan for topic "Students completing the course will be able to correctly calculate electrical quantities in DC circuits containing resistive devices."

- **2013/14**
  - Results are satisfactory. We have added additional computer simulation software in computer labs to increase the amount of times students have access. We have also implemented several tutorial sites for students needing extra help with the math that goes into the calculations.
  - Plan for topic "Students completing the course will be able to use digital meters to measure voltage, resistance, and current."**: 2013/14
    - Results are satisfactory. Instructors have identified additional computer based resources for students needing additional help.
  - Plan for topic "Students completing the course will be able to use computer software to simulate electric circuits."**: 2013/14
    - Results are satisfactory. Additional software has been provided on computers outside the lab for student use outside class hours.

Plan for topic "Students completing the course will be able to correctly calculate electrical quantities in DC circuits containing resistive devices."

- **2012/13**
  - Although the results are satisfactory, we have developed and are looking at supplementing the course with some self paced math reinforcement for students having deficiency in this area as well as adding some worksets that students can practice with to gain confidence in calculations.
  - Plan for topic "Students completing the course will be able to use digital meters to measure voltage, resistance, and current."**: 2012/13
    - Results are satisfactory with about 95% of students achieving the slo and passing the course. We have some work to do to retain those who signed up for the course for the
Plan for topic "Students completing the course will be able to use computer software to simulate electric circuits."

Results are satisfactory with about 95% of students achieving the slo and passing the course. We have some work to do to retain those who signed up for the course for the duration of the course. Spring 2013 we implemented some screening tools and provided self paced math problems for students needing assistance and several on-line resources for all students. This will be expanded to all sections fall 2013. Additionally, while students initially chose their own lab partners, less than a month into the semester, instructors changed the pairings or trios, purposefully paired up stronger students with ones needing additional assistance. This will be expanded going forward. Based on student feedback we will experiment with using just one analytical program and spend extra time bringing students up to speed. There are now ample resources available on the internet to assist with student learning in this area.

Plan for topic "Students completing the course will be able to correctly calculate electrical quantities in DC circuits containing resistive devices."

Results are satisfactory with 92% of students remaining after the drop date meeting all the SLOs. Student feedback and review of student assignments resulted in small changes to the way this module is taught. Future classes will increase emphasis on the first day the depth of math required to be successful, to help students decide if they are prepared for the course. A deeper review of math and math applications and perhaps a student handout for review will also be considered.

Plan for topic "Students completing the course will be able to use digital meters to measure voltage, resistance, and current."

Results are satisfactory with 92% of students remaining after the drop date meeting all the SLOs. Student feedback and review of student assignments resulted in small changes to the way this module is taught. The biggest improvement opportunity is to continue to monitor the percentage of students who remain in the class to the end compared to the number of students at census date, and work with other instructors to identify and implement ways to increase retention between the two periods.

Plan for topic "Students completing the course will be able to use computer software to simulate electric circuits."

Results are satisfactory with 92% of students remaining after the drop date meeting all the SLOs. Student feedback and review of student assignments resulted in small changes to the way this module is taught. The biggest improvement opportunity is to continue to monitor the percentage of students who remain in the class to the end compared to the number of students at census date, and work with other instructors to identify and implement ways to increase retention between the two periods. The department will also check with industry and other colleges to ensure that the software used is current with industry.

Plan for topic "Students completing the course will be able to correctly calculate electrical quantities in DC circuits containing resistive devices."

No SLO related changes are recommended for this course.

Plan for topic "Students completing the course will be able to use digital meters to measure voltage, resistance, and current."

No SLO related changes are recommended for this course.

### DVC Instructional Course SLO Action Plans

**575. Alternating Current Circuits [ELECT-121] belonging to Electronics/Electricity/Energy Systems [ELECT]**

**Plan for topic "Students completing the course will be able to use computer software to simulate electric circuits.": 2017/18**

This is the second course in a sequence, continuing from ELECT/ELTRN 120. Some students struggle with the material initially as they have forgotten it over the summer or winter breaks. The area has developed a three session review, particularly of series/parallel circuits, and have additional material that students can study outside class to come up to speed. Toward the end of the course students must master LRC circuits, in which the math can be complicated for many students. Additional materials have been developed to help students succeed.

**Plan for topic "Students completing the course will be able to solve AC problems using right angle trigonometry.": 2015/16**

Continue measuring and monitoring to ensure ongoing student success.

**Plan for topic "Students completing the course will be able to operate digital storage oscilloscopes and function generators.": 2015/16**

Continue measuring and monitoring to ensure student success.

**Plan for topic "Students completing the course will be able to use computer software to simulate electric circuits."": 2015/16**

Continue to measure and monitor to ensure student success. Based on previous assessments, the software was installed on all computer labs in the Engineering Technology area so students have access outside of class.

**Plan for topic "Students completing the course will be able to solve AC problems using right angle trigonometry."": 2013/14**

Results are satisfactory. The course will be incorporating more hands-on elements and will be re-evaluated once a cohort of two completes the redesigned elements.

**Plan for topic "Students completing the course will be able to operate digital storage oscilloscopes and function generators."": 2013/14**

Results are satisfactory -- will continue to monitor.

**Plan for topic "Students completing the course will be able to use computer software to simulate electric circuits."": 2013/14**

Results are satisfactory. We did make Multisim available to students at least twelve hours a day, five to six days a week by installing the program on open computer labs in the ET area. Initial feedback is positive and will continue to monitor.

**Plan for topic "Students completing the course will be able to solve AC problems using right angle trigonometry."": 2011/12**

Results are satisfactory with 100% of students remaining after the drop date meeting all the SLOs. Student feedback and review of student assignments resulted in small changes to labs and assignments for future classes. The biggest improvement opportunity is to continue to monitor the percentage of students who remain in the class to the end compared to the number of students at census date, and work with other instructors to identify and implement ways to increase retention between the two periods.

**Plan for topic "Students completing the course will be able to operate digital storage oscilloscopes and function generators."": 2011/12**

### DVC Instructional Course SLO Action Plans

**578. Circuit Diagnosis and Analysis: Troubleshooting [ELECT-220] belonging to Electronics/Electricity/Energy Systems [ELECT]**

Plan for topic "Students completing this course will be able to read and interpret a wide variety of drawings and schematics."

**2019/20**

| Dept. Chair will assess class next time it is offered - posted by SLO Chair |

---

Plan for topic "Students completing this course will be able to read and interpret a wide variety of drawings and schematics."

**2015/16**

| Instructors of both cohorts met and compared notes, as this class has only been offered twice. While both cohorts were successful, instructors identified several areas where the curriculum and delivery could be improved, particularly the selection of specific lab exercises for students. Will make these changes in the course material, which is currently scheduled for Fall 2017. |

---

Plan for topic "Students completing this course will be able to create simple maps of existing equipment to aid in troubleshooting."

**2015/16**

| Instructors of both cohorts met and compared notes, as this class has only been offered twice. While both cohorts were successful, instructors identified several areas where the curriculum and delivery could be improved, particularly the selection of specific lab exercises for students. One cohort focused on large equipment one may see in a home or commercial business. The other focused more on robotic and small circuit applications. Both are valid and the next time the course is offered, currently scheduled for Fall 2017, a combination of both focuses will be presented. |

Plan for topic "Students completing this course will be able to analyze electrical test equipment readings.": 2019/20

Dept. Chair will assess SP20 sections and submit by 6/1/20 - posted by SLO Chair

Plan for topic "Students completing this course will be able to identify common electrical and electro-mechanical devices and their uses.": 2015/16

Instructors of both cohorts met and compared notes, as this course has only been offered twice. While both cohorts were successful, where were some areas where improvement could be made. The type of electrical and electro-mechanical equipment had maybe a 50% overlap between the cohorts. Instructors agreed upon a common set of devices that need to be covered in the course and will incorporate such the next time the course is offered, currently scheduled for Fall 2016. Additionally, there were some gaps in the second cohort between this course and ELECT 220. It is difficult to separate the content in these two courses and several students were in ELECT 220 but not ELECT 230, or vice versa. Instructors will be more diligent in the future about keeping the course content separate between the two courses and will also strongly encourage students to take both courses at the same time.

Plan for topic "Students completing this course will be able to physically wire electrical systems and/or subsystems." : 2015/16

Instructors of both cohorts met and compared notes, as this course has only been offered twice. Both cohorts were successful. One area identified for improvement was more consistency in the type of systems and subsystems identified for lab exercises. Instructors came up with a list of common systems that must be explored and then a list of elective topics.

</table>

Plan for topic "Students completing the course will be able to apply State Safety Orders, Articles 1 through 38 as applied to electrical installation practice.": 2017/18

Feedback from students indicate that additional pictures and samples of equipment would be useful in understanding the material. Working with instructor to incorporate such into future class sessions.

Plan for topic "Students completing the course will be able to apply State Safety Orders, Articles 1 through 38 as applied to electrical installation practice.": 2014/15

While results are acceptable, working on course outline with instructor to incorporate more hands-on opportunities for student learning

Plan for topic "Students completing the course will be able to use current electrical codes in practical situations.": 2013/14

Results acceptable, but working with instructor to increase practical questions.

Plan for topic "Students completing the course will be able to identify what parts of the electrical codes are safety-related.": 2013/14

Results acceptable, but working with instructor to find additional ways to quantify the level of safety involved with specific sections, perhaps a risk rating, or reference to other codes.

Plan for topic "Students completing the course will be able to apply State Safety Orders, Articles 1 through 38 as applied to electrical installation practice.": 2012/13

Based on current feedback and observations as well as notes from earlier assessments, this SLO and its measurement is appropriate at this time

Plan for topic "Students completing the course will be able to use current electrical codes in practical situations.": 2012/13

Based on current feedback and observations as well as notes from earlier assessments, this SLO and its measurement is appropriate at this time. In coming semesters, we are considering putting some typical residential and light commercial wiring sections on rolling carts which can be incorporated into the class. This will provide students with some hands-on experience.

Plan for topic "Students completing the course will be able to identify what parts of the electrical codes are safety-related.": 2012/13

Based on current feedback and observations as well as notes from earlier assessments, this SLO and its measurement is appropriate at this time.
A new instructor was assigned to teach the Spring 2017 courses. Student feedback on the new instructor was high. We moved from strictly handouts in prior semesters to handouts and a textbook in Spring 2017. Students surveyed indicated that made the course easier to understand and they commented that they had a broader understanding of the concepts. We plan to keep the textbook for future classes. Lab exercises for 2017 were broken down into smaller pieces that built on each other and students seemed to have a high success rate completing each section and getting more frequent feedback on their progress.

Some of the concepts learned in this course are also used in another course, ELECT 130. ELECT 130 had two sections in Fall 2017 and anecdotal data suggests that students taking the ELECT 271 course in Spring 2017 did better in ELECT 130 than students who had not taken ELECT 271 or had taken it in earlier semesters.

Advisory committee members continually affirm that skills in PLCs are needed in the marketplace. A regional electrical - electronics job fair was hosted by DVC in November 2017 and many area employers were looking for students who had PLC skills and experience. We are exploring a more advanced PLC course or perhaps module that would use the PLCs to operate electromechanical devices and systems.

Plan for topic "Students completing the course will be able to program the programmable logic controllers to control output devices based on sensor inputs."

Results are satisfactory. Will be evaluating additional output devices to increase student learning and if purchased, factor them into the Spring 2015 class.

Plan for topic "Students completing the course will be able to troubleshoot and repair programmable logic controllers."

Results satisfactory. Will continue to monitor.

Plan for topic "Students completing the course will be able to design and implement a PLC system."

Results are satisfactory, will continue to monitor.
583. Student Instructional Assistant [ELECT-299] belonging to Electronics/Electricity/Energy Systems [ELECT]

Plan for topic "Students completing this course will be able to increase learning through involvement as a teacher's aide, lab assistant, or research assistant."

- 2019/20

This is an Independent Study Course Number and will be assessed next time it is utilized - posted by WebSLO's Chair

- 2015/16

Overall result was positive. Most of these students are one-time shots as they are advanced students ready to transfer. Need to continue to identify potential students for future classes.

Plan for topic "Students completing this course will be able to expand subject matter knowledge by assisting the instructor."

- 2015/16

Results were quite satisfactory. The need is to get a continuing stream of advanced students going through the system. Often by the time they know enough to really help in the classroom they are ready to graduate and/or transfer.
### 584. Introduction to Robotics [ELTRN-107] belonging to Electronics/Electricity/Energy Systems [ELTRN]

**Plan for topic "Students completing the course will be able to wire input and output devices to microcontroller.":" 2019/20**

Dept. Chair will assess SP20 sections and submit by 6/1/20 - posted by SLO Chair

**Plan for topic "Students completing the course will be able to wire input and output devices to microcontroller.":" 2015/16**

Results are positive. Instructor will be reviewing material and lab exercises to clearly target skills objective. Several students stated they would like to continue learning about microcontrollers and the department is considering a second, more advanced course.

**Plan for topic "Students completing the course will be able to write simple computer code to program the microcontrollers to interact with inputs and outputs." : 2015/16**

Results are positive. Instructor will be looking at materials to increase the level of student performance in future classes

**Plan for topic "Students completing the course will be able to troubleshoot the controllers program and hardware.": 2015/16**

Results are positive. Instructor will be fully documenting presentation materials and lab exercises for use in future classes.
DVC Instructional Course SLO Action Plans

### Plan for topic "Students completing the course will be able to correctly calculate electrical quantities in DC circuits containing resistive devices."

**2017/18**

Results indicate that overall the students are able to understand the material sufficiently to move to the next topic. There was some student feedback that more students struggled with series/parallel combination circuits. Additional handouts, exercises, and explanations were and continue to be developed to assist students with this topic as it is necessary to master this material to move to the next course in the sequence.

**2014/15**

- Results are acceptable. Instructor had developed additional worksheets for students and identified websites for students to increase their skill level.
- Results acceptable. Have incorporated more hands on equipment for students to practice with. Working with instructors to introduce additional materials.
- Results acceptable. Have installed the simulation software, multisim, on several computer labs in the ET area for students to practice with outside of class.

**2013/14**

- Results are satisfactory. We have added additional computer tools to areas outside the lab, increasing the hours available to students.
- Results are satisfactory. Instructors have identified and incorporated additional computer based resources for student use to reinforce meter concepts and applications.
- Results are satisfactory. We have added additional computer circuit simulation tools to areas outside the lab, increasing the hours available to students.

**2012/13**

- Results are satisfactory with about 95% of students achieving the slo and passing the course. We have some work to do to retain those who signed up for the course for the duration of the course. Spring 2013 we implemented some screening tools and provided self paced math problems for students needing assistance and several on-line resources for all students. This will be expanded to all sections.
- Results are satisfactory with about 95% of students achieving the slo and passing the course. We have some work to do to retain those who signed up for the course for the duration of the course. Spring 2013 we implemented some screening tools and provided self paced math problems for students needing assistance and several on-line resources for all students.
resources for all students. This will be expanded to all sections fall 2013. Additionally, while students initially chose their own lab partners, less than a month into the semester, instructors changed the pairings or trios, purposefully paired up stronger students with ones needing additional assistance. This will be expanded going forward. Based on student feedback we will experiment with using just one analytical program and spend extra time bringing students up to speed. There are now ample resources available on the internet to assist with student learning in this area.

Plan for topic "Students completing the course will be able to correctly calculate electrical quantities in DC circuits containing resistive devices.": 2011/12

Results are satisfactory with 92% of students remaining after the drop date meeting all the SLOs. Student feedback and review of student assignments resulted in small changes to the way this module is taught. Future classes will emphasize on the first day the depth of math required, to help students decide if they are prepared for the course. A deeper review of math and math applications and perhaps a student handout for review will also be considered.

Plan for topic "Students completing the course will be able to use digital meters to measure voltage, resistance, and current." : 2011/12

Results are satisfactory with 92% of students remaining after the drop date meeting all the SLOs. Student feedback and review of student assignments resulted in small changes to the way this module is taught. The biggest improvement opportunity is to continue to monitor the percentage of students who remain in the class to the end compared to the number of students at census date, and work with other instructors to identify and implement ways to increase retention between the two periods.

Plan for topic "Students completing the course will be able to use computer software to simulate electric circuits." : 2011/12

Results are satisfactory with 92% of students remaining after the drop date meeting all the SLOs. Student feedback and review of student assignments resulted in small changes to the way this module is taught. The biggest improvement opportunity is to continue to monitor the percentage of students who remain in the class to the end compared to the number of students at census date, and work with other instructors to identify and implement ways to increase retention between the two periods. The department will also check with industry and other colleges to ensure that the software used is current with industry.

Plan for topic "Students completing the course will be able to correctly calculate electrical quantities in DC circuits containing resistive devices.": 2010/11

No SLO related changes are recommended for this course.

Plan for topic "Students completing the course will be able to use digital meters to measure voltage, resistance, and current." : 2010/11

No SLO related changes are recommended at this time.

Plan for topic "Students completing the course will be able to use computer software to simulate electric circuits." : 2010/11

No SLO related changes are recommended for this course.

Plan for topic "Students completing the course will be able to correctly calculate electrical quantities in DC circuits containing resistive devices.": 2009/10

2010-05-05: De-emphasized the computer simulation of circuits and increased the coursework on Ohm’s Law formulas and circuit calculations.

### Plan for topic "Students completing the course will be able to use computer software to simulate electric circuits."
#### 2017/18
This is the second course in a sequence, continuing from ELECT/ELTRN 120. Some students struggle with the material initially as they have forgotten it over the summer or winter breaks. The area has developed a three session review, particularly of series/parallel circuits, and have additional material that students can study outside class to come up to speed. Toward the end of the course students must master LRC circuits, in which the math can be complicated for many students. Additional materials have been developed to help students succeed.

### Plan for topic "Students completing the course will be able to solve AC circuit problems using right angle trigonometry."
#### 2014/15
Results are satisfactory. Instructor wrote additional exercises and instruction material following last assessment and continues to update and improve the course.

### Plan for topic "Students completing the course will be able to operate digital storage oscilloscopes and function generators."
#### 2014/15
Results are satisfactory. Instructor wrote additional exercises and instruction materials following last assessment and continues to update and improve the course.

### Plan for topic "Students completing the course will be able to use computer software to simulate electric circuits."
#### 2014/15
Results are satisfactory. Instructor wrote additional exercises and instructional material following last assessment and continues to improve and update the course.

### Plan for topic "Students completing the course will be able to solve AC circuit problems using right angle trigonometry."
#### 2013/14
Results are satisfactory. This course will be incorporating more hands-on elements and will be re-evaluated once a cohort or two completes the redesigned elements.

### Plan for topic "Students completing the course will be able to operate digital storage oscilloscopes and function generators."
#### 2013/14
Results are satisfactory. Will continue to monitor.

### Plan for topic "Students completing the course will be able to use computer software to simulate electric circuits."
#### 2013/14
Results are satisfactory. We did make Multisim available to students at least twelve hours a day, five to six days a week by installing the program on open computer labs in the ET area. Initial feedback is positive and will continue to monitor.

### Plan for topic "Students completing the course will be able to solve AC circuit problems using right angle trigonometry."
#### 2011/12
Results are satisfactory with 100% of students remaining after the drop date meeting all the SLOs. Student feedback and review of student assignments resulted in small changes to labs and assignments for future classes. The biggest improvement opportunity is to continue to monitor the percentage of students who remain in the class to the end compared to the number of students at census date, and work with other instructors to identify and implement ways to increase retention between the two periods.

Plan for topic "Students completing the course will be able to use auxiliary views to show the true length of an inclined line.": 2018/19

This course used to be offered once a year in Spring. In Spring 2019 it was canceled due to low enrollment and the Engineering Department does not have a plan to offer it for Spring 2020. No new data for assessment.

Plan for topic "Students completing the course will be able to use auxiliary views to show the true length of an inclined line.": 2015/16

New engineering applications for this topic will be discussed in the lectures. Affirmation and reinforcement of current methods along with extended use of web resources to show the industrial applications related to this topic will continue.

Plan for topic "Students completing the course will be able to use auxiliary views to show the true length of an inclined line.": 2012/13

Affirmation and reinforcement of current methods along with extended use of web resources to show the industrial applications related to this topic.

Plan for topic "Students completing the course will be able to use the solid modeling capabilities of a CAD software to solve the descriptive geometry problems.": 2012/13

Affirmation and reinforcement of current methods along with extended use of CAD software SolidWorks to complete similar projects.

Plan for topic "Students completing the course will be able to find the piercing point of a line and a plane": 2012/13

Affirmation and reinforcement of current methods along with extended use of web resources to show the industrial applications related to this topic.

Plan for topic "Students completing the course will be able to use auxiliary views to show the true length of an inclined line.": 2011/12

Similar problems will be discussed in the lectures and will be assigned as homework.

Plan for topic "Students completing the course will be able to use the solid modeling capabilities of a CAD software to solve the descriptive geometry problems.": 2011/12

Similar problems will be discussed in the lectures and will be assigned as homework and term projects.

Plan for topic "Students completing the course will be able to find the piercing point of a line and a plane": 2011/12

Similar problems will be discussed in the lectures and will be assigned as homework.

Plan for topic "Students completing the course will be able to use auxiliary views to show the true length of an inclined line.": 2009/10

Basically the same activities will be continued and similar engineering problems will be discussed during the lecture.

Plan for topic "Students completing the course will be able to use the solid modeling capabilities of a CAD software to solve the descriptive geometry problems.": 2009/10

Basically the same activities will be continued and similar solid modeling problems will be discussed for this course.

Plan for topic "Students completing the course will be able to find the piercing point of a line and a plane": 2009/10

Basically the same activities will be continued and similar engineering problems will be discussed during the lecture.

Plan for topic "Students completing the course will be able to evaluate various energy sources and their relative importance in supplying the mix of energy consumption in the U.S. and the world.": 2018/19

The outcome exceeds the measurement criteria. The student that failed to meet the threshold grade had their own personal challenges this semester. We will watch such students early in the course to provide any academic and/or support services that campus offers which may help in managing their own personal affairs better and improve performance in the course.

Plan for topic "Students completing the course will be able to apply energy efficiency and conservation measure to analyze energy systems.": 2018/19

The outcome exceeds the measurement criteria. The student that failed to meet the threshold grade had their own personal challenges this semester. We will watch such students early in the course to provide any academic and/or support services that campus offers which
may help in managing their own personal affairs better and improve performance in the course.

Plan for topic "Students completing the course will be able to assess the environmental impact of energy production, storage, transportation, distribution, and use.": 2018/19

The outcome exceeds the measurement criteria. The student that failed to meet the threshold grade had their own personal challenges this semester. We will watch such students early in the course to provide any academic and/or support services that campus offers which may help in managing their own personal affairs better and improve performance in the course.

Plan for topic "Students completing the course will be able to explain the environmental impact and health effects of energy supply and demand.": 2018/19

The outcome exceeds the measurement criteria. The student that failed to meet the threshold grade had their own personal challenges this semester. We will watch
such students early in the course to provide any academic and/or support services that campus offers which may help in managing their own personal affairs better and improve performance in the course.

Plan for topic "Students completing the course will be able to evaluate various energy sources and their relative importance in supplying the mix of energy consumption in the U.S. and the world.": 2015/16
Affirmation and reinforcement of current methods and curriculum with further extended emphasis on interactive exercises.

Plan for topic "Students completing the course will be able to apply energy efficiency and conservation measure to analyze energy systems.": 2015/16
Affirmation and reinforcement of current methods and curriculum. Use of different assignments in each semester to measure the outcome related to this particular SLO over an extended time.

Plan for topic "Students completing the course will be able to assess the environmental impact of energy production, storage, transportation, distribution, and use." 2015/16
Affirmation and reinforcement of current methods and curriculum.

Plan for topic "Students completing the course will be able to explain the environmental impact and health effects of energy supply and demand.": 2015/16
Affirmation and reinforcement of current methods and curriculum.

Plan for topic "Students completing the course will be able to evaluate various energy sources and their relative importance in supplying the mix of energy consumption in the U.S. and the world." 2011/12
Affirmation and reinforcement of current methods and curriculum with extended emphasis on interactive exercises.

Plan for topic "Students completing this course will be able to Explain how the historic forces of politics, economics, and sociology have interacted to bring about major technological changes.": 2017/18

The level of learning shown by the assessment of this topic meets the success criteria practiced by the department. It is planned to expand the discussion to new technologies and in particular to artificial intelligence (AI).
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to write programs that use constructs of sequence, selection (ifs), and iteration (loops).": 2018/19

The course meets the stated criteria and future assessments will focus on raising the limit in the criteria from 70% to 75%.

Plan for topic "Students completing the course will be able to write programs that have subprograms (C++ "functions") with parameter (or "argument") lists." : 2018/19

The course meets the stated criteria. The future assessments will focus on raising the limit in the criteria from 70% to 75%.

Plan for topic "Students completing the course will be able to write programs that apply arrays." : 2018/19

The course meets the stated criteria. The future assessments will focus on raising the limit in the criteria from 70% to 75%.

Plan for topic "Student completing the course will be able to write programs that use numerical Methods for finding roots, differentiation, and integration." : 2018/19

The course meets the stated criteria. The future assessments will focus on raising the limit in the criteria from 70% to 75%.

Plan for topic "Students completing the course will be able to write programs that use constructs of sequence, selection (ifs), and iteration (loops).": 2015/16

The outcome exceeds the measurement criteria. Two students failed to meet the threshold grade due to their own personal challenges this semester. We will watch such students early in the course to provide any academic and/or support services that campus offers that may help in managing their own personal life better and perform better.

Plan for topic "Students completing the course will be able to write programs that have subprograms (C++ "functions") with parameter (or "argument") lists." : 2015/16

The outcome exceeds the measurement criteria and no other action is required. Two students that did not meet the criteria had their own personal challenges.

Plan for topic "Students completing the course will be able to write programs that apply arrays." : 2015/16

The outcome exceeds the measurement criteria and no other action is required. Two students that failed to meet the threshold grade due to their own personal challenges this semester. We will watch such students early in the course to provide any academic and/or support services that campus offers that may help in managing their own personal life better and perform better.

Plan for topic "Student completing the course will be able to write programs that use numerical Methods for finding roots, differentiation, and integration." : 2015/16

The outcome exceeds the measurement criteria and no other action is required.
Plan for topic "Students completing the course will be able to write programs that use constructs of sequence, selection (ifs), and iteration (loops)." : 2013/14
The outcome exceeds the measurement criteria and no other action is required.

Plan for topic "Students completing the course will be able to write programs that have subprograms (C++ "functions") with parameter (or "argument") lists." : 2013/14
The outcome exceeds the measurement criteria and no other action is required.

Plan for topic "Students completing the course will be able to write programs that apply arrays." : 2013/14
The outcome exceeds the measurement criteria and no other action is required.

Plan for topic "Student completing the course will be able to write programs that use numerical Methods for finding roots, differentiation, and integration." : 2013/14
The outcome exceeds the measurement criteria and no other action is required.
### Plan for topic "Program at least two methods to find the zeros of functions": 2018/19

The outcome exceeds the measurement criteria. Two students failed to meet the threshold grade due to their own personal challenges this semester. We will watch such students early in the course to provide any academic and/or support services that campus offers that may help in managing their own personal life better and perform better.

### Plan for topic "Students completing this course will be able to develop MATLAB programs for solution of systems of equations.": 2018/19

The outcome exceeds the measurement criteria. However, one student that did not meet the criteria due to his own personal challenges need to be considered. In the next assessment, as mentioned in the previous item, we will pay close attention to such cases to provide sufficient support by using the available campus resources.

### Plan for topic "Students completing this course will be able to program function files; incorporate built-in functions in script files.": 2018/19

The outcome exceeds the measurement criteria and no other action is required. Two students that did not meet the criteria had their own personal challenges.

### Plan for topic "Program at least two methods to find the zeros of functions": 2014/15

Instruction is adequate for this SLO item and no improvements are planned for this cycle.

### Plan for topic "Students completing this course will be able to use Ohm's law and Kirchhoff's network theorems to derive systems of equations for network analysis.": 2009/10

Reduce the time dedicated to this part of the course.

### Plan for topic "Students completing the course will be able to develop suitable programming and numerical analysis techniques to solve typical engineering/science problems": 2009/10

Reduce the time dedicated to this part of the course.

### Plan for topic "Students completing the course will be able to design and analyze the operation of simple operational amplifier circuits.": 2009/10

Increase the amount of time for this part of the course. Introduce drop quizzes.

### Plan for topic "Students completing the course will be able to use sinusoids and phasors in AC network analysis.": 2009/10

The lab is at 92% and the test at 64. More examples during lecture and more quizzes.

### Plan for topic "Students completing the course will be able to develop suitable programming and numerical analysis techniques to solve typical engineering/science problems": 2009/10

The outcome exceeds the measurement criteria. No other action required.
Plan for topic "Students completing the course will be able to use Ohm's law and Kirchhoff's network theorems to derive systems of
equations for network analysis.": 2008/9

<p>| The outcome exceeds the measurement criteria. No other action required |</p>

599. Topics in Engineering [ENGIN-150] belonging to Architecture/Engineering [ENGIN]
DVC Instructional Course SLO Action Plans

600. Thermodynamics [ENGIN-210] belonging to Architecture/Engineering [ENGIN]

Plan for topic "Students completing this course will be able to develop fundamental background of thermodynamics principles": 2018/19

The course exceeds the stated criteria. The future assessments will focus on raising the limit in the criteria from 70% to 75%.

Plan for topic "Students completing this course will be able to develop analytic ability in real-world engineering applications using thermodynamics principles": 2018/19

The course exceeds the stated criteria. The future assessments will focus on raising the limit in the criteria from 70% to 75%.

Plan for topic "Students completing this course will be able to perform basic analysis of performances of energy systems": 2018/19

The course exceeds the stated criteria. The future assessments will focus on raising the limit in the criteria from 70% to 75%.

Plan for topic "Students completing this course will be able to develop fundamental background of thermodynamics principles": 2015/16

Confirmation and enhancement of current methods along with more discussion on chemical reaction (combustion process) and problem solving on calculation of thermal properties of the mixtures. In order to do that, it would be more efficient to allocate more time to this course if possible.

Plan for topic "Students completing this course will be able to develop analytic ability in real-world engineering applications using thermodynamics principles": 2015/16

Confirmation and enhancement of current methods along with more practice on vapor and combined power cycles.

Plan for topic "Students completing this course will be able to perform basic analysis of performances of energy systems": 2015/16

Confirmation and enhancement of current methods along with more practice on exergy loss and irreversibility of the system.
DVC Instructional Course SLO Action Plans

601. Introduction to Circuits and Devices [ENGIN-230] belonging to Architecture/Engineering [ENGIN]

Plan for topic "Students completing this course will be able to apply Boolean logic to analyze digital circuits.": 2017/18

The sample problem relies on the students to be able to Boolean logic expression and determine the function of the circuit. It shows the students have mastered the basics and more time can be spent on Kanaugh map technique for solving more complex problems.

Plan for topic "Students completing this course will be able to derive and solve the network differential equations for transient analysis.": 2017/18

Students who have taken or concurrently taking Diff Equations class did not quite know how to apply the math to engineering problems. More time needs to be spent on reviewing the math.

In general, weekly hourly problem solving session outside of regular lecture would be needed for a typical comparable class that has such a comprehensive syllabus.

Students had a hard time with this type of problem during class mid-term. Students were asked to turn in corrections and point out their own mistakes for this particular type of second order problem. In the final exam, a similar (not identical) problem was given and many meet the success criteria, showing that learning from the mistakes worked.

Plan for topic "Students completing the course will be able to use Ohm's law and Kirchhoff's network theorems to derive systems of equations for network analysis.": 2014/15

The early part of the course is critical for student success

1. More problems related to the topic solved during lecture
2. Students build and analyze more circuit examples in the lab
3. Students made aware of pass-fail statistics on first day and week instruction

#### Plan for topic "Students completing the course will be able to calculate the theoretical density of a metal based on its crystal structure."

**Plan for topic "Develop free body diagrams of trusses, use method of sections, calculate forces in truss elements": 2010/11**

| No modification to course content is possible due to articulation agreement |
### Plan for topic "Students completing this course will be able to use stress and strain transformation to calculate the principal stresses for 2D systems."

- **2018/19**
  - Continue solving example problems in the lectures and assign various problems as homework for this subject to be discussed in the classroom. There used to be one hour of problem solving session for this course that unfortunately was deleted, as a part of Title V rewrite, by the department vote during my sabbatical leave 3 years ago. Recently that one hour of problem solving was brought back to the course outline. That will help the students to have more discussions and sample problems on this topic.

### Plan for topic "Students completing the course will be able to analyze the bending stresses in a beam with various support conditions."

- **2015/16**
  - Continue solving example problems in the lectures and assign various problems as homework for this subject to be discussed in the classroom. There used to be one hour of problem solving session for this course that unfortunately was deleted, as a part of Title V rewrite, by the department vote during my sabbatical leave. I will work on bringing it back to the course outline. That will help the students to have more discussions on this topic.

### Plan for topic "Students completing the course will be able to analyze the internal forces of a truss structure."

- **2012/13**
  - Do more example problems in the lectures and assign various problems as homework for truss analysis and discuss it in the classroom.

### Plan for topic "Students completing the course will be able to analyze the bending stresses in a beam with various support conditions."

- **2012/13**
  - Continue solving example problems in the lectures and assign various problems as homework for this subject to be discussed in the classroom.

### Plan for topic "Students completing the course will be able to calculate the critical load for buckling of a column."

- **2012/13**
  - Do more example problems in the lectures and assign various problems as homework for buckling analysis and discuss it in the classroom.
DVC Instructional Course SLO Action Plans

605. Independent Study [ENGIN-298] belonging to Architecture/Engineering [ENGIN]
Plan for topic "Students completing this course will be able to increase learning through involvement as a teacher's aide, lab assistant or research assistant.": 2018/19

On an as needed basis students will work with an instructor on a particular subject.
### 607. Bridge to College Writing [ENGL-090] belonging to English [ENGL]

**Plan for topic "Students completing this course will be able to compose a clearly focused, controlling idea (e.g. thesis and topic sentence).": 2018/19**

> The instructor mentions that English 90 is not an appropriate course for high school students to make up credits.

**Plan for topic "Students completing the course will be able to write multiple paragraph assignments free from basic punctuation and usage errors." : 2015/16**

> Students are part of a summer learning community that integrates recruitment, registration, counseling, advising, and awards ceremony with instruction. Since results have been consistently good, perhaps we will assess a different outcome next time.

**Plan for topic "Students completing the course will be able to revise and self-edit an essay." : 2015/16**

> Students are part of a summer learning community that integrates recruitment, registration, counseling, advising, and awards ceremony with instruction. Since results have been consistently good, perhaps we will assess a different outcome next time.

**Plan for topic "Students completing the course will be able to integrate ideas about discovery of self and life experiences generated in art workshop into personal narrative essay.": 2015/16**

> Students are part of a summer learning community that integrates recruitment, registration, counseling, advising, and awards ceremony with instruction. Since results have been consistently good, perhaps we will assess a different outcome next time.

**Plan for topic "Students completing the course will be able to write multiple paragraph assignments free from basic punctuation and usage errors." : 2012/13**

> Students are part of a summer learning community that integrates recruitment, registration, counseling, advising, and awards ceremony with instruction. Since results have been consistently good, perhaps we will assess a different outcome next time.

**Plan for topic "Students completing the course will be able to revise and self-edit an essay." : 2012/13**

> The integrated nature of this learning community seems to support strong success rates, and as a department we are working through FCS on integrating this approach more into our usual classes.

**Plan for topic "Students completing the course will be able to integrate ideas about discovery of self and life experiences generated in art workshop into personal narrative essay.": 2012/13**

> We will continue to integrate self-discovery and life experiences generated in art workshop into the personal narrative, and consider extending this effective pedagogy to other courses.

**Plan for topic "Students completing the course will be able to write multiple paragraph assignments free from basic punctuation and usage errors." : 2010/11**

608. Studies in Reading and Writing [ENGL-095] belonging to English [ENGL]
### 609. Introduction to College Reading and Study Skills [ENGL-096] belonging to English [ENGL]

#### Plan for topic "Students completing this course will be able to use written strategies, such as annotating and quoting, to accurately identify an author's main and supporting points."

- **Plan for topic "Students completing this course will be able to use written strategies, such as annotating and quoting, to accurately identify an author's main and supporting points."**: 2017/18

  One challenge of this course is students' apathy and resistance. These characteristics lead to students often doing poorly in English 116. Instructors recommend more integration of student success workshops in the class.

#### Plan for topic "Students completing the course will be able to demonstrate accurate literal comprehension by correctly answering comprehension questions about a short text."

- **Plan for topic "Students completing the course will be able to demonstrate accurate literal comprehension by correctly answering comprehension questions about a short text."**: 2014/15

  This data suggests that we should continue the current mode of instruction. However, this data also suggests that we need to continue working with the DSS liaison to ensure students have access to appropriate services to support their learning.

#### Plan for topic "Students completing ENGL-096 will be able to Demonstrate an understanding of a text's main points through such forms as a simple outline or summary."

- **Plan for topic "Students completing ENGL-096 will be able to Demonstrate an understanding of a text's main points through such forms as a simple outline or summary."**: 2014/15

  This data suggests that we should continue the current mode of instruction. However, this data also suggests that we need to continue working with the DSS liaison to ensure students have access to appropriate services to support their learning.

#### Plan for topic "Students completing the course will be able to identify the main idea versus supporting points of texts."

- **Plan for topic "Students completing the course will be able to identify the main idea versus supporting points of texts."**: 2014/15

  This data suggests that we should continue the current mode of instruction. However, this data also suggests that we need to continue working with the DSS liaison to ensure students have access to appropriate services to support their learning.

#### Plan for topic "Students completing ENGL-096 will be able to Use basic text marking skills to identify main points in reading."

- **Plan for topic "Students completing ENGL-096 will be able to Use basic text marking skills to identify main points in reading."**: 2014/15

  This data suggests that we should continue the current mode of instruction. However, this data also suggests that we need to continue working with the DSS liaison to ensure students have access to appropriate services to support their learning.

#### Plan for topic "Students completing the course will be able to write a basic summary of an essay, article or chapter of a longer text."

- **Plan for topic "Students completing the course will be able to write a basic summary of an essay, article or chapter of a longer text."**: 2014/15

  This data suggests that we should continue the current mode of instruction. However, this data also suggests that we need to continue working with the DSS liaison to ensure students have access to appropriate services to support their learning.

#### Plan for topic "Students completing ENGL-096 will be able to Paraphrase basic texts."

- **Plan for topic "Students completing ENGL-096 will be able to Paraphrase basic texts."**: 2014/15

  This data suggests that we should continue the current mode of instruction. However, this data also suggests that we need to continue working with the DSS liaison to ensure students have access to appropriate services to support their learning.

#### Plan for topic "Students completing ENGL-096 will be able to Demonstrate an understanding of a text's main points through such forms as a simple outline or summary."

- **Plan for topic "Students completing ENGL-096 will be able to Demonstrate an understanding of a text's main points through such forms as a simple outline or summary."**: 2011/12
Although we are satisfied with the results, we will change both the outcome and methods of assessment to better reflect our practice. The revised outcome will read as follows:

“Students will be able to apply in writing basic critical thinking strategies (eg. inferring, drawing conclusions, making connections with other texts, analyzing.) The method of assessment will be "correctly answering in writing comprehension questions about a short text." The department may choose to agree to use the same text.

Plan for topic "Students completing the course will be able to demonstrate accurate literal comprehension by correctly answering comprehension questions about a short text.\): 2011/12

Although we are satisfied with the results, we will change both the outcome and methods of assessment to better reflect our practice. The revised outcome will read as follows:

“Students will be able to apply in writing basic critical thinking strategies (eg. inferring, drawing conclusions, making connections with other texts, analyzing.) The method of assessment will be "correctly answering in writing comprehension questions about a short text." The department may choose to agree to use the same text.

Plan for topic "Students completing the course will be able to identify the main idea versus supporting points of texts.\): 2011/12

We are satisfied with the results, but we will change the methods of assessment to require written responses demonstrating both comprehension and critical thinking.

Plan for topic "Students completing ENGL-096 will be able to Use basic text marking skills to identify main points in reading.\): 2011/12

Based on the data, no changes necessarily need to be made, though a higher percentage would be better, given that this task is so fundamental to reading.

Plan for topic "Students completing ENGL-096 will be able to Demonstrate an understanding of a text's main points through such forms as a simple outline or summary.\): 2008/9

Based on the data, no changes necessarily need to be made, though a higher percentage would be better, given that this task is so fundamental to reading.

Plan for topic "Students completing the course will be able to identify the main idea versus supporting points of texts.\): 2008/9

Based on this result, the instructors will give students more instruction and practice with main ideas versus supporting points.

Plan for topic "Students completing ENGL-096 will be able to Use basic text marking skills to identify main points in reading.\): 2008/9
Based on this result, the instructors will give students more instruction and practice with main ideas versus supporting points.

**Plan for topic "Students completing the course will be able to write a basic summary of an essay, article or chapter of a longer text."**: 2008/9

No changes need to be made. The next time this course is revised, a new SLO will be chosen.

**Plan for topic "Students completing ENGL-096 will be able to Paraphrase basic texts."**: 2008/9

No changes need to be made. The next time this course is revised, a new SLO will be chosen.
DVC Instructional Course SLO Action Plans

610. Introduction to College Reading and Writing [ENGL-097] belonging to English [ENGL]
Plan for topic "Students completing this course will be able to write a basic academic essay (introduction, body and conclusion) with a thesis that controls the rest of the essay." : 2018/19

Instructors felt that this was a good SLO to assess for English 97.
### 611. Introduction to College Writing [ENGL-098] belonging to English [ENGL]

<table>

<th>Topic</th>
<th>Plan</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students completing this course will be able to integrate examples, evidence and quotations in their paragraphs to support a main idea.</td>
<td>2017/18 One instructor commented that this is an appropriate SLO for this course.</td>
</tr>
<tr>
<td>Students completing the course will be able to compose a short essay with a clear thesis.</td>
<td>2014/15 This data suggests that we should continue the current mode of thesis instruction in English 98. However, we plan to also provide professional development with a focus on thesis statements, to better explore how we define an effective thesis at this level, and evaluate its quality.</td>
</tr>
<tr>
<td>Students completing ENGL-098 will be able to Write essays which contain a thesis and include relevant support for the thesis.</td>
<td>2014/15 This data suggests that we should continue the current mode of thesis instruction in English 98. However, we plan to also provide professional development with a focus on thesis statements, to better explore how we define an effective thesis at this level, and evaluate its quality.</td>
</tr>
<tr>
<td>Students completing ENGL-098 will be able to Identify and use basic sentence structure; create sentences with varied beginnings and varied lengths.</td>
<td>2014/15 This outcome should be changed for clarity and to reflect current practice. In specific, the outcome should be revised to reflect the use of coordination and subordination, which is more accurate to current practice.</td>
</tr>
<tr>
<td>Students completing the course will be able to gain a clear understanding of and greater comfort with the writing process.</td>
<td>2014/15 This outcome should be changed for clarity and to reflect current practice. In specific, the outcome should be revised to reflect the use of coordination and subordination, which is more accurate to current practice.</td>
</tr>
<tr>
<td>Students completing ENGL-098 will be able to Use concrete details to develop ideas within paragraphs.</td>
<td>2014/15 Based on these findings, we should revise the course outline to reflect current practice, including quoting as a form of concrete detail to be used. Further, we plan to explore a programmatic level shift to reflect the pedagogic shift we see here: as instructors are already integrating reading and writing, we will look at the feasibility and impact of creating an integrated reading and writing course at this level. At the transfer level, reading and writing instruction are integrated; at the developmental level, it is an option for students; we will explore extending this option to basic skills.</td>
</tr>
<tr>
<td>Students completing ENGL-098 will be able to Write essays which contain a thesis and include relevant support for the thesis.</td>
<td>2011/12 Currently, we ask that students compose a &quot;short&quot; essay. Although we are satisfied with the results, we need to agree as a department to a definition (word count) of &quot;short&quot; before we reassess.</td>
</tr>
</tbody>
</table>
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to compose a short essay with a clear thesis."

Currently, we ask that students compose a "short" essay. Although we are satisfied with the results, we need to agree as a department to a definition (word count) of "short" before we reassess.

Plan for topic "Students completing the course will be able to identify and correct run-on errors in exercises."

Although we are satisfied with this outcome, we would like to experiment with a new outcome: "Students will be able to create sentences with varied beginnings and endings."

Plan for topic "Students completing the course will be able to gain a clear understanding of and greater comfort with the writing process."

Although data are satisfactory, we will use a pre- and post-survey next time we assess. Specifically, we will ask students at the beginning of the semester to identify the writing techniques they use and to rate their comfort with their writing process. At the end, after a semester focused on learning skills, we will ask students to re-evaluate their comfort levels.

Plan for topic "Students completing ENGL-098 will be able to Identify and use basic sentence structure; create sentences with varied beginnings and varied lengths."

Although data are satisfactory, we will use a pre- and post-survey next time we assess. Specifically, we will ask students at the beginning of the semester to identify the writing techniques they use and to rate their comfort with their writing process. At the end, after a semester focused on learning skills, we will ask students to re-evaluate their comfort levels.

Plan for topic "Students completing the course will be able to compose a short essay with a clear thesis."

Based on these results, students may be encouraged to revise essays to enhance their skills at writing and supporting theses.

Plan for topic "Students completing ENGL-098 will be able to Write essays which contain a thesis and include relevant support for the thesis."

Based on these results, students may be encouraged to revise essays to enhance their skills at writing and supporting theses.

Plan for topic "Students completing the course will be able to identify and correct run-on errors in exercises."

Based on these results, no changes will be made. The next time the course is revised, a different SLO will be assessed.

Plan for topic "Students completing the course will be able to gain a clear understanding of and greater comfort with the writing process."

Based on these results, no changes will be made. The next time this course is revised, a different SLO will be assessed.

Plan for topic "Students completing ENGL-098 will be able to Identify and use basic sentence structure; create sentences with varied beginnings and varied lengths."

Based on these results, no changes will be made. The next time this course is revised, a different SLO will be assessed.
### Plan for topic "Students completing this course will be able to compose logical connections through subordination and coordination."

2017/18

<table>
<thead>
<tr>
<th>The instructor felt that this SLO was important but some students who did poorly in the class were often unmotivated. The 2 students who didn't meet the SLO didn't write the paper.</th>

</tr>
</thead>
</table>
The success rate was high in this area, and we might consider assessing a different objective in the future.

**Plan for topic "Students completing the course will be able to recognize and correct sentence boundary errors."**: 2012/13

As one instructor suggested, we might consider assessing writing skills more holistically in one of our assessment topics, rather than focusing on specific types of error in all three.

**Plan for topic "Students completing the course will be able to recognize parts of speech."**: 2008/9  
No modifications needed.

**Plan for topic "Students completing ENGL-099 will be able to recognize parts of speech."**: 2008/9  
No modifications needed.

**Plan for topic "Students completing the course will be able to identify and correct subject-verb agreement errors."**: 2008/9  
No modifications needed.

**Plan for topic "Students completing the course will be able to recognize and correct sentence boundary errors."**: 2008/9  
No modifications needed.
Plan for topic "Students completing the course will be able to use mapping, comma, outlining, annotating and paraphrasing strategies in order to write an accurate summary of an author's thesis and key support": 2016/17

Overwhelmingly, students who did not meet the SLO were either absent on the day of the assessment and/or did not do the assignment, or stopped coming to class shortly after the withdraw deadline. The rest, for the most part, faced cultural, language and personal problems that kept them from meeting the SLO. We don't have an overwhelming recommendation at this time but some instructors suggest that we have short class time for evening classes.

Plan for topic "Students completing the course will be able to use mapping, comma, outlining, annotating and paraphrasing strategies in order to write an accurate summary of an author's thesis and key support": 2015/16

The Department is reordering the sequence of course SLO assessments so the distribution of course assessments occurs more evenly. This course will be assessed Fa 17 and reported by 12/31/18.

Plan for topic "Students completing ENGL-116 will be able to Students completing the course will be able to demonstrate effective study skills and learning strategies.".: 2013/14

These results confirm our decision to continue offering the course in its current format as well as to move ahead with plans to integrate this course with a writing course, creating a new course, English 117. This is a new assessment topic the department determined should be analyzed to further assist us with linked IRW courses.

Plan for topic "Students completing this course will be able to incorporate structure and organization in their own writing.".: 2013/14

These results confirm our decision to continue offering the course in its current format as well as to move ahead with plans to integrate this course with a writing course, creating a new course, English 117. This is a new assessment topic the department determined should be analyzed to further assist us with linked IRW courses.

Plan for topic "Students completing the course will be able to determine overall direction and structure of a text.".: 2011/12

We are satisfied with the results we were able to capture, though the analysis clearly reveals problems with the methods of assessment. We will address this challenge in two ways. First, we will train instructors to use an approach called SPQ2R, and second, we will modify the assessment method to reflect this approach.

DVC Instructional Course SLO Action Plans

614. Integrated College Reading and Writing Development [ENGL-117] belonging to English [ENGL]

Plan for topic "Students completing this course will be able to write well-structured essays that have a focused thesis and developed and well-supported paragraphs with appropriate transitional elements."

Other instructors note that because of the condensed semester, we may need more models of what we want students to do and remote access to practice. One instructor noted about wishing to notify counselors about failing students (the adoption of starfish will take care of this problem).

Plan for topic "Students completing this course will be able to write well-structured essays that have a focused thesis." 2015/16

The data suggests that we may need to focus more directly on thesis statements at this level, via discussions in the English Developmental Ed Committee and perhaps via the English 117 workshop offered each summer. It's possible that since this is a relatively new course, teachers are trying to find the balance between reading and writing practices. The data also suggests that the challenges we face are due to the fact that there are no prereqs for 117, so students often self-place into this accelerated course even if they are not ready.

Plan for topic "Students completing this course will be able to write a well-structured essay that contains developed paragraphs." 2015/16

Based on the data, English 117 teachers should consider doing more focused work on paragraph coherence. The English Developmental Ed Committee will discuss these results and encourage more work along these lines.

Plan for topic "Students completing this course will be able to write a well-structured essay that contains paragraphs with sufficient support for their ideas." 2015/16

English 117 instructors should continue teaching students to support their claims with adequate evidence. The English Developmental Ed Committee will discuss these results.

Plan for topic "Students completing this course will be able to write essays using transitional elements within and between paragraphs." 2015/16

The data suggests that we need to focus more directly on transitions at this level, via discussions in the English Developmental Ed Committee and perhaps in the English 117 workshop offered each summer. It's possible that since this is a relatively new course, teachers are trying to find the balance between reading and writing practices. The data also suggests that the challenges we face are due to the fact that there are no prereqs for 117, so students often self-place into this accelerated course even if they are not ready.

The data also suggests that the challenges we face are due to the fact that there are no prereqs for 117, so students often self-place into this accelerated course even if they are not ready.
DVC Instructional Course SLO Action Plans

615. College Writing Development [ENGL-118] belonging to English [ENGL]

Plan for topic "Students completing this course will be able to develop paragraphs through a variety of methods."

- 2018/19
  Instructors felt that this was a good SLO to assess. For the next round of SLOs, we will look at a different SLO for 118.

Plan for topic "Students completing the course will be able to write essays and paragraphs using simple and effective transitional elements."

- 2015/16
  Based on our survey of instructors' views (as per the previous Action Plan), we decided to focus on one element of effective essay writing: Transitions between and within paragraphs. The data suggests that we may need to have a discussion at the developmental committee and department levels about incorporating the teaching of transitions into our practice.

Plan for topic "Students completing this course will be able to write well-structured essays that have a focused thesis."

- 2015/16
  Based on our survey of instructors' views (as per the previous Action Plan), we decided to focus on a specific element of effective essay writing: Thesis statements. The data suggests that we are doing well in teaching thesis statements, but since this is fundamental to effective writing, we will most likely assess this topic again.

Plan for topic "Students completing the course will be able to write an essay with coherent, well-supported paragraphs."

- 2015/16
  Based on our survey of instructors' views (as per the previous Action Plan), we decided to focus on a specific element of effective essay writing: Supporting a central idea with evidence. The data suggests that we are doing well in this area, but since this is fundamental to effective writing, we will most likely assess this topic again.

Plan for topic "Students completing the course will be able to write an effective essay of more than 500 words that is well-structured and relatively free of error."

- 2012/13
  Student performance on this outcome was slightly lower than in the last assessment, and than for the other outcomes. Our department has been working on both developmental courses 118 and 116, and we are still intending to carry out a survey of instructors' views next time this course is assessed.

Plan for topic "Students completing the course will be able to write essays and paragraphs using simple and effective transitional elements."

- 2012/13
  Students did better on this outcome than last reported in Fall 2011 (78%). Perhaps our work in 2012-2013 discussing as a department 118's diverse population, fostering paragraph development, and useful lesson plans has resulted in improved pedagogy, awareness of the special issues with this course, and greater student success.

Plan for topic "Students completing the course will be able to identify and write complete sentences."

- 2012/13
  We are satisfied with student performance. For our next assessment of 118, we hope to collect writing from selected sections for study and evaluation.

Plan for topic "Students completing this course will be able to incorporate structure and organization in their own writing."

- 2012/13
  We are satisfied with student performance. For our next assessment of 118, we hope to collect writing from selected sections for study and evaluation.

Plan for topic "Students completing the course will be able to write an effective essay of more than 500 words that is well-structured and relatively free of error."

- 2011/12
  We are satisfied with student performance. For our next assessment of 118, we hope to collect writing from selected sections for study and evaluation.
We are satisfied with students' ability to write a well-structured essay that is relatively free of error. However, given the challenges of teaching students of diverse levels in ENGL 118, we plan to assess this course again in spring 2013, using a survey of instructors' views to get a better sense of what we should evaluate and measure in 118 writing.

**Plan for topic "Students completing the course will be able to write essays and paragraphs using simple and effective transitional elements."**: 2011/12

Although we are satisfied with the results of our assessment, we plan as a department to improve our strategies for teaching 118, which is one of the most diverse classes because it lacks a prerequisite. We have already met as a department to discuss the student population and our concerns, and we have conducted a series of follow up Best Practices workshops focusing on what makes an effective paragraph, strategies for fostering paragraph development, and useful lesson plans. To further our research, we collected sample 118 essays and analyzed these at our flex day meeting in order to get a clearer sense of 118 writing, its strengths, and its weaknesses. Our plan to further this study for the spring 2013 assessment of ENGL 118 involves collecting writing from selected sections for study and evaluation.

**Plan for topic "Students completing the course will be able to identify and write complete sentences."**: 2011/12

We are satisfied with students' ability to write complete sentences. For our current action plan, we are focusing more upon the paragraph level (assessment topic #2).

**Plan for topic "Students completing this course will be able to incorporate structure and organization in their own writing."**: 2011/12

We are satisfied with students' ability to write complete sentences. For our current action plan, we are focusing more upon the paragraph level (assessment topic #2).
616. First-Year College Composition and Reading Support [ENGL-120] belonging to English [ENGL]
**Grammar journals are effective but not perfect. It's important to give teachers opportunities to talk about other effective pedagogy that would foster better grammar learning experiences for students.**
DVC Instructional Course SLO Action Plans

618. First-Year College Composition and Reading [ENGL-122] belonging to English [ENGL]

Plan for topic "Students completing this course will be able to write timed essays in class exhibiting acceptable college-level control of mechanics, organization, development, and coherence."

2016/17

The methods and results were discussed and analyzed with the Comp Committee in our department. We also held a department-wide best practices session on this SLO. Our last assessment looked at thesis statements and our action plan stated we were satisfied with the results. Since thesis statements are so important to 122, we were considering assessing the same SLO next time. However, because the state mandated, in the interim, a new timed-essay requirement that led to a new SLO (G) in our course, we thought it prudent to assess the new SLO. We were fairly happy with the results. From the best practices session, we shared handouts on strategies for timed essays as well as ideas on how to do timed writing in online classes. Next assessment cycle, we will probably focus on an SLO that elucidates specific reading and/or writing strategies, such as assessing whether an author has successfully supported a claim [A2] or using rhetorical strategies in one's own writing [D].

Plan for topic "Students completing the course will be able to read a complex text, paraphrase its thesis and evaluate the support for the thesis."

2015/16

The Department is reordering the sequence of course SLO assessments so the distribution of course assessments occurs more evenly. This course will be assessed Fa 17 and reported by 12/31/18.

Plan for topic "Students completing ENGL-122 will be able to identify and restate the thesis (of a reading) in their own words."

2015/16

We are satisfied with this result, especially given that students did not receive credit for taking the 80-minute assessment and therefore could easily have not taken it seriously or not taken it at all. As a department, we feel our teaching strategies with respect to this outcome at this level are appropriate and therefore will continue our efforts, probably duplicating the same test to achieve a comparison or assessing a different outcome.

Plan for topic "Students completing ENGL-122 will be able to synthesize ideas from two or more essays."

2013/14

We have scheduled a flex workshop for fall 2014 with a follow-up spring 2015 to norm our department with respect to this skill and to develop best practices around synthesis.

Plan for topic "Students completing the course will be able to develop an essay using multiple rhetorical strategies."

2013/14

Course Action Plans

Outcome Assessment History

Page 1152 of 2394
DVC Instructional Course SLO Action Plans

We have scheduled a flex workshop for fall 2014 with a follow-up spring 2015 to norm our department with respect to this skill and to develop best practices around synthesis.

Plan for topic "Students completing the course will be able to write paragraphs which meaningfully incorporate outside texts according to MLA conventions.": 2013/14

Part A: In addition to the lengthy discussion that immediately followed the department’s realization of the results, we have determined that we will encourage faculty to increase the amount of time spent on reading and writing in-class. This encouragement will start in fall 2014 with a flex workshop on 122 best practices. Further, because this assessment was so time-intensive for the department, we will look toward having instructors volunteer to participate, so that students will have an incentive to do their best work. Finally, as a result of the C-ID, we may be forced to change our course outline for 122 which would mandate a new outcome related to in-class timed writing. If this change occurs, this will be the outcome we assess next. Part B: Because students are generally successful with the skill of writing an introduction, we may in the future create an assessment which focuses more directly just on the ability to write a thesis.

Plan for topic “Students completing ENGL-122 will be able to write an essay which contains an introduction and thesis. (Please note that we treated this outcome as having 2 distinct parts: a) students can write a satisfactory essay and b) students can write an essay with an intro and a thesis. There is obviously a lot of overlap, but we wanted the opportunity both to holistically assess the essay and to evaluate the intro/thesis; hence the two part approach.)": 2013/14

Twenty-five English 122 instructors met off-campus for a three-hour discussion of the results of these SLOs. While, students successfully demonstrated the first two outcomes, we determined that there was a measurement problem with this third outcome, perhaps because we were assessing two different skills: the mechanical skill of using MLA conventions and the critical thinking skill of effectively and meaningfully using another writer's ideas to build an argument. We have determined that we will revise the outcome (to make it one or the other of the two identified skills or to make two separate outcomes), and that our future assessment efforts will address either one or both of these.

Plan for topic "Students completing the course will be able to write paragraphs which meaningfully incorporate outside texts according to MLA conventions."": 2010/11
Twenty-five English 122 instructors met off-campus for a three-hour discussion of the results of these SLOs. We have determined that we will revise the outcome (to make it one or the other of the two identified skills or to make two separate outcomes), and that our future assessment efforts will address either one or both of these.
The instructor is finding that plagiarism is fairly common. To address this, she suggests more focus on plagiarism (e.g. explaining what it is and on ways to avoid last minute stress before turning in assignments). Also, developing a common rewrite policy across all 122As would be important since it would allow students succeed without lowering standards.
620. First-Year College English Intensive for Multilingual Students [ENGL-122AL] belonging to English [ENGL]
621. First-Year College English with Support for Multilingual Students [ENGL-122AM] belonging to English [ENGL]
DVC Instructional Course SLO Action Plans

622. First Year College Composition and Reading with Additional Support [ENGL-122L] belonging to English [ENGL]
DVC Instructional Course SLO Action Plans

623. First Year College Composition and Reading with Support [ENGL-122M] belonging to English [ENGL]
624. Critical Thinking: Composition and Literature [ENGL-123] belonging to English [ENGL]
Plan for topic "Students completing this course will be able to develop credible inferences about a literary work on the basis of literary elements."

": 2018/19
Per our last assessment, we reassessed this topic on inferences. We discussed our findings with the Composition Committee. We had a high success for this topic, which didn’t surprise us since it’s so central to literary analysis and is taught throughout the semester. Since this is the second assessment cycle, we don’t plan to reassess this topic. We will see how AB705 may change our students’ preparation and plan our next assessment with this in mind.

Plan for topic "Students completing this course will be able to analyze literary works using a variety of critical approaches."

": 2018/19
As stated in our previous action plan, assessing essay writing is too broad. Therefore, we focused in on critical approaches, central to critical thinking. The assessment was discussed with the Composition Committee. While instructors reported high success, we found only 60% of instructors offered a clear definition of critical approaches. Their activities also revealed confusion between stylistic analysis and critical approaches. We could revise the term critical approach to critical theory; plan Best Practices; and perhaps reassess this SLO. We will also see how AB705 may change our students’ preparation and plan our next assessment with this in mind.

Plan for topic "Students completing the course will be able draw and justify sound inferences about a work via the literary elements such as image, metaphor, tone, author intention, point of view, setting, theme, irony, etc."

": 2015/16
As part of our continuous improvement process, the Composition Committee and the entire English department is going to re-assess and evaluate the SLO from which this outcome is taken. The statement that "Students will write essays that effectively employ such writing strategies as analysis, interpretation, explication, synthesis, summary, persuasion, evaluation, and definition," is impractical, unwieldy and difficult to assess.

Plan for topic "Students completing the course will be able to write an analysis of a literary work."

": 2015/16
The department will hold to a best practices session on the definition of synthesis, how that definition impacts our teaching of English 123, and to what extent we should have a shared definition of this term, especially given its lofty perch in Bloom's taxonomy.

Plan for topic "Students completing the course will be able to analyze the meanings of symbols, symbol systems, metaphors, images, motifs in literary works."

": 2015/16
The department will hold to a best practices session on the definition of synthesis, how that definition impacts our teaching of English 123, and to what extent we should have a

## DVC Instructional Course SLO Action Plans

### 625. The Nature of Language: An Introduction to Linguistics [ENGL-124] belonging to English [ENGL]

**Plan for topic "Students completing the course will be able to know the major linguistic scholars and their contributions to the field."**: 2016/17

The assessment and results were discussed with members of the SLO and Literature Committee. Although the success rate is reasonably high, the department should review the impact reading comprehension--especially for English language learners--might have on students' ability to attain this SLO, and thus on related course curriculum and pedagogy.

**Plan for topic "Students completing the course will be able to define what language is and explain how it works."**: 2015/16

The Department is reordering the sequence of course SLO assessments so the distribution of course assessments occurs more evenly. This course will be assessed Fa 17 and reported by 12/31/18.

**Plan for topic "Students completing the course will be able to distinguish between formal, socio-, and psycho-linguistics."**: 2015/16

The Department is reordering the sequence of course SLO assessments so the distribution of course assessments occurs more evenly. This course will be assessed Fa 17 and reported by 12/31/18.

**Plan for topic "Students completing the course will be able to define what language is and explain how it works."**: 2013/14

The blue-book exam was successful so at this time we plan to continue using the in-class blue book exam.

**Plan for topic "Students completing the course will be able to distinguish between formal, socio-, and psycho-linguistics."**: 2013/14

The blue-book exam was successful so at this time we plan to continue using the in-class blue book exam.

**Plan for topic "Students completing the course will be able to know the major linguistic scholars and their contributions to the field."**: 2013/14

The formal essay to assess for understanding James Murray's contribution to lexicography was successful and we plan to continue using it.

**Plan for topic "Students completing the course will be able to analyze the linguistic aspects of spoken discourse."**: 2013/14

We felt the blue book exam was successful and plan to continue using it.

**Plan for topic "Students completing the course will be able to perform linguistic analysis."**: 2013/14

We felt the blue book exam was successful and plan to continue using it.

**Plan for topic "Students completing the course will be able to distinguish between formal, socio-, and psycho-linguistics."**: 2011/12

Although we are satisfied with these results, we will revise the language of the outcome to create a more narrow assessment of students' knowledge.

**Plan for topic "Students completing the course will be able to define what language is and explain how it works."**: 2011/12

Although we are satisfied with these results, we will revise the language of the outcome to create a more narrow assessment of students' knowledge.

**Plan for topic "Students completing the course will be able to know the major linguistic scholars and their contributions to the field."**: 2011/12

Although we are satisfied with these results, we will revise the language of the outcome to create a more narrow assessment of students' knowledge.
We are satisfied with these results, the question and the method of assessment and will continue to deliver this course material in the same way; perhaps we will assess a different outcome in the future.

**Plan for topic "Students completing the course will be able to perform linguistic analysis."**: 2011/12

The outcome and the assessment tools are too vague to be as useful as they could be, so in the future we will assess with a reworked outcome (from the revised course outline) and a more narrow question.

**Plan for topic "Students completing the course will be able to analyze the linguistic aspects of spoken discourse."**: 2011/12

The outcome and the assessment tools are too vague to be as useful as they could be, so in the future we will assess with a reworked outcome (from the revised course outline) and a more narrow question.

**Plan for topic "Students completing the course will be able to define what language is and explain how it works."**: 2008/9

No SLO-related changes are recommended for the Title 5 course outline or instructional practice.

**Plan for topic "Students completing the course will be able to distinguish between formal, socio-, and psycho-linguistics."**: 2008/9

No SLO-related changes are recommended for the Title 5 course outline or instructional practice.

**Plan for topic "Students completing the course will be able to know the major linguistic scholars and their contributions to the field."**: 2008/9

No SLO-related changes are recommended for the Title 5 course outline or instructional practice.

No SLO-related changes are recommended for the Title 5 course outline or instructional practice.

**Plan for topic "Students completing the course will be able to perform linguistic analysis."**: 2008/9

No SLO-related changes are recommended for the Title 5 course outline or instructional practice.
626. Critical Thinking: The Shaping of Meaning in Language [ENGL-126] belonging to English [ENGL]

Plan for topic "Students completing this course will be able to identify and analyze the structure of arguments underlying the texts read."

: 2018/19

As per our last action plan, we have revised the course SLOs. While our previous action plan suggested we do this assessment more communally, we allowed instructors to assess this topic in the manner that corresponds to their teaching of the course.

The assessment was discussed with the department Composition Committee. We're pleased with the results: our assessment shows that instructors are making this reading skill integral to the course. That said, we are mindful of how the implementation of AB 705 may change our students' preparation for this course. We will plan our next assessment with this in mind.

Plan for topic "Students completing this course will be able to read and critically evaluate college-level material from a variety of sources."

: 2015/16

The assessment plan was analyzed and evaluated by the 126 sub-committee within the Dept's Composition Committee, which is responsible for 122, 123, and 126. In our last assessment, we felt we did not need to reassess topic 1 because of prior success, but we did so to ensure we see ongoing student success in this topic. The 126 sub-committee then discussed its findings with the Comp Committee. We were generally happy with the high number of successful students. The committee decided that next time SLO assessments are due for 126, we will discuss ways in which we can do the assessment more communally so that the independent sections are assessing at similar times and discussing their respective methodologies. We will revisit and discuss all our assessment topics as the English 126 sub-committee recommends revising Assessment topic # 3 in particular (see below).

Plan for topic "Students completing this course will be able to write essays using strategies that employ analysis, synthesis, and summary."

: 2015/16

The assessment plan was analyzed and evaluated by the 126 sub-committee within the Dept's Composition Committee, which is responsible for 122, 123, and 126. As per our last assessment, topic 2 needed further exploration, so we reassessed it this cycle. The 126 sub-committee then discussed its findings with the Comp Committee. We were generally happy with the high number of successful students. The committee decided that next time SLO assessments are due for 126, we will discuss ways in which we can do the assessment more communally so that the independent sections are assessing at similar times and discussing their respective methodologies. We will revisit and discuss all our assessment topics as the English 126 sub-committee recommends revising Assessment topic # 3 in particular (see below).
Plan for topic "Students completing ENGL-126 will be able to discover and evaluate outside sources in the development of writing."": 2015/16

We will revisit and discuss
this assessment as the English 126 sub-committee recommends revising Assessment topic # 3 to read: Understand the major fallacies of logic and apply them to texts or their own writing.

Plan for topic "Students completing this course will be able to read and critically evaluate college-level material from a variety of sources."

Our department has been consistently successful with this assessment topic, and at this level of instruction. We will consider assessing a different topic next time.

Plan for topic "Students completing this course will be able to discover and evaluate outside sources in the development of writing."

This was a new assessment topic, and the results were slightly lower (3%) than for assessment topic one. We might consider working more as a department on helping students on this high level skill.

Plan for topic "Students completing this course will be able to write essays using strategies that employ analysis, synthesis, and summary."

This was a new assessment topic, and the results were slightly lower (3%) than for assessment topic one. We might consider working more as a department on helping students on this high level skill.

DVC Instructional Course SLO Action Plans

We are very satisfied with the student achievement of this outcome, but we wonder if perhaps instructors might be more discerning if they had not had that option. The plan is to continue teaching the course the same way, and to continue to evaluate essentially the same way, with a change from a five-point scale to a yes/no evaluation.

Plan for topic "Students completing this course will be able to write essays using strategies that employ analysis, synthesis, and summary.": 2009/10

627. Tutor Training [ENGL-140] belonging to English [ENGL]

Plan for topic "Students completing this course will be able to demonstrate understanding of basic learning and the ability to apply those principles to tutoring." : 2017/18

The instructor felt that this was an appropriate SLO.

Plan for topic "e": 2017/18

The instructor felt that this was an appropriate SLO.

Plan for topic "Students completing the course will be able to use the tutoring sequence effectively." : 2014/15

The next time we assess this outcome, we might consider if students can achieve the same outcome in an online environment.

Plan for topic "Students completing the course will be able to demonstrate understanding of basic learning theory and the ability to apply those principles to tutoring." : 2014/15

The next time we assess this outcome, we might select a particular question on the midterm to assess (for example, a question that asks how tutors work with ESL students in a tutoring session). This would allow us to drill down and get specific information, rather than relying the scores for the assignment.

Plan for topic "Students completing the course will be able to use open-ended and probing questions." : 2014/15

The next time we assess this outcome, we might give students a particular in-class assignment to assess their ability to use questioning strategies. This will help the instructor assess their ability to use questions during writing, reading, and other types of tutoring situations.

Plan for topic "Students completing the course will be able to use the tutoring sequence effectively." : 2011/12

Based on these results, no changes will be made. The next time this course is assessed, a different SLO will be assessed.

Plan for topic "Students completing the course will be able to demonstrate understanding of basic learning theory and the ability to apply those principles to tutoring." : 2011/12

Based on these results, no changes will be made. The next time this course is assessed, a different SLO will be assessed.

Plan for topic "Students completing the course will be able to use open-ended and probing questions." : 2011/12

Based on these results, no changes will be made. The next time this course is assessed, a different SLO will be assessed.

Plan for topic "Students completing the course will be able to use the tutoring sequence effectively." : 2008/9

Based on these results, no changes will be made. The next time this course revised, a different SLO will be chosen.

Plan for topic "Students completing the course will be able to demonstrate understanding of basic learning theory and the ability to apply those principles to tutoring." : 2008/9

Based on these results, no changes will be made. The next time this course is revised, a different SLO will be assessed.

Plan for topic "Students completing the course will be able to use open-ended and probing questions." : 2008/9
Based on these results, no changes will be made. The next time this course revised, a different SLO will be chosen.
Plan for topic "Students completing the course will be able to analyze literature with attention to theme, tone and style, character, plot, narrative, image, and evocative language."

The assessment and results were discussed with the current course instructor and members of the SLO and Literature Committee. We will continue to look for assessment moments that “push the envelope” of the “interpret literary works” SLO, and as we arrive at texts and assignments that seem to work, share them with the department and look for ways to articulate to students how those critical thinking skills they practice in literature transfer to other courses and beyond.

Plan for topic "Students completing the course will be able to apply one type of literary criticism (i.e. historical, biographical, feminist) to a selected reading."

The Department is reordering the sequence of course SLO assessments so the distribution of course assessments occurs more evenly. This course will be assessed Fa 17 or Sp 18 and reported by 12/31/18.

Plan for topic "Students completing the course will be able to compare and contrast two pieces of imaginative literature which explore a similar theme selected from two different literary genres."

Most students were able to use criticism as a lens to analyze literature and to expand their knowledge of the value of literature in life. For the next assessment, we will make sure to request the total number assessed, not just the number on the final roster. We will continue to selectively present literary criticism and models for incorporating it.

Plan for topic "Students completing the course will be able to apply one type of literary criticism (i.e. historical, biographical, feminist) to a selected reading."

Most students were able to manipulate, define, and apply literary terms. For the next assessment, we will make sure to request the number of students assessed, which may differ from the number on the final grading roster. We will continue to emphasize the importance of literary terms and elements in this introductory course.

Plan for topic "Students completing the course will be able to define literary terms including theme, tone and style, character, plot, narrative, image, figurative and evocative language."

Students did well on this task. They were best at utilizing different works to debate the importance and primacy of genre. We will continue to think about creating specific assessment topics and tailored assignments which seem to work well, like this one did, in directing student focus and learning.

Plan for topic "Students completing the course will be able to compare and contrast two pieces of imaginative literature which explore a similar theme selected from two different literary genres."

The faculty have determined that the SLOs were met by the majority of students. In the next SLO cycle we will keep some of the current assessment topics but will modify one to better determine if students can comprehend the historical development of the major genres and apply the relevant knowledge to model works of literature.

Plan for topic "Students completing the course will be able to define literary terms including theme, tone and style, character, plot, narrative, image, figurative and evocative language."
The faculty have determined that the SLOs were met by the majority of students. In the next SLO cycle we will keep some of the current assessment topics but will modify one to better determine if students can comprehend the historical development of the major genres and apply the relevant knowledge to model works of literature.

- No changes to Title 5 outline or instruction are recommended. The next time this course is revised instructor will evaluate another SLO.
629. The Short Story [ENGL-151] belonging to English [ENGL]

Plan for topic "Students completing this course will be able to compose written textual analyses of short stories that focus on the significance of elements in individual works, groups of works, or the genre as a whole."

"" 2018/19

Addressing this SLO through a group project that places student work side by side allowed me to assess students’ abilities in direct relationship with one another. It is clear the majority of these online students possess mastery of basic college writing and literary analysis skills, as well as collaborative practices; based on this experience, we should continue to foreground both writing and synthesizing skills in our English 122 instruction. We should assess a different SLO next time, probably B, E, or F.

Plan for topic "Students completing the course will be able to evaluate the author's use of plot, character, setting, point of view, and writing style to communicate a theme in assigned short stories."

2015/16

The assessment was discussed with the Literature Committee in our department. As per the prior assessment, we chose to assess a different outcome this time. A majority of students were able to identify literary elements in short stories. This outcome is essential to all our literature courses, but we will want to assess another assessment topic in the future that presupposes this skill but also targets a more complex understanding of the literature.

Plan for topic "Students completing the course will be able to distinguish different types of short fiction: Parable, novella, tale; short story."

2013/14

Students did well; perhaps we can assess a different outcome next time. We will continue to make use of the anthology and call attention to the various types of short stories.

Plan for topic "Students completing the course will be able to evaluate the author's use of plot, character, setting, point of view, and writing style to communicate a theme in assigned short stories."

2013/14

The anthology does a good job introducing literary devices and we will continue to focus on author's use of literary elements to convey a theme. It works well that we have instructors well-versed in the study of literature and creative writing.

Plan for topic "Students completing the course will be able to analyze a short story with reference to the biography and culture of the author."

2013/14

We plan to modify this outcome because biographical study is not central to all approaches to literary analysis.

Plan for topic "Students completing the course will be able to distinguish different types of short fiction: Parable, novella, tale; short story."

2011/12

We might consider whether a different SLO would be more useful in gauging student learning.

Plan for topic "Students completing the course will be able to evaluate the author's use of plot, character, setting, point of view, and writing style to communicate a theme in assigned short stories."

2011/12
Change the outcome to replace "evaluate" with "analyze."

Plan for topic "Students completing the course will be able to analyze a short story with reference to the biography and culture of the author.": 2011/12

Since this SLO is so specific, instructors need to be informed early enough so that they can design a specific assignment addressing the author's biography and culture.

Plan for topic "Students completing the course will be able to distinguish different types of short fiction: Parable, novella, tale; short story.": 2008/9

No modifications needed.

Plan for topic "Students completing the course will be able to evaluate the author's use of plot, character, setting, point of view, and writing style to communicate a theme in assigned short stories.": 2008/9

No modifications needed.

Plan for topic "Students completing the course will be able to analyze a short story with reference to the biography and culture of the author.": 2008/9

No modifications needed.
Plan for topic "Students completing the course will be able to compare and contrast literature and film, learning how each medium deals with theme and structure.":: 2017/18

The future of this course is undetermined. The Literature Committee is in the process of reviewing a new course rotation. Once it is offered, we will assess it according to our usual process and practices.

Plan for topic "Students completing the course will be able to compare and contrast literature and film, learning how each medium deals with theme and structure.":: 2014/15

At this time it is felt that a greater emphasis should be put on getting all students enrolled to complete all assigned tasks. Even students who were failing the course passed all assessment topics, but neglected to complete ALL assigned tasks. In the future, more emphasis might be placed on getting students to improve upon their written analysis in the final paper.

Plan for topic “Students completing the course will be able to analyze film as a series of parts: frame, shot, sequence, sound, and other elements.”:: 2014/15

At this time it is felt that a greater emphasis should be put on getting all students enrolled to complete all assigned tasks. Even students who were failing the course passed all assessment topics, but neglected to complete ALL assigned tasks. In the future, more emphasis might be placed on getting students to improve upon their written analysis in the final paper.

Plan for topic "Students completing the course will be able to analyze three short-film styles: narrative, documentary, and experimental.":: 2014/15

At this time it is felt that a greater emphasis should be put on getting all students enrolled to complete all assigned tasks. Even students who were failing the course passed all assessment topics, but neglected to complete ALL assigned tasks. In the future, more emphasis might be placed on getting students to improve upon their written analysis in the final paper.

Plan for topic "Students completing the course will be able to compare and contrast literature and film, learning how each medium deals with theme and structure.":: 2012/13

Students unfamiliar with literary techniques and criticism struggled with this comparative analysis. More basics of literary analysis may need to be presented in this course.

Plan for topic "Students completing the course will be able to analyze film as a series of parts: frame, shot, sequence, sound, and other elements.":: 2012/13

The instructor noticed that students are surprised that writing is required for a film class. It may be helpful to emphasize writing across the curriculum and that the film analysis will be done through writing.

No modification needed.
The assessment and results were discussed with members of the SLO and Literature Committee. Our previous assessment looked at SLO 3 and examined historical and cultural context of literary works. This cycle, we wanted to look at the aesthetic awareness and appreciation of poetry SLO, since we are living in a great age of poetry, with diverse and interesting poets, which offers a great opportunity for students to explore this flourishing artform, particularly in the Bay Area. An assignment like this can open up the class and allow students to have a say in what they are reading. Such investment seemed to lead to a richer discussion as the class progressed, many students seeming to take ownership of their poet. Such choices in this class (contemporary poetry) could help us make decisions for other lit courses and campus events such as Literature Week, and potentially tie in the events of literature week to the readings that English 153 students are doing.

The department is additionally developing Creative Writing and Literature Certificates, and once this is off the ground, assignments such as this offer flexibility, possibility for student engagement, and many opportunities for connection to other parts of campus and student life.

We are lucky to have prominent writers teaching our literature classes. We will consider offering such courses in person, as well as online.

For the next assessment, we will make sure to ask about the total number of students assessed, not just the number on the final grading roster.

The class is working well, which is nice to see, as we hadn't offered this class in a long time. We will consider assessing a different topic next time.
### DVC Instructional Course SLO Action Plans

#### 632. Shakespeare and His World [ENGL-154] belonging to English [ENGL]

Plan for topic "Students completing this course will be able to demonstrate their understanding of Shakespeare's works as literature with complex aesthetic qualities, and familiarity with some of the many critical approaches used to interpret them."

<table>
<thead>
<tr>
<th>Year</th>
<th>Plan</th>
</tr>
</thead>
<tbody>
<tr>
<td>2016/17</td>
<td>Last year's assessment involved different SLOs (mostly the &quot;write analysis&quot; SLO; this year we were particularly interested in assessing the &quot;understanding complex aesthetic qualities&quot; SLO, as it is a little more specific to the course content.</td>
</tr>
</tbody>
</table>

The assessment and results were discussed with the current course instructor and members of the SLO and Literature Committee. In spite of the general success shown here, in the future, for similar complex and challenging essay assignments working toward SLOs like this, we should consider ways to get students--especially those who were unsuccessful in this assessment--better engaged in all parts of the writing process. We will continue to discuss and share strategies for engaging students in the writing process in our department.

Plan for topic "Students completing the course will be able to interpret the language and poetry of a scene of one of Shakespeare's plays."

## DVC Instructional Course SLO Action Plans

### Plan for topic "Students completing the course will be able to demonstrate an understanding of the historical, social and artistic forces which helped to shape Shakespeare's works."

**2010/11**

The plan is to continue to teach the course the same way, but perhaps to modify the assessment technique.

### Plan for topic "Students completing the course will be able to write an analysis of the themes in one of Shakespeare's plays."

**2010/11**

Because the shift from a five-point scale to a two-point scale does not seem to have elicited data that are more revealing, we plan to continue to teach the course in the same way and to consider new assessment strategies.

### Plan for topic "Students completing the course will be able to interpret the language and poetry of a scene of one of Shakespeare's plays."

**2009/10**

Satisfied with the student achievement of this outcome, but we wonder if perhaps instructors might be more discerning if they had not had that option. The plan is to continue teaching the course the same way, and to continue to evaluate essentially the same way, with a change from a five-point scale to a yes/no evaluation.

### Plan for topic "Students completing the course will be able to demonstrate an understanding of the historical, social and artistic forces which helped to shape Shakespeare's works."

**2009/10**

We are satisfied with the student achievement of this outcome, but we wonder if perhaps instructors might be more discerning if they had not had that C option. The plan is to continue teaching the course the same way, and to continue to evaluate essentially the same way, with a change from a five-point scale to a yes/no evaluation.

### Plan for topic "Students completing the course will be able to write an analysis of the themes in one of Shakespeare's plays."

**2009/10**

We are somewhat concerned not by the final results, which indicate success according to our criteria, but by the gap between this SLO and the first two. Instructors of the course are aware of the gap and will be asked to pay more attention to written (as oppose to oral) analysis of theme in future classes.

### Plan for topic "Students completing the course will be able to write an analysis of the themes in one of Shakespeare's plays."

**2008/9**

No changes necessary. The next time this course is revised, SLO's should be evaluated with a larger group of classes or with a different objective.
633. Topics in English [ENGL-155] belonging to English [ENGL]

Plan for topic "Students completing the course will be able to develop their writing skills, focusing on interpretation and analysis of written work." : 2018/19

This course hasn't been successfully offered since fall 2015. We will assess it as soon as it's offered again.

Plan for topic "Students completing this course will be able to annotate a text in order to identify main and supporting details." : 2015/16

The previous Action Plan is not directly pertinent since this is a topics course, so different outcomes apply with each iteration of the course. In this iteration (155E), the "application" the students were expected to demonstrate was annotation, since this version of the course was "Developmental Reading Across the Curriculum" (DRWAC). The instructor shared her discoveries with the coordinator of the DRWAC project and with development ed-level colleagues.

-The level of learning demonstrated for this SLO is quite high and needs no remediation.

-This is the first cycle of assessment for English 155E (Developmental Reading Across the Curriculum).

The goal is to make sure that English 155E becomes a regularly offered part of the curriculum with sections focused not only on Social Science, but also Business, the Sciences, and the Humanities. The amount of learning and appreciation demonstrated by students and faculty suggests that the course should be offered every semester in multiple sections.

-Since English 155E is designed to help students succeed in other courses, its very existence supports student success across the campus. All the students taking English 155E passed their Social Science class, an indication of the success of the class.

-The main goal is to institutionalize this class by getting approval from the English department, the curriculum committee, and affected curricular areas other than English.

Plan for topic "Students completing the course will be able to develop their writing skills, focusing on interpretation and analysis of written work." : 2008/9

No changes necessary. The next time this course is revised, SLO's should be evaluated with a different sample or with a different objective.

Plan for topic "Students completing the course will be able to through discussion and essays, work on and refine their abilities to read and interpret written work for ideological, emotional, personal, and aesthetic values." : 2008/9

No changes necessary. The next time this course is revised, SLO's should be evaluated with a different sample or with a different objective.
Plan for topic "Students completing the course will be able to through discussion and essays, work on and refine their abilities to read and interpret written work for ideological, emotional, personal, and aesthetic values."

No changes necessary. The next time this course is revised, SLO's should be evaluated with a different sample or with a different objective.
DVC Instructional Course SLO Action Plans

634. Language, Literature, and Culture [ENGL-162] belonging to English [ENGL]

Plan for topic "Students completing this course will be able to recognize the fallacies and potential for destructiveness that attend racism, sexism, homophobia, jingoism and xenophobia."

Because the previous action plan found that small group work was effective in achieving SLO 1, we decided to assess a different SLO. In-class discussions that examined multiple perspectives regarding the novel proved effective. This assessment of SLO 4 also proved effective, and we recommend moving on to another outcome the next time this course is assessed.

Plan for topic "Students completing the course will be able to appraise and recognize the validity and worth of cultural and sub-cultural perspectives other than one's own."

It is felt that the essay analysis and small group work on various aspects of African American/Hispanic literature and culture has been effective in keeping students in the class and helping them discover their unique voice fulfill the criteria.

Plan for topic "Students completing the course will be able to identify the contributions made by traditional minority groups, assimilated 19th and 20th century immigrants, and post-WW II arrivals to language, the arts and other social and cultural development in the United States."

It is felt that the essay analysis and small group work on various aspects of African American/Hispanic literature and culture has been effective in keeping students in the class and helping them discover their unique voice fulfill the criteria.

Plan for topic "Students completing ENGL-162 will be able to assess and compare the diverse cultural perspectives embodied in the imaginative and informative literature of American and foreign writers."

It is felt that the essay analysis and small group work on various aspects of African American/Hispanic literature and culture has been effective in keeping students in the class and helping them discover their unique voice fulfill the criteria.

Plan for topic "Students completing the course will be able to identify the contributions made by traditional minority groups, assimilated 19th and 20th century immigrants, and post-WW II arrivals to language, the arts and other social and cultural development in the United States."

It is felt that the essay analysis and small group work on various aspects of African American/Hispanic literature and culture has been effective in keeping students in the class and helping them discover their unique voice fulfill the criteria.

Plan for topic "Students completing the course will be able to identify and explain how different registers or "levels" of the language in which they are fluent are used to create a social identity."

It is felt that the essay analysis and small group work on various aspects of African American/Hispanic literature and culture has been effective in keeping students in the class and helping them discover their unique voice fulfill the criteria.
### DVC Instructional Course SLO Action Plans

**Plan for topic "Students completing the course will be able to appraise and recognize the validity and worth of cultural and sub-cultural perspectives other than one's own."**: 2012/13

A large cohort of students for spring and summer bridge session were highly successful, attesting to the strength of the integrated program.

**Plan for topic "Students completing the course will be able to identify the contributions made by traditional minority groups, assimilated 19th and 20th century immigrants, and post-WW II arrivals to language, the arts and other social and cultural development in the United States."**: 2012/13

To assess this new outcome, the methods and criteria were envisioned in a highly creative way. The use of journals and a book club could be considered for other courses as well.

**Plan for topic "Students completing ENGL-162 will be able to assess and compare the diverse cultural perspectives embodied in the imaginative and informative literature of American and foreign writers."**: 2012/13

To assess this new outcome, the methods and criteria were envisioned in a highly creative way. The use of journals and a book club could be considered for other courses as well.

**Plan for topic "Students completing the course will be able to identify the contributions made by traditional minority groups, assimilated 19th and 20th century immigrants, and post-WW II arrivals to language, the arts and other social and cultural development in the United States."**: 2012/13

Students in the summer bridge program tend to be international students with a high level of motivation and support, and are atypical of the general DVC population. Failure on the outcomes is more often the result of not doing the work rather than lack of ability, so we should reflect further on our assessment methods.

**Plan for topic "Students completing the course will be able to identify and explain how different registers or "levels" of the language in which they are fluent are used to create a social identity."**: 2012/13

Students in the summer bridge program tend to be international students with a high level of motivation and support, and are atypical of the general DVC population. Failure on the outcomes is more often the result of not doing the work rather than lack of ability, so we should reflect further on our assessment methods.

**Plan for topic "Students completing the course will be able to appraise and recognize the validity and worth of cultural and sub-cultural perspectives other than one's own."**: 2008/9

Based on these results along with general observations about the class and a reassessment of the course objectives, the focus was shifted to more literature-based assignments.

**Plan for topic "Students completing the course will be able to identify the contributions made by traditional minority groups, assimilated 19th and 20th century immigrants, and post-WW II arrivals to language, the arts and other social and cultural development in the United States."**: 2008/9

Plan for topic "Students completing this course will be able to analyze literary elements of selected literature including but not limited to plot, characterization, narration/voice, setting, tone, and theme.": 2018/19

The assessment and results were discussed with members of the Literature and Creative Writing Committee of the English Department. These results can be slightly misleading when using them to assess how many students are learning and growing in the course as a whole because the assessment method occurred toward the beginning of the semester when these concepts were still fairly new and being practiced (rather than repeatedly exercised or mastered). What also makes the results ambiguous is the range of majors represented in my class - as fewer than half are English majors who already had prior experience with literary elements and working with literature as we typically do in the discipline.

In the future when considering SLOs for our literature courses, we might want to think of whether there are ways to also have these outcomes reflect skills that are not only important for English majors but for all students and how they can think critically about literature in ways that are practical for their future endeavors as well as the world in which we live.

Plan for topic "Students completing the course will be able to apply critical thinking skills as they analyze, synthesize, and evaluate literature from the Asian American culture and learn to appreciate and understand it.": 2016/17

This course was canceled due to low enrollment. We will assess it next time it is offered.

Plan for topic "Students completing the course will be able to apply critical thinking skills as they analyze, synthesize, and evaluate literature from the Asian American culture and learn to appreciate and understand it.": 2013/14

We are pleased with the success of the online writing journal and plan to keep it the same.

Plan for topic "Students completing the course will be able to differentiate the similarities and differences of various Asian American cultures, their issues and their people such as: Chinese American, Japanese American, Korean American, Filipino American, and Indian American.": 2013/14

We are pleased with the results of the midterm essay and plan to continue using it.

Plan for topic "Students completing the course will be able to trace, through the literature, the points of view of different cultural groups and present their findings.": 2013/14

We are very satisfied with the success of the online group presentation and expect to continue using it.
Plan for topic "Students completing the course will be able to apply critical thinking skills as they analyze, synthesize, and evaluate literature from the Asian American culture and learn to appreciate and understand it.": 2009/10

No changes necessary. The next time this course is revised, SLO should be evaluated with a different sample or with a larger group of classes.

Plan for topic "Students completing the course will be able to differentiate the similarities and differences of various Asian American cultures, their issues and their people such as: Chinese American, Japanese American, Korean American, Filipino American, and Indian American.": 2009/10

No changes necessary. The next time this course is revised, SLO should be evaluated with a different sample or with a larger group of classes.

Plan for topic "Students completing the course will be able to trace, through the literature, the points of view of different cultural groups and present their findings.": 2009/10

No changes necessary. The next time this course is revised, SLO should be evaluated with a different sample or with a larger group of classes.

Plan for topic "Students completing the course will be able to recognize various issues important to Asian Americans such as: heritage, family identity, gender roles, and immigration." 2009/10

No changes necessary. The next time this course is revised, SLO should be evaluated with a different sample or with a larger group of classes.

Plan for topic "Students completing the course will be able to express the historical contexts within which works were composed." 2009/10

No changes necessary. The next time this course is revised, SLO should be evaluated with a different sample or with a larger group of classes.
636. Native American Literatures [ENGL-164] belonging to English [ENGL]

Plan for topic "Students completing the course will be able to analyze, synthesize and evaluate literature from Native American cultures."

: 2016/17

The last time this course was offered, it was canceled due to low enrollment. We will assess it next time it is offered. The literature committee is currently exploring a new rotation cycle for its courses.
Plan for topic "Students completing the course will be able to identify the social and cultural forces which created the literature, music, visual arts and dance of particular periods of African American experience." 2018/19

The assignment asked students to conduct outside research using the databases provided by the DVC Library, which resulted in the majority of students gaining a solid understanding of the social and cultural forces that led to the literature. Students had shared the results of their research in class and the instructor incorporated brief lectures on the historical and social context. While this was largely effective, three students failed to submit research essays for various reasons. Thus, this would be a good outcome to continue to assess to determine whether our success is consistent.

Plan for topic "Students completing the course will be able to apply literary analysis, specifically an understanding of symbolism, to African American literature." 2015/16

This assessment was discussed with the literature committee. While virtually all students succeeded, many earned only a 3. These students did not participate in the Peer Review process, which would have helped them more fully analyze symbolism. This raises the issue of motivating students to participate in this process to develop their ideas and writing. We will discuss this issue in Best Practices sessions and/or Literature Committee meetings.

Plan for topic "Students completing the course will be able to identify literary elements characteristic of each of the major periods in African American literature." 2015/16

This assessment was discussed with the literature committee. There is no prior assessment of this course. While a large majority of the students earned a 3 or higher, many earned only a 3. These students did not participate in the Peer Review process, which would have helped them more fully analyze the symbol. This raises the issue of motivating students to participate in this process to develop their ideas and writing. We will discuss this issue in Best Practices sessions and/or Literature Committee meetings.
638. Latin American Literature [ENGL-167] belonging to English [ENGL]
Plan for topic "Students completing this course will be able to identify historical, sociological, political and psychological issues of concern that shape the various genres of Latin American literature.": 2016/17

While it is concerning that six students (28.5% of the class) failed to submit essays for this assignment, the nature of online classes is often different from face-to-face courses, and success rates tend to be lower in this format. Fifteen students submitted essays, and all 15 were deemed to have met the SLO; therefore, the problem appears to be with the rate of completion of work, rather than the quality of the work or students’ ability to meet the SLO. Our objective is to increase the rate of students who submit assignments, and to keep the rate of submitted assignments that fulfill the above SLO. Note: this course has never been assessed, and thus there is no prior Action Plan.
Plan for topic "Students completing English 168 will be able to express an understanding of the historical context of literature, including how perceptions of living in America have affected the content and style of the represented works and including a study of how this literature reflects the values and issues of their times.": 2016/17

This data suggests that most students in the class were able to read two novels and write a critical analysis of them, including an understanding of the historical context of literature, including how perceptions of living in America have affected the content and style of the represented works. Writing on the theme of "home" in particular, with a focus on the Spokane Reservation and an African American ghetto community, in addition to including secondary research really seemed to bring this SLO to fruition for students.

The Literature Committee might consider deleting the last third of this very long SLO: a study of how this literature reflects the values and issues of their times because the earlier phrase understanding the historical context of literature takes care of it.

Otherwise, the data suggests that the majority of students, with assignments that lend themselves to this Student Learning Outcome, will successful meet it. So the action plan for future instructors of this class: Keep creating assignments that lend themselves to students successfully meeting the objectives of the course. Perhaps the small handful of teachers who teach this course can get together and compare assignments.

Plan for topic "Students completing ENGL-168 will be able to analyze literary qualities of the selected works and apply methods of literary analysis to these works.": 2013/14

All but two took the midterm, and all who did demonstrated proficiency in this objective in that they wrote an essay that analyzed the literature by drawing on characterization, imagery, plot, setting, and/or other literary devices.

Plan for topic "Students completing ENGL-168 will be able to demonstrate an understanding of the historical context of literature.": 2013/14

All who took the midterm earned an A or B because they explored the historical context of the literature. Students were asked to identify the cultural and historical context of each literary work they addressed.
Plan for topic "Students completing ENGL-168 will be able to assess how critics, reviewers, and educators assess and evaluate literature." : 2013/14

While students were not required to incorporate secondary sources into their midterm, some did. In addition, they were asked to write substantive discussions posts and participate in chats that bounced off the weekly lectures and readings. These lectures and readings incorporated primary and secondary literature but the secondary sources as well. In doing so, they were able to assess if those sources deepened, challenged, and/or contradicted their own close readings of the texts. In short, students read outside sources and commented on them in terms of explaining whether or not they agreed with the outside sources. In this sense, the instructor thinks they were able to "assess how critics, reviewers, and educators assess and evaluate literature."

Plan for topic "Students completing ENGL-168 will be able to analyze literary qualities of the selected works and apply methods of literary analysis to these works." : 2012/13

Students performed well, though perhaps not as highly as in face to face courses. As a department, we might further investigate making online teaching more effective.

Plan for topic "Students completing ENGL-168 will be able to demonstrate an understanding of the historical context of literature." : 2012/13

The department could further explore effective ways to integrate teaching historical context with literary analysis.

Plan for topic "Students completing ENGL-168 will be able to assess how critics, reviewers, and educators assess and evaluate literature." : 2012/13

Students performed well on this outcome, through specific response to a piece of criticism. We may well considered the effectiveness of such well-defined assignments.

Plan for topic "Students completing this course will be able to assess, through the study of the literatures, various cultural similarities and differences and the interrelationship of culture and literature." : 2009/10

No changes necessary. The next time this course is revised, SLO should be evaluated with a different objective.

Plan for topic "Students completing this course will be able to identify characteristics and themes of selected writers of different ethnic backgrounds." : 2009/10

No changes necessary. The next time this course is revised, SLO should be evaluated with a different objective.

Plan for topic "Students completing this course will be able to demonstrate ability to read literature critically and research selected authors and works and explore cultural and social attitudes reflected in various literary works." : 2009/10

No changes necessary. The next time this course is revised, SLO should be evaluated with a different objective.

Plan for topic "Students completing this course will be able to assess the expanded American literary canon, including selections from three of the following groups: African American, Native American, Asian American, Chicano, Latino, and European American literatures." : 2009/10
No changes necessary. The next time this course is revised, SLO should be evaluated with a different objective.
Plan for topic "Students completing the course will be able to recognize specific myths of representative cultures from the Americas, Asia, Africa, the Middle East, the Pacific Islands and Europe; and specific allusions to myth in literature and the arts.": 2017/18

Based on the SLO reports filed thus far, we are taking a well-rounded look at ENGL-170 through the lenses of four different SLOs. We will look to continue this trend, as well as look at how what is being assessed in ENGL-170 speaks to what is being assessed in other lit courses and look for trends. Overall we are happy with the student learning taking place in this class.

Plan for topic "Students completing the course will be able to write a paragraph describing the primary attitude or belief reflected in a myth.": 2014/15

At this time it is felt that the emphasis placed upon students writing and connecting their skills to world mythology appears to be working. Retention is high and so is student success, and yet we would like to consider how to better differentiate between proficiency and competency in the methods. We plan to continue using the combination of writing and oral presentation assignments to achieve this.

Plan for topic "Students completing ENGL-170 will be able to identify the cultural norms reflected in myths from around the world.": 2014/15

At this time it is felt that the emphasis placed upon students writing and connecting their skills to world mythology appears to be working. Retention is high and so is student success, and yet we would like to consider how to better differentiate between proficiency and competency in the methods. We plan to continue using the combination of writing and oral presentation assignments to achieve this.

Plan for topic "Students completing the course will be able to write a paragraph summarizing what the myth is describing to the people about their life or culture.": 2014/15

At this time it is felt that the emphasis placed upon students writing and connecting their skills to world mythology appears to be working. Retention is high and so is student success, and yet we would like to consider how to better differentiate between proficiency and competency in the methods. We plan to continue using the combination of writing and oral presentation assignments to achieve this.

Plan for topic "Students completing ENGL-170 will be able to recognize traditional and evolving myths in contemporary American life as they appear in urban legends, rituals, holidays, formal and informal rites of passage, and our choices of perspectives regarding heroes.": 2014/15

At this time it is felt that the emphasis placed upon students writing and connecting their skills to world mythology appears to be working. Retention is high and so is student success, and yet we would like to consider how to better differentiate between proficiency and competency in the methods. We plan to continue using the combination of writing and oral presentation assignments to achieve this.

Plan for topic "Students completing the course will be able to write a paragraph explaining whether a given story is primarily a myth,
At this time it is felt that the emphasis placed upon students writing and connecting their skills to world mythology appears to be working. Retention is high and so is student success, and yet we would like to consider how to better differentiate between proficiency and competency in the methods. We plan to continue using the combination of writing and oral presentation assignments to achieve this.

### Plan for topic "Students completing ENGL-170 will be able to identify the cultural norms reflected in myths from around the world."

2010/11

We continue to be satisfied with respect to student success vis-a-vis this outcome. At this time, it does not seem necessary to modify teaching methodologies. In the future, however, we will consider assessing different outcomes or developing a different assessment methodology.

2014/15

Instructors commented on designing the assessment with a stricter time line or a way of taking into account students who did not complete the assignment.

#### Plan for topic "Students completing the course will be able to write a paragraph describing the primary attitude or belief reflected in a myth."

2012/13

Instructors commented on designing the assessment with a stricter time line or a way of taking into account students who did not complete the assignment.

#### Plan for topic "Students completing the course will be able to write a paragraph summarizing what the myth is describing to the people about their life or culture."

2012/13

Most students who did not meet this outcome were absent or did not complete the assignment, so we should consider better ways to control for this.

#### Plan for topic "Students completing the course will be able to write a paragraph explaining whether a given story is primarily a myth, legend, or folktale."

2012/13

For this rather specific outcome, it is important to consider a common assessment to be completed by as many students as possible.

#### Plan for topic "Students completing ENGL-170 will be able to recognize traditional and evolving myths in contemporary American life as they appear in urban legends, rituals, holidays, formal and informal rites of passage, and our choices of perspectives regarding heroes."

2012/13

### DVC Instructional Course SLO Action Plans

**641. The Bible as Literature [ENGL-172] belonging to English [ENGL]**

**Plan for topic "Students completing the course will be able to analyze assigned biblical texts for character and theme."**: 2017/18

There was no concrete action plan last time because the last plan stated, “The future of this course is undetermined. The Literature Committee is working on a new rotation of courses... We will assess it the next time it is offered.” SRC English decided to offer it this semester. The results were shared with the SLO English rep and standing member of the Lit Committee. We were fairly happy with the success rate. Still, we plan on assessing the same SLO in the future because of its emphasis on literary analysis and critical thinking. We plan on assessing the same SLO with variable measures and focus on in-class multiple choice exams that integrate short essay responses.

**Plan for topic "Students completing the course will be able to analyze assigned biblical texts for character and theme."**: 2015/16

The future of this course is undetermined. The Literature Committee is working on a new rotation of courses. If this course is offered again in the future, we will assess it according to our usual SLO process and practices.

**Plan for topic "Students completing the course will be able to analyze assigned biblical texts for character and theme."**: 2008/9

Based on these results, no changes will be made. The next time the course is revised, a different SLO will be assessed.

**Plan for topic "Students completing the course will be able to explain the influence of the intellectual, political, and spiritual environments of the biblical writers on their content and style."**: 2008/9

Based on these results, no changes will be made. The next time the course is revised, a different SLO will be assessed.

**Plan for topic "Students completing the course will be able to compare literary themes and devices in the Bible with similar themes and devices in other world literatures."**: 2008/9

Based on these results, no changes will be made. The next time the course is revised, a different SLO will be assessed.
DVC Instructional Course SLO Action Plans

642. Queer Literature Across Cultures [ENGL-173] belonging to English [ENGL]
Plan for topic "Students completing this course will be able to Compose written textual analyses of the above features and their significance to individual works or queer literature in general. [E]": 2018/19

Students demonstrated a high level of learning and critical thinking through this assignment. The data suggest that while most students are succeeding, teachers of English 173 should continue to monitor this SLO. As with other literature courses, the co-requisite is 122. Because of this, many students are new to college writing and literary analysis, and it is important to include the basics of literary analysis in their instruction and to scaffold writing assignments.

In the last assessment plan, we discussed retention of online classes. This was an in-person class, and retention was not a significant issue this semester.

Plan for topic "Students completing the course will be able to define and identify literary terms and devices including plot, characterization, narration, setting and theme and apply them to an assigned reading.": 2015/16

As per our last assessment plan, we have discussed retention of online classes in several dept meetings. Some strategies, such as early outreach and various contact methods, have been discussed. We also reviewed Outcomes 1 & 2 and rewrote the course outline.

This assignment asked students to think critically in an "outside the box" way by asking them to interact from their own point of view with a fictional character or adopt a point of view of a writer other than themselves. Students demonstrated a high level of learning and critical thinking through this assignment.

This data suggests that there is no need for changes with respect to curriculum, pedagogy, or assessment methodology; however, teachers of English 173 and other lit courses should continue to monitor and develop assignments that differently assess SLOs regarding literary elements (this is an SLO common to every literature course).
Plan for topic "Students completing this course will be able to Discuss historical, philosophical, social, political, socioeconomic, or aesthetic contexts and concerns represented in selected literature."

In Essay 1, students demonstrated a high level of proficiency articulating an understanding of homosexual identity in a historical context gained from class discussions and the novel.

It is worth noting that this is a new outcome since the course was recently revised. In response to the previous assessment (Fall 2012), course SLOs were edited to conflate two outcomes to this one. This newly worded outcome reflects a crucial aspect of the course curriculum. We are happy thus far with the new course outline. This data suggests that there is no need for changes with respect to curriculum, pedagogy, or assessment methodology; however, teachers will continue to monitor and develop assessments for this kind of SLO in literature courses.

Plan for topic "Students completing the course will be able to define and identify literary terms and devices including plot, characterization, narration, setting and theme and apply them to an assigned reading."

Students remaining in the class all demonstrated understanding of poets use of literary devices. As a department, we should further discussion retention strategies, especially for online courses.

Plan for topic "Students completing the course will be able to articulate in an essay how race, culture, and ethnicity are reflected in the theme of an assigned piece of literature."

Either outcome 1 or 2 should be changed because they are similar.

Plan for topic "Students completing the course will be able to make a connection between the theme of an assigned reading by a gay or lesbian author and the social, cultural or historical context in which it was written."

These numbers do not suggest the need for changes with respect to curriculum, pedagogy or assessment methodology. Accordingly, the plan is to affirm current practice.

Plan for topic "Students completing the course will be able to define and identify literary terms and devices including plot, characterization, narration, setting and theme and apply them to an assigned reading."

DVC Instructional Course SLO Action Plans

643. Science Fiction and Fantasy Literature [ENGL-175] belonging to English [ENGL]

Plan for topic "Students completing the course will be able to identify and analyze the social/cultural relevance of a work of Science Fiction and/or Fantasy literature.": 2017/18

The previous assessment noted that it was a particularly effective teaching technique to ask students to apply a specific critical lens to a text or visual work; such a requirement all but ensures critical thinking is taking place on some level. This assessment is based on the same foundation as the last successful SLO report and had similar findings: this "apply" and "analyze" language in the assignment helps students move up the Bloom's taxonomy pyramid.

Since this course, and literature courses in general seem to be doing well in this area of the rubric, English will look at other SLOs to assess in this and other lit courses, as well as how to better reach those students who do not submit assignments.

Plan for topic "Students completing the course will be able to apply methods of literary analysis to selected works of Science Fiction and Fantasy literature, using elements such as plot, character, point of view, setting, symbolism, foreshadowing, and theme, to demonstrate their understanding of the work.": 2014/15

We are satisfied with the success of the methods at this time. In the future we are considering assessing ENGL 170 in some different areas, beyond those already examined, including specific themes, different genres, etc.

Plan for topic "Students completing the course will be able to read an unfamiliar work of Science Fiction and/or Fantasy literature, identify its literary elements and explain the attributes which make this work representative of the genre.": 2014/15

We are satisfied with the success of the methods at this time. In the future we are considering assessing ENGL 170 in some different areas, beyond those already examined, including specific themes, different genres, etc.

Plan for topic "Students completing the course will be able to identify and analyze the social/cultural relevance of a work of Science Fiction and/or Fantasy literature.": 2014/15

644. The Graphic Novel as Literature [ENGL-176] belonging to English [ENGL]

Plan for topic "Students completing this course will be able to apply literary and/or visual criticism to graphic novels.": 2018/19

1. Successful result: We chose this SLO as it was assessed last time, and it was concluded that "We will continue to assess this topic since literary criticism is so essential to this course and all our lit courses." The previous assessor was happy with the results in this area. I’m very happy with the success here, as the entire course demonstrated the ability to take theory and use it as a tool to analyze a graphic novel. In particular, most of the students 9/15 demonstrated excellence with applying theory to the graphic novel. This is especially impressive, as in the first commentary, early in the course, the success rate was lower, and only 3/15 demonstrated excellence in this area. Finally, this is particularly important as this is a first college literature course for a number of the students.

a. Small class: The small class size did have the potential advantage that might explain this result. We were able to build a tight community, and I was able to work one-on-one with many students, providing a level of support and scaffolding which is difficult to achieve in literature courses with 45 students.

b. Recursive model/revision: Students composed three short essay commentaries across the course, each asking them to analyze the text in terms of visual and/or literary theory. In between each essay response, students completed practice paragraphs. Students could also revise the first and second commentaries if they did not pass this main SLO. This process-based methodology allowed students to develop this challenging analytical skill.

2. Next steps:

a) Continue growth model approach: This result confirms that the course is helping students to learn how to apply academic criticism to a graphic literature, a key skill for all literature courses. In order to maintain this level of success, it will be critical to continue the process-based methodology, one in which students are guided via a growth-mindset based model. As many of the students are new to college literary analysis, it’s critical that we find intentional ways to help students have considerable practice, with opportunity for revision, to develop.

b) Future Assessment: We have assessed this SLO for two cycles. For the next cycle, we should dig into another component, such as F) Identify and appraise the historical and contemporary implications of the graphic novel form, including its influence from (and on) other art forms, such as film, visual art, and textual literature. This will allow us to see how well students are seeing graphic literature in the greater cultural and historical context.

Plan for topic "Students completing this course will be able to apply literary and/or visual criticism to graphic novels.": 2015/16

The assessment plan was discussed with the Literature Committee in our department. Based on the previous assessment, we decided to assess a different assessment topic.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to recognize and analyze the unique artistic and literary features of the graphic novel." 2013/14

It was determined after assessment that SLO #1 and SLO #2 were too similar for future assessment. It has been suggested we swap out #2 with another of the objectives from the course outline. Also, The Watchmen is a very complex text and as many of the students in the course were relatively new to writing literary analysis, this was an impressive result. For some it is their first college writing course.

Plan for topic "Students completing the course will be able to critically analyze a range of graphic novels/novellas, their texts and visual component(s)." 2013/14

As noted for SLO #1, we have determined that SLO #1 and SLO #2 are too similar and need to be swapped out.

Plan for topic "Students completing the course will be able to identify and appraise the historical and contemporary implications of the graphic novel art form." 2013/14

Generally satisfied with the results. About 5 students wrote thoughtful reflections on process that did not include a discussion of historical context. Though their responses revealed an implied knowledge of how to write and discuss comics, they did not explicitly point to historical precedents.

Plan for topic "Students completing the course will be able to recognize and analyze the unique artistic and literary features of the graphic novel." 2011/12

We are satisfied by the results and the quality of the final essays in general, in which students demonstrated the ability to interpret Watchmen using visual and literary elements.

Plan for topic "Students completing the course will be able to critically analyze a range of graphic novels/novellas, their texts and visual component(s)." 2011/12

Students struggled with this assignment, more than the final essay, likely because they needed to look for textual/visual features shared across texts. We are satisfied with the results as the assignment provided practice and feedback that allowed students to be more successful in the final essay.

Plan for topic "Students completing the course will be able to identify and appraise the historical and contemporary implications of the graphic novel art form." 2011/12

We would like to find a more inventive or challenging way to reach this outcome.
Plan for topic "Students completing the course will be able to apply methods of literary analysis to selected works of children's literature, using elements such as plot, character, point of view, setting, symbolism, foreshadowing, and theme, to demonstrate their understanding of the work." : 2017/18

The assessment and results were discussed with the Literature Committee in our department. The previous action plan suggested that we focus on the specific aspects of this SLO, which we did. This year's data suggests that the current mode of instruction on literary elements in English 177 is effective. The data from this year, along with the previous assessment, show that we do a good job teaching toward SLO B. Therefore, the next time we assess 177, it would be good to look at one of the other SLOs, such as SLO E because it focuses on multicultural groups and SLO G because it encompasses traditional and contemporary works.

Plan for topic "Students completing the course will be able to apply methods of literary analysis to selected works of children's literature, using elements such as plot, character, point of view, setting, symbolism, foreshadowing, and theme, to demonstrate their understanding of the work." : 2014/15

It is felt that students were successful in the methods utilized for this course and next time there could be more focus on specific aspects of theme, picture books, character, and plot.

Plan for topic "Students completing the course will be able to read an unfamiliar work of children's literature and identify and explain the attributes which make this work representative of the genre." : 2014/15

It is felt that students were successful in the methods utilized for this course and next time there could be more focus on specific aspects of theme, picture books, character, and plot.

Plan for topic "Students completing the course will be able to identify and analyze in a picture book the visual, spatial, and textual elements which support the theme of the text." : 2014/15

It is felt that students were successful in the methods utilized for this course and next time there could be more focus on specific aspects of theme, picture books, character, and plot.
## DVC Instructional Course SLO Action Plans

**Plan for topic "Students completing the course will be able to apply methods of literary analysis to selected works of children's literature, using elements such as plot, character, point of view, setting, symbolism, foreshadowing, and theme, to demonstrate their understanding of the work."**: 2012/13

Although this is a successful result, I think the next time the class is taught more attention needs to be paid to informing students that their ability to follow the conventions of writing about literature will impact their grades.

**Plan for topic "Students completing the course will be able to read an unfamiliar work of children's literature and identify and explain the attributes which make this work representative of the genre."**: 2012/13

Student responses to an unfamiliar text were generally first rate. This was a wonderful exercise and a good test of what they had learned. I suggested other instructors try a similar approach in the future.

**Plan for topic "Students completing the course will be able to identify and analyze in a picture book the visual, spatial, and textual elements which support the theme of the text."**: 2012/13

Each week, students were asked to present on picture books informally as part of class discussion. In the future, I would suggest an activity like this be added to the curriculum as a graded activity.

**Plan for topic "Students completing the course will be able to apply methods of literary analysis to selected works of children's literature, using elements such as plot, character, point of view, setting, symbolism, foreshadowing, and theme, to demonstrate their understanding of the work."**: 2010/11

These very successful results do not suggest the need for changes with respect to curriculum, pedagogy, or assessment methodology. Accordingly, the plan is to affirm current practice with one change which has already been implemented. That is, we are hopeful that the new method of distributing course assessments will contribute to instructor awareness of SLOs; we further plan to implement strategies for teachers who are new to the course to access previous best practices.

**Plan for topic "Students completing the course will be able to read an unfamiliar work of children's literature and identify and explain the attributes which make this work representative of the genre."**: 2010/11

These very successful results do not suggest the need for changes with respect to curriculum, pedagogy, or assessment methodology. Accordingly, the plan is to affirm current practice.

**Plan for topic "Students completing the course will be able to apply methods of literary analysis to selected works of children's literature, using elements such as plot, character, point of view, setting, symbolism, foreshadowing, and theme, to demonstrate their understanding of the work."**: 2009/10

Affirmation and reinforcement of current methods and curriculum.

**Plan for topic "Students completing the course will be able to read an unfamiliar work of children's literature and identify and explain the attributes which make this work representative of the genre."**: 2009/10

Affirmation and reinforcement of current methods and curriculum.
attributes which make this work representative of the genre.”: 2009/10

Affirmation and reinforcement of current methods and curriculum.

Plan for topic "Students completing the course will be able to identify and analyze in a picture book the visual, spatial, and textual elements which support the theme of the text.”: 2009/10

Affirmation and reinforcement of current methods and curriculum.

<tr>
<th>Plan for topic &quot;Students completing this course will be able to analyze selected works of YA [Young Adult] Literature.&quot;</th>
<th>2017/18</th>
</tr>
</thead>
<tbody>
<tr>
<td>Literary analysis is the common thread of all DVC English courses, and thus was a good choice for the first time ENGL-178 is assessed through the SLO assessment process. For future processes, it would be interesting to look at different SLOs: for example, SLO E, &quot;Apply literary theory and criticism to YA literature,&quot; or SLO F, &quot;Apply theories of adolescent psychological, emotional, and cognitive development as represented in YA literature.&quot;</td>
<td></td>
</tr>
</tbody>
</table>

<tr>
<td>The last time this course was offered, it was canceled due to low enrollment. We will assess it next time it is offered. The literature committee is currently working on a new rotations cycle for its lit courses.</td>
<td></td>
</tr>
</tbody>
</table>
Plan for topic "Students completing this course will be able to discuss historical, philosophical, social, political, or aesthetic context and concerns to selected literature.": 2017/18

The assessment and results were discussed with the Literature Committee in our department.

This course has not been offered in several years so there is no relevant previous assessment plan. The data suggests that current methods of instruction for SLO E are working well; curriculum for the course should continue to include dramatic literature that is representative of various social and/or political settings, and continue to present this material in the context of those settings. This reviewer recommends that this SLO be assessed next cycle as well because it is central to the intent of the course. New instructors are at liberty to select a different set of readings to be studied; therefore student progress on this SLO should be assessed in the context of new materials.

Plan for topic "D. Students completing this course will be able to examine and interpret ways form and delivery influence content and theme in literature of the drama.": 2017/18

The data suggests that current methods of instruction for SLO E are working well; the course should continue to include attendance of a variety of live performances of dramatic literature. These performances should represent a variety of performance practices so that students can observe various ways dramatic literature can be interpreted from page to stage.

This reviewer recommends that this SLO be assessed next cycle as well since it is central to the intent of the course. New instructors are at liberty to select a different set of performances to be observed; therefore student progress on this SLO should be looked at in the context of new performances.

Plan for topic "Students completing the course will be able to read stage and lighting directions in an assigned play and analyze how these directions serve to direct the audience to the theme of the scene and the play.": 2015/16

The Department is reordering the sequence of course SLO assessments so the distribution of course assessments occurs more evenly. This course will be assessed Fa 17 and reported by 12/31/18.

DVC Instructional Course SLO Action Plans

648. Multicultural Literature by American Women [ENGL-190] belonging to English [ENGL]
Plan for topic "Students completing the course will demonstrate their abilities to interpret women's literature for ideological and aesthetic values."

Because we assessed topics 2 and 3 last time, we decided to assess Topic 1. It was suggested that this cycle we add models of strong literary analysis, which we did. This lesson worked because students had the opportunity to see literary models of aesthetic devices, discuss themes, and then craft a thesis from which they then wrote an essay. Next assessment cycle we will focus on Topic 2 so we can explore students' understanding of the intersection of race, class, and culture with gender.

Plan for topic "Students completing the course will demonstrate their abilities to interpret women's literature for ideological and aesthetic values." 2017/18

The department feels that the assessment tool is appropriate for gathering the data. To possibly improve performance on this learning outcome, the instructor could provide models of literary analysis by professional writers, successful students, and from their own work. The department will then compare results after the next assessment cycle to see if this approach improves student performance on this learning outcome.

Plan for topic "Students completing the course will read women's literature and analyze how race, culture, ethnicity, and class have affected women's lives." 2014/15

The department feels that the assessment tool is appropriate for gathering the data. The choice of poems illustrated ways race, culture, ethnicity and class impact women's lives. The pairing of these two poems helped students succeed at understanding this learning outcome. In future assessments, instructors will evaluate whether this pairing continues to have these results.

Plan for topic "Students completing the course will be able to analyze women's literature and identify the differences and similarities in fiction, prose, drama, and poetry." 2014/15

The department feels that the assessment tool is appropriate for gathering the data. The comparison and contrast of ways a literary device was used in two literary genres demonstrated the learning outcome to the students. In future, this assessment could be applied to additional literary genres to elicit a more global understanding of the outcome.

Plan for topic "Students completing the course will demonstrate their abilities to interpret women's literature for ideological and aesthetic values." 2010/11

Although the students are successful according to the identified criteria, instructor will work on this outcome to move future students into the top (very well) category with respect to this outcome. This involves working more closely with students on their individual projects so they are focused on exploring the issues that lead to the outcome. Moreover, the instructors on the two campuses will meet to share strategies for success and to discuss the criteria.

Plan for topic "Students completing the course will read women's literature and analyze how race, culture, ethnicity, and class have affected women's lives." 2010/11

### Plan for topic "Students completing the course will be able to demonstrate receptivity to responses by classmates and instructor."

The assessment and results were discussed with members of the Creative Writing Committee in our department. Our last action plan suggested that "some of the assessment topics seem[ed] rather broad and very vague" and "suggested that more specific aspects of student work, perhaps specific components of a piece of fiction and the creative writing process, be analyzed." We followed this directive and focused on certain aspects of fiction writing. This methodology worked well because students were able to understand what model writers were achieving and therefore were mostly successful. Next time, we plan to address the same SLO (E), but we will focus on poetic or dramatic elements.

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to analyze literature with attention to theme, tone, style, character, plot, narrative, image, and language and be able to offer helpful commentary and constructive criticism.": 2011/12

The instructors have determined that this SLO was met by the majority of students (83%). In the next SLO cycle, we can modify this assessment topic to be more focused, since the current assessment topic seems to cover two different sets of skills.

Plan for topic "Students completing the course will be able to appropriately construct and develop their own short stories, which include attention to plot, theme, and character.": 2011/12

The instructors have determined that this SLO was met by the majority of students (78%). As a department, we should continue to foster diverse, professional faculty members capable of teaching fiction writing as well as analysis, experts who are published authors themselves.

Plan for topic "Students completing the course will be able to revise, edit, and proofread a final draft of a short story, focusing on theme, plot, language, tone, and style.": 2011/12

The instructors have determined that this SLO was met by the majority of students (78%). We suggest that a different outcome or method should be used in the next assessment cycle for one of the three assessment topics.

Plan for topic "Students completing the course will be able to analyze literature with attention to theme, tone, style, character, plot, narrative, image, and language and be able to offer helpful commentary and constructive criticism.": 2008/9

No changes necessary. The next time this course is revised, SLOs should be evaluated with a different sample or with a different outcome.

Plan for topic "Students completing the course will be able to appropriately construct and develop their own short stories, which include attention to plot, theme, and character.": 2008/9

No changes necessary. The next time this course is revised, SLOs should be evaluated with a different sample or with a different outcome.

Plan for topic "Students completing the course will be able to revise, edit, and proofread a final draft of a short story, focusing on theme, plot, language, tone, and style.": 2008/9

No changes necessary. The next time this course is revised, SLOs should be evaluated with a different sample or with a different outcome.
Plan for topic "Students completing this course will be able to demonstrate and practice the creative process.":: 2016/17

In the last assessment cycle, we assessed various elements of poetry. This semester we wanted to focus on the creative process since it is the most necessary and immediate element of this class. The generative aspect of this course is key. This assessment was discussed with the department's literature and SLO committees, which will encourage instructors to continue to devise prompts that allow students to tap into their own experiences to produce their own creative work.

Plan for topic "Students completing the course will be able to demonstrate an aesthetic awareness and appreciation of the art of poetry.":: 2015/16

The department is reordering the sequence of course SLO assessments so the distribution of course assessments occurs more evenly. This course will be assessed in FA17 or SP18 and reported by 12/31/18.

Plan for topic "Students completing ENGL-224 will be able to demonstrate and practice the creative process.":: 2015/16

The department is reordering the sequence of course SLO assessments so the distribution of course assessments occurs more evenly. This course will be assessed in FA17 or SP18 and reported by 12/31/18.

Plan for topic "Students completing ENGL-224 will be able to demonstrate and practice the creative process.":: 2013/14

The outcome seems a bit general--we plan to assess a different outcome next time.

Plan for topic "Students completing the course will be able to demonstrate an aesthetic awareness and appreciation of the art of poetry.":: 2013/14

The outcome seems a bit general--we plan to assess a different outcome next time.

Plan for topic "Students completing the course will be able to demonstrate a critical awareness of the elements of poetry.":: 2013/14

As the success rate on this outcome is a bit lower than for the others, we plan to put more emphasis on analyzing the elements of poetry (which may take more effort if this is not included in the textbook).

Plan for topic "Students completing ENGL-224 will be able to distinguish and discuss the elements of poetry.":: 2013/14

As the success rate on this outcome is a bit lower than for the others, we plan to put more emphasis on analyzing the elements of poetry (which may take more effort if this is not included in the textbook).

Plan for topic "Students completing the course will be able to engage in intensive practice in dealing with those elements.":: 2013/14

Next time, we will make sure to ask about the number of students assessed, not just the number on the final grading roster.

Plan for topic "Students completing ENGL-224 will be able to evaluate and critique the student’s own work as well as the work of peers.":: 2013/14

Next time, we will make sure to ask about the number of students assessed, not just the number on the final grading roster.
Plan for topic "Students completing the course will be able to demonstrate an aesthetic awareness and appreciation of the art of poetry.": 2010/11
While the results fall approximately within the 75% success rate, this is not as successful as we would like. The next time this course is evaluated, instructors will meet to discuss the outcome and to design a strategy for emphasizing the skill over the course of the entire semester.

Plan for topic "Students completing ENGL-224 will be able to demonstrate and practice the creative process.": 2010/11
While the results fall approximately within the 75% success rate, this is not as successful as we would like. The next time this course is evaluated, instructors will meet to discuss the outcome and to design a strategy for emphasizing the skill over the course of the entire semester.

Plan for topic "Students completing the course will be able to demonstrate a critical awareness of the elements of poetry.": 2010/11
Again, the results are surprising in that they represent a decline from the success previously reported. In all likelihood, the decline is attributable to an increased rigor with respect to evaluation. But it is necessary for the instructors of this class to meet and define more clearly the methods and the criteria for success. An immediate focus on assessment methodology seems more appropriate than a change to the curriculum.

Plan for topic "Students completing ENGL-224 will be able to distinguish and discuss the elements of poetry.": 2010/11
Again, the results are surprising in that they represent a decline from the success previously reported. In all likelihood, the decline is attributable to an increased rigor with respect to evaluation. But it is necessary for the instructors of this class to meet and define more clearly the methods and the criteria for success. An immediate focus on assessment methodology seems more appropriate than a change to the curriculum.

Plan for topic "Students completing the course will be able to engage in intensive practice in dealing with those elements.": 2010/11
We are satisfied with respect to this outcome and will continue with the same pedagogy. It is likely, however, that the shifts to assessment methods that take place with respect to the first two outcomes will have an impact on this outcome as well.

Plan for topic "Students completing ENGL-224 will be able to evaluate and critique the student's own work as well as the work of peers.": 2010/11
We are satisfied with respect to this outcome and will continue with the same pedagogy. It is likely, however, that the shifts to assessment methods that take place with respect to the first two outcomes will have an impact on this outcome as well.

Plan for topic "Students completing ENGL-224 will be able to distinguish and discuss the elements of poetry.": 2008/9
No changes necessary. The next time this course is revised, SLO's should be evaluated with a different sample or with a different objective.

Plan for topic "Students completing the course will be able to demonstrate a critical awareness of the elements of poetry.": 2008/9
No changes necessary. The next time this course is revised, SLO's should be evaluated with a different sample or with a different objective.

Plan for topic "Students completing the course will be able to engage in intensive practice in dealing with those elements.": 2008/9
No changes necessary. The next time this course is revised, SLO's should be evaluated with a different sample or with a different objective.

No changes necessary. The next time this course is revised, SLO's should be evaluated with a different sample or with a different objective.
### DVC Instructional Course SLO Action Plans

#### 652. Creative Nonfiction Writing [ENGL-225] belonging to English [ENGL]

Plan for topic "Students completing this course will be able to compose, shape and organize creative non-fiction works, appropriately employing strategies of successful narrative expression;": 2017/18

This course has not been assessed since 2008, and in 2014 the future of this course was undetermined, so basically we're starting anew with this action plan. For this assessment, this activity worked well for students to achieve success with this SLO. Since we've recently reintegrated this course into the Creative Writing course rotation, it would be beneficial for the department to assess this SLO again the next time it's assessed to compare findings. Beyond this, and for future SLO assessment, we should consider assessing a different SLO, perhaps B, F, or H because they have not ever been assessed.

Plan for topic "Students completing the course will be able to analyze and evaluate professional authors from at least two cultural perspectives found in the United States other than that of Euro-American culture.": 2015/16

The future of this course is undetermined. The Literature Committee is in the process of reviewing a new course rotation. Once it is offered, we will assess it according to our usual process and practices.

Plan for topic "Students completing the course will be able to analyze and evaluate professional authors from at least two cultural perspectives found in the United States other than that of Euro-American culture.": 2008/9

No changes necessary. The next time this course is revised, SLO's should be evaluated with a different sample or with a different objective.

Plan for topic "Students completing the course will be able to analyze and evaluate professional authors from at least two cultural perspectives found in the United States other than that of Euro-American culture.": 2008/9

No changes necessary. The next time this course is revised, SLO's should be evaluated with a different sample or with a different objective.

653. Early English Literature [ENGL-252] belonging to English [ENGL]

Plan for topic "Students completing the course will be able to compare, contrast and evaluate characteristics of significant authors and styles in early English literature." : 2017/18

<table>
<thead>
<tr>
<th>The assessment and results were discussed with members of the Literature Committee in our department. The previous assessment report, conducted in 2014/2015, noted the lack of clarity in SLO C. The department has submitted a new course description with revised SLOs that provide greater clarity.</th>
</tr>
</thead>
</table>

Although the majority of students successfully completed the assessment of current SLO A, students would benefit from more practice identifying the stylistic features of short passages separated from their broader textual context. In particular, students need practice applying literary terms to identify and distinguish between texts. This reviewer recommends providing student with additional opportunities earlier in the semester (e.g. practice quizzes, small group activities, class discussions) to use specific literary terminology to identify and compare the styles used in different texts.

Plan for topic "Students completing the course will be able to identify and describe evidence of evolution of style and manner in the written form of the language." : 2014/15

<table>
<thead>
<tr>
<th>Assessment two seems vague and something about literary history and, in particular, the way it is influenced by cultural and social history might be a better way of analyzing student success.</th>
</tr>

DVC Instructional Course SLO Action Plans

655. Survey of Early American Literature [ENGL-262] belonging to English [ENGL]
Plan for topic "Students completing ENGL-262 will be able to read and interpret literature on a figurative as well as literal level, identifying literary elements such as theme, setting, etc.": 2018/19

Assessment results were shared with others who recently taught this course. Most students did well. It's illuminating to look at the few who didn't due to lack of explication or detail, or clarity of expression or analysis. This relates to previous action plans in 2015/2016, which noted concerns about developing students' writing skills. In that assessment, as well as the prior one in 2013/2014, another action plan included developing specific learning outcomes that would be more useful for teaching this. This year's results reinforce the relevance of those goals, pointing towards more reinforcement of particular literary analysis skills, and of how students should apply these in given contexts.

Plan for topic "Students completing ENGL-262 will be able to compare, contrast, and evaluate characteristics of significant authors and styles in early American literature.": 2015/16

The assessment and results were discussed with the Literature Committee in our department. The midterm showed that virtually all students were proficient in distinguishing among authors’ voices and styles as well as finding common threads as students were asked to explore Puritan thought, Native American worldviews, or the intersection of indigenous and European world views. We found that students could identify similarities and differences, but some could not write critically about them because of lack of writing skills. The literature committee will discuss viable options for addressing writing concerns (e.g., holding best practices sessions, compiling a packet on writing about literature, and so on).

Plan for topic "Students completing ENGL-262 will be able to compare and contrast the complementary and competing world views as they are expressed in and shaped the literature of this period.": 2015/16

The assessment and results were discussed with the Literature Committee in our department. The reading response showed that students were able to discern certain values key to the Native groups discussed (Haudenosaunee and Lakota), such as reciprocity, responsibility, and self-purpose, and then compare and contrast these with European/Christian views of individuality and ownership. In our previous assessment cycle, we stated we would continue to work on crafting specific learning outcomes which can help enhance the discussion and learning process. While we have not done so, we plan to do so the next time Title V rewrites are due.

656. Survey of Late American Literature [ENGL-263] belonging to English [ENGL]

Plan for topic "Students completing this course will be able to analyze complex works of literature on a figurative as well as literal level."

The assessment and results were discussed with the current course instructor and members of the SLO and Literature Committee. Overall, the results show successful completion of the SLO; however, we should consider revising the language of literal versus figurative reading to better reflect the process of close reading and critical analysis that is actually taking place around these texts. Example of language that might work better: "Students completing this course will be able to move from summary of the surface level (or observational level) of a text to a more comprehensive analysis or argument about that text (including reading multiple layers of meaning or symbolism, etc.)."

Plan for topic "Students completing the course will be able to trace the evolution in American literature (style, form, subject, and genre) of the major periods from 1865 to the present."

For our next assessment, we should work on extending this assessment across time periods.

Plan for topic "Students completing the course will be able to identify, describe and analyze the historical and cultural contexts of the literary works under examination."

Students did very well on this assessment. We will continue to use such focused topics to guide our development of effective and thought-provoking assessment tools.

Plan for topic "Students completing the course will be able to analyze how American authors address the cultural construct of what it means to be American."

Instructional methods appear to be successful; perhaps we will need to modify the assessment technique to achieve more meaningful results.

Plan for topic "Students completing the course will be able to identify, describe and analyze the historical and cultural contexts of the literary works under examination."

Instructional methods appear to be successful; perhaps we will need to modify the assessment technique to achieve more meaningful results.
<table>

<th>2018/19</th>
</tr>
</thead>
<tbody>
<tr>
<td>I think this course would benefit from a pre-requisite requirement. Students come to the class with widely varying levels of preparation, with some who can write quite sophisticated literary analyses and others who are interested in literature but have very rudimentary reading and writing skills. For future assessments, we should look at B. Analyze various aspects of literature in selected works; E. Apply historical, philosophical, social, political, aesthetic, or critical contexts to selected works; or G. Compose written textual analyses that discuss the features of early world literature and their significance to individual works or early world literature in general.</td>
<td></td>

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing the course will be able to analyze the similarities and differences in subject, theme, literary form, and/or style in works from various cultures (including Middle East, Europe, Africa, Asia, and the Americas).&quot;</th>
<th>2015/16</th>
</tr>
</thead>
<tbody>
<tr>
<td>The assessment and results were discussed with the Literature Committee in our department. Though per our last assessment we planned to assess another topic this time, we decided to reassess this topic since (a) the course has not been assessed recently, and (b) it's a particularly rich and apt topic. The log entries and class discussion growing out of them showed that a large majority of students could not only identify a theme, question or issue across the three traditions but also could begin to articulate in writing and class discussion the implications of their similarities and differences. For example, a theme students were keen to explore in their writing and discussion was the treatment of women in Genesis, the Christian Gospels, Augustine's Confessions and the Qur'an. They probed the characters of Eve and other women in the Hebrew Bible, the Virgin Mary in the Christian Gospels, Augustine's mom and lover in the Confessions and Muhammad's first wife Khadija in the Qur'an. We found that students could identify similarities and differences, but needed class discussion to more deeply probe the differences and what they suggest about the culture and religion. The literature committee will discuss ways to improve students' abilities to do this deeper analysis on their own (e.g., holding best practices sessions, discussing further scaffolding, linking this assignment to a midterm or essay option, and so on).</td>
<td></td>
</tr>
</tbody>

</tr>
</thead>
</table>
Plan for topic "Students completing the course will be able to analyze the evolution of the literature as it developed in civilizations around the world from the beginnings of literature to 1650.": 2008/9

Based on these results, no changes will be made. The next time the course is revised, a different SLO will be assessed.
Plan for topic "Students completing the course will be able to analyze the similarities and differences in subject, theme, literary form, and/or style in works from various cultures (including the Middle East, Europe, Africa, Asia, and the Americas).": 2018/19

Students did not do as well on this assessment as they have in the past due to the small sample size at this late date in the semester and the fact that they only had 20 minutes to complete this ungraded comparison and did not have their textbooks because we were working from a handout that day. This assessment topic, among others, was assessed on the final exam during the previous assessment in 2013/2014, and 89% (8/9) of students succeeded. The 2013/2014 action plan suggested the topic was too broad and that students needed more guidance to organize their thoughts. Looking at the 3 out of 11 students who received 3 on their assessment this time, I would agree with the 2013/2014 action plan that the breadth of the topic posed a challenge for students. Students may have forgotten details about an earlier author, failed to give enough specifics on 3 authors, confused details about specific authors, or gone on a tangent to an earlier author that was unclear. To assist students in keeping the range of authors clear in their minds, I could engage in more review and synthesis activities, and ask students to complete more responses on the readings. I could also assist students more in pre-writing strategies in order to get clear in their minds the comparisons and contrasts they wanted to make among 3 authors with respect to at least two of the literary elements. We could also address strategies for how to organize an analysis of 3 authors and two literary elements. The assessment and results will be discussed with members of the Literature Committee in the English Department.

Plan for topic "Students completing the course will be able to analyze the similarities and differences in subject, theme, literary form, and/or style in works from various cultures (including the Middle East, Europe, Africa, Asia, and the Americas).": 2016/17

This course was reported on 7-21-2014. It is currently not offered. We will assess it next time it is offered.

Plan for topic "Students completing the course will be able to analyze the similarities and differences in subject, theme, literary form, and/or style in works from various cultures (including the Middle East, Europe, Africa, Asia, and the Americas).": 2013/14

This assessment topic seems too broad and failed to provide students much guidance for their final exam essay. In light of such open-ended questions students require training to organize their thoughts more systematically, rather than providing a too general comparison.

Plan for topic "Students completing the course will be able to read literature with critical skill, and an understanding of the relationship between culture and literary form and idea": 2013/14

This assessment topic is a bit broad and ambiguous, and should be rewritten to clarify what kind of "idea" is referred to. The instructor should emphasize historical context and the use of literary examples more in relation to the major essays.

Plan for topic "Students completing the course will be able to analyze the evolution of literature as it developed in civilizations around
Plan for topic "Students completing the course will be able to analyze the similarities and differences in subject, theme, literary form, and/or style in works from various cultures (including the Middle East, Europe, Africa, Asia, and the Americas).": 2008/9

Based on these results, no changes will be made. The next time the course is revised, another SLO will be assessed.

Plan for topic "Students completing the course will be able to read literature with critical skill, and an understanding of the relationship between culture and literary form and idea": 2008/9

Based on these outcomes, no changes will be made. The next time the course is revised, another SLO will be assessed.

Plan for topic "Students completing the course will be able to analyze the evolution of literature as it developed in civilizations around the world from the seventeenth century through modern times.": 2008/9

Based on these results, no changes will be made. The next time the course is revised, a different SLO will be assessed.
659. Independent Study [ENGL-298] belonging to English [ENGL]

Plan for topic "Research and create a unit of study involving several science fiction/fantasy short stories appropriate for the high school/community college level. [N/A]": 2018/19

This course hasn't been successfully offered since fall 2017. We will assess it as soon as it's offered again.

Plan for topic "Research and create a unit of study involving several science fiction/fantasy short stories appropriate for the high school/community college level. [N/A]": 2015/16

This section of ENGL-298 was a success in terms of student learning and their application of a host of critical thinking skills. It is worth noting that due to the nature of the Independent Study, the students each talked with me multiple times during the constructions of the large, flexible, open-ended assignment covered in this report, and made many revisions along the way. It was a recursive, instructive process, and not a traditional assessment moment. By the time they submitted final drafts, I knew their projects well, and we both were satisfied with the final product.

Assessing the SLOs of English 298 in a consistent way is an interesting proposition. It seems like ENGL-298 is not offered very often, but perhaps if offerings increase, and it begins to conform to one of a few archetypes (e.g., this one, the future teacher of English version, or another further study in literature version), it might be useful to consider making the SLOs consistent. For now, this version of ENGL-298 satisfied its SLOs, and this report and course outline will perhaps be useful to future ENGL-298 professors and students.
Plan for topic "Students completing this course will be able to solve a system of equations and find the values of each variables and roots of quadratic equations." : 2017/18

This course is part of a new program and has been included in a three year assessment plan that has been developed with the SLO committee. ENGTC-111 has yet to be taught and will be formally assessed in the FA20 semester.

Plan for topic "Students completing this course will be able to calculate the required material based on volume, perimeters and surface areas of needed parts and then use trigonometry and algebra to locate linear points on an object for manual and CNC machining applications." : 2017/18

This course is part of a new program and has been included in a three year assessment plan that has been developed with the SLO committee. ENGTC-111 has yet to be taught and will be formally assessed in the FA20 semester.

Plan for topic "Students completing this course will be able to create numerical equations based on measurements taken from three dimensional manufactured objects and convert fractions into decimal numbers for manual or machine input" : 2017/18

This course is part of a new program and has been included in a three year assessment plan that has been developed with the SLO committee. ENGTC-111 has yet to be taught and will be formally assessed in the FA20 semester.
661. Introduction to Technical Drawing [ENGTC-119] belonging to Architecture/Engineering [ENGTC]

Plan for topic "Students completing this course will be able to identify the six standard and three primary views of a basic multi-view drawing.": 2017/18

| This topic is being instructed throughout the semester. Students who successfully completed the course demonstrate competence in this learning outcome. No action is needed at this time. |

Plan for topic "Students completing this course will be able to identify auxiliary and sectional views of an engineering multi-view drawing.": 2017/18

| This topic is being instructed throughout the semester. Students who successfully completed the course demonstrate competence in this learning outcome. No action is needed at this time. |
662. Principles of Civil Drafting [ENGTC-123] belonging to Architecture/Engineering [ENGTC]

Plan for topic "Students completing this course will be able to identify classifications of topographic maps and interpret also apply map scales.": 2017/18

This course is part of a new program and has been included in a three year assessment plan that has been developed with the SLO committee. ENGTC-123 will be formally assessed during the FA19 semester.

Plan for topic "Students completing this course will be able to use terms and symbols found within topographic maps to describe key features": 2017/18

This course is part of a new program and has been included in a three year assessment plan that has been developed with the SLO committee. ENGTC-111 has yet to be taught and will be formally assessed in the FA20 semester.

Plan for topic "Students completing this course will be able to develop and reproduce topographic drawings created manually and from computer aided drafting.": 2017/18

This course is part of a new program and has been included in a three year assessment plan that has been developed with the SLO committee. ENGTC-111 has yet to be taught and will be formally assessed in the FA20 semester.

DVC Instructional Course SLO Action Plans

Tools were employed and this SLO seems adequate for this time. Programs and services incorporating Mapping, GIS systems, and satellite photographs continue to be integrated into the solar site evaluation as they develop and become more user friendly. The program needs to continue to stay up to date with tools and technologies.

Plan for topic "Students completing the course will be able to design a solar photovoltaic system.": 2012/13

Based on feedback and observations noted in earlier sections and assessments, the process of designing a solar photovoltaic system was simplified and participation made mandatory. Additional changes are not necessary at this point.

Plan for topic "Students completing ENSYS-130 will be able to design a medium size and complexity photovoltaic system.": 2012/13

Based on feedback and observations noted in earlier sections and assessments, the process of designing a solar photovoltaic system was simplified and participation made mandatory. Additional changes are not necessary at this point.

Plan for topic "Students completing the course will be able to install solar photovoltaic systems.": 2012/13

Based on current feedback and observations as well as notes from earlier assessments, this SLO where students install solar photovoltaic systems is appropriate at this time. The biggest wildcard in this area is suitable weather to allow students to work outdoors and have adequate sun for the systems to actually operate. There are several newer systems on the market, and the program will need to make sure it stays current with industry.

Plan for topic "Students completing ENSYS-130 will be able to install a medium size and complexity solar photovoltaic system.": 2012/13

## DVC Instructional Course SLO Action Plans

### 676. Topics in Energy Systems [ENSYS-150] belonging to Electronics/Electricity/Energy Systems [ENSYS]

#### Plan for topic "Students completing this course will be able to identify and quantify the major energy uses in a building": 2019/20

*This is an Experimental Topics Course Number and will be assessed next time it is utilized.*

#### Plan for topic "Students completing this course will be able to identify and quantify the major energy uses in a building": 2015/16

*Modified the data sheet to make it clearer for the next cohort. Measure effectively accomplished objective. This pilot course was revised and republished as ENSYS 125.*

#### Plan for topic "Students completing this course will be able to use standard building performance tools to quantify the state of a building and identify major envelope problems": 2015/16

*Results are satisfactory. In the future, we will attempt to use the equipment at off-campus locations, pending management approval. This pilot course was revised and republished as ENSYS 125.*

#### Plan for topic "Students completing this course will be able to describe and distinguish the elements of the building envelope, including roof, walls, and glazing.": 2015/16

*This exercise accomplished the objective. In the future, it may be beneficial to develop a set of photographs of various building envelopes and assemblies to add to the mix. This pilot course was revised and republished as ENSYS 125.*
Plan for topic "Students completing the course will be able to locate information in the National Electrical Code related to photovoltaic systems.":: 2017/18

Assess in 2020/21 and report by 12/31/21

Plan for topic "Students completing the course will be able to locate information in the National Electrical Code related to photovoltaic systems.":: 2014/15

Given course cancellation and feedback from advisory committee, several changes were made to the course to reflect market conditions and student/employer expectations. Additional hands-on activities and use of diagnostic equipment to analyze installed systems will be incorporated. The course is scheduled again for SP 2016, after which time it will be re-evaluated. Further, the entire ENSYS program has been revised and with the new offering in the FA 2015 college catalog and some targeted advertising, we are planning for an increase in enrollment.

Plan for topic "Students completing the course will be able to work safely with high voltage and high electrical current systems.":: 2014/15

Given course cancellation and feedback from advisory committee, several changes were made to the course to reflect market conditions and student/employer expectations. Additional hands-on activities and use of diagnostic equipment to analyze installed systems will be incorporated. The course is scheduled again for SP 2016, after which time it will be re-evaluated. Further, the entire ENSYS program has been revised and with the new offering in the FA 2015 college catalog and some targeted advertising, we are planning for an increase in enrollment.

Plan for topic "Students completing ENSYS-230 will be able to design small to medium size photovoltaic systems.":: 2014/15

Given course cancellation and feedback from advisory committee, several changes were made to the course to reflect market conditions and student/employer expectations. Additional hands-on activities and use of diagnostic equipment to analyze installed systems will be incorporated. The course is scheduled again for SP 2016, after which time it will be re-evaluated. Further, the entire ENSYS program has been revised and with the new offering in the FA 2015 college catalog and some targeted advertising, we are planning for an increase in enrollment.

Plan for topic "Students completing ENSYS-230 will be able to design larger and complex photovoltaic systems like those seen on small to medium size commercial buildings.":: 2014/15

Given course cancellation and feedback from advisory committee, several changes were made to the course to reflect market conditions and student/employer expectations. Additional hands-on activities and use of diagnostic equipment to analyze installed systems will be incorporated. The course is scheduled again for SP 2016, after which time it will be re-evaluated. **DVC Instructional Course SLO Action Plans**

Plan for topic "Discuss causes and consequences of global climate change.": 2018/19

This type of SLO assessment is now what we would like to do in the future. We would like to be more thoughtful in creating a better assessment and will try to implement it in the Summer 2020 course.
DVC Instructional Course SLO Action Plans

## 682. Low-Intermediate College English Skills [ESL-067] belonging to English [ESL]

### Plan for topic "Students completing this course will be able to compose and punctuate simple sentences": 2018/19

This is a good SLO to assess to see how ESL students are learning. Currently, the ESL program is revising this level to make it beginning/high-beginning focused in order to better serve our students.

### Plan for topic "Students completing this course will be able to read and demonstrate comprehension of a 100 word passages of basic academic prose.": 2015/16

The previous Action Plan indicated no need for changes to the way the course is taught. The results of this assessment indicate that instructors are successfully teaching students comprehension of short academic passages. Another topic will probably be assessed in the next cycle.

### Plan for topic "Students completing this course will be able to compose and punctuate simple sentences": 2015/16

The previous Action Plan indicated no need for changes to the way the course is taught. The results of this assessment indicate that instructors are successfully teaching students basic punctuation. Because this is so central to this course, it will most likely be assessed again in the future.

### Plan for topic "Students completing the course will be able to put five words in alphabetical order.": 2012/13

At this time we are satisfied with these results and believe we can continue to teach the class in its current form.

### Plan for topic "Students completing the course will be able to use an English dictionary.": 2012/13

Although we are satisfied with these results, we would like to make this a more contextualized assessment in which students actually write sentences using the dictionary definition correctly.

### Plan for topic "Students completing the course will be able to ask and respond to simple questions.": 2012/13

Although we are satisfied with these results, this activity was exceedingly difficult for a few students owing to the fact that they have exceedingly little experience speaking English. In the future, instructors might want to choose an easier task.

### Plan for topic "Students completing the course will be able to put five words in alphabetical order.": 2008/9

No SLO-related changes at this time.

### Plan for topic "Students completing the course will be able to use an English dictionary.": 2008/9

No SLO-related changes at this time.

### Plan for topic "Students completing the course will be able to ask and respond to simple questions.": 2008/9

No changes necessary. The next time this course is revised, SLO's should be evaluated with a larger group of classes or with a different objective.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to demonstrate proficiency in short oral presentations."
None. Keep the SLO as it is.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to demonstrate comprehension of sentences, paragraphs and simple essays at the intermediate level." : 2017/18
Both instructors don't have recommendations for this SLO. They feel that this SLO is appropriate for this level.

Plan for topic "Students completing the course will be able to comprehend texts at the intermediate ESL level." : 2014/15
The next time we assess this course, we should also assess ESL 78 and 86 in order to analyze the effectiveness of the programmatic sequence.

Plan for topic "Students completing ESL-076 will be able to use vocabulary-building skills to increase vocabulary." : 2014/15
The next time we assess this course, we should also assess ESL 78 and 86 in order to analyze the effectiveness of the programmatic sequence.

Plan for topic "Students completing the course will be able to use vocabulary skills within a variety of contexts." : 2014/15
The next time we assess this course, we should also assess ESL 78 and 86 in order to analyze the effectiveness of the programmatic sequence.

Plan for topic "Students completing ESL-076 will be able to Demonstrate increased comprehension of sentences, paragraphs, and simple essays." : 2014/15
The next time we assess this course, we should also assess ESL 78 and 86 in order to analyze the effectiveness of the programmatic sequence.

Plan for topic "Students completing the course will be able to identify main ideas in a short paragraph." : 2014/15
The next time we assess this course, we should also assess ESL 78 and 86 in order to analyze the effectiveness of the programmatic sequence.

Plan for topic "Students completing ESL-076 will be able to Write short summaries and responses to readings." : 2014/15
The next time we assess this course, we should also assess ESL 78 and 86 in order to analyze the effectiveness of the programmatic sequence.

Plan for topic "Students completing ESL-076 will be able to Use vocabulary-building skills to increase vocabulary." : 2012/13
We should continue to focus on training students how to write about texts, which is necessary for higher levels, and which many students find very challenging.

Plan for topic "Students completing the course will be able to comprehend texts at the intermediate ESL level." : 2012/13
We should continue to focus on training students how to write about texts, which is necessary for higher levels, and which many students find very challenging.

Plan for topic "Students completing the course will be able to use vocabulary skills within a variety of contexts." : 2012/13
It's key to focus on being able to write about texts, so we should continue to emphasize this.

Plan for topic "Students completing ESL-076 will be able to Demonstrate increased comprehension of sentences, paragraphs, and simple essays." : 2012/13
It's key to focus on being able to write about texts, so we should continue to emphasize this.

Plan for topic "Students completing the course will be able to identify main ideas in a short paragraph." : 2012/13
Considering the lower performance on this outcome, we should focus more on reading comprehension. We should also examine the ESL placement process, as many of the
students in this class, noted one instructor, were below the class level.

**Plan for topic "Students completing ESL-076 will be able to Write short summaries and responses to readings."**: 2012/13

Considering the lower performance on this outcome, we should focus more on reading comprehension. We should also examine the ESL placement process, as many of the students in this class, noted one instructor, were below the class level.

**Plan for topic "Students completing the course will be able to comprehend texts at the intermediate ESL level."**: 2008/9

No SLO related changes are recommended for the Title 5 course outline or instructional practice.

**Plan for topic "Students completing ESL-076 will be able to Use vocabulary-building skills to increase vocabulary."**: 2008/9

No SLO related changes are recommended for the Title 5 course outline or instructional practice.

**Plan for topic "Students completing the course will be able to use vocabulary skills within a variety of contexts."**: 2008/9

No SLO-related changes are recommended for the Title 5 course outline or instructional practice.

**Plan for topic "Students completing ESL-076 will be able to Demonstrate increased comprehension of sentences, paragraphs, and simple essays."**: 2008/9

No SLO-related changes are recommended for the Title 5 course outline or instructional practice.

**Plan for topic "Students completing the course will be able to identify main ideas in a short paragraph."**: 2008/9

No SLO-related changes are recommended for the Title 5 course outline or instructional practice.

**Plan for topic "Students completing ESL-076 will be able to Write short summaries and responses to readings."**: 2008/9

No SLO-related changes are recommended for the Title 5 course outline or instructional practice.
**685. Intermediate Academic Writing Skills [ESL-078] belonging to English [ESL]**

<thead>
<tr>
<th>Topic</th>
<th>Plan</th>
<th>Outcome Data Analysis</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students completing ESL-080 will be able to apply the rules of punctuation to various types of sentences including simple sentences with one or more subjects and/or verbs, compound sentences, and complex sentences with adverb clauses.</td>
<td>2017/18 Instructors commented that this SLO is very important and that they want to keep it.</td>
<td>This data suggests that we should continue the current mode of instruction. The next time we assess this, we should assess more than one assignment to ensure all students are represented in the data.</td>
</tr>
<tr>
<td>Students completing ESL-080 will be able to apply the rules of grammar to compose and identify and correct errors in simple sentences that use various sentence patterns.</td>
<td>2014/15 This data suggests that we should continue the current mode of instruction. Further, to ensure all student data is collected, we should collect data across a series of quizzes, rather than a single one (which students could miss).</td>
<td></td>
</tr>
<tr>
<td>Students completing ESL-080 will be able to apply the rules of grammar to identify and correct errors in the present and past continuous tenses and compose sentences that use these tenses correctly.</td>
<td>2014/15 This data suggests that we should continue the current mode of instruction. The next time we assess this, we should assess more than one assignment to ensure all students are represented in the data.</td>
<td></td>
</tr>
</tbody>
</table>
Plan for topic "Students completing this course will be able to demonstrate oral proficiency by using delivery strategies during academic formal and informal presentations." : 2017/18

The instructors seem to value this SLO.
DVC Instructional Course SLO Action Plans

688. High-Intermediate Academic Reading Skills [ESL-086] belonging to English [ESL]
Plan for topic "Students completing this course will be able to demonstrate in writing literal comprehension of high-intermediate readings by identifying main ideas, major points, and supporting details": 2018/19

One instructor noted that other 86 professors should use a range of fiction and non-fiction texts in their classes.

Plan for topic "Students completing this course will be able to formulate and write brief summaries of reading selections.": 2015/16

The next time we assess this outcome we will devise a shared assessment instrument that will allow us to analyze how students summarize a shared text. This mirrors the action plan from 96A and 98A in Fall 2013. We should continue to assess the sequence in tandem (either all ESL writing courses or courses at the same level).

Plan for topic "Students completing this course will be able to demonstrate in writing literal comprehension of high-intermediate readings by identifying main ideas, major points, and supporting details": 2015/16

The next time we assess this outcome we will devise a shared assessment instrument that will allow us to analyze students’ understanding of the main idea of a shared text. This mirrors the action plan from 96A and 98A in Fall 2013. We should continue to assess the sequence in tandem (either all ESL writing courses or courses at the same level).

Plan for topic "Students completing the course will be able to comprehend a variety of texts at the high intermediate ESL level.": 2011/12

As a result of this shared assessment, the ESL program met to revise its course outlines and approach. The next time we assess this course, we will use newly generated outcomes.

Plan for topic "Students completing the course will be able to comprehend a variety of texts at the high intermediate ESL level.": 2008/9

No changes necessary. The next time this course is assessed, SLO's should be evaluated with a different skill.

Plan for topic "Students completing the course will be able to use new vocabulary skills within a variety of contexts.": 2008/9

No SLO-related changes at this time.

Plan for topic "Students completing the course will be able to identify the main idea in a passage.": 2008/9

No SLO-related changes at this time.
Plan for topic "Students completing this course will be able to write short essays that develop and support a thesis.": 2018/19

One instructor noted that we should take out the word "short" in the SLO because it undermines what students can actually do. Another instructor mentioned that it would be helpful if the program identified what modes of essays we want to teach in ESL.

Plan for topic "Students completing this course will be able to identify and name component parts of clauses and sentences": 2015/16

The next time we assess this outcome we will devise a shared assessment instrument that will allow us to analyze specific types of clause and sentences. This mirrors the action plan from 96A and 98A in Fall 2013. We should continue to assess the sequence in tandem (either all ESL writing courses or courses at the same level).

Plan for topic "Students completing this course will be able to write short essays that develop and support a thesis.": 2015/16

The next time we assess this outcome we will devise a shared assessment instrument that will allow us to analyze student essays and compare the success of their theses. This mirrors the action plan from 96A and 98A in Fall 2013. We should continue to assess the sequence in tandem (either all ESL writing courses or courses at the same level).

Plan for topic "The Title V Course objectives serve as student learning outcomes for this course. The SLO being evaluated this round is:"

Students completing the course will be able to write a three-page, thesis-driven essay.": 2011/12

As a result, the ESL department has changed the course outlines for this level and will assess next time with respect both to length and thesis.

Plan for topic "Students completing the course will be able to write five related sentences that are correctly structured.": 2011/12

As a result of the discussion, instructors in the ESL department met to revise the course sequence to insure that the grammar expectations developed meaningfully over the course sequence (i.e., from ESL 78 to ESL 88 to ESL 98A). The importance of these results cannot be overstated for the coherence of the program. Next time, the course will be evaluated with respect to new outcomes.

Plan for topic "Students completing the course will be able to identify and name component parts of clauses and sentences": 2009/10

No SLO-related changes at this time.

Plan for topic "The Title V Course objectives serve as student learning outcomes for this course. The SLO being evaluated this round is:

Students completing the course will be able to write a three-page, thesis-driven essay."": 2008/9

No SLO-related changes are recommended for the Title V course outline or instructional practice.

At the time of a curriculum update for this course, no later than once every five years, the measurement criteria for one of the stated student learning outcomes will be identified, implemented and analyzed. Any recommended changes in the curriculum outline or in instructional practice will be noted on this e-SLO site.
DVC Instructional Course SLO Action Plans

690. Grammar for Advanced ESL Students [ESL-090] belonging to English [ESL]
Plan for topic "Students completing this course will be able to apply the rules of grammar to identify and correct errors in compound-complex sentences."

One instructor feels that homework is a better way to evaluate students' competence compared to quizzes and tests. Another instructor feels that we should add another SLO about generating compound-complex and/or compound sentences.

Plan for topic "Students completing ESL-090 will be able to Apply the rules of grammar to identify and correct errors in compound sentences."

This was the first time we have assessed the SLOs for this course. Instructors noted that this outcome is narrow, and difficult to measure in a particular assignment. Thus, we will plan professional development on the course, with a focus on fine-tuning the course outline for best practices.

Plan for topic "Students completing ESL-090 will be able to Apply the rules of grammar to identify and correct errors in complex sentences."

This was the first time we have assessed the SLOs for this course. Thus, we will plan professional development on the course, with a focus on fine-tuning the course outline for best practices.

Plan for topic "Students completing ESL-090 will be able to Employ sentence combining strategies to write more effective sentences and to vary the type of sentences students use in their writing."

This was the first time we have assessed the SLOs for this course. Thus, we will plan professional development on the course, with a focus on fine-tuning the course outline for best practices.
## DVC Instructional Course SLO Action Plans

### 691. Topics in Vocational English Skills [ESL-091] belonging to English [ESL]

Plan for topic "Students completing this course will be able to demonstrate the writing skills necessary to study a given discipline in depth." : 2017/18

<table>
<thead>
<tr>

<td>2013/14</td>
</tr>
</tbody>
</table>

We are extremely pleased with the results of this objective and will continue to use it.
It might be helpful to explain or elaborate what critical thinking skills are specifically. The instructor notes that the SLO don't address career and business even though students are looking for something that address these two contexts. The instructor also notes that the timing of the course doesn't work for a lot of parents with children.
DVC Instructional Course SLO Action Plans

693. Advanced Academic Reading Skills [ESL-096A] belonging to English [ESL]

Plan for topic "Students completing the course will be able to demonstrate orally and in writing accurate comprehension an recall of texts at the advanced level.":: 2016/17

One instructor notes that some of the weaker students skipped one level of ESL and that others had been absent on an important class day. The course itself seems to be meeting the goal but as a department we might emphasize the importance of taking the proper sequence of courses and attending class.

Plan for topic "Students completing the course will be able to demonstrate orally and in writing accurate comprehension an recall of texts at the advanced level.":: 2015/16

The department is reordering the sequence of course SLO assessments so the distribution of course assessments occurs more evenly. This course will be assessed in FA17 and reported by 12/31/18.

Plan for topic "Students completing ESL-096A will be able to demonstrate orally and in writing accurate literal comprehension and recall.":: 2013/14

The next time we assess this outcome we will devise a shared assessment instrument that will allow us to analyze specific and discrete summary skills. We should continue to assess the sequence in tandem (either all ESL writing courses or courses at the same level).

Plan for topic "Students completing ESL-096A will be able to demonstrate basic text marking skills.":: 2013/14

The next time we assess this outcome we will devise a shared assessment instrument that will allow us to analyze specific and discrete annotation skills. We should continue to assess the sequence in tandem (either all ESL writing courses or courses at the same level).

Plan for topic "Students completing the course will be able to demonstrate orally and in writing accurate comprehension an recall of texts at the advanced level.":: 2011/12

2012-09-06: What we realized was that to assess 96A we need to develop a common assessment tool for this class and we will do that for future evaluations. In addition we plan to revise the SLO itself.

2013-09-13: In addition to inspiring changes to the course sequence, these results suggest that in the future, instructors should give a shared assignment for purposes of SLO evaluations.

Plan for topic "Students completing the course will be able to summarize a passage of printed text.":: 2011/12
What we realized was that to assess 96A we need to develop a common assessment tool for this class and we will do that for future evaluations. In addition we plan to revise the SLO itself.

**Plan for topic "Students completing the course will be able to use vocabulary skills within a variety of contexts."**: 2011/12

In addition to inspiring changes to the course sequence, these results suggest that in the future, instructors should give a shared assignment for purposes of SLO evaluations.

**Plan for topic "Students completing the course will be able to demonstrate orally and in writing accurate comprehension an recall of texts at the advanced level."**: 2008/9

No SLO-related changes at this time.

**Plan for topic "Students completing the course will be able to summarize a passage of printed text."**: 2008/9

No SLO-related changes at this time.

**Plan for topic "Students completing the course will be able to use vocabulary skills within a variety of contexts."**: 2008/9

No SLO-related changes at this time.
694. Advanced Integrated Reading, Writing, and Study Skills [ESL-097A] belonging to English [ESL]
### DVC Instructional Course SLO Action Plans

**695. Advanced ESL Writing [ESL-098A] belonging to English [ESL]**

#### Plan for topic "Students completing the course will be able to write a coherent essay with a thesis and an introduction, body, and conclusion."

- **2016/17**
  
  From our assessment seems to show that students are learning the basic structure of an academic essay. No recommendations at this time.

- **2015/16**
  
  The department is reordering the sequence of course SLO assessments so the distribution of course assessments occurs more evenly. This course will be assessed in FA17 and reported by 12/31/18.

- **2013/14**
  
  The next time we assess this outcome we will devise a shared assessment instrument that will allow us to analyze more detail how students are writing thesis-driven essays and where they are struggling. We should continue to assess the sequence in tandem (either all ESL writing courses or courses at the same level).

- **2011/12**
  
  2012-09-06: Instructors want to reassess this outcome after holding a best practices session devoted to the thesis.

  2013-09-13: As a result, the department reworked the course outlines to emphasize that the thesis at this level should be a true thesis. In the future, we will reevaluate based on this new emphasis.

### Outcome Assessment History
Plan for topic "Students completing the course will be able to write a multi-paragraph theme which contains a thesis and related paragraphs.": 2011/12
Next time, we will change this outcome after we change and reassess Outcome #1. This will give us a better idea of how best to evaluate essay development.

Plan for topic "Students completing the course will be able to use some means of development within paragraphs, including the use of concrete details.": 2011/12
Hold a Best Practices Workshop of SLOs for ESL 98A, focusing on revising Outcome #1 and then revising Outcomes #2 and #3 accordingly.

Plan for topic "Students completing the course will be able to write a coherent essay with a thesis and an introduction, body, and conclusion.": 2008/9
No SLO-related changes at this time.

Plan for topic "Students completing the course will be able to write a multi-paragraph theme which contains a thesis and related paragraphs.": 2008/9
No SLO-related changes at this time.

Plan for topic "Students completing the course will be able to use some means of development within paragraphs, including the use of concrete details.": 2008/9
No SLO-related changes at this time.
The instructor recommends that ESL-110 incorporate flexible seating (e.g. various classroom set ups) and assignments based on oral skill telling.
697. Reading and Writing Skills for ECE-123 [ESL-111] belonging to English [ESL]
Plan for topic "Students completing this course will be able to use writing strategies to learn ECE-123 concepts.": 2018/19

The instructor thinks this is a good SLO to assess as it shows the connection between DVC Project Access students and Mt. Diablo Adult Ed.
DVC Instructional Course SLO Action Plans

698. Reading and Writing Skills for ECE-125 [ESL-112] belonging to English [ESL]
In the end of semester survey, students frequently noted the importance of having time in the computer lab to develop their technology skills. I hope that Project ACCESS will continue to service students and provide access to technology.
Plan for topic "Students completing this course will be able to write well-structured essays that have a focused thesis and developed, well-supported paragraphs with appropriate transitional elements.": 2017/18

One instructor worries about students being misplaced in ESL117A. Everyone else seems to think students are well placed.

Plan for topic "Students completing this course will be able to incorporate structure and organization in their own writing.": 2015/16

Overall, for multilingual learners at this pre-collegiate level, the final portfolio assessment seems to be a fair way of determining whether or not students are able to incorporate structure and organization in their own writing, write well-structured essays that have a focused thesis and contain developed and well-supported paragraphs with appropriate transitional elements, and analyze college-level readings and integrate them meaningfully into formal essays.

One recommendation: Our department could certainly decide to work toward a blind reading of our ESL 117A students' portfolios as a way of ensuring that we are evaluating students' work and preparedness for English 122 similarly. Because English 122 is such a key course for every student at DVC, and because ESL 117A is the gatekeeper course for our multilingual students, doing an ESL program-wide portfolio reading seems imperative and shouldn't be too cumbersome, given that there are only five sections offered each semester.

Plan for topic "Students completing this course will be able to write well-structured essays that have a focused thesis.": 2015/16

701. First Term French [FRNCH-120] belonging to Foreign Language [FRNCH]

Plan for topic "Students completing this course will be able to comprehend basic conversation and basic texts.": 2018/19

We are satisfied with the results, but would like to increase the success rate. We would continue to expand and diversify the types of in-class and at-home activities to give students a greater opportunity to improve their reading comprehension skills. Examples include but are not limited to:

- More frequent reading comprehension passages including dialogues and cultural passages to be followed up by a variety of comprehension questions.
- More opportunities for paired activities that encourage students to think, speak, and write in French.

The above would be in addition to the exercises and texts provided in the textbook.

Plan for topic "Students completing this course will be able to comprehend basic conversation and basic texts.": 2015/16

We are very satisfied with the results. We will continue to expand and diversify the types of in-class and at-home activities to give students an even greater opportunity to improve their oral comprehension and encourage conversational skills. Examples include but are not limited to:

1. More frequent oral readings by instructor and students of dialogues and cultural passages to be followed up by a variety of listening comprehension questions.
2. More frequent use of videos or television programs that emphasize oral and listening
comprehension.

3. More opportunities for creativity through role-playing that encourage students to think, speak, and write in French.

The above would be in addition to the exercises and texts provided in the textbook.

Plan for topic "Students completing the course will be able to orally communicate in a daily situation." : 2012/13

In general, it is important to give students enough confidence to feel comfortable speaking and answering in class, no matter how many mistakes they make, and to correct them after finishing.

Plan for topic "Students completing the course will be able to write a basic daily life situation in the present, near future, and preterite tenses." : 2012/13

Students need to practice more how to use their knowledge of the grammar studied, and also need to become more creative in order to express their ideas in French. More class practice and writing assignments may help in accomplishing this goal.

Plan for topic "Students completing the course will be able to comprehend short passages in the present, near future, and preterite tenses." : 2010/11

Very satisfied with results. We confirmed that daytime class and evening class did not have a significant difference of achievement. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.

Plan for topic "Students completing the course will be able to orally communicate in a daily situation." : 2010/11

Satisfied with results. We confirmed that daytime class and evening class did not have a significant difference of achievement. For this outcome the direct method of assessment would be preferable. We will encourage the instructors to create an oral presentation to measure this outcome.

Plan for topic "Students completing the course will be able to write a basic daily life situation in the present, near future, and preterite tenses." : 2010/11

Very satisfied with results. We confirmed that daytime class and evening class did not have a significant difference of achievement. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.

Plan for topic "Students completing the course will be able to comprehend short passages in the present, near future, and preterite tenses." : 2009/10

DVC Instructional Course SLO Action Plans

702. Second Term French [FRNCH-121] belonging to Foreign Language [FRNCH]
Plan for topic "Students completing the course will be able to recognize French verb tenses in the present, preterit, imperfect, imperative, future, conditional, and present subjunctive." : 2019/20
WebSLOs had tech issue in regards to this class - SLO & Dept. Chairs will create a SLO Submission schedule for next assessment.

Plan for topic "Students completing this course will be able to Demonstrate oral comprehension of texts rated level two in difficulty (i.e., extensive use

of past and future tenses, and, in later selections, conditional and subjunctive": 2015/16

We are satisfied with the results, but would prefer to have more students in the A and B
categories. (It should be noted that the student who failed this part of the exam had
stopped attending class on a regular basis.) We will continue to expand and diversify
the types of in-class and at-home activities to give students an even greater opportunity
to improve their oral comprehension and encourage conversational skills. Examples

include but are not limited to:

1. More frequent oral readings by instructor and students of dialogues and cultural

passages to be followed up by a variety of listening comprehension questions.

2. More frequent use of videos or television programs that emphasize oral and listening

comprehension.
3. More opportunities for creativity through role-playing that encourage students to think, speak, and write in French.

The above would be in addition to the exercises and texts provided in the textbook.

Plan for topic "Students completing the course will be able to recognize French verb tenses in the present, preterit, imperfect, imperative, future, conditional, and present subjunctive.": 2012/13

We will continue to provide students with authentic reading material to practice recognition and understanding of the different verb tenses and modes.

Plan for topic "Students completing the course will be able to describe common aspects of contemporary Francophone (French-speaking) cultures": 2012/13

We will continue to explore different methods of assessing cultural knowledge. We will explore the possibility of including test questions on the in-class oral reports by students.

Plan for topic "Students completing the course will be able to recognize French verb tenses in the present, preterit, imperfect, imperative, future, conditional, and present subjunctive.": 2010/11

Very Satisfied with results. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.

Plan for topic "Students completing the course will be able to communicate in French both verbally and in writing at a high-beginning level.": 2010/11

Very Satisfied with results, but the direct method of assessment for this outcome would be preferable. We will encourage the instructor to create an essay assignment or oral presentation to measure this outcome.

Plan for topic "Students completing the course will be able to describe common aspects of contemporary Francophone (French-speaking) cultures": 2010/11

Very Satisfied with results. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.

708. Fourth Term French [FRNCH-221] belonging to Foreign Language [FRNCH]

Plan for topic "Students completing the course will be able to demonstrate reading comprehension of intermediate level literary selection."

We are very satisfied with the results. We will continue to expand in class and at home activities to give students greater opportunity to improve and encourage comprehension and conversational skills.

Plan for topic "Students completing the course will be able to use the future, conditional, and subjunctive in writing."

Based on the results, students could benefit from additional practice with conditional sentences as well as using the subjunctive mood correctly. The instructor plans to increase practice with these difficult concepts through additional exercises in class, for homework and as part of exam review.

Plan for topic "Students completing the course will be able to prepare short oral presentation on an area of the Francophone world."

Very satisfied. We will continue to provide students with authentic cultural materials, including literary texts and films.

Plan for topic "Interpret contemporary French society and francophone societies through reading and videos."

Very satisfied. We will continue to provide students with authentic cultural materials, including literary texts and films.

Plan for topic "Students completing FRNCH-221 will be able to "Interpret contemporary French society and francophone societies through reading and videos.""

Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction.

711. Independent Study [FRNCH-298] belonging to Foreign Language [FRNCH]
712. Student Instructional Assistant [FRNCH-299] belonging to Foreign Language [FRNCH]
713. Introduction to TV Studio Production [FTVE-120] belonging to Media Studies [FTVE]

Plan for topic "Students completing the course will be able to utilize the principals of blocking, mise-en-scene, lens, camera angles, and lighting, composition in their projects": 2017/18

This is the first semester for this instructor and the results have been impressive.

Plan for topic "Students completing the course will be able to utilize the principals of blocking, mise-en-scene, lens, camera angles, and lighting, composition in their projects": 2013/14

It is still a small percentage of students from the classes evaluated and does not take into account the absenteeism of students who don't do as well as those who do show up. We will try to assess over a week to get higher numbers.

Plan for topic "Students completing the course will be able to recognize and demonstrate proper framing for studio camera techniques.": 2013/14

We will try to assess over a week to get higher numbers.

Plan for topic "Students completing the course will be able to demonstrate a knowledge and understanding of a digital switchers.": 2013/14

While we did achieve 80% positive assessment, this number was lower compared to our other SLOs. We will ask students to explain more in the next assessment and try to address the deficit in classroom instruction.

Plan for topic "Students completing this course will be able to produce a more complex journalistic project that would be appropriate to use as a work sample in a job application.": 2013/14

While we did achieve 80% positive assessment, this number was lower compared to our other SLOs. We will ask students to explain more in the next assessment and try to address the deficit in classroom instruction.

Plan for topic "Students completing the course will be able to utilize the principals of blocking, mise-en-scene, lens, camera angles, and lighting, composition in their projects": 2010/11

Since only one section was offered and evaluated, this data may be less statistically accurate than desirable. Surveys and percentages were only gathered from students who were present that week, possibly another factor in the positive response rate as the students who did not meet the criteria often have poor attendance (possibly a correlating factor)

Plan for topic "Students completing the course will be able to recognize and demonstrate proper framing for studio camera techniques.": 2010/11

Since only one section was offered and evaluated, this data may be less statistically accurate than desirable. Surveys and percentages were only gathered from students who
Plan for topic "Students completing this course will be able to produce a more complex journalistic project that would be appropriate to use as a work sample in a job application.": 2010/11

Since only one section was offered and evaluated, this data may be less statistically accurate than desirable. In addition, the switcher equipment was updated that semester and the AV tech, students and the instructor were just becoming familiar with the new switcher. Those in charge will have a better grasp of functionality next semester.

DVC Instructional Course SLO Action Plans

715. Advanced TV Studio Production [FTVE-132] belonging to Media Studies [FTVE]
Plan for topic "Students completing the course will be able to operate studio and remote television equipment to professional standards competently and capably.": 2017/18

The Fall instructor for both sections of this course left under strained circumstances and did not provide requested data. We have two new instructors who should be able to fulfill our need for solid data by this June.

Plan for topic "Develop television programs, commercials, documentaries and promotional spots."": 2017/18

Usually advanced students are self motivated and successful, almost by definition.

Plan for topic "Students completing the course will be able to operate studio and remote television equipment to professional standards competently and capably.": 2013/14

It is a small percentage of students who take the class as advanced students so the data may be less statistically accurate than desirable. We will continue to assess in this same way with a close eye on the responses.

Plan for topic "Develop television programs, commercials, documentaries and promotional spots."": 2013/14

It is a small percentage of students who take the class as advanced students so the data may be less statistically accurate than desirable. We will continue to assess in this same way with a close eye on the responses.

Plan for topic "Function effectively as producer or director of a production team."": 2013/14

It is a small percentage of students who take the class as advanced students so the data may be less statistically accurate than desirable. We will continue to assess in this same way with a close eye on the responses.

Plan for topic "Students completing the course will be able to operate studio and remote television equipment to professional standards competently and capably.": 2010/11

Because of the small sample, not enough data is available.

Plan for topic "Develop television programs, commercials, documentaries and promotional spots."": 2010/11

With such a small sample, not enough data is available.

Plan for topic "Function effectively as producer or director of a production team."": 2010/11

With such a small sample, not enough data was available.
716. Introduction to Film and Media Scriptwriting [FTVE-140] belonging to Media Studies [FTVE]
Plan for topic "Students completing the course will be able to examine storytelling through story structure, character, and composition.": 2017/18
Since the number of students in this class is low, it will take a number of years to determine a clear pattern but this is a good start and we will continue to monitor.

Plan for topic "Students completing the course will be able to examine storytelling through story structure, character, and composition.": 2014/15
This is the students' first attempt at actually formatting a screenplay. The successful students used celtx (free software available on the internet). Students who didn't do the assignment said they didn't have any access to a program. Students need to have a demonstration of how to download the software before they are shown how to use celtx.

Plan for topic "Students completing the course will be able to write scenes in a feature screenplay format.": 2011/12
Retention rate was lower than desired. Because the numbers are so small, it is difficult to gauge significant trends.
### Plan for topic "Students completing the course will be able to examine storytelling through story structure, character, and composition."

**: 2017/18**

This is a small section where one student can significantly lower the success rate. The FTVE 141 students were introduced to the concept of The Hero’s Journey in FTVE 140 and were able to successfully apply the concept to their specific genre of choice.

### Plan for topic "Students completing the course will be able to analyze and effectively use storytelling tools and techniques as it relates to different genres."

**: 2014/15**

This is a small section where one student can significantly lower the success rate. To increase the success of this assignment, students should be given an example of a The Hero's Journey template to know how much specific content they should include. The lower scoring student simply wrote a sentence as compared to the more successful students who wrote an entire paragraph to describe each step of the journey.

### Plan for topic "Students completing the course will be able to write scenes in a feature screenplay format."

**: 2011/12**

Because there was only one student enrolled, it is difficult to gauge significant trends.
### 718. Advanced Film and Media Scriptwriting [FTVE-142] belonging to Media Studies [FTVE]

Plan for topic "Students completing the course will be able to design the structure and setting of a scene to convey character and conflict."

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to determine appropriate edit points." : 2017/18
Because the class is small and instructors have varied it will take several years to collect meaningful data. The initial trends are promising.

Plan for topic "Students completing the course will be able to determine appropriate edit points." : 2012/13
Since only one section was offered and evaluated, this data may be less statistically accurate than desirable. Surveys and percentages were only gathered from students who were present that week, possibly another factor in the positive response rate as the students who did not meet the criteria often have poor attendance. We will continue to look at the data collected.

Plan for topic "Students completing the course will be able to Compare the difference between online and offline editing." : 2012/13
Since only one section was offered and evaluated, this data may be less statistically accurate than desirable. In addition, the language of the assessment should change as the technology doesn't differentiate as much between online and offline editing anymore.

Plan for topic "Demonstrate competency in the various aspects of digitizing, importing and exporting images" : 2012/13
Since only one section was offered and evaluated, this data may be less statistically accurate than desirable. Surveys and percentages were only gathered from students who were present that week, possibly another factor in the positive response rate as the students who did not meet the criteria often have poor attendance.

Plan for topic "e" : 2012/13
Since only one section was offered and evaluated, this data may be less statistically accurate than desirable. Surveys and percentages were only gathered from students who were present that week, possibly another factor in the positive response rate as the students who did not meet the criteria often have poor attendance.

Plan for topic "Students completing the course will be able to determine appropriate edit points." : 2011/12
Our action plan for Film 165, since it had high success rates, is to create a more challenging assessment to better determine what and how students are learning in the class.

Plan for topic "Demonstrate competency in the various aspects of digitizing, importing and exporting images" : 2011/12
Our action plan for Film 165, since it had high success rates, is to create a more challenging assessment to better determine what and how students are learning in the class.

Plan for topic "e" : 2011/12
Our action plan for Film 165, since it had high success rates, is to create a more challenging assessment to better determine what and how students are learning in the class.
According to the data submitted by the instructor, advanced students are doing exceptionally well in the class.
### 724. American Cinema/American Culture [FTVE-200] belonging to Media Studies [FTVE]

#### Plan for topic "Students completing Film 140 will be able to Critically evaluate film, separating story from theme and assess the impact of each.": 2017/18

As planned students are submitting their essays to an online tutor before submitting for a grade.

#### Plan for topic "Students completing the course will be able to define genres, styles, and story-structure and recognize their importance in film.": 2017/18

2 sections of the online classes were assessed. In general completing assignments determines success. Increasing completion of assignments is an issue for all classes but seems particularly problematic for online courses.

#### Plan for topic "Students completing Film 140 will be able to Critically evaluate film, separating story from theme and assess the impact of each.": 2014/15

The plan is to have students submit their essay to Pearson Mylab before submitting and quantifying the results.

#### Plan for topic "Students completing Film 140 will be able to Critically evaluate film, separating story from theme and assess the impact of each.": 2012/13

2012-12-06: We will continue to monitor the results of the students’ performance on essay assignments. Even though the current results of student performance on essays has been at acceptable levels we will continue tinkering with in class instruction along with modest tweaks to the essay rubrics themselves in an attempt to improve overall class performance.

2013-05-29: No adjustments necessary.
725. Introduction to Film and Media Arts [FTVE-205] belonging to Media Studies [FTVE]

Plan for topic "Students completing the course will be able to demonstrate an understanding of the language and syntax of film."

<table>

### American Ethnic Cultures in Film [FTVE-210] belonging to Media Studies [FTVE]

#### Plan for topic "Students completing the course will be able to critically analyze films portraying various ethnicities represented in American culture."

The assignment described above falls within the first half of the course. Several additional assignments in this course ask students to further develop their abilities to assess cultural and social differences presented in films, as outlined by this SLO. The discussion board works well for an initial entry into the conversation with a larger project following later in the term, which allows the students to generate ideas solely for review by the instructor, which is very helpful given the challenging nature of some of the topics in this class.

#### Plan for topic "Students completing the course will be able to compare and contrast the themes and concerns of selected writers and directors of various American ethnic backgrounds."

The exercise worked as planned. In the future students will be require to send their essays to a live tutor before submitting to see if that improves success rates and overall achievement.

#### Plan for topic "Students completing the course will be able to identify produced feature films as examples of "realism", "classicism" or expressionism as defined in the text."

The plan is to have students submit their essay to Pearson Mylab before submitting and quantifying the results.

#### Plan for topic "Students completing the course will be able to critically analyze films portraying various ethnicities represented in American culture."

No changes necessary.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to critically evaluate the various types of broadcast programs.": 2017/18
After much turnover, we have found an instructor who has increased student success rates.

Plan for topic "Students completing the course will be able to critically evaluate the various types of broadcast programs.": 2015/16
The same class will be assessed in the Fall.

Plan for topic "Students completing the course will be able to identify important milestones in the development of radio and television in America.": 2014/15
Since this is the first assessment for this topic, it will be assessed for the next few semesters.

Plan for topic "Students completing the course will be able to identify important milestones in the development of radio and television in America.": 2012/13
2014-01-30: The instructions for the assignments will be further clarified to see if that alters success rates.
2014-01-30: We are beginning to offer this class as a hybrid. We will use the data from the F2F classes as a benchmark for comparing results between the two versions of the class.

Plan for topic "Students completing the course will be able to identify important milestones in the development of radio and television in America.": 2011/12
Will repeat the collection of data for Spring 2014.
<table>
<thead>
<tr>
<th>Plan for topic</th>

</tbody>
</table>
Plan for topic "Students completing the course will be able to compare and contrast various films for content as well as style."
- 2016/17
  In the future students will be required to submit their essays to a live tutor before submitting for a grade. Hopefully this will increase the success rate.

Plan for topic "Students completing the course will be able to compare and contrast various films for content as well as style."
- 2013/14
  The plan is to continue collecting data and comparing the success rate and face to face with online courses for the same assignments.

Plan for topic "Students completing the course will be able to compare and contrast various films for content as well as style."
- 2012/13
  Will continue to monitor face-to-face class. The issue seems to be that a number of the low scores was the result of being late.

Plan for topic "Students completing the course will be able to demonstrate knowledge and understanding of important trends in American Cinema from 1900 to 1950."
- 2010/11
  The plan is to complete all 3 SLOs before acting on the results; otherwise, substantial changes will invalidate previous results. In addition, we are comfortable with the outcome for this SLO.

Plan for topic "Students completing the course will be able to demonstrate knowledge and understanding of important trends in American Cinema from 1900 to 1950."
- 2009/10
  What the data show is that concepts and information emphasized was clearly absorbed with retention rates over 70%. Other course content that was not stressed in either the reading or the lectures was not well absorbed.

For next year we will increase the emphasis on targeted topics and see if there is increase in performance.

Plan for topic "Students completing the course will be able to compare and contrast various films for content as well as style."
- 2009/10
  What the data show is that concepts and information emphasized was clearly absorbed with retention rates over 70%. Other course content that was not stressed in either the reading or the lectures was not well absorbed.

For next year we will increase the emphasis on targeted topics and see if there is increase in performance.

Plan for topic "Students completing the course will be able to assess the importance of historical events on films produced in that era."
- 2009/10
  What the data show is that concepts and information emphasized was clearly absorbed with retention rates over 70%. Other course content that was not stressed in either the reading or the lectures was not well absorbed.

For next year we will increase the emphasis on targeted topics and see if there is increase in performance.
### Plan for topic "Students completing the course will be able to demonstrate knowledge and understanding of important trends in World Cinema from 1900 to 1960."

**2017/18**

Since this is a higher success rate for similar assignments in similar classes it will be interesting to monitor future assessments to see whether this is a statistical fluke or something particular that this instructor is adding towards student success.

**2015/16**

Analyze a different outcome in fall 16 when the course is offered again.

**2010/11**

The plan is to complete all 3 SLOs before acting on the results; otherwise, substantial changes will invalidate previous results. In addition, we are comfortable with the outcome for this SLO.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to analyze underline themes in films.": 2017/18

The success rate was so high, next time a different area will be assessed.

Plan for topic "Students completing the course will be able to demonstrate knowledge and understanding of important trends in American Cinema from 1950 to present.": 2013/14

2014-04-02: The goal is to continue compiling data and comparing online and face to face models to see if there are significant differences.

2014-04-09: The plan is to continue collecting data and comparing the success rate and face to face with online courses for the same assignments.

Plan for topic "Students completing the course will be able to demonstrate knowledge and understanding of important trends in American Cinema from 1950 to present.": 2010/11

There are 3 SLOs. The plan is to assess each before acting on the results.

Plan for topic "Students completing the course will be able to demonstrate knowledge and understanding of important trends in American Cinema from 1950 to present.": 2009/10

For next year we will increase the emphasis on topics that were not well retained and see if there is increase in performance.
## DVC Instructional Course SLO Action Plans

### 732. World Cinema 1960 to the Present [FTVE-283] belonging to Media Studies [FTVE]

**Plan for topic "Students completing the course will be able to demonstrate knowledge and understanding of important trends in World Cinema since 1960."**: 2019/20

| Students who did not achieve the criteria did not complete the assignments. Out of those who did complete the assignments, 100% achieved the SLO. Therefore, no action plan is necessary. |

**Plan for topic "Students completing the course will be able to compare and contrast various films for content as well as style."**: 2016/17

| Since this is a higher success rate for similar assignments in similar classes it will be interesting to monitor future assessments to see whether this is a statistical fluke or something particular that this instructor is adding towards student success. |

**Plan for topic "Students completing the course will be able to compare and contrast various films for content as well as style."**: 2013/14

| The results were positive but since the data sample is small it will be confirmed next spring when the class is offered again. |

**Plan for topic "Students completing the course will be able to identify the basic components of film language."**: 2010/11

| The plan is to complete all 3 SLOs before acting on the results; otherwise, substantial changes will invalidate previous results. In addition, we are comfortable with the outcome for this SLO. |
DVC Instructional Course SLO Action Plans

733. Occupational Work Experience Education in FTVE [FTVE-295] belonging to Media Studies [FTVE]
### 734. Internship in Occupational Work Experience Education in FTVE [FTVE-296] belonging to Media Studies [FTVE]

#### Plan for topic "Students completing this course will be able to develop strategies to secure employment.": 2018/19

In Fall 2018 there were 11 ***-296 students self-assessed PRE term and 7 students self-assessed POST term. The sections are all facilitated by a variety of faculty and executed in field as internships/co operative instruction (employer led).

In Spring 2019 there were 9 students self-assessed PRE term and there were 5 students self-assessed POST term. The sections are all facilitated by a variety of faculty and executed in field as internships/co operative instruction (employer led).

#### Plan for topic "Students completing this course will be able to identify and improve selected professional work habits and employability skills such as time management, communication, and teamwork.": 2018/19

WRKX department has built out a great team of supportive faculty members. In addition, we have redefined our SLOs (for more effective analysis) and have created an assessment tool which will be integrated into Canvas (once the updated SLOs are approved) and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.

#### Plan for topic "Students completing this course will be able to link academic coursework to work-based learning.": 2018/19

WRKX department has built out a great team of supportive faculty members. In addition, we have redefined our SLOs (for more effective analysis) and have created an assessment tool which will be integrated into Canvas (once the updated SLOs are approved) and recreating the entire SLO assessment process. #### Plan for topic "Students completing this course will be able to develop strategies to secure employment.": 2017/18

From SLOAC Chair: The data submitted was not a viable assessment of this course. The discipline faculty need to meet with the SLO Chairs for instruction on how to correctly assess these courses.
735. Independent Study [FTVE-298] belonging to Media Studies [FTVE]
736. Student Instructional Assistant [FTVE-299] belonging to Media Studies [FTVE]
Plan for topic "Students completing this course will be able to increase their skills in a narrow, focused aspect of film or TV.": 2017/18

From SLOAC Chair: The data submitted was not a viable assessment of this course. The discipline faculty need to meet with the SLO Chairs for instruction on how to correctly assess these courses.
DVC Instructional Course SLO Action Plans

737. Physical Geography [GEOG-120] belonging to Physical Science/Physics/Astronomy/Geology/Geography [GEOG]

Plan for topic "Students completing GEOG-120 will be able to Critically assess, analyze and explain basic Earth-Sun relationships and their relevance to location, time, seasons, weather, and climate.": 2020/21

As a plan of action the (sub) department will continue to encourage instructors to reinforce the concept of solar altitude and its effects (seasonality) is reinforced through discussions, presenting supporting diagrams, reading and homework assignments. In the Fall 2021 sub-department Flex activity, the topic of seasonality (Earth's axial tilt) will be emphasized as foundational to other Earth/Sun concepts that include daylength hours, weather, and climate.

Plan for topic "Students completing the course will be able to describe how the movement of tectonic plates is associated with volcanic activities, mountain building and earthquakes.": 2020/21

As a plan of action the (sub) department will continue to encourage instructors to include local geologic features (Mt. Lassen, for example), in addition to discussions, diagrams, and reading assignments, to emphasize the dynamic margins between lithospheric plates.

Plan for topic "Students completing GEOG-120 will be able to explain the difference between rotation and revolution movements of the earth and explain the effects of each on the geosystems.": 2017/18

Discuss and emphasize the terms rotation and revolution with regard to Earth's planetary motions; Include hands-on activity (time calculator) that illustrates Earth's rotation and the concept of 24 time zones on Earth's surface.

Plan for topic "Students completing GEOG-120 will be able to Assess the results of human activities on the environment and consider what can and cannot be done without them.": 2017/18

Discuss and emphasize the terms rotation and revolution with regard to Earth's planetary motions; Include hands-on activity (time calculator) that illustrates Earth's rotation and the concept of 24 time zones on Earth's surface.
DVC Instructional Course SLO Action Plans

motions; Include hands-on activity

(time calculator) that illustrates Earth's rotation and the

concept of 24 time zones on Earth's surface.

Plan for topic "Students completing the course will be able to calculate the time-difference based on longitude." : 2017/18

Discuss and emphasize the terms rotation and

revolution with regard to Earth's planetary

motions; Include hands-on activity

(time calculator) that illustrates Earth's rotation and the

concept of 24 time zones on Earth's surface.

Plan for topic "Students completing GEOG-120 will be able to Critically assess, analyze and explain basic Earth-Sun relationships and their relevance to location, time, seasons, weather, and climate." : 2017/18

Successful methods included emphasis of the concept of

solar angle, sub solar point, and use of an analemma to

identify the location of the direct solar ray during lecture.

Plan for topic "Students completing the course will be able to describe how the movement of tectonic plates is associated with volcanic activities, mountain building and earthquakes." : 2017/18

Successful methods of instruction include class activity in which students identify the major plates, specific type of plate margin, and relative direction of plates as well as a discussion regarding the specific tectonic setting
Plan for topic "Students completing GEOG-120 will be able to explain the difference between rotation and revolution movements of the earth and explain the effects of each on the geosystems.": 2016/17

Discuss and emphasize the terms rotation and revolution with regard to Earth's planetary motions and measuring time per Unit 4: Earth-Sun Relationships of the Mason text. Include hands-on activity (time calculator) that illustrates Earth's rotation and the concept of 24 time zones on Earth's surface.

Plan for topic "Students completing GEOG-120 will be able to Assess the results of human activities on the environment and consider what can and cannot be done without them.": 2016/17

Discuss and emphasize the terms rotation and revolution with regard to Earth's planetary motions and measuring time per Unit 4: Earth-Sun Relationships of the Mason text. Include hands-on activity (time calculator) that illustrates Earth's rotation and the concept of 24 time zones on Earth's surface.

Plan for topic "Students completing the course will be able to calculate the time-difference based on longitude.": 2016/17

Discuss and emphasize the terms rotation and revolution with regard to Earth's planetary motions and measuring time per Unit 4: Earth-Sun Relationships of the Mason text. Include hands-on activity (time calculator) that illustrates Earth's rotation and the concept of 24 time zones on Earth's surface.

Plan for topic "Students completing GEOG-120 will be able to Critically assess, analyze and explain basic Earth-Sun relationships and their relevance to location, time, seasons, weather, and climate.": 2016/17

Successful methods included emphasis of the concept of solar angle, sub solar point, and use of an analemma to identify the location of the direct solar ray during lecture.

Plan for topic "Students completing the course will be able to describe how the movement of tectonic plates is associated with volcanic activities, mountain building and earthquakes.": 2016/17

Successful methods of instruction include class activity in which students identify the major plates, specific type of plate margin, and relative direction of plates as well as a discussion regarding "our" specific tectonic setting (transform margin). It is interesting to note that today's students generally embrace plate tectonic theory (which was, until the 60's, not fully accepted) while students commonly challenge concepts of climate change and global warming.

Plan for topic "Students completing GEOG-120 will be able to explain the meaning of positive and negative feedback on the environment with reference to natural processes and human activities.": 2015/16

In future semesters the goal is to increase the success rate by providing more examples and discussion on environmental process of positive and negative feedback.

Plan for topic "Students completing the course will be able to calculate the time-difference based on longitude.": 2015/16

Continue to instruct using the same methods.

Plan for topic "Students completing GEOG-120 will be able to Assess the results of human activities on the environment and consider what can and cannot be done without them.": 2015/16

Continue to instruct using the same methods.
Plan for topic "Students completing GEOG-120 will be able to explain the difference between rotation and revolution movements of the earth and explain the effects of each on the geosystems.": 2015/16
Continue to instruct using the same methods.

Plan for topic "Students completing GEOG-120 will be able to explain how world patterns of climate, soil and vegetation have developed and interrelate.": 2015/16
Beginning in SP16, clearly identify the possible changes in distribution of climate on Earth; emphasize that the changes in climate will also effect distribution of natural vegetation and soils on Earth.

Plan for topic "Students completing the course will be able to describe how the movement of tectonic plates is associated with volcanic activities, mountain building and earthquakes.": 2015/16
continue to use the same method of instruction regarding plate tectonics and earthquakes.

Plan for topic "Students completing GEOG-120 will be able to explain the difference between rotation and revolution movements of the earth and explain the effects of each on the geosystems.": 2014/15
The assessment result was less than desirable. In the following semester more online resources and animation will be provided to help students understand the effects of earth's rotation and revolution and how rotation impacts the origin of tides.

Plan for topic "Students completing GEOG-120 will be able to Assess the results of human activities on the environment and consider what can and cannot be done without them.".: 2014/15
The assessment result was less than desirable. In the following semester more online resources and animation will be provided to help students understand the effects of earth's rotation and revolution and how rotation impacts the origin of tides.

Plan for topic "Students completing the course will be able to calculate the time-difference based on longitude.".: 2014/15
The assessment result was less than desirable. In the following semester more online resources and animation will be provided to help students understand the effects of earth's rotation and revolution and how rotation impacts the origin of tides.

Plan for topic "Students completing GEOG-120 will be able to explain the purpose of GIS, GPS, and Remote Sensing technologies.": 2014/15
The topic will be assessed in the next cycle with a different set of questions to evaluate the analytical capability of students as regards geospatial technologies.

Plan for topic "Students completing GEOG-120 will be able to explain the meaning of positive and negative feedback on the enviroment with reference to natural processes and human activities.".: 2013/14
The plan is to included an elaborate discussion on environmental feedback and human interaction with the environment. Add more examples in the discussion, about positive and negative feedback.
Plan for topic "Students completing the course will be able to calculate the time-difference based on longitude.": 2013/14
In next semester, the plan is to include a short home-work assignment and a discussion on rotation and revolution movements of the earth.

Plan for topic "Students completing GEOG-120 will be able to Assess the results of human activities on the environment and consider what can and cannot be done without them." 2013/14
In next semester, the plan is to include a short home-work assignment and a discussion on rotation and revolution movements of the earth.

Plan for topic "Students completing GEOG-120 will be able to explain the difference between rotation and revolution movements of the earth and explain the effects of each on the geosystems." 2013/14
In next semester, the plan is to include a short home-work assignment and a discussion on rotation and revolution movements of the earth.

Plan for topic "Students completing GEOG-120 will be able to explain the purpose of GIS, GPS, and Remote Sensing technologies." 2013/14
The outcome did not meet expected criteria, therefore, the plan is to include more examples, video and a self-test question on geospatial technology. The topic will be assessed in the future.

Plan for topic "Students completing GEOG-120 will be able to explain the difference between rotation and revolution movements of the earth and explain the effects of each on the geosystems." 2012/13
Beginning in FA13, faculty will emphasize the relationship of course material to current events related to human activities on the environment including possible actions that humans could take.

Plan for topic "Students completing GEOG-120 will be able to Assess the results of human activities on the environment and consider what can and cannot be done without them." 2012/13
Beginning in FA13, faculty will emphasize the relationship of course material to current events related to human activities on the environment including possible actions that humans could take.

Plan for topic "Students completing the course will be able to calculate the time-difference based on longitude." 2012/13
Beginning in FA13, faculty will emphasize the relationship of course material to current events related to human activities on the environment including possible actions that humans could take.

Plan for topic "Students completing GEOG-120 will be able to Critically assess, analyze and explain basic Earth-Sun relationships and their relevance to location, time, seasons, weather, and climate." 2012/13
Implement recently purchased software called 'Seasons' from Riverside Scientific. Students will use computer-based software to explore and reinforce concepts related to Earth-Sun relations as they relate to location, time, seasons, weather and climate.

Plan for topic "Students completing GEOG-120 will be able to Explain how world patterns of climate, soil and vegetation have developed..."
Faculty will develop and implement a complex table demonstrating the interrelationships between climate, soil and natural vegetation. The importance of this concept will be emphasized when covering the course material on climate.

Plan for topic "Students completing GEOG-120 will be able to explain the difference between rotation and revolution movements of the earth and explain the effects of each on the geosystems.": 2011/12
Continue to instruct using the same methods.

Plan for topic "Students completing the course will be able to calculate the time-difference based on longitude.": 2011/12
Continue to instruct using the same methods.

Plan for topic "Students completing GEOG-120 will be able to Assess the results of human activities on the environment and consider what can and cannot be done without them." : 2011/12
Continue to instruct using the same methods.

Plan for topic "Students completing the course will be able to calculate the time-difference based on longitude.": 2010/11
Reduce the pace of the lecture, particularly during the time/longitude portion. Explain the calculation more thoroughly, and assess student understanding via (non-graded) quiz.

Plan for topic "Students completing the course will be able to Assess the results of human activities on the environment and consider what can and cannot be done without them." : 2010/11
Reduce the pace of the lecture, particularly during the time/longitude portion. Explain the calculation more thoroughly, and assess student understanding via (non-graded) quiz.

Plan for topic "Students completing the course will be able to explain the difference between rotation and revolution movements of the earth and explain the effects of each on the geosystems." : 2010/11
Reduce the pace of the lecture, particularly during the time/longitude portion. Explain the calculation more thoroughly, and assess student understanding via (non-graded) quiz.

Plan for topic "Students completing the course will be able to describe how the movement of tectonic plates is associated with volcanic activities, mountain building and earthquakes." : 2010/11
Proceed with current lesson plan, continue to evaluate via SLO
Plan for topic "Students completing the course will be able to explain the Earth-Sun relation and describe why during summer the length of daylight increases towards the pole.": 2010/11

Proceed with current curriculum and continue to evaluate via SLO.
Plan for topic "Students completing the course will be able to draw and label geographic coordinates and calculate corresponding antipodes.": 2020/21

As a plan of action the (sub) department will continue to encourage instructors to emphasize the concept of scale and the correct procedures for measuring distances on a map using representative fractions. Methods to reinforce the concept include presentations (with supporting diagrams), working through examples, and homework assignments.

Scale is an important topic with regard to map interpretation and measurements.

Plan for topic "Students completing GEOG-121 will be able to Analyze a map; critically assess the use of a particular map scale and projection for displaying the mapped information and recommend alternate combinations of scale and projection for better representation.": 2020/21

As a plan of action the (sub) department will continue to encourage instructors to emphasize the concept of scale and the correct procedures for measuring distances on a map using representative fractions. Methods to reinforce the concept include presentations (with supporting diagrams), working through examples, and homework assignments.

Scale is an important topic with regard to map interpretation and measurements.

Plan for topic "Students completing GEOG-121 will be able to determine the map scale, identification of map projections, i.e. (UTM and PLSS), magnetic declination, locate place names using the correct coordinates, and topography identification.": 2020/21

As a plan of action the (sub) department will continue to encourage instructors to emphasize the concept of scale and the correct procedures for measuring distances on a map using representative fractions. Methods to reinforce the concept include presentations (with supporting diagrams), working through examples, and homework assignments.

Scale is an important topic with regard to map interpretation and measurements.

Plan for topic "Students completing GEOG-121 will be able to Identify types of plate boundaries and the resulting landform features.": 2020/21

As a plan of action the (sub) department will continue to encourage instructors to include local geologic features (the San Andreas fault system, for example), in addition to discussions, diagrams, and reading assignments, to emphasize the dynamic margins between lithospheric plates.

Plan for topic "Students completing GEOG-121 will be able to determine the map scale, identification of map projections, i.e. (UTM and PLSS), magnetic declination, locate place names using the correct coordinates, and topography identification.": 2017/18

While the outcome met success, it is recommended that the UTM projection system is sufficiently explained and the procedure for determining UTM coordinate values are emphasized.

Plan for topic "Students completing GEOG-121 will be able to Analyze a map; critically assess the use of a particular map scale and projection for displaying the mapped information and recommend alternate combinations of scale and projection for better representation.": 2020/21

Plan for topic "Students completing the course will be able to find the altitude of the noon sun on a given date at a given location. For example, what is the altitude of the noon Sun at Pleasant Hill (37ºNorth latitude), for December 20."": 2017/18

Constructing isolines via interpolation can be a significant challenge for students. It is recommended that basic interpolation techniques are reinforced and additional resources are provided in an effort to improve student success with this topic. One method is to introduce the concept of interpolation using very simple spot elevation diagrams then introduce more complex problems, such as the examples that are used in the current lab manual, only after students are successful with the basic problems.

Plan for topic "Students completing GEOG-121 will be able to exhibit proficiency in constructing topographic profiles and contour maps both by hand and on a personal computer and will be able to analyze and describe the topography using the profiles and contour maps."": 2017/18

</table>
740. *Introduction to Geographic Information Systems (GIS) [GEOG-125] belonging to Physical Science/Physics/Astronomy/Geology/Geography [GEOG]*

**Plan for topic "Students completing the course will be able to explain the components of a geographic information system."**: 2017/18

It is expected that all students should be able to list the components with 100% success rate. In order to achieve this goal it is important that this learning objective is revisited multiple times during a semester.

**Plan for topic "Students completing GEOG-125 will be able to Interpret the basic concepts of geodesy, map projection and cartography including ellipsoids, datum, spheroids and how these affect map preparation/presentation."**: 2015/16

More hands-on assignments and labs with managing projection for multiple datasets should be provided to increase the success rate.

**Plan for topic "Students completing GEOG-125 will be able to Use and demonstrate spatial information in terms of what, where, and why with the help of GIS."**: 2015/16

Since the current cohort had 15% failure or below acceptable result, the need is to capture at-risk students by the 2nd exam and provide them the required assistance.

**Plan for topic "Students completing GEOG-125 will be able to Represent spatial information, spatial data and spatial relations in digital forms as maps and graphs."**: 2013/14

Based on this result it appears that more emphasis needs to be places on data-display and cartographic tools, while presenting lecture and demonstration, so that greater percentage of students are able to successfully complete this objective.

**Plan for topic "Students completing GEOG-125 will be able to Interpret the basic concepts of geodesy, map projection and cartography including ellipsoids, datum, spheroids and how these affect map preparation/presentation."**: 2014/15

This objective represents the fundamental of data-integration, therefore, it needs to be measured next semester with a different cohort of students using similar assignments and questions on exams.

**Plan for topic "Students completing GEOG-125 will be able to Use and demonstrate spatial information in terms of what, where, and why with the help of GIS."**: 2014/15

The objective was not met by 50 of the students. The demonstration and hands-on exercise need to be revisited and revised to ensure the at least 85% of students meet this objective. After revision, the objective will be measured with the next cohort.

**Plan for topic "Students completing GEOG-125 will be able to Represent spatial information, spatial data and spatial relations in digital forms as maps and graphs."**: 2013/14

</tbody>
</table>
This objective to be assessed in the following semester. More emphasis will be given on analysis and query of data through lecture and demonstration to improve the achievement score of this objective.

Plan for topic "Students completing the course will be able to join tables and run a search query based on a given criteria to select features. For example- find the cities in the United States that have population above 100,000 and display the selected cities on a separate map.": 2012/13

This objective to be assessed in the following semester. More emphasis will be given on analysis and query of data through lecture and demonstration to improve the achievement score of this objective.

Plan for topic "Students completing the course will be able to explain the components of a geographic information system.": 2011/12

The target for this SLO was met. Since this is one of the fundamental concepts of GIS, this SLO will be measured again the next assessment cycle.

Plan for topic "Students completing the course will be able to explain the difference between a Raster and Vector data set.": 2011/12

This outcome will be measured again in the next assessment cycle.

Plan for topic "Students completing GEOG-125 will be able to explain the components of a geographic information system.": 2010/11

The current method and plan will be implemented again in the following semester.

Plan for topic "Students completing the course will be able to explain the difference between a Raster and Vector data set.": 2010/11

In the following semester more examples and hands-on assignment will focus on the properties of raster and vector data. Assessment will be repeated.

Plan for topic "Students completing GEOG-125 will be able to Represent spatial information, spatial data and spatial relations in digital forms as maps and graphs.": 2011/12

This outcome will be measured again in the next assessment cycle.

Plan for topic "Students completing the course will be able to explain the difference between a Raster and Vector data set.": 2011/12

Since the target was not met, in the next semester- more hands-on, problem-solving labs will be incorporated to focus on the tasks of joining-data and query-selection. This outcome will be measured again in the next cycle.

Plan for topic "Students completing GEOG-125 will be able to Explain the application of GIS in observation, data collection, data input, analyses, manipulation, and hypothesis testing.": 2011/12

Since the target was not met, in the next semester- more hands-on, problem-solving labs will be incorporated to focus on the tasks of joining-data and query-selection. This outcome will be measured again in the next cycle.
forms as maps and graphs." 2010/11

In the following semester more examples and hands-on assignment will focus on the properties of raster and vector data. Assessment will be repeated.

Plan for topic "Students completing the course will be able to join tables and run a search query based on a given criteria to select features. For example- find the cities in the United States that have population above 100,000 and display the selected cities on a separate map." 2010/11

Since the outcome was below the expected level, in the following semester more hands-on lab will be introduced to address the join and relate functions of attribute and feature data. this assessment will be repeated.

Plan for topic "Students completing GEOG-125 will be able to Explain the application of GIS in observation, data collection, data input, analyses, manipulation, and hypothesis testing." 2010/11

Since the outcome was below the expected level, in the following semester more hands-on lab will be introduced to address the join and relate functions of attribute and feature data. this assessment will be repeated.
Plan for topic "Students completing this course will be able to complete slope and aspect analyses using a digital elevation model.":: 2017/18
Will continue to teach the data download and slope aspect processing methods. It is recommended that more examples be given in lectures and labs focusing on total area calculation.

Plan for topic "Students completing the course will be able to use the given dataset for spatial analysis. Suggest suitable sites for regenerating oak plantation along the East Bay hills; or map the areas of potential soil erosion along the East-Bay hills and categorize them as high, medium, and low risks.":: 2015/16
The results were better than the previous cycle 2013-14. The assessment will be continued in future to ensure that a consistent high success rate for this outcome is maintained.

Plan for topic "Students completing GEOG-126 will be able to Use the given data and criteria for overlay analysis and suggest areas of high risk for fire.":: 2015/16
The results were better than the previous cycle 2013-14. The assessment will be continued in future to ensure that a consistent high success rate for this outcome is maintained.

Plan for topic "Students completing this course will be able to describe the different tools for customizing the GIS interface.":: 2015/16
The current lab and discussion will be followed and assessment will be given in future semesters to ensure that higher level of success is consistently maintained.

Plan for topic "Students completing this course will be able to build a network dataset and create a shortest route analysis.":: 2015/16
To maintain higher success rate, examples and more practice exercise should be provided in addition to the hands-on lab exercise.

Plan for topic "Students completing the course will be able to use the given dataset for spatial analysis. Suggest suitable sites for regenerating oak plantation along the East Bay hills; or map the areas of potential soil erosion along the East-Bay hills and categorize them as high, medium, and low risks.":: 2013/14
The assessment will be repeated in the next cycle with a plan to include a second lab exercise on raster overlay operation with less step-by-step instruction, followed by a feedback session.

Plan for topic "Students completing GEOG-126 will be able to Use the given data and criteria for overlay analysis and suggest areas of high risk for fire.":: 2013/14

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing GEOG-126 will be able to perform geocoding process to map a given list of addresses.": 2011/12

More geocoding exercises will be added. This outcome will be measured again in the next assessment cycle.

Plan for topic "Students completing the course will be able to use the given dataset for spatial analysis. Suggest suitable sites for regenerating oak plantation along the East Bay hills; or map the areas of potential soil erosion along the East-Bay hills and categorize them as high, medium, and low risks." : 2010/11

The assessment will be repeated in the next semester.

Plan for topic "Students completing GEOG-126 will be able to use the given data and criteria for overlay analysis and suggest areas of high risk for fire." : 2010/11

The assessment will be repeated in the next semester.

Plan for topic "Students completing the course will be able to create a 3-dimensional topographic surface from the given DEM (digital elevation model)." : 2010/11

Current method and labs addressing this topic will be continued and the assessment will be repeated in the following semester.

Plan for topic "Students completing GEOG-126 will be able to perform geocoding process to map a given list of addresses." : 2010/11

The assessment will be repeated in the following semester.

Plan for topic "Students completing the course will be able to write down ten addresses from the phonebook of your city. Go to http://www.census.gov and follow the directions to download the street map of your county. Perform a geocoding process to locate the restaurants." : 2010/11

The assessment will be repeated in the following semester.
### Plan for topic "Students completing GEOG-129 will be able to Describe GPS technology and its components by knowing the minimum number of satellite signals required for obtaining a 3-D position." 2017/18

Given the level of success that is demonstrated by students regarding this topic in the Fall 2018, 2016, and 2014 semesters, the Department will be asked to consider replacing the current assessment topic with a different measure of student success. To describe GPS technology and its components (SLO â€“ Bâ€™), for example, students could be asked to describe the three operational segments of the system, rather than the minimum number of satellite signals required for 3-D positions, on an exercise or exam.

### Plan for topic "Students completing GEOG-129 will be able to explain and identify acceptable values for dilution of precision (a measure of the geometrical uncertainty of a GPS position)." 2017/18

Given the level of success that is demonstrated by students regarding this topic in the Fall 2018, 2016, and 2014 semesters, the Department will be asked to consider revising the current assessment topic with a different measure of student success. Students could be asked, for example, to explain a different source of error, rather provide an acceptable dilution of precision value, on an exercise or exam that would be consistent with explaining the sources of error in field data collection using GPS (SLO â€“ Eâ€™).

### Plan for topic "Students completing GEOG-129 will be able to successfully quantify positional error of pre and post processed GPS field data." 2017/18

As a plan of action, the CEP50 discussion will be augmented to reinforce the procedure for calculating CEP50 error values, with particular attention to scaling the mapped (or plotted) error values to actual.

### Plan for topic "Students completing GEOG-129 will be able to Describe GPS technology and its components by knowing the minimum number of satellite signals required for obtaining a 3-D position." 2015/16

Continue to instruct the components of the GPS using the same methods.

### Plan for topic "Students completing GEOG-129 will be able to explain and identify acceptable values for dilution of precision (a measure of the geometrical uncertainty of a GPS position)." 2015/16

Continue to instruct the concept of dilution of precision using the same methods.

### Plan for topic "Students completing GEOG-129 will be able to successfully quantify positional error of pre and post processed GPS field data." 2015/16

Continue to instruct methods to quantify error using the same tools and methods.

### Plan for topic "Students completing GEOG-129 will be able to Describe GPS technology and its components by knowing the minimum number of satellite signals required for obtaining a 3-D position." 2014/15

This is a fundamental concept and will be continued to be assessed with the new cohort of students next semester using the same methods of instruction.

</table>
Plan for topic "Students completing the course will be able to demonstrate an understanding of the energy, resource, environmental, poverty, and population problems confronting the world today, especially an ability to analyze their often intimate interrelation and anticipate their future consequences." : 2018/19

The assignment was able to introduce the concept of how to compare and contrast and analyze the characteristics. However, assessment results shows that some students need a better understanding of statistics and more guidance with interpretation of data. Adding a short assignment on data interpretation will help more students to achieve this outcome.

Plan for topic "Students completing the course will be able to display a sense of the diversity of the world's cultures, including an ability to synthesize common themes and explain important distinctions." : 2015/16

This topic will be assessed in future using a different format such as an short answer question to measure the analytical skills.

Plan for topic "Students completing this course will be able to identify the characteristics of a nation-state." : 2015/16

Since 35% of the students assessed were unsuccessful, the plan is to create a short lecture-video explaining this concept. It is possible that the students are not able to grasp the concept just by trading the textbook and online reference.

Plan for topic "Students completing GEOG-130 will be able to How do geographers answer the "where" question? Be sure to consider location, maps and distribution." : 2013/14

Have students do more frequent, short essay type of writing assignments throughout the semester.

Plan for topic "Students completing the course will be able to display a sense of the diversity of the world's cultures, including an ability to synthesize common themes and explain important distinctions." : 2013/14

2013-12-23: Assign more regular written essays so students are held accountable for their study skills and get more practice writing essays.

2014-05-30: No modification of existing practice appears to be necessary.

Plan for topic "Students completing GEOG-130 will be able to describe and explain the interactive relationship between human beings and their environment." : 2013/14

It does not appear that any modification of existing practices is necessary.
Plan for topic "Students completing this course will be able to understand world place location and differentiate between a) latitudes and longitudes; b) absolute and relative location concepts.": 2018/19

The assessment result showed that some students were not able to distinguish between absolute and relative location. It might be helpful to emphasize on the concepts of geographic coordinates and site and situation concepts to help students distinguish between relative and absolute location descriptions.

Plan for topic "Students completing this course will be able to understand the population trend in different continents.": 2015/16

Use on population distribution map helps students understand the pattern on distribution and population concentration. The other demographic characteristics such as age, gender, birth and natural increase are discussed in descriptive texts. It will be helpful to use line graph, bar graph, and pyramid diagrams to convey the information visually.

Plan for topic "Students completing this course will be able to understand world place location and differentiate between a) latitudes and longitudes; b) absolute and relative location concepts.": 2015/16

Location concept is fundamental to geographic analyses. In the given sequence of topics the location concept is covered in the first two chapters. It is suggested that the concept be reviewed later into the semester so that more students can successfully achieve this learning objective.

Plan for topic "Students completing the course will be able to understand the concept of geographic regions based on physical, economic, political and cultural characteristics.": 2013/14

The plan is to include a self-test section and home-work on the concept of regions and realms to enhance the written and analytical capability so that students can achieve a higher success rate on a short-answer question.

Plan for topic "Students completing the course will be able to identify the locations of prominent physical landscapes of Europe": 2013/14

Plan is to include a mapwork of physiographic regions of Europe and a self-test section to enhance the understanding of the physical landscape of Europe.

Plan for topic "Students completing this course will be able to understand the population trend in different continents.": 2013/14

The plan is to add a self-test and a discussion on population trend comparing developed and less-developed countries. The topic will be assessed again in the future to evaluate if the above plan improves the outcome.

Plan for topic "Students completing this course will be able understand the current trends in world population and explain the disparity in population growth between developed and less-developed countries.": 2013/14

The plan is to include a self-test and home-work on population trend to enhance the understanding of trend between developed, developing and less-developed countries. The topic will be assessed again to see if the above plan improves the outcome.

</table>
Plan for topic "Students completing the course will be able to decode a standard weather station to retrieve air temperature, dew point temperature, air pressure, wind direction, wind speed, cloud cover and current weather condition.":: 2018/19

Continue to reinforce concepts relating to weather station models (including decoding temperature, relative humidity, barometric pressure, wind speed and direction, and cloud cover) with lecture discussions, and a homework assignment is specific to weather station model coding. Interestingly, while scores for correct barometric pressure decoding were adequate, students did not score as well with the overall weather station model questions on the exam which suggests that, in addition to barometric pressure decoding, other coded components of the model must be stressed.

Plan for topic "Students completing GEOG-140 will be able to Analyze, explain and graph data on the physical state of the atmosphere.":: 2018/19

Continue to reinforce concepts relating to weather station models (including decoding temperature, relative humidity, barometric pressure, wind speed and direction, and cloud cover) with lecture discussions, and a homework assignment is specific to weather station model coding. Interestingly, while scores for correct barometric pressure decoding were adequate, students did not score as well with the overall weather station model questions on the exam which suggests that, in addition to barometric pressure decoding, other coded components of the model must be stressed.

Plan for topic "Students completing the course will be able to generate a diagram showing the three-cell model showing general surface wind and pressure belts on Earth.":: 2018/19

Concepts regarding the physical components of the atmosphere must be addressed more thoroughly. Students seem to have a difficult time with the thought that three-quarters of every breadth that they take is nitrogen (rather than oxygen). More time will be devoted to learning the components of the atmosphere including a diagram (pie chart) illustrating the proportion of gasses, a homework assignment that is similar in nature to the pie chart, and reinforcement of the concept throughout the semester.

Plan for topic "Students completing GEOG-140 will be able to Summarize the physical components of Earth's atmosphere and how they interact to produce weather.":: 2018/19

Concepts regarding the physical components of the atmosphere must be addressed more thoroughly. Students seem to have a difficult time with the thought that three-quarters of every breadth that they take is nitrogen (rather than oxygen). More time will be devoted to learning the components of the atmosphere including a diagram (pie chart) illustrating the proportion of gasses, a homework assignment that is similar in nature to the pie chart, and reinforcement of the concept throughout the semester.

Plan for topic "Students completing the course will be able to use the concept of 'pressure blocks' to explain the vertical and horizontal relationship between temperature and air pressure.":: 2018/19

The success rate of at least 70% was achieved, the specific topic is cursory to understanding atmospheric circulation and continued emphasis regarding winds associated with high & low pressure systems that include diagrams (handouts), specific reading assignments in the text, and classroom activities, is recommended.
Plan for topic "Students completing GEOG-140 will be able to Examine the physical principles affecting Earth's atmospheric processes.": 2018/19

The success rate of at least 70% was achieved, the specific topic is cursory to understanding atmospheric circulation and continued emphasis regarding winds associated with high & low pressure systems that include diagrams (handouts), specific reading assignments in the text, and classroom activities, is recommended.

Plan for topic "Students completing GEOG-140 will be able to Analyze, explain and graph data on the physical state of the atmosphere.":: 2017/18

Lecture discussions, reinforcing the concepts, and a homework assignment (that was specific to weather station coding) were elements that contributed to objective success; continue to instruct the topic using these methods.

Plan for topic "Students completing the course will be able to decode a standard weather station to retrieve air temperature, dew point temperature, air pressure, wind direction, wind speed, cloud cover and current weather condition.":: 2017/18

Lecture discussions, reinforcing the concepts, and a homework assignment (that was specific to weather station coding) were elements that contributed to objective success; continue to instruct the topic using these methods.
Plan for topic "Students completing the course will be able to generate a diagram showing the three-cell model showing general surface wind and pressure belts on Earth.": 2017/18

Emphasize the components of the atmosphere (and their proportions) during lecture; have students complete a (pie chart) diagram that reinforces the proportions of atmospheric gasses either during lecture or as a homework activity.

Plan for topic "Students completing GEOG-140 will be able to Summarize the physical components of Earth’s atmosphere and how they interact to produce weather.": 2017/18

Emphasize the components of the atmosphere (and their proportions) during lecture; have students complete a (pie chart) diagram that reinforces the proportions of atmospheric gasses either during lecture or as a homework activity.

Plan for topic "Students completing the course will be able to use the concept of 'pressure blocks' to explain the vertical and horizontal relationship between temperature and air pressure.": 2017/18

The success rate of 70% was achieved, the specific topic material is cursory to understanding atmospheric circulation and should additional emphasis regarding winds associated with high & low pressure systems is recommended.
Plan for topic "Students completing GEOG-140 will be able to Examine the physical principles affecting Earth's atmospheric processes.": 2017/18

The success rate of 70% was achieved, the specific topic material is cursory to understanding atmospheric circulation and should additional emphasis regarding winds associated with high & low pressure systems is recommended.

Plan for topic "Students completing the course will be able to decode a standard weather station to retrieve air temperature, dew point temperature, air pressure, wind direction, wind speed, cloud cover and current weather condition.": 2016/17

Lecture discussions, reinforcing the concepts, and a homework assignment (that was specific to weather station coding) were elements that contributed to objective success; continue to instruct the topic using these methods.

Plan for topic "Students completing GEOG-140 will be able to Analyze, explain and graph data on the physical state of the atmosphere.": 2016/17

2014/15

Plan for topic "Students completing GEOG-140 will be able to Summarize the physical components of Earth's atmosphere and how they interact to produce weather."

2014/15

Plan for topic "Students completing the course will be able to generate a diagram showing the three-cell model showing general surface wind and pressure belts on Earth."
## DVC Instructional Course SLO Action Plans

### Plan for topic "Students completing the course will be able to use the concept of 'pressure blocks' to explain the vertical and horizontal relationship between temperature and air pressure.": 2014/15

- Continue to instruct using the same methods.
- Slow the pace of the lecture down, particularly during the discussion of atmospheric pressure and temperature. Explain the concepts more thoroughly and assess student understanding of the topic through quizzes.

### Plan for topic "Students completing GEOG-140 will be able to Examine the physical principles affecting Earth’s atmospheric processes.": 2014/15

- Slow the pace of the lecture down, particularly during the discussion of atmospheric pressure and temperature. Explain the concepts more thoroughly and assess student understanding of the topic through quizzes.

### Plan for topic "Students completing GEOG-140 will be able to Analyze, explain and graph data on the physical state of the atmosphere.": 2013/14

- Additional homework activities on decoding weather stations need to be added to the course. Will work with faculty beginning in SP 14 to implement changes.

### Plan for topic "Students completing the course will be able to decode a standard weather station to retrieve air temperature, dew point temperature, air pressure, wind direction, wind speed, cloud cover and current weather condition.": 2013/14

- Additional homework activities on decoding weather stations need to be added to the course. Will work with faculty beginning in SP 14 to implement changes.

### Plan for topic "Students completing GEOG-140 will be able to generate a diagram showing the three-cell model showing general surface wind and pressure belts on Earth.": 2013/14

- Additional class lecture time and additional homework is needed to emphasize the relationship between F=MA and the concept of air pressure. Given that this is a very quantitative concept, and that there is no math prerequisite for this course, we may need to consider non quantitative approaches to teach this concept. Additional work is needed on the relationship between air temperature and relative humidity (again an quantitative concept).

### Plan for topic "Students completing GEOG-140 will be able to Summarize the physical components of Earth's atmosphere and how they interact to produce weather.": 2013/14

Plan for topic "Students completing GEOG-140 will be able to Analyze, explain and graph data on the physical state of the atmosphere.":

2011/12

Additional homework activities in this area, with emphasis on decoding weather stations will be added in the Spring of 2012.

Plan for topic "Students completing the course will be able to analyze, explain and graph data on the physical state of the atmosphere.":

2011/12

Additional homework activities in this area, with emphasis on decoding weather stations will be added in the Spring of 2012.

Plan for topic "Students completing GEOG-140 will be able to Examine the physical principles affecting Earth’s atmospheric processes."

2011/12

A separate set of homework questions will be developed and added in the Fall 2011 term to expand upon this concept.

Plan for topic "Students completing the course will be able to use the concept of 'pressure blocks' to explain the vertical and horizontal relationship between temperature and air pressure.":

2011/12

A separate set of homework questions will be developed and added in the Fall 2011 term to expand upon this concept.

Plan for topic "Students completing the course will be able to decode a standard weather station to retrieve air temperature, dew point temperature, air pressure, wind direction, wind speed, cloud cover and current weather condition."

2009/10

Effective Spring 2010, additional homework questions will be added to Chapter 2. These questions will require students to apply weather station decoding skills.

Plan for topic "Students completing GEOG-140 will be able to Analyze, explain and graph data on the physical state of the atmosphere.":

2009/10

Effective Spring 2010, additional homework questions will be added to Chapter 2. These questions will require students to apply weather station decoding skills.

Plan for topic "Students completing the course will be able to generate a diagram showing the three-cell model showing general surface wind and pressure belts on Earth.":

2009/10

Effective Spring 2010, additional homework activities will be added to Chapter 9. These questions will require that students develop a three-cell model of general surface wind and pressure belts and then use this diagram to respond to questions in Chapters 9, 10 and 11.

Plan for topic "Students completing GEOG-140 will be able to Summarize the physical components of Earth’s atmosphere and how they interact to produce weather."

### Plan for topic "Students completing GEOG-140 will be able to Examine the physical principles affecting Earth's atmospheric processes."

<table>
<thead>
<tr>
<th>2009/10</th>
</tr>
</thead>
</table>

No modification required, however, effective Spring 2010, additional homework questions will be added to Chapters 5-12. These questions will continue to reinforce the relationships between temperature and pressure and show how these relationships are useful in explaining winds, ocean currents and storm systems.
Plan for topic "Students completing the course will be able to perform an isoline analysis on randomly scattered data such as air pressure, temperature and/or dew point temperatures": 2017/18

GEOG 141 has not been offered since the Spring 2016. The next offering of GEOG 141 has not been determined. GEOG 141 will be assessed and SLOs will be provided when the course is offered in the future.

Plan for topic "Students completing GEOG-141 will be able to Retrieve, plot, analyze and interpret weather data in the form of maps, charts and numerical data.": 2017/18

GEOG 141 has not been offered since the Spring 2016. The next offering of GEOG 141 has not been determined. GEOG 141 will be assessed and SLOs will be provided when the course is offered in the future.

Plan for topic "Students completing GEOG-141 will be able to perform an isoline analysis of randomly scattered data such as air pressure, temperature, and/or dew point temperatures.": 2017/18

GEOG 141 has not been offered since the Spring 2016. The next offering of GEOG 141 has not been determined. GEOG 141 will be assessed and SLOs will be provided when the course is offered in the future.

Plan for topic "Students completing the course will be able to determine the temperature and humidity of a rising and sinking parcel of air using a Thermodynamic Diagram.": 2017/18

GEOG 141 has not been offered since the Spring 2016. The next offering of GEOG 141 has not been determined. GEOG 141 will be assessed and SLOs will be provided when the course is offered in the future.

Plan for topic "Students completing GEOG-141 will be able to Relate adiabatic and pseudoadiabatic processes to clouds and weather stability.": 2017/18

GEOG 141 has not been offered since the Spring 2016. The next offering of GEOG 141 has not been determined. GEOG 141 will be assessed and SLOs will be provided when the course is offered in the future.

Plan for topic "Students completing GEOG-141 will be able to measure and calculate atmospheric humidity and relate the results to atmospheric stability.": 2017/18

GEOG 141 has not been offered since the Spring 2016. The next offering of GEOG 141 has not been determined. GEOG 141 will be assessed and SLOs will be provided when the course is offered in the future.

Plan for topic "Students completing the course will be able to use a sample weather station map to locate and correctly plot a cold front, a warm front and the center of low pressure associated with a mid-latitude cyclone.": 2017/18
GEOG 141 has not been offered since the Spring 2016. The next offering of GEOG 141 has not been determined. GEOG 141 will be assessed and SLOs will be provided when the course is offered in the future.

Plan for topic "Students completing GEOG-141 will be able to Predict mid-latitude weather using the concept of wave cyclones.": 2017/18

GEOG 141 has not been offered since the Spring 2016. The next offering of GEOG 141 has not been determined. GEOG 141 will be assessed and SLOs will be provided when the course is offered in the future.

Plan for topic "Students completing GEOG-141 will be able to measure and calculate atmospheric humidity and relate the results to atmospheric stability." 2014/15

Continue to instruct this topic is similar manner and assess the next cohort of students.

Plan for topic "Students completing GEOG-141 will be able to Relate adiabatic and pseudoabiatic processes to clouds and weather stability.": 2014/15

Continue to instruct this topic is similar manner and assess the next cohort of students.

Plan for topic "Students completing the course will be able to determine the temperature and humidity of a rising and sinking parcel of air using a Thermodynamic Diagram.": 2014/15

Continue to instruct this topic is similar manner and assess the next cohort of students.
### DVC Instructional Course SLO Action Plans

#### Plan for topic "Students completing GEOG-141 will be able to locate and correctly plot a cold front, warm front and the center of low pressure associated with a mid-latitude cyclone."

- The objective was successfully completed by 78% of students and did not meet the target criteria. In the following semester the method of instruction for this topic needs to be revisited and modified.

#### Plan for topic "Students completing GEOG-141 will be able to Retrieve, plot, analyze and interpret weather data in the form of maps, charts and numerical data."

- Develop additional questions for existing lab activities.

#### Plan for topic "Students completing the course will be able to perform an isoline analysis on randomly scattered data such as air pressure, temperature and/or dew point temperatures"

- Develop additional questions for existing lab activities.

#### Plan for topic "Students completing GEOG-141 will be able to perform an isoline analysis of randomly scattered data such as air pressure, temperature, and/or dew point temperatures."

- Develop additional questions for existing lab activities.

#### Plan for topic "Students completing the course will be able to determine the temperature and humidity of a rising and sinking parcel of air using a Thermodynamic Diagram."

- Develop an enlarged version of the Thermodynamic Diagram used to plot data and determine stability.

#### Plan for topic "Students completing GEOG-141 will be able to Relate adiabatic and pseudoadiabatic processes to clouds and weather stability."

- Develop an enlarged version of the Thermodynamic Diagram used to plot data and determine stability.

#### Plan for topic "Students completing GEOG-141 will be able to measure and calculate atmospheric humidity and relate the results to atmospheric stability."

- Develop an enlarged version of the Thermodynamic Diagram used to plot data and determine stability.

#### Plan for topic "Students completing GEOG-141 will be able to Predict mid-latitude weather using the concept of wave cyclones."

- Incorporate computer based activities to supplement and reinforce the concept of mid-latitude cyclones.

#### Plan for topic "Students completing the course will be able to use a sample weather station map to locate and correctly plot a cold front, a warm front and the center of low pressure associated with a mid-latitude cyclone."

- Incorporate computer based activities to supplement and reinforce the concept of mid-latitude cyclones.

DVC Instructional Course SLO Action Plans

747. Topics in Geography [GEOG-150] belonging to Physical Science/Physics/Astronomy/Geology/Geography [GEOG]
Plan for topic "Students completing the course will be able to explain how to calculate the height of a feature (building, tree, etc.) from overlapping aerial photographs.": 2020/21

This is scheduled to be assessed in 2023. The updated SLO 4 Year Master Calendar was submitted in Sp. 2021.

Plan for topic "Students completing GEOG-160 will be able to define multispectral imagery and understand how it is different from aerial film photographs." : 2020/21

This is scheduled to be assessed in 2023. The updated SLO 4 Year Master Calendar was submitted in Sp. 2021.

Plan for topic "Students completing GEOG-160 will be able to define multispectral imagery and understand how it is different from aerial film photographs." : 2016/17

Successful methods of instruction include a discussion on the topic, supported by graphics (powerpoint slides) and assigned reading (within the course text book). Students were also asked to outline advantages and disadvantages of acquiring RS data using aerial cameras vs. multispectral systems during an exercise. Continue to use these methods of instruction during the next Geog160 section.

Plan for topic "Students completing the course will be able to explain how to calculate the height of a feature (building, tree, etc.) from overlapping aerial photographs." : 2016/17

Successful methods of instruction include a discussion on the topic, supported by graphics (powerpoint slides) and assigned reading (within the course text book). Students were also asked to outline advantages and disadvantages of acquiring RS data using aerial cameras vs. multispectral systems during an exercise. Continue to use these methods of instruction during the next Geog160 section.

Plan for topic "Students completing this course will be able to apply appropriate processing software to digitally extract and export (to GIS format) a specific classification using (multispectral data) during an exam." : 2016/17

Successful methods of instructing the concept of atmospheric windows include lecture discussion (supported by graphics via powerpoint) and assigning reading (that pertained to the topic). Students were also asked to identify the wavelengths of Landsat TM spectral bands and answer why the acquired bands were positioned at the specific wavelengths. The exercise reinforces the location of the non-absorbing wavelengths (i.e. atmospheric windows) within the spectrum. Continue using these methods of instruction during the next Geog160 section.
While a 75% success rate may seem adequate, image classification is an important component of the course and is consistent with SLOs A, B, E, and particularly F. A more thorough discussion and detailed explanation of classification techniques and procedures will be implemented in upcoming Geog160 section.

Plan for topic "Students completing the course will be able to explain how to calculate the height of a feature (building, tree, etc.) from overlapping aerial photographs.": 2013/14
- Review multispectral imagery concepts prior to the in-lab final

Plan for topic "Students completing GEOG-160 will be able to define multispectral imagery and understand how it is different from aerial film photographs.": 2013/14
- Review multispectral imagery concepts prior to the in-lab final

Plan for topic "Students completing the course will be able to describe how visible (blue, green, red) and near-infrard light interacts with healthy vegetation.": 2013/14
- Analysis: Fall 2013. 70% students met this outcome on the in-lab final exam as compared to 87% on the homework assignment. 86% finished the lab successfully.

Plan for topic "Students completing the course will be able to explain what atmospheric windows are and why understanding them is critical for designing remote sensing instruments.": 2013/14
- In the future semester of this course offering, this topic will be assessed again. If same high-level of outcome is achieved, then this assessment topic will be repalced by a new topic.

Plan for topic "Students completing GEOG-160 will be able to define multispectral imagery and understand how it is different from aerial film photographs.": 2011/12
- Change SLO #1. Technology has evolved and this height question will focus on LiDAR in the future.

Plan for topic "Students completing the course will be able to explain how to calculate the height of a feature (building, tree, etc.) from overlapping aerial photographs.": 2011/12
- Change SLO #1. Technology has evolved and this height question will focus on LiDAR in the future.

Plan for topic "Students completing the course will be able to describe how visible (blue, green, red) and near-infrard light interacts with healthy vegetation.": 2011/12
- Have time during the latter part of the semester to make-up labs in the 3-hr lab session

Plan for topic "Students completing the course will be able to explain what atmospheric windows are and why understanding them is critical for designing remote sensing instruments.": 2011/12
### DVC Instructional Course SLO Action Plans

**Plan for topic "Students completing the course will be able to explain how to calculate the height of a feature (building, tree, etc.) from overlapping aerial photographs.":** 2009/10

Review photogrammetry concepts toward end of semester as a refresher.

**Plan for topic "Students completing GEOG-160 will be able to define multispectral imagery and understand how it is different from aerial film photographs.":** 2009/10

Review photogrammetry concepts toward end of semester as a refresher.

**Plan for topic "Students completing the course will be able to describe how visible (blue, green, red) and near-infragrd light interacts with healthy vegetation.":** 2009/10

Spend more time with those students who are not understanding this concept.

**Plan for topic "Students completing the course will be able to explain what atmospheric windows are and why understanding them is critical for designing remote sensing instruments.":** 2009/10

Keep the current plan and add one outcome for future.
Plan for topic "Students completing the course will be able to explain the basic elements of a map.": 2017/18

Map design element and ability to create webmaps are two fundamental concepts of this course that need to be assessed every time this course is offered. The plan is to continue the current instruction regarding the map design elements and update the webmap instruction as the technology changes in the future.

Plan for topic "Students completing the course will be able to choose an appropriate geographic referencing system such as datum, projection, or coordinate system for a given purpose.": 2017/18

Often students have difficulty with a two-dimensional representation of a three-dimensional earth. It seems using a virtual globe to demonstrate the concept would be helpful.

Plan for topic "Students completing the course will be able to explain the basic elements of a map.": 2013/14

The plan is to assess this topic again in the next semester and see if the success rate is consistent. The result is shared with the CTE advisory committee.

Plan for topic "Students completing the course will be able to compare and contrast the various techniques of map projection.": 2013/14

The plan is to continue with the same methodology and sequence of instruction in the future semester, assess the topic, and see if the assessment result is consistently high.

Plan for topic "Students completing GEOG-162 will be able to explain the difference between the RGB color model and the CMYK color model, and when each is used.": 2013/14

The plan is to continue with the same methodology and sequence of instruction in the future semester, assess the topic, and see if the assessment result is consistently high.

Plan for topic "Students completing the course will be able to classify and represent spatial information using the principles of cartographic design.": 2012/13

The plan is to continue with the same methodology and sequence of instruction in the future semester, assess the topic, and see if the assessment result is consistently high.

Plan for topic "Students completing the course will be able to classify and represent spatial information using the principles of cartographic design.": 2012/13

The plan is to continue with the same methodology and sequence of instruction in the future semester, assess the topic, and see if the assessment result is consistently high.

Plan for topic "Students completing the course will be able to classify and represent spatial information using the principles of cartographic design.": 2012/13

The plan is to continue with the same methodology and sequence of instruction in the future semester, assess the topic, and see if the assessment result is consistently high.

Plan for topic "Students completing the course will be able to classify and represent spatial information using the principles of cartographic design.": 2012/13

The plan is to continue with the same methodology and sequence of instruction in the future semester, assess the topic, and see if the assessment result is consistently high.

Plan for topic "Students completing the course will be able to classify and represent spatial information using the principles of cartographic design.": 2012/13

The plan is to continue with the same methodology and sequence of instruction in the future semester, assess the topic, and see if the assessment result is consistently high.

Plan for topic "Students completing the course will be able to classify and represent spatial information using the principles of cartographic design.": 2012/13

The plan is to continue with the same methodology and sequence of instruction in the future semester, assess the topic, and see if the assessment result is consistently high.

Plan for topic "Students completing the course will be able to classify and represent spatial information using the principles of cartographic design.": 2012/13

The plan is to continue with the same methodology and sequence of instruction in the future semester, assess the topic, and see if the assessment result is consistently high.

Plan for topic "Students completing the course will be able to classify and represent spatial information using the principles of cartographic design.": 2012/13

Plan for topic "Students completing the course will be able to classify and represent spatial information using the principles of cartographic design.": 2012/13

The plan is to continue with the same methodology and sequence of instruction in the future semester, assess the topic, and see if the assessment result is consistently high.

Plan for topic "Students completing the course will be able to classify and represent spatial information using the principles of cartographic design.": 2012/13

The plan is to continue with the same methodology and sequence of instruction in the future semester, assess the topic, and see if the assessment result is consistently high.
The assessment indicates that the criteria was met for this topic. The same methods of instruction and assignment will be used in the future semester and topic will be assessed again to see if the result is consistently high.

Plan for topic "Students completing GEOG-162 will be able to explain at least 3 different methods used to classify data in a map (methods use to generate classes from a data set).": 2012/13

The assessment indicates that the criteria was met for this topic. The same methods of instruction and assignment will be used in the future semester and topic will be assessed again to see if the result is consistently high.

Plan for topic "Students completing the course will be able to...

### Explain the basic elements of a map": 2011/12

- The practice of building a map manually with elements in homework assignment 1 will be continued.

Plan for topic "Students completing the course will be able to explain the basic elements of a map."": 2011/12

- The practice of building a map manually with elements in homework assignment 1 will be continued.

### DVC Instructional Course SLO Action Plans

None, continue with current plan.

**Plan for topic "Students completing the course will be able to compare and contrast the various techniques of map projection."": 2010/11**

In future will formally ask question about State Plane (feet), UTM (meters), and Geographic (non-projected) differences in homework and in-lab final.

**Plan for topic "Students completing GEOG-162 will be able to explain the difference between the RGB color model and the CMYK color model, and when each is used."": 2010/11**

In future will formally ask question about State Plane (feet), UTM (meters), and Geographic (non-projected) differences in homework and in-lab final.

**Plan for topic "Students completing the course will be able to explain the basic elements of a map."": 2008/9**

The practice of using the map with elements in homework assignment 1 will be continued.
DVC Instructional Course SLO Action Plans

750. Drone Remote Sensing and Mapping [GEOG-165] belonging to Physical Science/Physics/Astronomy/Geology/Geography [GEOG]
751. Occupational Work Experience Education in GEOG [GEOG-295] belonging to Physical Science/Physics/Astronomy/Geology/Geography [GEOG]
752. Independent Study [GEOG-298] belonging to Physical Science/Physics/Astronomy/Geology/Geography [GEOG]
Plan for topic "Students completing this course will be able to demonstrate the ability of data collection, compilation, and analysis."

<table>

Plan for topic "Students completing the course will be able to use commonly applied mineral properties to identify 10 common minerals." 2016/17

Based on the learning demonstrated here no actions are needed at the current time.

Plan for topic "Students completing the course will be able to use commonly applied mineral properties to identify 10 common minerals." 2013/14

No plan of action is needed. However, instructors may want to identify struggling students prior to assessment and work with them individually to improve their scores.

Plan for topic "Students completing the course will be able to use commonly applied mineral properties to identify 10 common minerals." 2012/13

A plan of action is not needed, because current teaching methods are ensuring mastery.

Plan for topic "Students completing the course will be able to accurately measure distances on a topographic map and convert scales between graphical, fractional and verbal forms" 2011/12

Clearly, students are not succeeding with this exercise. More time is needed to lead students through the steps to calculate and convert distances and scales. Other, additional methodologies are to be determined.
Plan for topic "Students completing the course will be able to analyze a geologic map and construct basic geologic history from the map." : 2016/17

The level of learning is slightly below the success rate that I would like for the class. Two actions are suggested: (1) take more time on this particular portion of the laboratory (students felt rushed and some of the unsuccessful student did not achieve the necessary points because they left questions blank in their haste to finish; (2) complete more preparatory material in construction of geologic history from less complex areas.

Plan for topic "Students completing GEOL-124 will be able to Determine the relative age of a sequence of rock strata and geologic structures based on common geologic dating principles." : 2013/14

The difference between the first and second assessment of this topic suggests that additional training is required for all students. During the first presentation of cross-section diagrams in the laboratory, increasingly complex diagrams will be presented until students can successfully complete a problem equal to the one that they will see on examination. This will take more time during lab and time used to present other materials may have to be trimmed to accommodate the change.

Plan for topic "Students completing the course will be able to identify and analyze the depositional environment of basic types of sedimentary rocks." : 2011/12

Clearly, more time needs to be spent teaching students how to observe and identify sedimentary rocks. I may devote additional hours to this subject in lab and spend less time covering material on depositional environment.

Plan for topic "Students completing the course will be able to identify and interpret the geologic age of common fossils of marine invertebrates." : 2011/12

No improvement plan is suggested by these data.

Plan for topic "Students completing the course will be able to identify and analyze the depositional environment of basic types of sedimentary rocks." : 2008/9

More time will be spent on identifying sedimentary rocks. This class, which is for majors, is open to all students. To assist the non-majors, it is recommended that more time be spent with those students to assist them in their rock identification skills.
Plan for topic "Students completing the course will be able to name the geomorphic provinces of CA and describe the general geologic features of each.": 2017/18

Data was collected for the section of California Geology this semester and will be entered within the next calendar year.

Plan for topic "Students completing the course will be able to predict which regions of CA are most prone to damage from future earthquakes": 2014/15

This is an outstanding success rate; much improved over previous semesters. This is due to a different approach to the topic taken by the instructor. In a class prior to the exam, students were given a province map. Together with the instructor (using an overhead projection of the map), students drew the location of the San Andreas and the Hayward faults on their maps. They then put the names of the geomorphic provinces on the map. They were then able to clearly see the correlation between the dangerous faults and the provinces through which they are found. They could then appropriately indicate the provinces at risk. This exercise in class facilitated their learning, which was then demonstrated on the final exam.

Plan for topic "Students completing the course will be able to identify which three geomorphic provinces of CA are most prone to earthquakes.": 2014/15

This is an outstanding success rate; much improved over previous semesters. This is due to a different approach to the topic taken by the instructor. In a class prior to the exam, students were given a province map. Together with the instructor (using an overhead projection of the map), students drew the location of the San Andreas and the Hayward faults on their maps. They then put the names of the geomorphic provinces on the map. They were then able to clearly see the correlation between the dangerous faults and the provinces through which they are found. They could then appropriately indicate the provinces at risk. This exercise in class facilitated their learning, which was then demonstrated on the final exam.

Plan for topic "Students completing the course will be able to identify which three geomorphic provinces of CA are most prone to earthquakes.": 2013/14

The level of learning by the current assessment method is considered too low. More specific guidance and instruction is needed, rather than expecting students to think through to the answer, based on lecture and discussion. The action plan involves handing out a province map to the students in class. The instructor will guide the students to locate the San Andreas Fault, the most important earthquake-producing fault in CA, using an overhead projection of the map as a guide. Once the fault is located by students drawing it on their maps, the instructor will ask the students to consider their map, and to indicate three provinces. The instructor will then be able to determine the number of students who completed the exercise correctly; the expected result is 100% since it is an instructor-guided exercise. The students will then be assessed again on the final exam. Significant improvement is expected with this action plan in place.

Plan for topic "Students completing the course will be able to predict which regions of CA are most prone to damage from future earthquakes": 2013/14
earthquakes": 2013/14

The level of learning by the current assessment method is considered too low. More specific guidance and instruction is needed, rather than expecting students to think through to the answer, based on lecture and discussion. The action plan involves handing out a province map to the students in class. The instructor will guide the students to locate the San Andreas Fault, the most important earthquake-producing fault in CA, using an overhead projection of the map as a guide. Once the fault is located by students drawing it on their maps, the instructor will ask the students to consider their map, and to indicate three provinces. The students will then be assessed again on the final exam. Significant improvement is expected with this action plan in place.

Plan for topic "Students completing the course will be able to describe the geologic processes and features associated with convergent and transform plate boundaries": 2010/11

Instruction methods are considered appropriate for this level of student success. Therefore, no changes are planned to current methods.

Plan for topic "Students completing the course will be able to name the geomorphic provinces of CA and describe the general geologic features of each.": 2010/11

This is considered a good success rate. However, I plan to administer an in-class exercise to further improve on this outcome.

Plan for topic "Students completing the course will be able to predict which regions of CA are most prone to damage from future earthquakes": 2010/11

The success rate is considered too low. More specific information needs to be given in lecture about this objective. Then the objective can be assessed in an in-class problem, which will allow for more discussion and critical thinking.

Plan for topic "Students completing the course will be able to identify which three geomorphic provinces of CA are most prone to earthquakes": 2010/11

The success rate is considered too low. More specific information needs to be given in lecture about this objective. Then the objective can be assessed in an in-class problem, which will allow for more discussion and critical thinking.

Plan for topic "Students completing the course will be able to describe the geologic processes and features associated with convergent and transform plate boundaries": 2009/10

The action plan includes articulating to students the importance of knowing this material.

Plan for topic "Students completing the course will be able to name the geomorphic provinces of CA and describe the general geologic features of each.": 2009/10

Action plan is to articulate to students the importance of knowing this information. Secondly, the acceptable success rate should be modified to be more realistic.

Plan for topic "Students completing the course will be able to predict which regions of CA are most prone to damage from future earthquakes": 2009/10

DVC Instructional Course SLO Action Plans

759. Earth Science [GEOL-130] belonging to Physical Science/Physics/Astronomy/Geology/Geography [GEOL]
### Plan for topic "Students completing the course will be able to identify and follow geologic contacts in the field and depict those contacts on basic geologic maps.": 2017/18

This course is infrequently offered because the enrollment is typically limited to a couple handful of GEOL majors. At any given time, this may be anywhere from 5-15 students. If the GEOL area is successful in teaching a section of GEOL 135, we will assess the student's mapping skills following geologic contacts in the field and depicting that data on topographic maps.

The faculty believe that this success rate is acceptable. In addition, the project used for assessing this SLO was just the first of six where these skills are learned and reinforced. Two of the students who struggled on this first project went on to become more successful in later assignments.

### Plan for topic "Students completing the course will be able to accurately use the Brunton compass to locate both position and elevation on a topographic map.": 2014/15

The faculty have determined that the current SLO assessments are well developed and see no need to change the process. This class is a capstone course and will be reassessed during the next offering.

### Plan for topic "Students completing the course will be able to describe outcrops and measure attitudes of rock formations in the field.": 2011/12

The faculty have determined that the current SLO assessments are well developed and see no need to change the process. This class is a capstone course and will be reassessed during the next offering.

761. Independent Study [GEOL-298] belonging to Physical Science/Physics/Astronomy/Geology/Geography [GEOL]
762. Student Instructional Assistant [GEOL-299] belonging to Physical Science/Physics/Astronomy/Geology/Geography [GEOL]
763. First Term German [GRMAN-120] belonging to Foreign Language [GRMAN]

Plan for topic "Students completing this course will be able to understand familiar words and very basic phrases and sentences concerning themselves, their family and immediate surroundings as well as be able to read, recognize and understand familiar names, words and very simple sentences, for example on notices and posters or in catalogues, and read very short, simple texts. By utilizing reading strategies, students can find specific, predictable information in simple everyday material such as advertisements."

WebSLOs had tech issue in regards to this class - SLO & Dept. Chairs will create a SLO Submission schedule for next assessment.

Plan for topic "Students completing GRMAN-120 will be able to read simple German prose."

WebSLOs had tech issue in regards to this class - SLO & Dept. Chairs will create a SLO Submission schedule for next assessment.

Plan for topic "Students completing this course will be able to demonstrate the ability to converse about self, family, friends, hobbies, leisure activities, and studies."

We are very satisfied with the result.

Oral comprehension without visual clues (like gestures, facial expressions) is one of the hardest tasks.

Our new German book provides lots of practice opportunities throughout the book and with the integrated online learning platform, allowing the students to practice in class and at home.

The German teachers will continue to use the new textbook and meet regularly to evaluate teaching methods and standards to improve student's listening skills.

Plan for topic "Students completing GRMAN-120 will be able to read simple German prose."

Keep teaching methods as they are, because the results are very satisfactory.
Plan for topic "Students completing the course will be able to understand familiar words and very basic phrases and sentences concerning themselves, their family and immediate surroundings as well as be able to read, recognize and understand familiar names, words and very simple sentences, for example on notices and posters or in catalogues, and read very short, simple texts. By utilizing reading strategies, students can find specific, predictable information in simple everyday material such as advertisements.": 2012/13

<td>&quot;Students completing this course will be able to interact with others in a simple way as well as ask and answer simple questions in areas of immediate need or on very familiar topics; especially to describe themselves, friends and family.&quot;</td>
<td></td>
<td>Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. We are also planning to add direct assessment in the next cycle.</td>
<td></td>
</tr>
</tbody>
</table>
### Plan for topic "Students will be able to write short, simple messages dealing with everyday issues especially when describing themselves, friends and family, their immediate surroundings, and daily routines. This includes a basic knowledge of some cultural aspects of German-speaking countries and how they are represented in the German language and its use."

Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. We are also planning to add direct assessment in the next cycle.

### Plan for topic "Students completing the course will be able to describe their daily routines briefly in writing."

Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. We are also planning to add direct assessment in the next cycle.
Plan for topic "Students completing this course will be able to recognize nominative case usage in writing samples.": 2019/20
WebSLOs had tech issue in regards to this class - SLO & Dept. Chairs will create a SLO Submission schedule for next assessment.

Plan for topic "Students completing this course will be able to demonstrate the ability to converse about self, present and past events.": 2015/16
We are satisfied with these numerical results, as well as with anecdotal results that the students very much enjoy the opportunity to put their knowledge to use in this way toward the end of the semester.

We will continue to use the same assessment method and remind students to turn in their homework in a timely manner.

Plan for topic "Students completing this course will be able to recognize nominative case usage in writing samples.": 2012/13
Continue to provide reading comprehension activities for the development of skills needed for the SLO.

Plan for topic "Students completing this course will be able to produce short sentences orally and in writing to describe themselves, their family, and their interests.": 2011/12
Doing oral presentations in beginning language classes is difficult and intimidating, but ultimately very productive and rewarding for the students. We will continue conducting oral presentations in beginning German classes.

Plan for topic "Students completing this course will be able to recognize nominative case usage in writing samples.": 2010/11
Very satisfied with results. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.

Plan for topic "Students completing this course will be able to produce short sentences orally and in writing to describe themselves, their family, and their interests.": 2010/11
Very satisfied with results. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.

Plan for topic "Students completing the course will expand their knowledge of culture in German-speaking countries.": 2010/11
Very satisfied with results. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.

Plan for topic "Students completing this course will be able to recognize nominative case usage in writing samples.": 2009/10
Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. We are also planning to add direct assessment in the next cycle.

Plan for topic "Students completing this course will be able to produce short sentences orally and in writing to describe themselves,

765. Topics in German [GRMAN-150] belonging to Foreign Language [GRMAN]
DVC Instructional Course SLO Action Plans

766. Third Term German [GRMAN-220] belonging to Foreign Language [GRMAN]

Plan for topic "Students will be able to analyze and discuss a short story written in German.: 2019/20

- WebSLOs had tech issue in regards to this class - SLO & Dept. Chairs will create a SLO Submission schedule for next assessment.

Plan for topic "Students completing this course will be able to contextualize vocabulary and idioms.: 2015/16

- We are satisfied with the results, although the sample size was quite small. We will encourage students to get a certificate of achievement in German and spend more time to recruit students for the intermediate German courses.

Plan for topic "Students will be able to analyze and discuss a short story written in German.: 2012/13

- Continue teaching vocabulary, literature and reading analysis in German 220.

Plan for topic "Students will be able to recognize and begin to use relative pronouns in written German.: 2011/12

- We will continue teaching German grammar using our current methodologies to assure successful results.

Plan for topic "Students will be able to prepare and present a brief oral report in German about a topic in German culture.: 2011/12

- Continue working on encouraging students to prepare and conduct oral presentations in class. Even though they are difficult, they clearly help improve the fluency of the students, especially at an intermediate level.

Plan for topic "Students will be able to analyze and discuss a short story written in German.: 2010/11

- The results are satisfactory given the method used. In the future, we plan to use a different type of assessment of the outcomes.

Plan for topic "Students will be able to recognize and begin to use relative pronouns in written German.: 2010/11

- The results are satisfactory. We plan to change the assessment method in the future.

Plan for topic "Students will be able to prepare and present a brief oral report in German about a topic in German culture.: 2010/11

- The results are satisfactory. We plan to change the assessment method in the future, from self assessment to direct assessment.

Plan for topic "Students will be able to analyze and discuss a short story written in German.: 2009/10

- Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. We are also planning to add direct assessment in the next cycle.

Plan for topic "Students will be able to recognize and begin to use relative pronouns in written German.: 2009/10

- Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. We are also planning to add direct assessment in the next cycle.

Plan for topic "Students will be able to prepare and present a brief oral report in German about a topic in German culture.: 2009/10

- Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. We are also planning to add direct assessment in the next cycle.
DVC Instructional Course SLO Action Plans

767. Fourth Term German [GRMAN-221] belonging to Foreign Language [GRMAN]

Plan for topic "Students will be able to recognize and begin to use present and past subjunctive in written German.": 2019/20

WebSLOs had tech issue in regards to this class - SLO & Dept. Chairs will create a SLO Submission schedule for next assessment.

Plan for topic "Students completing this course will be able to demonstrate greater command of the written and spoken language, both in comprehension and expression.": 2015/16

Great results but very small sample size. The Foreign Language Department is planning to create a AA degree in German and we are expecting that students will be more motivated to take the advanced German courses.

Plan for topic "Students will be able to recognize and begin to use present and past subjunctive in written German.": 2012/13

Continue to provide opportunities to read short stories and works of literature, and to encourage student discussion, analysis, and response.

Plan for topic "Students will be able to write a few sentences in German analyzing or responding to a short story written in German.": 2011/12

I think that this SLO was met successfully. Continue using proven teaching techniques.

Plan for topic "Students will be able to recognize and begin to use present and past subjunctive in written German.": 2010/11

The results are satisfactory. We plan to change the assessment method in the future.

Plan for topic "Students will be able to write a few sentences in German analyzing or responding to a short story written in German.": 2010/11

The results are satisfactory. We plan to change the assessment method in the future.

Plan for topic "Students will be able to research and discuss topics in German culture relying on sources written in German.": 2010/11

The results are satisfactory. We plan to change the assessment method from self assessment to active assessment in the future.

Plan for topic "Students will be able to recognize and begin to use present and past subjunctive in written German.": 2009/10

Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. We are also planning to add direct assessment in the next cycle.

DVC Instructional Course SLO Action Plans

772. History of the United States after 1865 [HIST-121] belonging to Social Science [HIST]
Plan for topic "Students completing the course will be able to analyze the primary social, economic, and political issues and events in United States history from 1865 to present."

": 2016/17

Build into my course more short, in-class assignments that allow students to draw on information communicated in a variety of ways. Consider doing both written and oral assignments this way.

Plan for topic "Students completing the course will be able to evaluate the 20th century US foreign policy and the development of relationships with foreign nations."

": 2016/17

Build into my course more short, in-class assignments that allow students to draw on information communicated in a variety of ways. Consider doing both written and oral assignments this way.

Plan for topic "Students completing the course will be able to analyze the primary social, economic, and political issues and events in United States history from 1865 to present."

": 2013/14

More frequent evaluations may help solve this problem, although I already have three exams (and the 1923 and 1965 Acts were on separate exams).

Plan for topic "Students will be able to describe the primary social, economic, and political issues facing diverse groups in the United States from 1865 to the present."

": 2013/14

This question may need to be reworded for later exams to make sure that students thoroughly discuss periods other than the 1950s-1970s.

Plan for topic "Students completing the course will be able to evaluate the 20th century US foreign policy and the development of relationships with foreign nations."

": 2013/14

However, a more specific discussion of the term in the course may help.

Plan for topic "Students completing history 121 will be able to Analyze and evaluate the primary social, economic, and political issues in United States history from 1877 to the present."

": 2012/13

Interpretation: This question required a fairly specific response and most students did quite well on it. Those students who did not receive a grade of B or higher did so because...
Plan for topic "Students completing history 121 will be able to Use an historical perspective in analysis and explanation of events and issues in the history of the United States from 1877 to the present." : 2012/13

Interpretation: Many students did quite well on this question. Those who did not usually failed for a single reason """" despite fairly clear instructions on the exam, they started their answer by addressing historical events that only occurred in the mid- to late- twentieth century. I gave students advance notice that a comprehensive essay question would be included on the final, and gave them tips on how to study for it. Perhaps next semester I will have students work in groups to prepare sample essay outlines that emphasize the nineteenth and early twentieth centuries as part of exam review.

Plan for topic "Students completing history 121 will be able to Describe the primary social, economic, and political issues facing diverse groups in the United States between 1877 and the present including African American, Asian American, Native American, Mexican American/Latinos/as, and Gay/Lesbian communities." : 2012/13

Interpretation: Many students did quite well on this question. Those who did not usually failed because their answer was fairly vague and lacked evidence, or because despite fairly clear instructions on the exam, they started their answer by addressing historical events that only occurred in the mid- to late- twentieth century. I gave students advance notice that a comprehensive essay question would be included on the final, and gave them tips on how to study for it. Perhaps next semester I will have students work in groups to prepare sample essay outlines that emphasize the nineteenth and early twentieth centuries as part of exam review.

Plan for topic "Students completing the course will be able to analyze the primary social, economic, and political issues and events in United States history from 1865 to present."

": 2011/12

For those that scored lower than a B mark, I try to meet with them after the papers are handed back, some go for writing tutoring, others require additional aid in developing both writing and research skills. I will be posting more materials online in WebCT for review purposes and begin breaking classes into groups to have discussion sessions prior to the due date of future assignments. My teaching assistants have been quite helpful with students in this type of activity when I have done this in the past.

Plan for topic "Students completing the course will be able to evaluate the 20th century US foreign policy and the development of relationships with foreign nations." : 2011/12

For those that scored lower than a B mark, I try to meet with them after the papers are handed back, some go for writing tutoring, others require additional aid in developing both writing and research skills. I will be posting more materials online in WebCT for review purposes and begin breaking classes into groups to have discussion sessions prior to the due date of future assignments. My teaching assistants have been quite helpful with students in this type of activity when I have done this in the past.

Plan for topic "Students completing the course will be able to analyze the origins and achievements of the modern civil rights movement." : 2011/12
The ratio on the final of students achieving the outcomes is higher than the other two assignments in this SLO assessment series, but the overall no. of students is lower, indicating some students may have dropped by the end of the term, or missed the final. Retention is important, and for some students, the reading and writing demands of history courses can be intimidating. That said, I encourage students to contact me, submit drafts before hand, and seek tutoring or contact one of my teaching assistants when needed and will continue to do so in the future.
I have taught this course for close to 15 years, and over that time I have adjusted the basic terms and skills assignment to try to allow flexibility and independence of thought in application. I try to have the first assignment be not only important in terms of a baseline of information, but also as a baseline for grading in the class. I like to really focus on students getting off to a good start. While most of the students succeed, I strive to find ways to help those struggling out of the gate by giving class plenty of time to review assignment materials and we cover them all in class. While I think this SLO is widely met, I will continue to try to reach out to those who may seem less engaged early on so that I might be able to better predict who may have trouble managing time or finding resources needed to pass the assignment.

Plan for topic "Students completing the course will be able to identify and analyze the structure of arguments.": 2016/17

For Critical Thinking in History, the integration of student learning activities in class must be employed for students to actually do history. It's not enough preparation for students to just write papers in a vacuum and have the professor read them. This particular assessment cycle and discussion about how to teach critical thinking really bore this out. Interactive group activity and additional learning skills need to be employed.

Plan for topic "Students completing history 122 will be able to Detect and avoid fallacious of thinking": 2012/13

The SLOs for this course are unrealistic.

Plan for topic "Students completing history 122 will be able to Identify and analyze structure of arguments": 2012/13

reassess SLOs

Plan for topic "Students completing history 122 will be able to Evaluate the validity and the soundness of arguments.": 2012/13

re-evaluate SLOs

Plan for topic "Students completing history 122 will be able to Detect and avoid fallacious thinking": 2012/13

The SLOs for this course are unrealistic.

Plan for topic "Students completing the course will be able to identify and analyze the structure of arguments.": 2011/12

I intend to make online tutorials available in WebCT and build in more in class time for review and discussion just prior to assignment due date as well as follow up after the assignment with those who had difficulty. The hope is that students who had difficulty at this stage will improve their likelihood of achieving additional desired outcomes in the future. That said, most students succeeded.

Plan for topic "Students completing the course will be able to evaluate the validity and soundness of arguments.": 2011/12

Students tend to respond positively to the group activity and the interaction they experience seems to contribute to overall positive results of this assessment. Students not demonstrating this often are ones who are absent for some of the time these assignments and happening.

Plan for topic "Students completing the course will be able to write essays that employ question-framing, analysis, and synthesis.": 2011/12
Given most students seem to achieve this SLO, that is a good sign in terms of how the course is conducted overall. However, I have attenuated the way I lay out course material, conduct certain assignments (like the groups assignment in SLO #2), such that I may improve student outcomes in the future.
Plan for topic "Students completing this course will be able to [C] Discuss differing perspectives of California History": 2017/18

In my California history class we take 3 compare / contrast essay exams throughout the semester. By the final exam, students feel very comfortable with compare contrast; they are able to form a pretty strong stance / opinion supported by information they have either read about or learned from lecture.

The results above show that students do well after a semester of exercising critical thinking skills writing and reasoning.

One disclaimer, however, is that students often by the final exam only need so many points to earn the grade they want. Therefore, these final exam grades may actually NOT show the full extent of student learning. For example, going into the exam students know they only need a 70 to get the grade they want so they underachieve... ugh! Yes. It’s true! This will be an interesting department discussion! Is this something we can avoid? Do we care?

Plan for topic "Students completing the course will be able to demonstrate an understanding of the basic history of California."": 2014/15

Next semester the full-time faculty history instructor at SRC will go over assessment methods with any adjunct who are teaching classes in which SLOs are being assessed in an effort to facilitate more detailed and authentic results.

Plan for topic "Students completing the course will be able to compare and contrast different periods in California history."": 2014/15

Next semester the full-time faculty history instructor at SRC will go over assessment methods with any adjunct who are teaching classes in which SLOs are being assessed in an effort to facilitate more detailed and authentic results. Another way to improve achievement levels for this SLO might be to think about how to present the Hispanic Age in a way that is easier for students to relate to and/or to dedicate more class-time to this period so that students come to feel more comfortable with it.

Plan for topic "Students completing HIST-124 will be able to explain the role of major ethnic groups that have contributed to California history and assess and analyze the nature of racism and nativism as they have appeared in California and the nation."": 2014/15
The results for this SLO indicate that HIST 124 instructors have done a particularly good job of helping students to learn about the state’s diverse ethnic history. In order to sustain these positive results, one course of action for HIST 124 instructors to take next semester might be to solicit feedback from students on why they felt especially comfortable discussing California ethnic history. Such an enquiry might point the way toward improving achievement percentages for other learning outcomes in the course.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the California Constitution.": 2014/15

The results for this SLO indicate that HIST 124 instructors have done a particularly good job of helping students to learn about the state’s diverse ethnic history. In order to sustain these positive results, one course of action for HIST 124 instructors to take next semester might be to solicit feedback from students on why they felt especially comfortable discussing California ethnic history. Such an enquiry might point the way toward improving achievement percentages for other learning outcomes in the course.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the basic history of California.": 2013/14

This SLO is overwhelmingly being fulfilled.

Plan for topic "Students completing the course will be able to compare and contrast different periods in California history.": 2013/14

In the future, students need to be graded on comparing and contrasting differing periods of California history.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the California Constitution.": 2013/14

It will be interesting to discuss this SLO with other instructors who teach California History and see how they teach the California Constitution.

Plan for topic "Students completing HIST-124 will be able to explain the role of major ethnic groups that have contributed to California history and assess and analyze the nature of racism and nativism as they have appeared in California and the nation.": 2013/14

It will be interesting to discuss this SLO with other instructors who teach California History and see how they teach the California Constitution.

Plan for topic "Students completing the course will be able to Feel comfortable comparing and contrasting the gold rush with WWII.": 2011/12

Continue as in the past.

Plan for topic "Students completing the course will be able to Determine whether California government has offered opportunity to all people, all the time.": 2011/12

In the future more emphasis should be placed on emphasizing that discrimination is not random but revolves around our government, laws and the California Constitution.
### Plan for topic "Students completing this course will be able to [F] Evaluate the role of immigration in the development of the United States": 2017/18

**What Worked** = Students enhanced their communication and editing skills through the interview process of the assignment. In addition, through the interviews, students were able to comprehend the immigrant’s experience in the United States from their journey and their triumphs and challenges in the country.

**Opportunities for Improvement** = Possibly change the assignment to compare and contrast the experience of a recent immigrant to older immigrant to the United States.

**Discussion** about ways to address those students who did not complete the assignment? Did they not manage time well to complete the various steps of the interview and write up process or, where they not interested because they were less interested in older immigrant’s experience (comment above).

### Plan for topic "Students completing the course will be able to demonstrate an understanding of the social, economic, and political contributions of the Mexican American community in the development of the United States of America.": 2014/15

I will encourage students to perform better by counting the quiz results as part of the regular course grade instead of counting for extra credit, as it has been up to now.

### Plan for topic "Students completing HIST-125 will be able to demonstrate an understanding of the social, economic, and political contributions of the Mexican American community to the development of the United States.": 2014/15

I will encourage students to perform better by counting the quiz results as part of the regular course grade instead of counting for extra credit, as it has been up to now.

### Plan for topic "Students completing the course will be able to demonstrate an understanding of the significant gender issues among Latinos.": 2014/15

I will make the quiz score a part of the student's regular course grade instead of extra credit, as it has been up to now.

### Plan for topic "Students completing the course will be able to demonstrate an understanding of the nature of racism as it relates to Latinos.": 2014/15

I plan to make the quiz part of the student's regular course grade, instead of extra credit, as it is now.

### Plan for topic "Students completing HIST-125 will be able to demonstrate an understanding of the social, economic, and political contributions of the Mexican American community to the development of the United States.": 2013/14

In reviewing the data, it is possible that the surprise quizzes might have effected a drop in success. During the next cycle we will use scheduled quizzes to gather SLO data. Besides using the data for the SLO assessment, we will compare it against the data gathered using pop quizzes.

### Plan for topic "Students completing the course will be able to demonstrate an understanding of the social, economic, and political contributions of the Mexican American community in the development of the United States of America.": 2013/14
## DVC Instructional Course SLO Action Plans

In reviewing the data, it is possible that the surprise quizzes might have effected a drop in success. During the next cycle we will use scheduled quizzes to gather SLO data. Besides using the data for the SLO assessment, we will compare it against the data gathered using pop quizzes.

DVC Instructional Course SLO Action Plans

776. The American West [HIST-126] belonging to Social Science [HIST]
Plan for topic "Students completing the course will be able to demonstrate an understanding of the significant social, economic, and political events associated with the Western Movement." : 2016/17
Students are learning the material well.

Plan for topic "Students completing the course will be able to identify the major ethnic and social groups that impacted the Western Movement." : 2016/17
Students are learning well.

Plan for topic "Students completing the course will be able to demonstrate an understanding of how the Western Movement has shaped American values." : 2016/17
Students learned well.

Plan for topic "Students completing history 126 will be able to Compare and contrast the various national frontiers (e.g., English, Spanish, French, etc.) of the American West." : 2016/17
Quiz results indicate that students are learning the material well. The only area that could improve significantly is SLO no. 4 (Analyze the role of the westward movement from the Atlantic seaboard in shaping American values). To address this issue, I plan on putting greater stress on Frederick Jackson Turner and his frontier thesis in the future.

Plan for topic "Students completing history 126 will be able to Understand the interactions between and the contributions of native Americans, European American, African American and Mexican American men and women in the American West?" : 2016/17
Students are learning well.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the significant social, economic, and political events associated with the Western Movement." : 2014/15
Professor A. Some of the other multiple choice questions did not fare as well as the ones selected. One question on President Polk's desire to annex all of Mexico, had 40 student missing it. It indicated that there were things that were thought to be covered, but did not seem to have been covered as well. Closer attention to the notes and delivery will be closely monitored and also provide a homework assignment that deals with the Treaty of Guadalupe Hidalgo.

Professor B. Create more thoughtful follow up questions as to why a student would or would not be able to elucidate more on a topic.
Plan for topic "Students completing the course will be able to identify the major ethnic and social groups that impacted the Western Movement." : 2014/15

Professor A. Overall, the questions seem to address the main concern, but the SLO itself can be a bit more specific since the Western Movement needs to be defined according to the period, and different groups were involved as the Western Frontier borders changed over time.

Professor B. Create more thoughtful follow up questions as to why a student would or would not be able to elucidate more on a topic.

Plan for topic "Students completing the course will be able to demonstrate an understanding of how the Western Movement has shaped American values." : 2014/15

Create more thoughtful follow up questions as to why a student would or would not be able to elucidate more on a topic.

Plan for topic "Students completing history 126 will be able to Compare and contrast the various national frontiers (e.g., English, Spanish, French, etc.) of the American West." : 2014/15

The can use more critical thinking aspect and in the future will deepen the approach to the subject and allow the students to develop and think deeper about the relationships between the various groups and the Native Americans.

Plan for topic "Students completing history 126 will be able to Compare and contrast the various national frontiers (e.g., English, Spanish, French, etc.) of the American West." : 2012/13

Most students felt comfortable with the idea of frontiers.

Plan for topic "Students completing history 126 will be able to : Assess the interaction between and the contributions of Native American, European American, African American, Asian American, and Mexican American/Latino men and women in the American West." : 2012/13

The use of maps and visuals are key teaching tools.

Plan for topic "Students completing history 126 will be able to Discuss the fundamental American beliefs and desires demonstrated by the nation's westward movement from the Atlantic seaboard to the Pacific Ocean." : 2012/13

By my calculations, then, 80% percent of students completing the exam demonstrated complete mastery, and 20% demonstrated partial mastery. Continue to work on quantifying words such as "beliefs and desires" for students to better understand the ideological underpinnings and justification of U.S. imperialism.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing history 126 will be able to Understand how westward movement and settlement affected the most significant social, economic and political events in the history of the U.S.": 2012/13

Clarification of the SLO would be beneficial.

Plan for topic "Students completing history 126 will be able to Understand the role of the major ethnic and social groups in the West in the most significant Western historical events.": 2012/13

Better clarification of SLOs would help students respond.

Plan for topic "Students completing history 126 will be able to Understand the interactions between and the contributions of native Americans, European American, African American and Mexican American men and women in the American West?": 2012/13

I think this SLO is pretty clear, so I'm surprised it would have the lower number of "absolutely” responses. It might be worth going over in class, in a quantitative way, the contributions of each group.
I recently divided this assignment into two parts—the first is a primary source analysis and the second is a more "traditional" research paper based on the first primary source paper. Splitting the assignment into two parts has helped with teaching students to analyze primary sources. More time could be spent on teaching students how to quote and cite sources and making historical arguments.

The quizzes proved an effective way to keep students engaged with the basic course information and as a gateway for higher-level thinking. This semester presented new challenges (switch to a 16-week schedule, campus closure) emphasizing the importance of regular and predictable assessments. Future course planning will take this into account.

While the quizzes are efficacious, in and of themselves, they are not an adequate tool for assessing this outcome. An assessment that provides more specificity regarding this outcome needs to be developed.

While the quizzes are efficacious, in and of themselves, they are not an adequate tool for assessing this outcome. An assessment that provides more specificity regarding this outcome needs to be developed.
the relationship of African Americans to U.S. legal and political institutions. 4. Articulate the relationship of African Americans to the California Constitution and to state and local governments. 5. Compare and contrast the relationship of African Americans to California and its constitution with their experience in other states, especially the southern United States.": 2017/18

Future course planning will take this into account.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the relationship of African Americans to the Federal, state and local governments, since the end of the Civil War.": 2016/17

Opportunities for improvement:
DVC Instructional Course SLO Action Plans

1. Explore integrating library workshops
2. Deliberately prepare the steps of the writing process for students.
3. Consider having students turn in shorter essays or multiple steps to building up to a larger research paper.

| Plan for topic “Students completing the course will be able to demonstrate an understanding of the relationship of African Americans to the Federal, state and local governments, since the end of the Civil War.”: 2012/13 |
| Explore integrating library workshops on primary source research and assessment. More deliberately prepare throughout the writing process. |
| Plan for topic "Students completing the course will be able to demonstrate an understanding of the significant events in African American history since 1865." : 2012/13 |
| Deliberate review process. Spend class sessions prior to exam/paper on review. |
### DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to analyze nativism of the 1920s and its impact on citizenship and Asian immigration laws.": 2016/17

<table>
<thead>
<tr>
<th>Instructor recommends:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Consider moving from an essay-only format to allow students with limited English skills the option of demonstrating their knowledge through multiple choice and short answer questions.</td>
</tr>
</tbody>
</table>

Plan for topic "Students completing history 129 will be able to Compare and contrast the historical progress of Asians and Pacific Islanders with that of mainstream society since 1965.": 2012/13

| With emphasis on essay exams, the professor may consider that the "essay only" exam may be complemented by short answer or multiple choice questions on at least the first exam. |

Plan for topic "Students completing history 129 will be able to Show that they understand the impact of two periods of immigration policy upon Chinese and Japanese Americans between 1800 to 1943 (1800-1882 and 1882-1943).": 2012/13

| Revise SLOs to better target course information |

Plan for topic "Students completing history 129 will be able to Examine the ideological and the institutional factors leading to the internment of Japanese Americans during WWII and compare their experiences with another Asian group during WWII. How did the war impact the two groups and their contribution to the war effort?": 2012/13

| Better fine tune the SLOs to better reflect class material. |

Plan for topic "Students completing the course will be able to compare the experiences of Japanese Americans on the mainland with one of the other four Asian American groups (Filipinos, Koreans, Asian Indians, or Chinese). They look at the movement that caused the internment of Japanese Americans and the experience of another group during the war.": 2011/12

| Encourage future students to prepare more effectively for the essay--suggest outcomes that the instructor seeks. |
Plan for topic "Students completing HIST-135 will be able to Construct an historical argument using primary and secondary sources.":: 2018/19

What Worked = Students enhanced their analytical skills when reading a primary sources. Provided in depth perspective regarding the document.

Opportunities for Improvement = As this is a Colonial Latin American course and the language of most primary sources of the 16th to 19th century are Spanish or Portuguese and have not been translated to the English language the number available is limited. I will continue to search for examples that have been translated and textbooks that provide translated examples of primary sources of Colonial Latin America.

Plan for topic "Students completing the course will be able to explain the methods by which the great pre-Columbian indigenous cultures were conquered.":: 2014/15

I'm contemplating more systematic ways of addressing conquest in Latin America. One methods might be a comparative approach, another might be through film (I've used The Unfinished Conquest in the past). Perhaps a more "objective" (quizzes) might be a good supplemental assessment.

Plan for topic "Students completing the course will be able to demonstrate an understanding of how Spanish/Portuguese colonialism operated.":: 2014/15

I'm contemplating more systematic ways of addressing colonialism in Latin America. One methods might be a comparative approach, another might be through film. Perhaps a more "objective" (quizzes) might be a good supplemental assessment

Plan for topic "Students completing HIST-135 will be able to Construct an historical argument using primary and secondary sources.":: 2014/15

I will continue this form of assessment as it constitutes a foundational aspect of historical studies. This semester I split the assignment into two parts. This worked well.

Plan for topic "Students completing the course will be able to explain the methods by which the great pre-Columbian indigenous cultures were conquered.":: 2013/14

The multiple checks for understanding through lecture quizzes and the film reviews yielded positive results. This cohort was quite sophisticated. Still, a delineation of similarities and differences between the experiences of larger pre-Colombian peoples would be useful.

Plan for topic "Students completing the course will be able to demonstrate an understanding of how Spanish/Portuguese colonialism operated.":: 2013/14

The multiple checks for understanding through lecture quizzes and the film reviews yielded positive results. This cohort was quite sophisticated. Still, there should be a more deliberate engagement of students in a delineation of similarities and differences between Spanish and Portuguese colonialism.
A Library workshop helped considerably with this semester's results. I will do the workshop again, and provide deliberate coaching on primary source evaluation throughout the paper-writing experience.
### Plan for topic "Students completing HIST-136 will be able to construct an historical argument.": 2018/19

**What Worked** = Students enhanced their analytical skills when reading a literature perspective regarding Mexican identity historically. Provided in depth perspective regarding the essay.

**Action Plan** = This course is only taught in the Spring semester. When I teach the course this coming Spring 2020 semester, I plan to provide other literature works such as Paz’s that provide historical perspective of Latin American identity in the 20th century. This will allow students understand other perspectives of identity in Latin America in the 20th century and compare and contrast.

### Plan for topic "Students completing HIST-136 will be able to construct an historical argument.": 2015/16

Speak with adjunct faculty about the SLO assessment process.

### Plan for topic "Students completing the course will be able to explain the impact of neocolonialism and neoliberalism on Latin America.": 2015/16

Speak with adjunct faculty about SLO Assessments

### Plan for topic "Students completing the course will be able to explain Latin America’s place in the world’s political economy.": 2015/16

Speak with adjunct faculty about SLO assessment methods and assessment.

### Plan for topic "Students completing HIST-136 will be able to construct an historical argument.": 2012/13

Explore integrating library workshops on primary source research and assessment. More deliberately prepare throughout the writing process.

### Plan for topic "Students completing the course will be able to explain the impact of neocolonialism and neoliberalism on Latin America.": 2012/13

A question might be constructed that more directly addresses interpretations of neocolonialism, especially neoliberalism.

### Plan for topic "Students completing the course will be able to explain Latin America’s place in the world’s political economy.": 2012/13

Will work in asking students to more directly include indicators of Latin America's role in "political economy"—what is "political economy" and what are the indicators associated with it?
Like the SLO data from San Ramon, we notice that some students have a low level of confidence with primary sources, and time management issues. Often, it is not the grasping of material, but the ability to do the work!

The three students who earned failing grades on the assignment did not take advantage of the prior weeks readings or comments made on their online posts. Since this was an online course, there was no in class discussion with regard to the complexity of making objective, source based arguments using historical evidence. However, emails sent throughout the course, files sent to the class and online discussions were intended to provide preparation. The students in question did not participate in the online discussions and the evidence suggests they did not read the online text either (number of hours logged in is a metric provided to the instructor).

Face to face courses provide far more means to 'catch' students who struggle with argumentation and materials. Online courses do not, other than the warning signs provided in either not doing online discussions or making cursory, opinionated comments.

Possibly, the best line of action is for such students to take campus courses rather than online ones, which usually require far more self driven practices.
DVC Instructional Course SLO Action Plans

throughout the course, files sent to the class and online discussions were intended to provide preparation. The students in question did not participate in the online discussions and the evidence suggests they did not read the online text either (number of hours logged in is a metric provided to the instructor).

Face to face courses provide far more means to 'catch' students who struggle with argumentation and materials. Online courses do not, other than the warning signs provided in either not doing online discussions or making cursory, opinionated comments.

Possibly, the best line of action is for such students to take campus courses rather than online ones, which usually require far more self driven practices.

Plan for topic "Students completing this course will be able to analyze the concept of the West.":: 2016/17

Apart from the student whose writing was largely indecipherable, I think extra class-time devoted to summarizing the options for this essay would have benefitted the student who earned a C and the student who earned an F on this question. During the last class before the final I had students, collectively, come up with outlines for a couple of the essay questions on the final exam study guide. Because this one on the Roman Empire was larger in scope than most of the others, in future I might make sure that it gets coverage during our final exam review session.

Plan for topic "Students completing hist-140 will be able to define and evaluate economic, social, cultural, and political issues in response to changing historical circumstances.":: 2012/13

More data will be gathered in the future to better assess the results of topic #4.

Plan for topic "Students completing hist-140 will be able to analyze events and forces that shaped western history and compare these events and forces to present challenges and current questions.":: 2012/13

More data needs to be generated for topic #5 to be better assessed.

Plan for topic "Students completing hist-140 will be able to trace and evaluate the development of contemporary institutions in western society, together with patterns of western thought.":: 2012/13

More data needs to be gathered for assessing topic #6

Plan for topic "Students completing history 140 will be able to Understand and evaluate economic, cultural and political issues in response to changing historical circumstances.":: 2012/13

Essay exams are a useful evaluative tool.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing history 140 will be able to Recognize and evaluate events and forces that shaped western history; compare and contrast post and present day challenges in western civilization.": 2012/13

Students are achieving SLOs

Plan for topic "Students completing history 140 will be able to Analyze and discriminate between different types of historical evidence such as various primary and secondary sources and to be able to present a convincing argument.": 2012/13

Most students are achieving SLOs
Plan for topic "Students completing this course will be able to evaluate an historical event or series of events, taking into consideration multiple causes that may have interacted in a complex way.": 2017/18

What seems to have worked is letting students do research instead of asking them to answer questions on the Enlightenment or Holocaust.

Plan for topic "Students completing the course will be able to define and evaluate economic, social, cultural, and political issues in response to changing historical circumstances.": 2016/17

Opportunities for improvement:

1. Quantify success rates more objectively

2. Have a discussion about limiting the number of SLOs -- there are 13 listed.

3. Consider assessing at least 2 SLOs amongst all faculty teaching that course

Doing well --

1. Assigning material to students, such as short essays or multi-stepped research papers -- that truly teaches students and uncovers what they know.

Plan for topic "Students completing history 141 will be able to Define and evaluate economic, social, cultural, and political issues in response to changing historical circumstances.": 2016/17

Opportunities for improvement:

1. Quantify success rates more objectively

784. Contemporary European History [HIST-142] belonging to Social Science [HIST]
Plan for topic "Students completing this course will be able to [ B ] Interpret primary source documents.

"": 2018/19

I am teaching this again in Spring 2020. I will maintain the shorter text with simpler prose and shorter chapters. DVC students could not keep up with a more scholarly text that required 50 pages a week.

The assignment worked. Students had 60 pages of dense historical material and up to 50 primary sources to shape an argument from about "Western values." Those that attended and read the material did a fine job. This is a class that attracts students who care about the issues in European/western history.

Plan for topic "Students completing this course will be able to [ E ] Evaluate different perspectives on the Cold War, assessing American, European, Russian, and Colonial viewpoints.": 2015/16

Try to avoid teaching this class in less than full term format as it expected a lot of online students in compressed form.

Plan for topic "Students completing this course will be able to [ B ] Interpret primary source documents.

"": 2015/16

Weekly online posts required analysis of interesting sources, so students posted in their own time their thoughts on the historical past as it was recorded. I intend to continue shaping the course around this type of hands on work, along with lectures on other days.
Plan for topic "Students completing history 150 will be able to Describe how the geography of East Asia helped form the civilizations of Japan and China.": 2017/18

I considered moving from an essay-only format to allow students with limited English skills the option of demonstrating their knowledge through multiple choice and short-answer questions. However, since the two students dropped for not turning in the second midterm, were not regularly attending class, I am going to use discretion on this issue since I honestly think essay exams are much more effective in enhancing students’ retention of the content material than exams with simple-answer and multiple-choice questions.

Department Discussion: Value of essay exams over multiple choice.

Plan for topic "Students completing HIST-150 will be able to describe the evolution and transformation of mainland cultural forms such as Buddhism and Confucianism as they came to be adapted by the Japanese.": 2017/18

I considered moving from an essay-only format to allow students with limited English skills the option of demonstrating their knowledge through multiple choice and short-answer questions. A more thorough investigation of the class size and a discussion about the complexity and student expectations of the class may be useful.

Plan for topic "Students completing history 150 will be able to Describe how the geography of East Asia helped form the civilizations of Japan and China.": 2012/13
A more thorough investigation of the class size and a discussion about the complexity and student expectations of the class may be useful.

Plan for topic "Students completing history 150 will be able to Accurately compare and contrast patterns of political change in China with those in Japan.": 2012/13
See response to SLO #1

Plan for topic "Students completing the course will be able to demonstrate an understanding of the geography of East Asia.": 2010/11
Results indicate little need for action. Perhaps course could place some additional emphasis on East Asian geography.

Plan for topic "Students completing HIST-150 will be able to Students, upon completing Midterm #1, will be able to demonstrate an understanding of the origins and changing philosophical and social composition of the Confucian system in traditional China as it confronted other traditional systems, Daoism and Legalism.": 2010/11
No changes in course warranted by result.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the religious, philosophical, social, and political forms that shaped traditional Chinese and Japanese civilizations.": 2010/11
No changes in course warranted by result.

Plan for topic "Students completing the course will be able to explain the role played by Korea and Vietnam within the traditional Confucian structure of inter-state relations.": 2010/11
Course should be modified to include some additional emphasis on traditional Korea and Vietnam.
Plan for topic "Students completing this course will be able to explain the causes of the decline of the Qing Dynasty in China and the
Tokugawa Shogunate in Japan."": 2016/17

Consider switching to a multiple choice and short answer format for students with limited English skills.

Plan for topic "Students completing this course will be able to Option 1: Discuss how China and Japan responded to the West with an
emphasis on China: Answer the following sets of prompts/questions: discuss A & B with an emphasis on B and then compare and contrast the role the following played in shaping China's different response to the West then Japan's: C. How did China's geography, history, sense of nationalism, and class structure/ethnic composition differ from those same factors in Japan's history (overall/macro)? How did China's trade with the West differ from that of Japan? (Look over Option 2 B-C.) Option 2: Discuss how China and Japan responded to the West with an emphasis on Japan: Answer the following sets of prompts/question: A, & B with an emphasis on B and then compare and contrast the role the following played in shaping Japan's different response to the West the China's: C. How did Japan's geography, history, sense of nationalism, and class structure differ from those same factors in China's history (overall/macro)? How did Japan's trade with the West differ from that of China? (Look over Option 1 B)": 2014/15

Action Plan: I plan to consider moving from an essay-only format to allow students with limited English skills the option of demonstrating their knowledge through multiple choice and short-answer questions.

Plan for topic "Students completing this course will be able to A. Section on Qing China: Briefly describe the founding of the Qing and its 18th century governance and economy. Describe its decline beginning in the late 18th century. (Ch. 15) B. Section on the Late Qing: Discuss the Opium War and its causes, the treaties and the treaty system. Describe the internal crises the Qing faced and then discuss the Taiping Rebellion (1850-1864) and Zeng Guofeng and the defeat of the Taiping. Describe China and the world from the Treaty of Nanjing to the End of the Taipings. Describe the Self-Strengthening Movement and its three phrases. Describe the decline of the Qing: the Empress Dowager and her Government, the state of the education system and attempted reforms, and the state of the traditional and newer economic sectors. Describe the continued foreign pressure in the area and the war with France, 1884-1885 over Vietnam. (Ch. 16) C. How did China's geography, history, sense of nationalism, and class structure/ethnic composition differ from those same factors in Japan's history (overall/macro) in shaping its response to the West? How did China's trade with the West
DVC Instructional Course SLO Action Plans

differ from that of Japan? (Look over Option 2 B-C.)

2.A. Tokugawa Japan: Describe the Unification and consolidation of Japan. Bakufu-Han relations and economic and social change. Describe the intellectual currents and the Dutch Learning School. (Ch. 14)

2. Late Tokugawa: Describe the Bakufu (1787-1841), the economy and reforms. Describe the intellectual currents, esp. the three schools of thought and their significance. Describe the opening of Japan. Describe the failure of the Tokugawaâ€™s reaction to the West. Describe the late years of the Shogunate. (Ch. 17)

B. Meiji Japan: Describe the formation of a new government. Describe the dismantling of the old order and the disaffection and opposition that accompanied it as well as the construction of the new centralized government and how it responded to the Western challenge. What was the meaning of the Restoration? (Ch. 17)

C. How did Japanâ€™s geography, history (micro/situational), sense of nationalism, and class structure differ from those same factors in Chinaâ€™s history (overall/macro) in shaping its response to the West? How did Japanâ€™s trade with the West differ from that of China? (Look over Option 1 B)

": 2014/15

Action Plan: I plan to consider moving from an essay-only format to allow students with limited English skills the option of demonstrating their knowledge through multiple choice and short-answer questions.

Plan for topic "Students completing the course will be able to If asked, would you be able to explain the Vietnamese nationalist movement from 1930 1975?": 2011/12

Mr. George said: "I need to spend a bit more time on the Vietnamese(which is really SE Asia) nationalist movement and link it to the rise of Chinese nationalism. (Ho Chi Minh was in Canton in mid 1920's -- the base for the Chinese Nationalist movement.)"

787. Topics in History [HIST-155] belonging to Social Science [HIST]
I was disappointed -- but not surprised -- that so many (11) students did not do well & received 60% or lower. However, only 1 student dropped the class! I would like students to do better on essay exams. I only give one midterm and one final. In order for students to get more practice and more comfort with essay exams, I plan to give 3 essay exams in the future. This way, students will be responsible for less information (smaller bites) and perhaps may be able to better explain the roles of women in history.

This Fall -- 2018 -- I gave 3 exams instead of just two and students definitely improved from last semester. (9 60%, 3 70%, 11 80% and 7 90%). However, without a true “finals week” I noticed that students still are not giving me very clear critical thinking. Perhaps skipping “exams” altogether and giving students more frequent, short, in-class critical thinking quizzes might be more effective.

Plan for topic "Students completing this course will be able to analyze the impacts of the U.S. and the California constitutions, plus federal, state and local governments and institutions on the experiences of women."

Spend more time on the U.S. Constitution and specific federal and state laws and -- at the same time -- juxtapose those documents with the primary sources of women in history.

We could look at the first California Constitution in more depth and then look at Eliza Farnum's experience in California which may more directly connect the two very different experiences in California. Same with the U.S. Constitution -- look at specific clauses (3/5ths compromise) and juxtapose those with a woman's experience (Phyllis Wheatley's poems). Making the context more clear and direct may help student see the connection. The only problem, is this seems like pretty heavy spoon-feeding of information and drawing connections for students rather than them doing it for themselves.

Plan for topic "Students completing the course will be able to explain the effect of class, race, ethnicity, and regional variation on lives of women through 1877."
### DVC Instructional Course SLO Action Plans

1. Choose 3 new SLO topics, especially B which asks about the California and US Constitutions. This has always been difficult because women historically have not been able to be involved in "politics."

2. Rotate responsibility among part time faculty.

3. Have at least one online assessment.

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing history 170 will be able to have a basic understanding of how women participated in the social, political and economic transformation of the United States from the Colonial period through the Civil War? (How they lived and what they did to help instrument change in the United States.)&quot;: 2012/13</th>
</tr>
</thead>
<tbody>
<tr>
<td>Most students overwhelming agree that they have a basic understanding of course material. And the evaluations show that information is uniformly given to both classes.</td>

DVC Instructional Course SLO Action Plans

789. History of Women in the United States after 1865 [HIST-171] belonging to Social Science [HIST]

Plan for topic "Students completing this course will be able to : [A] Create an historical argument using critical thinking skills and primary source documents." : 2017/18

Over half (25 + 17) of the class did this assignment successfully. The students who did not do, or failed, the assignment put off the homework for too long and realized too late that the assignment was a difficult one. (Students can’t just 'flip' and turn in poor work.) For those students, I did allow them to turn in this assignment late for partial credit, but they were too overwhelmed with coursework. Given these are 3 students out of 54, that’s pretty good.

This assignment successfully helps students' critical thinking skills. One of my colleagues in our department suggested giving students an additional 10% if they come to my office hour so we can work on this assignment together.

While in my office, I role model critical thinking techniques and they receive a better understanding of what critical thinking is and how to reflect those skills in this assignment.

Plan for topic "During a class presentation from a chapter in Gail Collins' When Everything Changed students will analyze women's contributions to changing social, political, and economic equality." : 2016/17

Office hours were very important to student success, helping students more than half the time to receive better success on class presentations, or grasping the idea of women's contributions better.

Plan for topic "Using a class presentation based on Gail Collins's When Everything Changed, students will be better able to evaluate the roles of women in U.S. history." : 2016/17

Since this rubric question is popular, we may want to expand and create a full oral history project in the U.S. Women's course or, perhaps, an oral history course at DVC.

Plan for topic "Students completing the course will be able to explain the effect of class, race, ethnicity, and regional variation on lives of women since 1877." : 2013/14

My plan for action is to continue using biographical texts which, from the above information, really hits home with students.
Plan for topic "Students completing HIST-171 will be able to explain the challenges of African American women in U.S. History?": 2013/14

My plan for action is to continue using biographical texts which, from the above information, really hits home with students.

Plan for topic "Students completing the course will be able to demonstrate an understanding of women's participation in political, social and economic transformations since 1877.": 2013/14

Perhaps I will use a biography that focuses more on politics (may be BORING...) to see if it changes students perception about women in politics.

Plan for topic "Students completing HIST-171 will be able to How prepared are you to explain women's participation in politics from 1877 to 1977?": 2013/14

Perhaps I will use a biography that focuses more on politics (may be BORING...) to see if it changes students perception about women in politics.

Plan for topic "Students completing the course will be able to explain the progress made by African American, Asian American, Native American, Mexican American/Latino, and Lesbian women towards social, political, and economic equality through 1877.": 2013/14

Write a better SLO question that is more specific and quantifiable.

Plan for topic "Students completing HIST-171 will be able to Are you able to discuss how women's lives have changed in the U.S. from 1877 to 1977?": 2013/14

Write a better SLO question that is more specific and quantifiable.

Plan for topic "Students completing history 171 will be able to Explain the challenges of African American Women in U.S. History.": 2012/13

I think reading two novels is a great way to understand individuals' situations in history.

Plan for topic "Students completing history 171 will be able to Talk about women's political participation and goals in the U.S.": 2012/13

This semester I changed the student query to say "goals" instead of just political participation because women often had strong goals, yet were difficult to realize. I think this question more clearly assesses what students learned -- the process -- rather that just the outcome (political participation). I think the results are fine.

Plan for topic "Students completing history 171 will be able to Discuss how women's lives have changed in the U.S. from 1865 to today.": 2012/13

I think the results are fine. For the next round of SLOs I will change this question to be more specific. Our class covers the social, political and economic elements of history and I think the students who said "somewhat" are sophisticated enough to know that they cannot "know" everything. A student actually pointed this out to me after submitting the slo queries.

Plan for topic "Students completing the course will be able to After reading Anne Moody's biography and Nella Larsen's Passing how comfortable are you with explaining the challenges of African American women in U.S. history?": 2011/12
<table>
<thead>
<tr>
<th>Plan for topic</th>

DVC Instructional Course SLO Action Plans

790. World History to 1500 [HIST-180] belonging to Social Science [HIST]
Plan for topic "Students completing this course will be able to Distinguish the difference between primary and secondary sources, and demonstrate how each is used to make historical claims." : 2017/18

The four students who earned failing grades on the assignment did not take advantage of the prior week’s readings or comments made on their online posts. They were absent for the most part. However, emails sent throughout the course, files sent to the Canvas forums were intended to provide preparation beyond the classroom. The students in question did not participate in online discussions and the evidence suggests they did not read the online text either.

Possibly, the best line of action is for such students to take remedial courses prior to enrolling in history courses that require substantial essay writing. Each semester I provide more time at the onset of the course to explain how to get help, from the instructor, TA’s, tutors and class peers. As of now, 3-5 students usually fall through the cracks regardless.

In comparison, in a face to face class, such as History 181 in San Ramon, that SLO revealed that students who were able to do an in-class assignment and get immediate feedback by peers and immediate one on one attention with the instructor had 100% success. Obvious! but does call attention to the fact that online students need to be more academically prepared and in possession of fine time management skills to succeed.

Plan for topic "Students completing this course will be able to Distinguish the difference between primary and secondary sources, and demonstrate how each is used to make historical claims." : 2015/16

Group work is the best way for students who struggle with history to meet those who love history, and to see how sources are produced and interpreted. Weekly online posts required analysis of interesting sources, so students posted in their own time their thoughts on the historical past as it was recorded. I intend to continue shaping the course around this type of hands on work, along with lectures on other days.

Plan for topic "Students completing this course will be able to Describe global processes in world history up to 1500 CE/AD." : 2015/16

Those students who come to class and read posted essay tips generally get A's or B's and can explain the broad processes of World History. Those who miss class and don’t check Canvas normally do not write strong papers or post sophisticated understanding of the main events of history.
Plan for topic "Students completing this course will be able to Synthesize different perspectives on recent history, using primary and secondary source documents, to form a complex argument in essay form.": 2018/19

The students who earned failing grades on the assignment did not take advantage of the prior week’s readings or comments made on their online posts. They were absent for the most part. Emails sent throughout the course, files sent to the Canvas forums were intended to provide preparation beyond the classroom. The students in question did not participate in online discussions and the evidence suggests they did not read the online text either.

Possibly, the best line of action is for such students to take remedial courses prior to enrolling in history courses that require substantial essay writing. I spend many minutes, online and in class, explaining how to succeed in this course. Each semester I provide more time at the onset of the course to explain how to get help, from the instructor, TA’s, tutors and class peers. As of now, 3-5 students usually fall through the cracks regardless. Early counseling is likely the best solution.

Plan for topic "Students completing this course will be able to Synthesize different perspectives on recent history, using primary and secondary source documents, to form a complex argument in essay form.": 2015/16

Those students who came and worked on the papers prior to due dates nearly always did well. Those who skipped class did not.

I plan to be clearer in next years syllabus that those who skip class or online conversations are likely to fail the paper. Some students possibly feel they can skip class and submit any history paper. Attendance is key for context.
The student was successful, but this may have more to do with the type of student that commits to an independent study like this one.

I do think that the SLO I wrote for this independent study should have been more specific. Perhaps major conditions for success, like Chicago formatting and source balance, should have been included in the SLO.

Group Assessment:

Yes, more specific steps to help clarify and define student learning outcomes is a good idea. Perhaps add an additional mid-step for the student to check-in and report back to the instructor.

Also, consider adding a library tour / meeting to assist with primary and secondary source materials.
### DVC Instructional Course SLO Action Plans

#### 793. Student Instructional Assistant [HIST-299] belonging to Social Science [HIST]

**Plan for topic "By developing class presentations, student assistants will demonstrate and role model critical thinking skills."**: 2017/18

| Student's involvement was universally considered favorable by others. They learned the ropes in teaching and understood what it takes to lead a class. |

**Plan for topic "By developing class presentations, student assistants will demonstrate and role model critical thinking skills."**: 2016/17

| Volunteering to train student assistants has to be a labor of love. All of the effort that went into it turned out to be commensurate with the value that it provided to the student assistant and to my regular students who benefitted in a myriad of ways watching the student assistant at work. |

I would volunteer to do this again.
### Plan for topic "Students completing this course will be able to successfully propagate plants vegetatively": 2020/21

Those students who did not succeed used hormone dips that were too high. The instructions must be very clear about the negative effects of too much hormone on meristematic tissue.

### Plan for topic "Students completing this course will be able to identify biological competitors of higher plants": 2020/21

Face-to-Face classes begin again in August 2021, and we anticipate an increase in student success when learning is not online.

### Plan for topic "Students completing the course will be able to examine light as a factor of plant growth."**: 2016/17

Examples of light stressed plants had been brought into classes so that students could see the impacts of low light. Having direct experience with the plants is a much better teaching method than lecturing and reading. Continue bringing samples in of both stressed and healthy plants.

### Plan for topic "Students completing HORT-110 will be able to describe the impact of inadequate light on plant growth."**: 2016/17

Examples of light stressed plants had been brought into classes so that students could see the impacts of low light. Having direct experience with the plants is a much better teaching method than lecturing and reading. Continue bringing samples in of both stressed and healthy plants.

### Plan for topic "Students completing the course will be able to describe when the use of grafting is desirable."**: 2016/17

The pop-quiz was based on lecture and powerpoint presentations. Grafting cannot be done in the fall; it is a winter and spring activity. Students need to practice grafting with tools under close supervision. Describing it is not the best way to teach. This should be evaluated in the spring semester, not the fall.

### Plan for topic "Students completing HORT-110 will be able to describe three methods of grafting Malus species."**: 2016/17

The pop-quiz was based on lecture and powerpoint presentations. Grafting cannot be done in the fall; it is a winter and spring activity. Students need to practice grafting with tools under close supervision. Describing it is not the best way to teach. This should be evaluated in the spring semester, not the fall.

### Plan for topic "Students completing HORT-110 will be able to explain the function of Auxin in plant growth."**: 2016/17

The functions need to be emphasized more clearly, with better differentiation between naturally occurring and synthetic auxins. This test questions should follow the cuttings lab where students experiment with using Auxin solutions.

### Plan for topic "Students completing HORT-110 will be able to describe the impact of inadequate light on plant growth."**: 2014/15

This topic was covered in the first several weeks of the semester, and was tested in the third quiz. The topic needs to be re-addressed several times during the course of the semester. An experiment with lights on different timers will be set up for the class in the fall so that students can see and measure the results.

### Plan for topic "Students completing the course will be able to examine light as a factor of plant growth."**: 2014/15

This topic was covered in the first several weeks of the semester, and was tested in the third quiz. The topic needs to be re-addressed several times during the course of the semester. An experiment with lights on different timers will be set up for the class in the fall so that students can see and measure the results.

### Plan for topic "Students completing the course will be able to describe when the use of grafting is desirable."**: 2014/15
<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing HORT-110 will be able to describe three methods of grafting Malus species.&quot;</th>
<th>2014/15</th>
</tr>
</thead>
<tbody>
<tr>
<td>The grafting lab and lecture were taught in the first several weeks of spring class, and it appeared that by May the information had been lost. In the fall class, the grafting lecture and lab are taught close to the end of the semester, and the information appeared to be more accessible to students. The spring lab involved hands-on grafting experience, and although the students were able to successfully graft apple wood onto provided rootstocks, 30% could not describe what they had done by the end of the semester. We will be including more hands-on experience with grafting, coupled with quiz questions repeated at several times over the course of the semester.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing HORT-110 will be able to explain the function of Auxin in plant growth.&quot;</th>
<th>2014/15</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lecture material was followed by hand-on learning with auxin products in lab, where students successfully rooted woody shrubs in fall and spring. This technique appears to be successful both in the short and long term.</td>
<td></td>
</tr>
</tbody>
</table>

Vocabulary handouts that clarify special terms need to be created and handed out the week prior to the test.

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing HORT-110 will be able to explain the effects of growing plants from the same family in the same spot for repeated years.&quot;</th>
<th>2014/15</th>
</tr>
</thead>
<tbody>
<tr>
<td>The results were acceptable, but the question needs to be fleshed out in more detail. Students did not have to explain why a) chard was the correct answer.</td>
<td></td>
</tr>
</tbody>
</table>

Fall 2015: more time was spent in class explaining why planting same species is problematic, and retention improved.

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing the course will be able to apply the term ethnobotany.&quot;</th>
<th>2014/15</th>
</tr>
</thead>
<tbody>
<tr>
<td>Writing papers appears to be difficult for a large number of students. Shorter, one-two page papers need to be incorporated from the beginning of the semester: perhaps one a month. This is being written into the syllabus for spring 2016 for Hort 110</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing the course will be able to examine light as a factor of plant growth.&quot;</th>
<th>2012/13</th>
</tr>
</thead>
<tbody>
<tr>
<td>continue to teach light's effect on plants as it has been taught</td>
<td></td>
</tr>
<tr>
<td>Plan for topic</td>
<td>Outcome</td>
</tr>
<tr>
<td>----------------</td>
<td>---------</td>
</tr>
<tr>
<td>&quot;Students completing HORT-110 will be able to describe the impact of inadequate light on plant growth.&quot;</td>
<td>2012/13</td>
</tr>
<tr>
<td>continue to teach light's effect on plants as it has been taught</td>
<td></td>
</tr>
<tr>
<td>&quot;Students completing HORT-110 will be able to describe three methods of grafting Malus species.&quot;</td>
<td>2012/13</td>
</tr>
<tr>
<td>More teaching time will be spent on grafting</td>
<td></td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to describe when the use of grafting is desirable.&quot;</td>
<td>2012/13</td>
</tr>
<tr>
<td>More teaching time will be spent on grafting</td>
<td></td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to apply the term ethnobotany.&quot;</td>
<td>2012/13</td>
</tr>
<tr>
<td>new assessment topic should be tried.</td>
<td></td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to describe when the use of grafting is desirable.&quot;</td>
<td>2011/12</td>
</tr>
<tr>
<td>spend more time explaining topic</td>
<td></td>
</tr>
<tr>
<td>&quot;Students completing HORT-110 will be able to describe three methods of grafting Malus species.&quot;</td>
<td>2011/12</td>
</tr>
<tr>
<td>spend more time explaining topic</td>
<td></td>
</tr>
<tr>
<td>&quot;Students completing HORT-110 will be able to describe the impact of inadequate light on plant growth.&quot;</td>
<td>2010/11</td>
</tr>
<tr>
<td>Since students have done well on this outcome in two assessment cycles, the plan is to address a different outcome in the next cycle.</td>
<td></td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to examine light as a factor of plant growth.&quot;</td>
<td>2010/11</td>
</tr>
<tr>
<td>Since students have done well on this outcome in two assessment cycles, the plan is to address a different outcome in the next cycle.</td>
<td></td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to examine light as a factor of plant growth.&quot;</td>
<td>2009/10</td>
</tr>
<tr>
<td>The students met the criteria. Plan is to maintain current teaching and gather more data.</td>
<td></td>
</tr>
<tr>
<td>&quot;Students completing HORT-110 will be able to describe the impact of inadequate light on plant growth.&quot;</td>
<td>2009/10</td>
</tr>
<tr>
<td>The students met the criteria. Plan is to maintain current teaching and gather more data.</td>
<td></td>

</tbody>
</table>
## DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to describe the principles of winter and spring plant reproduction both sexually and asexually." 2019/20

<table>
<thead>
<tr>
<th>Through lecture and lab activities, students were consistently reminded as well as quizzed verbally as to which type of propagation we were employing weekly. This method appears to work and will be continued in consequent teachings of HORT 111.</th>
</tr>
</thead>
</table>

Plan for topic "Students completing this course will be able to describe the principles of winter and spring plant reproduction both sexually and asexually." 2016/17

<table>
<thead>
<tr>
<th>Through lecture and lab activities, student were consistently reminded as well as asked &quot;which type of reproduction is employed&quot; when utilizing the demonstrated plant propagation method introduced weekly. This method appears to work and will be continued in consequent teaching of Hort. 111.</th>
</tr>
</thead>
</table>
Plan for topic "Students completing this course will be able to explain the impact of abiotic factors such as temperature, water, humidity, and fertility as it pertains to summer and fall plant propagation.": 2020/21

This instructor is excited for these results as this is the first time this propagation environment project has ever been used. During the pandemic, the creation of a propagation environment was imperative for each student's ability to successfully complete this course. As this was the first fully face-to-face teaching of HORT 112, I wanted students to continue to feel empowered around this ability to propagate from home. As this project was due in week 5 of the semester, students have continued to send me updates around the successes and failures they've experienced with their propagation environments.

Plan for topic "Students completing this course will be able to explain the impact of abiotic factors such as temperature, water, humidity, and fertility as it pertains to summer and fall plant propagation.": 2017/18

Continue to outline these factors and their impact in lecture but also remind them throughout the semester with plant examples from the nursery.

Plan for topic "Students completing this course will be able to determine proper timing for various propagation and production techniques appropriate to the season, plant species and propagation method.": 2017/18

First make this assignment more heavily waited towards the final grade. Second remind them weekly to be logging into their calendar the seasonally appropriate propagation techniques we are practicing in lab class.
Plan for topic "Students completing this course will be able to identify from memory common plants in local landscapes of special interest in winter and spring using physical and growth characteristics.": 2019/20

The plants that gave students the most problems were to be expected as there were four plant species that look very similar, in the future I will spend much more time discussing the differences in these plants and showing identifying characteristics.

Plan for topic "Students completing this course will be able to identify from memory common plants in local landscapes of special interest in winter and spring using physical and growth characteristics.": 2017/18

The next time this class is offered, the plants that bloom earlier in the semester will be tested during the mid-term rather than the final so that blooms are available to assist with ID.
## DVC Instructional Course SLO Action Plans

### 798. Plant Materials and their Uses: Summer and Fall [HORT-114] belonging to Biological Science [HORT]

**Plan for topic "Students completing this course will be able to demonstrate an ability to use plant identification keys to identify unknown plant species."**: 2020/21

The first 4 weeks of the course the instructor spent at least half of the lab class discussing plant characteristics that were necessary for successful utilization of plant keys. Additionally, instructor walked students through keying at least one plant specimen per lab class in the first four weeks. This level of instruction seemed to work well, in future teachings of this course instructor will add more plant specimens for key identification every two weeks to increase difficulty with student mastery.

**Plan for topic "Select plants with summer and fall color that will perform well in specified regional environments."**: 2016/17

The list of plants needed to be covered in this class includes many plants better suited to southern California. More emphasis needs to be made on regional microclimates and the concurring limitations. Simply because a plant is covered in class does not mean it is appropriate for a given site.

**Plan for topic "Students completing this course will be able to use on-line plant selection programs."**: 2016/17

The use of the site was demonstrated in class, and students were encouraged to use their phones to access the site via apps. One student who is not technologically comfortable, required extensive tutoring, but was able to succeed.
Plan for topic "Students completing the course will be able to understand the processes of soil formation."

The concept that Relief is a major factor in soil formation appears to be the most difficult for students to grasp. Field trips to Mt. Diablo will make the impact that relief has on local soil very tangible. Resources available through the Soil Society will be incorporated into the next class when it is offered in the fall of 2020.

Plan for topic "Students completing the course will be able to develop and manage a fertilization regiment for various crops."

This question requires multiple levels of ecological and biome understanding and analysis. In 2020 when the class is offered again, I am going to assign this question as a group-work project.

Plan for topic "Students completing the course will be able to recommend soil amendments for clay and sandy soils in landscape situations."

Students understand soil amendments but struggled with the math needed to calculate the amount needed for various situations. Worksheets with specific plant/soil percentage amendment problems are being developed for the next time the class is scheduled to be offered in 2020.

Plan for topic "Students completing the course will be able to understand the processes of soil formation."

Explaining the four methods of soil formation has included videos showing the various processes. This seems to have clarified the process for students. The students who failed thought that the answer was 'additions', and became confused because although the organic material was being added to another layer, it was already in the soil matrix.

Plan for topic "Students completing the course will be able to develop and manage a fertilization regiment for various crops."

Students need examples need to be given in class, and as group projects. This question should be moved to the final exam, and students need to have practiced assessing fertilizer needs.

Plan for topic "Students completing the course will be able to recommend soil amendments for clay and sandy soils in landscape situations."

Field trips are difficult with evening classes. Guest speakers from the Native Plant Society may be able to provide a similar kind of experience allowing students to see the negative impact on native plants of amended soils.

Plan for topic "Students completing the course will be able to understand the processes of soil formation."

Continue using mnemonics in class to help students recall data.

Plan for topic "Students completing the course will be able to develop and manage a fertilization regiment for various crops."

Create sample problems calculating nitrogen needs for differing landscape plants. Set up in class group projects to work on these problems before assigning test questions.
### DVC Instructional Course SLO Action Plans

**Plan for topic "Students completing the course will be able to understand the processes of soil formation.": 2012/13**
- continue to teach and test on this topic as before

**Plan for topic "Students completing the course will be able to develop and manage a fertilization regiment for various crops.": 2012/13**
- will continue to teach topic as has been done

**Plan for topic "Students completing the course will be able to understand the processes of soil formation.": 2011/12**
- spend more time on subject in lecture and field trips
800. Soil Science and Management Laboratory [HORT-121] belonging to Biological Science [HORT]

**Plan for topic "Students completing this course will be able to analyze local soils for pH, NPK and texture."**: 2018/19

The students complained about testing soils for too many classes. However, they mastered the ability to run the chemical tests.

**Plan for topic "Students completing this course will be able to identify local parent rock sources"**: 2018/19

It was very helpful to have samples of the local parent material rocks. It would have been preferable to have field trips to the sites the rocks came from. The next time this class is offered, field trips should be scheduled.

**Plan for topic "Students completing this course will be able to describe local soils using soil taxonomy."**: 2018/19

In class quizzes that reinforce soil taxonomy are recommended for the next time that it is offered.
### 801. Integrated Pest Management [HORT-125] belonging to Biological Science [HORT]

#### Plan for topic "Students completing the course will be able to identify and recognize common plant pests, diseases and beneficial organisms."

Students need more experience looking at signs and symptoms of damaged plants out in the fields and gardens. In fall 2020, the next time this class is offered, classes will start in the garden, with students looking for plant damage, collecting samples and bringing them back to the classroom for diagnosis.

#### Plan for topic "Students completing the course will be able to understand the biology and ecology of plant pests."

This was a little frustrating, as I thought the topic had been covered in depth, multiple times. Students in the future (2020) are going to design complete Integrated Pest Management handouts on aphid id and control that will be shared and graded by the class.

#### Plan for topic "Students completing HORT-125 will be able to identify 6 horticultural pest insect species with piercing sucking mouth-parts."

The classroom presentations of insect mouthparts, the associated insects and samples of plant damage symptoms appears to be successful. This is an important skill for students to take away, and I will continue to emphasize.

#### Plan for topic "Students completing the course will be able to identify and recognize common plant pests, diseases and beneficial organisms."

This course is offered once every 2 years and will be assessed on it next offering.

#### Plan for topic "Students completing HORT-125 will be able to identify 6 horticultural pest insect species with piercing sucking mouth-parts."

I am now providing students with testing terminology pages to help them identify and correctly interpret the language used in tests, and doing over example questions in class.

#### Plan for topic "Students completing HORT-125 will be able to identify 10 seasonal, regional plant diseases."

The results indicate that additional time needs to be spent working with microscope identification of disease symptoms prior to testing.
### Plan for topic "Students completing the course will be able to identify major plant communities in California."

**2017/18**

What worked was repeated exposure and discussion of the plant communities visited during field trips.

I would not do anything differently. This is a successful class.

### Plan for topic "Students completing the course will be able to recognize the dominant and characteristic species in each habitat and which are appropriate for local landscape use."

**2017/18**

Some students had difficulty understanding the concept of appropriate use for native plants. More repetition of utilization of native plants in landscape settings may increase those numbers.

### Plan for topic "Students completing the course will be able to use dichotomous keying for correct species identification."

**2017/18**

More practice using the keys will be included in the class the next time it is offered.

**2012/13**

Changes will not be made as key species have not changed.

### Plan for topic "Students completing the course will be able to recognize the dominant and characteristic species in each habitat and which are appropriate for local landscape use."

**2012/13**

Additional time will be spent looking at plant characteristics that will aid student in use of dichotomous keys.
### DVC Instructional Course SLO Action Plans

#### 803. Topics in Horticulture [HORT-150] belonging to Biological Science [HORT]

**Plan for topic "Students completing this course will be able to define the differences between hydroponic and aquaponic systems.": 2018/19**

In future teachings of this class I will continue to define the differences throughout lecture and develop lab assignments that give students experiences with both growing techniques.

**Plan for topic "Students completing HORT-150 will be able to explain the origin of Permaculture.": 2015/16**

The origins of permaculture had been covered in a class presentation and with assigned reading. A group project, assigning groups to research the origins for assigned countries would have increased success and avoided the 'test' anxiety that prevented full success for those who are kinesthetic learners.

**Plan for topic "Students completing HORT-150 will be able to explain the origin of Permaculture.": 2013/14**

The history provided was successfully understood by students.
DVC Instructional Course SLO Action Plans

804. Controlled Environment Growing (CEG): Methods of Plant Production [HORT-151] belonging to Biological Science [HORT]
Plan for topic "Students completing this course will be able to explain and evaluate the nitrification process as it pertains to an aquaponic ecosystem.": 2020/21

As this material is presented repeatedly in the lecture portion of the class and is reinforced with lab activities such as water testing for the bacteria required for the nitrification process, I will continue my on-going demonstrating and experimenting with the nitrification process.
### 805. Plant Propagation [HORT-160] belonging to Biological Science [HORT]

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing the course will be able to predict plant propagation success.&quot;</th>
<th>2020/21</th>
</tr>
</thead>
<tbody>
<tr>
<td>This propagation calendar has been a constantly evolving assignment which the instructor uses for all propagation classes. With more instruction and explanation, students are more successful each semester at meeting the criteria of this project. I have really enjoyed watching the assignment change over the years and students' responses. My goal for this project has always been the same, student success with plant propagation in all seasons which is a result of understanding and applying the factors that lead to crop success.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing HORT-160 will be able to propagate hardwood cuttings from local deciduous shrubs.&quot;</th>
<th>2017/18</th>
</tr>
</thead>
<tbody>
<tr>
<td>It is difficult to discuss hardwood cuttings in the summer time as this is the wrong season to utilize this technique. Those taking HORT 111, have an advantage, as they are both reading and hearing lectures about hardwood cuttings as well as using this method of propagation. Those enrolled in HORT 160 are reading about and hearing lectures on, however don't get to do such cutting as the season is incorrect for this method. In consequent teachings of this class, I will set up a lab scenario to give practice of such a technique.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing the course will be able to apply their knowledge of propagation to the growing of plants.&quot;</th>
<th>2014/15</th>
</tr>
</thead>
<tbody>
<tr>
<td>In the future, more emphasis must be placed on the importance of fertilizer in the growing of plants as well as pinching in the encouragement of plant growth.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing HORT-160 will be able to propagate hardwood cuttings from local deciduous shrubs.&quot;</th>
<th>2013/14</th>
</tr>
</thead>
<tbody>
<tr>
<td>A more detailed explanation of climate variances and cutting success needs to be included in lecture topics.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing the course will be able to use plant terminology in the propagation of plants.&quot;</th>
<th>2010/11</th>
</tr>
</thead>
<tbody>
<tr>
<td>Plan is to administer test again and see if this is a continuing trend downward or not. We feel that the 10% drop may be due to the academic background of the class and may need to change strategies in the future.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing the course will be able to use plant terminology in the propagation of plants.&quot;</th>
<th>2009/10</th>
</tr>
</thead>
<tbody>
<tr>
<td>Plan is to maintain current curriculum and reassess the following year.</td>
<td></td>
</tr>
<tr>
<td>Plan for topic &quot;Students completing the course will be able to summarize the construction process for a greenhouse.&quot;: 2020/21</td>
<td></td>
</tr>
<tr>
<td>---</td>
<td></td>
</tr>
<tr>
<td>Hybrid models are very challenging for our students, who simply do not watch the presentations. What this has meant is that all information important for them to learn must be repeated during labs. In this next semester, my goal is to imbed questions in the weekly slide shows and reinforce with pop quizzes at the beginning of labs. This will support student growth and information fluency.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing the course will be able to explain Environmental factors affecting plant growth.&quot;:: 2020/21</th>
</tr>
</thead>
<tbody>
<tr>
<td>Writing is challenging for many of our students, however, this paper appeared to strike a chord and the response was excellent. Papers were generally well-written and the ability to collaborate meant that students who were not as comfortable writing were able to work with others with better skills. I will be doing something similar in the next classes.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing the course will be able to differentiate various medias and their effect on plant growth.&quot;:: 2017/18</th>
</tr>
</thead>
<tbody>
<tr>
<td>These classes were taught by different instructors, and the focus in lecture may have accounted for the slight difference. The media being used in the nursery has also changed. This class is being offered in the spring of 2019, and the students are going to be evaluating plant material planted in differing mixes over the course of the semester.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing the course will be able to explain Environmental factors affecting plant growth.&quot;:: 2014/15</th>
</tr>
</thead>
<tbody>
<tr>
<td>The majority of students were able to meet this directive. In the future will spend more time in lecture discussing the environmental factors that encourage the development of pests and disease as well as their negative impact on plant growth.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing the course will be able to summarize the construction process for a greenhouse.&quot;:: 2013/14</th>
</tr>
</thead>
<tbody>
<tr>
<td>A better understanding of the importance of greenhouses to year-round growing of plants needs to be emphasized in lecture. The students who did not do the assignment failed to understand the relevance.</td>
</tr>
</tbody>
</table>
Plan for topic "Students completing this course will be able to use the International code of botanical nomenclature": 2020/21
This is an excellent way to encourage the use of correct nomenclature for plants, which is frequently daunting as students have little background in Greek or Roman historical terminology. I will be using this again, but will also reinforce this with specific questions on the final. This process facilitated communication and collaboration, with students working together to find solutions.

Plan for topic "Students completing this course will be able to construct seed timing flow charts for winter/spring planting schedules": 2020/21
The relatively low number of successful students seems to indicate that creating these calendars, which takes the entire semester to do correctly may be a little ambitious from my end. In this next semester, I am making this a collaborative assignment, with students working in pairs to see if the numbers increase.
808. Woody Plants: Identification and Maintenance [HORT-170] belonging to Biological Science [HORT]

Plan for topic "understanding the morphology of woody plants, their internal and external characteristics."*: 2017/18

<table>
<thead>
<tr>
<th>Bringing in the plant with edible parts might drive the point home better</th>
</tr>
</thead>
</table>

Plan for topic "identify plant species through distinguishing aspects, through a plant key, through color, taste, smell and texture. Students completing this course will be able to": 2017/18

<table>
<thead>
<tr>
<th>An okay percentage, it may have been more effective to present all the shrubs and trees with red berries at one time.</th>
</tr>
</thead>
</table>

Plan for topic "be able to identify a genus and species through observation of a single plant part â€“ leaf, flower, cone, fruit, seed, stem, bark, etc."

<table>
<thead>
<tr>
<th>Students completing this course will be able to&quot;: 2017/18</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>satisfactory results. I think that this was effective due to tours of the campus, a very common tree. Liquidambar leaf and fruit were both highlighted as means for identification</th>
</tr>
</thead>
</table>
### DVC Instructional Course SLO Action Plans

**809. Pruning Laboratory [HORT-171] belonging to Biological Science [HORT]**

**Plan for topic "Estimate reaction to pruning procedures": 2017/18**

<table>
<thead>
<tr>
<th>Responses where much lower for plants students did not have direct, hands-on experience pruning. This class was offered in the fall, which includes summer pruning, but does not include winter pruning as temperatures remained too warm for plants to go fully into dormancy.</th>
</tr>
</thead>
<tbody>
<tr>
<td>This course would be best offered in the inter-session, when plants are fully dormant, or as a short course in the summer where summer pruning could be taught.</td>
</tr>
</tbody>
</table>
810. Arboriculture [HORT-179] belonging to Biological Science [HORT]

Plan for topic "The student completing the course will be able to identify the habits, uses, limitations and maintenance required of various tree species.": 2017/18

- What workement worked best was the broad variety of tree species for students to choose from.
- Some students were unable to complete the assignment due to a variety of factors including language difficulties, time management issues and family concerns.

Plan for topic "The student completing the course will be able to identify and mitigate problems associated with trees used in urban, rural or wild-land situations.": 2017/18

- What worked best was the visual availability of the tree locally. It was possible to see the tree and identify the complications.
- The greatest difficulty was in accurately identifying fungal diseases. More time on fungal symptomology will happen in the next class.

Plan for topic "The student completing the course will be able to identify and use the various tools, both mechanical and diagnostic, required in arboriculture.": 2017/18

- Peer groups working together facilitated group learning and peer review. With advances, new equipment is needed to be able to teach current technology.

Plan for topic "The student completing the course will be able to identify and mitigate problems associated with trees used in urban, rural or wild-land situations.": 2013/14

- Future Plans include the utilization of Tree Analysis Equipment, (Resistograph, Arbor-Tom and increment borer), for additional data collection that will clarify results of the hazard rating process and subsequent recommendations.

Plan for topic "The student completing the course will be able to identify and use the various tools, both mechanical and diagnostic, required in arboriculture.": 2010/11

- 2010-12-14: Each subsequent semester of students, benefits from the previous databases of tree decay and failure analysis. The plan is to continue the compilation.
- 2011-05-18: Plan is modify the demonstration and emphasize proper tool use so that more students will succeed. This is a vital part of arboriculture.
### Plan for topic "Students completing the course will be able to demonstrate the knowledge of the history and development of the Landscape Architecture and Design field." 2018/19

Results from the next class will be compared with the class offered several years ago, and an action plan will be submitted.

### Plan for topic "Students completing the course will be able to demonstrate the knowledge of the history and development of the Landscape Architecture and Design field." 2014/15

Keep the poster assignment, keep the previous quiz history questions but add new ones. Add an essay assignment for comparing and contrasting how projects were designed in the past to how they are designed in the present.

### Plan for topic "Students completing the course will be able to analyze various Landscape Architecture principles." 2014/15

More small assignments in class and more article reading assignments that are current to what is going on at the present.

All students were challenged but the feedback received indicated they all had a much better understanding of the profession. The older students were more focused.

### Plan for topic "Students completing the course will be able to compare and contrast different approaches to landscape architecture and design." 2014/15

Incorporate more drawing/drafting exercises and small assignments in class to solidify ideas. The final project should be smaller in area—students were overwhelmed at times. Directions were very complete but should be broken down into parts for a better understanding.

### Plan for topic "Students completing the course will be able to analyze various Landscape Architecture principles." 2013/14

No change perhaps a new set of questions should be applied

### Plan for topic "Students completing the course will be able to compare and contrast different approaches to landscape architecture and design." 2013/14

Use a new set of questions

### Plan for topic "Students completing the course will be able to demonstrate the knowledge of the history and development of the Landscape Architecture and Design field." 2011/12

Assess outcome #2 next time
DVC Instructional Course SLO Action Plans

812. Landscape Design I: Graphics [HORT-181] belonging to Biological Science [HORT]
Plan for topic "Students completing the course will be able to demonstrate the correct, efficient use of the graphic tools used in landscape design and gain proficiency through application.": 2017/18

As a plan of action the department will encourage the instructors to use the library resources, including handouts or presentations/workshops put on by librarians, guest lecturers, to augment the lecture they give on this particular topic. Resources, such as assignments, activities and photographs, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing the course will be able to describe the elements of landscape graphics including freehand drawing, paraline drawing and computer generated drawing.": 2015/16

This course will be offered Fall 2016 one section and one outcome will be assessed.

Plan for topic "Students completing the course will be able to demonstrate the correct, efficient use of the graphic tools used in landscape design and gain proficiency through application.": 2011/12

Spend more time on drafting basics
As a plan of action the department will encourage the instructors to use the library resources, including handouts or presentations/workshops put on by librarians, guest lecturers, to augment the lecture they give on this particular topic. Resources, such as assignments, activities and photographs, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

The history section for my class is based on the California state Board of Landscape Architect's licensing exam. No changes will be made.

No changes will be made to this section as the information given to the students is adapted from state, county and local entities.

2013-12-20: No changes will be made as the criteria for passing this assessment is based on professional and state mandated standards.
814. Garden Design [HORT-183] belonging to Biological Science [HORT]

Plan for topic "Students completing the course will be able to perform a site analysis.": 2020/21

The results are encouraging and worth repeating. Many students expressed how much they had learned and how they now viewed landscapes differently. This is a small unit course, but the skills achieved are transferable to many divergent areas. It is worth the time it takes for students to present accurate site analysis.

Plan for topic "Students completing the course will be able to prepare residential landscape garden design plans.": 2020/21

I struggle to deal with students who cannot present in front of others, as that is a basic skill needed in most jobs. I continue to search for effective methods to decrease student anxiety but will continue to expect presentations. The skill level shown varied widely, from those who sketched out simple pencil plans to others with CAD presentations. The next time this is offered, I want students to have monthly presentations of work in progress to the class.

Plan for topic "Students completing the course will be able to prepare residential landscape garden design plans.": 2017/18

In comparison with the prior instructor's evaluation, the class offered in the summer did extremely well. The students worked in groups and were able to focus in depth on a variety of garden design concepts.

Plan for topic "Students completing the course will be able to perform a site analysis.": 2015/16

The instructor and students thought that it was difficult to cover the design process and develop plans during a 9 week short course.

To cover the material in the Residential Landscape Architecture book, the material needed to be presented at a very fast pace which resulted in 6 students dropping. All the students that continued with the class worked hard on the assignments, learned a lot and were very engaged.

In short, I believe that the class ought to be a full semester and more units.

Plan for topic "Students completing the course will be able to prepare residential landscape garden design plans.": 2015/16

The instructor and students thought that it was difficult to cover the design process and develop plans during a 9 week short course.

To cover the material in the Residential Landscape Architecture book, the material needed to be presented at a very fast pace which resulted in 6 students dropping. Also, it was difficult for many in the class to draft if they had no experience in doing so. This created an additional challenge for many of the students.

Plan for topic "Students completing the course will be able to read and interpret landscape construction documents.": 2015/16

The short class format was not enough time for the students to develop or fully understand all the drawings needed for construction documents.
I would hope that more students would have drafting experience and that the class would be long enough to have a lab component. ie: 3 hour class instead of a 1 hour and 50 min. class. Most of the time, the students would stay after class to ask questions.

The 15 students that remained at the end of the semester, were very engaged and seem to learn.
### Plan for topic "Students completing the course will be able to describe historical and cultural significance of a site analysis.": 2018/19

One highly successful technique has been allowing students to partner to make the site analysis group projects. The groups produced very detailed, comprehensive data presented in portfolios that can be presented to future employers. Their competition between groups resulted in detailed discussions and debates, and in clean, professional work.

### Plan for topic "Students completing the course will be able to create conceptual landscape design documents.": 2018/19

The seventh site chosen was not accessible, and students had difficulty pulling the information together. That site will not be included the next time the class is offered.

### Plan for topic "Students completing the course will be able to evaluate a site's natural and built resources and constraints.": 2015/16

20% of the students seemed unable to understand what was required in spite of repeated explanations.

Perhaps providing concrete examples of completed, printed out site analysis examples would have helped these students understand what was expected of them.

### Plan for topic "Students completing the course will be able to describe historical and cultural significance of a site analysis.": 2013/14

no change until class offered again. This was the first semester this class was taught
Plan for topic "Students completing the course will be able to perform a water audit."

The first class had a high percentage of students who were still living at home where they could easily find access to the information needed to complete the audit. The second cohort had more apartment dwellers, who had difficulty finding homes to audit. When this class is offered again, homeowners who are willing to let students perform the water audits should be located by the instructor prior to the semester. The audit is complicated, with many questions to be answered, and homeowner input is needed for accurate information.

Plan for topic "Students completing HORT-187 will be able to describe the water holding capacity of different soil textures and the impacts on irrigation scheduling."

This was a challenging project for many students, but well worth doing. The systems were not identical, and difficulty varied widely. An audit of the unit might be more consistent in terms of results.

Plan for topic "Students completing the course will be able to develop an efficient irrigation system."

The WUCOLS guide needs to be explained in depth, as it gives the water use of specific plant varieties. It was introduced, but not covered as thoroughly as needed.

Plan for topic "Students completing the course will be able to perform a water audit."

Class time needs to be spent reviewing the form and providing opportunities for those for whom English is not their first language to clarify what is being asked.
817. Internship in Occupational Work Experience Education in HORT [HORT-296] belonging to Biological Science [HORT]

Plan for topic "Students completing this course will be able to identify and improve selected professional work habits and employability skills such as time management, communication, and teamwork.": 2018/19

WRKX department has built out a great team of supportive faculty members. In addition, we have redefined our SLOs (for more effective analysis) and have created an assessment tool which will be integrated into Canvas (once the updated SLOs are approved) and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.

Plan for topic "Students completing this course will be able to explore and develop strategies to secure employment.": 2018/19

WRKX department has built out a great team of supportive faculty members. In addition, we have redefined our SLOs (for more effective analysis) and have created an assessment tool which will be integrated into Canvas (once the updated SLOs are approved) and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.

Plan for topic "Students completing this course will be able to link academic coursework to work-based learning.": 2018/19

WRKX department has built out a great team of supportive faculty members. In addition, we have redefined our SLOs (for more effective analysis) and have created an assessment tool which will be integrated into Canvas (once the updated SLOs are approved) and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.
Both students contributed significantly to the unit and to the program. When new students want to take an independent study, it will help if faculty assist them in writing up goals that are achievable over the course of 16 weeks.

We will continue to monitor and evaluate students who sign up for Hort 298.
We were very fortunate that these students had strong work ethics and needed little supervision. Both expanded their knowledge and skill level.

Plan for topic "Students completing this course will be able to identify measurable objectives achieved over the course of the semester.": 2018/19

The students who have assisted in class have been responsible, reliable and have added great value to the learning experience for students in the classes they assisted with.

Plan for topic "Students completing this course will be able to demonstrate inclusive teaching skills": 2018/19

We are very fortunate that these students were responsible, articulate and very open to student and faculty feedback.
DVC Instructional Course SLO Action Plans

820. Introduction to Health Care Careers [HSCI-100] belonging to Health Science [HSCI]
Plan for topic "Students completing this course will be able to identify and describe the personal and professional skills necessary for health care workers.

": 2017/18

This takes too much class time, though the assignment is useful for networking and presentation practice, this may be better with submission of a paper and presentation of only 1 interview.
Plan for topic "Students completing the course will be able to interpret and evaluate health and medical information from general and subject specific library and web sources.": 2016/17

The subject of misinformation/"fake" news is extremely relevant at the time of this cycle. Students are able to find information very easily, but still struggle with knowing how to evaluate information as credible. An emphasis will be made on creating on new assignments that go even further to help students learn how to navigate the world of information.

Plan for topic "Students completing the course will be able to identify and locate health and medical information using a variety of tools and formats used in medical research.": 2016/17

The subject of misinformation/"fake" news is extremely relevant right now. We will continue to emphasize this and work on new assignments that go even further to help students learn how to navigate the world of information. Students were very successful in achieving this objective, in part because of the ease of the Health and Medical Complete (ProQuest) database available through the DVC Library’s website. We will continue designing new and current assignments which require students to compare and contrast news sources and sources of health information.

Plan for topic "Students completing the course will be able to distinguish between personal health and public health perspectives.": 2016/17

The instructor felt that this exam question fell short of accurately reflecting students’ difficulty in grasping the differences between public vs. personal health as observed in class discussions throughout the semester. We will continue to develop more assignments and activities to further help students understand this concept. In our American society, there is so much emphasis on individual responsibility, that students often have a hard time distinguishing how public policy and societal influences are as important, if not more important, in influencing someone’s health.

Plan for topic "Students completing the course will be able to describe the role of stress and mental health in health and wellness.": 2016/17

Using an objective, multiple choice test question, we came close to our goal for this objective, however the instructor felt that an assignment, in addition to the test question, would more effectively measure if students were truly understanding the role of stress in disease prevention. We will work on designing an assignment to contribute to a more complete assessment of this topic.

Plan for topic "Students completing the course will be able to interpret and evaluate health and medical information from general and subject specific library and web sources.": 2013/14

We again reached our goals that "75% or more of the students would find the project very useful"- and that 70% of students would earn a "C"- or better on their project. Next time this outcome is assessed, our goal will be that 70% of students will earn a "B" or better.

Plan for topic "Students completing the course will be able to distinguish between personal health and public health perspectives.":
DVC Instructional Course SLO Action Plans

2013/14

The assessment question needs to be reworded/ refined to more accurately measure the level of Bloom's taxonomy that the SLO uses. ("identify and describe";* not just "identify"*).

Plan for topic "Students completing the course will be able to describe the role of stress and mental health in health and wellness."

2013/14

The assessment question that was used from the DVC WebSLOs database needs to be reworded/ refined in order to address the level of Bloom's taxonomy that the SLO uses (Students need to be able to "describe"* as well as "identify."*) We will refine the assessment question so it is more accurate and at a higher level of Bloom's taxonomy.

Plan for topic "Students completing the course will be able to interpret and evaluate health and medical information from general and subject specific library and web sources." 2012/13

move to assess outcome #2

Plan for topic "Students completing the course will be able to interpret and evaluate health and medical information from general and subject specific library and web sources." 2012/13

Plan for topic "Students completing the course will be able to identify and locate health and medical information using a variety of tools and formats used in medical research." 2011/12

2012-01-04: ACTION PLAN: A clearer rubric for the research project will be designed for students, showing specifically which references are required and the point value for documenting those references.

2012-09-21: The goal of 75% or more of students would find the project VERY useful was achieved.

Plan for topic "Students completing the course will be able to identify and locate health and medical information using a variety of tools and formats used in medical research." 2011/11

97% of the students agreed and strongly agreed to achieving the student learning outcome, which shows a success in surpassing the target goal of 95%. If this student learning outcome is assessed again in the future, the goal would be for 100% of the students to achieve the outcome. Since it appears by the results that the outcome was successfully achieved, a new student learning outcome will be assessed in the future, with the goal of achieving the same successful results.

Plan for topic "Students completing the course will be able to identify issues in the delivery of health care and methods of health insurance." 2010/11

we will remove this outcome

Plan for topic "Students completing the course will be able to identify and locate health and medical information using a variety of tools and formats used in medical research." 2009/10

we consolidated this outcome into number 1
### 822. Stress Management and Health [HSCI-126] belonging to Health Science [HSCI]

### DVC Instructional Course SLO Action Plans

**823. Drugs, Health and Society [HSCI-127] belonging to Health Science [HSCI]**

**Plan for topic "Students completing the course will be able to demonstrate an understanding of drug abuse problems in our society."**: 2018/19

Within the f2f format students had a day in class to annotate and work together to critically read their articles. The hybrid and online students do not have a "work group" day. Within Canvas, it may be an idea to group students and have them share their articles and discuss online before writing the paper.

**Plan for topic "Students completing this course will be able to analyze both sides of controversial issues relating to drug use and abuse in our society":** 2015/16

Since class presentations do allow for class sharing, we decided to keep this component even though it did not increase the final grade.

**Plan for topic "Students completing the course will be able to distinguish between drug use and drug abuse."**: 2012/13

Assess outcome #2 next cycle

**Plan for topic "Students completing hsci 127 will be able to In an essay on the final about drug abuse prevention solutions. Twenty one students (out of 30)answered thoroughly with understanding, 7 answered adequately, and 3 didn't answer at all":** 2012/13

keep as is
### 824. Medical Terminology [HSCI-128] belonging to Health Science [HSCI]

#### Plan for topic "Students completing the course will be able to demonstrate an understanding of common pharmacology terms."

This class is required for students studying a health care field. They are motivated and many have had some medical experience. We offer many different learning assignments, practice tests and worksheets. The more they complete, the better they perform. Despite the extra work, the ESL student does find this class a challenge. Better tools for ESL and medical terminology would be helpful to explore with the publisher.

#### Plan for topic "Students completing the course will be able to correctly spell and pronounce medical terms."

The challenge is how to accommodate the variations in word vocalization of ESL students. We currently require PROPER English pronunciation and request they contact their ESL teacher for further guidance on pronunciation. These students typically drop the course the first time. Rentake after ESL work. We may need to link some tutorials on vocalization strategies for ESL for these students to try to retain them.

#### Plan for topic "Students completing the course will be able to correctly spell and pronounce medical terms."

The challenge is with ESL students who can not properly vocalize terms. These students have had to drop out. We have referred the, back to their ESL teachers to assist with vocalization strategies. We will be adding some online tutorials now for students to practice with that may allow them to maintain success.

#### Plan for topic "Students completing the course will be able to demonstrate an understanding of common medical abbreviations."

The action plan that will be implemented to improve the success of students enrolled in the medical terminology course will be that all students will be required to prepare ten "phantom" patient chart histories using at least five medical abbreviations per patient chart entry.
825. Introduction to Public Health [HSCI-130] belonging to Health Science [HSCI]
Plan for topic "Students completing the course will be able to define important foundation concepts in community/public health."

For the next semester, we will distribute the rubric to all students to use when studying and designing their powerpoint presentation
## 826. Cardiopulmonary Resuscitation (CPR) [HSCI-131] belonging to Health Science [HSCI]

### Plan for topic "Students completing the course will be able to effectively perform CPR to someone whose heart has stopped beating."

**2017/18**

We are trying to adopt a new standard of certification of American Heart Association, this may require further training by instructor. This will change the practical test to include more skills but will meet the needs for more health professions.

### Plan for topic "Students completing the course will be able to give first aid for choking and other respiratory emergencies."

**2014/15**

The class requires outside testing and observation done outside of class which takes extra time for instructor. We will be embedding the activities in assessing competency within the class time to be more efficient at testing all students.

**2010/11**

- **2010-12-13:** To increase the student success rate to higher than 80% the instructor may provide more time for the students to practice CPR and AED on adult, child and infant mannequins, and allow more time to review the information taught during the course. Each semester a new student learning outcome will be assessed.

- **2011-08-10:** 100% of the students agreed and strongly agreed to achieving the student learning outcome, which shows a success in surpassing the target goal of 95%. If this student learning outcome is assessed again in the future, the goal would be to maintain 100% of the students to achieve the outcome. Since it appears by the results that the outcome was successfully achieved, a new student learning outcome will be assessed in the future, with the goal of achieving the same successful results.
# DVC Instructional Course SLO Action Plans

### Plan for topic "Students completing this course will be able to describe disparities in health outcomes.": 2018/19

Most of the students were able to clearly bridge the connections between disparities in socioeconomic status to health outcomes. Most of the students utilized their personal experiences, and were able to analyze the question, and critically think about these connections related to health outcomes. Many of the students exceeded expectations implementing their personal perspectives to fit into their discussions. Room for improvement from the students is strengthening the integrating of external sources. This may be supplemented by stronger resources and guides provided by the instructor on in-text citation.

### Plan for topic "Students completing this course will be able to analyze the contribution of environmental conditions to disparate health outcomes, using case studies.": 2018/19

All students who submitted the assignment were successful in engaging in critical thinking, and analysis of the topic of discussion. While there may not be room for improvement on this particular topic, I feel there are some helpful aspects to the actual assignment prompt that I could use for other discussions. Some of these aspects includes the framing of the objective for the assignment. Promoting a personal framework when discussing environmental justice was helpful in engaging students on a more successful level.

### Plan for topic "Students completing this course will be able to outline advocacy skills, such as preparing a policy brief, giving public testimony, community outreach, and/or writing a letter to an editor or politician": 2018/19

All of the students who participated in the presentation were invested. Many of the students were passionate about their topics, and provided a valuable insight into the topic from a personal, and academic perspective. Students were able to develop a variety of presentation tools, such as Powerpoint, Google Slides, Prezi, among others. Students were most successful in presenting their health and social justice cause, and promoted community engagement from their audience in the form of an action for change. Future presentations may benefit from more precision when detailing out the topic to avoid exceeding expectations in time..

### Plan for topic "Students completing this course will be able to describe the way race, socioeconomic status, and gender are described in recent public health literature": 2017/18

While many of the students met the criteria for success by receiving a C or higher, there is still more improvement on students receiving a B or higher. Increase the time spent in class on integration of external sources other than the course material. Providing time in class for students, and requesting them to bring rough drafts of written assignment to provide earlier feedback. The goal will be to increase the amount of students who receives a grade of B or higher on this written assignment.

### Plan for topic "Students completing this course will be able to contrast United States policy on access to health insurance with that of other developed countries, and analyze new health care policies under the Affordable Care Act." 2017/18

Most of the students were able to clearly answer all of the questions in the assignment prompt. Most students were engaged in the conversations, and provided some great discussions with each other. Some students still need to focus more on integration of external sources to support their discussion. Developing more resources and guidelines will improve the number of students achieving this objective. Providing more time in class to cover forum discussion guidelines will be helpful in increasing the number of students fully engaging in the forum discussion on health and healthcare.
Plan for topic "Students completing this course will be able to describe strategies or tactics to improve health inequalities, such as advocacy, community organizing, and/or policy change": 2017/18

| All students who completed the assignment met the criteria for success on both parts of the project. Students were engaged and passionate about the organization they researched, and the social justice cause they focused on. However, some group dynamics were not as successful as others. Some students felt stressed about group work, and had difficulty at times with consistent communication with team members. More feedback and communication with groups throughout the semester is necessary to help strengthen group cohesion. Part of promoting community engagement/organizing is about team work, and to be emphasized with more activities in class. |
DVC Instructional Course SLO Action Plans

828. Cultural Competence in Health and Social Service [HSCI-137] belonging to Health Science [HSCI]
829. Human Sexuality [HSCI-140] belonging to Health Science [HSCI]

Plan for topic "Students completing the course will be able to identify the male and female reproductive and sexual anatomy, and describe each parts functions, including the human sexual response cycle.":: 2016/17

I will achieve it by first introducing the topic with an ice-breaker activity first, and then allow students more time to work in groups to assist each other with the assignment (i.e., labeling the diagrams and describing functions), and then will come back as a class to go over. I will check notes at the end of class to ensure that they participated. This will hopefully correct any errors and increase success on final score.

Plan for topic "Students completing the course will be able to analyze and present arguments based on credible (scientific) resources on both sides of a selected controversial issue, such as abortion, homosexual rights, pornography, prostitution, fetal tissue research, surrogate motherhood, etc.":: 2013/14

More class exercises to practice using facts to write viewpoints will be used next semester.

Plan for topic "Students completing the course will be able to identify the male and female reproductive and sexual anatomy, and describe each parts functions, including the human sexual response cycle.":: 2010/11

97% of the students agreed and strongly agreed to achieving the student learning outcome, which shows a success in surpassing the target goal of 95%. If this student learning outcome is assessed again in the future, the goal would be for 100% of the students to achieve the outcome. Since it appears by the results that the outcome was successfully achieved, a new student learning outcome will be assessed in the future, with the goal of achieving the same successful results.

Plan for topic "Students completing the course will be able to locate, interpret and critically evaluate human sexuality research and findings in terms of scientific validity and cultural or demographic bias.":: 2009/10

Based on the final results of this student learning outcome the lectures, assignment and activities may be altered to improve student success in regards to locating, interpreting and critically analyzing human sexuality research.

Plan for topic "Students completing the course will be able to analyze and present arguments based on credible (scientific) resources on both sides of a selected controversial issue, such as abortion, homosexual rights, pornography, prostitution, fetal tissue research, surrogate motherhood, etc.":: 2009/10

Based on the final results of this student learning outcome the lectures and presentation-based assignment may be altered to improve student success in regards to analyzing sexual health information and preparing credible arguments that support each side of a controversial issue.

Plan for topic "Students completing the course will be able to identify the male and female reproductive and sexual anatomy, and describe each parts functions, including the human sexual response cycle.":: 2009/10

Based on the final results of this student learning outcome the lectures, assignments and activities may be altered to improve student success in regards to identifying the male and female reproductive and sexual anatomy, and describing each parts functions, including the human sexual response cycle.
830. Topics in Health Sciences [HSCI-150] belonging to Health Science [HSCI]

Plan for topic "Students completing this course will be able to clearly identify the multiple disciplines of several non-western medicine.": 2018/19

Students were able to utilize multiple resources to develop their arguments for the assignment. The resources were well integrated into their arguments, and provided a solid framework for a discussion on TCM. Most of the students' perspectives were well supported by individually researched evidence. Not all students were able to provide the same level of extensive individual research. Students may be able to benefit from further discussions on individual research practices and strategies in prior weeks.

Plan for topic "The student will be able to explain how the “mind” and the “body” became two separate entities in Western thought." : 2015/16

As indicated in our previous assessment cycle, we continued to evaluate this topic. This semester, however, even though students were able to complete the assignment with satisfactory scores, we felt that the assignment was not really capturing whether students were fully understanding the intended concept and achieving the learning objective. We will add a SYNTHESIS question to the assignment to better assess if students are able to synthesize and apply the information. We will also refine the rubric for this assignment.

Plan for topic "Students completing the course will be able to successfully explain how the "mind" and "body" became separate in Western thought": 2015/16

As indicated in our previous assessment cycle, we continued to evaluate this topic. This semester, however, even though students were able to complete the assignment with satisfactory scores, we felt that the assignment was not really capturing whether students were fully understanding the intended concept and achieving the learning objective. We will add a SYNTHESIS question to the assignment to better assess if students are able to synthesize and apply the information. We will also refine the rubric for this assignment.

Plan for topic "Students completing the course will be able to demonstrate the ability to access and utilize academic resources, including scientific journals, in the field of integrative medicine/ alternative medicine." : 2015/16

We will continue to use the assignment and the refined rubric that we developed for this cycle. It was successful for 3 out of the 4 categories and eliminated many of the problems with non-credible resources that we had had in the previous cycle. However, some students continue to have trouble evaluating and locating credible websites. We will clarify instructions in the assignment to help students distinguish between the credible and non-credible websites and clarify why it is important for scholarly research to utilize the more credible domains, and give students suggested "clearinghouses" that will provide vetted websites for them.

Plan for topic "Students completing the course will be able to successfully explain how the "mind" and "body" became separate in Western thought": 2012/13

continue to assess outcome #2

Plan for topic "The student will be able to explain how the “mind” and the “body” became two separate entities in Western thought.":
DVC Instructional Course SLO Action Plans

2012/13

continue to assess outcome #2

Plan for topic "Students completing the course will be able to demonstrate the ability to access and utilize academic resources, including scientific journals, in the field of integrative medicine/alternative medicine.": 2012/13

The rubric will be further clarified to specify using ProQuest database (via the DVC library) and limiting websites to .org, .edu, .gov

Plan for topic "Students completing the course will be able to successfully explain how the "mind" and "body" became separate in Western thought": 2011/12

Students will be surveyed closer to the time of the assignment.

Plan for topic "The student will be able to explain how the “mind” and the “body” became two separate entities in Western thought.": 2011/12

Students will be surveyed closer to the time of the assignment.

Plan for topic "Students completing the course will be able to demonstrate the ability to access and utilize academic resources, including scientific journals, in the field of integrative medicine/alternative medicine.": 2011/12

A clearer rubric for the research project will be designed for students in the online sections of HSCI 124, showing specifically which references are required and the point value for documenting those references.

Plan for topic "The student will be able to explain how the “mind” and the “body” became two separate entities in Western thought.": 2010/11

When this student learning outcome (#1) is assessed again the instructor may have the students turn in rough drafts of the assignments periodically before the final draft is due, so student progress can be monitored, which may increase the percentage of students who complete the assignment with a 70% (C grade) or above to 100%. Each semester a new student learning outcome will be assessed.

Plan for topic "Students completing the course will be able to successfully explain how the "mind" and "body" became separate in Western thought": 2010/11

When this student learning outcome (#1) is assessed again the instructor may have the students turn in rough drafts of the assignments periodically before the final draft is due, so student progress can be monitored, which may increase the percentage of students who complete the assignment with a 70% (C grade) or above to 100%. Each semester a new student learning outcome will be assessed.
DVC Instructional Course SLO Action Plans

832. Women's Health [HSCI-170] belonging to Health Science [HSCI]
Plan for topic "Students completing the course will be able to explore contemporary health issues concerning gender roles, gender stereotypes, and the role of women in the family and society."; 2016/17

It is interesting to note that having online access to open ended quizzes and journal submissions contributes to more student success. As CANVAS transition takes I will load journal entries and quizzes to be taken at home.

Plan for topic "Students completing the course will be able to identify the female reproductive and sexual anatomy, and describe each parts functions."; 2013/14

In next assessment cycle assess SLO 2

Plan for topic "Students completing the course will be able to demonstrate the knowledge of the female body, particularly reproductive anatomy and physiology including contraception, breast cancer, sexually transmitted diseases and reproductive choices for lesbian, transgender and heterosexual women."; 2013/14

In next assessment cycle assess SLO 2

Plan for topic "Students completing the course will be able to locate, interpret and critically evaluate women's health research and findings in terms of scientific validity and cultural or demographic bias."; 2011/12

Instructors will continue to refine the rubric for evaluating the research project, to better enable students to locate, interpret and evaluate sources in terms of their SCIENTIFIC VALIDITY and CULTURAL OR DEMOGRAPHIC BIAS.

Plan for topic "Students completing the course will be able to locate, interpret and critically evaluate women's health research for scientific validity, and cultural or demographic bias."; 2011/12

Instructors will continue to refine the rubric for evaluating the research project, to better enable students to locate, interpret and evaluate sources in terms of their SCIENTIFICVALIDITY and CULTURAL OR DEMOGRAPHIC BIAS.

Plan for topic "Students completing the course will be able to identify the female reproductive and sexual anatomy, and describe each parts functions."; 2010/11

99% of the students agreed and strongly agreed to achieving the student learning outcome, which shows a success in surpassing the target goal of 95%. If this student learning outcome is assessed again in the future, the goal would be for 100% of the students to achieve the outcome. Since it appears by the results that the outcome was successfully achieved, a new student learning outcome will be assessed in the future, with the goal of achieving the same successful results.

Plan for topic "Students completing the course will be able to describe how the physical, emotional, social, intellectual and environmental aspects of health impact women in society."; 2010/11

99% of the students agreed and strongly agreed to achieving the student learning outcome, which shows a success in surpassing the target goal of 95%. If this student learning
outcome is assessed again in the future, the goal would be for 100% of the students to achieve the outcome. Since it appears by the results that the outcome was successfully achieved, a new student learning outcome will be assessed in the future, with the goal of achieving the same successful results.

Plan for topic "Students completing the course will be able to identify the female reproductive and sexual anatomy, and describe each parts functions.": 2009/10

Based on the final results of this student learning outcome the lectures, assignments and activities may be altered to improve student success in regards to identifying female reproductive and sexual anatomy, and describing each part's functions.

Plan for topic "Students completing the course will be able to demonstrate the knowledge of the female body, particularly reproductive anatomy and physiology including contraception, breast cancer, sexually transmitted diseases and reproductive choices for lesbian, transgender and heterosexual women.": 2009/10

Based on the final results of this student learning outcome the lectures, assignments and activities may be altered to improve student success in regards to identifying female reproductive and sexual anatomy, and describing each part's functions.

Plan for topic "Students completing the course will be able to locate, interpret and critically evaluate women's health research and findings in terms of scientific validity and cultural or demographic bias.": 2009/10

Based on the final results of this student learning outcome the lectures, assignment and activities may be altered to improve student success in regards to locating, interpreting and critically analyzing women's health research.

Plan for topic "Students completing the course will be able to locate, interpret and critically evaluate women's health research for scientific validity, and cultural or demographic bias.": 2009/10

Based on the final results of this student learning outcome the lectures, assignment and activities may be altered to improve student success in regards to locating, interpreting and critically analyzing women's health research.

Plan for topic "Students completing the course will be able to analyze and assess the broad scope and interplay of the politics of women's health and medical care issues.": 2009/10

Based on the final results of this student learning outcome the lectures, assignment and activities may be altered to improve student success in regards to locating and utilizing self-help measures for women that can improve their health and well being.
### Plan for topic "Students completing the course will be able to explain the risk factors, treatments and symptoms of these illnesses and injuries."

*2017/18*

| To show correct answers after first exam then tell student that they will have to answer the same questions on the final was very helpful for them to correctly answer these. The 7 students who dropped may have been helped earlier. We may need to address these students with more study resources before they drop |

### Plan for topic "Students completing the course will be able to apply problem solving methods used in emergency situations."

*2013/14*

| The percent (91) who met competency was excellent. We will assess SLO #4 next cycle. |

### Plan for topic "Students completing the course will be able to identify leading causes of illness and injury."

*2010/11*

| 100% of the students agreed and strongly agreed to achieving the student learning outcome, which shows a success in surpassing the target goal of 95%. If this student learning outcome is assessed again in the future, the goal would be to maintain 100% of the students to achieve the outcome. Since it appears by the results that the outcome was successfully achieved, a new student learning outcome will be assessed in the future, with the goal of achieving the same successful results. |
### Plan for topic "Students completing this course will be able to identify and improve selected professional work habits and employability skills such as time management, communication, and teamwork.": 2018/19

WRKX department has built out a great team of supportive faculty members. In addition, we have redefined our SLOs (for more effective analysis) and have created an assessment tool which will be integrated into Canvas (once the updated SLOs are approved) and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.

### Plan for topic "Students completing this course will be able to explore and develop strategies to secure employment.": 2018/19

WRKX department has built out a great team of supportive faculty members. In addition, we have redefined our SLOs (for more effective analysis) and have created an assessment tool which will be integrated into Canvas (once the updated SLOs are approved) and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.

### Plan for topic "Students completing this course will be able to link academic coursework to work-based learning.": 2018/19

WRKX department has built out a great team of supportive faculty members. In addition, we have redefined our SLOs (for more effective analysis) and have created an assessment tool which will be integrated into Canvas (once the updated SLOs are approved) and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.
835. Independent Study [HSCI-298] belonging to Health Science [HSCI]
Plan for topic "Students completing this course will be able to have a greater understanding of nutrition by assisting the instructor as a teacher's aid." 2016/17

This is the first cycle of assessment. The level of learning and greater understanding of nutrition gained during this current assessment was impressive. The student was very comfortable answering complex questions from the class. The impact that the student had helped increase the class grades one entire grade level from previous semesters. In future semesters, the instructor will plan on meeting more often with the student TA to review and discuss weekly content to assure the student grasps the complex concepts and allow for more dialogue and potential questions the student TA may have.

Plan for topic "Students completing this course will be able to develop adaptive teaching methods to expand on learning modalities to improve student success rate" 2016/17

This was the first cycle of assessment. The level of learning and ability to develop new teaching methods was successful. The student TA was sensitive to the varying needs and backgrounds of other students needs in the class. The impact that the student TA had helped increase the class grades one entire grade level from previous semesters. In future semesters, the instructor will plan on assisting the student TA more so that we can continue to improve ways to engage students with different learning modalities.
837. Introduction to Humanities: Arts and Ideas [HUMAN-105] belonging to Humanities and Philosophy [HUMAN]

Plan for topic "Students completing the course will be able to analyze the function, media, subject matter, organization, style and relative excellence of three or more arts on the basis of formal criticism.": 2019/20

Level of learning demonstrated by the current assessment:

"The average score of the assessment was 73%. The average score for Spring 2020 went up to 82%.

Plan to improve the teaching and learning process:

"In addition to reading from the textbook, I have lectured on the subject matter to add interesting anecdotes and clarification where necessary."
DVC Instructional Course SLO Action Plans

needed.

• I'll include brief reading quizzes on Canvas to encourage students to read the textbook.

• I'll follow up the early assessments with a paper where students demonstrate comprehension of art they experience at Bay Area museums (including virtual museum tours).

Plan for topic "Students completing the course will be able to determine the relationship of the art object to the creators' self-understanding and perception of the world.": 2016/17

This assessment is certainly more relevant and meaningful than the earlier SurveyMonkey assessments!

The department is of the opinion that two factors may be especially important in this assessment: 1) student preparedness, and 2) the classroom facility. While this assessment was not based on students' writing abilities, students' were required to read, and glean information from, two scholarly articles. Perhaps this assessment was skewed in the
DVC Instructional Course SLO Action Plans

sense that it was assessing the students' ability to understand the articles as well as their ability to connect work of art to its creator and context. Will more time spent going over material from the articles help—or will a different way of assessing this outcome provide better results? The department will be considering these possibilities. With regard to classroom facility, this class will not be taught in the Forum during the Fall 2017 semester. The Forum is much too large, even with students pulled down into the first eight rows—and there is no whiteboard/blackboard to use to visually reinforce important points made during discussion of complex reading materials.

Plan for topic "Students completing the course will be able to analyze the function, media, subject matter, organization, style and relative excellence of three or more arts on the basis of formal criticism.": 2013/14

Our department has used the SurveyMonkey format for this and previous assessments. Now that a larger number of faculty are involving their students in the process, it is time to actually assess real student outcomes via a completely different methodology. In 2014-15, one or two SLOs will be assessed per each course scheduled for assessment, with each instructor assessing the same one or two outcomes. Instructors may link the SLO to an assignment or quiz question that is part of the actual course curriculum. The instructor will give the results to the Department. This will give us meaningful data.

Plan for topic "Students completing HUMAN-105 will be able to Students completing HUMAN-105 will be able to explain the relationship of the product of human creative expression to the creator's self-understanding and perception of the world.": 2013/14

Our department has used the SurveyMonkey format for this and previous assessments. Now that a larger number of faculty are involving their students in the process, it is time to actually assess real student outcomes via a completely different methodology. Plan for topic "Students completing the course will be able to analyze the function, media, subject matter, organization, style and relative excellence of three or more arts on the basis of formal criticism.": 2011/12

The department is pleased that there was a more substantial response to this assessment by students in sections taught by adjunct faculty, as well as by students taught by full-time faculty. There will be some ongoing departmental discussion about the chosen assessment method and criteria, as well as continuing discussion about effective collection of meaningful data.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to determine the relationship of the art object to the creators' self-understanding and perception of the world.": 2011/12

As stated above, the department is pleased that more faculty were able to encourage their students to respond to this survey, but there will be ongoing discussion within the department about the assessment method and criteria being used, and its correlation to meaningful data.

Plan for topic "Students completing the course will be able to analyze the relationship between works of art and the historical, philosophical, religious and intellectual conditions of the periods during which they were created.": 2011/12

The department is pleased that more faculty were able to encourage their students to respond to this survey, but there will be ongoing discussion within the department about the assessment method and criteria being used, and its correlation to meaningful data.

Plan for topic "Students completing the course will be able to analyze the function, media, subject matter, organization, style and relative excellence of three or more arts on the basis of formal criticism.": 2009/10

I was pleased with these results. In the fall semester 2010 assessment, however, I will try a different assessment methodology.

Plan for topic "Students completing the course will be able to analyze the function, media, subject matter, organization, style and relative excellence of three or more arts on the basis of formal criticism.": 2008/9

We need to keep collecting and analyzing data to meaningfully address.
Some of the explanations for unsuccessful students mentioned in previous assessments remain: esp. the lack of basic skills (esp. reading and writing), and poor time management. Most unsuccessful students abandon the class, while most students who remain to the end are successful, so efforts need to be taken to get them to continue until the end. To this end, the major writing assignment has been broken into smaller, developmental stages, and this more scaffolded approach has helped (particularly with the time management issues). Changes have also been made to the readings, along with more preparation for the formal testing components.

Plan for topic "Students completing the course will be able to analyze literary, religious, and philosophical texts, and explain what they state or infer about the concept of hell." : 2015/16

The lack of success for some students is clearly rooted in a lack of basic skills (esp. reading and writing, but also up to and including such basic college-level responsibilities as knowing that they should take notes in class), and part of it stems from their own poor time management (students have told me that they struggle later in the term when many of their classes have larger projects are due, which means that they give less effort and energy to prepare for the Quizzes). Some of the required readings are particularly difficult (e.g., selections from Aquinas, Dante's Inferno), and it is clear that some students have no experience trying to digest literary and philosophical texts of that complexity. Going forward, the instructor may try to narrow the number of texts, to ensure that students have more time to concentrate on less material, which should assist some students in being successful in the class.

Plan for topic "Students completing the course will be able to analyze literary, religious, and philosophical texts, and explain what they state or infer about the concept of hell." : 2011/12

This course was taught by an adjunct who had difficulty motivating students to respond to the survey, and by one adjunct who did not instruct students to participate. Continuing turnover and training of adjuncts (Most of our courses are taught by adjunct faculty) was factor here, and the department is continuing to work with this problem on a person-to-person basis. There will be ongoing discussion within the department about the assessment method and criteria being used, and its ability to collect meaningful data.

Plan for topic "Students completing the course will be able to identify key formal elements of the visual arts, music, and film and relate them to historical and cultural concepts about hell." : 2011/12

This course was taught by an adjunct who had difficulty motivating students to respond to the survey, and by one adjunct who did not instruct students to participate. Continuing turnover and training of adjuncts (Most of our courses are taught by adjunct faculty) was a factor here, and the department is continuing to work with this problem on a person-to-person basis. There will be ongoing discussion within the department about the assessment method and criteria being used.

Plan for topic "Students completing the course will be able to compare and contrast ideas of the after life across cultures and historical periods." : 2011/12

Plan for topic "Students completing the course will be able to After having completed HUMAN 110, I can now explain in objective historical terms the precise, important steps in the origin and evolution of the Western cultural heritage as seen in the ancient world."

2018/19

Some of the problems for unsuccessful students mentioned in previous assessments remain: esp. the lack of basic skills (esp. reading and writing), and poor time management. To assist struggling students, some of the more challenging texts have been replaced by smaller, more diverse, and more accessible readings. The major writing assignment has also been broken into smaller, developmental stages, and this more scaffolded approach has helped (particularly with the time management issues). We expect to improve success by continuing development and experimentation on both these fronts---readings and the big paper.

Plan for topic "Students completing the course will be able to After having completed HUMAN 110, I can now explain in objective historical terms the precise, important steps in the origin and evolution of the Western cultural heritage as seen in the ancient world."

2015/16

Some reasons the achievement percentage was higher in section 5542 than in section 5663 may have been because 5542 was a full-term course and students had more time to work with the materials. Some students had difficulty with reading materials and with written work. The plan for future semesters is to encourage students to work with the English tutoring lab early in the semester, if possible. Engage student with more frequent assignments using the discussion board, encouraging them to have an active voice in the class community. Allow students to achieve the learning objective in more than one assignment.

Plan for topic "Students completing the course will be able to explain in objective historical terms the precise, important steps in the origin and evolution of the Western cultural heritage as seen in the Middle Ages and Renaissance and Baroque era.": 2014/15

The most critical problem facing this course is that an increasing number of students entering DVC from high school are underprepared and have had very little exposure to this period in Western historical culture. We must use both a textbook and primary sources in this class. They are not easy to read, and many of my students do not write at a college level. At this point, our department is discussing pedagogical methods that might raise the success level of some of the underprepared students without lowering the standards already established for this course.

Plan for topic "Students completing the course will be able to analyze the interconnections that exist among diverse areas of the humanities in the Middle Ages and Renaissance and Baroque era.": 2011/12

The survey question is intended to evaluate whether students have achieved outcome #2: Identify and analyze the relationships that exist among the several areas of the humanities. The survey question, however, is also asking about a strong historical component that is not mentioned in the learning objective/learning outcome on record in the course outline. The department needs to discuss the relationship between stated learning outcomes and how they will be addressed in the assessment process.
While most students felt they were able to grasp the historical, causal connections between the historical period covered in this course and the present, perhaps it would be helpful for the department to consider the relationship between the outcome being measured here and the more generally stated learning objective/outcome stated in the course outline, that students will "develop a perspective of historical Western culture."

**Plan for topic "Students completing the course will be able to analyze formally and contextually the essential significance of key monuments and documents from 500 to 1700."**: 2011/12

There is no prerequisite for this course, but rather an advisory that students be eligible for English 122. Because students with a lack of historical training and a lack of reading preparedness are enrolling in this course, the department needs to discuss the relationship between the assessment process and the less specific stated learning objective/outcome in the course outline, that students will "critically analyze the works of European cultural history between A.D. 500-1700."

**Plan for topic "Students completing the course will be able to explain in objective historical terms the precise, important steps in the origin and evolution of the Western cultural heritage as seen in the Middle Ages and Renaissance and Baroque era."**: 2010/11

This has been dealt with by the department. We have made it clear to our adjunct faculty that SLO assessment is mandated. The department has sent reminders to faculty, along with suggestions for having students participate in the Survey Monkey questionnaire. This will also be a topic at department meetings.

**Plan for topic "Students completing the course will be able to analyze the interconnections that exist among diverse areas of the humanities in the Middle Ages and Renaissance and Baroque era."**: 2010/11

This has been dealt with by the department. We have made it clear to our adjunct faculty that SLO assessment is mandated. Plan for topic "Students completing the course will be able to critically analyze selected works of Western creativity and thought from 1700 to the present."

The majority of students performed very well with this assessment. A variety of factors can be identified as having contributed to the poor performance a minority of students. Those factors include excessive absences and challenges with reading and writing. This semester I am dividing the exam into two parts: one part will be a take home exam and one part will be in class. It is my hope that by allowing for some questions to be addressed with more time and preparation, it will improve the success rates for students who struggle to read and write under time constraints.

Plan for topic "Students completing HUMAN-112 will be able to identify and compare aspects of the Western cultural heritage."

Our department has used the SurveyMonkey format for this and previous assessments. Now that a larger number of faculty are involving their students in the process, it is time to actually assess real student outcomes via a completely different methodology. In 2014-15, one or two SLOs will be assessed per each course scheduled for assessment, with each instructor assessing the same one or two outcomes. Instructors may link the SLO to an assignment or quiz question that is part of the actual course curriculum. The instructor will give the results to the Department. This will give us meaningful data.

Plan for topic "Students completing HUMAN-112 will be able to demonstrate a perspective on modern Western culture and history."

Our department has used the SurveyMonkey format for this and previous assessments. Now that a larger number of faculty are involving their students in the process, it is time to actually assess real student outcomes via a completely different methodology. In 2014-15, one or two SLOs will be assessed per each course scheduled for assessment, with each instructor assessing the same one or two outcomes. Instructors may link the SLO to an assignment or quiz question that is part of the actual course curriculum. The instructor will give the results to the Department. This will give us meaningful data.

Plan for topic "Students completing HUMAN-112 will be able to critically analyze selected works of Western creativity and thought from 1700 to the present."

Our department has used the SurveyMonkey format for this and previous assessments. Now that a larger number of faculty are involving their students in the process, it is time to actually assess real student outcomes via a completely different methodology. In 2014-15, one or two SLOs will be assessed per each course scheduled for assessment, with each instructor assessing the same one or two outcomes. Instructors may link the SLO to an assignment or quiz question that is part of the actual course curriculum. The instructor will give the results to the Department. This will give us meaningful data.

Plan for topic "Students completing the course will be able to identify and compare aspects of the Western cultural heritage."

We will not make any changes at this time, and will compare these results with future assessments.

Plan for topic "Students completing HUMAN-115 will be able to identify and analyze the cultural traditions of people from the African-American, Native American, Asian-American, and Latino-American communities (or at least three of these cultural communities).": 2018/19
Some reasons for a lack of success among students for this SLO: some did not watch the film "Smoke Signals" (even though the film was shown in class), the Quiz was given in the first 20 minutes of class (late students didn't properly complete it or missed it entirely), and the assessment was conducted in the first two weeks of the class. To improve the success rate in future semesters, assessments will be taken in the second half of the class (so late-adding students can catch up). Also, students will be better informed about the availability of media resources.

Plan for topic "Students completing HUMAN-115 will be able to demonstrate a basic understanding of artistic and aesthetic terms.".: 2013/14
Our department has used the SurveyMonkey format for this and previous assessments. Now that a larger number of faculty are participating in the process, it is time to stop using this method and to actually assess real student outcomes via a completely different methodology. In the 2014-15 assessment, the instructors in any given course will assess the scheduled SLOs (the department will choose one or two SLOs per course scheduled for assessment). Instructors may link the SLO to an assignment or quiz question, or may conduct an assessment using another pedagogical method that is part of the actual course curriculum. The instructor will then give the results to the department. This will provide the department with meaningful data.

Plan for topic "Students completing HUMAN-115 will be able to evaluate and analyze creative works from a number of artistic disciplines.".: 2013/14

DVC Instructional Course SLO Action Plans

843. Humanities: The Arts and Culture of Asia [HUMAN-116] belonging to Humanities and Philosophy [HUMAN]

Plan for topic "Students completing the course will be able to compare and contrast the richness and diversity of at least two Asian cultures, and the contributions they have made to the world's culture.": 2016/17

This was a wonderful class to work with, and because it was a small class it was very possible to work with students individually to help them as need arose. Students were able to work together in study groups outside of class, and to seek help at the English T. Four of the students were international or ESL students, and the small size of the class helped them to gain enough confidence to participate in class discussion. This class could be greatly enriched by a field trip to the Asian Art Museum in San Francisco.

Plan for topic "Students completing the course will be able to compare and contrast the richness and diversity of at least two Asian cultures, and the contributions they have made to the world's culture.": 2012/13

The same format for gathering responses is in place for AY 2013-14, and data is being gathered both semesters. The department will next discuss a different method to gather assessment information for this course for AY 2014-15 in order to assess what number of students actually have accomplished this outcome.

Plan for topic "Students completing the course will be able to compare and contrast the views of each culture with regard to its arts, ideas, and religions.": 2012/13

The same format for gathering responses is in place for AY 2013-14, and data is being gathered both semesters. The department will next discuss a different method to gather assessment information for this course for AY 2014-15 in order to assess what number of students actually have accomplished this outcome.

Plan for topic "Students completing the course will be able to identify and analyze the relationships that exist among the several areas of the humanities, selecting from the visual arts, literary arts, cinema, architecture, music, drama, dance, and philosophic and religious literature.": 2012/13

The same format for gathering responses is in place for AY 2013-14, and data is being gathered both semesters. The department will next discuss a different method to gather assessment information for this course for AY 2014-15 in order to assess what number of students actually have accomplished this outcome.
DVC Instructional Course SLO Action Plans

**844. Humanities: Fiction, Film, and Criticism [HUMAN-118] belonging to Humanities and Philosophy [HUMAN]**

Plan for topic "Students completing the course will be able to recognize the cinematic devices that allow literary elements to be translated into cinema.": 2018/19

<table>
<thead>
<tr>
<th>The current methods of in-class discussion, group review, and in-class and out of class writing and examinations will be continued.</th>
</tr>
</thead>
<tbody>
<tr>
<td>The current plan is to continue using a combination of these methodologies and to try and intervene early when students fail at one or another.</td>
</tr>
</tbody>
</table>

Plan for topic "Students completing the course will be able to evaluate devices that create the aesthetic qualities of literary texts.": 2016/17

<table>
<thead>
<tr>
<th>This course will be assessed during the Spring 2017 semester.</th>
</tr>
</thead>
<tbody>
<tr>
<td>The results indicate that the students feel that they are successfully accomplishing this particular outcome, but it is the department's conclusion that over the course of two semesters more responses should have been gathered. We are still struggling to bring our entire faculty in compliance with this process, and this is particularly problematic since most members of our faculty are adjunct. In Assessments gathered in AY 2013-14, individual sections will be assessed.</td>
</tr>
</tbody>
</table>

Plan for topic "Students completing the course will be able to evaluate devices that create the aesthetic qualities of literary texts.": 2012/13

| The number of students feeling that they had successfully accomplished this learning objective concerns the department. We would like to see at least 70% of the students feeling that they had done so successfully. It is also the department's concern, however, that over the course of two semesters more responses should have been gathered. We |
are still struggling to bring our entire faculty in compliance with this process, and this is particularly problematic since most members of our faculty are adjunct. In Assessments gathered in AY 2013-14, individual sections will be assessed.
Plan for topic "Students completing the course will be able to evaluate the aesthetic value of popular entertainment.": 2018/19

The majority of students did quite well with this assessment. Nonetheless, some students did not submit work and thus failed. I seek to reduce these failures by continuing to make myself available outside of class to work with students on their papers, spending additional time in class in which students can draft many of their paper ideas and discussing additional ways of transforming the draft to a final paper. I also hope that our Humanities tutor will prove to be of assistance for students struggling with the writing process or how to get started.

Plan for topic "Students completing HUMAN-123 will be able to describe, compare, and contrast the difference between popular culture and "high" or "elite" culture.": 2013/14

Our department has used the SurveyMonkey format for this and previous assessments. Now that a larger number of faculty are participating in the process, it is time to stop using this method and to actually assess real student outcomes via a completely different methodology. In the 2014-15 assessment, the instructors in any given course will assess the scheduled SLOs (the department will choose one or two SLOs per course scheduled for assessment). Instructors may link the SLO to an assignment or quiz question, or may conduct an assessment using another pedagogical method that is part of the actual course curriculum. The instructor will then give the results to the department. This will provide the department with meaningful data.

Plan for topic "Students completing HUMAN-123 will be able to identify and analyze the relationships that exist among the several areas of the humanities within the boundaries of popular culture: visual arts, film, literature, music, comics, electronic arts.": 2013/14

**882. First Term Italian [ITAL-120] belonging to Foreign Language [ITAL]**

**Plan for topic “Students completing this course will be able to comprehend a short passage in the present tense.”**: 2019/20

WebSLOs had tech issue in regards to this class - SLO & Dept. Chairs will create a SLO Submission schedule for next assessment.

**Plan for topic “Students completing the course will be able to comprehend a short passage in the present tense.”**: 2019/20

WebSLOs had tech issue in regards to this class - SLO & Dept. Chairs will create a SLO Submission schedule for next assessment.

**Plan for topic “Students completing this course will be able to comprehend basic conversation and basic texts, pronounce Italian with a decent accent, acquire a basic active and passive vocabulary.”**: 2015/16

I am very satisfied with the results. The results indicate that the students were used to regularly listening to the Italian language in class. Regarding the particular subject of the passage read in class: it is important to point out that, during the semester, students were always encouraged to talk about their daily lives. We often compared their daily lives to those of Italian students. This practice will be continued in the future. The test used can certainly be used again, in both its oral and written forms. Of course appropriate changes should be made when using the written form.

**Plan for topic “Students completing this course will be able to communicate in a daily situation.”**: 2012/13

With 86% of the class passing, no action is necessary beyond trying to help those students (two, in this particular case) who are less enthusiastic about studying.

**Plan for topic “Students completing the course will be able to communicate in a daily situation.”**: 2012/13

With 86% of the class passing, no action is necessary beyond trying to help those students (two, in this particular case) who are less enthusiastic about studying.

**Plan for topic “Students completing ITAL-120 will be able to ACQUIRE A WORKING KNOWLEDGE OF BASIC ITALIAN GRAMMAR AND SYNTAX.”**: 2012/13

With 86% of the class passing, no action is necessary beyond trying to help those students (two, in this particular case) who are less enthusiastic about studying.

**Plan for topic “Students completing ITAL-120 will be able to ACQUIRE A WORKING KNOWLEDGE OF BASIC ITALIAN GRAMMAR AND SYNTAX.”**: 2012/13

Plan for topic "Students completing the course will be able to communicate in a daily situation.": 2011/12
This assessment method is inadequate and clearly shows the students' knowledge of the language skilled tested. We will continue using the same teaching methods to achieve similar or better results.

Plan for topic "Students completing ITAL-120 will be able to ACQUIRE A WORKING KNOWLEDGE OF BASIC ITALIAN GRAMMAR AND SYNTAX.": 2011/12
This assessment method is adequate and clearly shows the students' knowledge of the language skilled tested. We will continue using the same teaching methods to achieve similar or better results.

Plan for topic "Students completing ITAL-120 will be able to ACQUIRE A WORKING KNOWLEDGE OF BASIC ITALIAN GRAMMAR AND SYNTAX.": 2011/12
This assessment method is adequate and clearly shows the students' knowledge of the language skilled tested. We will continue using the same teaching methods to achieve similar or better results.

Plan for topic "Students completing this course will be able to pronounce Italian clearly with a good accent.": 2011/12
We found that this assessment method is problematic. It does not actually test the students' pronunciation skills, rather their ability to correctly identify how certain combinations of letters are supposed to sound. In the next cycle, we will use the oral exam.

Plan for topic "Students completing the course will be able to pronounce Italian clearly with a good accent.": 2011/12
We found that this assessment method is problematic. It does not actually test the students' pronunciation skills, rather their ability to correctly identify how certain combinations of letters are supposed to sound. In the next cycle, we will use the oral exam.

Plan for topic "Students completing this course will be able to comprehend a short passage in the present tense.": 2010/11
Very Satisfied with results. We confirmed that daytime class and evening class did not have a significant difference of achievement. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.

<table>
<thead>
<tr>
<th>No student took Italian 231 in the fall of 2016. We will assess it next time it is offered</th>
</tr>
</thead>
</table>

**Plan for topic "Students completing ITAL-231 will be able to communicate entirely in formal and informal Italian."**: 2013/14

| Even though 100% passed, more emphasis should be placed on pronunciation in the future. This will be done beginning in the lower levels of Italian so that near-fluency can be reached by the end of Italian 231. |
DVC Instructional Course SLO Action Plans

889. Student Instructional Assistant [ITAL-299] belonging to Foreign Language [ITAL]
Plan for topic "Students completing this course will be able to demonstrate reading comprehension by reading basic texts in Japanese.": 2018/19

During a flex department meeting in August, we shared the results, analyzed them, and created our plans to increase student success in reading comprehension. The Japanese program will continue to discuss our teaching strategies and has decided to do the following to focus on reading rather than oral production, as previously assessed. We will assess this topic again during the next cycle to compare the results and see what works and does not, include this reading assessment as part of an exam, and create more reading comprehension activities and assignments in and outside of the classroom.

Plan for topic "Students completing this course will be able to comprehend simple conversation and reading.": 2015/16

Overall, we are satisfied with the results. However, there are a few students who earned only 1 or 0 out of 5 points in each course. After examining the results of those students, we realized that most of them didn’t complete the assignments of online listening exercise and didn’t pass the course.

We will increase practice time for online assignments and implement more oral comprehension practice in class in order to improve their listening skills.

Plan for topic "Students completing the course will be able to recognize differences in phonetic writing systems.": 2012/13

We are very satisfied with the results since there is no significant achievement gap between these different types of courses. We will continue having the Japanese program meetings to share our teaching methods and encouraging students to go to the FL computer and tutorial labs.

Plan for topic "Students completing the course will be able to interpret cultural behavior related to greetings and Japanese houses.": 2012/13

We are very satisfied with the results since there is no significant achievement gap between these different types of courses. We will continue having the Japanese program meetings to share our teaching methods and encouraging students to go to the FL computer and tutorial labs for their conversational skills.

Plan for topic "Students completing the course will be able to recognize differences in phonetic writing systems.": 2010/11

Very Satisfied with results. We confirmed that daily class and twice a week class did not have a significant difference of achievement. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.

Plan for topic "Students completing the course will be able to demonstrate basic understanding of grammar rules in writing.": 2010/11

Very Satisfied with results. We confirmed that daily class and twice a week class did not have a significant difference of achievement. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.
Plan for topic "Students completing the course will be able to interpret cultural behavior related to greetings and Japanese houses."

**2010/11**

Very satisfied with results. We confirmed that daily class and twice a week class did not have a significant difference of achievement. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.

Plan for topic "Students completing the course will be able to recognize differences in phonetic writing systems."

<td>2015/16</td>
<td>We are very satisfied with the results since there is no significant achievement gap between these different types of courses. We have emphasized oral exercises on new sentence structure and grammar rules with a partner or in a small group, so that students can demonstrate knowledge of sentence structure and grammar rules not only through reading and writing, but also through listening and speaking. We will make sure to continue this throughout the Japanese program. In addition, students are required to listen to audio materials provided by the publisher in order to complete their Lab Activities assignments outside of the class. Even though lab hours are no longer a state requirement, the Japanese program instructors will keep using Lab Activity materials for assignments regularly so that the students are constantly exposed to native Japanese sounds.</td>

892. First Term Kanji [JAPAN-130] belonging to Foreign Language [JAPAN]

Plan for topic "Students completing the course will be able to differentiate between the meanings of Kanji radicals.": 2019/20

WebSLOs had tech issue in regards to this class - SLO & Dept. Chairs will create a SLO Submission schedule for next assessment.

Plan for topic "Students completing the course will be able to use Kanji characters in sentences.": 2015/16

We are satisfied with the results of JAPAN130 assessment since 80% of the students wrote their story properly in Japanese with Kanji characters they have learned.

We will include, however, reading emphasis in the assessment in the future. For example, students read materials with learned Kanji characters so that we can assess not only their writing skills but also their reading skills.

Plan for topic "Students completing the course will be able to differentiate between the meanings of Kanji radicals.": 2012/13

Even though different instructors teach this course every semester, we constantly achieve great results. We will continue having the Japanese program meetings to share teaching methods and classroom materials.

Plan for topic "Students completing the course will be able to comprehend 169 Kanji characters taught in this course.": 2012/13

Even though different instructors teach this course every semester, we constantly achieve great results. We will continue having the Japanese program meetings to share teaching methods and assigning similar homework.

Plan for topic "Students completing the course will be able to use Kanji characters in sentences.": 2012/13

Even though different instructors teach this course every semester, we constantly achieve great results. We will continue having the Japanese program meetings to share teaching methods and assigning the same type of homework.

Plan for topic "Students completing the course will be able to differentiate between the meanings of Kanji radicals.": 2011/12

Very satisfied with results. We will continue giving similar homework next semester.

Plan for topic "Students completing the course will be able to comprehend 169 Kanji characters taught in this course.": 2011/12

Very satisfied with results. We will continue using the same teaching methods to achieve similar or better results.

Plan for topic "Students completing the course will be able to use Kanji characters in sentences.": 2011/12

Very satisfied with results. We will continue giving the same type of homework.
### Plan for topic "Students completing the course will be able to identify the 345 Kanji characters from a written text."

895. Topics in Japanese [JAPAN-150] belonging to Foreign Language [JAPAN]
Plan for topic "Students completing this course will be able to demonstrate a firm grounding in the fundamentals of the Japanese language.": 2016/17

We are very satisfied with the results since there is no significant achievement gap between these two courses. We have emphasized oral exercises on new sentence structure and grammar rules with a partner or in a small group, so that students can demonstrate knowledge of sentence structure and grammar rules not only through reading and writing, but also through listening and speaking. We will make sure to continue this throughout the Japanese program. In addition, students are required to listen to audio materials provided by the publisher in order to complete their Lab Activities assignments outside of the class. The Japanese program instructors will keep using Lab Activity materials for assignments regularly so that the students are constantly exposed to native Japanese sounds. The challenge now is to make sure that all students will work on Lab Activity assignments regularly. In the first daily class, three students did not submit the assignment, and in the second daily class, one student did not submit the assignment. We will keep instructing the students how important to work on these assignments and try to have them submit assignments regularly.

Plan for topic "Students completing the course will be able to interpret cultural behavior related to Japanese social obligation.": 2013/14

We are going to standardize the course objectives by language groups in order to unify the criteria for assessment across all sections.

Plan for topic "Students completing the course will be able to comprehend conversations about the weather forecast.": 2012/13

We are very satisfied with the results and will continue encouraging students to go to the FL computer and tutorial labs for their conversational skills.

Plan for topic "Students completing the course will be able to identify Kanji characters which were taught in this course along with Hiragana and Katakana.": 2012/13

We are very satisfied with the results and will continue conducting two Kanji quizzes for each chapter.

Plan for topic "Students completing the course will be able to interpret cultural behavior related to Japanese social obligation.": 2010/11

Very satisfied with results. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.

Plan for topic "Students completing the course will be able to comprehend conversations about the weather forecast.": 2010/11

Very satisfied with results. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.

Plan for topic "Students completing the course will be able to identify Kanji characters which were taught in this course along with Hiragana and Katakana.": 2010/11

Very satisfied with results. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.
DVC Instructional Course SLO Action Plans

897. Fourth Term Japanese [JAPAN-221] belonging to Foreign Language [JAPAN]

Plan for topic "Students completing this course will be able to describe aspects of life and culture in Japan using complex sentences."

2016/17
We are very satisfied with the results. This semester, we spent more time for students to create their dialogues and practice their presentations in class. We will continue to assign more grammar homework in order to make more time for the preparation of this oral presentation.

Plan for topic "Students completing the course will be able to distinguish various speech styles according to social status."

2013/14
We are going to standardize the course objectives by language groups in order to unify the criteria for assessment across all sections. Also, we are not very happy with the results. We are planning to revise our review sheets about speech styles.

Plan for topic "Students completing the course will be able to identify a greater number of Kanji characters taught in this course from an intermediate written text."

2012/13
We are very satisfied with the results and will continue conducting two Kanji quizzes for each chapter.

Plan for topic "Students completing the course will be able to comprehend an intermediate conversation related to asking and giving directions."

2012/13
We are very satisfied with results and will continue encouraging students to go to the FL computer and tutorial labs for their conversational skills.

Plan for topic "Students completing the course will be able to identify a greater number of Kanji characters taught in this course from an intermediate written text."

2010/11
Very satisfied with results. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.

Plan for topic "Students completing the course will be able to comprehend an intermediate conversation related to asking and giving directions."

2010/11
Very satisfied with results. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.

Plan for topic "Students completing the course will be able to distinguish various speech styles according to social status."

2010/11
Very satisfied with results. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.
898. Independent Study [JAPAN-298] belonging to Foreign Language [JAPAN]

Plan for topic "Students completing this course will be able to recognize effective teaching strategies at a basic level for Japanese language learners.": 2016/17

It is rare for students to enroll in 298 course. However, whenever students request, we will continue accepting them to help them study Japanese further. This course assessment will be shared at department meetings so that all instructors who might teach this course in the future will be able to learn how to successfully teach and evaluate an independent study course.

Plan for topic "Students completing this course will be able to recognize effective teaching strategies at a basic level for Japanese language learners.": 2015/16

It is rare for students to enroll in 298 course. However, whenever students request, we will continue accepting them to help them study Japanese further. This course assessment will be shared at department meetings so that all instructors who might teach this course in the future will be able to learn how to successfully teach and evaluate an independent study course.

Plan for topic "Students completing this course will be able to recognize effective teaching strategies at a basic level for Japanese language learners.": 2014/15

We will continue accepting students for this independent study course, who completed all Japanese courses and desire to continue Japanese study further.
### Plan for topic "Students completing this course will be able to provide assistance to students with questions.": 2017/18

Throughout the semester, there was a quick pre-class meeting with the student, whenever new material was introduced, and it was helpful for enhancing the student’s understanding of the structures of the day. As an action plan, the department will encourage exchanging information among instructors of different language programs that hire 299 students in order to enable more opportunities to have 299 students in class. If applicable, the department will set common objectives among different language programs.

### Plan for topic "Students completing this course will be able to provide assistance to students with questions.": 2014/15

We are very happy to have instructional assistants in our Japanese courses. Students seem comfortable to seek help from them and interact with them. We will continue accepting assistants and promoting this 299 course, not only to native Japanese speakers, but also to students who have taken all levels of Japanese courses and wish to be an English teacher in Japan.
**DVC Instructional Course SLO Action Plans**

### 900. Mass Media of Communication [JRNAL-110] belonging to Journalism [JRNAL]

**Plan for topic "Students completing JRNAL-110 will be able to demonstrate an understanding of the difference between propaganda and news.": 2017/18**

110 focuses on U.S. rather than global media, and it always poses some cultural challenges for international students. New faculty should brainstorm class exercises in this area that might help clarify the different standards.

**Plan for topic "Students completing the course will be able to analyze the legal and ethical dilemmas faced by professionals in mass media.": 2014/15**

Better communication with other instructors about when and what is being assessed.

Note: Our 2011 action plan was to revise the SLO topics for this course. We have done that and those revised topics are showing up as part of the 2011 assessment.

**Plan for topic "Students completing the course will be able to analyze writing styles in various media.": 2014/15**

Better communication with other instructors about when and what is being assessed.

Note: Our 2011 action plan was to revise the SLO topics for this course. We have done that and those revised topics are showing up as part of the 2011 assessment.

**Plan for topic "Students completing JRNAL-110 will be able to Analyze how media organizations use writing, images or sounds to send complex messages to their audiences." 2014/15**

Better communication with other instructors about when and what is being assessed.

Note: Our 2011 action plan was to revise the SLO topics for this course. We have done that and those revised topics are showing up as part of the 2011 assessment.

**Plan for topic "Students completing the course will be able to recognize the difference between fact based and opinion based media styles." 2014/15**

As we observed last time, student performance of this competency was mixed. 19 of 28 students in the day section took the online quiz; 18 scored better than 75 percent.
Because questions were randomized, it is difficult to analyze whether specific parts of the competency gave students trouble overall, but 2 of 8 students answering the specific question on journalism's key values had difficulty identifying them. 23 of 23 students in the night section took the final exam; virtually all were able to answer the target questions correctly, but a significant number of students had trouble identifying whether "War of the Worlds" was journalism or entertainment and more than half the class did not recognize "sponsored content" as being an advertisement. In some cases, questions may have been unclear.

Action plan: Meet with other instructors to discuss this element of the course and how to better teach/evaluate it.

Note: Our 2011 action plan was to revise the SLO topics for this course. We have done that and those revised topics are showing up as part of the 2011 assessment.

Plan for topic "Students completing JRNAL-110 will be able to Demonstrate media literacy by recognizing the difference between news, entertainment, advertising and/or public relations content." 2014/15

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing JRNAL-110 will be able to Understand and identify some of the skills necessary for employment in the mass media.": 2011/12

No action needed, but this SLO does not seem to fit main the goal of the course, which is to give students media literacy tools, and it should be revised.

Plan for topic "Students completing the course will be able to analyze the legal and ethical dilemmas faced by professionals in mass media.": 2008/9

The good response to questions demonstrate no significant need for additional instruction in this area.

Plan for topic "Students completing the course will be able to analyze writing styles in various media.": 2008/9

Student homework assignments include writing for newspaper, magazine, and TV. Students seem to understand distinctions but do not answer objective questions on tests satisfactorily. I need to repeatedly stress differences in styles and increase objective questions in tests in order to better gauge student knowledge, particularly literacy style vs. "pyramid" style.

Plan for topic "Students completing JRNAL-110 will be able to Analyze how media organizations use writing, images or sounds to send complex messages to their audiences.": 2008/9

Plan for topic "Students completing the course will be able to recognize the difference between fact based and opinion based media styles.": 2008/9

5 of 24 students didn't understand requirements of the assignment and received grades of 60% or lower. I will be clearer in the homework handout and verbal instructions to the class as to what's expected in assignments. In addition, the rubric used to evaluate the assignment will be shared with students.

Plan for topic "Students completing JRNAL-110 will be able to Demonstrate media literacy by recognizing the difference between news, entertainment, advertising and/or public relations content.": 2008/9

5 of 24 students didn't understand requirements of the assignment and received grades of 60% or lower. I will be clearer in the homework handout and verbal instructions to the class as to what's expected in assignments. In addition, the rubric used to evaluate the assignment will be shared with students.

Plan for topic "Students completing the course will be able to discuss employment in mass media.": 2008/9

Students are exposed to employment options and differences in media jobs via instructor lecture and six guest lecturers. The varied responses to quiz and test questions suggest the need to review the guest lectures in more detail in classes directly following the lectures.

Plan for topic "Students completing JRNAL-110 will be able to Understand and identify some of the skills necessary for employment in the mass media.": 2008/9

DVC Instructional Course SLO Action Plans

901. Introduction to Newswriting and Reporting [JRNAL-120] belonging to Journalism [JRNAL]

Plan for topic "Students completing the course will be able to write a brief news story under deadline conditions."; 2017/18

This is the fundamental skill for this course, and almost all students are able to perform it by the end of the semester. Keys to success seem to include spending time on each individual component -- leads, interviewing, notetaking and story structures.

Plan for topic "Students completing this course will be able to produce a more complex journalistic project that would be appropriate to use as a work sample in a job application."; 2017/18

This is the fundamental skill for this course, and almost all students are able to perform it by the end of the semester. Keys to success seem to include spending time on each individual component -- leads, interviewing, notetaking and story structures.

Plan for topic "Students completing the course will be able to analyze the legal and ethical dilemmas faced by professionals in mass media."; 2014/15

This is an acceptable result. I made some adjustments to the lecture and activities in this area for fall 2015, and so far even more students are succeeding.

Plan for topic "Students completing the course will be able to demonstrate ability to write a strong lead sentence and backup graph under deadline pressure."; 2014/15

I’m going to have to figure out a different way to assess this competency; maybe it will be easier to set up under our new CMS.

Plan for topic "Students completing the course will be able to recognize the difference between fact and opinion in newswriting."; 2014/15

I’m going to have to figure out a different way to assess this.

Plan for topic "Students completing the course will be able to write a brief news story under deadline conditions."; 2014/15

These results are acceptable and it can be inferred from them that most students were successful in criteria two and three. I don’t think it’s necessary to evaluate leads and fact/opinion separately from the ability to write a brief news story under deadline conditions.

Plan for topic "Students completing this course will be able to produce a more complex journalistic project that would be appropriate to use as a work sample in a job application."; 2014/15

These results are acceptable and it can be inferred from them that most students were successful in criteria two and three. I don’t think it’s necessary to evaluate leads and fact/opinion separately from the ability to write a brief news story under deadline conditions.

Plan for topic "Students completing the course will be able to analyze the legal and ethical dilemmas faced by professionals in mass media."; 2011/12

Results are acceptable, but not stellar. Plan as of mid-semester was to give students more opportunity to practice the skills, using WebCT tools. Adding materials to WebCT did not produce significant gains in the spring, but students could have been better encouraged to use them.

DVC Instructional Course SLO Action Plans

902. News Production Fundamentals [JRNAL-125] belonging to Journalism [JRNAL]
Plan for topic "Students completing JRNAL-125 will be able to Use writing and/or images to tell a simple news or feature story meeting minimum publication criteria for significance, appropriateness of sourcing, accuracy and completeness, composition and technical style.": 2017/18
This course is part of the Inquirer production sequence, so students are at different skill levels when they start the semester. More attention should be spent earlier in the semester to develop their basic newsgathering skills. I rewrote the handbook over the summer and restructured the class somewhat to try to address this problem.

Plan for topic "Students completing JRNAL-125 will be able to demonstrate good work habits, time management and professionalism while collaborating with others to produce a journalistic product.": 2017/18
Keep asking students to reflect on their own work performance with the help of a rubric that models professional behavior.

Plan for topic "Students completing JRNAL-125 will be able to Use writing and/or images to tell a simple news or feature story meeting minimum publication criteria for significance, appropriateness of sourcing, accuracy and completeness, composition and technical style.": 2014/15
This is a new course created when the Inquirer class lost repeatability. No students were enrolled at this level during the assessment period. Action plan: This course was significantly revised in fall 2015 and should be reassessed after the new outline goes into effect.

Plan for topic "Students completing JRNAL-125 will be able to demonstrate good work habits, time management and professionalism while collaborating with others to produce a journalistic product.": 2014/15

DVC Instructional Course SLO Action Plans

903. News Production Laboratory I [JRNAL-126] belonging to Journalism [JRNAL]

Plan for topic "Students completing JRNAL-126 will be able to use a variety of methods and media to create journalistic products that demonstrate good news judgment, appropriate sourcing, accuracy and completeness, and adherence to technical and style rules."

2018/19
The students did well with the current SLO, and the increase in traffic proved beneficial for the remainder of the semester. Students worked on follow-up stories and were publicly recognized for work on this topic. In the future, we will look to assess a different SLO.

Plan for topic "Students completing JRNAL-126 will be able to collaboratively produce a news product, such as a newspaper or website, that demonstrates good news judgment, awareness of audience and community needs, and technical skill."

2015/16
Need to develop an effective rubric for assessing competence in social media, which is an increasingly important journalistic skill.

Plan for topic "Students completing JRNAL-126 will be able to use a variety of methods and media to create journalistic products that demonstrate good news judgment, appropriate sourcing, accuracy and completeness, and adherence to technical and style rules."

2015/16
Not sure this method assessed "variety of methods and media," but students certainly have the basics down. Consider ways to encourage and develop skills in multiple media.

Plan for topic "Students completing the course will be able to demonstrate ability to collaborate with peers to produce newspaper or website under deadline condition."

2015/16
Develop deadline criteria for assessing online performance.

Plan for topic "Students completing the course will be able to analyze the legal and ethical dilemmas faced by professionals in mass media."

2012/13
In reviewing the data the faculty have determined that the SLO was met by the majority of students. The faculty have determined that the current SLO assessments are well developed but will be adjusted to meet a major content revision that will be implemented in 13/14.

Plan for topic "Students completing the course will be able to recognize the difference between fact and opinion in news writing."

2012/13
In reviewing the data the faculty have determined that aspects of the SLO need to be revised so that the performance of cutlines is improved. The faculty have determined that the current SLO assessments are well developed but will be adjusted to meet a major content revision that will be implemented in 13/14.

Plan for topic "Students completing the course will be able to demonstrate ability to use Associated Press style in stories and cutlines."

2012/13
In reviewing the data the faculty have determined that aspects of the SLO need to be revised so that the performance of cutlines is improved. The faculty have determined that the current SLO assessments are well developed but will be adjusted to meet a major content revision that will be implemented in 13/14.

Plan for topic "Students completing the course will be able to demonstrate ability to collaborate with peers to produce newspaper or website under deadline condition": 2008/9

Criteria will be described to the staff during the first weeks of the semester, so everyone knows what is expected on production days. No change.
Plan for topic "Students completing JRNAL-127 will be able to use news judgment and their knowledge of current events and their audience to direct student media coverage and edit weekly projects into publishable form, with attention to accuracy, clarity, thoroughness, fairness, AP style, and media law and ethics.": 2018/19

Based on the results of this assessment, I feel confident about the methods being used to teach students how to report and write effective stories for publication. I focus on key components in professional journalism: following an inverted pyramid structure, students are taught to construct articles using a lede, quotes, a nut graf, transitions, and a kicker. Students assess published articles from established newspapers (The New York Times, San Francisco Chronicle, The Guardian, etc), noting these components and practicing through emulation. The high success rate also represents the effective style of the journalism lab where staff reporters, editors and the editor-in-chief along with the instructor work collaboratively, sharing drafts and giving feedback prior to publishing pieces. For the student who was not successful, this is a more a matter of bad ¿œstudenting¿œ behavior, which suggests that I could incorporate more support along these lines in class. Given the success of this assessment and our practices, I'll assess a different topic next round.

Plan for topic "Students completing JRNAL-127 will be able to demonstrate growing mastery in using a variety of methods and media to create journalistic products that demonstrate good news judgment, appropriate sourcing, accuracy and completeness, and adherence to technical and style rules.": 2016/17

One of the two students who did not successfully finish his project had chronic difficulty remembering to complete his online quizzes. For spring 2018, I am moving staff planning and discussion of upcoming assignments to Canvas in order to promote more engagement with the online units.

Plan for topic "Students completing JRNAL-127 will be able to demonstrate good work habits, time management and professionalism while collaborating with others to produce a journalistic product.": 2016/17

Students continuing into News Production II were generally well-motivated and responsible. Some work needs to be done in this area, but mostly to get rookies to establish good habits.

Plan for topic "Students completing JRNAL-127 will be able to collaboratively produce a news product, such as a newspaper or website, that demonstrates good news judgment, awareness of audience and community needs, and technical skill.": 2016/17

I need to continue to work on a rubric to assess the online elements.

Plan for topic "Students completing JRNAL-127 will be able to demonstrate growing mastery in using a variety of methods and media to create journalistic products that demonstrate good news judgment, appropriate sourcing, accuracy and completeness, and adherence to technical and style rules.": 2013/14

A better method for capturing print design elements needs to be developed. They are archived physically in the newsroom and on Issuu.com, but the identity of the specific designer is not recorded in these archives.
Plan for topic "Students completing JRNAL-127 will be able to demonstrate good work habits, time management and professionalism while collaborating with others to produce a journalistic product.": 2013/14

No action necessary.

Plan for topic "Students completing JRNAL-127 will be able to collaboratively produce a news product, such as a newspaper or website, that demonstrates good news judgment, awareness of audience and community needs, and technical skill.": 2013/14

No action.
### DVC Instructional Course SLO Action Plans

| 905. News Production Portfolio Development [JRNAL-128] belonging to Journalism [JRNAL] |
| Plan for topic "Students completing this course will be able to produce a more complex journalistic project that would be appropriate to use as a work sample in a job application." | 2017/18 |
| Keep getting students started on this early; require regular progress updates. |

| Plan for topic "Students completing JRNAL-128 will be able to demonstrate good work habits, time management and professionalism while collaborating with others to produce a journalistic product." | 2014/15 |
| This assessment worked well and we are happy with the results. A new topic for assessment should be created before the next assessment. |
906. Multimedia Reporting [JRNAL-130] belonging to Journalism [JRNAL]

Plan for topic "Students completing this course will be able to use common digital tools to produce simple news and feature stories incorporating audio or video, blog or social media posts."

This course was not offered in FA 19. The previous instructor (who was supposed to assess it in FA18) left DVC without doing so. The course will be assessed and reported the next time it's offered.

Plan for topic "Students completing this course will be able to use common digital tools to produce simple news and feature stories incorporating audio or video, blog or social media posts."

This was a small cohort from the first time the course was offered. The instructor thinks having a couple of iPads, iPods or Android tablets would help students who don't have access to a personal smartphone. Note: It is still possible to tweet from a basic cell phone, but it is more difficult and requires more setup steps.

Plan for topic "Students completing the course will be able to analyze the structure of a feature.": 2012/13
No action necessary; method of instruction appears effective.

Plan for topic "Students completing the course will be able to write a feature story that is suitable for publication.": 2012/13
During discussion of results with the instructor, he observed that, whereas feature writing is often an intermediate level writing class in four-year programs, many of our students seem to lack the basic English grammar and composition skills necessary to succeed in this class. The current course advisory is that English 118 or the equivalent is recommended. The instructor and department chair believe this should probably be increased to "Recommended: Eligibility for English 122." The lack of reading and writing preparation may also be affecting students' ability to persist in an online-only class, as reflected in the late-term sample size. The instructor and the department chair are discussing whether to return the class to face-to-face meetings.

Plan for topic "Students completing the course will be able to critique the work of peers.": 2012/13
No action is required on the assessment topic, but the size of the cohort raises concerns about persistence in this online-only class.

Plan for topic "Students completing the course will be able to analyze the legal and ethical dilemmas faced by feature writers.": 2009/10
No change.

Plan for topic "Students completing the course will be able to analyze the structure of a feature.": 2009/10

DVC Instructional Course SLO Action Plans

910. Topics in Kinesiology Theory [KINES-150] belonging to Kinesiology, Athletics and Dance [KINES]

Plan for topic "Students completing KINES-150A will be able to successfully pass a practice performance exercise specialist exam in preparation for a national certification with a national certifying body such as the National Academy of Sports Medicine (NASM)."

2016/17

The students in this course all succeeded in passing the final exam by surpassing the national threshold standard. One of the concerns voiced by students was a lack of hands-on application for functional reinforcement of some activities. Adding this component to some areas of the course would assist students in better understanding application and retaining the performance strategies.

Plan for topic "Students completing KINES-150A will be able to successfully pass a practice performance exercise specialist exam in preparation for a national certification with a national certifying body such as the National Academy of Sports Medicine (NASM)."

2013/14

The final exam scores were a disappointment, especially since the final exam is supposed to be a "practice" exam for the actual national exam which requires a score of 70% or higher to pass and become nationally certified as a corrective exercise specialist. This is a once a week class and I believe that there was too much time between class sessions which may have allowed the students too much time between classes and coursework to get lost, behind or forget about the homework requirements. The fact that 4 students did not show up for the final exam is concerning. I believe the best plan of action would be to shorten the class and add a second class session each week...for example MW or TTH, instead of just Monday nights.
Plan for topic "Students completing the course will be able to apply a variety of research methods to locate and use appropriate information from various sources.": 2018/19
Overall, this cohort suggests that students are developing the skills needed to successfully complete an 8-10 page review of literature paper on a kinesiology-specific topic. However, data pertaining specifically to the online sections, provides an indication that students may benefit from more instruction and a support for this assignment. Four instructors teach online sections of the course. As a result of this SLO assessment, we will develop additional methods of instruction, in particular for our online sections, relative to identifying an appropriate topic, locating scholarly research studies, evaluating studies, and accurately writing/paraphrasing/citing in APA format.

Plan for topic "Students completing the course will be able to assess the importance of physical activity in our daily lives (e.g. recreation, self-expression, health, competition, etc.).": 2015/16
This topic had not been previously assessed. Therefore, it was useful to the instructor to evaluate the students’ success with this assignment. The results indicate that the students are successfully making the connections between the importance of physical activity described through the textbook/lectures and their personal physical activity experiences. As potential kinesiology majors, it is important that they have an awareness of, and appreciation for, the myriad of ways physical activity is significant in our lives. As a result of the assessment, I will continue to utilize this assignment with future classes.

Plan for topic "Students completing the course will be able to apply a variety of research methods to locate and use appropriate information from various sources.": 2011/12
There were quite a few students who did not take all three quizzes, which drug down their combined performance score. If the data is removed for those who did not complete all three quizzes, 86% of students achieved 70% or above on the quizzes. So it seems the biggest necessity is to emphasis the importance of being present for the quizzes.
Plan for topic "Students completing the course will be able to compare and contrast a variety of sport and recreation management career options.": 2016/17

The SLO plan in place was very successful and this is the first time this particular SLO has been assessed for this course (KINES 220)... The next time this particular SLO is assessed I will probably add salary ranges and vocational demand to what exists presently for this student learning outcome.

Plan for topic "Students completing the course will be able to discuss current trends in sport that affect the profession of sport and recreation management."": 2013/14

Due to the continuing success of students in this course, instructor is going to assess a different objective in the next assessment cycle.
### Plan for topic "Students completing KINES-222 will be able to Experience practical experience in a sport or related athletic field that they previously had no initial interest in."

<table>

<td>In the future I will have the students describe, create and implement strategies for a topic in which they have no experience to create added interest and possibly open new avenues for the students to explore</td>
<td></td>
</tr>
</tbody>
</table>
Plan for topic "Students completing this course will be able to discuss various ways of enhancing a resume in the workforce as they attempt to enter a graduate or professional program."

This could be an ever changing list of tasks or jobs. What might be a solid way to build a resume in 2018, might not be as recognized in 2019. I need to make sure the speakers that I am choosing for this topic are on the cutting edge of this trend, and not relying on memory of what they did "three to four" years ago. I can also compile a data base to let the students know the success rate of each outlined task or job.

Plan for topic "Students completing the course will be able to write a resume."

I think the big change I am going to do for this assessment is the following. The assessment currently reads. "Students completing this course will be able to write a resume". I think moving forward I am going to have the students write a resume on a medical or fitness career of their choosing.

Plan for topic "Students completing the course will be able to discuss the differences and similarities of the medical and fitness careers presented in class."

I need to continue to make sure that I continue to point out the differences between the careers after the speaker has spoken. For instance I need to pont out what is different between a physical therapist and athletic trainer, the difference between nurses and MDs. And to relate these differences to the things that they student is going to be tested on the careers education, cost of education, length of education, pros and cons of the profession, income that can be expected, day in the life, any prerequisites needed on getting into the school of that profession.

Plan for topic "Students completing the course will be able to discuss proper interviewing techniques."

Need to make sure that the speaker I had to talk about proper interview techniques does not cancel out at last second and leave me in a jam.

Plan for topic "Students completing the course will be able to write a resume."

Clearly I need to make sure the students are aware of what I am looking for in a resume. I need to spend more time in class going over resume development and going so far to bring in a speaker who deals with resume development.
Plan for topic "Students completing the course will be able to perform a full body massage.": 2017/18
I think I can go in a couple different directions with this assessment. In the process of teaching these remedial massages, I could discuss the acute treatment of these specific injuries, even if it was a simple technique as RICE. In addition it might also be possible to instruct the student on a specific rehabilitation program for these injuries. These treatment of acute injuries and rehabilitation tasks could be added to the existing rubric quite easily if needed in the future.

Plan for topic "Students completing the course will be able to demonstrate a variety of massage techniques.": 2014/15
The results are outstanding. So the question is how do I make it better. Perhaps adding an additional massage technique making it six versus five. Or perhaps asking for a physiological response to the massage technique which will certainly make it harder.

Plan for topic "Students completing the course will be able to demonstrate a variety of massage techniques.": 2012/13
Continue in which the techniques are taught to the class.

Plan for topic "Students completing the course will be able to identify important muscle skeletal anatomy.": 2012/13
Continue to stress the importance of anatomy in Sports Massage. Still try to make it fun and not to difficult as if it is too hard many of the students drop the class, as this is not what they thought sports massage was going to consist of in taking the course.

Plan for topic "Students completing the course will be able to perform a full body massage.": 2012/13
Continue to put an emphasis on a full body recovery massage and allow the students two weeks in class to perform this massage on each other.

Plan for topic "Students completing the course will be able to demonstrate a variety of massage techniques.": 2009/10
Midterm seemed to be too lengthy and contained too much information. Perhaps it would be better for student retention to offer 2 midterms with the information split in half.

Plan for topic "Students completing the course will be able to identify important muscle skeletal anatomy.": 2009/10
The advent of an adequate skeleton in class and/or diagram posters would be very beneficial for the students and their learning of anatomical bony landmarks. Both are needed and are purposed to be ordered for the Fall 2010 term.

Plan for topic "Students completing the course will be able to perform a full body massage.": 2009/10
No modifications needed at this time.
### Plan for topic "Describe the stages of healing and the basic treatment options appropriate for each stage."

2016/17

It is clear from looking closely at specific questions in the assignment that the students in general had a clear idea of what happens during each stage of the healing process, but were less clear on the application of treatment options during each stage. I will update the students lecture outlines to provide a more specific review of the material and devote extra time to the section on treatment concepts. I will also go back and look at the results of a 13-point written question on the second midterm which covers much, but not all, of the material from the assignment. This test comes after the inflammation assignment and both the assignment and the thorough review we do of the assignment could be considered preparatory to the exam and the students could indeed be successfully learning the material at the timeframe of the second exam.

### Plan for topic "Students completing the course will be able to appropriately apply preventative taping"

2016/17

Students do well on this SLO. Will plan to evaluate another SLO during the next cycle.

### Plan for topic "Students completing the course will be able to identify basic anatomical structures and describe their significance"

2016/17

Students do well on this SLO. Will plan to evaluate a different SLO during the next cycle.

### Plan for topic "Describe the stages of healing and the basic treatment options appropriate for each stage."

2013/14

As the majority of students met this student learning objective, we will not make significant changes at this time

### Plan for topic "Students completing the course will be able to appropriately apply preventative taping"

2013/14

As 96 percent of students met this student learning objective, there are no plan to make any significant changes at this time.

### Plan for topic "Students completing the course will be able to identify basic anatomical structures and describe their significance"

2012/13

Since 85% of students met this student learning objective, there are no plans to make significant changes at this time.
Plan for topic "Students completing the course will be able to distinguish between anatomical landmarks while palpating and describe the significance": 2018/19

91% well exceeds the our criteria of 70%. Based on the high pass rate, which replicates that of the previous assessment (95%), our current approach of 2 anatomical lectures and several sessions of palpation demonstration and practice in laboratory seem to be serving the students well and helping them meet this objective. Will consider assessing a different topic the next time assessment is due.

Plan for topic "Students completing the course will be able to perform evaluative tests for common injuries and appropriately analyze the results.": 2018/19

96% well exceeds the our criteria of 70%. Based on the high pass rate, which replicates that of the previous assessment (95%), our current approach of multiple lectures with evaluation components lectures and several sessions of demonstration and practice of evaluative tests in laboratory seem to be serving the students well and helping them meet this objective. Will consider assessing a different topic the next time assessment is due.

Plan for topic "Students completing this course will be able to relate principles of tissue healing to the rehabilitation of injuries.": 2018/19

There was a very high pass rate with this assessment method for this topic. We will continue to use the same pedagogy. This was the first assessment of this topic, so may confirm results during the next assessment with a different cohort or possibly consider assessing a different topic during the next assessment.

Plan for topic "Students completing the course will be able to distinguish between anatomical landmarks while palpating and describe the significance": 2015/16

Based on the high pass rate, our current approach of 2 anatomical lectures and several sessions of palpation demonstration and practice seem to be serving the students well and helping them meet this objective.

Plan for topic "Students completing the course will be able to perform evaluative tests for common injuries and appropriately analyze the results.": 2015/16

Based on the high pass rate, our current approach of a lecture and several sessions of demonstration and practice performing special tests seem to be serving the students well and helping them meet this objective.

Plan for topic "Students completing the course will be able to monitor rehabilitation programs for individuals with orthopedic injuries.": 2015/16

Based on the high pass rate, our current approach of several lectures that discuss rehabilitation techniques and several sessions of demonstration and practice performing rehabilitative exercises seem to be serving the students well and helping them meet this objective.
Plan for topic "Students completing the course will be able to distinguish between anatomical landmarks while palpating and describe the significance": 2012/13

| Since 100% of students met this student learning objective, there is no plan to make significant changes |

Plan for topic "Students completing the course will be able to perform evaluative tests for common injuries and appropriately analyze the results.": 2012/13

| Since 100% of students met this student learning objective, no significant changes are planned at this time. |

Plan for topic "Students completing the course will be able to monitor rehabilitation programs for individuals with orthopedic injuries.": 2012/13

| Since 100% of students met this objective, there are no plans to significantly alter the course |
### Plan for topic "Students completing the course will be able to apply prophylactic and post-injury tape.": 2018/19

This taping module has a high success rate so the current strategies of demonstration, guided practice and written instructions prove to be sufficient.

### Plan for topic "Students completing the course will be able to manage a variety of wounds.": 2018/19

There is a high percentage of students passing this skill and the methods of written instruction and additional text resources, oral discussion/quizming and demonstration will continue with an emphasis on clinical application during clinic work hours.

### Plan for topic "Students completing the course will be able to apply prophylactic and post-injury tape.": 2015/16

This is a high percentage of students passing this module and we will continue to use the same strategies of demonstration, guided practice and discussion to help students succeed.

### Plan for topic "Students completing the course will be able to manage a variety of wounds.": 2015/16

This is a high percentage of students passing this module and we will continue to use the same strategies of demonstration, guided practice and discussion to help students succeed.

### Plan for topic "Students completing the course will be able to assist in the management of acute injuries.": 2015/16

This is a high percentage of students passing this module and we will continue to use the same strategies of demonstration, guided practice and discussion to help students succeed.

### Plan for topic "Students completing the course will be able to apply prophylactic and post-injury tape.": 2012/13

As all students met this student learning objective - no action to be taken at this time.

### Plan for topic "Students completing the course will be able to manage a variety of wounds.": 2012/13

As all students met this student learning objective - no action to be taken at this time.

</table>
Plan for topic "Students completing this course will be able to palpate anatomical structures." 2018/19:

The students were successful completing this module, but the addition of more anatomical text resources would be encouraged as students often obtained their information from the internet.

Plan for topic "Students completing this course will be able to integrate a variety of evaluative techniques to assess musculoskeletal injuries": 2015/16

While a relatively low percentage, the "n" is very small e.g. one additional passing student would create a 83% pass rate. The current strategy of demonstration, discussion and guided practice that we use for the other modules have been successful and so we will continue to monitor and make alterations.

Plan for topic "Students completing this course will be able to discuss the indications and contraindications of common over-the-counter medications." 2015/16:

Obviously this is a high percentage of students passing this module and we will continue to use the same strategies of demonstration, guided practice and discussion to help students succeed.

Plan for topic "Students completing this course will be able to palpate anatomical structures." 2015/16:

This is a high percentage of students passing these modules and we will continue to use the same strategies of demonstration, guided practice and discussion to help students succeed.

Plan for topic "Students completing this course will be able to describe the three stages of healing and discuss the appropriate activities for each stage." 2012/13:

As all students met this student learning objective - no action to be taken at this time.

Plan for topic "Students completing this course will be able to describe and monitor basic therapeutic exercises." 2012/13:

As all students met this student learning objective - no action to be taken at this time.

Plan for topic "Students completing this course will be able to assist in the design of basic exercise programs for uncomplicated injuries." 2012/13:

As all students met this student learning objective - no action to be taken at this time.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to describe the three stages of healing and discuss the appropriate activities for each stage": 2018/19

| Plan for topic "Students completing this course will be able to describe the three stages of healing and discuss the appropriate activities for each stage": 2018/19 |
| All students met the learning objectives. Additional text resources could be added to aid in student research of this topic. |

Plan for topic "Students completing this course will be able to design a rehabilitative program for a given injury that takes physiology of healing into consideration": 2018/19

| Plan for topic "Students completing this course will be able to design a rehabilitative program for a given injury that takes physiology of healing into consideration": 2018/19 |
| Students were successful at completing this module however an additional assignment was added to create a general hamstring rehabilitation as a template to use in the clinic. This successfully engaged the student and was useful to students in other modules. This type of additional assignment may be employed in the future. |

Plan for topic "Students completing this course will be able to describe the three stages of healing and discuss the appropriate activities for each stage": 2015/16

| Plan for topic "Students completing this course will be able to describe the three stages of healing and discuss the appropriate activities for each stage": 2015/16 |

| Plan for topic "Students completing this course will be able to design a rehabilitative program for a given injury that takes physiology of healing into consideration": 2015/16 |
| This is a small "n" and the results can be attributed to that small number of students. The small "n" also gives us insight into these students in question and the 3 students who did not pass the module were all changing majors and they had enough points to get the grade they wanted so they didn't turn in a final revision. We have added additional guided time for completion of this module to increase student success a week of discussion, a second week that culminates in the presentation of the first draft of their program and a final week for revisions based on feedback from the initial presentation. We will continue to monitor to see if this was the anomaly it appears to be. |

Plan for topic "Students completing this course will be able to demonstrate and discuss a variety of rehabilitative exercises": 2015/16

| Plan for topic "Students completing this course will be able to demonstrate and discuss a variety of rehabilitative exercises": 2015/16 |
| While a relatively low percentage, the "n" is very small e.g. one additional passing student would create a 80% pass rate. The current strategy of demonstration, discussion and guided practice that we use for the other modules have been successful and so we will continue to monitor and make alterations. |

Plan for topic "Students completing the course will be able to develop a conditioning program to improve conditioning levels for an individual of their choosing.": 2018/19

While slightly lower than 2015-16, they were consistent with the high pass rate of the previous assessment 90%-88% (n is half of 2015-16 due to decreased sections offered. This is a capstone assignment so the high pass rate is an important metric to assess and equally that the pass rate be high. Will continue to utilize the pedagogy we use to help students work through this assignment and we will monitor this metric.

Plan for topic "Students completing the course will be able to describe muscular anatomy and physiology and how muscles react to exercise both acutely and chronically": 2018/19

The success rate exceeded out goal of 70% success rate. The success rate was lower, but in the same range as the previous assessment. The slightly lower success rate may be due to a noticeably smaller n (nearly half the students). Will continue to track to determine if this is a trend or within the margin of error.

Plan for topic "Students completing the course will be able to describe how cardiovascular tissues react to exercise both acutely and chronically": 2018/19

Seems as if the alteration of how we present this material and improvements in their lecture outlines as assisted in increasing success from the 2015-16 assessment. Will consider looking at a different methodology for assessing this topic or moving to a different topic

Plan for topic "Students completing this course will be able to describe muscular anatomy and physiology and how muscles react to exercise both acutely and chronically": 2018/19

We barely exceeded our criteria for this metric. It was a relatively small n, and it also isn't as high a success rate as our metric utilizing the written assignment (which looks at a slightly different set of variables within this topic). So taking a repeated look at this will be important to establish a more direct cause and effect. It is important to note that there was a clear delineation between students with most far exceeding or being far below the C grade, so more time might need to be devoted to a subset of students.

Plan for topic "Students completing the course will be able to develop a conditioning program to improve conditioning levels for an individual of their choosing.": 2015/16

The stepwise progression that we utilize and the small assignments we utilize along the way seem to help the students succeed and I will continue to utilize this schema

Plan for topic "Students completing the course will be able to describe muscular anatomy and physiology and how muscles react to exercise both acutely and chronically": 2015/16

The level of success was relatively high, but could be higher. However there is testing that occurs after this assignment and we go over the assignment in class and probably a more accurate method of evaluating this outcome will be the test questions related to muscular adaptations to training and this would illuminate if the methodology I utilize in

<tr>
<td>Students completing the course will be able to describe how cardiovascular tissues react to exercise both acutely and chronically</td>
<td>2015/16</td>
<td>While 71% is acceptable, there is certainly room for improvement. When looking more closely at the responses the confusion appears not so much between what is a response vs an adaptation, but whether it is one or the other vs neither. In my lecture outlines (as well as lecture), I need to create a section that delineates the common areas of confusion and what things don't occur.</td>
</tr>
<tr>
<td>Students completing the course will be able to develop a conditioning program to improve conditioning levels for an individual of their choosing</td>
<td>2012/13</td>
<td>Since nearly 89% of students passed the assignment, there are no plans to make significant changes to the course.</td>
</tr>
<tr>
<td>Students completing the course will be able to describe muscular anatomy and physiology and how muscles react to exercise both acutely and chronically</td>
<td>2012/13</td>
<td>Since nearly 80% percent of students met this student learning objective, no significant changes are planned</td>
</tr>
<tr>
<td>Students completing the course will be able to describe how cardiovascular tissues react to exercise both acutely and chronically</td>
<td>2012/13</td>
<td>While passing, there is still room for improvement and will give students in class practice on this topic and see if scores improve. Will reassess in a year's time.</td>
</tr>
<tr>
<td>Plan for topic</td>
<td>Outcome</td>
<td>Year</td>
</tr>
<tr>
<td>----------------</td>
<td>---------</td>
<td>------</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to describe technique points of a variety of exercises.&quot;</td>
<td>2016/17</td>
<td>This has thus far been the best method in assisting students to gain hands on experience in a simulated &quot;real life&quot; situation in which they need to trouble shoot assessments results and create appropriate fitness plans or alternatives for clients.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to conduct physical fitness testing and evaluate the results.&quot;</td>
<td>2014/15</td>
<td>The fact that students just assumed that their partner/client knew what to do, how to do it and for how long, etc was interesting. The instructor had to be much more diligent in explaining the roles and what was supposed to occur with each role (trainer or client) as well as making it clear that this process in understanding the material was imperative since this is what will happen in the real world of employment when assessing clients or athletes. There will be several peer reviewed on line group assignment added to this course to better involve students in both sides of the teaching/learning of assessment. It is important that students understand how an assessment is conducted, but also equally important that they understand what it takes to physically complete an assessment.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to conduct physical fitness testing and evaluate the results.&quot;</td>
<td>2011/12</td>
<td>Since these assessment tests will most likely be part of these students future jobs, this was a good reality fitness (or lack of) situation for them to experience what or not their clients may experience in the future and that will allow for them to plan how to respond and plan for their client(s) fitness needs both physically and mentally.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to describe basic physiological principles of a muscle contraction.&quot;</td>
<td>2011/12</td>
<td>I believe that towards the end, some student were not reading the labs ahead of time, so would come to class confused without knowing what to do. There is some instruction in the beginning of the laboratory activity, but if the student has not read the lab ahead, they will be lost as there is not enough time to read the lab and perform the tasks in 75 min. These labs are completed early on in the term, so attendance was not an issue.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to describe technique points of a variety of exercises.&quot;</td>
<td>2011/12</td>
<td>Attendance and participation is key for these labs. Students who did not attend regularly were the ones who struggled. Students do receive points for attendance. Perhaps highlighting this information in the syllabus as well as verbally reinforcing it several times through out the unit may be helpful.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to conduct physical fitness testing and evaluate the results.&quot;</td>
<td>2011/12</td>
<td>Since these assessment tests will most likely be part of these students future jobs, this was a good reality fitness (or lack of) situation for them to experience what or not their clients may experience in the future and that will allow for them to plan how to respond and plan for their client(s) fitness needs both physically and mentally.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to describe basic physiological principles of a muscle contraction.&quot;</td>
<td>2009/10</td>
<td>Those who did not obtain a passing grade on the lab did not read the lab before class. Emphasis needs to be placed on reading material prior to class.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to describe technique points of a variety of exercises.&quot;</td>
<td>2009/10</td>
<td>Better audio-visual resources (and availability for use outside of class to the students) would have helped students who struggled with understanding and reporting exercise technique points.</td>
</tr>
</tbody>
</table>
| "Students completing the course will be able to conduct physical fitness testing and evaluate the results." | 2009/10 | Participation and attendance during the exercise testing portion of class was very good as well as student participation. Once again, reading labs prior to class needs to be
reinforced.
Plan for topic "Students completing the course will be able to evaluate the role of the sport and exercise experience in health, wellness, and psychological development.": 2017/18

This was an unusually small cohort for this course. Therefore, it is difficult to put much weight into these results. For this assessment, 91% of the students achieved the established standard for the topic. Since the assignment asks them to make personal connections to the relationship between their levels of physical activity and their psychological health, wellness and development, it appears to help them thoroughly understand this topic.

Plan for topic "Students completing the course will be able to evaluate the role of the sport and exercise experience in health, wellness, and psychological development.": 2014/15

This assignment of a "reflection" essay is the third time they complete it during the semester. The previous two are on different topics however. Therefore, the students have received feedback on previous essays and have a thorough understanding of the connections they need to make with their connections to the topics of health, wellness and psychological development. I believe that this explains the consistent student success on this assessment. The results indicate that no changes are necessary for improvement for this assessment topic. Future assessment can focus on a different topic.

Plan for topic "Students completing the course will be able to discuss contributing factors to performance, such as personality, motivation, group dynamics, etc.": 2011/12

The students’ responses to the essay question indicate that they can successfully discuss the benefits and risks of utilizing personality tests as a means for team selection. I will continue utilize the methods of lecture, class discussion to effectively address this topic.
The results indicate that students were successful in analyzing relationships between sport and gender, race, and socioeconomic status. Nonetheless, I would like to continue to challenge students' understanding of sociological issues in sport by incorporating into this assignment sociological theory/theories (Functionalist, Conflict, Critical, and Feminist) that would be appropriate for framing a discussion of the topics/themes addressed in the film/documentary. These theories are introduced early in the semester and I believe it would tie the semester together by revisiting them for this assignment.
Plan for topic "Students completing the course will be able to develop an appropriate conditioning program to improve fitness levels utilizing the Optimum Performance Training (OPT) model." 2017/18

Spring 2019 will be a first attempt at hybriding this course and using more of class time (once a week) for group discussions and peer feedback/interaction. More of the instruction will be online based and self paced for the student. and student needs in successfully completing assignments/projects that relate to creating fitness programs for clients.

Plan for topic "Students completing the course will be able to develop an appropriate physical conditioning program for a special population/special needs person with the intention to improve overall fitness utilizing the Optimum Performance Training (OPT) model." 2017/18

Spring 2019 will be a first attempt at hybriding this course and using more of class time (once a week) for group discussions and peer feedback/interaction. DVC Instructional Course SLO Action Plans

928. Professional Aspects of Group Personal Training [KINES-252] belonging to Kinesiology, Athletics and Dance [KINES]

Plan for topic "Students completing the course will be able to pass a national certification (ACE/AFAA)"; 2018/19

Some changes were made to the mode and order of class instruction this term. The class was loaded more academically in the first 8 weeks and then loaded more towards practice and performance in the second 8 weeks to help assimilate the academic knowledge into practical knowledge. The idea was to enhance the reinforcement of academic knowledge though application. Students appeared to respond well to this style of instruction and it is supported by their success on the GPTS exam.

Plan for topic "Students completing the course will be able to...exhibit professional behavior.

a) Problem-solving

b) Autonomy with choreography and movement"; 2015/16

Continue to broaden the learning environment to better reflect DVC's strategic plan for student success by using further contextual theory strategies, as well as embarking on concepts in student equity.

Plan for topic "Students completing KINES-252 will be able to Apply guidelines for group exercise class segments to routines/sessions as well as movement tempo options and verbal cues with or without music."; 2012/13

I plan to refine the rubric and make the criteria less broad and general. I also plan to add criteria in how the students markets their group session and successfully captures participants per their class descriptions and criteria (creativity).
Plan for topic "Students completing this course will be able to develop appropriate short term and long term fitness goals for clients per objective assessments taken at the beginning of the term.": 2016/17

Instructor will create a lesson that visually and kinesthetically demonstrates the triangular relationship between assessments, goals and program design content and how they all affect each other and outcomes therein. Assessment lead to goal creation and goals lead to the type of program design being implemented which leads (in theory) to improved assessment outcomes.

Plan for topic "Students completing the course will be able to Apply appropriate personal training variables in accordance with the optimum Performance Training (OPT) model as defined by the National Academy of Sports Medicine (NASM).": 2014/15

This is a clear indication that the instructor needs to put more emphasis on this portion of the prerequisite course KINES 250 and the application and development of assessments in relation to program design development.

Plan for topic "Students completing the course will be able to Develop systematic assessments to obtain subjective and objective data about their clients.": 2011/12

One thing that I observed is that students who had successfully completed PETHE 291 or who were already NASM certified were much more at ease at completing this task. This supports our requirement that one of these two items be fulfilled in order to participate in PETHE 294 (personal training internship)

Plan for topic "Students completing the course will be able to Apply appropriate personal training variables in accordance with the optimum Performance Training (OPT) model as defined by the National Academy of Sports Medicine (NASM).": 2011/12

Once again, this was a clear demonstration that student need to have completed PETHE 291 or be NASM certified prior to enrolling in PETHE 294 (personal training internship)

Plan for topic "Students completing the course will be able to create personal training programs for various stages of strength and training systems.": 2011/12

None at this time.
### 930. Practical Experience in Personal Training and Fitness Instruction II [KINES-255] belonging to Kinesiology, Athletics and Dance [KINES]

#### Plan for topic "Students completing the course will be able to execute personal training programs for various stages of strength and training systems.": 2016/17

|Though students were successful in creating the progressive exercises, some of the activities were too progressive/difficult and therefore needed to be regressed so that the client could successfully complete at a level that still challenged them physically and proprioceptively more than the demand of the original activity. Further ab instruction on this topic will be implemented in pre-requisite courses.|

|Plan for topic "Students completing **KINES-255** will be able to Create quantitative and measurable goals that are appropriate for clients based on both subjective and objective assessment data.".: 2014/15|

|Before students complete and turn in their goal assignment, they will peer review and give constructive feedback/suggestions to each other on-line in randomized groups.|

#### Plan for topic "Students completing the course will be able to create quantitative and measurable goals that are appropriate for clients based on both subjective and objective assessment data.".: 2014/15

None at this time.

#### Plan for topic "Students completing the course will be able to employ a systematic assessment to obtain objective information about clients.".: 2011/12

None at this time.

#### Plan for topic "Students completing the course will be able to administer appropriate personal training variables in accordance with the Optimum Performance Training (OPT) model as defined by the National Academy of Sports Medicine (NASM).": 2011/12

None at this time.

#### Plan for topic "Students completing the course will be able to execute personal training programs for various stages of strength and training systems.".: 2011/12

None at this time.
DVC Instructional Course SLO Action Plans

931. Theory & Practice of Performance Exercise Training & Exam Prep. [KINES-256] belonging to Kinesiology, Athletics and Dance [KINES]
Plan for topic "Students completing this course will be able to:

Demonstrate how a goniometer can be used to measure joint range of motion for corrective exercise strategies.": 2018/19

This class had not been offered since Spring 2017 and will be assessed the next time it is offered.

Plan for topic "Students completing this course will be able to:

Demonstrate how a goniometer can be used to measure joint range of motion for corrective exercise strategies.": 2015/16

In the future, the instructor will cover protocol for reading measurements on the instrument in addition to demonstrating how to place and measure a joint angle.
Plan for topic "Students completing the course will be able to exhibit professional behavior."

a) Problem-solving
b) Participation on a team": 2016/17

Students need to develop a basic understanding of assessments and criteria for special population and/or general population program design. Simply reading the information was not a successful method in developing this professional behavior in the past. Hands on activities and specific study methods (writing the outlined information in a chart, cooperative group methods and flashcards) were successful strategies for this cohort and will be methods we continue to use in this course.

Plan for topic "Students completing KINES-258 will be able to successfully pass a practice national personal training exam in preparation for a national certification with the National Academy of Sports Medicine (NASM).": 2013/14

Focusing on the needs and success aspects of the individual student and what motivates them. Concentrating on the work and assignments that utilize their strengths while providing encouragement in the correct way for each individual and focusing on assignments that utilize their strengths to absorb and retain material pertinent to successfully passing the NASM exam.

Plan for topic "Students completing the course will be able to successfully pass a practice national personal training exam in preparation for a national certification (NASM or AFAA).": 2009/10

More emphasis needs to be placed on certain areas of the exam that seem to be more challenging for students.

Plan for topic "Students completing the course will be able to exhibit professional behavior."

a) Problem-solving
b) Participation on a team": 2009/10

There seemed to be a motivation and maturity deficiency in those students who did not achieve the benchmark of problem solving and team participation. There may need to be more emphasis put on the importance to work as a team player when trying to problem solve.
### DVC Instructional Course SLO Action Plans

**Plan for topic "Students completing the course will be able to discuss methods of building a program for school and community.": 2018/19**

This class has not been offered since Fall 2016. It will be assessed the next time it is offered.

**Plan for topic "Students completing the course will be able to utilize appropriate instructional methods for teaching fundamental individual sport skills and strategies.":: 2015/16**

This was the first time of assessing outcome #1. Although the outcome was achieved, I will work with students when signing up for their teaching demonstration. I will notify students in class of their upcoming deadline to ensure that they will be in class. For the upcoming fall 2016 semester, I will adjust my outline to add another day for evaluating all teaching demonstrations.

**Plan for topic "Students completing the course will be able to design practice sessions for an individual sport, using appropriate instructional methods.":: 2012/13**

Although the outcome was achieved, students will be given more opportunity to learn, utilize and apply said outcome in a variety of methods throughout the semester.
Plan for topic "Students completing the course will be able to utilize appropriate instructional methods for teaching fundamental team sport skills and strategies.": 2017/18

This course has not been offered since Spring 2017. Will be assessed at next offering.

Plan for topic "Students completing the course will be able to design practice sessions for a team sport, using appropriate instructional methods.": 2014/15

Since only 63% of the class were able to achieve success and develop practice sessions for a sport of their choice, this assignment will be modified. Students will be instructed to develop their practice plans according to time of season; pre-season, in-season, and off season. More in class time will be spent on this assignment.

Plan for topic "Students completing the course will be able to utilize appropriate instructional methods for teaching fundamental team sport skills and strategies.": 2011/12

Students will be encouraged to seek out additional preparation time in the learning center and in classmate study groups.

Plan for topic "Students completing the course will be able to discuss methods of building a program for school and community.": 2011/12

Although the desired outcome was achieved, students will be encouraged to seek additional help writing their paper in the learning center.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to analyze and diagram a pass route concept to attack a 3 deep zone coverage.": 2017/18

This course should continue to use hudl and other software to incorporate examples of concepts discussed in class. Students should also continue to demonstrate their understanding through written assessment as well as on the whiteboard during class sessions.
Plan for topic "Students completing this course will be able to diagram a defensive pressure package to attack an offense.": 2017/18

Further coverage of pressure package information should continue to incorporate offensive rules to compromise, continued student diagrams through daily activities, quizzes and practice on the white board. Utilizing more film evaluation and examples of these concepts will continue to enhance the students' understanding of coordinated pressure/coverage concepts.
938. Occupational Work Experience Education in KINES [KINES-295] belonging to Kinesiology, Athletics and Dance [KINES]
DVC Instructional Course SLO Action Plans

939. Independent Study [KINES-298] belonging to Kinesiology, Athletics and Dance [KINES]
940. Student Instructional Assistant [KINES-299] belonging to Kinesiology, Athletics and Dance [KINES]

942. Intermediate Swimming [KNACT-100B] belonging to Kinesiology, Athletics and Dance [KNACT]

Plan for topic "Students completing KNACT-100B will be able to demonstrate appropriate stroke technique in the four competitive strokes.": 2016/17

The timing of the breath in the butterfly gave these students difficulty in demonstrating proficiency. Instructors will address this with specific breathing drills.

Plan for topic "Students completing KNACT-100B will be able to demonstrate appropriate stroke technique in the four competitive strokes.": 2013/14

Successful. More instruction may be needed on the short axis strokes.

Plan for topic "Students completing KNACT-100B will be able to apply knowledge of the rules, equipment use and safety methods to swimming participation.": 2013/14

Successful. More instruction on the use of safety equipment may be needed.

Plan for topic "Students completing KNACT-100B will be able to assess their swimming improvement and evaluate the affect on overall health and wellness.": 2013/14

Successful. Perhaps a better heart rate test is needed.
943. Beginning Aquatic Fitness [KNACT-102A] belonging to Kinesiology, Athletics and Dance [KNACT]

Plan for topic "Students completing the course will be able to demonstrate appropriate stroke techniques.": 2016/17

Instructors will include additional butterfly drills and technique and assess all four competitive strokes.

Plan for topic "Students completing the course will be able to improve cardiovascular fitness levels.": 2013/14

Student success has been from 84-93% in last three assessment cycles. This activity has shown to improve cardiovascular fitness. Therefore, instructors will assess another objective/outcome during the next assessment cycle.

Plan for topic "Students completing the course will be able to demonstrate appropriate stroke techniques.": 2012/13

No action needed.

Plan for topic "Students completing the course will be able to explain effective training principles.": 2012/13

No action needed.

Plan for topic "Students completing the course will be able to improve cardiovascular fitness levels.": 2012/13

No action needed.

### Plan for topic "Students completing the course will be able to demonstrate understanding of the history Hatha Yoga."

**Plan for topic "Students completing the course will be able to demonstrate understanding of the history Hatha Yoga."": 2016/17**

The success of the assignment appears to result from the fact that students were encouraged to focus on aspects of Hatha Yoga that interested them. In speaking with students about the paper, they consistently indicated that they were more enthusiastic to do the research. This is an approach that I will continue to use for the assignment as a result of the feedback received from the students and the data results. Since this topic has demonstrated consistent success, for the next SLO cycle I will assess another objective to determine the effectiveness of my teaching methods.

**Plan for topic "Students completing the course will be able to demonstrate understanding of the history Hatha Yoga."": 2013/14**

Changed the assignment to include the addition of "what they found most interesting". This increased their interest in the assignment and seemed to result in improving their understanding of the history of Hatha Yoga. As a result, I will continue this approach to the assignment.

**Plan for topic "Students completing the course will be able to demonstrate understanding of the history Hatha Yoga."": 2010/11**

None due to the success of the students.

**Plan for topic "Students completing the course will be able to demonstrate proficient asana positioning techniques."": 2010/11**

No modifications needed at this time.

**Plan for topic "Students completing the course will be able to prepare a daily personal yoga practice."": 2010/11**

Since the measurement criteria of 90% was not met for the spring 2010 assessment, we changed the teaching technique to begin writing the practice in class and helping each other. Re-wrote the assignment to be more succinct. This improved the success rate from 80% to 98%.

**Plan for topic "Students completing the course will be able to prepare a daily personal yoga practice."": 2009/10**

Since the measurement criteria of “90%” was not met for this SLO, consider adjusting the percentage to reflect a more realistic target.

Plan for topic "Students completing the course will be able to...Demonstrate classic yoga postures.": 2016/17

The results indicate that intermediate students are meeting the desired criterion for this topic. What I learned from this process is that, conducting the evaluation throughout the class period was disruptive to the class as a whole. For the future, I will organize the evaluation to occur during the last ten minutes of class (over several class sessions). Students were allowed multiple attempts to perform to the criterion level, which was a more positive learning experience and benefitted their success.

Plan for topic "Students completing the course will be able to demonstrate proficiently intermediate/advanced level yoga asanas and sequences.": 2016/17

The results indicate that intermediate students are meeting the desired criterion for this topic. What I learned from this process is that, conducting the evaluation throughout the class period was disruptive to the class as a whole. For the future, I will organize the evaluation to occur during the last ten minutes of class (over several class sessions). Students were allowed multiple attempts to perform to the criterion level, which was a more positive learning experience and benefitted their success.

Plan for topic "Students completing KNACT-110B will be able to Students completing this course will be able to demonstrate proficiently intermediate level yoga asanas and sequences.": 2016/17

The criteria for this objective was successfully achieved by reaching just above the desired 70% mark. As a result of the success, methods used to teach this objective will be continued. For the next cycle of SLO's for this course, I will focus on methods to benefit students' ability to successfully create and develop a personal yoga routine based on their personal needs.

Plan for topic "Students completing KNACT-110B will be able to Students completing this course will be able to demonstrate proficiently intermediate level yoga asanas and sequences.": 2013/14

The criteria for this objective was successfully achieved by reaching just above the desired 70% mark. As a result of the success, methods used to teach this objective will be continued. For the next cycle of SLO's for this course, I will focus on methods to benefit students' ability to successfully create and develop a personal yoga routine based on their personal needs.

Plan for topic "Students completing the course will be able to demonstrate proficiently intermediate/advanced level yoga asanas and sequences.": 2013/14

No modifications needed.

**Plan for topic "Students completing the course will be able to assess which poses (asanas) benefit specific areas of the body."**: 2008/9

Continue with current goals and assessment teaching methods of yoga asanas and their benefit.

**Plan for topic "Students completing the course will be able to...Assess which poses (asanas) benefit specific areas of the body."**: 2008/9

Continue with current goals and assessment teaching methods of yoga asanas and their benefit.
### Plan for topic "Students completing KNACT-110C will be able to correct the postures of beginning yoga students": 2016/17

From the results of the assessment, it is clear to me that more time needs to be spent with their ability to evaluate/critique others' yoga performance. Since the advanced section tends to be a relatively small group of students, my plan is to meet with each student individually during office hours to reinforce concepts presented in class. This will not only enhance their ability to meet this objective, but also positively influence their personal yoga practice. Additionally, I will provide them with more opportunities to lead in class, which will in turn, allow them to have more experience evaluating the performance of others.

### Plan for topic "Students completing KNACT-110C will be able to Learn to correct the postures of beginning yoga students.": 2013/14

The results suggest that this is a challenging objective. My plan to improve students' success with this topic is to develop a worksheet highlighting techniques for correcting postures. Also, I plan to pair-up advanced students with beginning students earlier in the semester, in order to allow for advanced students to have more practice with correcting postures.
Plan for topic "Students completing this course will be able to explain the basic history of yoga by completing a written summary.": 2016/17

All students were successful. Due to the fact that all the students evaluated were successful, a writing assignment is an acceptable form of evaluation. After review it was determined that the topic is too broad. The rigor and focus within the writing assignment needs to be increased. It should be more aligned into the sport & fitness aspects within the practice of yoga. For the next assessment a revision of the SLO will have students complete a writing assignment evaluating the topic of how the implementation of a yoga practice affects the training and/or outcomes for a specific sport or athletic activity.

Plan for topic "Students completing the course will be able to demonstrate stretch techniques": 2013/14

Many students were successful in constructing a beginning level pre-athletic event stretch program. A large portion were challenged with identifying the most effective stretches for their chosen sport or athletic activity. Instructor will address this more often through class discussions and providing more specific examples.

Plan for topic "Students completing the course will be able to demonstrate proficient hatha yoga asanas (poses) and stretching techniques.": 2013/14

Many students were successful in constructing a beginning level pre-athletic event stretch program. A large portion were challenged with identifying the most effective stretches for their chosen sport or athletic activity. Instructor will address this more often through class discussions and providing more specific examples.

Plan for topic "Students completing the course will be able to demonstrate proficient hatha yoga asanas (poses) and stretching techniques.": 2010/11

Most students were successful in demonstrating proficient hatha yoga asanas (poeses) and stretching techniques. Instructor will emphasize proper form and safety in addition to demonstrated of these techniques.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to demonstrate hatha yoga asanas (trans. Poses or postures)" : 2010/11
Most students were successful in demonstrating an improvement in flexibility. Those who were not successful initially and received high scores on a validated flexibility assessment.

Plan for topic "Students completing the course will be able to demonstrate an improvement in flexibility." : 2010/11
Most students were successful in demonstrating an improvement in flexibility. Those who were not successful initially and received high scores on a validated flexibility assessment.

Plan for topic "Students completing the course will be able to list and analyze hatha yoga asanas (poses) and/or stretches which benefit specific sports and/or physical activities." : 2010/11
Most students were successful in listing and analyzing hatha yoga asanas (poses) and/or stretches which benefit specific sports and/or physical activities. The instructor will utilize lecture, demonstration and add supplemental materials (hand-outs and DVD's) in order to emphasize the information.

Plan for topic "Students completing KNACT-114A will be able to Identify appropriate stretches for individualized sporting needs and construct a beginning level pre-athletic event stretch program." : 2009/10
2010-05-19: All students were successful and no modifications are necessary.
2010-06-14: All students were successful and no modifications are needed

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to analyze the history of yoga and its contribution to stretching, relaxation, imagery and focus techniques as well as yoga’s overall health benefits.": 2016/17

A writing assignment is a valid assessment technique and all students were successful. Upon review it was determined that the rigor and focus of the assignment needs to be increased and aligned more into the sport and fitness aspect. For the next assessment I recommend a revision of the SLO to have students analyze the use of yoga practices and its effects on stretching techniques, recovery techniques, and focus techniques in relation to a specific sport and/or fitness activity.

Plan for topic "Students completing KNACT-114B will be able to Evaluate appropriate stretches for individualized sporting needs and construct an intermediate level pre and post athletic event stretch program.": 2013/14

As with the beginning class, most students were successful in developing a stretching program and were challenged by the evaluation of stretches. Instructor to provide more in class opportunities to practice evaluating the most effective and appropriate stretches for various athletic activities.

</table>
Plan for topic "Students completing KNACT-122B will be able to analyze intermediate level improvement in muscular strength, muscular endurance, core stabilization and flexibility.": 2016/17

The Industry standard charts that are used for this class are easy for student understanding. Any clarification needed was provided by instructor. For future KNACT 122B classes, testing will also occur mid semester. This will assist those students that had difficulty understanding data.

Plan for topic "Students completing KNACT-122B will be able to analyze intermediate level improvement in muscular strength, muscular endurance, core stabilization and flexibility.": 2013/14

Instructor may implement more testing dates throughout the semester.
DVC Instructional Course SLO Action Plans

954. Beginning Hips, Thighs and Abs [KNACT-124A] belonging to Kinesiology, Athletics and Dance [KNACT]
Plan for topic "Students completing the course will be able to...

Describe the health benefits of increasing lean muscle mass and decreasing overall body fat percentage through exercise.": 2016/17

Having the student take part in the interpretation of their own results and the results of a partner helped to reinforce that they understand the process to calculate not only their own results, but the results of someone else. This (having someone else take part in the learning process) also helps eliminate bias in regard to how one perceives their health and fitness from what is actually factual.

Plan for topic "Students completing the course will be able to describe the health benefits of increasing lean muscle mass and decreasing overall body fat percentage through exercise.": 2016/17

Having the student take part in the interpretation of their own results and the results of a partner helped to reinforce that they understand the process to calculate not only their own results, but the results of someone else. This (having someone else take part in the learning process) also helps eliminate bias in regard to how one perceives their health and fitness from what is actually factual.

Plan for topic "Students completing KNACT-124AA will be able to Define fitness assessment activities for the cardiovascular system.": 2013/14

Many student had difficulty with the basic math applications of the cardiovascular calculation formulas. In some cases, they did not understand multiplication and percentage calculation processes and/or concepts, and in a few other instances, there was a distinct English language barrier between student, his or her classmates and instructor. In the future, I will review the formulas ahead of time with students before we collect data. I will also allow students to use calculators and have classmates or instructor walk small groups through the calculation process.

Plan for topic "Students completing the course will be able to..."  

Describe the health benefits of increasing lean muscle mass and decreasing overall body fat percentage through exercise.": 2010/11

Continue with verbal class discussions and interaction on this topic.

Continue with verbal class discussions and interaction on this topic.

Plan for topic "Students completing the course will be able to..."
Demonstrate appropriate exercise techniques to increase core strength.”: 2010/11
Continue with current assessments.

Plan for topic "Students completing the course will be able to...
Demonstrate an improvement in flexibility.”: 2010/11
Continue to encourage students to attend/participate in class on a regular basis so that they may achieve the outcomes as set forth.

Plan for topic "Students completing the course will be able to demonstrate an improvement in overall health.": 2010/11
Continue to encourage students to attend/participate in class on a regular basis so that they may achieve the outcomes as set forth.

Plan for topic "Students completing the course will be able to...

Describe the health benefits of increasing lean muscle mass and decreasing overall body fat percentage through exercise.”: 2009/10
I found myself faced with a language barrier this past term. Several students had a very difficult time understanding class discussions and class requirements due to ESL challenges, especially when teaching this class in the college gymnasium concurrently while a basketball class was also taking place. It was a difficult environment (noisy) to teach as well as learn (for the students). This class is most effectively taught in PE 202 or a room that is not being shared during instruction time.

Plan for topic "Students completing the course will be able to describe the health benefits of increasing lean muscle mass and decreasing overall body fat percentage through exercise.": 2009/10

DVC Instructional Course SLO Action Plans

Describe the health benefits of increasing lean muscle mass and decreasing overall body fat percentage through exercise.": 2008/9

Class attendance is imperative for SLO to be effective.

Plan for topic "Students completing the course will be able to describe the health benefits of increasing lean muscle mass and decreasing overall body fat percentage through exercise.": 2008/9

Class attendance is imperative for SLO to be effective.

Plan for topic "Students completing the course will be able to...

Demonstrate appropriate exercise techniques to increase core strength.

"": 2008/9

No Changes or Modifications

Plan for topic "Students completing the course will be able to...

Demonstrate an improvement in flexibility.

": 2008/9

Most students who lacked any marked positive changes in flexibility ranges had very poor class attendance. Stress can be put on class attendance and it's correlation to overall fitness (flexibility) success in the class syllabus and addressed in class over the course of the term.

Plan for topic "Students completing the course will be able to demonstrate an improvement in overall health."": 2008/9

Most students who lacked any marked positive changes in flexibility ranges had very poor class attendance. Stress can be put on class attendance and it's correlation to overall fitness (flexibility) success in the class syllabus and addressed in class over the course of the term.

Plan for topic "Students completing KNACT-124B will be able to Define intermediate fitness assessment activities for the cardiovascular system.": 2016/17

Student took part in the interpretation of their own results and the results of a partner helped to further reinforce that they understand the process to calculate not only their own results, but the results of someone else. This (working with someone else in the learning process) also helps eliminate bias in regard to how one perceives their health and fitness from what is actually factual.

Plan for topic "Students completing KNACT-124B will be able to Define and interpret standardized data for physiologic assessments.": 2013/14

All students were successful in defining and interpreting their own data. For many, it was a profound experience to understand that their health and wellness was not as good as they thought. These activities are often difficult for students, as they define physiologic health through standardized measurement and data collection. I purposely have students perform a pre and post measurement activity so that they can track improvements in their health and wellness from the beginning to the end of the term.
Plan for topic "Students completing this course will be able to identify and differentiate the Latin rhythms of meringue, salsa, cumbia and reggaeton.": 2018/19

The majority of students enrolled were successful. The few who assessed below were students whose first language was not English or Spanish. They were very successful at demonstrating the dance steps. However, found it more challenging to identify and differentiate between the dance steps and rhythms when responding orally. Therefore, in future assessments a pictorial image of each dance step and accompanying rhythm would assist ESL students (who do not speak Spanish) with identifying and differentiating each dance step/rhythm and increase the success rate.

Plan for topic "Students completing this course will be able to assess and evaluate their individualized fitness goals.": 2015/16

The majority of students were successful in comparing current versus past fitness scores and identifying the changes.

There were fewer students who were successful in identifying the rationale for the changes. To improve student success, more time will be spent reviewing the components of physical fitness and the FITT principle. In addition, more examples will be provided for student analysis.

958. Beginning Cardio Kickboxing [KNACT-128A] belonging to Kinesiology, Athletics and Dance [KNACT]

Plan for topic "Students completing the course will be able to Demonstrate an improvement in cardiovascular system." : 2018/19

Students were required and encouraged to keep an exercise log throughout the semester. A weekly check in with other students as well as the instructor increased student participation in exercising outside of class. This intrinsic motivation will be continued.

Plan for topic "Students completing the course will be able to calculate target heart rate zone/range." : 2015/16

Students were allowed to use their calculators on their phones to preform the math calculation of the Karvonen formula. This was very helpful for many students. There were some students with special needs that were allowed to use a standard target heart rate chart. Instructor will continue to allow calculators for this SLO.

Plan for topic "Students completing the course will be able to calculate target heart rate zone/range." : 2013/14

Most (89%) were able to achieve established goal/criteria. They remaining 11% continue to need assistance with the math calculations. Instructor will distribute Karvonen formula handout.

Plan for topic "Students completing the course will be able to calculate target heart rate zone/range." : 2010/11

Reassign in Spring.

Plan for topic "Students completing the course will be able to calculate target heart rate zone/range." : 2009/10

Many of the students had trouble with the math calculation in regards to Karvonen formula even though the instructor reinforced the process many times during the semester. Perhaps a step-by-step instructional video posted on WebCT would help in this assessment process.

Plan for topic "Students completing the course will be able to Demonstrate an improvement in cardiovascular system." : 2009/10

Several students either forgot to measure their resting heart rate (RHR) first thing in the morning or had trouble counting their RHR for a full minute. Reinforced instruction on WebCT may help with this issue.

Plan for topic "Students completing the course will be able to demonstrate appropriate kickboxing kicking techniques by successfully performing a kicking kata." : 2009/10

Continue to use general skill acquisition modifications and regressions for those students who may have physical/psychological challenges and special physical needs.

Plan for topic "Students completing the course will be able to calculate target heart rate zone/range." : 2008/9

2010-05-12: Most students were successful and no modifications are needed. Students who were not successful had very poor attendance and should be encouraged to attend class on a regular basis

(12/10/08)

2010-06-17: All students were successful and no modifications are needed. The emphasis of this technique on several occasions throughout the term increased student success in the knowledge of this measurement technique. (5/22/09)

</tr>
</tbody>
</table>
Plan for topic "Students completing the course will be able to experience a decrease in resting heart rate values.": 2009/10

Data results show measurement criteria was achieved. Action plan would be to increase course from 12 to 18 weeks, hike 2 times a week (currently 1/week), or hike on more rigorous trails.
Plan for topic "Students completing the course will be able to interpret their body composition results relative to specific health risk factors.": 2016/17

Students that exercised only in class (2 times weekly) showed the least amount of improvement (1-3%) by the semester's end. Students that were participants in other activity classes on alternate days (MW) showed improvements of 5-7% less body fat at the end of the semester. Students that exercised on their own a third day out of the week showed improvements of approximately 3-4%.

Continue emphasis on American Heart Assoc. recommendations of exercising a minimum of 3 days a week for a minimum of 30 minutes while in your target heart rate zone. Note: Summer courses in this activity that meet 4 days a week for only 6 weeks improve body composition (less body fat) by 5-10%. Some students as much as 13-15%. Frequency of exercise will continue to be focal point to students during full term semesters. Individuals with body fat above recommended norms are more likely to suffer from diabetes, heart disease, stroke, and many other health issues.

Plan for topic "Students completing the course will be able to interpret their body composition results relative to specific health risk factors.": 2016/17

Incorporate other training methods and continue to use cycling training techniques to facilitate students' cardiovascular workout.

Plan for topic "Students completing the course will be able to interpret their body composition results relative to specific health risk factors.": 2013/14

Incorporate other training methods and continue to use cycling training techniques to facilitate students' cardiovascular workout.

Plan for topic "Analyze and understand their health through the knowledge of heart rate.": 2013/14

Incorporate other training methods and continue to use cycling training techniques to facilitate students' cardiovascular workout.
Numbers have improved using same assessment and training methods. Loss of activity course requirement has current students enrolled because they want to be in class, not because they have to. This along with implementing previous plans has had a positive result.

Plan for topic "The student will be able to....

Differentiate between aerobic and anaerobic exercise.": 2013/14

3 assessment cycles with 90% of student success. Consider creating another assessment topic.

Plan for topic "The student will be able to differentiate between aerobic and anaerobic exercise.": 2013/14

3 assessment cycles with 90% of student success. Consider creating another assessment topic.

Plan for topic "Students completing the course will be able to interpret their body composition results relative to specific health risk factors.": 2010/11

Will continue to use cycling training techniques to facilitate students cardiovascular workout, thereby getting into fat burning.

Plan for topic "Students completing the course will be able to interpret their body composition results relative to specific health risk factors.": 2010/11

Will continue to use cycling training techniques to facilitate students cardiovascular workout, thereby getting into fat burning.

Plan for topic "Analyze and understand their health through the knowledge of heart rate.": 2010/11

While this number is an increase from the previous assessment, the number of students with sub-par attendance and effort levels have an adverse affect on the total class success rate. No changes at this time.

Plan for topic "The student will be able to....

Differentiate between aerobic and anaerobic exercise.": 2010/11

No changes at this time.

Plan for topic "The student will be able to differentiate between aerobic and anaerobic exercise.": 2010/11

No changes at this time.

Plan for topic "Students completing the course will be able to...

Interpret their body composition results relative to specific health risk factors.": 2009/10

There most likely needs to be more emphasis put on attendance and regular participation to achieve the class goals and objective. Perhaps, more reminders to students who are missing class on a regular basis that their participation may have a direct impact on their overall grade in the class. Also, more awareness regarding the negative impacts of high body fat percentage over a lifetime and the risk factors that are or can be incurred and/or accumulated.

Plan for topic "Students completing the course will be able to interpret their body composition results relative to specific health risk factors.": 2009/10

<tr>
<th>Topic</th>
<th>Year</th>
</tr>
</thead>
<tbody>
<tr>
<td>Describe principles to improve fitness levels.</td>
<td>2015/16</td>
</tr>
<tr>
<td>In future semesters, more emphasis on the explanation and demonstration of muscular strengthening methods will be utilized during the training sessions. Also, having students create a &quot;boot camp&quot; circuit session that is focused on more strength training than cardiovascular exercises.</td>
<td></td>
</tr>
</tbody>
</table>
## DVC Instructional Course SLO Action Plans

### Plan for topic "Students completing the course will be able to analyze their individual health assessment results."

#### 2016/17

Improvements with the technology in heart rate monitoring equipment, exercise apparatus, such as the addition of power lifting platforms for more up to date circuit training routines and exercises would benefit this course. Possible adjustment to days and times the course is offered would be a welcome change in trying to give the students the most benefit. Continue emphasis on American Heart Assoc. recommendations of exercising a minimum of 3 days a week for a minimum of 30 minutes while in your target heart rate zone. In the past it has been noted that summer courses in this activity that meet 4 days a week for only 6 weeks improve body composition (less body fat) by 5-10%. Some students as much as 13-15%. Frequency of exercise will continue to be focal point to students during full term semesters. Individuals with body fat above recommended norms are more likely to suffer from diabetes, heart disease, stroke, and many other health issues (health risk factors).

#### 2013/14

Improvement from last assessment due to changes in strength equipment and additional THR calculation practice. Continue to modernize our equipment and facility.

#### 2013/14

Implemented mid-term assessment since last cycle. This helped with individual improvement scores. Continue to do this assessment pre-mid-post semester.

#### 2013/14

Consider creating a new assessment topic for the next cycle.

### Plan for topic "Students completing the course will be able to interpret their body composition results relative to specific risk factors."

#### 2010/11

No changes. Continue current teaching methods since success rate was at 90% or higher.

#### 2010/11

None. Changes made from Fall 2010 semester seemed to improve student success.

### Plan for topic "Students completing the course will be able to differentiate between aerobic and anaerobic exercise."

#### 2010/11

None due to the high student success rate.

### Plan for topic "Students completing the course will be able to analyze their individual health assessment results."

#### 2009/10

None, since success rate was at 90%.

### Plan for topic "Students completing the course will be able to interpret their body composition results relative to specific risk factors."

#### 2009/10

Track the number of students who begin in the recommended values. Emphasis on reducing body fat percentage and not on recommended values. Effect on Learning: Students will become discouraged if only compared to recommendations, even though improvements were made; motivation comes from improvement.
Plan for topic "Students completing the course will be able to differentiate between aerobic and anaerobic exercise.": 2009/10

None, since student success rate is at 90%.
Plan for topic "Students completing KNACT-144B will be able to Analyze training principles to improve total fitness.": 2016/17

Students in this cohort were very successful (exceeded criteria) in areas assessed in both cognitive and physical areas. The common area where students seemed to have a disconnect was analyzing different exercise routines/programs and then applying some type of corrective activity.

Plan: In future semesters, instructors will emphasize a more practical application (with examples) of how to develop a more comprehensive exercise program and how to develop corrective/alternative movement plans.

Plan for topic "Students completing KNACT-144B will be able to Analyze training principles to improve total fitness.": 2013/14

Intermediate level student need additional emphasis on principles and training techniques as well as physical workouts.

Plan for topic "Students completing KNACT-144B will be able to Perform intermediate level cardiovascular exercises and monitor intensity of heart rate.": 2013/14

More instructor led modeling during class time.

Plan for topic "Students completing KNACT-144B will be able to Perform intermediate level exercise routines to improve muscular strength, endurance, and flexibility.": 2013/14

Change resistance training routines to include more muscle strength building exercises.
Plan for topic "Students completing the course will be able to identify basic human muscular anatomy." 2016/17
The assessment results were successful in regards to the listed criteria. The majority of the class scored in the 70% range, which should be improved in future semesters. Anatomy is rote memory and requires face to face and visual instruction on a consistent basis. Plan: In future semesters, instructors will block off specific times during the day to do brief lectures utilizing visual aids such as skeletons and manikins. Emphasis should be made on major muscle groups and corresponding resistance training to strengthen those muscles.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the techniques for improving muscular strength." 2013/14
Implemented a mid-term assessment since the last cycle to show that students were making improvement, while they may have felt they were not.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the techniques for improving muscular endurance." 2013/14
Implemented a mid-term assessment and daily instructor led muscular endurance workout.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the techniques for improving muscular strength." 2010/11
The number of students showing improvement increased 7% from the previous semester. We did not do a mid term assessment, yet overall student strength improved. Will continue to monitor during fall 2011 for trends.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the techniques for improving muscular endurance." 2010/11
This increase was up 10% from previous semester. While no mid term assessment was done, cushioned floor mats were made available to students, making sit up and endurance floor exercises more obtainable.

Plan for topic "Students completing the course will be able to identify basic human muscular anatomy." 2010/11
This is a positive attendance course and a substantial amount of students are focusing on acheiving their hourly goals, not on the cognitive aspects of the course. A mid-term exam or bi-monthly quiz should be considered.
<table>
<thead>
<tr>
<th>Plan for topic</th>
<th>2009/10</th>
</tr>
</thead>
<tbody>
<tr>
<td>&quot;Students completing the course will be able to demonstrate an understanding of the techniques for improving muscular strength.&quot;</td>
<td>Do a mid-term assessment to allow students to see rate of strength improvement.</td>
</tr>
<tr>

<td>Do a mid-term assessment to allow students to see rate of improvement.</td>
</tr>
</tbody>
</table>

Additional anatomy materials and study guides made available both as handouts and online.
### Plan for topic "Students completing KNACT-146B will be able to Determine target heart rate based on Karvonen formula."

<table>
<thead>
<tr>
<th>Date</th>
<th>Action Plan</th>
</tr>
</thead>
<tbody>
<tr>
<td>2016/17</td>
<td>Calculating target heart rates is a necessity in all fitness classes. This course will continue to make it an evaluation tool of our students, however it will be expanded with a different learning outcome assessments using aerobic vs. anaerobic training/exercise for achieving/reaching ones THR.</td>
</tr>
</tbody>
</table>

### Plan for topic "Students completing KNACT-146B will be able to Demonstrate proper warm-up procedures at a beginning level."

<table>
<thead>
<tr>
<th>Date</th>
<th>Action Plan</th>
</tr>
</thead>
<tbody>
<tr>
<td>2013/14</td>
<td>Continue to utilize D2L ability to show instructional videos on proper techniques and safety pre-cautions.</td>
</tr>
</tbody>
</table>

### Plan for topic "Students completing KNACT-146B will be able to Perform beginning level training techniques on both plate loaded and free weight apparatus."

<table>
<thead>
<tr>
<th>Date</th>
<th>Action Plan</th>
</tr>
</thead>
<tbody>
<tr>
<td>2013/14</td>
<td>Follow up video review with instructor led demonstrations during class.</td>
</tr>
</tbody>
</table>

### Plan for topic "Students completing KNACT-146B will be able to Determine target heart rate based on Karvonen formula."

<table>
<thead>
<tr>
<th>Date</th>
<th>Action Plan</th>
</tr>
</thead>
<tbody>
<tr>
<td>2013/14</td>
<td>Continue to this formula for determining target heart rates.</td>
</tr>
</tbody>
</table>
Plan for topic "Students completing KNACT-146C will be able to Perform two intermediate level lower body muscular endurance strength techniques."": 2016/17

Encourage instructors to review lower body exercise techniques at the beginning of the semester. Increased demonstration and provide appropriate feedback during performance of exercise will increase retention of information for student workout. Also, with the majority of the students taking the class for only 0.5 unit, assessment may have to be given mid-semester for higher participation.

Plan for topic "Students completing KNACT-146C will be able to Perform two intermediate level upper body muscular strength techniques."": 2013/14

Low sample size, only 14 students. Even though intermediate level course, students need face to face instruction to follow video demonstrations.

Plan for topic "Students completing KNACT-146C will be able to Perform two intermediate level lower body muscular endurance strength techniques."": 2013/14

Face to face instruction to demonstrate and give feedback during performance of exercise.

Plan for topic "Students completing KNACT-146C will be able to Design a basic periodization strength training program."": 2013/14

First assessment of this outcome. Monitor moving forward. Students seem to do better with non-physical performance that with actual demonstrations.
Plan for topic "Students completing KNACT-146D will be able to Perform two advanced level training techniques of their choosing for both upper body and lower body.": 2016/17

Fourth semester students should be monitored and assessed individually throughout the semester. With the majority of the students (7 out of 11) taking the class for only 0.5 unit, instructor(s) could capture everyone with a mid-semester assessment. Will monitor this plan moving forward.

Plan for topic "Students completing KNACT-146D will be able to Create a proper warm-up program specific to upper and lower body muscle groups.": 2013/14

Small sample size (6 students). Advanced level course. Appears student experience helps improve score.

Plan for topic "Students completing KNACT-146D will be able to Perform two advanced level training techniques of their choosing for both upper body and lower body.": 2013/14

Fourth semester students show higher scores. Continue to monitor moving forward.

Plan for topic "Students completing KNACT-146D will be able to Evaluate necessary components of a well rounded strength program.": 2013/14

Continue to use current methods (D2L) and utilize other media sources.
### 971. Beginning Power Training [KNACT-148A] belonging to Kinesiology, Athletics and Dance [KNACT]

#### Plan for topic "Students completing the course will be able to explain power lifting concepts.": 2016/17

During this semester a mid-term assessment of progress on the research paper was added. This addition was a general written description of the lift selected, resources that would be utilized and a rough draft of the paper. Verbal communication between the students and the instructor were also utilized during this mid-term assessment to further clarify student questions and instructor expectations. In the future, more specific steps should be incorporated throughout the course to ensure progress, learning and further student success.

#### Plan for topic "Students will demonstrate the appropriate technique of power lifts." 2013/14

I will continue to utilize video assessments for both the instructor and students to continue success.

#### Plan for topic "Students completing the course will be able to demonstrate the appropriate technique of power lifts." 2010/11

Instructor will continue to emphasize specific components of proper lifting technique. Instructor lecture, demonstration and evaluation, as well as video analysis will continue to be utilized to promote success.

#### Plan for topic "Students completing the course will be able to demonstrate the appropriate technique of power lifts." 2009/10

Instructor will continue to utilize lecture, demonstration and video analysis of lifting techniques.

#### Plan for topic "Students completing the course will improve strength in power lifts." 2010/11

Instructor will continue to utilize a progressive, individualized lifting plan to address the stated goals of students, increasing power lifting strength.

#### Plan for topic "Students will demonstrate the appropriate technique of power lifts." 2009/10

Instructor will continue to utilize lecture, demonstration and video analysis of lifting techniques.

#### Plan for topic "Students completing the course will be able to demonstrate the appropriate technique of power lifts." 2009/10

Instructor will continue to utilize lecture, demonstration and video analysis of lifting techniques.

#### Plan for topic "Students completing the course will be able to explain power lifting concepts." 2009/10

Course Action Plans
<table>
<thead>
<tr>
<th>Instructor will continue to assess students understanding of the concepts related to the power lifts utilized throughout the semester.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Plan for topic &quot;Students completing the course will be able to improve strength in power lifts.&quot;: 2009/10</strong></td>
</tr>
<tr>
<td>Instructor will continue to utilize individualized, progressive lifting regimens throughout the course of the semester.</td>
</tr>
<tr>
<td><strong>Plan for topic &quot;Students completing the course will improve strength in power lifts.&quot;: 2009/10</strong></td>
</tr>
<tr>
<td>Instructor will continue to utilize individualized, progressive lifting regimens throughout the course of the semester.</td>
</tr>
</tbody>
</table>
Plan for topic "Students completing KNACT-148B will be able to perform and demonstrate proper technique of the Hang Clean."

2016/17

The continued compartmentalization of techniques of complex intermediate power lifts such as the Hang Clean and Split Squat should continue to be a classroom procedure. Utilizing technology such as video review may help students and the instructor to identify both proper technique to continue and improper technique to correct. Incorporating compartmentalization in teaching and technological improvements for assessment in a wider variety of intermediate power lifts will further expand the knowledge and success of students.

Plan for topic "Students completing KNACT-148B will be able to perform and demonstrate proper technique of the Hang Clean."

2013/14

The instructor will continue to utilize demonstration, video and diagrammed examples of proper technique for the hang clean.
Plan for topic "Students completing this course will be able to analyze and perform intermediate individual technical skills (for tennis).": 2016/17

Instructor should consider assessing a practical skills test through match play. This option could be more relaxed but still competitive in a group setting versus being put on the spot and tested individually. Emphasis on serving will be included as part of the daily warm-up to provide more repetition, comfort and confidence before actual play.

Plan for topic "Students completing KNACT-150 will be able to Demonstrate the four basic Zumba steps.": 2013/14

All students were successful. Continue to include and emphasize arm, fitness (body toning) and directional variations to the four basic steps. Will create and assess a different outcome during the next cycle.
### Plan for topic "Students completing the course will be able to execute fundamental badminton skills."

- **2016/17**
  
  These classes were beginning badminton classes. It is expected that some students will not achieve success after a semester of class when they only get to practice two days per week. Some students are less hand-eye coordinated than others and need more practice time. I always encourage those students to take the B section next semester or next year.

- **2013/14**
  
  Although 78% reaching 80% or more is good, it was below the set criteria. Badminton has a high % of international students and I believe English as a second language may have had an affect on the results, therefore the test will be modified with more demonstration and less written assessment.

- **2012/13**
  
  Badminton students continue to meet or exceed measurement criteria. There will not be any modifications at this time.

- **2009/10**
  
  Since students achieved the established goal of 75% instructor will continue to implement skill drills throughout the semester. It would be helpful to lower class maximum from 45 to 40 since that is what the facility holds.

- **2009/10**
  
  Since 87% of students achieved a B grade or better, instructor will modify test in order to make it more challenging.

- **2008/9**
  
  Since students did not reach established goal of 75% at 70%, instructor will implement more skill drills throughout the semester.

- **2008/9**
  
  Students met the established goals of 80% at an 80% grade or better therefore no modifications at this time.
975. Intermediate Badminton [KNACT-160B] belonging to Kinesiology, Athletics and Dance [KNACT]

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing KNACT-160B will be able to incorporate rules, etiquette, scoring system, and equipment of badminton in match and selected tournament play.&quot;</th>
<th>2016/17</th>
</tr>
</thead>
<tbody>
<tr>
<td>These were intermediate so expectations were met. The one student that did not achieve success was due to poor attendance therefore lack of participation opportunities. In the future I will encourage all students to attend on a regular basis.</td>
<td></td>
</tr>
</tbody>
</table>

<table>

</table>
Plan for topic "Students completing this course will be able to perform a fundamental skill such as a forehand, backhand, serve and volley." : 2018/19

Since class is once a week, students are given the first third of class to learn/review/work on the different strokes. Instructor spent time with students who need more assistance with stroke execution while other higher level students engaged in game like drills and play.
DVC Instructional Course SLO Action Plans

980. Intermediate Tennis [KNACT-166B] belonging to Kinesiology, Athletics and Dance [KNACT]
DVC Instructional Course SLO Action Plans

981. Beginning Basketball [KNACT-170A] belonging to Kinesiology, Athletics and Dance [KNACT]

Plan for topic "Students completing the course will be able to engage in basketball as a life long fitness activity."

- Using competitive drills, games, we can create different forms of training to better condition the students

Plan for topic "Students completing the course will be able to perform individual offensive and defensive basketball techniques."

- Free throw shooting practice will be incorporated into each class periods.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the rules of basketball."

- No change on these SLO's
DVC Instructional Course SLO Action Plans

982. Intermediate Basketball [KNACT-170B] belonging to Kinesiology, Athletics and Dance [KNACT]

Plan for topic “Students completing KNACT-170B will be able to Students in intermediate basketball will be able to execute a basketball shot with 50% accuracy”: 2016/17

With continued repetition of this drill we may be able to reach 8/20 shots or 40% accuracy and have all students meet this goal. We will introduce this drill earlier in semester to allow for more practice.

Plan for topic “Students completing KNACT-170B will be able to Students in intermediate basketball will be able to execute a basketball shot with 50% accuracy”: 2013/14

We have just begun assessing intermediate basketball. For this class we will develop a different outcome to assess next cycle.
### Plan for topic "Students will be able to perform the fundamental skills of offensive position play."

#### 2017/18
This course has not been offered since fall 2014. Will be assessed at next offering.

#### 2014/15
With over 90% of the students fulfilling the SLO and improvement from this same group from the pre-test to the post-test, I will continue to utilize daily skill development drills prior to game play within the course.

#### 2013/14
With over 90% of the students fulfilling the SLO and improvement from this same group from the pre-test to the post-test, I will continue to utilize daily skill development drills prior to game play within the course.

#### 2011/12
Further offensive skill development drills will be incorporated into class daily.

### Plan for topic "Students completing the course will be able to explain offensive strategies."

#### 2011/12
Continued lecture, demonstration and discussion on offensive strategy, followed by competitive situations to illustrate understanding of the concepts.

### Plan for topic "Students will be able to perform the fundamental skills of defensive position play."

#### 2011/12
Continued lecture, demonstration, discussion and drill work will be followed by competitive situations to apply defensive position play.

<tbody>
<tr>
<td>&quot;Students completing the course will be able to describe rule violations that result in penalty time.&quot;</td>
<td>2017/18 This class has not been offered since the spring 2016. Will be assessed at next offering.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to describe rule violations that result in penalty time.&quot;</td>
<td>2013/14 Continue to stress the rules or lacrosse during practice/class and emphasize the negative effect they have on the team.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to perform basic lacrosse technical skills.&quot;</td>
<td>2013/14 Continue to stress fundamentals and skill development during class time so students can transfer those skills to game situations.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to perform in a full field game.&quot;</td>
<td>2013/14 Continue to work full field &quot;scrimmages&quot; into our class/practice time to simulate game situations.</td>
</tr>
</tbody>
</table>
### Plan for topic "Students completing this course will be able to lead lacrosse specific warm ups that prepares the body for the physical demands of the sport": 2018/19

This class has not been offered since Spring 2016. It will be assessed the next time it is offered.

### Plan for topic "Students completing this course will be able to lead lacrosse specific warm ups that prepares the body for the physical demands of the sport": 2015/16

Students were to lead the class in warm ups that involed the following 4 elements: aerobic, anaerobic warmup and static and dynamic stretching. Of the 10% they were not successful, the common missing element was dynamic stretching. In future semesters, more emphasis and practice will be placed on dynamic stretching modalities.
Plan for topic "Students completing KNACT-176A will be able to identify and describe the rules of the game of soccer." : 2016/17

The data suggests that students are successfully identifying and describing the FIFA Laws of the Game. This quiz is now being completed using the online quiz tool through Canvas, and students continue to demonstrate gaining knowledge of the important rules that enable them to successfully participate in the activity. This method of assessment will continue to be used for this course.

Plan for topic "Students completing KNACT-176A will be able to identify and describe the rules of the game of soccer." : 2013/14

The students met the desired level of success for identifying the rules of the game of soccer. For the next assessment, I will focus assessment on the students’ ability to perform the fundamental skills of the sport, such as dribbling, passing and defending.

Plan for topic "Students completing the course will be able to execute basic skills such as dribbling, passing, shooting, and defending." : 2011/12

I will continue have a daily emphasis on basic skills through the warm-up portion of the class. This enables students to receive time to repeat these skills that they may not have in the game environment.

Plan for topic "Students completing the course will be able to apply rules of soccer to a full-field game." : 2011/12

I will continue to address the soccer laws of the game early in the semester (through written quiz) and reinforce the application of these rules once we reach the point of playing full-sided matches. It could be beneficial to measure the change in the students abilities to apply the rules from the beginning to the end of the semester.

Plan for topic "Students completing the course will be able to execute basic skills such as dribbling, passing, shooting, and defending." : 2011/12

I will continue to address the soccer laws of the game early in the semester (through written quiz) and reinforce the application of these rules once we reach the point of playing full-sided matches. It could be beneficial to measure the change in the students abilities to apply the rules from the beginning to the end of the semester.

Plan for topic "Students completing the course will be able to describe position and basic roles of defenders, midfielders, forwards, and goalkeepers." : 2009/10

According to the data results, the measurement criteria was achieved. However, there is still a clear distinction between knowing and applying the information. My plan is to bring the information to the classes earlier in the semester, in order for them to have more time applying this knowledge throughout the semester.

Plan for topic "Students completing the course will be able to apply rules of soccer to a full-field game." : 2008/9

According to the data results, students effectively learned the rules of the game as demonstrated by the written test. However, the performance rubric suggests that it is more difficult for less experienced students to apply that knowledge accurately during match play. As a result it is important to point-out and reinforce the rules of the game during match play.

Plan for topic "Students completing the course will be able to execute basic skills such as dribbling, passing, shooting, and

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing KNACT-176B will be able to apply the rules of the game of soccer to full-sided games.": 2016/17

Through the methods of instruction and participation in the course, students are successfully applying the laws of the game of soccer. These results suggest to me to continue providing ample time, during warm-up activities and during match play, for students to gain experience with applying the rules to their participation.

Plan for topic "Students completing KNACT-176B will be able to apply the rules of the game of soccer to full-sided games.": 2013/14

As a result of this objective being met during this assessment, I will continue to incorporate the game constraints that provide repetition and reinforce applying the laws of the game. I will focus my next assessment cycle on evaluating the skill level of the students and providing them opportunities to develop intermediate level skill in dribbling, passing, finishing and defending.

993. Beginning Beach Volleyball [KNACT-184A] belonging to Kinesiology, Athletics and Dance [KNACT]
994. Beginning Plyometrics and Agility Training for Female Athletes [KNACT-195A] belonging to Kinesiology, Athletics and Dance [KNACT]

Plan for topic "Students completing the course will be able to demonstrate comprehension of injury prevention benefits of plyometric training exercises." : 2017/18

The combination of in class discussion and the fact sheet provided to students through Canvas appears to be successful in enabling students to comprehend the relationship between plyometric training and the prevention of ACL injuries. We will continue to use similar methods in future semesters and continue to monitor student success.

Plan for topic "Students completing the course will be able to demonstrate comprehension of injury prevention benefits of plyometric training exercises." : 2014/15

My goal is for this assessment method to reach between 80-85% success. ACL injuries are extremely common for female athletes and therefore it is important that they have a working understanding of potential risk factors and preventative techniques. Some students may be unprepared for the technical vocabulary involved with this topic and therefore, may have difficulties on the quiz. More time will be spent presenting this information to the students to insure they comprehending the vocabulary and its connection to the activities they are performing in the class.

Plan for topic "Students completing the course will be able to demonstrate comprehension of injury prevention benefits of plyometric training exercises." : 2011/12

The results demonstrate that students are successfully learning the intent and benefits of plyometric training. The course will continue in the manner it has been taught.
Plan for topic "Students completing this course will be able to evaluate nutritional, medical and health needs/issues unique to the female-athlete’s body.": 2017/18

The combination of in class discussion and the fact sheets provided to students through Canvas appears to be successful in enabling students to evaluate nutritional, medical and health concerns unique to the female athlete’s body. We will continue to use similar methods in future semesters and continue to monitor student success.

Plan for topic "Students completing this course will be able to evaluate nutritional, medical and health needs/issues unique to the female-athlete’s body.": 2014/15

It is small cohort of students for this course. The summer section in particular included only 2 students in the intermediate level of the course. However, the results suggest that the students are successfully learning the nutritional, medical and health/ issues relative to the female athlete’s body. As these are the first assessed offerings of the intermediate level of the course, I believe it would be worthwhile to continue to evaluate this assessment topic for further evidence of student success.
### Plan for topic "Students completing this course will be able to assess improvement in sport-specific skills with improved neuromuscular control and coordination.": 2018/19

The summer sessions for KNACT 195C are only 6 weeks in length, which can make it more challenging to achieve a 10% improvement. Nonetheless, 50% of the students did accomplish this objective, and all 4 did demonstrate progress from the beginning to end of the session. The use of a variety of agility activities (jump rope, speed ladders, 5-dot drills, etc.), enabled improvement in this fitness category.

### Plan for topic "Students completing this course will be able to assess improvement in sport-specific skills with improved neuromuscular control and coordination.": 2015/16

Through the use of jump ropes, agility ladders, and 5-dot drills during each class session, students’ foot-speed/agility improved over the course of the semester. Attendance (or lack of) is a likely factor preventing a few students from achieving the desired standard, since agility improvement requires consistent practice to increase neuromuscular control.
997. Independent Study [KNACT-298] belonging to Kinesiology, Athletics and Dance [KNACT]
998. Student Instructional Assistant [KNACT-299] belonging to Kinesiology, Athletics and Dance [KNACT]

Plan for topic "Students completing this course will be able to expand subject matter knowledge by assisting the instructor.": 2018/19

Adjust the teaching plan by adding a specific rubric to assist future students to gain confidence in assisting with large groups of students. Include in syllabus, Student Instructional Assistants will teach three different teaching segments to different group settings (individual, small group and large group).

Plan for topic "Students completing this course will be able to expand subject matter knowledge by assisting the instructor.": 2015/16

Students will be guided to assist in the different beginning, intermediate, and advanced skills areas; giving him/her the opportunity to expand his knowledge in the subject matter. Students will also assist instructor in the development of objectives.
### DVC Instructional Course SLO Action Plans

#### 999. Self-Defense [KNCMB-110] belonging to Kinesiology, Athletics and Dance [KNCMB]

<table>
<thead>
<tr>
<th>Plan for topic</th>
<th>2019/20</th>
</tr>
</thead>
<tbody>
<tr>
<td>&quot;Students will upload 3 threatening situations short videos and explain what skillfully self-defense techniques would be applying.&quot;</td>
<td>Goal is to achieve 100% criteria 5.</td>
</tr>

</tr>
</tbody>
</table>
1009. Topics in Martial Arts and Combatives [KNCMB-150] belonging to Kinesiology, Athletics and Dance [KNCMB]

Plan for topic "Students completing this course will be able to:

Explain the One Step Sparring Techniques evaluation parameters.": 2018/19

KNCMB 150 is a Topics in Kinesiology Combative course and has not been offered recently. Should the department schedule a topics course in the future an assessment will be completed.

Plan for topic "Students completing this course will be able to:

Explain the One Step Sparring Techniques evaluation parameters.": 2015/16

Plan: Next goal is to achieve criteria 5 = 100%.

Plan for topic "Students completing this course will be able to:

Demonstrate three different One Step Sparring techniques with a partner.": 2015/16

Plan: Next goal is to achieve criteria 5 = 100%

Plan for topic "Students completing this course will be able to:

Perform taekwondo forms(poomse) for the intermediate level.": 2015/16

Plan: Next goal is to achieve criteria 5 = 100%

Plan for topic "Students completing this course will be able to:

Explain the One Step Sparring Techniques evaluation parameters.": 2014/15

Next goal is to achieve Criteria 5 = 100%

Plan for topic "Students completing this course will be able to:

 Demonstrate three different One Step Sparring techniques with a partner.": 2014/15

Try to get criteria 5 = 100%

Plan for topic "Students completing this course will be able to:
<table>
<thead>
<tr>
<th>Perform taekwondo forms(poomse) for the intermediate level.&quot;</th>
<th>2014/15</th>
</tr>
</thead>
<tbody>
<tr>
<td>Will continue applying the actual teaching methods.</td>
<td></td>
</tr>
</tbody>
</table>
Plan for topic "Students completing the course will be able to demonstrate fundamental dance vernacular provided by Instructor."

2017/18
This course has not been offered in the past academic year. An assessment will be done the next time it is offered.

Plan for topic "Students completing the course will be able to demonstrate fundamental dance vernacular provided by Instructor."

2014/15
Continue to add dance movement fundamentals in small groups along with instructor guidance. This action plan clearly gave students an understanding of the process of developing good dance technique.

Plan for topic "Students completing the course will be able to perform Instructor choreographed dance combinations."

2014/15
Small groups, critique, and final presentation.

Plan for topic "Students completing the course will be able to demonstrate fundamental dance axial and locomotor movement(s)."

2012/13
Students that did not do well on the assessment were those that did not attend the course consistently. Possible action would be to stress the importance of attendance in syllabi and give verbal reminders throughout the semester.

Plan for topic "Students completing the course will be able to demonstrate fundamental dance vernacular provided by Instructor."

2010/11
I am pleased with the results and feel that there is not reason to change the current outcomes. Students who attended the course on a continual basis achieved all the requirements for this course.

Burke: Understanding ballet vernacular and vocabulary are of key importance in a student's progress. The instructor demonstrates the movement and uses and defines the vocabulary. We work through repetition.

**Plan for topic "Students completing the course will be able to demonstrate alignment while executing movement(s).":** 2010/11

2011-10-06: The class is unique and strategy changes. The instructor verbally describes and defines the movement and the movement is physically practiced. Repetition is the key.

2011-10-06: Burke: Each class provides new challenges. The instructor describes and defines the movement. The class practices the movement. Repetition.

**Plan for topic "Students completing the course will be able to perform beginning ballet allegro and adagio locomotor movement(s).":** 2010/11

2011-10-06: I shall continue seeking perfect method.

2011-10-06: Continue seeking new ways to present material. (Burke)
DVC Instructional Course SLO Action Plans

1014. Ballet Fundamentals II [KNDAN-110B] belonging to Kinesiology, Athletics and Dance [KNDAN]
### 1015. Jazz Dance Fundamentals I [KNDAN-120A] belonging to Kinesiology, Athletics and Dance [KNDAN]

#### Plan for topic "Students completing the course will be able to perform Instructor choreographed jazz dance combinations.": 2017/18

I plan to expand on the activity of having students do group work focused on jazz dance history to increase their awareness of the art form and ability to connect theory to practice. This approach is effective in helping students develop social skills, express their identity, and build their self-esteem. I want students to explore and produce their own work and I want students to develop a coherent set of artistic and intellectual goals for themselves.

#### Plan for topic "Students completing the course will be able to demonstrate fundamental jazz dance warm-ups.": 2014/15

Students did well on the assessment with the exception of 1 who could not master most skills and 3 students did not show up for the assessment. Instructor will continue to use this assessment and make a comparison of past data to see if similar results are attained.

#### Plan for topic "Students completing this course will be able to identify jazz dance vocabulary."": 2014/15

The students who did not do well on the quiz either did not show up to take the quiz or did not review the vocabulary posted on D2L. Instructor will reinforce the use of D2L for supplemental material and check in with students prior to quizzes.

#### Plan for topic "Students completing the course will be able to demonstrate fundamental jazz dance warm-ups."": 2011/12

- **2011-05-10:** Continue to seek perfect method of presenting material.
- **2011-10-06:** Continue seeking new ways of presenting the material.

#### Plan for topic "Students completing the course will be able to demonstrate fundamental jazz locomotor movement(s)."": 2011/12

- **2011-10-06:** Methods are refined for each class. We work through repetition and conversation.
- **2011-10-06:** Each group of students provides new challenges. We work through repetition and conversation.

#### Plan for topic "Students completing the course will be able to perform Instructor choreographed jazz dance combinations."": 2010/11

- **2011-10-06:** Continue to seek perfect method of presenting material. Each group of students provide unique challenges and methods evolve to fit each group.
- **2011-10-06:** Methods are constantly evolving to meet the needs of each unique class. Repetition and communication are of key importance.
### 1016. Jazz Dance Fundamentals II [KNDAN-120B] belonging to Kinesiology, Athletics and Dance [KNDAN]

#### Plan for topic "Students completing this course will be able to perform jazz dance compositions at the beginning level.": 2018/19

Instructor will be adding a semester-long group choreography project to the curriculum. Students will spend the semester working individually and in groups to create a unique piece of choreography while also generating original concepts and producing their own movement. Students will combine this material as part of the final examination, which will be presented as a showcase at the end of the semester.

#### Plan for topic "Students completing this course will be able to perform jazz dance compositions at the beginning level.": 2017/18

This course will be assessed next time it is offered.

#### Plan for topic "Students completing this course will be able to identify jazz vocabulary needed for jazz dance warm ups.": 2014/15

The students quizzed were ready to be challenged with more comprehensive questions which will be added to the next assessments quiz.

#### Plan for topic "Students completing this course will be able to perform instructor choreographed combinations.": 2014/15

Only one student did not receive a passing score. The student lost points due to absence and lack of knowledge of material that needed to be presented. Assessment method will be used again to have a better data sampling. Instructor will remind students of the necessity of strong attendance for success.
1017. Modern Dance Fundamentals I [KNDAN-130A] belonging to Kinesiology, Athletics and Dance [KNDAN]

**Plan for topic "Students completing the course will be able to demonstrate fundamental modern dance warm-ups.":** 2015/16

Data collected and will be submitted by 12/31/16

**Plan for topic "Students completing the course will be able to perform Instructor choreographed modern dance combinations.":** 2015/16

The results were satisfactory with one student not completing a portion of the in-class assessment. This assessment should be done again and students will be given more time to complete their work in class. A video will also be made accessible for the students to see their work.

**Plan for topic "Students completing the course will be able to demonstrate fundamental modern dance warm-ups.":** 2010/11

Continue improving checklist.

**Plan for topic "Students completing the course will be able to demonstrate fundamental modern dance axial and locomotor movement(s).":** 2010/11

2011-10-06: Each group presents new challenges. We work through repetition and conversation and more repetition.

2011-10-06: Every group of students is different. There are always new challenges. We work and learn through repetition and conversation and more repetition.

**Plan for topic "Students completing the course will be able to perform Instructor choreographed modern dance combinations.":** 2010/11

2011-10-06: Continue to seek perfect method of presenting material. Each group of students provide new challenges therefore the methods are constantly changing and evolving to fit each class.

2011-10-06: Continue looking for better ways to present material. Each class presents new challenges, therefore, the methods are constantly evolving.
An action plan goal for Fall 2018 includes adding a semester-long group choreography project to the curriculum. Students will spend the semester working individually and in groups to create a unique piece of choreography while also generating original concepts and producing their own movement. Students will combine this material as part of the final examination, which will be presented as a showcase at the end of the semester.

Plan for topic "Students completing KNDAN-130B will be able to Develop proper alignment and developed kinesthetic awareness for beginning modern dance through progressive warm-ups, center floor work and beginning modern dance compositions." :: 2013/14

The checklist is in a constant state of change. Refined and refitted to serve the particular needs of each class.

Every class is different. Each new group provides a new challenge. We are constantly refining the process finding new ways to express the ideas and pull wonderful movement from our dancer's.

Plan for topic "Students completing KNDAN-130B will be able to Demonstrate beginning modern dance locomotor skills." :: 2013/14

Continue ny quest for the best method of presenting the material to inspire my atudents.
DVC Instructional Course SLO Action Plans

1019. Topics in Dance Arts [KNDAN-150] belonging to Kinesiology, Athletics and Dance [KNDAN]
Plan for topic "Students completing KNDAN-150 will be able to Identify vocabulary and demonstrate fundamental Argentine Tango steps and movement.":: 2016/17

FILE ASSESSMENT PLAN- All of the instructors who taught the 150 classes are either no longer at DVC or were replaced by a new adjunct instructor. Additionally the most recent 150 course was renamed and will be assessed under its new course number for the academic year 2017-2018.

Plan for topic "Students completing KNDAN-150 will be able to Identify vocabulary and demonstrate fundamental Argentine Tango steps and movement.":: 2013/14
Even though class scored higher than predicted, more repetition of individual steps and movement will be implemented.

Plan for topic "Students completing KNDAN-150 will be able to Integrate fundamental movements into the music that is unique to this dance.":: 2013/14
Instructor to spend additional time integrating music with movement. Many students do not have any musical training which is essential to achieving this skill.

Plan for topic "Students completing KNDAN-150 will be able to Synthesize vocabulary into fluid movement patterns.":: 2013/14
More repetition so that students gain skill in creating sequences of movement patterns.
### 1020. Tap Dance I [KNDAN-160A] belonging to Kinesiology, Athletics and Dance [KNDAN]

#### Plan for topic "Students completing this course will be able to define and describe basic tap dance terminology.": 2017/18

Criterion was met; The assessment of the SLO was successful and appropriate. Faculty will assess topic the next time course is offered and in addition will select another topic.

#### Plan for topic "Students completing the course will be able to demonstrate beginning tap dance skills including all single, double and triple steps taught in this class.": 2015/16

This course has not been offered. It is the intention of the department to hire a new adjunct faculty to offer this course in a future academic year when there is room in the schedule.

#### Plan for topic "Students completing the course will be able to evaluate tap dance as an art form.": 2011/12

While the students exceeded the criteria for judging, showing more videos to the students may help them to better evaluate performances.

#### Plan for topic "Students completing the course will be able to demonstrate beginning tap dance skills including all single, double and triple steps taught in this class.": 2008/9

None needed.

#### Plan for topic "Students completing the course will be able to evaluate tap dance as an art form.": 2008/9

Develop easier access to live dance performances.

#### Plan for topic "Students completing the course will be able to perform a simple tap dance for live audience.": 2008/9

Emphasis on attendance and in class participation needs improving.
### DVC Instructional Course SLO Action Plans

#### 1021. Tap Dance II [KNDAN-160B] belonging to Kinesiology, Athletics and Dance [KNDAN]

Plan for topic "Students completing the course will be able to demonstrate intermediate variations of tap steps and the corresponding rhythms such as multiple turns, quadruple sounds, or other specific steps."

- **2018/19**: I will continue to demonstrate proper techniques, assist students in comprehension of the terminology and techniques. For students scoring low on the rubric, more practice time will be given after class and peer group work will be utilized.

- **2017/18**: While there were no students enrolled and no results to post this semester, we will assess and post results after the next offering of the course.

- **2015/16**: This course has not been offered. It is the intention of the department to hire a new adjunct faculty to offer this course in a future academic year when there is room in the schedule.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the cultural relevance of the African aesthetic to contemporary tap dance and American culture."

- **2011/12**: Student success exceeded the criteria and therefore no changes at this time.

Plan for topic "Students completing the course will be able to demonstrate intermediate variations of tap steps and the corresponding rhythms such as multiple turns, quadruple sounds, or other specific steps."

- **2008/9**: None needed.

### Outcome Assessment History

#### Stress importance of completing assignments and relation to grade.

#### May need to give modifications for students who are not so advanced.
### 1022. Broadway Dance [KNDAN-162] belonging to Kinesiology, Athletics and Dance [KNDAN]

| Plan for topic "Students completing the course will be able to identify Broadway Dance Theatre tradition and history." | 2018/19 |
|---------------------------------------------------------------------------------------------------------------|
| This course has not been offered since Fall 2017. It will be assessed Fall 2019 semester. It is offered every other academic year. |

| Plan for topic "Students completing the course will be able to demonstrate basic Broadway Dance warm-up technique." | 2015/16 |
|---------------------------------------------------------------------------------------------------------------|
| While most students achieved this SLO, the evaluation will need to be modified to include a higher degree of difficulty in some dance technique areas to support assessment topic number 3's need for stronger emphasis on technique. |

| Plan for topic "Students completing the course will be able to perform dances as given by instructor/choreographer." | 2015/16 |
|---------------------------------------------------------------------------------------------------------------|
| Students were given 4 different Broadway styles with an increasing degree of difficulty. The last dance was the most technical and proved to lower some students' scores. This assessment should be done again. An emphasis on technique needs to be encouraged earlier in the semester to help raise the degree of success in the final more technical dance. |

| Plan for topic "Students completing the course will be able to identify Broadway Dance Theatre tradition and history." | 2010/11 |
|---------------------------------------------------------------------------------------------------------------|
| Instructor will give more hand out materials prior to the first quiz. |

| Plan for topic "Students completing the course will be able to demonstrate basic Broadway Dance warm-up technique." | 2010/11 |
|---------------------------------------------------------------------------------------------------------------|
| None at this time, Instructor will reevaluate this SLO in the next semester. |

| Plan for topic "Students completing the course will be able to perform dances as given by instructor/choreographer." | 2010/11 |
|---------------------------------------------------------------------------------------------------------------|
| This class has many levels of technique. Instructor will work with students who need additional assistance. |
### DVC Instructional Course SLO Action Plans

**1023. Ballroom/Social Dance I [KNDAN-164A] belonging to Kinesiology, Athletics and Dance [KNDAN]**

- **Plan for topic "Students completing the course will be able to identify vocabulary and demonstrate elementary ballroom dance movement."": 2017/18
  
  Some students must need more review, so I will do that.

- **Plan for topic "Students completing the course will be able to integrate basic ballroom dance movement with musical structure."": 2017/18
  
  Sensitivity to music is a very complex issue. Students should receive as much practice as feasible and should be encouraged to listen to the genre of music outside class.

- **Plan for topic "Students completing the course will be able to synthesize beginning ballroom vocabulary into movement patterns."": 2017/18
  
  Students just need to practice that skill as part of the classroom work.

- **Plan for topic "Students completing the course will be able to identify vocabulary and demonstrate elementary ballroom dance movement."": 2014/15
  
  Continue to refine rubric to achieve greater student skill level success.

- **Plan for topic "Students completing the course will be able to integrate basic ballroom dance movement with musical structure."": 2014/15
  
  Continue to refine rubric to achieve higher success rates.

- **Plan for topic "Students completing the course will be able to synthesize beginning ballroom vocabulary into movement patterns."": 2014/15
  
  Spend a little more time on this aspect of class.

- **Plan for topic "Students completing the course will be able to identify vocabulary and demonstrate elementary ballroom dance movement."": 2010/11
  
  Mastery of each dance in the class was largely due to three significant factors: 1) length of time spent on the dance - some dances received 4 to 5 classes of instruction and some dances only received 2 to 3 classes of instruction, 2) students like or dislike of the dance presented - some students love one dance form and struggle or dislike another dance form, 3) availability of partners - some classes the male to female ratio was more even, other classes there were significantly more females to males and the women were dancing without partners. My plan to improve on the results is to 1) balance the class time spent on each dance, 2) work on increasing the student's familiarity of each dance, thus increasing the positive experience with each dance, and 3) working on rotations of partners in such a way to that each student gets a significant amount of time dancing with a partner.
**DVC Instructional Course SLO Action Plans**

**2010/11**

My plan is to continue working with the integration of ballroom movement and music as I have been. My students learn about the mood and characteristics of each dance and mood and characteristics of the music. They then dance these together. I intend to continue working with students in this way so they enjoy ballroom movement with confidence.

**Plan for topic "Students completing the course will be able to synthesize beginning ballroom vocabulary into movement patterns.":**

Students are randomly assigned a group. This gives a number of results: students either work well or they do not work well together. Some groups had strong followers and leaders needing more guidance. Given that the leader is responsible for structuring the dance, it is important that I stress this from the beginning of the semester. My plan for improving the first group project/demonstration is to work on strong technique, to strongly stress the ballroom vocabulary with the students from the beginning (introduce more vocabulary sooner in the semester) and to work on more movement patterns sooner in the semester. This acceleration will be successful with some students but will prove challenging with others. I plan on working on the best balance for each class.
1024. Ballroom/Social Dance II [KNDAN-164B] belonging to Kinesiology, Athletics and Dance [KNDAN]
Plan for topic "Students completing the course will be able to describe and apply the terminology, music and rhythmical structure of the various Swing dances, including East Coast Swing, Lindy-hop, Jive and West Coast Swing." 2014/15

Students were not comfortable taking a quiz in this class. Vocabulary was posted on D2L with very few students reviewing the material. An in class alternative method for reviewing terminology will be given prior to the first quiz.

Plan for topic "Students completing the course will be able to perform instructor-choreographed dance combinations integrating steps and patterns of various swing vernacular." 2014/15

Students did well on this assessment. Students rotated partners often but next assessment Instructor will have students rotate partner roles to make sure they understand proper movement mechanics.

Plan for topic "Students completing the course will be able to practice leading and/or following in all covered Swing dances." 2011/12

Daily attendance, mandatory practice with differing partners and instructor was established for the course however lack of "Lead" dancers discouraged "Followers" from participating. Instructor will try to actively rotate couples who are doubled up.

Plan for topic "Students completing the course will be able to perform instructor-choreographed dance combinations integrating steps and patterns of various swing vernacular." 2011/12

No changes of format will be done at this time however it was noted that the quiz process was difficult due to lack of "Lead" dancers.

Plan for topic "Students completing the course will be able to describe and apply the terminology, music and rhythmical structure of the various Swing dances, including East Coast Swing, Lindy-hop, Jive and West Coast Swing." 2010/11

Instructor will continue current quiz assessment process.

Plan for topic "Students completing the course will be able to practice leading and/or following in all covered Swing dances." 2010/11

Daily attendance, mandatory practice with differing partners and instructor will continue as established for the course.

Plan for topic "Students completing the course will be able to perform instructor-choreographed dance combinations integrating steps and patterns of various swing vernacular." 2010/11

No changes of format will be done at this time.
1026. Salsa and Latin Dance I [KNDAN-168A] belonging to Kinesiology, Athletics and Dance [KNDAN]

Plan for topic "Students completing the course will be able to identify vocabulary and demonstrate elementary Salsa and Latin dance movement.": 2017/18

| Even more practice of correlating the movement with the proper word, and more repetition of individual movements |
| Plan for topic "Students completing the course will be able to integrate basic Latin dance movements with musical structure.": 2017/18 |
| Playing music just to listen to and find the beat works. It would be nice to spend more time getting familiar with the music for each particular dance. |
| Plan for topic "Students completing the course will be able to synthesize the vocabulary of Latin dance into movement patterns.": 2017/18 |
| It works to require students to put together a pattern of at least 2 movements and demonstrate for the instructor. Perfecting an individual movement does not help this skill. More time on this skill would be helpful. |

Plan for topic "Students completing the course will be able to identify vocabulary and demonstrate elementary Salsa and Latin dance movement.": 2014/15

| Continue to refine rubric and assess results frequently . |
| Plan for topic "Students completing the course will be able to integrate basic Latin dance movements with musical structure.": 2014/15 |
| Continue to develop curriculum emphasis to achieve greater results. |
| Plan for topic "Students completing the course will be able to synthesize the vocabulary of Latin dance into movement patterns.": 2014/15 |
| Continue to develop rubric to achieve greater succes |

Plan for topic "Students completing the course will be able to identify vocabulary and demonstrate elementary Salsa and Latin dance movement.": 2010/11

| I think this is about as I would expect, given that dance is often new to most of the students. |
| Plan for topic "Students completing the course will be able to integrate basic Latin dance movements with musical structure.": 2010/11 |
| I will spend more time having the students listen to music and heighten their awareness of the music specific to each type of dance. |
| Plan for topic "Students completing the course will be able to synthesize the vocabulary of Latin dance into movement patterns.": 2010/11 |
| I think this is an adequate result for a beginning class of mainly people who have never danced before. |
Plan for topic "Students completing the course will be able to demonstrate intermediate Salsa and Latin dance movement and vocabulary."

Repetition is extremely important. Sometimes I add too many new movements, and this is not always the correct thing to do. The needs of a particular group of students must be analyzed.

Plan for topic "Students completing the course will be able to integrate intermediate Latin dance movement and musical structure."

Students need lots of practice integrating and there never seems to be enough time. I will try to make more time with emphasis on the musical integration of the movement.

Plan for topic "Students completing the course will be able to synthesize intermediate Latin dance vocabulary into intermediate movement patterns."

Practice and focus on this skill is extremely important. More pop quizzes will help the students become more comfortable with this skill.

Plan for topic "Students completing the course will be able to integrate intermediate Latin dance movement and musical structure."

Spend more time having students focus on the music.

Plan for topic "Students completing the course will be able to synthesize intermediate Latin dance vocabulary into intermediate movement patterns."

Instructor should spend more time on transitions between movements.

Plan for topic "Students completing the course will be able to demonstrate intermediate Salsa and Latin dance movement and vocabulary."

Continue to refine rubric to achieve greater success.

Plan for topic "Students completing the course will be able to integrate intermediate Latin dance movement and musical structure."

Continue to refine rubric to achieve great skill levels.

Plan for topic "Students completing the course will be able to synthesize intermediate Latin dance vocabulary into intermediate movement patterns."

Continue to improve rubric to achieve great student success.

Plan for topic "Students completing the course will be able to demonstrate intermediate Salsa and Latin dance movement and vocabulary."
I think this is pretty good for an intermediate level class where the base of knowledge already exists

**Plan for topic "Students completing the course will be able to integrate intermediate Latin dance movement and musical structure.":**

2010/11

I believe this is an adequate result for an intermediate level dance class

**Plan for topic "Students completing the course will be able to synthesize intermediate Latin dance vocabulary into intermediate movement patterns.":** 2010/11

I think these are pretty good results.
DVC Instructional Course SLO Action Plans

1028. Argentine Tango I [KNDAN-169A] belonging to Kinesiology, Athletics and Dance [KNDAN]

Plan for topic "Students completing this course will be able to identify and perform beginning level Argentine Tango vocabulary":

2017/18
This course will be assessed the next time it is offered.

Plan for topic "Students completing this course will be able to identify and perform beginning level Argentine Tango vocabulary":

2014/15
Plan for topic "Students completing this course will be able to integrate basic Argentine Tango vocabulary with the music":

2014/15
More emphasis on integrating the music with the movement

Plan for topic "Students completing this course will be able to synthesize basic Argentine tango movements into fluid phrases":

2014/15
Continue to refine the rubric to achieve greater student success
Plan for topic "Students completing this course will be able to perform introductory level hip-hop/funk dance choreography.": 2015/16

An action plan goal for spring 2017 includes adding a semester-long group choreography project to the curriculum. Students will spend the semester working individually and in groups to create a unique piece of choreography while also generating original concepts and producing their own movement. Students will combine this material as part of the final examination, which will be presented as a showcase at the end of the semester.
### DVC Instructional Course SLO Action Plans

**1030. Hip-Hop and Urban Funk Dance II [KNDAN-170B] belonging to Kinesiology, Athletics and Dance [KNDAN]**

#### Plan for topic "Students completing this course will be able to gain the ability to demonstrate a strong aesthetic and dance skill vocabulary informed by Hip hop history": 2018/19

| Students working in groups to create a unique piece of choreography from different eras that represent Hip Hop dance and culture. Students will combine this material and present information for each group as part of the final examination during class Final is the last day of class. |

#### Plan for topic "Students completing this course will be able to to perform intermediate level hip-hop/funk dance choreography with intermediate level foot work and polyrhythmic movements.": 2015/16

| This class was combined with another level section. An action plan goal for spring 2017 includes adding a semester-long group choreography project to the curriculum. Students will spend the semester working individually and in groups to create a unique piece of choreography while also generating original concepts and producing their own movement. Students will combine this material as part of the final examination, which will be presented as a showcase at the end of the semester. |
### 1031. Intercollegiate Pre-Participation Orientation [KNICA-098] belonging to Kinesiology, Athletics and Dance [KNICA]

**Plan for topic "Students completing this course will be able to recite Division I, II, III and NAIA academic transfer requirements."**: 2018/19

The face to face delivery method of instruction will be kept but updated when new policies are implemented. Change to future sessions would be to provide handouts to review vast amount of information given in a short period of time.

**Plan for topic "Students completing the course will be able to complete required CCCAA paperwork for athletic eligibility accurately."**: 2015/16

The methods were successful for the vast majority of students in this one week course offering. The only 2 who were not competent in all the criteria both missed 2 of the 4 day course, so those results were predictable.

**Plan for topic "Students completing the course will be able to describe and employ their rights and responsibilities as defined by the DVC Student-Athlete Handbook."**: 2012/13

Continue to update vital information on transfer eligibility, rules, roles and responsibilities of DVC student-athletes.

**Plan for topic "Students completing the course will be able to complete required CCCAA paperwork for athletic eligibility accurately."**: 2011/12

Procedures for completing required forms will remain the same. Computer usage to complete forms in the new meeting room will be required, as previous courses were held in the old student services building.
Plan for topic "Students completing this course will be able to develop a community service activity with classmates.": 2018/19

The majority of the students who were engaged in the course and completed their work passed the course with an A or B. Teaching plan will be adjusted to provide more time for students to start their community service project.

Plan for topic "Students completing the course will be able to identify and utilize a variety of academic resources available to students on a college campus.": 2015/16

Will continue to provide student service resource presentations throughout future semesters. Follow up meetings with instructor(s) will ensure student connections with on campus resources are being met.

Plan for topic "Students completing the course will be able to assess athletic and academic goals and prepare short and long term plans for achievement and athletic competition.": 2015/16

The goal setting exercise should continue to be utilized as it helps keep the student-athletes focused, organized and motivated in both the athletic and academic settings.

The addition of bringing in sophomore student-athletes who had successfully completed the assessment the previous year to share their insight would benefit this exercise.

Plan for topic "Students completing the course will be able to identify and utilize a variety of academic resources available to students on a college campus.": 2012/13

Plan for continuing the high rate of success is continuing to create connections between students and tutorial services on campus, including but not limited to required math lab hours, instructor office hour visits, review of student services available resources.
1033. Student-Athlete Success II [KNICA-101] belonging to Kinesiology, Athletics and Dance [KNICA]

Plan for topic "Students completing the course will be able to demonstrate leadership behaviors through mentoring and community involvement opportunities.": 2018/19

This course has not been offered since the Spring 2017. It will be assessed the next time it is offered.

Plan for topic "Students completing the course will be able to evaluate and compare four-year schools and/or professional career options based upon personal priorities.": 2015/16

The goal setting exercise utilizing the S.M.A.R.T model should continue to be utilized as it enabled students to deliberate and create an organized and thoughtful plan for future success. Incorporating visits from former student-athletes who have made the transition to life after DVC to share their experiences should allow a better understanding of options, obstacles and overall opportunities the student-athletes are facing.

Plan for topic "Students completing the course will be able to assess the academic and athletic eligibility requirements to transfer to and compete at a four-year college.": 2012/13

Students will continue to utilize the general education work sheet as an assessment tool for academic and athletic eligibility.
Plan for topic "Students completing the course will be able to analyze and diagram offensive and defensive schemes and strategies."

**2018/19**

The weekly assessments of game plans and defensive strategies and techniques will continue to be utilized assessing the students weekly performance. The incorporation of HUDL evaluations has proven to be highly beneficial to students and an efficient evaluation and teaching tool for the instructor. This practice and further utilization of technological advances in video creation should continue to be practiced and grow.

Plan for topic "Students completing the course will be able to analyze and diagram offensive and defensive schemes and strategies."

**2015/16**

The weekly assessments of game plans and defensive strategies and techniques will continue to be utilized. In the future the course should incorporate technological upgrades to the assessment process through the utilization of digital playbooks, quizzes and teaching tools available through HUDL and similar programs.

Plan for topic "Students completing the course will be able to analyze and interpret the advanced skills and techniques of offensive and defensive football."

**2012/13**

The utilization of the video technique review sheets will be used earlier in the semester in an attempt to achieve the benefits earlier in the course.
## Plan for topic "Students are expected to improve physical conditioning relevant to the specific sport."

### 2017/18
Cardio exercise/training is a key component in every sport especially at the collegiate level. However, depending on the specific sport, Coaches may use an alternative time charts to assess their students. In future semesters, I will provide a variety of cardio training which may assist with students' improved times. Will also add a third test mid semester to ensure meeting the actual assessment.

### 2014/15
Achieving the fitness standards described above is important for success at the collegiate level of soccer competition. For future semesters of this course, I will foster greater support, in particular for those students who are beyond 1 minute 30 seconds of the standard. The results of this semester indicate that these students, even though they have the greatest room for improvement, may not have the greatest confidence or motivation to do the work necessary to improve their fitness to necessary levels for intercollegiate soccer performance. I will foster support by providing conditioning situations that vary, are challenging yet manageable, and involve support involve support from fellow classmates.

### 2011/12
The results indicated that our fitness training during the semester was successful in improving our aerobic fitness, which is important for soccer competition.
Plan for topic "Students completing the course will be able to...Demonstrate positive sportsmanship in Intercollegiate Baseball competition." : 2016/17

Although this SLO had a successful outcome the next time this particular one is assessed I will add what the ramifications of opponent team players or coaches who were ejected while playing DVC are... Example... hurt their team by not being able to play the following game after being ejected from a contest.

Plan for topic "Students completing the course will be able to...Demonstrate the Rules of Intercollegiate Baseball." : 2013/14

Continue to address rules, regulations, and situational circumstances that have an effect on the game.

Plan for topic "Students completing the course will be able to...Demonstrate the techniques necessary to compete in intercollegiate baseball." : 2013/14

Continue to work on the general fundamentals of the game as well as position specific techniques.

Plan for topic "Students completing the course will be able to...Demonstrate positive sportsmanship in Intercollegiate Baseball competition." : 2013/14

Continue to stress the importance of sportsmanship and consequences of getting ejected (kicked out of that game and must sit out the next game).
### DVC Instructional Course SLO Action Plans

</table>
Plan for topic "Students completing the course will be able to evaluate individual and team performance in all aspects of the sport, including technique and offensive/defensive strategies." : 2016/17

Game film and statistics sheets will continue to be utilized to help the students understand techniques, objectives and goals.

Plan for topic "Students completing KNICA-203A will be able to Describe and apply the rules of women's basketball to a competitive environment." : 2013/14

100% success may be unrealistic outcome with current rubric. Future assessments will not include "obscure" rule interpretations and enforcement by officials. Focus on the 'core' rules and regulations that guide 99% of the activity.

Plan for topic "Students completing the course will be able to perform the techniques and execute the strategies necessary to compete in intercollegiate women's basketball." : 2012/13

Instructor will modify current practice procedures to utilize more time for more individualized personal skill development sessions.

Plan for topic "Students completing the course will be able to evaluate individual and team performance in all aspects of the sport, including technique and offensive/defensive strategies." : 2012/13

Instructor will spend more time assessing game film with the student athletes, increasing from 3 sessions a week to 6, giving students more individualized attention to understand strategic game planning.

### 1043. Intercollegiate Football, Men [KNICA-206] belonging to Kinesiology, Athletics and Dance [KNICA]

#### Plan for topic "Students completing the course will be able to successfully execute position specific techniques": 2018/19

Instructor will continue to utilize HUDL technology to enhance teaching tools and grow student understanding of required position specific techniques. Continued acquisition and practice of skill development and coaching drills will allow for further growth of instructor effectiveness and student execution.

#### Plan for topic "Students completing the course will be able to demonstrate understanding of offensive schemes": 2015/16

The 10 perfect offensive plays will continue to be utilized as it hones concentration and solidifies understanding of core plays of the week's offensive game plan. Incorporating state of the art technological improvements with the use of diagrammed and superimposed teaching points to digital video through the use of HUDL or similar programs should be added.

#### Plan for topic "Students completing the course will be able to demonstrate understanding of defensive schemes": 2012/13

Use of written assessment will be incorporated in the preseason to demonstrate knowledge of general defensive schemes unrelated to weekly game plans.

#### Plan for topic "Students completing the course will be able to successfully execute position specific techniques": 2012/13

I will continue to add technique enhancing drills and evaluation processes.
DVC Instructional Course SLO Action Plans

1044. Intercollegiate Soccer, Women [KNICA-210] belonging to Kinesiology, Athletics and Dance [KNICA]

Plan for topic "Students completing the course will be able to apply the appropriate level of sport-specific physical conditioning to compete at the intercollegiate level.": 2018/19

This cohort did not achieve the selected standard for success. The lack of aerobic fitness was a factor in the team's moderate success in matches and underscores the importance of this method of measurement and standard. The 1.5 mile assessment continues to be a worthy tool to determine soccer-specific aerobic fitness levels. This tool will continue to be used for future assessments as a means to evaluate both individual and team aerobic fitness.

Plan for topic "Students completing the course will be able to apply the appropriate level of sport-specific physical conditioning to compete at the intercollegiate level.": 2015/16

The team was not able to achieve the criterion level of fitness determined to be necessary for successful collegiate soccer performance on either testing occasion. Student-athletes returning for a second season of competition will be provided with, and participate in off-season conditioning programs, with the goal of raising their individual, soccer-specific fitness levels. Additionally, student-athletes will continue to be provided with knowledge for how to manage their fitness outside of team training (including nutritional and cross-training techniques), since much of their fitness depends upon what they do when outside of our training environment.

Plan for topic "Students completing the course will be able to apply the appropriate level of sport-specific physical conditioning to compete at the intercollegiate level.": 2012/13

The team was able to achieve the standard of performance established for fitness at the women's collegiate soccer level. My action plan is to continue emphasizing our off-season (spring semester) and pre-season (summer session) conditioning programs to at a minimum maintain the groups' fitness standards. These fitness results directly impact the athletes' ability to compete successfully and are also an integral aspect of injury prevention.

Plan for topic "Students completing the course will be able to apply the appropriate level of sport-specific physical conditioning to compete at the intercollegiate level.": 2011/12

To continue focusing on aerobic conditioning in the off-season and pre-season (spring and summer) to insure the majority of the players entering the competitive season are prepared to meet the physical demands of the sport.

Plan for topic "Students completing this course will be able to compete in intercollegiate softball matches.": 2018/19

This was the first time assessing outcome #3. Instructor will continue with teaching plan for student-athletes to increase their knowledge of softball and prepare them for a competitive season.

Plan for topic "Students completing the course will be able to maintain sport-specific physical conditioning to compete at the intercollegiate level.": 2015/16

While this is an assessment to determine aerobic fitness, softball is a sport that involves anaerobic conditioning. In future off-season conditioning classes, we will focus on overall fitness which will include flexibility, muscular strength and muscular endurance. This will not only help student success but will assist in the prevention of athletic injury.

Plan for topic "Students completing the course will be able to describe the rules of softball in a collegiate competition. [NA]": 2012/13

Continue current methodology when discussing rules of the game of softball.

# DVC Instructional Course SLO Action Plans

## 1049. Intercollegiate Tennis, Women [KNICA-219] belonging to Kinesiology, Athletics and Dance [KNICA]

Plan for topic "Students completing the course will be able to apply the appropriate level of sport-specific physical conditioning to compete at the intercollegiate level."

### 2017/18

Instructor will continue to incorporate physical conditioning exercises as part of each class session in preparation for intercollegiate tennis matches.

### 2014/15

Physical conditioning is a daily part of our class. Preparing student-athletes for competition requires a combination of conditioning and a high skills set. Depending on the time of the semester, instructor may vary test with other physical conditioning drills and performance skills for future assessments.

### 2011/12

Emphasize more game like situations through drills in which a variety of scoring will take place for everyone to be exposed to and know early on and throughout the semester.
### Plan for topic "Students completing the course will be able to demonstrate the appropriate strategies for their event (s).": 2018/19

The assessment is great for tracking maximum sprint velocity of the student-athletes. The coaches need to have better workouts during practice rain outs that address sprint velocity. Although there were many improvements the coaches felt like the times should have been more significant. It is believed that weather was a factor in this outcome.

### Plan for topic "Students completing the course will be able to demonstrate the appropriate strategies for their event (s).": 2015/16

This assessment was able to track maximum sprint endurance of the students. I will conduct an assessment next season that will assess the time in which a student travels across 30 meters. This test will be used to track and modify students race plan in the short sprint cohort. This assessment will be able to track maximum sprint velocity of the students.

### Plan for topic "Students completing the course will be able to successfully compete in their specific track and field event(s).": 2012/13

Even though most of the athletes progressed and developed to improve their marks in most, if not all of their four (4) events, there were many that struggled with the climate demands and parameters of participating on an intercollegiate athletic team. I will conduct and experiment next season, having a mandatory try-out for all athletes (with specific parameters) as well as requiring them to sign a team contract which will outline all the rules, parameters and expectations of our collegiate team.

### Plan for topic "Students completing the course will be able to demonstrate the appropriate strategies for their event (s).": 2011/12

Continue with current coaching method regarding strategies for events.

### Plan for topic "Students completing the course will be able to successfully compete in their specific track and field event(s).": 2011/12

None at this time.

### Plan for topic "Students completing the course will be able to successfully demonstrate the rules of their track and field event(s).": 2011/12

None at this time.

<tr>
<td>2014/15</td>
<td>Instructor will incorporate the Cooper 1.5 mile run test and interval training in the first third of class (twice a week during preseason play) and taper the testing in the second &amp; third half of the class (once a week during conference and postseason play).</td>
</tr>
<tr>
<td>2012/13</td>
<td>Continue to provide game like situations during practice utilizing different scoring methods. In addition, instructor will provide the necessary information (scoring, new/updated rules, etc) for students to have in a handbook for reference throughout the semester/season.</td>
</tr>
</tbody>
</table>
**Plan for topic "Students completing the course will be able to demonstrate knowledge of the rules of water polo."**: 2018/19

Water polo rules and interpretations are changed slightly each season by the NCAA rules committee. The plan of action is for instructors of this class to review annual rule changes and review with students to ensure students will continue to be able to demonstrate they understand the most current rules of water polo.

**Plan for topic "Students completing the course will be able to compete in intercollegiate water polo matches."**: 2015/16

While 85% of students were able to successfully compete in intercollegiate water polo matches, 15% of students did not possess the skill set required to compete. To address these needs, athletes will take an off-season, sport-specific conditioning class focused on preparing students to be able to successfully compete in intercollegiate water polo matches in future seasons.

**Plan for topic "Students completing the course will be able to demonstrate knowledge of the rules of water polo."": 2012/13

No Action needed. Team finished as conference champions.

**Plan for topic "Students completing the course will be able to apply the appropriate level of sport-specific physical conditioning to compete at the intercollegiate level."": 2012/13

While the instructor/coach would like 100%, the success rate of 96% does not warrant any changes. If the percent decreases during the next assessment cycle, then changes will need to be made.

**Plan for topic "Students completing the course will be able to compete in intercollegiate water polo matches."": 2012/13

Will continue to use current practice and training modalities to ensure student success.
### Plan for the topic "Students completing the course will be able to apply the appropriate level of sport-specific physical conditioning to compete at the intercollegiate level."

- **Plan for 2018/19:** The plan of action for instructors of this course is to adapt conditioning methods accordingly to account for changes in rules and style of water polo. This will help students achieve success in being able to apply the appropriate level of sport-specific physical conditioning to compete at the intercollegiate level.

- **Plan for 2012/13:** No action needed.

### Plan for the topic "Students completing the course will be able to compete in intercollegiate water polo matches."

- **Plan for 2015/16:** Although most of the students were able to compete in intercollegiate water polo matches, 12% of students did not possess the skill set required to compete. To address these needs, there will be an off-season skill and technique-based course for all athletes to improve their skill set.

- **Plan for 2012/13:** No action needed.

### Plan for the topic "Students completing the course will be able to demonstrate knowledge of the rules of water polo."

- **Plan for 2012/13:** No action needed.
Plan for topic "Students completing the course will be able to compose appropriate bibliographic citations for various information sources in different formats. (ICAP 5.3.2)" : 2017/18

In future sections, instructors will be encouraged to have at least one discussion forum on citations. There are currently two LMSs being used for the course -- Canvas and NoodleTools. Students are sometimes reluctant to go back and forth between the two sites. A more unified approach -- having the discussion about citations in Canvas -- will make it easier for students to participate in discussions and will allow students to comment on each other's citations.

Plan for topic "Students completing the course will be able to compose appropriate bibliographic citations for various information sources in different formats. (ICAP 5.3.2)" : 2014/15

The percentage of students completing this assignment with an 80% or higher was affected by six students who did not attempt the assignment. For future classes, there needs to be more scaffolding for the use of NoodleTools and citations in general. While NoodleTools makes the citation process easier, it is a barrier for some less tech-savvy students. Scaffolding for this assignment can be anything from annotated screenshots, screen-casts, and/or live web meetings.

Plan for topic "Students completing the course will be able to evaluate information and its sources by articulating and applying fundamental evaluation and selection criteria. (ICAP 3.2)" : 2013/14

The evaluation rubric needs to be expanded with more descriptive language. Also, an activity/assignment needs to be included that asks students to rank sample evaluation papers using the rubric. This is a fundamental assignment in the course and needs to continue.

Plan for topic "Students completing the course will be able to evaluate information and its sources by articulating and applying fundamental evaluation and selection criteria. (ICAP 3.2)" : 2012/13

Instructors will continue to require sources evaluations. Instructors will review student submissions and edit rubric. Next assessment cycle, instructors will set a goal of 80% of students at the "acceptable" level.

Plan for topic "Students completing the course will be able to analyze an information need or research topic in question to identify key concepts. (ICAP 1.1.5)" : 2010/11

Instructors added additional background readings and a second exercise to reinforce the concepts and allow for more practice. The consensus was that the quiz question was not adequate for assessing the particular skills.

Plan for topic "Students completing the course will be able to evaluate information and its sources by articulating and applying fundamental evaluation and selection criteria. (ICAP 3.2)" : 2010/11

Instructors agreed to continue including this course content and assignment. Based on student work, instructors discussed ways of elaborating descriptions of successful work in assignment rubric.

Plan for topic "Students completing the course will be able to compose appropriate bibliographic citations for various information sources in different formats. (ICAP 5.3.2)" : 2010/11
Instructors agreed that the quiz question was not an adequate method of measuring student ability. Plans were made to continue to use the citations assignment while adding new types of resources such as blogs, photo sharing sites, and primary source documents.
1056. Topics in Library Studies [LS-150] belonging to Library [LS]
**DVC Instructional Course SLO Action Plans**

Plan for topic "Students completing this course will be able to compare and contrast the missions, and roles of various types of libraries in contemporary society; the functions of and relationship among different divisions within a library; and the respective roles of library technicians and other staff in libraries."

<table>

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to apply the basic principles of collection development and management including the selection, acquisition, de-selection, retention and replacement of all types of library resources.": 2018/19

In the future, we plan to review content that will be covered in the midterm more thoroughly in the class prior to the midterm. The knowledge required to correctly respond to questions #3 & #6 particularly need additional clarification and review. Also, clearer clues within the questions themselves should be provided. In general, I plan to reach out to struggling students more proactively prior to testing to discover how I can better support their comprehension of materials. Finally, we will be seeking open source resources in helping to demonstrate the principles measured in this assessment topic.

Plan for topic "Students completing this course will be able to apply the basic principles of collection development and management, including the selection, acquisition, de-selection, retention, and replacement of all types of library resources.": 2015/16

Longer Midterm only weighted for the full 10 points. Scrap the end of year quiz.

Allow for more preparation and open book.

Plan for topic "Students completing this course will be able to describe and analyze the operations of a library’s circulation functions.": 2015/16

1 visit only mid to late semester and focus on circulation more than collection development.

Plan for topic "Students completing this course will be able to apply the basic principles of collection development and management including the selection, acquisition, de-selection, retention and replacement of all types of library resources.": 2015/16

I will want to do this again, although I can’t assume that every student will already be working in a library setting, so the exercise will go more along the lines of bringing in books they would recommend for weeding at a library.
Before final is given, the instructor should remind students the scoring weight of the final and the value of the exercise. A better result might have occurred if the instructor had emphasized prior to the take-home exam that it was critical that the work be neat and complete; cataloging work (at all levels) is marked by attention to detail. These 2 students, in particular, did not give sufficient attention to the details of being complete--all fields, call numbers and subject headings--in order to be successful on this part of the final.
It worked really well to provide a model answer alongside the instructions, so that students knew exactly what was expected in terms of annotating each source. All annotations included a meaningful evaluation of the sources’ credibility and relevance. While the sources presented were current, timeliness was typically not included in the students’ evaluations.

Next time, I will place more emphasis on the actual number of sources requested and ask for the sources to be evaluated following a specific model, i.e. CRAAP.

I might also be more specific about requesting a variety of formats of sources.
### DVC Instructional Course SLO Action Plans

#### 1061. School Library and Media Services [LT-106] belonging to Library [LT]

**Plan for topic "Students completing this course will be able to select appropriate materials for children and youth with diverse backgrounds and at various developmental stages."**: 2020/21

Due to Covid-related impacts and the challenges of moving hybrid courses completely online at short notice, some students have been unable to complete assignments. We will continue to support them in overcoming academic challenges during this time.

**Plan for topic "Students completing this course will be able to recognize the role of advocacy and communicating the needs and value of an effective school library program by utilizing current research and site specific data to create an annual report of activities."**: 2016/17

This assessment demonstrates the majority of students in the Summer 2017 LT 106 class possess a solid understanding of the course learning outcomes. This assignment is an overview of all content taught and is an assessment of students understanding of school library management. Next steps will include refining the criteria and expectations of this assignment to make the goals more challenging and the scoring rubric more specific.
Many students requested time outside of class to work with scanners, indicating that class time was not sufficient to accomplish the project. We hired a lab assistant to give hands-on assistance during class and will consider employing a lab assistant for hours outside of class time and/or additional face-to-face classes for students to work on the final project. We will continue the group format for this project, as it helped the instructor to address comprehension and motivation issues. The instructor will make sure that groups requiring additional guidance are identified early in the semester and directed to extra lab hours.
1064. Storytelling [LT-111] belonging to Library [LT]

Plan for topic "Students completing this course will be able to identify and locate a suitable story and prepare it for a specific audience.": 2016/17

This assignment was especially effective at assessing students’ ability to identify and locate a suitable story for a specific audience. By having students select their own stories to analyze, the assignment gave them an opportunity to apply their knowledge of the criteria for a good read-aloud story and developmental appropriateness in a practical and tangible way. While the assignment did ask the students to think about how they would prepare and tell their story, the assignment could have better achieved the learning outcome by following up the written analysis with an in-class reading of the story. This would have given students the opportunity to demonstrate their ability to appropriately prepare the story.

Plan for topic "Students completing this course will be able to, before an audience, perform stories of varying types that meet standards for cultural and educational traditions." : 2016/17

This assignment was an effective way to assess the learning outcome as it gave students an opportunity to perform a story before an audience. Going forward, I would dedicate more time in-class to workshopping the performances so that students can gain the benefits of peer-review and critique. I also plan to refine my rubric so that it provides more specific, constructive feedback.
DVC Instructional Course SLO Action Plans

DVC Instructional Course SLO Action Plans

1066. Topics in Library Technology [LT-150] belonging to Library [LT]

Plan for topic "LT-150A - Students completing this course will be able to use basic tools in common computer applications such as word processing, spreadsheets and presentation.": 2018/19

|The class is not currently scheduled so we will assess it the next time it is offered.|

Plan for topic "LT-150A - Students completing this course will be able to use basic tools in common computer applications such as word processing, spreadsheets and presentation.": 2015/16

|This was a customized course for the Oakland-DVC Library Tech Project and utilized a specialized course content that could be transition for use in the DVC Library Technologies program.|

In reviewing the students performance in the course, it is recommended we continue to further develop additional topics in the area of troubleshooting methods. The will help students to get a better grasp of the relationship between the applications and possible challenges that may occur while using the software.

The department will determine if they will proceed with the experimental course process in the near future. The department will continue to explore adding this Topics(Experimental) course into the Library Technology program certificate.
Plan for topic "Students completing this course will be able to identify and improve selected professional work habits and employability skills such as time management, communication, and teamwork.": 2018/19

WRKX department has built out a great team of supportive faculty members. In addition, we have redefined our SLOs (for more effective analysis) and have created an assessment tool which will be integrated into Canvas (once the updated SLOs are approved) and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.

Plan for topic "Students completing this course will be able to develop professional expertise related to a career path or strategy to secure employment.": 2018/19

WRKX department has built out a great team of supportive faculty members. In addition, we have redefined our SLOs (for more effective analysis) and have created an assessment tool which will be integrated into Canvas (once the updated SLOs are approved) and recreating the entire SLO assessment process. 1069. Support for Success in MATH-121 Plane Trigonometry [MATH-021] belonging to Mathematics [MATH]
1070. Support for Success in MATH-135 College Algebra [MATH-035] belonging to Mathematics [MATH]
Plan for topic "Students completing this course will be able to Solve systems of equations."

This course was offered for the first time in Fall 2019, and will be assessed in 2020-21.
1071. In-Progress Arithmetic and Basic Algebra Review Self-Paced [MATH-040] belonging to Mathematics [MATH]
DVC Instructional Course SLO Action Plans

1072. In-Progress Beginning and Intermediate Algebra Self-Paced [MATH-041] belonging to Mathematics [MATH]
1073. Support for Success in MATH-142 Elementary Statistics W/ Probability [MATH-042] belonging to Mathematics [MATH]
Plan for topic "Students completing this course will be able to manipulate formulas to isolate a specified variable.": 2018/19

This course was offered for the first time in Fall 2019 and will be assessed in 2021-22.
DVC Instructional Course SLO Action Plans

1074. In-Progress Prealgebra with Arithmetic Review Self-Paced [MATH-050] belonging to Mathematics [MATH]

Plan for topic "Students completing MATH-050 will be able to solve a linear equation in one variable that contains variables on one side of the equation.": 2018/19

This class will no longer be offered due to AB705 changes. Therefore, there is no action plan for now. These results will be revisited if the course is offered in the future.

Plan for topic "Students completing this course will be able to simplify expressions by combining like terms and using the commutative, associative, and distributive properties.": 2018/19

This class will no longer be offered due to AB705 changes. Therefore, there is no action plan for now. These results will be revisited if the course is offered in the future.

Plan for topic "Students completing this course will be able to simplify expressions involving integers using order of operations.": 2018/19

This class will no longer be offered due to AB705 changes. Therefore, there is no action plan for now. These results will be revisited if the course is offered in the future.

Plan for topic "Students completing MATH-050 will be able to add, subtract, multiply, divide with whole numbers, fractions, and decimals." : 2016/17

The Math Department feels that operations involving fractions is an essential topic in Math 50 because it is needed for all math classes. The Department plans to take the following actions to improve the overall achievement of this outcome by all Math 50 students.

At the beginning of each semester, the department will communicate the following to each Math 50 instructor:

1) Continue to use ALEKS because mastery of fractions is working using this program.

2) Instructors should go over SLO with students after students take the SLO assessment and check students work to understand mistakes made in operations with fractions.

The Department wants to continue to communicate with Self-Paced instructors from the San Ramon Campus to ensure that SRC data is included. Self-paced faculty recommends that face to face courses assess fewer topics. This way there could be more questions for each topic and get a better understanding where students are making mistakes.
Plan for topic "Students completing MATH-050 will be able to solve a linear equation in one variable that contains variables on one side of the equation." 2016/17

The Math Department feels that solving linear equations is an essential topic in Math 50 because it is the foundation for all math classes that follow. The Department plans to take the following actions to improve the overall achievement of this outcome by all Math 50 students.

At the beginning of each semester, the department will communicate the following to each Math 50 instructor:

Instructors should go over SLO with students after students take the SLO assessment and check students work to understand mistakes made in solving linear equations.

The Department recommends increasing the level of difficulty of the question by assessing an equation which requires two steps for solving. Also, the Department wants to continue to communicate with Self-Paced instructors from the San Ramon Campus to ensure that SRC data is included. Self-paced faculty recommends that face to face courses assess fewer topics. This way there could be more questions for each topic and get a better understanding where students are making mistakes.

Plan for topic "Students completing this course will be able to add and subtract fractions with unlike denominators." 2016/17

The Math Department feels that operations involving fractions is an essential topic in Math 50 because it is needed for all math classes. The Department plans to take the following actions to improve the overall achievement of this outcome by all Math 50 students.

At the beginning of each semester, the department will communicate the following to each Math 50 instructor:

1) Continue to use ALEKS because mastery of fractions is working using this program.

2) Instructors should go over SLO with students after students take the SLO assessment and check students work to understand mistakes made in operations with fractions.

The Department wants to continue to communicate with Self-Paced instructors from the San Ramon Campus to ensure that SRC data is included. Self-paced faculty
DVC Instructional Course SLO Action Plans

recommends that face to face courses assess fewer topics. This way there could be more questions for each topic and get a better understanding where students are making mistakes.

Plan for topic "Students completing this course will be able to evaluate expressions by substitution.": 2016/17

The Math Department feels that evaluating expressions by substitution is an essential topic in Math 50 since it is an important skill for Math 50 students to learn. The Department plans to take the following actions to improve the overall achievement of this outcome by all Math 50 students.

At the beginning of each semester, the department will communicate the following to each Math 50 instructor:

Instructors should go over SLO with students after students take the SLO assessment and check students work to understand mistakes made in evaluating expressions.

The Department suggest that this topic have two questions, one with no negatives and one with negatives, since it is not clear if students are not understanding evaluating or negative numbers. Self-paced faculty recommends that face to face courses assess fewer topics. This way there could be more questions for each topic and get a better understanding where students are making mistakes. The department wants to continue to communicate with Self-Paced instructors from the San Ramon Campus to ensure that SRC data is included.

Plan for topic "Students completing MATH-050 will be able to add, subtract, multiply, divide with whole numbers, fractions, and decimals.": 2013/14

Although more than 70% answered Q1 correctly, the dept would like to see a better result when simple fractions are subtracted. This problem has been observed in other class levels as well. Our plan is to emphasize finding and applying common denominators. The department was pleased with the results of Q4 and plans to compare them with the results in the regular and online courses. In addition we plan to assess Math 050 in the same cycle year using the same SLO testing environment as Math 075.

Plan for topic "Students completing MATH-050 will be able to add, subtract, multiply, and divide with signed numbers.": 2013/14
The department was pleased with the results of Q3 and plans to compare them with the results in the regular and online courses. In addition we plan to assess Math 050 at both the Pleasant Hill campus and the San Ramon campus in the same cycle year using the same SLO testing environment as Math 075.

Plan for topic "Students completing MATH-050 will be able to solve a linear equation in one variable that contains variables on one side of the equation.": 2013/14

The department was pleased with the results of Q4 and plans to compare them with the results in the regular and online courses. In addition we plan to assess Math 050 at both the Pleasant Hill campus and the San Ramon campus in the same cycle year using the same SLO testing environment as Math 075.
DVC Instructional Course SLO Action Plans

1075. In-Progress Elementary Algebra Self-Paced [MATH-051] belonging to Mathematics [MATH]

Plan for topic "Students completing MATH-051 will be able to apply the basic concepts of algebra to solve elementary algebraic equations in one variable.": 2019/20

This course is no longer been offered due to AB705 changes.

Plan for topic "Students completing this course will be able to solve linear equations, including equations containing fractions.": 2016/17

This topic is an essential learning outcome. The math department feels it is essential to emphasize the importance of using the order of operations, especially as applied to equations. The self-paced faculty will have students work with examples that emphasize doing multiple steps on both sides of an equation. Instructors will go over students tests with them to ensure they understand mistakes they make and how to correct them.

Plan for topic "Students completing this course will be able to find the slope of a line given two points on the line, the equation of the line, or information about a parallel or perpendicular line.": 2016/17

This topic is an essential learning outcome. Self-paced faculty will go over students tests with them to ensure they understand mistakes they make and how to correct them. Instructors plan to make a list of typical errors from these results, and to follow up with students after grading their exams.

Plan for topic "Students completing this course will be able to graph a line in the Cartesian coordinate system by point plotting, by finding intercepts, or by using the slope-intercept form of the equation of a line.": 2016/17

This topic is an essential learning outcome. The self-paced math faculty plan to make a list of typical errors students have made from these results and will follow up with students after grading tests. The faculty will contact ALEKS to change the format for which students input intercepts, as currently students are not directed to use correct ordered pair notation.

Plan for topic "Students completing MATH-051 will be able to apply the basic concepts of algebra to solve elementary algebraic equations in one variable.": 2013/14

The department was pleased with the results and plans to compare them with the results in the regular and online courses. In addition we plan to assess Math 051 at both the Pleasant Hill campus and the San Ramon campus in the same cycle year using the same SLO testing environment as Math 090.

Plan for topic "Students completing MATH-051 will be able to use formulas, equations, inequalities, graphs, and tables to solve problems.": 2013/14

The department was pleased with the results and plans to compare them with the results in the regular and online courses. In addition we plan to assess Math 051 at both the Pleasant Hill campus and the San Ramon campus in the same cycle year using the same SLO testing environment as Math 090.

Plan for topic "Students completing MATH-051 will be able to use literal numbers and algebraic equations to formulate and solve
The department was pleased with the results and plans to compare them with the results in the regular and online courses. In addition we plan to assess Math 051 at both the Pleasant Hill campus and the San Ramon campus in the same cycle year using the same SLO testing environment as Math 090.
The Math Department feels that determining important information about standard functions is an essential topic for Math 52 because it is needed in many applications and in other math courses. The department feels that the results of the both questions are below expectations, but that Self-Paced students may not have seen quadratic functions and the process of finding the vertex of a parabola in some time because of the recent revision of the Self-Paced program (see below).

The department feels that the results of this assessments may not be as reliable as we would like because the results in this assessment include:

- students who may not be in Math 52, but are taking the Lesson 6-8 test as a Math 120SP student,

- students who are in Math 52, but are retaking the Lesson 6-8 test and are therefore answering the assessment questions for the second or third time,

- and students who are taking more than two semesters to complete Math 120SP. These students may not have seen some of this material in a long time.

The department feels that the Self-Paced program should look for a way to limit the SLO questions to students who are enrolled in Math 52 and taking the 6-8 test for the first time. (Students should not be answering the SLO assessment questions more than once.)

The Self-Paced program went through a major revision during the semesters that these assessments were administered because the ALEKS program was revised, and some students may not have seen the material at all when they answered the assessment questions. Care should be taken to align the SLO assessment questions with the relevant topics in ALEKS so they may be included on the correct test.

Other suggestions for the Self-Paced program and the SLO Committee:

- Instructors should start a list of problem types that students in Self-Paced classes consistently have trouble with.

- Each instructor for a Self-Paced course should be sent the action plan at the beginning of the semester that instructors for the corresponding lecture class received. - The SLO Committee should communicate with the Self-Paced instructors the significance of the action plans and their relevance with respect to Self-Paced students. Although there is no direct instruction (lecturing) in a Self-Paced course, instructors should be made aware of the issues raised by past assessments of courses with the same learning outcomes.
Plan for topic "Students completing MATH-052 will be able to solve any quadratic equation." 2014/15

The self-paced math program has decided to change the mode of delivery for its SLO assessments. In the future, the Self-Paced Coordinator will receive the questions created by the department for the lecture and online versions of the same course and create an additional page on one of the written exams for the self-paced students containing these questions. In this way, the testing conditions will be comparable to the lecture classes, and the data will be a better indication of learning.

Plan for topic "Students completing MATH-052 will be able to perform operations with rational expressions, including simplifying the answer to lowest terms" 2014/15

The self-paced math program has decided to change the mode of delivery for its SLO assessments. In the future, the Self-Paced Coordinator will receive the questions created by the department for the lecture and online versions of the same course and create an additional page on one of the written exams for the self-paced students containing these questions. In this way, the testing conditions will be comparable to the lecture classes, and the data will be a better indication of learning.

Plan for topic "Students completing MATH-052 will be able to determine the equation of a line from a graph or from a pair of points." 2013/14

Although a majority of the students were correct, the dept would like to see a better result when simple quadratic equations are solved. The most common mistake was that students only chose $x = 1/3$ instead of the correct $x = ± 1/3$. Our plan is to emphasize that positive numbers have two square roots, hence the ± symbol. In addition to the square root method, the factoring the difference of squares method should also be demonstrated in order to obtain the correct answers (one positive, one negative). In addition we plan to assess Math 052 at both the Pleasant Hill campus and the San Ramon campus in the same cycle year using the same SLO testing environment as Math 120.

Plan for topic "Students completing MATH-052 will be able to perform operations with rational expressions, including simplifying the answer to lowest terms" 2013/14

The department was pleased with the results of Q2 and plans to compare them with the results in the regular and online courses. In addition we plan to assess Math 052 at both the Pleasant Hill campus and the San Ramon campus in the same cycle year using the same SLO testing environment as Math 120.

Plan for topic "Students completing MATH-052 will be able to determine the equation of a line from a graph or from a pair of points." 2013/14

The department was pleased with the results of Q3 and Q4, and plans to compare them with the results in the regular and online courses. In addition we plan to assess Math 052 at both the Pleasant Hill campus and the San Ramon campus in the same cycle year using the same SLO testing environment as Math 120.
DVC Instructional Course SLO Action Plans

1077. In-Progress College Algebra Self-Paced [MATH-053] belonging to Mathematics [MATH]

Plan for topic "Students completing this course will be able to": 2017/18

Math 53 is a course that is used as a “placeholder” for students in Math 135SP who wish to finish the course in two semesters. Math 135SP students have until just before the withdraw deadline to make the decision on whether they will finish in one semester or two, and the assessment questions are included in a test that is taken by all students in Math 135SP. The assessment results that are reported are not disaggregated because it is not known at the time that the test is taken which course the student is in. Since the majority of the students who are in Math 135SP do not ever transfer into Math 53, any data that is reported always includes predominantly students in Math 135SP. Also, the assessment questions are included in a written test that may be taken up to five times by any student, so some students may have answered the assessment questions multiple times.

The Math department will make sure that all future assessment questions that are used for Math 53 are assigned to a topic. The math department will also work to improve the communication between the PH Self-Paced program and the SRC Self-Paced program to ensure that students on both campuses are answering the same SLO questions, and the department will explore other ways to administer the SLO assessments at both campuses to allow meaningful comparisons to be made among different content delivery modalities.

Plan for topic "Students completing this course will be able to solve a quadratic equation.": 2015/16

The self-paced faculty have determined that this outcome is less essential for this course than others. We feel the outcome is more suited for Math 120, and we plan to change the topic to one about union and intersection of intervals in the next cycle of assessment.

Plan for topic "Students completing this course will be able to write the equation of a line, given its graph.": 2015/16

The self-paced faculty have determined that this outcome is less essential for this course than others. We feel the outcome is more suited for Math 120, and we plan to change the topic to one about choosing a graph to describe a short narrative situation. We feel that this new topic requires a more critical analysis of graphing appropriate to this level of math course.

Plan for topic "Students completing this course will be able to find the domain of a function, given its equation.": 2015/16

The self-paced faculty have determined that this outcome is critical for this level of math, and we plan to emphasize both the correct use of interval notation and the importance of considering all aspects of domain restrictions when working with our self-paced students. In addition, since our self-paced tutors work with the students just as often as the faculty, we will emphasize both of these items in our tutor training and follow up correspondence throughout the semester.

Plan for topic "Students completing MATH-053 will be able to graph polynomial, exponential, logarithmic, and rational functions.": 2013/14

The department was pleased with the results of Q1 and plans to compare them with the results in the regular and online courses. The result of Q3 is not acceptable. The most
common mistake was that students chose $x \leq 3$ instead of the correct $x > 3$. However, it was not apparent whether the mistake was due to getting the domain wrong, or simply using the wrong interval notation (the multiple answers were given using interval notation). It appears that students found the proper domain for the square root function, but may have overlooked that the radical was in a denominator. Our plan is to emphasize that once the domain of a square root function is found, it must be adjusted when the radical is in a denominator; that is, the argument must be positive (not just non-negative). In addition, the use of interval notation will be emphasized. In addition we plan to assess Math 053 at both the Pleasant Hill campus and the San Ramon campus in the same cycle year using the same SLO testing environment as Math 135.

Plan for topic "Students completing MATH-053 will be able to solve problems involving linear functions and their applications.": 2013/14

The department was pleased with the results of Q2 and plans to compare them with the results in the regular and online courses. In addition we plan to assess Math 053 at both the Pleasant Hill campus and the San Ramon campus in the same cycle year using the same SLO testing environment as Math 135.
DVC Instructional Course SLO Action Plans

1078. In-Progress Pre-Calculus Self-Paced [MATH-054] belonging to Mathematics [MATH]
1079. Prealgebra with Arithmetic Review [MATH-075] belonging to Mathematics [MATH]

Plan for topic "Students completing this course will be able to perform order of operations involving adding, subtracting, multiplying, and dividing with signed numbers." : 2018/19

The Math Department feels that students performed well enough on this question that a different topic could be assessed should this course ever be offered again.

Plan for topic "Students completing the course will be able to add and subtract fractions with unlike denominators, including variables." : 2018/19

The Math Department feels that both question should be revised should this course ever be taught and assessed again. They recommend that the first question be changed so that it does not involve a whole number. In addition, because it is expected to be the harder of the two problems for this topic, it should be the second problem.

The department feels that the second question can be replaced with something different. Alternatively, they suggested replacing both questions with relatively straightforward questions about adding or subtracting fractions, with common denominators in one case and different denominators in the other.

Plan for topic "Students completing the course will be able to simplify expressions by combining like terms and by using the commutative and associative properties." : 2018/19

This class will no longer be offered due to AB705 changes. Therefore, there is no action plan for now. These results will be revisited if the course is offered in the future.

Plan for topic "Students completing this course will be able to evaluate expressions by substitution." : 2018/19

This class will no longer be offered due to AB705 changes. Therefore, there is no action plan for now. These results will be revisited if the course is offered in the future.

Plan for topic "Students completing the course will be able to apply the concept of percent to practical elementary situations." : 2018/19

This course won't be offered again due to AB 705, but should it be resurrected in some strange, post-apocalyptic future, the following comments may be useful.

The Math Department feels that being able to work with percentages is an essential learning outcome for Math 75. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 75 students.
At the beginning of each semester, the department will communicate the following to each Math 75 instructor:

1) Remember to emphasize different representations of percentages. Students should have experience working with them as fractions and decimals and words. For example, students should feel comfortable thinking of 25% not just as 0.25 and 1/4, but also as a quarter.

The department also suggested changing the questions used to assess this topic, should this course ever be assessed again in some alternate timeline. One idea is to replace the second question with another one like the first question. In one case, the correct answer would be expressed using decimal representation, such as 0.2C. In the other, the correct answer should be expressed using fraction representation, such as 1/5 C. Alternatively, one faculty member suggested allowing two correct answers for the first problem, one expressed with decimals and one expressed with fractions.

Plan for topic "Students completing this course will be able to perform order of operations involving adding, subtracting, multiplying, and dividing with signed numbers.": 2016/17

The Math Department feels that evaluating numerical expressions involving integers using order of operations is an essential topic to be mastered in Math 75, especially because it is the foundation for evaluating and simplifying which is crucial for all math levels. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 75 students.

At the beginning of each semester, the department will communicate the following to each math 75 instructor:

1) Emphasize rules for operations with integers throughout the semester. Have students practice with and without a calculator.

2) Emphasize how to use PEMDAS correctly. Multiplication does not always come before division and addition does not always come before subtraction.

3) Pick problems for students to practice where the student has to divide before multiplying and subtract before adding.

The department suggests that this question be assessed again since it is an important skill for students to have moving forward in math. Changing the problem so that students have to divide before multiplying is suggested.
Plan for topic "Students completing the course will be able to add and subtract fractions with unlike denominators, including variables.": 2016/17

The Math Department feels that operations with fractions is an essential topic for Math 75SP because it is needed for all math classes. The department plans to take the following actions to improve the overall achievement of this outcome by all Math 75SP students.

At the beginning of each semester, the department will communicate the following to each Math 75SP instructor:

1) Continue to use ALEKS because mastery of fractions is working with this program.

2) Instructors should go over SLO with students after students take the SLO assessment and check students work to understand mistakes made in operations with fractions.

The Department wants to continue to communicate with Self-Paced instructors from the San Ramon Campus to ensure that SRC data is included. Self-paced faculty recommends that face to face courses assess fewer topics. This way there could be more questions for each topic and get a better understanding where students are making mistakes.

Plan for topic "Students completing the course will be able to solve a linear equation in one variable that contains variables on one side of the equation.": 2016/17

The Math Department feels that solving linear equations is an essential topic in Math 75SP because it is the foundation for all math classes that follow. The department plans to take the following actions to improve the overall achievement of this outcome by all Math 75SP students.

At the beginning of each semester, the department will communicate the following to each Math 75SP instructor:

Instructors should go over SLO with students after students take the SLO assessment and check students work to understand mistakes made in solving linear equations.

The Department recommends increasing the level of difficulty of this question by assessing an equation which requires two steps for solving. Also, the Department wants to continue to communicate with Self-Paced instructors from the San Ramon Campus to ensure that SRC data is included. Self-paced faculty recommends that face to face
courses assess fewer topics. This way there could be more questions for each topic and get a better understanding where students are making mistakes.

Plan for topic "Students completing the course will be able to evaluate expressions by substitution.": 2016/17

The Math Department feels that evaluating an expression with given values is an essential topic to be mastered in Math 75 since it is used in all. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 75 students.

At the beginning of each semester, the department will communicate the following to each math 75 instructor:

Challenge students to evaluate expressions, equations, and formulas of all types by substituting all types of numbers for the variables.

The department suggests that this question be assessed again but making the problem more difficult by not using a familiar formula such as the perimeter of a rectangle formula.

Plan for topic "Students completing the course will be able to translate simple word problems into equations (or expressions).": 2016/17

The Math Department feels that translating simple words into an equation or expression is important but not essential in math 75 since this concept will continue to be developed in future math courses. The department plans to take the following actions to improve the overall achievement of this outcome by all Math 75 students.

At the beginning of each semester, the department will communicate the following to each math 75 instructor:

1) Use math vocabulary regularly such as product, quotient, sum, and difference.

2) Emphasize when parentheses are needed.
The department suggests that this topic not be assessed next time and not to replace it with another topic since this assessment has six topics to assess, five is sufficient.

Plan for topic "Students completing this course will be able to evaluate expressions by substitution."

The Math Department feels that simplifying expressions using the commutative, associative, and distributive properties is an essential learning outcome for Math 75 since it is essential in all math courses. The department plans to take the following actions to improve the overall achievement of this outcome by all Math 75 students.

At the beginning of each semester, the department will communicate the following to each math 75 instructor:

1) Emphasize that when using the distribute property, multiply by every term in the parentheses.

2) Emphasize combining like terms.

3) Practice problems which involve the distributive property and combining like terms.

The department suggests increasing the level of difficulty for the problem involving the distributive property by adding another term outside of the parentheses and to increase the difficulty for the problem involving combining like terms by including the variable squared as a possible answer in the multiple choice.

Plan for topic "Students completing the course will be able to simplify expressions by combining like terms and by using the commutative and associative properties."
The Math Department feels that simplifying expressions using the commutative, associative, and distributive properties is an essential learning outcome for Math 75 since it is essential in all math courses. The department plans to take the following actions to improve the overall achievement of this outcome by all Math 75 students.

At the beginning of each semester, the department will communicate the following to each math 75 instructor:

2) Emphasize combining like terms.

3) Practice problems which involve the distributive property and combining like terms.

The department suggests increasing the level of difficulty for the problem involving the distributive property by adding another term outside of the parentheses and to increase the difficulty for the problem involving combining like terms by including the variable squared as a possible answer in the multiple choice.

Plan for topic "Students completing this course will be able to perform order of operations involving adding, subtracting, multiplying, and dividing with signed numbers." : 2013/14

In spring 2015, the department plans to re-evaluate its SLO assessment process. In recent years, the department has seen a decline in student participation in assessments done on survey monkey, and currently there are no safeguards in place to ensure that students are taking the assessment without using a calculator or other resources that are not allowed. Additionally, the department finds that many students are not motivated to take the assessment, as it is not part of their grade and they do not see a graded result when they are finished. Last, the department plans to change the current structure of how it analyzes SLO data, so that better measure can be made of the data. Two meeting dates have been scheduled for this work in Spring 2015, and a discussion for how to structure SLO assessments is also already underway.

Plan for topic "Students completing this course will be able to perform order of operations involving adding, subtracting, multiplying, and dividing with signed numbers."

Teachers reviewing these results recommend explaining the idea of "PEMDAS" by circling the M & D, and the A & S, to indicate they are grouped on the same level of priority. Further, instructors should emphasize that MD doesn't mean that M comes first, and AD doesn't mean that A comes first.

Plan for topic "Students completing the course will be able to add and subtract fractions with unlike denominators, including variables."

Continue to focus on finding a common denominator to subtract or add fractions.

Plan for topic "Students completing the course will be able to solve a linear equation in one variable that contains variables on one side of the equation."

Continue to focus on doing inverse operations to undo multiplication. In general, the concept of solving basic linear equations must continue to be emphasized.

Plan for topic "Students completing the course will be able to translate simple word problems into equations (or expressions)."

Teachers should continue to emphasize the basics for all fraction work: add, subtract, multiply, divide.

Plan for topic "Students completing the course will be able to simplify expressions by combining like terms and by using the commutative and associative properties."

The department should continue to emphasize multiplication rules with variables, but it appears that current instruction methods are working.

Plan for topic "Students completing this course will be able to evaluate expressions by substitution."

The department should continue to emphasize multiplication rules with variables, but it appears that current instruction methods are working.

of the equation."

The Math Department feels that solving linear equations is an essential topic in Math 75SP because it is the foundation for all math classes that follow. The department plans to take the following actions to improve the overall achievement of this outcome by all Math 75SP students.

At the beginning of each semester, the department will communicate the following to each Math 75SP instructor:

Instructors should go over SLO with students after students take the SLO assessment and check students work to understand mistakes made in solving linear equations.

The Department recommends increasing the level of difficulty of this question by assessing an equation which requires two steps for solving. Also, the Department wants to continue to communicate with Self-Paced instructors from the San Ramon Campus to ensure that SRC data is included. Self-paced faculty recommends that face to face courses assess fewer topics. This way there could be more questions for each topic and get a better understanding where students are making mistakes.

Plan for topic "Students completing the course will be able to simplify expressions involving integers using order of operations."

The Math Department feels that simplifying expressions involving integers using order of operations is an essential topic in Math 75SP because it is a skill that is used for all math classes that follow. The department plans to take the following actions to improve the overall achievement of this outcome by all Math 75SP students.

At the beginning of each semester, the department will communicate the following to each Math 75SP instructor:

Instructors should go over SLO with students after students take the SLO assessment and check students work to understand mistakes made in using the order of operations and integers.

The Department wants to re-evaluate this topic to observe if there is improvement but recommends removing the division symbol in the problem and using an order of operation problem more commonly seen in ALEKS. Also, the Department wants to continue to communicate with Self-Paced instructors from the San Ramon Campus to ensure that
DVC Instructional Course SLO Action Plans

SRC data is included. Self-paced faculty recommends that face to face courses assess fewer topics. This way there could be more questions for each topic and get a better understanding where students are making mistakes.

Plan for topic "Students completing this course will be able to evaluate expressions by substitution.": 2016/17

The Math Department feels that evaluating expressions is an essential topic in Math 75SP because it is used for other concepts in all math classes that follow. The department plans to take the following actions to improve the overall achievement of this outcome by all Math 75SP students.

At the beginning of each semester, the department will communicate the following to each Math 75SP instructor:

Instructors should go over SLO with students after students take the SLO assessment and check students work to understand mistakes made for evaluating expressions.

The Department recommends assessing this topic again. Since it is not clear whether students are not understanding how to evaluate expressions or how to work with negative numbers. The Department also feels that this topic should have two questions, one with and one without negative numbers. The Department wants to continue to communicate with Self-Paced instructors from the San Ramon Campus to ensure that SRC data is included. Self-paced faculty recommends that face to face courses assess fewer topics. This way there could be more questions for each topic and get a better understanding where students are making mistakes.

Plan for topic "Students completing this course will be able to add, subtract, multiply, divide with whole numbers, fractions, and decimals.": 2016/17

The Math Department feels that operations with fractions is an essential topic for Math 75SP because it is needed for all math classes. The department plans to take the following actions to improve the overall achievement of this outcome by all Math 75SP students.

At the beginning of each semester, the department will communicate the following to each Math 75SP instructor:
1) Continue to use ALEKS because mastery of fractions is working with this program.

2) Instructors should go over SLO with students after students take the SLO assessment and check students work to understand mistakes made in operations with fractions.

The Department wants to continue to communicate with Self-Paced instructors from the San Ramon Campus to ensure that SRC data is included. Self-paced faculty recommends that face to face courses assess fewer topics. This way there could be more questions for each topic and get a better understanding where students are making mistakes.

Plan for topic "Students completing this course will be able to simplify expressions by combining like terms and by using the commutative and associative properties.": 2016/17

The Math Department feels that simplifying by combining like terms and using the commutative and associative properties is an essential topic in Math 75SP because it is used for all math classes. The department plans to take the following actions to improve the overall achievement of this outcome by all Math 75SP students.

At the beginning of each semester, the department will communicate the following to each Math 75SP instructor:

Instructors should go over SLO with students after students take the SLO assessment and check students work to understand mistakes made in simplifying expressions.

The Department recommends either changing the question or the topic because the question does not address the topic. Also, the Department wants to continue to communicate with Self-Paced instructors from the San Ramon Campus to ensure that SRC data is included. Self-paced faculty recommends that face to face courses assess fewer topics. This way there could be more questions for each topic and get a better understanding where students are making mistakes.

Plan for topic "Students completing the course will be able to simplify expressions involving integers using order of operations.": 2013/14
DVC Instructional Course SLO Action Plans

The result of Q1 is not acceptable and must be improved. The dept had a lengthy discussion regarding the "order of operations" (PEMDAS) and the use of the division symbol (÷). If the division symbol was replaced with a fraction bar, results might improve. However, some faculty members want to keep the symbol and not avoid it; it was agreed that we should emphasize the "interpretation" of the symbol in the classroom. Our plan is to emphasize that M and D have the same priority, but the operations must be applied from Left to Right. In addition, it was suggested that Math 075 instructors ask their students to come up with an alternative memory device to replace the traditional PEMDAS. It was also suggested that the wording of the question be changed to "add parentheses (and perhaps also evaluate)." The department was pleased with the results of Q2 and plans to compare them with the results in the regular and online courses. In addition we plan to assess Math 075-SP in the same cycle and semester using the same SLO testing environment as Math 075.
### DVC Instructional Course SLO Action Plans

**1081. Summer Bridge to College Math [MATH-077] belonging to Mathematics [MATH]**

#### Plan for topic "Students completing MATH-077 will be able to identify their current algebra skill level.": 2017/18

This course is only offered during the summer session and was taught during the summer 2015, 2016, and 2017, but was not assessed. The SLO committee will develop an assessment plan and communicate it to instructors teaching this course at the beginning of summer session the next time this course is offered. Instructors will be given instructions on assessing and reporting results so that the committee can input results into Webslos.

#### Plan for topic "Students completing MATH-077 will be able to identify their current algebra skill level.": 2014/15

This is the first time the course has been assessed, and as such did not have a detailed assessment for the instructor to administrate. The Math Department will develop a detailed assessment form which will include for this topic a submission of the ALEKS Course Progress Report, which may include data broken down to individual students at the end of the term.

#### Plan for topic "Students completing MATH-077 will be able to build or rebuild pre-algebra and algebra skills.": 2014/15

This is the first time the course has been assessed, and as such did not have a detailed assessment for the instructor to administrate. The Math Department will make a detailed assessment form which will include for this topic a submission of the ALEKS Course Progress Report, which may include data broken down to individual students at the end of the term.

#### Plan for topic "Students completing MATH-077 will be able to utilize college math study skills": 2014/15

This is the first time the course has been assessed, and as such did not have a detailed assessment for the instructor to administrate. The Math Department will develop a student survey which assesses both the perceived and actual study skills. There will be specific questions addressing key study skills that the Department feels are important for students studying math in college.

#### Plan for topic "Students completing MATH-077 will be able to select the appropriate sequential DVC math course.": 2014/15

This is the first time the course has been assessed, and as such did not have a detailed assessment for the instructor to administrate. The Math Department will develop a student survey which assesses both the perceived and actual knowledge of the appropriate sequential DVC Math course for each student. There will be specific questions asking the student which is the next Math course they need to take.
### 1082. Topics in Basic Skills Math [MATH-080] belonging to Mathematics [MATH]

#### Plan for topic "Students completing this course will be able to work on material specific to student to maximize the probability to succeed in their future course work by accurately assessing where they will most likely be successful.":: 2018/19

The department plans to communicate with instructors to encourage students to take the second placement assessment at the end of course. Students are more motivated to taking the second placement assessment when told that it will help the department to analyze data to improve course.

#### Plan for topic "Students completing math-80S will be able to formulate questions that can be addressed with data, then organize, display, and analyze relevant data to address these questions and communicate the results.":: 2017/18

This course, Math Leap II Individualized Review towards Transfer Level Math, is currently being offered, Fall 2018, and will be assessed this semester. The results will be reported by 12/31/19.

#### Plan for topic "Students completing this course will be able to add, subtract, multiply, divide with signed numbers and fractions.":: 2014/15

This course is designed for students ready to move quickly through pre-algebra and algebra. However, most students in this experimental section were in no way prepared for such a class. Many were placed through counselor recommendation after they answered no questions correctly on the math assessment test. As such, the department is relatively pleased that these results are comparable to the traditional sequence, and we plan to market this accelerated course sequence much more specifically and carefully when it becomes a permanent course.

#### Plan for topic "Students completing this course will be able to use formulas and solve linear equations and inequalities.":: 2014/15

This course is designed for students ready to move quickly through pre-algebra and algebra. However, most students in this experimental section were in no way prepared for such a class. Many were placed through counselor recommendation after they answered no questions correctly on the math assessment test. As such, the department is relatively pleased that these results are comparable to the traditional sequence, and we plan to market this accelerated course sequence much more specifically and carefully when it becomes a permanent course.

#### Plan for topic "Students completing this course will be able to determine and use formulas and other equations and inequalities, graphs, tables, and applications.":: 2014/15

This course is designed for students ready to move quickly through pre-algebra and algebra. However, most students in this experimental section were in no way prepared for such a class. Many were placed through counselor recommendation after they answered no questions correctly on the math assessment test. Despite this fact, the department is clearly not satisfied with the level of achievement on this topic, and plans to revisit the curriculum for the course to ensure that this essential topic is getting the time and emphasis that it requires.

#### Plan for topic "Students completing math-80S will be able to formulate questions that can be addressed with data, then organize, display, and analyze relevant data to address these questions and communicate the results.":: 2012/13

---

Course Action Plans

Outcome Assessment History

Page 1835 of 2394
Math 80S is an experimental course; it is an accelerated pathway to Math 142. The two sections had very different results. It was determined that the instructor of section A had received training for this type of accelerated course; the instructor of section B had not received training. If this course is offered again (which it probably won't be), our plan is to have the instructor receive special training so as to foster student success in the course.

Plan for topic "Students completing math-80S will be able to demonstrate numerical and algebraic reasoning skills to support statistical analysis.": 2012/13

Math 80S is an experimental course; it is an accelerated pathway to Math 142. The two sections had very different results. It was determined that the instructor of section A had received training for this type of accelerated course; the instructor of section B had not received training. If this course is offered again (which it probably won't be), our plan is to have the instructor receive special training so as to foster student success in the course.

Plan for topic "Students completing math-80S will be able to construct, use, and interpret mathematical models, specifically linear and exponential regression functions, to represent relationships in quantitative data.": 2012/13

Math 80S is an experimental course; it is an accelerated pathway to Math 142. The two sections had very different results. It was determined that the instructor of section A had received training for this type of accelerated course; the instructor of section B had not received training. If this course is offered again (which it probably won't be), our plan is to have the instructor receive special training so as to foster student success in the course.
DVC Instructional Course SLO Action Plans

1083. Arithmetic and Basic Algebra Review [MATH-085] belonging to Mathematics [MATH]
Plan for topic "Students completing this course will be able to evaluate formulas and expressions given values for variables."

": 2018/19
The Math Department feels that this question, or possibly the topic itself, could be replaced the next time Math 85 is assessed.

Plan for topic "Students completing this course will be able to solve linear equations, including those with fractions and decimals.":
2018/19
The Math Department feels that the question may be too easy, or at least that it may not assess what it is meant to assess. They recommend making this a free-response question rather than supplying students with a series of numbers to plug in and test. Alternatively, Topic 1 could be removed and a second question could be added to this topic. One would be free-response, while the other would be multiple choice. By comparing the two questions, which should otherwise be of equivalent difficulty, faculty could see whether most students actually know how to solve equations, or whether they know how to check multiple-choice answers.

Plan for topic "Students completing this course will be able to graph linear equations on a coordinate graph."
2018/19
The Math Department feels that students understand how to identify y-intercepts well enough, and recommend changing the topic to focus specifically on identifying slopes. One instructor recommended the new topic be "Students will be able to figure out the d*** slope." Faculty liked the idea of having graphs of four different lines and asking students to match the correct slope to the correct graph. One slope should be positive, one negative, one zero, and one undefined.

Plan for topic "Students completing this course will be able to write algebraic expressions and equations for situations given in word problems.": 2018/19
The Math Department recommends this question be scrapped and replaced by a question that has had more thought put into it. Before assessing this course again, faculty should decide exactly what they care about. Whether it is the translation of words to a formula or the interpretation of a word problem, the new question should be relevant and readable. One suggestion was to adopt one of the percentage questions from the Math 75 SLO assessment.

Plan for topic "Students completing this course will be able to apply the fundamental principles of algebra to the manipulation of algebraic expression." : 2018/19
The Math Department recommends revising this question. Rather than merely saying "Which does not equal the others?" and providing four different expressions, they recommended giving students an expression and asking "Which of the following is equal to (or not equal to)" the expression. Additionally, they recommended changing the answers. Currently, all four answers involve some combination of x and y, with different + and â€“ signs. They recommended having only a single variable, and replacing the other with a constant of some sort.

Plan for topic "Students completing this course will be able to evaluate formulas and expressions given values for variables."
The Math Department feels that evaluating expressions involving order of operations is an essential topic to be mastered in Math 85, especially because it is a skill that is crucial moving forward in Math 119 and on. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 85 students.

At the beginning of each semester, the department will communicate the following to each math 85 instructor:

1) Emphasize order of operations involving exponents, fractions, and negatives.

2) Emphasize evaluating expressions with several variables, for example using formulas.

3) Practice evaluating expressions without using a calculator.

The department suggest that this question be assessed again since this was a small class with only one section. Perhaps making the question more challenging by including negatives, exponents, fractions, or more variables.

Finally, the Math department will add a question at the end of the assessment in the next cycle asking the type of calculator used on the assessment in an attempt to gain a broader view of the tools that students are using when assessed.

Plan for topic "Students completing this course will be able to solve linear equations, including those with fractions and decimals."

The Math Department feels that solving equations involving fractions is an essential topic to be mastered in Math 85, especially because it is a skill that is crucial moving forward in Math 119 and on. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 85 students.

At the beginning of each semester, the department will communicate the following to each math 85 instructor:

1) Emphasize fractions once learned throughout the course so that students feel more comfortable with fractions.

2) Emphasize the how and why things move from one side of the equation to the other side when solving equations so that students understand the process.
The department suggest that this question be assessed again since this was a small class with only one section.

Finally, the Math department will add a question at the end of the assessment in the next cycle asking the type of calculator used on the assessment in an attempt to gain a broader view of the tools that students are using when assessed.

Plan for topic "Students completing this course will be able to graph linear equations on a coordinate graph.": 2015/16

The Math Department feels that understanding the behavior of slope is an essential topic to be mastered in Math 85, especially because it is a skill that is crucial moving forward in Math 119 and on. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 85 students.

At the beginning of each semester, the department will communicate the following to each math 85 instructor:

1) Build multiple representations of slope into the curriculum using slope formula and graphs.

2) Emphasize the meaning of positive and negative slope in formula and graphs.

The department suggest that this question be assessed again since this was a small class with only one section. Include another question using formula instead of graph to gain insight of student understanding of slopes.

Finally, the Math department will add a question at the end of the assessment in the next cycle asking the type of calculator used on the assessment in an attempt to gain a broader view of the tools that students are using when assessed.

Plan for topic "Students completing this course will be able to write algebraic expressions and equations for situations given in word problems.": 2015/16

The Math Department feels that writing algebraic equations for situations given in word problems is an essential topic to be mastered in Math 85, especially because it is a skill that is crucial moving forward in Math 119 and on. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 85 students.
At the beginning of each semester, the department will communicate the following to each math 85 instructor:

1) Emphasize formula for perimeter of a rectangle and explain why the formula is twice the length plus twice the width.

2) Emphasize drawing a picture of a rectangle to understand that the formula is the same as adding all four sides.

3) Emphasize the order when translating the phrase LESS THAN.

The department suggest that this question be assessed again since this was a small class with only one section. Perhaps making the question simpler to understand where students make mistakes.

Finally, the Math department will add a question at the end of the assessment in the next cycle asking the type of calculator used on the assessment in an attempt to gain a broader view of the tools that students are using when assessed.

Plan for topic "Students completing this course will be able to apply the fundamental principles of algebra to the manipulation of algebraic expression.": 2015/16

The Math Department feels that understanding when expressions are equivalent using fundamental principles of algebra is an essential topic to be mastered in Math 85, especially because it is a skill that is crucial moving forward in Math 119 and on. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 85 students.

At the beginning of each semester, the department will communicate the following to each math 85 instructor:

1) Emphasize when different expressions are equivalent.

2) Emphasize plugging in numbers to check whether expressions are equivalent.

3) Emphasize changing subtraction to addition of opposite.
The department suggest that this question be assessed again since this was a small class with only one section. In addition, have a similar question using fractions, negative in the numerator, negative in the denominator, negative on both, etc.

Finally, the Math department will add a question at the end of the assessment in the next cycle asking the type of calculator used on the assessment in an attempt to gain a broader view of the tools that students are using when assessed.

**DVC Instructional Course SLO Action Plans**

1084. Arithmetic and Basic Algebra Review Self-Paced [MATH-085SP] belonging to Mathematics [MATH]

Plan for topic "Students completing this course will be able to evaluate formulas and expressions given values for variables."

This class was taught for the first Fall 2019 and will be assessed in 2021-22.
1085. Elementary Algebra [MATH-090] belonging to Mathematics [MATH]

Plan for topic "Students completing the course will be able to simplify expressions by using the distributive property and/or combining like terms.": 2019/20

This course is no longer been offered due to AB705 changes.

Plan for topic "Students completing the course will be able to solve linear equations, including equations containing fractions.": 2016/17

The Math Department feels that solving linear equations involving integers and fractions is an essential topic to be mastered in Math 90 because it is needed for all future math classes. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 90 students.

At the beginning of each semester, the department will communicate the following to each math 90 instructor:

1) Focus on distributive property involving negative signs.

2) Recommend an alternate method of solving equations involving negatives such as changing subtraction to the addition of opposites. Specially for students who need continued support for working with negative numbers.

3) Use an alternate method of learning signed numbers which students can remember better, i.e. Battle or Teamwork.

4) Emphasize to students to not depend on calculators when working with signed numbers.

5) Use two methods of solving equations containing fractions: Clearing fractions by multiplying by the LCD and obtaining common denominators.

6) Inform students about the suggested hours needed per week for this class outside of the classroom throughout the semester.

The department suggests that this question be assessed again since it is an important skill for students to have moving forward in math.

Plan for topic "Students completing the course will be able to find the slope of a line given two points on the line, the equation of the
The Math Department feels that Math 90 students lack an understanding of graphing. The Math Department plans to take the following actions to improve the overall achievement of this outcome by all Math 90 students.

At the beginning of each semester, the department will communicate the following to each math 90 instructor:

1) Emphasize that slope is a rate so that students have a better understanding of what slope represents by giving application problems in addition to graphing using slope.

2) Emphasize that the purpose of graphing a line is to show all solutions of a linear equation.

3) Emphasize the relationship between slope as a rate and slope in a graph, i.e. direction.

4) Inform students about the suggested hours needed per week for this class outside of the classroom throughout the semester.

The department suggests that these questions be assessed again since students need to continue to improve their understanding of slope and graphing. The department suggests not to use the variable m for a quantity that is not the slope as it can be confusing for students and to make graphs easier to read. As such, a flex activity for instructors to learn how to draw clear graphs on a computer is recommended.

The Math Department feels that students did pretty well and that other topics are more essential for Math 90. Thus, the department recommends not assessing this topic during the next assessment cycle.

The Math Department feels that students did pretty well and that other topics are more essential for Math 90. Thus, the department recommends not assessing this topic during the next assessment cycle.
The Math Department feels that students did pretty well and that other topics are more essential for Math 90. Thus, the department recommends not assessing this topic during the next assessment cycle.

Plan for topic "Students completing the course will be able to solve linear equations, including equations containing fractions." : 2013/14

In spring 2015, the department plans to re-evaluate its SLO assessment process. In recent years, the department has seen a decline in student participation in assessments done on survey monkey, and currently there are no safeguards in place to ensure that students are taking the assessment without using a calculator or other resources that are not allowed. Additionally, the department finds that many students are not motivated to take the assessment, as it is not part of their grade and they do not see a graded result when they are finished. Last, the department plans to change the current structure of how it analyzes SLO data, so that better measure can be made of the data. Two meeting dates have been scheduled for this work in Spring 2015, and a discussion for how to structure SLO assessments is also already underway.

Plan for topic "Students completing the course will be able to find the slope of a line given two points on the line, the equation of the line, or information about a parallel or perpendicular line." : 2013/14

Plan for topic "Students completing the course will be able to graph a line in the Cartesian coordinate system by point plotting, by finding intercepts, and by using the slope-intercept form of the equation of a line." : 2013/14

Plan for topic "Students completing the course will be able to solve linear equations, including equations containing fractions." : 2010/11

The Math Department will continue to emphasize fractions throughout the Math 110 course, as this previous SLO action plan led to clear improvement in student learning. The Dept also plans to present different ideas about working with fractions to continue to address this conceptual need. Furthermore, in future SLO assessments, the Dept may
DVC Instructional Course SLO Action Plans

include an affective component to the objective question, such as "Choose how confident you are in your answer: very confident vs. I kind of guessed vs I don't recognize this at all." This extra information could help the dept parse out whether common errors are the result of a genuine misunderstanding of the material or rather a need for more review of earlier concepts at the end of the semester.

Plan for topic "Students completing the course will be able to find the slope of a line given two points on the line, the equation of the line, or information about a parallel or perpendicular line."

The Dept may add a blank graph to these assessment questions, prompting students to use graphing as an alternative technique to compute slope. The Math Dept will notify Math 110 instructors that slope needs to be revisited and reviewed throughout the semester. Furthermore, in future SLO assessments, the Dept may include an affective component to the objective question, such as "Choose how confident you are in your answer: very confident vs. I kind of guessed vs I don't recognize this at all." This extra information could help the dept parse out whether common errors are the result of a genuine misunderstanding of the material or rather a need for more review of earlier concepts at the end of the semester.

Plan for topic "Students completing the course will be able to graph a line in the Cartesian coordinate system by point plotting, by finding intercepts, and by using the slope-intercept form of the equation of a line."

The Math Dept plans to discuss as a department how to approach graphing in a more contextualized, integrated way throughout the semester. Additionally, the SLO assessment needs to be reformatted so that we can more clearly link the two paired questions together in order to discern at what point in the graphing process that the students' understanding is breaking down. Furthermore, in future SLO assessments, the Dept may include an affective component to the objective question, such as "Choose how confident you are in your answer: very confident vs. I kind of guessed vs I don't recognize this at all." This extra information could help the dept parse out whether common errors are the result of a genuine misunderstanding of the material or rather a need for more review of earlier concepts at the end of the semester.

Plan for topic "Students completing the course will be able to simplify expressions by using the distributive property and/or combining like terms."

This was the first semester that the Math Dept used the ALEKS program, and some logistical issues were discovered in this assessment process. The percentages are inaccurate because they include students who dropped their Math 110 course before the end of the semester. We have requested that instructors keep their ALEKS rosters up to date to only include currently enrolled students in order to alleviate this issue in the future. Additionally, the structure and timing of the required ALEKS assignments in this first semester did not correspond well to the 2 hour per week requirement, nor to the timing of topics in Math 110. As a result, the structure and timing of required ALEKS assignments has been modified for Spring 2010. We believe that these two changes will help us get more accurate data in the Spring of 2010. However, the results of this particular SLO were higher, relatively, than the other SLOs assessed in this cycle, so we do not feel that this SLO needs to be reassessed in the Spring 2010.

Plan for topic "Students completing the course will be able to solve linear equations, including equations containing fractions."

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to find the slope of a line given two points on the line, the equation of the line, or information about a parallel or perpendicular line.": 2009/10

This was the first semester that the Math Dept used the ALEKS program, and some logistical issues were discovered in this assessment process. The percentages are inaccurate because they include students who dropped their Math 110 course before the end of the semester. We have requested that instructors keep their ALEKS rosters up to date to only include currently enrolled students in order to alleviate this issue in the future. Additionally, the structure and timing of the required ALEKS assignments in this first semester did not correspond well to the 2 hour per week requirement, nor to the timing of topics in Math 110. As a result, the structure and timing of required ALEKS assignments has been modified for Spring 2010. We believe that these two changes will help us get more accurate data in the Spring of 2010.

Plan for topic "Students completing the course will be able to graph a line in the Cartesian coordinate system by point plotting, by finding intercepts, and by using the slope-intercept form of the equation of a line.": 2009/10

This was the first semester that the Math Dept used the ALEKS program, and some logistical issues were discovered in this assessment process. The percentages are inaccurate because they include students who dropped their Math 110 course before the end of the semester. We have requested that instructors keep their ALEKS rosters up to date to only include currently enrolled students in order to alleviate this issue in the future. Additionally, the structure and timing of the required ALEKS assignments in this first semester did not correspond well to the 2 hour per week requirement, nor to the timing of topics in Math 110. As a result, the structure and timing of required ALEKS assignments has been modified for Spring 2010. We believe that these two changes will help us get more accurate data in the Spring of 2010. However, the results of this particular SLO were lower, relatively, than the other SLOs assessed this semester, so the Dept feels that it is critical to keep this particular SLO on the assessment cycle for Spring 2010.

Plan for topic "Students completing the course will be able to simplify expressions by using the distributive property and/or combining like terms." : 2007/8

These results verified that the current Math 110 course is sufficiently preparing students to meet this learning outcome. As a result, no changes were made to the Math 110 course or to Math 110 teacher preparation materials.

Plan for topic "Students completing the course will be able to solve linear equations, including equations containing fractions." : 2007/8

One of these results exceeded the measurement criteria, namely that more than 80% of the students correctly answered one of the two questions. However, the criterion that 50% of the students will correctly answer both questions was just short of being met. The math department believes that a likely reason for this shortcoming was the selection of an equation that contained fractions. While fractions are a prerequisite skill for Math 110, it is evident that more remediation may be necessary so that Math 110 students...
achieve a mastery of operations and equations with fractions.
1086. Elementary Algebra with Study Skills [MATH-090E] belonging to Mathematics [MATH]
Plan for topic "Students completing MATH-090E will be able to perform arithmetic operations, including using order of operations and properties of real numbers, with signed numbers (including fractions) without a calculator.": 2019/20
This course is no longer been offered due to AB705 changes.

Plan for topic "Students completing this course will be able to solve linear equations, including equations containing fractions.": 2016/17

The Math Department feels that solving linear equations involving integers and fractions is an essential topic to be mastered in Math 90E because it is needed for all future math classes. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 90E students.

At the beginning of each semester, the department will communicate the following to each math 90E instructor:

1) Focus on distributive property involving negative signs.

2) Recommend an alternate method of solving equations involving negatives such as changing subtraction to the addition of opposites. Specially for students who need continued support for working with negative numbers.

3) Use an alternate method of learning signed numbers which students can remember better, i.e. Battle or Teamwork.

4) Emphasize to students to not depend on calculators when working with signed numbers.

5) Use two methods of solving equations containing fractions: Clearing fractions by multiplying by the LCD and obtaining common denominators.

6) Inform students about the suggested hours needed per week for this class outside of the classroom throughout the semester.

The department suggests that this question be assessed again since it is an important skill for students to have moving forward in math.
Plan for topic "Students completing this course will be able to find or interpret the slope of a line given two points on the line, the equation of the line, or information about a parallel or perpendicular line, or from a graph.": 2016/17

The Math Department feels that Math 90E students lack an understanding of graphing. The Math Department plans to take the following actions to improve the overall achievement of this outcome by all Math 90E students.

At the beginning of each semester, the department will communicate the following to each math 90E instructor:

1) Emphasize that slope is a rate so that students have a better understanding of what slope represents by giving application problems in addition to graphing using slope.

2) Emphasize that the purpose of graphing a line is to show all solutions of a linear equation.

3) Emphasize the relationship between slope as a rate and slope in a graph, i.e. direction.

4) Inform students about the suggested hours needed per week for this class outside of the classroom throughout the semester.

The department suggests that these questions be assessed again since students need to continue to improve their understanding of slope and graphing. The department suggests not to use the variable m for a quantity that is not the slope as it can be confusing for students and to make graphs easier to read. As such, a flex activity for instructors to learn how to draw clear graphs on a computer is recommended.

Plan for topic "Students completing this course will be able to factor or multiply an algebraic expression and simplify the result.": 2016/17

The Math Department feels that students did pretty well and that other topics are more essential for Math 90E. Thus, the department recommends not assessing this topic during the next assessment cycle.

Plan for topic "Students completing MATH-090E will be able to perform arithmetic operations, including using order of operations and properties of real numbers, with signed numbers (including fractions) without a calculator.": 2013/14
Math 90E was cancelled; therefore, it was not assessed. If and when Math 90E is offered in the future, it will be assessed.
### 1087. Elementary Algebra - Self Paced [MATH-090SP] belonging to Mathematics [MATH]

Plan for topic "Students completing the course will be able to determine information about a linear equation, including graphing the equation on the Cartesian plane and finding the slope of the equation given two points that are on the graph."

- **2019/20**

This course is no longer been offered due to AB705 changes.

Plan for topic "Students completing the course will be able to solve linear equations, including equations containing fractions."

- **2019/20**

This course is no longer been offered due to AB705 changes.

Plan for topic "Students completing the course will be able to solve linear equations, including equations containing fractions."

- **2016/17**

This course is no longer been offered due to AB705 changes.

Plan for topic "Students completing the course will be able to determine information about a linear equation, including graphing the equation on the Cartesian plane and finding the slope of the equation given two points that are on the graph."

- **2016/17**

This topic is an essential learning outcome. The Math Department is impressed with these results since fractions are a difficult concept for most students and the results are good. The self-paced faculty plan to review SLO assessment with students after they take the exam.

Plan for topic "Students completing the course will be able to simplify algebraic expressions by distributing and/or recognizing and combining like terms."

- **2016/17**

This topic is an essential Math 90SP learning outcome. The self-paced instructors will ensure this topic is included in 1-15 ALEKS review. The self-paced faculty plan to make a list of typical errors from these results, and to follow up with students after grading their exams. Comparing results from topics 3 and 4 reinforces the importance of including these topics in the ALEKS reviews.

Plan for topic "Students completing the course will be able to find the slope of a line given two points on the line, the equation of the line, or information about a parallel or perpendicular line."

- **2016/17**

This topic is an essential Math 90SP learning outcome. The self-paced instructors will ensure this topic is included in 1-15 ALEKS review. The self-paced faculty plan to make a list of typical errors from these results, and to follow up with students after grading their exams. Comparing results from topics 3 and 4 reinforces the importance of including these topics in the ALEKS reviews.

Plan for topic "Students completing the course will be able to solve a linear equation in one variable that contains variables on both sides of the equation."

- **2016/17**

This topic is an essential Math 90SP learning outcome. The self-pace faculty plan to make a list of typical errors from these results, and to follow up with students after grading.
### DVC Instructional Course SLO Action Plans

#### Plan for topic "Students completing the course will be able to graph a line in the Cartesian coordinate system by point plotting, by finding intercepts, or by using the slope-intercept form of the equation of a line.": 2016/17

This topic is an essential Math 90SP learning outcome. The self-pace faculty plan to make a list of typical errors from these results, and to follow up with students after grading their exams. Comparing results from topics 3 and 4 reinforces the importance of including these topics in the ALEKS reviews.

#### Plan for topic "Students completing the course will be able to determine information about a linear equation, including graphing the equation on the Cartesian plane and finding the slope of the equation given two points that are on the graph.": 2013/14

For this question, $\frac{16}{18} = 88.9\%$ students were successful in this topic. The department was pleased with the results and plans to compare them with the results in the lecture and online courses. In addition we plan to assess Math 090-SP in the same cycle and semester using the same SLO testing environment as Math 090.

#### Plan for topic "Students completing the course will be able to solve linear equations, including equations containing fractions.": 2013/14

For this question, $\frac{16}{18} = 88.9\%$ students were successful in this topic. The department was pleased with the results and plans to compare them with the results in the lecture and online courses. In addition we plan to assess Math 090-SP in the same cycle and semester using the same SLO testing environment as Math 090.

#### Plan for topic "Students completing the course will be able to simplify algebraic expressions by distributing and/or recognizing and combining like terms.": 2013/14

For this question, $\frac{15}{18} = 83.3\%$ students were successful in this topic. The department was pleased with the results and plans to compare them with the results in the lecture and online courses. In addition we plan to assess Math 090-SP in the same cycle and semester using the same SLO testing environment as Math 090.

#### Plan for topic "Students completing the course will be able to find the slope of a line given two points on the line, the equation of the line, or information about a parallel or perpendicular line.": 2013/14

For this question, $\frac{15}{18} = 83.3\%$ students were successful in this topic. The department was pleased with the results and plans to compare them with the results in the lecture and online courses. In addition we plan to assess Math 090-SP in the same cycle and semester using the same SLO testing environment as Math 090.

#### Plan for topic "Students completing the course will be able to solve a linear equation in one variable that contains variables on both sides of the equation.": 2013/14

For this question, $\frac{12}{18} or 66.7\%$ had the question correct. Although a majority of the students were correct, the dept would like to see a better result when rational expressions are subtracted. Our plan is to emphasize finding and applying common denominators. In addition, in the future, we plan to assess Math 090-SP in the same cycle and semester using the same SLO testing environment as Math 090, and to compare these results to lecture, and online Math 090, as well as comparing to results between PHC and SRC.

#### Plan for topic "Students completing the course will be able to graph a line in the Cartesian coordinate system by point plotting, by finding intercepts, or by using the slope-intercept form of the equation of a line.": 2013/14

For this question, $\frac{12}{18} or 66.7\%$ had the question correct. Although a majority of the students were correct, the dept would like to see a better result when rational expressions...
Plan for topic "Students completing the course will be able to solve linear equations, including equations containing fractions."

The Math Dept plans to continue current instructional and review strategies already in place in Math 110SP regarding solving equations.

Plan for topic "Students completing the course will be able to determine information about a linear equation, including graphing the equation on the Cartesian plane and finding the slope of the equation given two points that are on the graph."

The Self-Paced Math faculty plan to analyze how slope is taught in the Math 110SP course, and to discuss and implement new strategies to ensure that students are able to more flexibly find slope using any of the four methods available to them.

Plan for topic "Students completing the course will be able to find the slope of a line given two points on the line, the equation of the line, or information about a parallel or perpendicular line."

The Self-Paced Math faculty meet regularly during the semester, and they plan to address graphing lines as their pedagogical topic for Spring 2012. They will identify the current instructional practice on graphing in Math 110SP, and brainstorm ideas about how to supplement and change these instructional strategies in order to increase students' understanding and retention of graphing.

Plan for topic "Students completing the course will be able to simplify algebraic expressions by distributing and/or recognizing and combining like terms."

The SP program has been completely restructured, beginning in Fall 2009, so the number of students completing the course is abnormally low. As the semesters continue, the
number of students should increase, giving us a statistically significant number of students to assess. The dept plans to continue to evaluate the new SP structure as the semesters continue.

Plan for topic "Students completing the course will be able to solve linear equations, including equations containing fractions.": 2009/10
The SP program has been completely restructured, beginning in Fall 2009, so the number of students completing the course is abnormally low. As the semesters continue, the number of students should increase, giving us a statistically significant number of students to assess. The dept plans to continue to evaluate the new SP structure as the semesters continue.

DVC Instructional Course SLO Action Plans

1088. Math for Trade Pre-Apprentices [MATH-092] belonging to Mathematics [MATH]

Plan for topic "Students completing this course will be able to calculate with rational numbers expressed as integers, decimals, fractions, or percents.": 2016/17

This was the first time this course has been assessed. The Math Department feels that students need more attention and focus on word problems. Specific emphasis needs to be given on those word problems that appear in the building trades. We will work to achieve these by emphasizing the above comments with all Math 92 instructors at the beginning of each semester this course is offered.

Plan for topic "Students completing this course will be able to use appropriate formulas to solve problems encountered in the building trades.": 2016/17

This was the first time this course has been assessed. The Math Department feels that students need more attention and focus on word problems. Specific emphasis needs to be given on those word problems that appear in the building trades. We will work to achieve these by emphasizing the above comments with all Math 92 instructors at the beginning of each semester this course is offered.

Plan for topic "Students completing this course will be able to make a personal budget for the realities of work in the trades.": 2016/17

This was the first time this course has been assessed. The Math Department feels that students need more attention and focus on word problems. Specific emphasis needs to be given on those word problems that appear in the building trades. We will work to achieve these by emphasizing the above comments with all Math 92 instructors at the beginning of each semester this course is offered.
1089. Statway I [MATH-094] belonging to Mathematics [MATH]

Plan for topic "Students completing this course will be able to interpret statistics associated with linear regression.": 2018/19

The department was impressed with the results on the first question, and believes that the question should be used at least one more time to see if the results can be maintained. The results on the second question were less impressive, but the department feels that there could be a few reasons unrelated to student learning of that topic that could account for the lower success rate. The department believes that the second question should be changed so that students are not distracted by some extraneous statistical information and don't have to deal with such large numbers on the scale of the vertical axis.

The department suggests using a question where the equation of the regression line is given, along with the scatter plot and the graph of the line, but the other statistics are left out. The scenario should also be changed so that the y-axis has a smaller scale, and the line has a positive y-intercept and a smaller, non-whole number slope. Then the students should be asked to select the most accurate interpretation of the slope of the least squares regression line. To test whether students can identify the slope as well as interpret it, some of the incorrect multiple choice answers should include use of the y-intercept value. Also, the values in the multiple choice answers should be rounded to the nearest whole numbers. (For example, use "approximately 6" if the slope is 5.92.)

The department feels that this is an important Math 94 topic, so instructors should continue to emphasize and frequently review with students how to interpret the least squares regression line in various scenarios.

Plan for topic "Students completing this course will be able to find probabilities of specific events given a normally distributed random variable with a known mean and standard deviation.": 2018/19

The department feels that, because continuous distributions are introduced late in Math 94 and continue into Math 144, the current questions should be replaced with questions on discrete probability.

Plan for topic "Students completing this course will be able to interpret statistics associated with linear regression.": 2016/17

The Math Department would like to lessen the success gap between Statway and Statistics by improving the success rates of all students. The Department recommends that, since correlation is covered earlier in the semester than it typically is covered in Math 142, Statway instructors review correlation at several points throughout the semester. In addition, the Department recommends that Statway instructors give students more practice with understanding the difference between weak and strong correlations. It was
observed that while students understanding of direction was good, they struggled in their understanding of strength.

Plan for topic "Students completing this course will be able to find probabilities of specific events given a normally distributed random variable with a known mean and standard deviation.": 2016/17

The Department feels that this topic is covered to rapidly at the end of the semester in most Statway classes. The Department recommends omitting some of the optional material or arranging the schedule so that optional material is covered at the end of the semester, as time permits. Covering essential topics such as the normal distribution earlier in the course when students have more energy will also allow students more time for understanding.

Plan for topic "Students completing this course will be able to find probabilities of specific events given a normally distributed random variable with a known mean and standard deviation.": 2016/17

Plan for topic "Students completing MATH-094 will be able to Distinguish between types of statistical studies and sampling plans, including the limitations of each type.": 2013/14

The department discussed the data and agreed that the overall results were favorable. We will continue to follow the curricular and pedagogical recommendations of the Carnegie Institute as we continue to implement the Statway program. In addition, our pioneering Statway instructors will seek to obtain the national proportions of correct responses to these questions so as to compare with our local results.

Plan for topic "Students completing MATH-094 will be able to Distinguish between types of statistical studies and sampling plans, including the limitations of each type.": 2013/14

Plan for topic "Students completing MATH-094 will be able to For a linear relationship, use the least squares regression line to summarize the overall pattern and to make predictions.": 2013/14

The department discussed the data and agreed that the overall results were favorable. We will continue to follow the curricular and pedagogical recommendations of the Carnegie Institute as we continue to implement the Statway program. In addition, our pioneering Statway instructors will seek to obtain the national proportions of correct responses to these questions so as to compare with our local results.

Plan for topic "Students completing MATH-094 will be able to For a linear relationship, use the least squares regression line to summarize the overall pattern and to make predictions.": 2013/14

Plan for topic "Students completing MATH-094 will be able to Use a two-way table to analyze the association between two categorical variables."; 2013/14

The department discussed the data and agreed that the overall results were in need of improvement. The Statway Program as founded by the Carnegie Institute for Education at Stanford University emphasizes continuous improvement. Instructors are encouraged to carry out "lesson studies" to improve lesson curricula and delivery. Our plan is to carry out a lesson study on Lesson 4.2 in which students find probabilities from two-way tables, since students had the most difficulty with these questions. The instructor reviews the lesson before presentation, with focus on the learning outcomes desired. Then the lesson is presented to students with another instructor or a videographer present. Finally, the lesson is debriefed and the areas of student difficulty or confusion identified. This process is designed to improve both the materials and the delivery of the lesson.
DVC Instructional Course SLO Action Plans

1090. Geometry [MATH-114] belonging to Mathematics [MATH]

Plan for topic "Students completing the course will be able to use geometric vocabulary accurately to identify and describe geometric objects and relationships." : 2018/19

The Math Department feels that the ability of students to
connect vocabulary to visual observation is essential for
this course.

Topic #1 is stated precisely as the SLO. The word "and"
in the topic sentence requires all elements be tested.

The department suggested the topic be rewritten to
narrow down the scope and to be more specific.

The results of the first question were outstanding. The
department thought that question #1 should be changed
to test a new element of the new topic.

The department also suggested changing the second
question, as it does not seem to relate to the topic. The
acronyms ASA, SAS, SSS, SSA were felt not to be vocabulary, although these are important concepts of geometry.

The department would like to see incorrect answers to questions be written so they give meaningful feedback to common errors so underlying reasons for these mistakes could be determined.

Plan for topic "Students completing the course will be able to apply formulas for perimeter, area, volume, and surface area to solve practical geometric problems.": 2018/19

The Math Department feels it is important for students to be able to apply formulas for computation of perimeter, area, volume, and surface area to solve practical geometric problems. This is important in developing critical thinking skills.
Possibly a new question could be considered that uses a vocabulary word tested in Topic 1. See comments under Topic 1, second to the last paragraph.

Topic #2 is stated precisely as the SLO. The word "and" in the topic sentence requires all elements be tested.

The department suggested the topic be rewritten to narrow down the scope and to be more specific.

At the beginning of term that math 114 is offered, the department will communicate the following to each math 114 instructor:

1) The distribution property should be reviewed with
students, and correct use of grouping symbols should be emphasized so students understand their use.

2) An emphasis should be made on making and labeling sketches from a given description which uses geometric symbols.

3) Students should be coached to make an attempt on all problems so they do not leave any questions blank. They should be encouraged in how to approach multi-step problems and not just give up because they cannot complete the problem in one or two steps.

Plan for topic "Students completing the course will be able to use given information and valid logical reasoning to establish simple geometric relationships in proofs.": 2018/19

The Math Department feels it is important for students to be able to use given information and valid logical
reasoning to establish simple geometric relationships in proofs. This is very important in developing critical thinking skills. The department feels these are essential problems and that these are an appropriate level of difficulty for this course. We suggest doing proofs in each section of content, reminding students how to make mathematical arguments.

Topic #3 is stated precisely as the SLO. The department did not suggest this topic should be rewritten, as it is specific enough to write questions to assess it.

The second question on this topic should be replaced with one that includes more steps. As the question is posed, the students would need only two or three steps to complete the proof.

Plan for topic "Students completing the course will be able to use geometric vocabulary accurately to identify and describe geometric objects and relationships." : 2015/16

The Math Department feels that the ability of students to connect vocabulary to visual observation is essential for this course.

Topic #1 is stated precisely as the SLO. The word "and" in the topic sentence requires all elements be tested. The department suggested the topic be rewritten to narrow down the scope and to be more specific.

The results of the first question were outstanding. The department thought that question #1 should be changed to test a new element of the new topic.

The department also suggested changing the second question, as it does not seem to relate to the topic. The acronyms ASA, SAS, SSS, SSA were felt not to be vocabulary, although these are important concepts of geometry.
A suggestion for a new question is as follows: While creating new questions for Topics 2 and/or 3, perhaps those questions would make use of a vocabulary word that is tested for understanding under this topic. That is, if a subsequent question (under the other topics) assumes that the student has an understanding of a vocabulary word, then that vocabulary word itself should appear under Topic 1. That way, we can determine if a student was stumped just by not knowing the vocabulary rather than the bigger question for any subsequent SLO question.

The department would like to see incorrect answers to questions be written so they give meaningful feedback to common errors so underlying reasons for these mistakes could be determined.

Plan for topic "Students completing the course will be able to apply formulas for perimeter, area, volume, and surface area to solve practical geometric problems.": 2015/16

The Math Department feels it is important for students to be able to apply formulas for computation of perimeter, area, volume, and surface area to solve practical geometric problems. This is important in developing critical thinking skills.

Possibly a new question could be considered that uses a vocabulary word tested in Topic 1. See comments under Topic 1, second to the last paragraph.

Topic #2 is stated precisely as the SLO. The word "and" in the topic sentence requires all elements be tested. The department suggested the topic be rewritten to narrow down the scope and to be more specific.

At the beginning of term that math 114 is offered, the department will communicate the following to each math 114 instructor:

1) The distribution property should be reviewed with students, and correct use of grouping symbols should be emphasized so students understand their use.

2) An emphasis should be made on making and labeling sketches from a given description which uses geometric symbols.

3) Students should be coached to make an attempt on all problems so they do not leave any questions blank. They should be encouraged in how to approach multi-step problems and not just give up because they cannot complete the problem in one or two steps.

Plan for topic "Students completing the course will be able to use given information and valid logical reasoning to establish simple
geometric relationships in proofs.": 2015/16

The Math Department feels it is important for students to be able to use given information and valid logical reasoning to establish simple geometric relationships in proofs. This is very important in developing critical thinking skills.

Topic #3 is stated precisely as the SLO. The department did not suggest this topic should be rewritten, as it is specific enough to write questions to assess it.

The second question on this topic should be replaced with one that includes more steps. As it is, the students would need only two or three steps to complete it. In the action plan under “TOPIC 1”, it was suggested that this new question include the vocabulary word that was tested in the new question of “TOPIC 1”.

At the beginning of term that math 114 is offered, the department will communicate the following to each math 114 instructor:

Plan for topic "Students completing the course will be able to use geometric vocabulary accurately to identify and describe geometric objects and relationships.": 2012/13

In reviewing the data, the faculty determined that the SLO was met by the majority of students; the lower success rate of the second question may be due to ambiguous wording in the question (“Being as specific as possible”••). When creating multiple-choice questions, faculty should strive to use precise language.

Plan for topic "Students completing the course will be able to apply formulas for perimeter, area, volume, and surface area to solve practical geometric problems.": 2012/13

In reviewing the data, the faculty determined that the SLO was met by the majority of students; the success rates for the two questions were very consistent. The faculty have determined that the SLO assessments are well developed and will use similar versions the next time Math 114 is assessed.

Plan for topic "Students completing the course will be able to use given information and valid logical reasoning to establish simple geometric relationships in proofs.": 2012/13

In reviewing the data, the faculty determined that the SLO was met by the majority of students on the first question, but not on the second; the success rates for the two questions were very different. The second proof was similar to the first, except that more steps were required to interpret the "given"• information. It appears that interpreting "given"• information may confuse some students. Consequently, instructors should emphasize the interpretation of "given"• information when constructing geometric proofs.
DVC Instructional Course SLO Action Plans

Plan for topic “Students completing this course will be able to identify a function using multiple representations such as graphs, tables, words, or equations.”: 2017/18

The Math Department feels that it is important for math 119 students should have a good understanding of the various representations of basic functions. As such, we will work to improve the achievement of this outcome by emphasizing the following to all Math 119 instructors at the beginning of each semester:

1) The department recommends stressing to students to identify that when the base of an exponential function is between 0 and 1, the shape of the graph is reflected about the y-axis.

2) The department recommends giving students more exposure to a variety of examples of exponential functions with various bases.

In addition, some students in Math 119 tend to slack off in their attendance as the semester progresses which usually leads to disastrous results for these students. The department feels that a critical affective skill/outcome is to address their willingness to attend by fostering students confidence and resilience.

Studies of student learning show that students who are given problems to work on in groups builds confidence and community through peer interaction. Students who feel a sense of connection will be more likely to show up for class. Math 119 is taught with group work and active student participation as the primary means of instruction. The student-centered learning may be why Math 119 students tend to have better SLO outcomes than their Math 120 counterparts.

SLO Fest discussions are very productive. Continue to seek ways of getting better participation from all department members. This could sow more seeds to keep these conversations going throughout the department.

A department discussion is needed to review the contents of the course outline to determine which topics are essential in Math 119. The course is very impacted with content, and we need to seek ways of streamlining the content to enrich student success.

Plan for topic “Students completing this course will be able to determine what effect changing a value in an inverse or direct variation formula has.”: 2017/18

The Math Department feels that it is important for math 120 students should have a good understanding of the what effect changing the value of a variable has on another variable in direct and inverse variation problems. The content of the second question in this topic was not in the resource binder for this course at the time of this SLO
The topic has been added to the instructors resource binder and will be included as part of the coursework going forward. The department recommends using this topic for another assessment cycle with different questions. Suggested replacements are:

Change the first question to something more geared toward intuition for students to think about what happens to one variable when the others value is changed. Something like, If $y=1/x$ and we make $x$ larger, what does that do to the value of $y$?

Recommendation for changing the second question is to either change to an application type of problem or give the students the formula $y=kx$ and ask $y=4$ when $x=10$, what is $y$ when $x=15$?

To improve the achievement of this outcome we plan to emphasize the following to all Math 120 instructors at the beginning of each semester:

1) Instruct students in gaining a conceptual understanding of direct and inverse variation, instead of using a rote process for solving such questions.

In addition some students in Math 119 tend to slack off in their attendance as the semester progresses which usually leads to disastrous results for these students. The department feels that a critical affective skill/outcome is to address their willingness to attend by fostering students confidence and resilience.

Studies of student learning show that students who are given problems to work on in groups builds confidence and community through peer interaction. Students who feel a sense of connection will be more likely to show up for class.

SLO Fest discussions are very productive. Continue to seek ways of getting better participation from all department members. This could sow more seeds to keep these conversations going throughout the department.

A department discussion is needed to review the contents of the course outline to determine which topics are essential in Math 119. The course is very impacted with content, and we need to seek ways of streamlining the content to enrich student success.
The Math Department feels that being able to solve various types of equations is an essential topic for math 119 students. The department recommends using this topic for another assessment cycle with a change to some parts of the questions.

Recommend changing answer b) of the first question, solving a quadratic equation, by replacing the plus symbol with a product, to allow students to better see a distinction between the correct answer and this one, so the selections are not so tricky. Replacing \( x = \frac{5 + \sqrt{13}}{2} \) all divided by 2, with \( x = \frac{5 \times \sqrt{13}}{2} \).

Also recommend a slight change to the second question, solving an exponential equation, by changing the bases, 27 and 9, to something like 8 and 4, to eliminate answers obtained by incorrectly taking the ratio of the bases.

To improve the achievement of this outcome we plan to emphasize the following to all Math 120 instructors at the beginning of each semester:

1) Discuss with students the various ways exponential equations can be solved (seeking a common base and use of logarithms).

In addition Some students in Math 119 tend to slack off in their attendance as the semester progresses which usually leads to disastrous results for these students. The department feels that a critical affective skill/outcome is to address their willingness to attend by fostering students confidence and resilience.

Studies of student learning show that students who are given problems to work on in groups builds confidence and community through peer interaction. Students who feel a sense of connection will be more likely to show up for class.

SLO Fest discussions are very productive. Continue to seek ways of getting better participation from all department members. This could sow more seeds to keep these conversations going throughout the department.

A department discussion is needed to review the contents of the course outline to determine which topics are essential in Math 119. The course is very impacted with content,
DVC Instructional Course SLO Action Plans

and we need to seek ways of streamlining the content to enrich student success.

Plan for topic "Students completing this course will be able to apply fundamental algebraic laws.": 2018/19
This class was taught for the first time in Fall 2019 and the Math department has decided to assess the class in 2020-2021

Plan for topic "Students completing this course will be able to identify a function using multiple representations such as graphs, tables, words, or equations.": 2017/18

The Math Department feels that it is important for math 120 students should have a good understanding of the various representations of basic functions. As such, we will work to improve the achievement of this outcome by emphasizing the following to all Math 120 instructors at the beginning of each semester:

1) The department recommends stressing to students to identify that when the base of an exponential function is between 0 and 1, the shape of the graph is reflected about the y-axis.

2) The department recommends giving students more exposure to a variety of examples of exponential functions with various bases.

In addition, some students in Math 120 tend to slack off in their attendance as the semester progresses which usually leads to disastrous results for these students. The department feels that a critical effective skill/outcome is to address their willingness to attend by fostering students confidence and resilience.

Studies of student learning show that students who are given problems to work on in groups builds confidence and community through peer interaction. Students who feel a sense of connection will be more likely to show up for class.

SLO Fest discussions are very productive. Continue to seek ways of getting better participation from all department members. This could sow more seeds to keep these conversations going throughout the department.

A department discussion is needed to review the contents of the course outline to determine which topics are essential in Math 120. The course is very impacted with content, and we need to seek ways of streamlining the content to enrich student success.

Plan for topic "Students completing this course will be able to determine what effect changing a value in an inverse or direct variation formula has.": 2017/18

The Math Department feels that it is important for math 120 students should have a good understanding of the what effect changing the value of a variable has on another variable in direct and inverse variation problems. The department recommends using this topic for another assessment cycle with different questions.
Suggested replacements are: Change the first question to something more geared toward intuition for students to think about what happens to one variable when the others value is changed. Something like, If \( y=1/x \) and we make \( x \) larger, what does that do to the value of \( y \) ?. Recommendation for changing the second question is to either change to an application type of problem or give the students the formula \( y=kx \) and ask, \( y=4 \) when \( x=10 \), what is \( y \) when \( x=15 \)?.

To improve the achievement of this outcome we plan to emphasize the following to all Math 120 instructors at the beginning of each semester:

1) Instruct students in gaining a conceptual understanding of direct and inverse variation, instead of using a rote process for solving such questions.

In addition Some students in Math 120 tend to slack off in their attendance as the semester progresses which usually leads to disastrous results for these students. The department feels that a critical affective skill/outcome is to address their willingness to attend by fostering students confidence and resilience.

Studies of student learning show that students who are given problems to work on in groups builds confidence and community through peer interaction. Students who feel a sense of connection will be more likely to show up for class.

SLO Fest discussions are very productive. Continue to seek ways of getting better participation from all department members. This could sow more seeds to keep these conversations going throughout the department.

A department discussion is needed to review the contents of the course outline to determine which topics are essential in Math 120. The course is very impacted with content, and we need to seek ways of streamlining the content to enrich student success.

Plan for topic "Students completing this course will be able to solve exponential, quadratic, or radical equation; or absolute value inequalities.": 2017/18

The Math Department feels that being able to solve various types of equations is an essential topic for math 120 students. The department recommends using this topic for another assessment cycle with a change to some parts of the questions.

Recommend changing answer b) of the first question, solving a quadratic equation, by replacing the plus symbol with a product, to allow students to better see a distinction between the correct answer and this one, so the selections are not so tricky. Replacing \( x = (5 \text{ PLUS} \sqrt{13}) \) all divided by 2, with \( x = (5 \text{ TIMES} \sqrt{13}) \) all divided by 2.
DVC Instructional Course SLO Action Plans

Also recommend a slight change to the second question, solving an exponential equation, by changing the bases, 27 and 9, to something like 8 and 4, to eliminate answers obtained by incorrectly taking the ratio of the bases.

To improve the achievement of this outcome we plan to emphasize the following to all Math 120 instructors at the beginning of each semester:

1) Discuss with students the various ways exponential equations can be solved (seeking a common base and use of logarithms).

In addition Some students in Math 120 tend to slack off in their attendance as the semester progresses which usually leads to disastrous results for these students. The department feels that a critical affective skill/outcome is to address their willingness to attend by fostering students confidence and resilience.

Studies of student learning show that students who are given problems to work on in groups builds confidence and community through peer interaction. Students who feel a sense of connection will be more likely to show up for class.

SLO Fest discussions are very productive. Continue to seek ways of getting better participation from all department members. This could sow more seeds to keep these conversations going throughout the department.

A department discussion is needed to review the contents of the course outline to determine which topics are essential in Math 120. The course is very impacted with content, and we need to seek ways of streamlining the content to enrich student success.

Plan for topic "e": 2017/18

The Math Department feels that being able to solve various types of equations is an essential topic for math 120 students. The department recommends using this topic for another assessment cycle with a change to some parts of the questions.

Recommend changing answer b) of the first question, solving a quadratic equation, by replacing the plus symbol with a product, to allow students to better see a distinction between the correct answer and this one, so the selections are not so tricky. Replacing \( x = (5 \text{ PLUS } \sqrt{13}) \) all divided by 2, with \( x = (5 \text{ TIMES } \sqrt{13}) \) all divided by 2.
Also recommend a slight change to the second question, solving an exponential equation, by changing the bases, 27 and 9, to something like 8 and 4, to eliminate answers obtained by incorrectly taking the ratio of the bases.

To improve the achievement of this outcome we plan to emphasize the following to all Math 120 instructors at the beginning of each semester:

1) Discuss with students the various ways exponential equations can be solved (seeking a common base and use of logarithms).

In addition Some students in Math 120 tend to slack off in their attendance as the semester progresses which usually leads to disastrous results for these students. The department feels that a critical affective skill/outcome is to address their willingness to attend by fostering students confidence and resilience.

Studies of student learning show that students who are given problems to work on in groups builds confidence and community through peer interaction. Students who feel a sense of connection will be more likely to show up for class.

SLO Fest discussions are very productive. Continue to seek ways of getting better participation from all department members. This could sow more seeds to keep these conversations going throughout the department.

A department discussion is needed to review the contents of the course outline to determine which topics are essential in Math 120. The course is very impacted with content, and we need to seek ways of streamlining the content to enrich student success.

Plan for topic "Students completing the course will be able to solve any quadratic equation." : 2014/15

The Math Department feels that solving quadratic equations is a core learning objective for Math 120. As such, we will work to improve achievement of this outcome by emphasizing the following to all Math 120 instructors at the beginning of each semester:

1) Discuss how to recognize which method to use to solve a given quadratic equation.
DVC Instructional Course SLO Action Plans

2) Concentrate significant attention and time on completing the square.

3) Emphasize the fact that there are two answers when using the quadratic formula and the use of the ± symbol.

4) Connect solving quadratic equations with graphs of parabolas and use multiple representations to illustrate this connection.

Additionally, the department feels that decision making and analysis of approach to problems is a critical skill to focus on in Math 120. We are considering restructuring Math 120 to have less overlap with Math 090 and to concentrate more on graphing higher order equations, logarithms and exponentials.

**Plan for topic "Students completing the course will be able to perform operations with rational expressions, including simplifying the answer to lowest terms.": 2014/15**

The Math Department feels that performing operations with rational expressions is an important learning objective for Math 120. As such, we will work to improve achievement of this outcome by emphasizing the following to all Math 120 instructors at the beginning of each semester:

1) Before teaching rational expressions, spend quality instruction time on factoring completely and accurately.

2) Emphasize rules for fractions and structure of rational expression problems. Focus on relating structure and process for all fractions (numerical and variable).

Additionally, the department plans to reconsider the problems used for this assessment topic and create more problems with fewer steps to better assess the level of achievement of this outcome.

**Plan for topic "Students completing the course will be able to determine important information about standard functions.": 2014/15**

The Math Department feels that working with functions is a critical outcome for Math 120. As such, we will work to improve achievement of this outcome by emphasizing the following to all Math 120 instructors at the beginning of each semester:
1) Emphasize critical thinking and analysis over procedural competence.

2) Utilize multiple representations when working with functions to draw more connections between equations, graphs, intercepts, domains, and ranges.

Additionally, the department plans to address this learning objective the next time the default textbook for Math 120 comes up for a vote. Many department members feel that there are better textbooks available that provide better motivation and modeling of functions. The department also would like to consider creating some type of space to share materials for this course (and others), as well as more support for instructors to share ideas, struggles, techniques, etc.

**Plan for topic "Students completing the course will be able to solve any quadratic equation."**: 2011/12

In reviewing the data the faculty have determined that the SLO was met by the majority of students. The faculty have determined that the current SLO assessments are well developed.

**Plan for topic "Students completing the course will be able to perform operations with rational expressions, including simplifying the answer to lowest terms."**: 2011/12

In reviewing the data the faculty have determined that the SLO was met by a majority of students. The faculty have determined that the current SLO assessments are well developed.

**Plan for topic "Students completing the course will be able to determine important information about standard functions."**: 2011/12

In reviewing the data the faculty have determined that the SLO was met by the majority of students. The faculty have determined that the current SLO assessments are well developed.
Plan for topic "Students completing the course will be able to solve any quadratic equation.": 2017/18

The Math Department feels that solving quadratic equations is an essential topic for Math 120SP because it comes up in applications in many other courses. The math department believes that although the results on this topic are not surprising, instructors should be aware that most students at this level memorize the quadratic formula easily, but tend not to remember the square root property of positive real numbers. Many students take the positive square root of both sides of an equation, forgetting that there are two square roots of any positive real number.

The department feels that instructors should emphasize and remind students that there is a plus/minus symbol in the square root property and that it means that there are two different square roots of a positive real number.

The department feels that the results of this assessments are not as reliable as similar results for a traditional Math 120 class because the results in this assessment include

- students who are in their first semester of Math 120SP, and are taking the test for the first time,
- students who are in their first semester of Math 120SP, but are retaking the test and are therefore answering the assessment questions for the second or third time,
- and students who are in their second or third semester of Math 120SP. These students may not have seen some of this material in some time.

The department feels that the Self-Paced program should look for a way to record who is taking a particular assessment and possibly include that in the data reporting. In particular, students who are re-taking the 11-13 test should not be given SLO assessment questions.

The Self-Paced program went through a major revision during the semesters that these assessments were administered, and that may be reflected in the number of students who answered incorrectly.

Other suggestions for the Self-Paced program and the SLO Committee:

- Instructors should start a list of problem types that students in Self-Paced classes consistently have trouble with.
DVC Instructional Course SLO Action Plans

- Each instructor for a Self-Paced course should be sent the action plan at the beginning of the semester that instructors for the corresponding lecture class received. The SLO Committee should communicate with the Self-Paced instructors the significance of the action plans and their relevance with respect to Self-Paced students. Although there is no direct instruction (lecturing) in a Self-Paced course, instructors should be made aware of the issues raised by past assessments of courses with the same learning outcomes.

Plan for topic "Students completing the course will be able to perform operations with rational expressions, including simplifying the answer to lowest terms.": 2017/18

The Math Department feels that solving quadratic equations is an essential topic for Math 120SP because it is needed in College Algebra (Math 135), Business Calculus (Math 182), and other courses. The department believes that many students confused simplifying expressions with solving equations. In particular, it appears that students multiplied the expressions in this problem by the LCD in order to clear the denominators. It appears that other students became confused because they could not eliminate the denominators, and they guessed an answer. For this reason, instructors should emphasize the differences between equations and expressions, and why cancellation of denominators is impossible with expressions.

The department feels that the results of this assessments are not as reliable as similar results for a traditional Math 120 class because the results in this assessment include

- students who are in their first semester of Math 120SP, and are taking the test for the first time,

- students who are in their first semester of Math 120SP, but are retaking the test and are therefore answering the assessment questions for the second or third time,

- and students who are in their second or third semester of Math 120SP. These students may not have seen some of this material in some time.

The department feels that the Self-Paced program should look for a way to record who is taking a particular assessment and possibly include that in the data reporting. In particular, students who are re-taking the 11-13 test should not be given SLO assessment questions.

The Self-Paced program went through a major revision during the semesters that these assessments were administered, and that may be reflected in the number of students who answered incorrectly.

Other suggestions for the Self-Paced program and the SLO Committee:
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to determine important information about standard functions.": 2017/18

The Math Department feels that determining important information about standard functions is an essential topic for Math 120SP because it is needed in many applications and in other courses. The department feels that the results of the first question are below expectations, but that Self-Paced students may not have seen quadratic functions and the process of finding the vertex of a parabola in some time because of the recent revision of the Self-Paced program (see below). The results of the second question are more impressive, in particular because only 50% of students in the traditional Math 120 course answered the same question correctly.

The department feels that the results of this assessments may not be as reliable as similar results for a traditional Math 120 class because the results in this assessment include:

- students who are in their first semester of Math 120SP, and are taking the test for the first time,

- students who are in their first semester of Math 120SP, but are retaking the test and are therefore answering the assessment questions for the second or third time,

Plan for topic "Students completing the course will be able to solve any quadratic equation.": 2014/15

After the last Math 120SP assessment, the Math Department determined that Math 120 and Math 120SP should be on the same cycle of assessment, using the same assessment questions. This plan was carried out, and the Math 120 assessment questions were administered to the Math 120SP students via a lab assignment. After looking at the results, the Math Department has determined that the 120SP students performed significantly better than the Math 120 students, and the question arose about whether that was due to the delivery method - Math 120 students were given the questions in an exam setting. As a result, the Math 120SP (and all SP math courses) will change their delivery method to attach the SLO assessment questions to a class exam in order to better analyze and compare the results of these different modalities.

Plan for topic "Students completing the course will be able to perform operations with rational expressions, including simplifying the answer to lowest terms.": 2014/15

After the last Math 120SP assessment, the Math Department determined that Math 120 and Math 120SP should be on the same cycle of assessment, using the same assessment questions. Plan for topic "e": 2014/15

The department was pleased with these results and plans to compare them with the results in the regular and online courses. In addition we plan to assess Math 120-SP in the same cycle and semester using the same SLO testing environment as Math 120.

Plan for topic "Students completing the course will be able to perform operations with rational expressions, including simplifying the answer to lowest terms.": 2013/14

The majority of students successfully answered the questions. However, it should be noted that since Math 120-SP is "self-paced," not all students have studied the same topics at the same point in time. Therefore, SP instructors plan to insure that SP students take the SLO assessment in the semester appropriate to the SLO topic being assessed. This correction should give us even better results in the future.
The majority of students successfully answered the questions. However, it should be noted that since Math 120-SP is "self-paced," not all students have studied the same topics at the same point in time. Therefore, SP instructors plan to insure that SP students take the SLO assessment in the semester appropriate to the SLO topic being assessed. This correction should give us even better results in the future.
1095. Plane Trigonometry [MATH-121] belonging to Mathematics [MATH]

Plan for topic "Students completing the course will be able to solve a problem by applying right triangle trigonometry.": 2016/17

The Math Department plans to initiate a department-wide discussion about the critical importance of understanding the problem in all classes. Word problems come up in all levels, and we continue to see lack of success at all levels. More specifically for Math 121, we plan to re-assess the same topic in the next round of assessment and change the first problem to be a question in which the students select which of the given labeled diagrams match the given problem. This change could help us determine how much of a factor the lack of a given picture truly is in the success of problem.

Plan for topic "Students completing this course will be able to use fundamental principles of trigonometry to answer questions about trigonometric functions.": 2016/17

The math department feels that this is an essential outcome of Math 121, but also finds that these results are satisfactory. We plan to continue to ask instructors to repeatedly emphasize the role of the terminal quadrant in the sign of trigonometric functions and to connect various methods of finding answers to these types of equations (using triangles vs. using identities). We also will assess a different topic in the next round, due to the satisfactory results on this topic.

Plan for topic "Students completing this course will be able to recognize and describe properties of the graphs of trigonometric functions.": 2016/17

The Math Department plans to ask all Math 121 instructors at the beginning of each semester to do the following:

- Emphasize what asymptotes really are and why they exist.
- Utilize k notation, where k is an integer, regularly, so that students are very comfortable working with it and do not see it as an afterthought.
- Distinguish between graphing one period and graphing more than one period.
- Give more examples, homework, and assessment questions that contain more than one period in the graph.

We plan to re-assess this topic in the next cycle of assessment in order to determine if our plan was successful in bringing up the achievement level of this topic. Specifically, we plan to change the first question in the assessment to just tanx in order to determine whether or not the issue is with asymptotes in general or with the change in period by using tan2x. We plan to keep the second question in this topic the same.

Plan for topic "Students completing the course will be able to solve problems involving the application of double angle formulas.": 
In spring 2015, the department plans to re-evaluate its SLO assessment process. In recent years, the department has seen a decline in student participation in assessments done on survey monkey, and currently there are no safeguards in place to ensure that students are taking the assessment without using a calculator or other resources that are not allowed. Additionally, the department finds that many students are not motivated to take the assessment, as it is not part of their grade and they do not see a graded result when they are finished. Last, the department plans to change the current structure of how it analyzes SLO data, so that better measure can be made of the data. Two meeting dates have been scheduled for this work in Spring 2015, and a discussion for how to structure SLO assessments is also already underway.

The results indicate that more than 73% percent of the student assessed mastered this outcome. The Math 121 course is preparing students to meet this outcome. No changes.
Plan for topic "Students completing the course will be able to draw the graph of a trigonometric function given its formula.": 2009/10
Since the percentage of students that mastered this outcome was low and we think this was due to the students that dropped the course and still appeared in the ALEKS roster. We will notify the instructors teaching Math 121 to clear the drops from the ALEKS roster after the drop deadline. This way will get a better picture of what percent of the students assessed really master this outcome.

Plan for topic "Students completing the course will be able to solve a problem by applying right triangle trigonometry.": 2009/10
Since the percentage of the students that mastered this outcome was not too high and we think this was due to the people that dropped the course but still appeared in the ALEKS roster we plan to tell the instructors teaching Math 121 to clear the drops from the ALEKS roster to have a more accurate picture of the percentage of the students assessed that really mastered this outcome.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to assess possible mathematical solutions of a real-world problem.": 2016/17

The Math Department is not satisfied with these results. Much emphasis was given during the course on the topic of minimal spanning trees of graphs. The department should have a conversation about whether instructors teaching this course should focus more on the learning outcomes instead of offering more optional mathematical content.

Plan for topic "Students completing the course will be able to apply intermediate algebra to contemporary problems in mathematics.": 2016/17

The Math Department is not satisfied with these results. Perhaps more emphasis on this topic is needed. The department should have a conversation about whether instructors teaching this course should focus more on the learning outcomes instead of offering more optional mathematical content.

Plan for topic "Students completing the course will be able to correctly identify a key person or event in the development of a mathematical topic covered in the course.": 2016/17

The Math Department is not satisfied with these results. Several contemporary and early mathematicians, along with their achievements, were discussed during this course. An emphasis should be given on distinguishing use of an apportionment method with proving a theorem. Also, students confused voting with apportionment. The department should have a conversation about whether instructors teaching this course should focus more on the learning outcomes instead of offering more optional mathematical content.

Plan for topic "Students completing the course will be able to assess possible mathematical solutions of a real-world problem.": 2014/15

Although almost 80% of the students did better than 70% mastery on this outcome, the course pacing is relatively light and the exercises are not always at the level of a college-level math class. The SLO topics, due to the nature of the course outline are vague and make it difficult to precisely assess the outcomes, due to variations in what is taught from instructor to instructor. The department should begin a conversation about the content of the course, and whether it is useful to revise the course entirely.

Plan for topic "Students completing the course will be able to apply intermediate algebra to contemporary problems in mathematics.": 2014/15

Although 80% of the students did better than 70% mastery on this outcome, the course pacing is relatively light and the exercises are not always at the level of a college-level math class. taught from instructor to instructor. The department should begin a conversation about the content of the course, and whether it is useful to revise the course entirely.

Plan for topic "Students completing the course will be able to assess possible mathematical solutions of a real-world problem." 2010/11
The department plans to continue to emphasize real world problem solving in Math 124.

Plan for topic "Students completing the course will be able to apply intermediate algebra to contemporary problems in mathematics." 2010/11
The department plans to emphasize reviewing concepts throughout the semester that were discussed in the beginning of the semester to improve student performance.

Plan for topic "Students completing the course will be able to correctly identify a key person or event in the development of a mathematical topic covered in the course." 2010/11
The department plans to ask instructors to emphasize which historical topics they feel are most important in order to assist students in studying for exams.

Plan for topic "Students completing the course will be able to correctly identify a key person or event in the development of a mathematical topic covered in the course." 2009/10
Because the results of the responses were all good, no changes were made, either to the Math 124 course or to the teacher preparations.
The Math Department feels this is an important topic for this course and is not satisfied with these results. As future elementary school instructors, knowing how to perform operations with number systems which have a different base will foster an understanding of the difficulties their own students may have when learning how to perform operations with the base 10 system for the first time. Developing a good grasp of this concept may build confidence in their own ability which will be important as they work with their own students.

The topic was covered early in the semester. The poor results indicate a need to review topics covered early in the semester. It was further suggested that this course should be scheduled so that students meet more frequently than 2 times per week to foster more consistent exposure to the material.

The department recommends that future instructors should emphasize and review this topic throughout the semester.

Instructors should emphasize to students the need to review material periodically throughout the semester, or give them assignments which serve this purpose, especially for classes meeting two times per week.

The Math Department feels this is an important topic for this course. As future elementary school instructors, having a familiarity in rules of divisibility and a confidence in their own ability will be important skills as they work with their own students.

The department recommends that future instructors should emphasize divisibility tests with students. Although students demonstrated understanding of the concept, they did not retain knowledge of the specific tests of divisibility.

It was further suggested that this course should be scheduled so that students meet more frequently than 2 times per week to foster more consistent exposure to the material.

Instructors should emphasize to students the need to review material periodically throughout the semester, or give them assignments which serve this purpose, especially for classes meeting two times per week.

The Math Department feels this is an important topic for this course and is not satisfied with these results. As future elementary school instructors, knowing how to perform operations with number systems which have a different base will foster an understanding of the difficulties their own students may have when learning how to perform operations with the base 10 system for the first time. It was further suggested that this course should be scheduled so that students meet more frequently than 2 times per week to foster more consistent exposure to the material.

The department recommends that future instructors should emphasize and review this topic throughout the semester.

Instructors should emphasize to students the need to review material periodically throughout the semester, or give them assignments which serve this purpose, especially for classes meeting two times per week.
The Math Department feels this is an important topic for this course, as developing tools for adding/subtracting fractions is a fundamental mathematical skill. As future elementary school instructors, having confidence and a familiarity in performing this task will be vital as they work with their own students.

It was suggested that this course should be scheduled so that students meet more frequently than 2 times per week to foster more consistent exposure to the material.

The department recommends that future instructors should emphasize factors/multiples with students and use this vocabulary often when employing techniques that use them.

Instructors should emphasize to students the need to review material periodically throughout the semester, or give them assignments which serve this purpose, especially for classes meeting two times per week.
The Math Department feels that finding maximums and minimums of quadratic functions is an essential topic to be mastered in Math 135. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 135 students.

At the beginning of each semester, the department will communicate the following to each math 135 instructor:

1) Review formula for vertex.

2) Emphasize which coordinate of the vertex represents max or min value.

The department also suggested changing the second question on this assessment to be more specific. Describe what P and x represent for the given profit function. Most common incorrect answer suggests that students do not know which coordinate of the vertex represents the maximum value.

Finally, the department suggests that students need counseling for enrolling into the correct math class since many students took this class planning to take Math 191 or Math 142 after. Also, most students used scientific or graphing calculator which needs to be noted for next assessment to pick appropriate and meaningful questions.

The Math Department feels that working with graphs to determine function properties is an essential learning outcome in Math 135, particularly for students moving on the Business Calculus. As such, the department plans to continue to assess this topic and take the following actions to improve the overall achievement of this outcome by all Math 135 students.

At the beginning of each semester, the department will communicate the following to each math 135 instructor:

1) Poor results for graphing rational functions.

2) Provide opportunities for graph analysis in which students are provided the graphs of functions and asked to derive properties (zeros, leading coefficients, intercepts, turning
DVC Instructional Course SLO Action Plans

points, domain, range, etc.). Students often only work one way to create a graph from an equation, but understanding can be enhanced by working in the other direction as well.

Finally, the department suggests that students need counseling for enrolling into the correct math class since many students took this class planning to take Math 191 or Math 142 after. Also, most students used scientific or graphing calculator which needs to be noted for next assessment to pick appropriate and meaningful questions.

Plan for topic "Students completing the course will be able to solve problems involving exponential and logarithmic functions and expressions.": 2018/19

The Math Department feels that exponential and logarithmic problems are an essential learning outcome for Math 135. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 135 students.

At the beginning of each semester, the department will communicate the following to each math 135 instructor:

1) Poor results for solving log and exponential equations.

2) Emphasize this topic

3) Teach to check answers

4) Review changing percent to decimal

The department recommends to continue assessing this topic and keep the same questions.

Finally, the department suggests that students need counseling for enrolling into the correct math class since many students took this class planning to take Math 191 or Math 142 after. Also, most students used scientific or graphing calculator which needs to be noted for next assessment to pick appropriate and meaningful questions.

Also, most students used scientific or graphing calculator which needs to be noted for next assessment to pick appropriate and meaningful questions.

Plan for topic "Students completing the course will be able to find the maximum or minimum of a quadratic function.": 2017/18

The math department was impressed with the performance of the Self-Paced students on the first question but wondered whether the results on the second question indicated that Self-Paced students struggled with word problems.

The department believes that the second question should be used on future assessments, but that the first question should be changed so that the quadratic function is given in general form rather than vertex form. Also, the department will communicate with the Self-Paced instructors and suggest that instructors and tutors help students to understand the relationship between the maximum/minimum value of a function and the vertex of a parabola, as well as how to obtain the coordinates of the vertex from the general form of the function in two different ways: by completing the square or by memorizing a formula for the first coordinate.

The math department will work to improve the communication between the PH Self-Paced program and the SRC Self-Paced program to ensure that students on both campuses are answering the same SLO questions. The department will also explore other ways to administer the SLO assessments at both campuses to allow meaningful comparisons to be made among different content delivery modalities.

Plan for topic "Students completing the course will be able to use graphs to determine essential properties of different types of..."
functions (polynomial, rational, logarithmic, exponential, etc.).": 2017/18

The math department was disappointed with these results because the questions are considered basic questions on an essential topic. The department believes that the first question should be used on future assessments, and will suggest that Self-Paced instructors and tutors emphasize with students how to obtain information about the end behavior of polynomial functions. The department believes that the second question should be changed to the following:

Present the graph of the logarithm base 3, translated horizontally one unit in the positive direction, with no specific points plotted. Then ask students to determine the correct equation, with the following possible choices:

(a) \( y = \log_3 (x-1) \)  (b) \( y = \log_3 (x+1) \)  (c) \(-\log_3 (x-1)\)  (d) \( y = \log_3 (1-x) \)

The math department will work to improve the communication between the PH Self-Paced program and the SRC Self-Paced program to ensure that students on both campuses are answering the same SLO questions. The department will also explore other ways to administer the SLO assessments at both campuses to allow meaningful comparisons to be made among different content delivery modalities.

Plan for topic "e": 2017/18

The math department was disappointed with these results because the questions are considered basic questions on an essential topic. The department will communicate with the Self-Paced instructors and suggest that they work with students in understanding the relationship between the natural logarithm and the natural exponential functions, and on how to use the continuously compounded interest formula.

The math department will work to improve the communication between the PH Self-Paced program and the SRC Self-Paced program to ensure that students on both campuses are answering the same SLO questions. The department will also explore other ways to administer the SLO assessments at both campuses to allow meaningful comparisons to be made among different content delivery modalities.

Plan for topic "Students completing the course will be able to find the maximum or minimum of a quadratic function.": 2015/16

The Math Department feels that finding maximums and minimums of quadratic functions is an essential topic to be mastered in Math 135. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 135 students.

At the beginning of each semester, the department will communicate the following to each math 135 instructor:

1) Emphasize maximum and minimum vocabulary: the y value is the max/min value, while the x value is where/when that value occurs.

2) Emphasize applications, including applications from science as well as from business.

3) Specify with students when it is appropriate to use \( x = -\frac{b}{2a} \) to find the vertex and how to read vertex form.

The department also suggested changing the second question on this assessment to a business application, since Math 135 is a pre-Calculus track for Business majors. The department considered delineating the topics in Math 135 that are intended to be mastered, so instructors were better able to negotiate their time through the vast amount of material.

Finally, the Math department will add two questions at the end of the assessment in the next cycle. The first one will ask about the type of calculator used on the assessment in an attempt to gain a broader view of the tools that students are using when assessed. The second will be about which math class the students are going to next, again in an attempt to gain a view of the percentage of Math 135 students moving on to Calculus versus those for which Math 135 is a terminal class.

Plan for topic "Students completing the course will be able to use graphs to determine essential properties of different types of functions (polynomial, rational, logarithmic, exponential, etc.).": 2015/16

The Math Department feels that working with graphs to determine function properties is an essential learning outcome in Math 135, particularly for students moving on the Business Calculus. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 135 students.
DVC Instructional Course SLO Action Plans

At the beginning of each semester, the department will communicate the following to each math 135 instructor:

1) Emphasize and utilize interval notation as often as possible, particularly with domain and range.

2) Provide opportunities for graph analysis in which students are provided the graphs of functions and asked to derive properties (zeros, leading coefficients, intercepts, turning points, domain, range, etc.). Students often only work one way to create a graph from an equation, but understanding can be enhanced by working in the other direction as well.

The department also suggested changing the second question on this topic to a different function, perhaps a rational function, to allow the overall assessment to be a little less logarithm focused.

Finally, the Math department will add two questions at the end of the assessment in the next cycle. The first one will ask about the type of calculator used on the assessment in an attempt to gain a broader view of the tools that students are using when assessed. The second will be about which math class the students are going to next, again in an attempt to gain a view of the percentage of Math 135 students moving on to Calculus versus those for which Math 135 is a terminal class.

Plan for topic "e": 2015/16

The Math Department feels that exponential and logarithmic problems are an essential learning outcome for Math 135. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 135 students.

At the beginning of each semester, the department will communicate the following to each math 135 instructor:

1) Be sure to emphasize application problems in every chapter. Much of the procedure and process is review, and Math 135 students need to be developing more critical thinking for how to approach different applications of the algebra that they have seen for years.

The department also suggested putting these questions first on the next assessment to see if the results will change if they are not subject to quiz fatigue at the end of the assessment. We also recommend that instructors are advised to change the formula given on the assessment for compound interest to whichever form of that equation that they used in their class, as there are different forms of the same equation and perhaps an unfamiliar version confused some students.
Finally, the Math department will add two questions at the end of the assessment in the next cycle. The first one will ask about the type of calculator used on the assessment in an attempt to gain a broader view of the tools that students are using when assessed. The second will be about which math class the students are going to next, again in an attempt to gain a view of the percentage of Math 135 students moving on to Calculus versus those for which Math 135 is a terminal class.

#### Plan for topic "Students completing this course will be able to interpret statistics associated with linear regression." : 2018/19

<table>
<thead>
<tr>
<th>Question 1</th>
<th>The most commonly chosen incorrect response was another scatterplot with a positive correlation. We suggest instructors emphasize the value of r in terms of strength as well as direction of correlation. We also suggest instructors invite students to calculate r squared to confirm their guess as to which scatterplot is correct. Question 2 had great results, so we will replace it with another question with a negative r-value in the next assessment.</th>
</tr>
</thead>
</table>

#### Plan for topic "Students completing this course will be able to find the probability of a specified event, given a normally distributed random variable with known mean and standard deviation." : 2018/19

<table>
<thead>
<tr>
<th>Plan for topic</th>
<th>As this is a central and important skill in Statistics, we are extremely unsatisfied with these results. We suggest instructors emphasize estimating using the empirical rule, having students shade the desired areas in problems with the normal distribution and that instructors regularly review this skill with students throughout the course, especially at the end. We also ask instructors to review decimal and percent conversions, since many wrong answers were due to incorrect conversions.</th>
</tr>
</thead>
</table>

#### Plan for topic "Students completing this course will be able to construct and interpret a confidence interval." : 2018/19

| We are completely puzzled about why students did poorly here. These results are barely acceptable. We ask instructors to consistently emphasize correct terminology and phrasing. The questions will be simplified and distractors removed to make sure we are assessing the skill we are intending. |

#### Plan for topic "Students completing this course will be able to explain what a P-value is and how to use it to reach a conclusion in a hypothesis test." : 2018/19

| We were unsatisfied with these results and note again that students are more successful in the mechanics than in conceptual understanding. We again ask instructors to consistently use correct terminology, and to emphasize and test for understanding as well as mechanics. |

#### Plan for topic "Students completing this course will be able to interpret statistics associated with linear regression." : 2015/16

| The math department feels that students should have a better understanding of the strength of an association. Instructors speculated that students might benefit from a better understanding of the meaning of the coefficient of determination, or through the use of Java applets that explore the meaning of strength and direction in scatterplots. |

At the beginning of each semester, the department will communicate the following to each math 142 instructor:

1) In the last SLO assessment, the department recognized that students have a weak understanding of the concept of the strength of the association between two quantitative variables.

understanding of the concept of the strength of an association and how it relates to the correlation coefficient.

3) Emphasize the meaning of $r^2$ and how the proportion of explained variability relates to the strength of an association.

The department suggest that these questions be assessed again to see whether students develop a better understanding of strength.

### Plan for topic "Students completing this course will be able to find the probability of a specified event, given a normally distributed random variable with known mean and standard deviation."

The Math Department feels that finding probabilities of events involving normally distributed variables is an essential topic in Math 142, since much of inferential statistics is based on it. As such, the department will continue to assess this topic in the future. However, they will change the assessment questions. One question will assess students' ability to work backwards from a probability to a critical value. The second will change "at least" to be "more than" to see whether the phrasing confused students.

### Plan for topic "Students completing this course will be able to construct and interpret a confidence interval."

The Math Department feels that understanding confidence intervals is vital to all students in Math 142. The department will assess these questions at least once more, to be sure that students continue to perform well and to compare scores for Math 142 and Math 144. The department plans to replace the second question with a more complicated one if students do as well in the next assessment cycle as they have done in this one.

The department will also change the first question to a 95% confidence interval, to see whether the change improves scores for Math 144 students.

Finally, the Math department will add a question at the end of the assessment in the next cycle asking the type of calculator used on the assessment in an attempt to gain a broader view of the tools that students are using when assessed.

### Plan for topic "Students completing this course will be able to explain what a P-value is and how to use it to reach a conclusion in a hypothesis test."

The Math Department feels that understanding hypothesis tests is absolutely vital to Math 142 students. They plan to reuse the first question in the next SLO cycle, but they will replace it after that if students continue to do as well as they did this time. The department intends to change the second question so that the answers are more distinct. If students in both courses perform well in the next assessment cycle, the department will change both questions in the following cycle.

### Plan for topic "Students completing the course will be able to employ the basic rules of probability and its relationship to statistics."

Course Action Plans

Outcome Assessment History

Page 1906 of 2394
Plan for topic "Students completing MATH-142 will be able to: Students completing the course will be able to use statistical procedures for the presentation and summary of data. Here students were required to correctly transfer data into clear graphical/visual and mathematical displays.": 2012/13

Plan for topic "Students completing MATH-142 will be able to: Students completing the course will be able to correctly apply concepts of statistics to solve actual statistical problems from a variety of disciplines such as business, social and behavioral sciences, natural sciences etc. The two questions will demand the students to correctly read, analyze and interpret statistical results consisting of both data and descriptive and inferential computations": 2012/13

Solving these two questions were greatly facilitated by technology, i.e. sophisticated calculators, the department began discussion on whether or not the use of such technology should be mandatory by all instructors. Additionally, the dept began a discussion on the question of using the very same technology throughout all sections. Additionally, the dept agreed to continue with the emphasis within the course on real world applications.

Plan for topic "Students completing MATH-142 will be able to: Students completing the course will be able to employ the basic rules of probability and its relationship to statistics. The questions involved making correct probabilistic calculation given data and population information.": 2012/13

Plan for topic "Students completing the course will be able to use statistical procedures for the presentation and summary of data.": 2010/11

The dept plans to reword the next assessment question regarding outliers to be clearer, so as to get more accurate results of whether or not students actually understand and are able to apply the concept.

Plan for topic "Students completing the course will be able to employ the basic rules of probability and its relationship to statistics.": 2010/11

The dept plans to change the answers to the second question on this assessment to be less similar. Additionally, the dept plans to remove the "none of the above" choice and add the phrase "Choose the closest answer" to the directions.

Plan for topic "Students completing MATH-142 will be able to: Students completing the course will be able to use statistical procedures for the presentation and summary of data. Here students were required to correctly transfer data into clear graphical/visual and mathematical displays.": 2010/11
The dept plans to change the answers to the second question on this assessment to be less similar. Additionally, the dept plans to remove the “none of the above” choice and add the phrase “Choose the closest answer” to the directions.

**Plan for topic "Students completing the course will be able to correctly apply concepts of statistics to solve actual statistical problems from a variety of disciplines such as business, social and behavioral sciences, natural sciences etc."**: 2010/11

The dept plans to ask Math 142 instructors to emphasize the conclusions of hypothesis tests. This information can be placed on the section list currently being created for the course that will be distributed each semester to all instructors teaching the course.
Plan for topic "Students completing this course will be able to construct and interpret a confidence interval." : 2018/19

We ask instructors to consistently emphasize correct terminology and phrasing. The questions will be simplified and distractors removed to make sure we are assessing the skill we are intending. We especially would like to improve results in interpreting intervals.

Plan for topic "Students completing this course will be able to explain what a P-value is and how to use it to reach a conclusion in a hypothesis test." : 2018/19

We are puzzled and concerned with these results, especially for Question 2. Since the curriculum of Math-144 emphasizes conceptual understanding, we are confused about why the results of question 2 are so much worse than Math-142. We have reworded the assessment question to eliminate distractors.

Plan for topic "Students completing this course will be able to construct and interpret a confidence interval." : 2015/16

The Math Department feels that understanding confidence intervals is vital to all students in Math 144. The department will assess these questions at least once more, to be sure that students continue to perform well and to compare scores for Math 142 and Math 144. The department plans to replace the second question with a more complicated one if students do as well in the next assessment cycle as they have done in this one.

Plan for topic "Students completing this course will be able to explain what a P-value is and how to use it to reach a conclusion in a hypothesis test." : 2015/16

The Math Department feels that understanding hypothesis tests is absolutely vital to Math 144 students. They plan to reuse the first question in the next SLO cycle, but they will replace it after that if students continue to do as well as they did this time. The department intends to change the second question so that the answers are more distinct. If students in both Statway and traditional statistics perform well in the next assessment cycle, the department will change both questions in the following cycle.

The department will also remind all faculty teaching Math 144 to emphasize critical reading skills.

Plan for topic "Students completing MATH-144 will be able to Students completing the course will be able to describe the sampling distributions of sample proportions and sample means." : 2013/14

A significant majority of students successfully answered the SLO questions. The Math dept discussed these results and agreed that the assessment questions are appropriate to the course level. The dept made plans to compare SLO results of Math 142 with those of Math 144 (the two courses at DVC meeting the requirement of an elementary statistics course) during the next assessment cycle, in a manner that reflects whether or not the two course are achieving statistically commensurate results.

Plan for topic "Students completing this course will be able to construct and interpret a confidence interval." : 2013/14

A significant majority of students successfully answered the SLO questions. The Math dept discussed these results and agreed that the assessment questions are appropriate
DVC Instructional Course SLO Action Plans

to the course level. The dept made plans to compare SLO results of Math 142 with those of Math 144 (the two courses at DVC meeting the requirement of an elementary statistics course) during the next assessment cycle, in a manner that reflects whether or not the two course are achieving statistically commensurate results.
1103. Topics in Mathematics [MATH-150] belonging to Mathematics [MATH]

**Plan for topic "Students completing Math 150UD will be able to read and understand mathematical proofs.": 2017/18**

The structure of the class gave students the opportunity to brainstorm proofs and discuss them with peers. Students gave proof presentations, read and discussed challenging proofs in groups, and wrote and critiqued proofs in groups. Students had a hard time knowing when to assume certain properties versus proving them. It is recommended to rely on the content of the textbook and building on it so that students can distinguish between assuming a property or proving it. If the property was proved in previous sections or homework, it is okay to assume.

**Plan for topic "Students completing Math 150UD will be able to use concepts from logic and set theory in mathematical discussion and proofs.": 2017/18**

The structure of the class gave students the opportunity to brainstorm proofs and discuss them with peers. Students gave proof presentations, read and discussed challenging proofs in groups, and wrote and critiqued proofs in groups. Students had a hard time knowing when to assume certain properties versus proving them. It is recommended to rely on the content of the textbook and building on it so that students can distinguish between assuming a property or proving it. If the property was proved in previous sections or homework, it is okay to assume.

**Plan for topic "Students completing Math 150UD will be able to construct mathematical proofs of results in number theory.": 2017/18**

The structure of the class gave students the opportunity to brainstorm proofs and discuss them with peers. Students gave proof presentations, read and discussed challenging proofs in groups, and wrote and critiqued proofs in groups. Students had a hard time knowing when to assume certain properties versus proving them. It is recommended to rely on the content of the textbook and building on it so that students can distinguish between assuming a property or proving it. If the property was proved in previous sections or homework, it is okay to assume.

**Plan for topic "Students completing Math 150AB will be able to solve any quadratic equation.": 2014/15**

As Math 150AB includes all the content from Math 120, the action plans for each objective of Math 120 also apply to Math 150AB (soon to be Math 119). Now that this experimental course has been run again and it is time to submit a permanent course outline, the department has initiated and completed a thorough examination of the structure and content of the course, to ensure that critical topics, such as this one, are emphasized in the permanent course outline.

**Plan for topic "Students completing Math 150AB will be able to perform operations with rational expressions, including simplifying the answer to lowest terms.": 2014/15**

As Math 150AB includes all the content from Math 120, the action plans for each objective of Math 120 also apply to Math 150AB (soon to be Math 119). Now that this experimental course has been run again and it is time to submit a permanent course outline, the department has initiated and completed a thorough examination of the structure and content of the course, to ensure that critical topics, such as this one, are emphasized in the permanent course outline.
As Math 150AB includes all the content from Math 120, the action plans for each objective of Math 120 also apply to Math 150AB (soon to be Math 119). Now that this experimental course has been run again and it is time to submit a permanent course outline, the department has initiated and completed a thorough examination of the structure and content of the course, to ensure that critical topics, such as this one, are emphasized in the permanent course outline.
Plan for topic "Students completing the course will be able to use the simplex method to solve basic linear programming problems.": 2017/18

This course was taught using a flipped classroom approach. Students who participated fully in this pedagogy were more successful in the course. Instructors using this strategy in the future should employ methods to encourage more participation in doing the work before each class. One suggestion is to have a short quiz at the beginning of each class on the information students were instructed to preview. Quizzes would also be a good strategy in a traditional course to encourage students to consistently review material.

The department recommends that future instructors should emphasize and review this topic throughout the semester.

Instructors should emphasize to students the need to review material periodically throughout the semester, or give them assignments which serve this purpose, especially for classes meeting only one or two times per week.

Plan for topic "Students completing the course will be able to apply probability theory to genetics.": 2017/18

This course was taught using a flipped classroom approach. Students who participated fully in this pedagogy were more successful in the course. Instructors using this strategy in the future should employ methods to encourage more participation in doing the work before each class. One suggestion is to have a short quiz at the beginning of each class on the information students were instructed to preview. Quizzes would also be a good strategy in a traditional course to encourage students to consistently review material.

The department recommends that future instructors should emphasize and review this topic throughout the semester.

Instructors should emphasize to students the need to review material periodically throughout the semester, or give them assignments which serve this purpose, especially for classes meeting only one or two times per week.

Plan for topic "Students completing the course will be able to find the monthly payment required by an amortized loan.": 2017/18

This course was taught using a flipped classroom approach. Students who participated fully in this pedagogy were more successful in the course. Instructors using this strategy in the future should employ methods to encourage more participation in doing the work before each class. One suggestion is to have a short quiz at the beginning of each class on the information students were instructed to preview. Quizzes would also be a good strategy in a traditional course to encourage students to consistently review material.
The department recommends that future instructors should emphasize and review this topic throughout the semester.

Instructors should emphasize to students the need to review material periodically throughout the semester, or give them assignments which serve this purpose, especially for classes meeting only one or two times per week.

Plan for topic "Students completing the course will be able to use the simplex method to solve basic linear programming problems.": 2014/15

The 71% of the students that answered the question correctly was considered a sufficient indication of student mastery, but the aim will be to improve on this result. Also, the department will suggest to future instructors that more than one topic (of the three listed in the data base) be used/assessed, as this will better indicate mastery of each topic specifically and the SLO topics in general.

Plan for topic "Students completing the course will be able to apply probability theory to genetics.": 2011/12

In reviewing the data the faculty have determined that the SLO was met by a large majority of students. The faculty have determined that the current SLO assessments are well developed but would like to make a few adjustments.

Plan for topic "Students completing the course will be able to find the monthly payment required by an amortized loan.": 2011/12

In reviewing the data the faculty have determined that the SLO was met by the majority of students. The faculty have determined that the current SLO assessments are well developed.
Question 1: Although, the percent correct is well below 60%, the next highest multiple choice selection is one that could be made by a conceptual misunderstanding and not by making a major procedural error. The incorrect selection was the correct number of units (the independent variable) where the maximum profit occurs. Students either forgot, or did not know, to evaluate the function at this value to find the maximum profit. If all students amended this apparent misconception, the percent correct would have increased to 62.7% correct.

Question 2: Percent correct is below 60%. The next highest selection is the negative result of correctly optimizing the Cost function, and not by optimizing the Average Cost function.

A suggestion for improvement on this topic is for students to practice writing out complete sentences as to what the variables $n$, $C(n)$, $C(n)/n$, $x$, and $P(x)$ represent (including units) in context to the problem. By using the units of their result and relating it to the question they are addressing might help students enhance their understanding and lead them to accurate results.

During the next assessment cycle we recommend including the following: Include multiple choice answers that are in complete sentences; use a wider variety in the types of problems (such as use of non-parabolic functions). Also include an inquiry as to whether the questions were included on the final exam or given on a stand-alone quiz. This could impact the results and be more informative in the department’s analysis, as students may take questions given on a final exam more seriously than those given on a test or quiz.

We plan to communicate the following to future Math 182 instructors:

1. Emphasize application problems.

2. Recommend students practice writing out complete sentences as to what the variables $n$, $C(n)$, $C(n)/n$, $x$ and $P(x)$ represent (including units) in context to the problem. By...
using the units of their result and relating it to the question they are addressing might help students enhance their understanding and lead them to accurate results.

Plan for topic "Students completing this course will be able to find derivatives or integrals involving exponential or logarithmic functions.": 2016/17

The Math Department feels that this is an essential topic for this course. Exponential functions appear often in application problems and we are not satisfied with these results. Although the percent correct is below 60%, for both questions the answer with the next highest response could be obtained by either not using the chain rule or by not differentiating, indicating that either student’s misconception is in how to correctly take a derivative or in understanding that when finding a rate or rate of change differentiation is required.

During the next assessment cycle we recommend that in order to better evaluate whether student’s misunderstanding is failing to take a derivative or not using the chain rule when differentiating, we suggest replacing one of the problems with a function that requires students use a technique other than the chain rule, such as y=xe^x. Also include an inquiry as to whether the questions were included on the final exam or given on a stand-alone quiz. This could impact the results and be more informative in the department’s analysis, as students may take questions given on a final exam more seriously than those given on a test or quiz.

We plan to communicate the following to future Math 182 instructors:

1. Emphasize using the chain rule when differentiating. Give students plenty of practice identifying composite functions, and correctly identifying the inside and outside parts of the function. Suggest routinely asking students to identify if they have a composite function, and which is the inside and outside part of the function.

2. Ensure students understand that when finding a rate or rate of change of a function they need to take the derivative of that function.

Plan for topic "Students completing this course will be able to compute integrals using u-substitution.": 2016/17

The math department feels that this is an essential topic, as this is a vital prerequisite skill for students entering Math 183. Although we should strive to improve these results, the level of difficulty is high and the topic is covered at the end of the course. The next highest response to the second question is the result obtained by not integrating. Students apparently arrived at this result by evaluating the integrand at the limits of integration, although this question does not address this topic, as it does not require u-substitution. We recommend allowing enough time in the calendar for students to have adequate exposure to integration techniques, specifically requiring u-substitution.

During the next assessment cycle, we feel that the topic should be modified to include indefinite and definite integrals (recommendation: Students completing this course will be
able to compute indefinite and definite integrals by using u-substitution). Also, the second question needs to be replaced with a question that addresses this topic.

We plan to communicate the following to future Math 182 instructors:

1. To emphasize techniques of integration that require u-substitution, and of functions that have negative and/or rational exponents.

### Plan for topic "Students completing the course will be able to do optimization or rate of change application problems." 2015/16

The Math department plans to begin logging when instructors are asked to implement an SLO assessment, so that their participation can be more accurately reported on faculty evaluations. This task may motivate more instructors to follow through on their required SLO tasks. Additionally, for this assessment topic, the department plans to remind Math 182 faculty that these applications are essential outcomes and that the textbook may not provide enough examples to assist students with mastery of these topics. As such, faculty should be sure to provide enough repetition of examples in class lecture, assignments, etc.

### Plan for topic "Students completing this course will be able to find derivatives or integrals involving exponential or logarithmic functions." 2015/16

The Math department plans to begin logging when instructors are asked to implement an SLO assessment, so that their participation can be more accurately reported on faculty evaluations. This task may motivate more instructors to follow through on their required SLO tasks. Additionally, the department feels it may be useful for instructors to move logs and exponents to an earlier point in the class, such as before doing relative maxima/minima. Since this topic is a relatively specific, non-essential outcome for this class, we may switch to assessing a new topic in the next cycle, perhaps finding maxima/minima.

### Plan for topic "Students completing this course will be able to compute integrals using u-substitution." 2015/16

The Math department plans to begin logging when instructors are asked to implement an SLO assessment, so that their participation can be more accurately reported on faculty evaluations. This task may motivate more instructors to follow through on their required SLO tasks. The department plans to continue to assess this topic in the next cycle with a new set of questions, to get at the variety of problems included in the topic.

### Plan for topic "Students completing the course will be able to do optimization or rate of change application problems." 2012/13

The majority of students successfully answered the questions. In our discussions, faculty agreed that the assessment questions are appropriate to the course level and outcome. Both questions involved differentiating a polynomial; question #1 was a business application, whereas question #2 was a geometric application. Our plan is to share these results with all future Math 182 instructors in hope of continuing to improve.

### Plan for topic "Students completing this course will be able to find derivatives or integrals involving exponential or logarithmic functions." 2012/13

The majority of students successfully answered the question. In our discussions, faculty agreed that the assessment question is appropriate to the course level and outcome.
However, in the next assessment, a second question should be added in order to broaden the results. Our plan is to share these results with all future Math 182 instructors in hope of continuing to improve.

Plan for topic "Students completing this course will be able to compute integrals using u-substitution.": 2012/13

The majority of students successfully answered the question. In our discussions, faculty agreed that the assessment question is appropriate to the course level and outcome. However, in the next assessment, a second question should be added in order to broaden the results. Our plan is to share these results with all future Math 182 instructors in hope of continuing to improve.

The Math Department is reasonably satisfied with these results. It was observed that students learn most calculus concepts relatively fast but struggle with algebraic simplifications and manipulations needed for this course. Time in class was needed to review algebra and trigonometric concepts needed for each topic. Its recommended to have at least half an hour per week of lab hours as part of the course so that instructors can officially use this time to review. Also, Math Lab and Group tutoring in the Math Lab was helpful. Expanding Math Lab hours on Friday and Saturday would be beneficial.

Plan for topic "Students completing the course will be able to compute derivatives and integrals of trigonometric functions.: 2015/16

The Math Department plans to include a second question to this topic during the next round of assessment that includes a partial derivative of a polynomial function in order to compare the results. Doing so can help the department parse down if the struggle lies in the partial derivative or in the exponential function. If further evidence arises that exponential functions are the hurdle for students, this would encourage the department even more to change the order of topics in Math 182 to introduce logs and exponentials earlier in the course.

Plan for topic "Students completing the course will be able to compute derivatives and integrals of trigonometric functions.: 2015/16

The Math Department plans to reassess this topic in the next cycle with a more reasonable and typical question (or multiple questions), such as simpler derivatives or integrals involving trig functions.

Plan for topic "Students completing the course will be able to use standard integration techniques to find indefinite integrals.: 2015/16

Math 183 can seem like a topics class without continuity between chapter. However, instructors can carry topics through from chapter to chapter, and should be encouraged to
For example, in the multi-variable chapter, students should integrate by parts. When covering differential equations, they should see it again. The department will emphasize this continuity to Math 183 instructors at the beginning of each semester.

Plan for topic "Students completing the course will be able to compute a simple partial derivative.": 2012/13

All of the students who took the assessment successfully answered the question. In our discussions, faculty agreed that the assessment question was appropriate to the course level and outcome. However, there was concern over the small number (3) of responses; students were not required to take the online assessment. In the future, our plan is to have the instructor(s) include an appropriate question on the final exam so that data can be collected from all students. This is especially important when a small number of sections of a course are offered. We will share these results with all future Math 183 instructors in hopes of continuing to improve on these results.

Plan for topic "Students completing the course will be able to compute derivatives and integrals of trigonometric functions.": 2012/13

All of the students who took the assessment successfully answered the question. In our discussions, faculty agreed that the assessment question was appropriate to the course level and outcome. However, there was concern over the small number (2) of responses; students were not required to take the online assessment. In the future, our plan is to have the instructor(s) include an appropriate question on the final exam so that data can be collected from all students. This is especially important when a small number of sections of a course are offered. We will share these results with all future Math 183 instructors in hopes of continuing to improve on these results.

Plan for topic "Students completing the course will be able to use standard integration techniques to find indefinite integrals.": 2012/13

All of the students who took the assessment successfully answered the question. In our discussions, faculty agreed that the assessment question was appropriate to the course level and outcome. However, there was concern over the small number (2) of responses; students were not required to take the online assessment. We will share these results with all future Math 183 instructors in hopes of continuing to improve on these results.
1107. Pre-Calculus [MATH-191] belonging to Mathematics [MATH]
Plan for topic "Students completing the course will be able to understand and use function notation, for example, in conjunction with a difference quotient.": 2018/19

The Math Department feels that evaluating difference quotients is an essential topic to be mastered in Math 191, especially because it leads to crucial calculus material like derivatives. As such, the department plans to take the following actions to continue to improve the overall achievement of this outcome by all Math 191 students. At the beginning of each semester, the department will communicate the following to each math 191 instructor: 1) Work on difference quotients throughout the semester by doing examples whenever introducing a new type of function. 2) Build up to inputs of functions starting with numbers, then variables, then expressions emphasizing x+h. 3) Discuss that difference quotients are slopes and used to find the slope of a line on a curve. 4) Warn students that f(x+h) is not equal to f(x)+f(h).

The department suggest that this question be assessed again since it is an important skill for student to have going into Math 192. When creating the next assessment, make notes about how multiple choice were chosen to help analyze results. Also, the department should not continue to add the supplemental question asking for type of calculator used during the assessment because it is not informative and it is assumed that most students use a calculator for this class. The department suggests that the results of combined top two responses be given when analyzing SLO assessment data because this information gives a better understanding of how many students either know or partly know the concept. It is recommended that instructors who give assessment for a course one semester should try to be part of the analysis of the results the following semester. This will provide very useful feedback needed for analysis.

Plan for topic "Students completing the course will be able to solve polynomial, rational, exponential, logarithmic, and trigonometric equations.": 2018/19

The Math Department feels that students need to understand solving polynomial, trigonometric, and logarithmic equations. These are important skills to have to succeed in calculus. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 191 students. At the beginning of each semester, the department will communicate the following to each math 191 instructor: 1) Emphasize not to divide by a variable since zero might be a solution. 2) Emphasize drawing angle in standard position to determine which quadrant contains the angle. 3) Remove extra topics from course outline to have more time to spend on logs and log properties and to do more log problems.

The department suggest that these questions be assessed again since it is an important skill for student to have going into Math 192. It is recommended to change the multiple choice options for the second question so that not all denominator are the same. This will inform us if students know to find the reference angle. Change the third question so
that we can determine if students know log properties. Also, when creating the next assessment, make notes about how multiple choice were chosen to help analyze results. The department should not continue to add the supplemental question asking for type of calculator used during the assessment because it is not informative and it is assumed that most students use a calculator for this class. The department suggests that the results of combined top two responses be given when analyzing SLO assessment data because this information gives a better understanding of how many students either know or partly know the concept. It is recommended that instructors who give assessment for a course one semester should try to be part of the analysis of the results the following semester. This will provide very useful feedback needed for analysis.

Plan for topic "Students completing the course will be able to find the inverse function that corresponds to a given function.": 2018/19

The Math Department feels that understanding inverse functions is an essential topic to be mastered in Math 191, especially because it leads to other function concepts. As such, the department plans to take the following actions to continue to improve the overall achievement of this outcome by all Math 191 students. At the beginning of each semester, the department will communicate the following to each math 191 instructor: 1) Show inverse functions graphically and inputting points. 2) Revisit inverse for each function introduced throughout the semester and when graphing functions. 3) Emphasize composition of a functions and its inverse is x.

The department suggest that this question not be assessed again since results are good and other topics need improvement.

Plan for topic "Students completing this course will be able to identify the domain of a rational function.": 2018/19

The Math Department feels that understanding domain of functions is an essential topic to be mastered in Math 191. As such, the department plans to take the following actions to continue to improve the overall achievement of this outcome by all Math 191 students. At the beginning of each semester, the department will communicate the following to each math 191 instructor: 1) Discuss what it actually means when the numerator is zero since students know that the denominator cannot be zero but are not sure about the numerator being zero.

The department suggest that this question not be assessed again since results are good and other topics need improvement.

Plan for topic "Students completing the course will be able to understand and use function notation, for example, in conjunction with a difference quotient.": 2017/18
DVC Instructional Course SLO Action Plans

The Math Department feels that evaluating functions for an expression and evaluating difference quotients is an essential topic to be mastered in Math 191, especially because it leads to crucial calculus material like computing limits and derivatives. As such, the department plans to take the following actions to continue to improve the overall achievement of this outcome by all Math 191 students. At the beginning of each semester, the department will communicate the following to each math 191 instructor:

1) Emphasize function notation and evaluating functions with expression as the input. 2) Emphasize function notation verbally and repeat throughout the semester. 3) Emphasize function notation every time a different type of function is introduced, not just when covering difference quotients.

The department suggest that these questions be assessed again since they are important skills for student to have going into Math 192. Also, the department will continue to add the supplemental question asking the type of calculator, if any, used during the assessment. It is important to know this when analyzing the results so that it can be taken into account in the data. Finally, the department suggests that the results of combined top two responses be given when analyzing SLO assessment data because this information gives a better understanding of how many students either know or partly know the concept asked. It is recommended that instructors who give assessment for a course one semester should try to be part of the analysis of the results the following semester. This will provide very useful feedback needed for analysis.

Plan for topic "Students completing the course will be able to solve polynomial, rational, exponential, logarithmic, and trigonometric equations.": 2017/18

The Math Department feels that students don’t understand solving trigonometric function equations. The Math Department is wondering if students are being properly assessed on trigonometric skills. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 191 students.

At the beginning of each semester, the department will communicate the following to each math 191 instructor:

1) Emphasize basic graphs of trigonometric functions.

2) Emphasize using unit circle to evaluate exact values of trigonometric functions.

3) Practice solving trigonometric functions with arguments other than x.

The math department suggest to only assess the second type of question, solving trigonometric equations, and not assess the first type of question, finding number of solutions.
of trigonometric equations, because the former is most important for next level of math. Also, the department will continue to add the supplemental question asking the type of calculator, if any, used during the assessment. It is important to know this when analyzing the results so that it can be taken into account in the data. Finally, the department suggests that the results of combined top two responses be given when analyzing SLO assessment data because this information gives a better understanding of how many students either know or partly know the concept asked. It is recommended that instructors who give assessment for a course one semester should try to be part of the analysis of the results the following semester. This will provide very useful feedback needed for analysis.

Plan for topic "Students completing this course will be able to graph polynomial, rational, exponential, logarithmic, or trigonometric functions."

The Math Department feels that this is an essential topic for Math 191 and that the results are pretty good. But this topic is difficult to analyze well when most students are using a graphing calculator. We recommend assessing a different topic for the next cycle. Also, if this topic is assessed again, it should be noted on the topic that students completing the course will be able to graph polynomial, rational, exponential, logarithmic, and trigonometric functions without a graphing calculator.

At the beginning of each semester, the department will communicate the following to each math 191 instructor: Review graphs of all basic functions covered in this course.

Finally, the department recommends that instructors who give assessment for a course one semester should try to be part of the analysis of the results the following semester. This will provide very useful feedback needed for analysis.

Plan for topic "Students completing the course will be able to understand and use function notation, for example, in conjunction with a difference quotient."

The Math Department feels that evaluating functions for an expression and evaluating difference quotients is an essential topic to be mastered in Math 191, especially because it leads to crucial calculus material like computing limits and derivatives. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 191 students.

At the beginning of each semester, the department will communicate the following to each math 191 instructor:
1) Emphasize the role of a negative leading coefficient for quadratic functions. Difference between negative x squared and (negative x)squared.

2) Emphasize how factoring helps to simplify expressions and hence making the problem simpler. Focus on examples where factoring by grouping is needed.

3) Emphasize factor by grouping throughout the semester. Students are more likely to forget factor by grouping since it is used less in algebra but it is essential in calculus.

The department suggest that these questions be assessed again since they are important skills for student to have going into Math 192.

Finally, the Math department will add two questions at the end of the assessment in the next cycle. The first one will ask about the type of calculator used on the assessment in an attempt to gain a broader view of the tools that students are using when assessed. The second will be about which math class the students are going to next, in an attempt to gain a view of the percentage of Math 191 students are moving onto calculus.

Plan for topic "Students completing the course will be able to solve polynomial, rational, exponential, logarithmic, and trigonometric equations.": 2015/16

The Math Department feels that students do not understand solving trigonometric function equations. The Math Department is wondering if students are being properly assessed on trigonometric skills. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 191 students.

At the beginning of each semester, the department will communicate the following to each math 191 instructor:

1) Emphasize trigonometric functions.

2) Students need to learn to solve equations with trigonometric function.

3) Emphasize solving trigonometric functions both by isolating the variable and by using graphs, determine when each method is most appropriate.
The department also suggested to take out the logarithmic problem since the results were pretty good and focus on trigonometry. Have both questions on solving trigonometric functions.

Finally, the Math department will add two questions at the end of the assessment in the next cycle. The first one will ask about the type of calculator used on the assessment in an attempt to gain a broader view of the tools that students are using when assessed. The second will be about which math class the students are going to next, in an attempt to gain a view of the percentage of Math 191 students are moving onto calculus.

Plan for topic "Students completing the course will be able to find the inverse function that corresponds to a given function.": 2015/16

The Math Department feels that understanding and finding inverse functions are both essential learning outcome for Math 191. As such, the department plans to take the following actions to improve the overall achievement of this outcome by all Math 191 students.

At the beginning of each semester, the department will communicate the following to each math 191 instructor:

1) Students do better with procedures than concept, most can learn to find inverse functions but have difficulty answering questions about inverse functions.

2) Emphasize the relationship between the graphs of functions and its inverse.

3) Evaluate points of a function and its inverse using graphs.

The department suggested increasing the difficulty of the first question by using a rational function instead of a linear function.

Finally, the Math department will add two questions at the end of the assessment in the next cycle. The first one will ask about the type of calculator used on the assessment in an attempt to gain a broader view of the tools that students are using when assessed. The second will be about which math class the students are going to next, in an attempt to gain a view of the percentage of Math 191 students are moving onto calculus.

Plan for topic "Students completing the course will be able to solve rational and absolute value inequalities.": 2012/13

A large majority of students successfully answered the questions. In our discussions, faculty agreed that question 1 is appropriate to the course level and outcome. The answers to question 2 are flawed because two different answers could reasonably be viewed as correct. This will be fixed. We will share these results, including common errors, with all future Math 191 instructors in hope of continuing to improve these results.

Plan for topic "Students completing the course will be able to solve polynomial, rational, exponential, logarithmic, and trigonometric
The majority of students successfully answered the questions. In our discussions, faculty agreed that the assessment questions were appropriate to the course level and outcome. Our plan is to share these results, including common errors, with all future Math 191 instructors in hope of continuing to improve on these results.

Plan for topic "Students completing the course will be able to find the inverse function that corresponds to a given function.": 2012/13

The majority of students successfully answered the question. In our discussions, faculty agreed that the assessment questions were appropriate to the course level and outcome. Our plan is to share these results, including common errors, with all future Math 191 instructors in hope of continuing to improve on these results.

Course Action Plans
DVC Instructional Course SLO Action Plans

1109. Analytic Geometry and Calculus I [MATH-192] belonging to Mathematics [MATH]

Plan for topic "Students completing the course will be able to understand the meaning of the derivative, its use in different contexts, and should be proficient with the techniques of differentiation.": 2017/18

The department believes that this is a fundamental topic that is an extremely important outcome for this course which needs to be mastered in order to succeed.

Overall, the department was not impressed with the low success rate and suggest that this topic continues to be assessed by either using the same question or a similar question. The department would like to see at least 85% of students answer this question correctly in future assessments.

The math department suggests developing a co-requisite course for Math 192 with an emphasis on trigonometric functions.

At the beginning of the term that math 192 is offered, the department will communicate the following to each math 192 instructor:

1) Assign a variety of problems that gives students an opportunity to practice using each of the rules of differentiation, especially the chain rule and product rule. Assign problems throughout the semester that requires students to continue applying the rules of differentiation. When discussing antidifferentiation, make emphasis on checking results by differentiating for further practice.

2) Whenever possible, show students alternate methods, and consider alternate ways to teach or explain new concepts.

Plan for topic "Students completing this course will be able to apply differentiation rules to solve optimization problems. [Â F Â] never": 2017/18

The department believes that optimization problems are an essential topic in differential calculus because it is a practical application of differentiation that is used in business
The department believes that there is a lot of work involved in solving an optimization problem, and so the department would like to consider using an open ended question the next time this topic is assessed to gain better insight to common mistakes when analyzing SLO results.

The department also suggest choosing a question carefully so students are forced to use differentiation to solve the question, or in the assessment question, ask students to clearly justify their solutions by using differentiation to solve the optimization problem. The department recommends to include a picture, if possible.

Overall, the department felt that the results were generally as expected. However, the department would like to see improvements in the student success rate in future assessments of this topic.

Plan for topic "Students completing the course will understand how to utilize the Fundamental Theorem of Calculus to evaluate a definite integral. [Å JÅ never": 2017/18

The department believes that the Fundamental Theorem of Calculus and the Substitution Rule are essential topics in calculus. It is necessary for students to master both topics in order to successfully complete the calculus sequence.

Overall, the department was not impressed with the low success rate and suggest that this topic continues to be assessed by either using the same question or a similar question. The department would like to see at least 85% of students answer this question correctly in future assessments.
DVC Instructional Course SLO Action Plans

At the beginning of the term that math 192 is offered, the department will communicate the following to each math 192 instructor:

1) Be sure to pace the class accordingly to have plenty of time to introduce definite integrals, the Fundamental Theorem of Calculus, and the Substitution Rule.

2) Emphasize the importance of the Substitution Rule to students. Make sure to give students enough time to practice using the Substitution Rule before the final exam and moving onto calculus 2. Students need to improve their skill in using the Substitution Rule.

**Plan for topic "Students completing the course will be able to determine if the limit of a function at a real number exists and to compute the limit if exists.": 2017/18**

The department believes that evaluating a limit is an essential topic in calculus 1, and the department wants to see better results the next time this topic is assessed. Evaluating limits reoccurs throughout differential and integral calculus and the entire calculus sequence, and so it is an essential topic that the department hopes to see students master.

The next time this topic is assessed the department suggest choosing a limit that can be evaluated using the Limit Laws or the Squeeze Theorem instead of choosing one that require using L Hospitals Rule. Or, consider a problem where the limit can be determine by using L Hospitals Rule or graphically; for example, the limit of ln x / x as x increase without bounds, or the limit of x/e^x as x increases or decreases without bounds.

**Plan for topic "Students completing the course will be able to understand the concept of continuity and how to determine if a function is continuous at a real number.": 2017/18**

The department believes that concept of continuity and how to determine if a function is continuous at a real number is an essential topic in calculus 1.
The department thought the question used to assess this topic was a great choice and suggest using this question in future assessments of this topic.

Overall, the department was not impressed with the low success rate and suggest that this topic continues to be assessed by using the same question. The department would like to see improvement in students success rates.

At the beginning of the term that math 192 is offered, the department will communicate the following to each math 192 instructor:

1) Emphasize to students the importance of knowing if a function is continuous at a particular number since it may simplify the process of evaluating the limit of the function and since continuous functions are integrable et cetera. Emphasize the importance of knowing both the intuitive and formal definition of continuity.

Plan for topic "Students completing the course will be able to understand the meaning of the derivative, its use in different contexts, and should be proficient with the techniques of differentiation.": 2014/15

The above results were considered adequate overall. Some concern however among department members over the use of an online survey being to assess students. Consequently, future assessments will be administer in a different manner; specifically future instructors will use topic questions from a data base of questions, and administered in class, e.g. as part of a final exam.

Plan for topic "Students completing the course will be able to understand the meaning of the integral, its use in different contexts and should be proficient with the integration of simple algebraic and transcendental functions.": 2014/15

The above results were considered adequate overall. Some concern however among department members over the use of an online survey being to assess students. Consequently, future assessments will be administer in a different manner; specifically future instructors will use topic questions from a data base of questions, and administered in class, e.g. as part of a final exam.

Plan for topic "Students completing the course will be able to understand the meaning of the limit and its use in differentiation.": 
The above results were considered encouraging to adequate, overall. Some concern however among department members over the use of an online survey being to assess students. Consequently, future assessments will be administer in a different manner; specifically future instructors will use topic questions from a data base of questions, and administered in class, e.g. as part of a final exam.

Plan for topic "Students completing the course will be able to understand the meaning of the derivative, its use in different contexts, and should be proficient with the techniques of differentiation."

A significant majority of students successfully answered the questions. In our discussions, faculty agreed that the assessment questions are appropriate to the course level and outcome. Our plan is to share these results, including common errors, with all future Math 1921 instructors in hope of continuing to improve.

Plan for topic "Students completing the course will be able to understand the meaning of the integral, its use in different contexts and should be proficient with the integration of simple algebraic and transcendental functions."

The majority of students successfully answered the questions. In our discussions, faculty agreed that the assessment questions were appropriate to the course level and outcome. Our plan is to share these results, including common errors, with all future Math 192 instructors in hopes of continuing to improve on these results.

Plan for topic "Students completing the course will be able to understand the meaning of the limit and its use in differentiation."

Slightly less than the majority of students successfully answered one question, and slightly more than the majority successfully answered the other question. In our discussions, faculty thought that these two assessment questions were too tricky and agreed to substitute more straightforward questions to assess this topic next time.
### DVC Instructional Course SLO Action Plans

#### 1110. Analytic Geometry and Calculus II [MATH-193] belonging to Mathematics [MATH]

**Plan for topic "Students completing the course will be able to apply theorems to determine if a series converges or diverges."**: 2017/18

**Question 5**: This question gave three different series and asked if they converged or diverged. The tests needed were: p-test, ratio test and alternating series test. We are pleased with the pass rate of 64.55%. We suspect a high pass rate because of the false answers given. Series [A] is a quick P-series (p=1/2) test that eliminates 3 out of the 5 choices; b,c,e. We wish to create better false answers here. Each series should be chosen so that they are almost equal in difficulty.

**Question 6**: This question gave an alternating series and asked if it converges, conditionally converges or diverges. We suspect that many students applied alternating series test to test for convergence, but forgot to do a separate test to see if it was absolutely convergent. Also, with the second highest response being, none of these; shows that students are not comfortable with the differences between conditionally convergent and absolutely convergent. We suggest that instructors do more example with series that highlight the differences between the two different types of convergence.

The department suggests covering the sequences and series chapter in the middle of the course, rather than the end. It can be placed after the differential equations chapter. This gives students more time with this new type of calculus. Calculus with parametric curves can be place at the end of the course. This will flow well with multivariable calculus (math 292).

We would like to see this topic stay on the next assessment so that we can compare these results to the future data.

---

#### Plan for topic "Students completing this course will be able to set up a definite integral to calculate the area of a region bounded by curves."**: 2017/18

**Question 1**: Students were given two cartesian curves and asked to find the area bounded by the curves. One of the curves was a function of y that cannot be solved explicitly for y. We believe an attractive false answer was a contributing factor for the low success rate. One of the false answers was an integral in the variable x. Many students are comfortable with finding the area by integrating with respect to x and we suspect that many students rushed and picked the answer that was most familiar to them. We suggest having all false answer be integrals in y. Instructors should spend more time on graphing functions of y and regions bounded by functions of y. Desmos.com understands functions of y. Instructors should let their students know early of graphing tools, so they can begin to understand functions of y. This will also help prepare students for
Question 2: Students were given two polar curves and asked to find the area bounded by the curves. We are moderately satisfied with the pass rate of 56.86% considering the past difficulties students have with polar functions. We believe that there was a very good false answer that students chose over the correct answer. We believe option d) was chosen because it was missing the 1/2 scaling required for area between polar coordinates and the integrand was a difference of the curves rather than the difference of the squares, as required by polar area. Therefore possibly, students comfortable with cartesian coordinates may have chosen this answer just because it was familiar. We believe that this influenced the success rate. Instructors should show students how to graph polar curves with technology so that they can better understand these curves. Desmos.com will graph r=f(theta).

We would like to see this topic stay on the next assessment so that we can compare these results to the future data. We recommend keeping the area bounded between curves and have the integrals be in the variable y.

Plan for topic "Students completing the course will be able to describe a region by boundaries or inequalities in x an y, draw a solid of revolution, set up an integral for the volume.": 2014/15
Due to the highly successful achievement of this learning outcome, the Math Department plans to change to a new assessment topic in the next round of assessment. In particular, keeping similar language, but changing to the setup of an integral to determine the area of a region is appealing because it is less dependent on formulas and requires similar conceptual understanding.

Plan for topic "Students completing the course will be able to analyze an integral to determine the correct method of integration.": 2014/15
Due to the highly successful achievement of this learning outcome, the Math Department plans to change to a new assessment topic in the next round of assessment. In particular, the department would like to create an assessment topic for the learning outcome "Students will be able to represent functions as power series".

Plan for topic "Students completing the course will be able to apply theorems to determine if a series converges or diverges.": 2014/15
The Math Department plans to create a FLEX activity to discuss the concept methodology around infinite series and to share ideas about improving the instruction around this topic. Furthermore, the department plans to ask all Math 193 instructors in future semesters to focus on strengthening concepts about convergence rather than mechanics as
well as on improving intuition about ranking of functions. If the FLEX activity produces more ideas, those will be disseminated to the department as well.

1111. Linear Algebra [MATH-194] belonging to Mathematics [MATH]

Plan for topic "Students completing the course will be able to identify a vector space.": 2018/19

This topic was assessed in the previous assessment cycle, but the results have not improved significantly. The department feels that the ability to correctly identify a vector space is an essential skill in linear algebra, and that familiarity with vector spaces other than $\mathbb{R}^2$ and $\mathbb{R}^3$ is a particularly important outcome. Instructors should be giving students more diverse examples of vector spaces, and remind them that $\mathbb{R}^2$ and $\mathbb{R}^3$ are not the only examples of two- and three-dimensional vector spaces.

Plan for topic "Students completing the course will be able to identify a basis for a vector space.": 2018/19

The department feels that this is an essential topic for this course. Instructors should offer more opportunity for students to determine "by inspection" whether a set of vectors is linearly dependent.

Plan for topic "Students completing this course will be able to determine the dimensions of subspaces associated with a matrix.": 2018/19

The department feels that this is an essential topic for this course because students should understand the relationships among the dimensions of the three subspaces associated with a given matrix. However, the question was written in such a way that it is impossible to know what students didn't understand. The most popular incorrect answer was that two of the three statements were true, which indicated that those students either didn't know that the row space and column space have the same dimension, or that the row space and the null space are complements.

The department feels that this topic is an essential one for this course, and that it should be assessed again. However, the question should be changed to one where the students are simply asked to mark each question as true or false. The department feels that instructors should emphasize and spend more time on theorems about subspaces associated with matrices. In particular, the relationships among their dimensions should be made clear to students.

Plan for topic "Students completing the course will be able to identify a vector space.": 2015/16

The Math Department feels that the ability of students to correctly identify the description of a vector space is appropriate and essential for this course.

More emphasis is needed on direct proof, including the use of counterexamples as a method of disproving a statement. A correct result could have been obtained by checking each possible answer for the presence of the zero vector.

It was also suggested that this topic is a difficult one to assess using multiple choice questions. Perhaps testing directly on the properties of vector spaces would better fit this format, although this may pose difficult to determine whether a student understands how to use the properties.
Another suggestion was to employ weekly quizzes that are based on student homework to encourage students to put more effort into studying concepts.

The department feels that this topic is essential for this course and, given the results, should be tested again during the next assessment cycle.

Plan for topic "Students completing the course will be able to identify a basis for a vector space.": 2015/16

The Math Department feels it is essential for students to be able to identify a basis for a vector space.

Instructors should emphasize the “big theorem” with multiple equivalent statements and should regularly refer to it as a problem solving tool. Competence in using this tool would have allowed students to eliminate most of the given choices. The selection that received the second most answers was a set that contained four vectors. This result was disappointing.

The type of analysis needed for this particular question is a relatively simple proof, especially compared to other proofs. The department feels that in general Math 194 students struggle with proofs and it might serve them well to spend more time working with them. A suggestion for the future is to have a workshop or two each semester, or perhaps a one unit course could be considered to assist students with writing proofs.

Plan for topic "Students completing the course will be able to determine the number of solutions to a linear system, and if there are an infinite number of solutions, determine how many arbitrary parameters the solution has.": 2015/16

The Math Department feels it is important for students to be able to use linear algebra to solve this type of problem. The results indicate this topic should be tested during the next assessment cycle.

The department feels that using a more technology based approach to linear algebra in classes would enhance and enrich students understanding.

It was suggested that a new question for this topic be written. Perhaps one that involves giving students an augmented matrix or that gives the matrix equation of a linear system. Another idea was to give the dimensions of the augmented matrix with the number of zeros in a particular row. A system that consists of equations can be solved by techniques other than those learned in a Linear Algebra class.

Plan for topic "Students completing the course will be able to determine whether or not a set of vectors, with a parameter, can be made linearly independent and a basis for the vector space in question, by determining the correct value of this parameter.": 2012/13
The relatively high percentage of success seems to indicate that the department should continue to teach and assess this SLO topic as done currently. A possible change would be to place more emphasis in class on the Topic #1 concepts, as this topic is significant in the overall content of the course.

**Plan for topic "Students completing the course will be able to identify a vector space."**: 2010/11

Reword the question to include descriptions of vector addition and scalar multiplication.

**Plan for topic "Students completing the course will be able to identify a basis for a vector space."**: 2010/11

Perhaps include a question about a different type of vector space on the next assessment cycle.

**Plan for topic "Students completing the course will be able to determine the number of solutions to a linear system, and if there are an infinite number of solutions, determine how many arbitrary parameters the solution has."**: 2010/11

Focus efforts on teaching how to determine the number of solutions using Row-Reduced-Eschelon-Form.

**Plan for topic "Students completing the course will be able to identify a vector space."**: 2009/10

The reasonably high rate of success on this topic indicates the department should continue to teach and assess as we currently are, however instructors will be told to be certain to emphasis this topic when teaching the course.

**Plan for topic "Students completing the course will be able to identify a basis for a vector space."**: 2009/10

The reasonably high percentage of success indicates the department should continue to teach this topic in the same way, however instructors will be told to be sure to emphasize this topic to ensure continued success.

**Plan for topic "Students completing the course will be able to determine the number of solutions to a linear system, and if there are an infinite number of solutions, determine how many arbitrary parameters the solution has."**: 2009/10

The high percentage of successes indicates that the department should continue to teach and assess this SLO as they currently are.
Plan for topic "Students completing the course will be able to apply mathematical induction to problems in sequences and series."

- **2016/17**
  - The Department feels that mathematical induction should be used frequently throughout this course, and not taught only at the time that that particular chapter is covered. The department would like this topic to be assessed again in future assessments. Some members of the department expressed an interest in doing some research into the teaching and learning mathematical induction.

Plan for topic "Students completing the course will be able to write and analyze proofs."

- **2016/17**
  - This topic is not tied to any SLO, and the department feels that it should not be assessed again. The Department feels that Topics related to SLO B (Students will be able to use functions in analysis of algorithms) or G (Students will be able to construct tree diagrams in analysis and construction of programs) should be assessed in the future. If this question is used again in future assessments, the following changes should be made: The conjunctive should be changed to because the question does not assess both writing and analyzing a proof. Also, the results should be tabulated as four TRUE/FALSE questions so that the results may be analyzed more accurately.

Plan for topic "Students completing this course will be able to recognize Boolean expressions corresponding to a digital logic circuit diagram."

- **2016/17**
  - The Math Department would like to use this question again. If the results continue to be this good, the Department believes that a new topic should be assessed.

Plan for topic "Students completing the course will be able to apply principles of logic to analyze validity of arguments."

- **2015/16**
  - The Math Department feels satisfied that students in Math 195 can analyze the validity of arguments. However, the department should still remind all Math 195 instructors at the beginning of the semester to emphasize the two cases (propositional and predicate logic) in which valid means the same thing, and to ensure students can do the procedures necessary to verify validity.

The math department intends to change this topic for the next assessment cycle.

Plan for topic "Students completing the course will be able to apply mathematical induction to problems in sequences and series."

- **2015/16**
  - The Math Department feels that understanding hypothesis tests is important for Math 195 students. At the start of every semester, the department will remind all Math 195 instructors to provide their students with more induction practice, and to recommend that it appear throughout the course rather than just in the chapter on induction. In addition, the department plans to create a new question to test induction that is less likely to confuse students.

Plan for topic "Students completing the course will be able to write and analyze proofs."

- **2015/16**
The Math Department feels that proofs are absolutely vital for Math 195 students. At the start of every semester, the department will remind all Math 195 instructors that, during the last SLO assessment, almost 70% of Math 195 students were unable to pick a correct proof for a simple claim out of a list of four possible proofs, and that they should be assigning and grading proofs throughout the semester.

Plan for topic "Students completing the course will be able to apply principles of logic to analyze validity of arguments.": 2012/13

In reviewing the data, the faculty determined that the SLO was met by an overwhelming majority of students; the instructor was applauded. In order to assess continuity in teaching the course, the department will evaluate the same topic the next time the course is assessed.

Plan for topic "Students completing the course will be able to apply mathematical induction to problems in sequences and series.": 2012/13

In reviewing the data, the faculty determined that the SLO was met by an overwhelming majority of students; the instructor was applauded. In order to assess continuity in teaching the course, the department will evaluate the same topic the next time the course is assessed.

Plan for topic "Students completing the course will be able to write and analyze proofs.": 2012/13

In reviewing the data, the faculty determined that the SLO was met by an overwhelming majority of students; the instructor was applauded. In order to assess continuity in teaching the course, the department will evaluate the same topic the next time the course is assessed.

Plan for topic "Students completing the course will be able to apply principles of logic to analyze validity of arguments.": 2010/11

The dept plans to continue the current instructional practices regarding this topic. It also plans to make sure that instructors who are new to teaching Math 195 get some mentoring assistance from those that have taught it recently in order to continue the success that we are currently seeing.

Plan for topic "Students completing the course will be able to apply mathematical induction to problems in sequences and series.": 2010/11

The dept plans to continue the current instructional practices regarding this topic. It also plans to make sure that instructors who are new to teaching Math 195 get some mentoring assistance from those that have taught it recently in order to continue the success that we are currently seeing.

Plan for topic "Students completing the course will be able to write and analyze proofs.": 2010/11

The dept plans to continue the current instructional practices regarding this topic. It also plans to make sure that instructors who are new to teaching Math 195 get some mentoring assistance from those that have taught it recently in order to continue the success that we are currently seeing.
1113. Introduction to Upper Division Mathematics [MATH-289] belonging to Mathematics [MATH]

Plan for topic "Students completing the course will be able to evaluate the directional derivative of a multi-variable function.": 2018/19

The department would like to assess this SLO and topic again with a more concrete question.

Plan for topic "Students completing this course will be able to set up and calculate a volume using double integrals.": 2018/19

Math 292 instructors might consider reviewing u-substitution techniques which students learned in Math 193, but may have lost the skill by this point in Math 292. Also, the choice of technique (for example, rectangular vs polar coordinates) is a higher-level skill that students need to develop after learning the individual techniques: covering such choices makes sense in a review or overview lesson. At the beginning of each semester, the department will recommend each 292 instructor bear these points in mind.

Plan for topic "Students completing this course will be able to set up and calculate work using a line integral.": 2018/19

For a future evaluation, the department proposes using a more direct evaluation of student knowledge of, say, Green’s theorem, using a closed curve rather than the open one from this example. Also, the group felt that contextualizing the theorems, perhaps in a review session distinguishing the theorems and techniques from each other, would lead to greater student expertise in this area.

Plan for topic "Students completing this course will be able to write the equation of the tangent plane to a surface at a point and the equation of a plane given three points.": 2016/17

The Math Department believes that this topic is extremely important as an outcome for this course.

Elements involved in both questions are core concepts of math 292, such as partial derivatives, and extension of slopes of tangent lines from calculus I.

Overall the Department was pretty impressed with the results, but suggests continuing this topic for one more assessment cycle to see if we can achieve an improvement in the success of question 2.

At the beginning of the term that math 292 is offered, the department will communicate the following to each math 292 instructor:

1) Instructors should emphasize the similarities and differences between concepts involved in the analytic geometry involved in question 1, and the calculus approach in
question 2. For example, understanding how the normal vector is involved in question 2 and partial derivatives.

2) Students should understand that the equation of a plane is a linear equation and that the partial derivatives must be evaluated at the point of tangency. Leaving the partial derivatives as functions of x and y will yield a nonlinear equation for the plane.

Plan for topic "Students completing this course will be able to set up and calculate a volume using double integrals.": 2016/17

The Math Department feels it is important for students to be able to visualize and sketch regions in three-dimensional space. This is important in developing resilience, critical thinking skills, and dexterity of mind.

Maintain assessing students using two questions, one involving use of polar coordinates and the other involving Cartesian coordinates.

The second question involves finding the volume of a solid over a Cartesian plane. The Department suggests rewording the question so students are not easily misled into using polar coordinates. Replacing a paraboloid with a general surface that is not readily convertible to polar is advised. The Department also suggests replacing the function given in the second question with one that is not easily convertible to polar coordinates.

The topic states for students to use double integrals, however, they could use a triple integral on the second question. While this approach leads to the same result, use of double integrals is specified in the topic but not in the question.

Consider replacing the multiple choice with open-ended questions. The second question required use of Cartesian coordinates. Students recognizing this were given only two possible answer selections that did not involve "pi".

If multiple choice are given, the department would like to see incorrect answers to questions be written so they give meaningful feedback to common errors so underlying reasons for these mistakes could be determined, being mindful of comments in the preceding paragraph.

At the beginning of term that math 292 is offered, the department will communicate the following to each math 292 instructor:

1) Emphasize when use of polar coordinates is and is not appropriate by focusing on the region over which the function resides.
### DVC Instructional Course SLO Action Plans

2) Focus on ability to visualize and sketch regions.

DVC Instructional Course SLO Action Plans

1115. Differential Equations [MATH-294] belonging to Mathematics [MATH]

Plan for topic "Students will be able to solve various science application problems." : 2017/18

The department was disappointed because the question was very straightforward. Students should understand the importance of an oscillator (harmonic, damped, underdamped, overdamped). Within the context of the class, students have a very concrete example of an oscillator in the form of a mass/spring system, but the oscillator is generalized and used throughout the sciences. Faculty will be asked to emphasize why things work, and not just how to do it. Also, faculty will be encouraged to spend more than just one day on this material. It may only be one section in the book, but it is a very rich topic.

Plan for topic "Students completing the course will be able to solve non-homogeneous linear differential equations by the method of variation of parameters, and by either undermined coefficients or inverse operators." : 2017/18

The department was disappointed, since more than 60% of students should be able to solve this standard question. Instructors should emphasize like terms. Upon analyzing actual student work, we found that students had trouble understanding that adding an arbitrary constant to a specific constant yields an arbitrary constant. These students got the right answer but didn't recognize it, instead choosing none of the above.

Instructors will be asked to make more of a point when they combine arbitrary constants, explaining what the constants mean and why we can combine them. Instructors will also be asked to discuss the meaning of general solutions and families of solutions.

Plan for topic "Students will be able to solve first-order equations." : 2017/18

The department was disappointed. This is a standard question, and more than 60% of students should be able to solve it. After examining actual student work, we found that at least some students forgot to divide both sides of the equation by x and thus used the wrong integrating factor. That led to some pretty ugly calculations, and students might have either given up or decided that all of the answers looked too simple, choosing "none of the above" in either case.

Instructors will be asked to emphasize standard form and impress upon students why it is important in this situation.

Plan for topic "Students completing this course will be able to solve ODEs by qualitative methods." : 2017/18

Once again, the department was disappointed. Relatively few students got this problem, although this may be because the material was only covered during the first few weeks of class. Instructors need to use phase diagrams wherever they are appropriate throughout the semester so that students don't forget them.
Plan for topic "Students will be able to solve various science application problems.": 2014/15

Due to the extreme confusion surrounding this course’s SLO administration (data not collected by question, wrong answers for one of the questions, unclear directions to instructors), the department cannot create an actionable plan to improve instruction based on the results. However, the department can plan to improve its course SLO process so that this situation does not occur again. We plan to merge two of our department committees to create more institutional memory of how SLO tasks are done with more people involved behind the scenes to get these assessments completed. We also plan to create a more organized structure for administering, gathering data, analyzing, and inputting results, as well as communicating current plans to instructors. Finally, we plan to commit to get assessment questions delivered to instructors at least two weeks before finals, to avoid the last minute rush that can create such problems.

</table>
1117. Student Instructional Assistant [MATH-299] belonging to Mathematics [MATH]

Plan for topic "Students completing MATH-299 will be able to increase learning through involvement as a teacher's aide.": 2018/19

Math 299 is offered when requested by a faculty member

and approved through the Instruction Office (as noted in

the course outline). The math department feels that

students who complete math 299 will increase learning

by working as a teacher's aide. Instructors teaching

this course will monitor students enrolled in math 299

throughout the term to determine the effectiveness of

student progress, and provide to opportunities for

students to enhance learning. Future instructors will be

provided with the results of the last assessment.

The course has not been offered since Fall 2013 and will be assessed the next time it is offered.

Plan for topic "Students completing MATH-299 will be able to increase learning through involvement as a teacher's aide.": 2016/17

Math 299 is offered when requested by a faculty member and approved through the Instruction Office (as noted in the course outline). </tr>
</tbody>
</table>
1118. Applied Music [MUSIC-100] belonging to Music [MUSIC]

Plan for topic "Students completing the course will be able to demonstrate improved technical facility on his/her instrument or voice."

2016/17

A rubric for each individual area (classical voice, jazz voice, piano, etc) was created for each academic semester of study. This has helped to increase outcomes for this topic. A system needs to be created to help those in the first and second semesters during practice lab hours and to increase individual practice time.

Plan for topic "Students completing the course will be able to demonstrate greater artistry on his/her instrument or voice."

2016/17

Like Assessment #1, A rubric was developed for every student's level (1-4) and their specific instrument in regard to their individual artistry. There are so many variables in the course which makes assessment very difficult. Certain areas seem to achieve this goal better than others including classical piano, jazz majors and classical guitar. More variation in outcomes are frequent in the vocal, percussion and string area. No action needed.

Plan for topic "Students completing the course will be able to discuss appropriate practice regimens for his/her instrument or voice."

2016/17

The course lecture/lab for MUS100 has changed in the past two years. There is no longer a paid instructor to oversee this course. There is greater emphasis by the individual teacher and not a class instructor. For this reason, the outcomes for SLO#3 is more ambiguous.

Plan for topic "Students completing the course will be able to demonstrate improved technical facility on his/her instrument or voice."

2013/14

A rubric needs to be developed for every student's level (1-4) and their specific instrument in regard to their individual improvement. There are so many variables in the course which makes assessment very difficult.

Plan for topic "Students completing the course will be able to demonstrate greater artistry on his/her instrument or voice."

2013/14

Like Assessment #1, A rubric needs to be developed for every student's level (1-4) and their specific instrument in regard to their individual artistry. There are so many variables in the course which makes assessment very difficult.

Plan for topic "Students completing the course will be able to discuss appropriate practice regimens for his/her instrument or voice."

2013/14

Lecture teacher needs to stress information in each class. Better communication needs to take place with the individual's APPLIED teacher. Consistency in practice expectations needs to improve.

Plan for topic "Students completing the course will be able to demonstrate improved technical facility on his/her instrument or voice."

2011/12

More generic rubric needs to be developed for assessing technique. To difficult to compare different voices and levels within single class.

Plan for topic "Students completing the course will be able to demonstrate greater artistry on his/her instrument or voice."

2011/12
Since the course can be repeated three times, the rubric needs to be broken down by semester of study.

**Plan for topic "Students completing the course will be able to discuss appropriate practice regimens for his/her instrument or voice.": 2011/12**

Lecture teacher needs to stress this SLO earlier in the semester. Lecture teacher also needs to share information given to students with private instruction teachers for the course. More unified approach for all musical instruments and voice will happen next semester.

1128. Music of the Middle East and South Asia [MUSIC-115] belonging to Music [MUSIC]

Plan for topic "Students completing the course will be able to demonstrate a vocabulary for the appreciation of popular music.": 2020/21
Affirmation and reinforcement of the current curriculum. The students consistently excelled at discussion topic #1.

Plan for topic "Students completing the course will be able to aurally recognize the dominant styles of rock and R&B.".: 2020/21
Affirmation and reinforcement of the current curriculum. The students consistently excelled at objective exams.

Plan for topic "Students completing the course will be able to relate the evolution of rock styles to aspects of American culture and history.": 2020/21
Affirmation and reinforcement of the current curriculum. The students consistently excelled at discussion topic #3.

Plan for topic "Students completing the course will be able to demonstrate a vocabulary for the appreciation of popular music.": 2016/17
I began teaching at DVC Fall 2014. My student success rate has been very high, due to class group projects and constant development of my curriculum.

I ask for student feedback in all final exams and I consider relevant comments in developing my curriculum each semester.

Continue to use Canvas to place Test study guides and other key information available.

Plan for topic "Students completing the course will be able to aurally recognize the dominant styles of rock and R&B.".: 2016/17
Group projects helps individual students to be more engaged and alert to new information.

Also using Canvas by assessing students performance and supplying handouts and guides for studying; as well as using rubrics for written paper assignments has helped students understand what I am looking for.

Plan for topic "Students completing the course will be able to relate the evolution of rock styles to aspects of American culture and history.": 2016/17
The current assessment criteria suggest the instructor is becoming more adapt at reaching more students with clarity directions and information. Using Canvas to post guidelines seems to be very helpful.

Plan for topic "Students completing the course will be able to demonstrate a vocabulary for the appreciation of popular music.": 2013/14
I plan to continue with my current methods as I believe the current rate of success is very high

Plan for topic "Students completing the course will be able to aurally recognize the dominant styles of rock and R&B.".: 2013/14
I find these results to be very strong and no additional actions are needed

Plan for topic "Students completing the course will be able to relate the evolution of rock styles to aspects of American culture and

Plan for topic "Students completing the course will be able to utilize a basic vocabulary for the study and understanding of jazz terminology."

In large classes, in-class discussions are tricky. There are many students who are not confident in speaking in front of the class. Utilizing note and question cards has allowed students to engage discussions and allowed them to demonstrate learning without specifically vocalizing their comments. Online discussion boards are less intimidating, but easier for students to ignore or forget. Fostering participation is key.

Plan for topic "Students completing the course will be able to use basic music vocabulary, (melody, rhythm, tonal colors, form, harmony, and improvisation) to write analytical reviews of live performances."

The rubrics I developed in conjunction with Laury Fischer have worked exceptionally well at focusing students on the specific vocabulary for these assignments. Continuing issues are the quantity of vocabulary used, as students will often use terms effectively, but at a minimum. Specific length guidelines should help.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the history of jazz music and various historical styles in the 20th century."

Reinforcement of jazz style chronology is necessary. Perhaps timeline project would help as well.

Plan for topic "Students completing the course will be able to utilize a basic vocabulary for the study and understanding of jazz terminology."

Not all students participate in class discussions. Those that do, typically feel confident and offer compelling answers. Having students fill out small note cards indicating their contributions to class discussions, may offer a way to have more students participate (and thus also have their data included).

Plan for topic "Students completing the course will be able to use basic music vocabulary, (melody, rhythm, tonal colors, form, harmony, and improvisation) to write analytical reviews of live performances."

Terms and concepts must be reviewed more often after the initial introductory course module, which happens in the first three weeks of classes. More clarity on Concert Review expectations. The significant jump in success from mid-term to final submission indicates that detailed comments written on rubrics helps students identify areas needing improvement.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the history of jazz music and various historical styles in the 20th century."

Student participation in online quizzes is often lower than in-class exams. Reminders via course management websites may help increase student participation. Creating visual timelines may lead to more success in identifying the correct chronological order.

Plan for topic "Students completing the course will be able to utilize a basic vocabulary for the study and understanding of jazz terminology."

Course Action Plans Outcome Assessment History Page 1972 of 2394
Plan for topic "Students completing the course will be able to use basic music vocabulary, (melody, rhythm, tonal colors, form, harmony, and improvisation) to write analytical reviews of live performances.": 2012/13

Plan for topic "Students completing the course will be able to demonstrate knowledge of the history of jazz music and various historical styles in the 20th century.": 2012/13

None needed.
**DVC Instructional Course SLO Action Plans**

**1132. The History and Culture of Hip Hop Music [MUSIC-119] belonging to Music [MUSIC]**

Plan for topic "Students completing this course will be able to explain of the evolution of hip hop and explain its place within the context of American popular music culture."

Using a Concert Review Rubric seemed to improve scores. I also want to develop a rubric and use for the Final Essay on the Final Exam.

Plan for topic "Students completing this course will be able to explain the global aspects of hip hop styles and movements."

Some students have anxieties on presenting in class and working in groups; instructor is working on developing an alternative solution.

Plan for topic "Students completing this course will be able to analyze and evaluate lyrics and images within hip hop music."

Students who were very uncomfortable doing an Oral Report was allowed to do a written report as an alternative.

Plan for topic "Students completing this course will be able to take simple diatonic melodic dictation.": 2018/19

Proficiency in aural recognition of scale degrees (via solfege syllables) is a foundational skill which facilitates the taking of melodic dictation. As a plan of action, dictation will be limited to primarily stepwise melodies to better emphasize recognition of scale degrees. Leaps will be limited to those within the tonic and dominant triads only. This conclusion was arrived at after consultation with other CA community college music faculty at focused breakout at a recent conference. The instructor will share these findings with Department.

Plan for topic "Students completing this course will be able to name the quality and numeric value of any given written interval."[Â B.2Â ] never": 2018/19

Despite the reported data, this topic has been the most difficult aspect of this course. It demands mastery of major key signatures, major scale construction, and the exacting procedure for identifying the quality and numeric value of intervals. As a plan of action, more time must be spent mastering major key signatures, playing major scales at the keyboard to emphasize major scale construction, and practicing the procedures for identifying the quality and numeric value of intervals. This plan of action will be shared with the Department.

Plan for topic "Students completing this course will be able to sight-simple diatonic melodies."": 2018/19

Despite the reported data, this topic has been one of the most difficult aspect of this course. It demands mastery of the concept of scale degrees and the sound of tonic and dominant harmonies. As a plan of action, sight-singing will be limited to primarily stepwise melodies to better emphasize scale degrees. Leaps will be limited to those within the tonic and dominant triads. This conclusion was arrived at after consultation with other CA community college music faculty at focused breakout at a recent conference. The instructor will share these findings with Department.

Plan for topic "e": 2018/19

Despite the reported data, this topic has been one of the most difficult aspect of this course. It demands mastery of the concept of scale degrees and the sound of tonic and dominant harmonies. As a plan of action, sight-singing will be limited to primarily stepwise melodies to better emphasize scale degrees. Leaps will be limited to those within the tonic and dominant triads. This conclusion was arrived at after consultation with other CA community college music faculty at focused breakout at a recent conference. The instructor will share these findings with Department.

Plan for topic "Students completing the course will be able to utilize the modern, Western system of notating music."": 2015/16

Group activities designed to increase the quality and accuracy of musical notation will be added.

Plan for topic "Students completing the course will be able to apply fundamental Western theoretical concepts."": 2015/16

Specific style periods will be added to the focus of theoretical concepts (ie. Renaissance, Classical, Romantic).

Plan for topic "Students completing the course will be able to demonstrate basic musicianship skills including sight singing, rhythm
<table>
<thead>

<td>2012/13</td>
</tr>
</tbody>
</table>

The number of graded "applied" musicianship will be increased.

No action plan required.
Plan for topic "Students completing the course will be able to demonstrate musicianship skills including sight singing, rhythm reading, aural recognition, dictation, and keyboard realization using diatonic materials." : 2019/20

Scores for this SLO are up from the last assessment. There is now a better balance between preparation for the musicianship final exam, written final exam, and the final composition project since they are now due evenly throughout the last three weeks of the semester instead of all in the last week. Throughout each semester, more time needs to be given to sight-reading musical examples, which will only further improve this learning outcome.

Plan for topic "Students completing this course will be able to compose music that employs a simple formal structure, the principles of diatonic harmony and four-part voice leading." : 2019/20

Scores for this SLO are slightly down from the last assessment. The final musicianship exam, final written exam, and final project are due equally distributed over the last three weeks of the semester instead of just the last so that students are not over-burdened at the very end of the semester. Students should have done better as a result. However, COVID-19 and the resulting switch to online learning halfway through this assessment period has had a negative impact on student morale and learning. Beginning Spring 2022, this class will return to primarily face-to-face learning in the classroom.

Plan for topic "Students completing this course will be able to, utilizing the principles four-part voice leading, harmonize melodies that indicate the use of diatonic triads and 7th chords." : 2019/20

Scores for this SLO are up slightly from the last assessment. The final musicianship exam, final written exam, and final project are due equally distributed over the last three weeks of the semester instead of just the last so that students are not over-burdened at the very end of the semester. Students might have done much better as a result, however, COVID-19 and the resulting switch to online learning halfway through this assessment period has had a negative impact on student morale and learning. Beginning Spring 2022, this class will return to primarily face-to-face learning in the classroom.

Plan for topic "Students completing the course will be able to demonstrate musicianship skills including sight singing, rhythm reading, aural recognition, dictation, and keyboard realization using diatonic materials." : 2016/17

Scores for this SLO are down from the last assessment. There needs to be a better balance between preparation for the written final exam and the final composition project. Students are not giving enough attention to preparing for their final musicianship exams. A better balance needs to be emphasized to all aspects of the finals.

Plan for topic "Students completing this course will be able to, utilizing the principles four-part voice leading, realize figured bass lines that indicate the use of diatonic triads and 7th chords." : 2016/17

Scores for this SLO are down from the last assessment. A final project is also assigned and due at the end of the semester. As a result, many students may be over burdened during the final weeks of the semester, when they would also be preparing for the final exams. I will adjust the schedule and method by which the final project is addressed so
that less will be asked of the students in the final weeks the semester.

Plan for topic "Students completing this course will be able to compose music that employs a simple formal structure, the principles of diatonic harmony and four-part voice leading.": 2016/17

The final composition project has always been a very popular and successful culminating activity. However, the project is assigned towards the end of the semester, along with studying for final exams. I will adjust the schedule and method by which the final project is addressed in order to ease the burden on students during the final weeks the semester.

Plan for topic "Students completing the course will be able to conduct harmonic analyses of diatonic music examples using triads and seventh chords.": 2013/14

Though harmonic analysis is an integral part in the study of music theory, in order to facilitate a more focused evaluation of the students' ability to conduct a harmonic analysis, I will consider adding a straight analysis problem on the final written examination. The analysis problem would be a harmonic analysis of an existing example from the literature with harmonies appropriate too this level of study. I will include more such analysis in class as well.

Plan for topic "Students completing the course will be able to demonstrate musicianship skills including sight singing, rhythm reading, aural recognition, dictation, and keyboard realization using diatonic materials.": 2013/14

This is a very difficult subject, for which there are expected standards at this level. This also a subject for which students come in with a great range of abilities. These abilities are a combination of inborn skill ("talent"), or acquired skill (musical experience). It is a challenge to address this full range of students. To better address each student's needs, I will be spending more time on this subject during class to insure each subject is broached on a DAILY basis. I will also consider establishing a strict schedule of assessments for the periodic musicianship milestone assignments, instead of leaving the assessments open ended. This will enforce attention to the assignments.

Plan for topic "Students completing the course will be able to utilize the principles of diatonic harmony and four-part voice leading using triads and seventh chords." 2011/12

None needed.

Plan for topic "Students completing the course will be able to utilize the principles of diatonic harmony and four-part voice leading using triads and seventh chords." 2010/11

Students who miss more than 2 weeks of class will be dropped.

Plan for topic "Students completing the course will be able to conduct harmonic analyses of diatonic music examples using triads and seventh chords." 2010/11

None needed.

Plan for topic "Students completing the course will be able to demonstrate musicianship skills including sight singing, rhythm reading, aural recognition, dictation, and keyboard realization using diatonic materials." 2010/11
| Increase amount of class time spent on musicianship skills. |

Plan for topic "Students completing the course will be able to perform an appropriate improvised solo over a jazz standard or blues composition.": 2018/19

The in-class live performances are very engaging for the students; they get to put their theory immediately into practice. Spontaneous improvisation in an incredibly challenging art form and many students simply cannot get it in one semester (or four!). Exposing them to the theoretical concepts and giving them ample time to attempt their own improvisations is the best way to encourage learning. The process is the thing.

Plan for topic "Students completing the course will be able to improvise in various jazz styles.": 2018/19

Continue to offer varied song forms and styles throughout the semester, such as swing, bossa nova, straight rock and funk. Integrating listening assignments into the curriculum would greatly improve students’ stylistic awareness.

Plan for topic "Students completing MUSIC-127 will be able to analyze chord progressions from a variety of jazz music." : 2018/19

Students who grasped the theory assignments throughout the semester did well on the final exam. Some students struggled throughout the semester. More practice both in-class and take assignments may better prepare them for the final exam.

Plan for topic "Students completing the course will be able to perform an appropriate improvised solo over a jazz standard or blues composition." : 2015/16

The students assessed were well prepared and clearly understood the final performance exam. Some complained about the amount of work involved, particular during finals week. Perhaps a slightly easier composition may alleviate some student stress.

Plan for topic "Students completing the course will be able to improvise in various jazz styles." : 2015/16

Students need more time listening to jazz masters performing in various jazz styles. Developing more listening assignments would help in this training.

Plan for topic "Students completing MUSIC-127 will be able to analyze chord progressions from a variety of jazz music." : 2015/16

We must continue drilling theoretical analyses throughout the semester, particularly when students are improvising over new jazz chord progression. Analysis and performance practice must be drilled together.

Plan for topic "Students completing the course will be able to perform an appropriate improvised solo over a jazz standard or blues composition." : 2012/13

None needed.

Plan for topic "Students completing the course will be able to improvise in various jazz styles." : 2012/13

None needed.

Plan for topic "Students completing MUSIC-127 will be able to analyze chord progressions from a variety of jazz music." : 2012/13

None needed.
Plan for topic "Students completing this course will be able to transcribe solo improvisations of iconic jazz artists."

Students who return for a second semester of Jazz Theory and Improvisation are typically music major who want to continue on to a Jazz Studies program at a four year institution. These students are typically motivated and inspired. Encouragement is often all they need to continue on their path of learning.

Plan for topic "Students completing this course will be able to demonstrate intermediate jazz theory as applied on their instruments."

One particular student struggled with their instrumental tone production. While executing the theoretical exercises clearly, the difficulty stemmed from instrumental technique. Private instrument lessons are strongly suggested and offered to all music majors. Students must practice both their instruments and the application of the theory assignments on said instruments. Perhaps integrating more technical exercises into the curriculum would help in this regard.

Plan for topic "Students completing this course will be able to improvise over jazz standards."

While continuous work toward this goal is required of any aspiring jazz musician, this culminating SLO really determines if a student is successful within the overarching goal of the course. Students that engage the weekly theory assignments, practice the instrumental application and play often with others in an improvisatory context do well in this area.

Plan for topic "Students completing this course will be able to transcribe solo improvisations of iconic jazz artists."

Getting the students engaged and prepared to play along with recordings is much easier than developing requisite notation skills. The music department should assess more carefully written notation pedagogy and how these skills are transmitted in basic theory and musicianship courses.

Plan for topic "Students completing this course will be able to demonstrate intermediate jazz theory as applied on their instruments."

The music department is working to expand and develop its percussion area. Qualified instructors and instrumental resources are available, but courses should be developed in percussion chamber music ensembles to give drummers more time at developing pitched percussion skills.

Plan for topic "Students completing this course will be able to improvise over jazz standards."

Allowing students as much time as possible to perform together is critical for individual and group success. Also, fewer songs per semester with more time allotted for each song would give the students the necessary time to understand and execute the stylistic nuances of more complex jazz standards.
### 1138. Counterpoint [MUSIC-129] belonging to Music [MUSIC]

**Plan for topic "Students completing this course will be able to compose species counterpoint, first through fifth, with or without a given cantus firmus."**: 2018/19

| Affirmation and reinforcement of the current curriculum. The students consistently excelled at the creation of musical compositions utilizing species counterpoint. |

| Plan for topic "Students completing this course will be able to demonstrate professionalism in writing for established deadlines."**: 2018/19 |

| Affirmation and reinforcement of the current curriculum. At the end of course students were able to demonstrate an understanding of the professional behaviors required to in the world of composition. |

| Plan for topic "Students completing this course will be able to engrave music using music notation software."**: 2018/19 |

| This assessment affirms the existing curriculum and validates our current instructional practices. |
1139. Jazz Workshop [MUSIC-130] belonging to Music [MUSIC]
Plan for topic "Students completing the course will be able to perform his/her part from Medium Swing, Latin, Fusion or other jazz charts with accurate intonation, rhythm and dynamic control.": 2016/17

This course is not scheduled in the current academic year. The music department will assess the course the next time it is offered.

Plan for topic "Students completing MUSIC-130 will be able to perform all twelve major and minor scales and triads on their instruments.": 2016/17

This course is not scheduled in the current academic year. The music department will assess the course the next time it is offered.

Plan for topic "Students completing the course will be able to organize an effective practice session.": 2016/17

This course is not scheduled in the current academic year. The music department will assess the course the next time it is offered.

Plan for topic "Students completing the course will be able to perform his/her part from Medium Swing, Latin, Fusion or other jazz charts with accurate intonation, rhythm and dynamic control.": 2013/14

Students should be auditioned at the beginning of each semester. Remedial students will benefit from specific assignments that target their individual instrumental and musical weaknesses.

Plan for topic "Students completing MUSIC-130 will be able to perform all twelve major and minor scales and triads on their instruments.": 2013/14

Instructor must devote a small portion of each ensemble rehearsal to developing core instrumental skills. Exercises and jazz etudes must be assigned and assessed weekly.

Plan for topic "Students completing the course will be able to organize an effective practice session.": 2013/14

Adding a graded element to the Practice Log submissions will be helpful. Continued dialogic methods and demonstrations by the instructor. Inviting more professional musicians to give workshops and clinics to the Music Department will inspire students and address organizing individual practice.
1140. Opera Theater [MUSIC-133] belonging to Music [MUSIC]

Plan for topic "Students completing MUSIC-133 will be able to Demonstrate the processes and techniques used to prepare and present a professional quality opera production or scenes." : 2017/18

- No action needed. Difficult to access due to small class enrollment.

Plan for topic "Students completing MUSIC-133 will be able to Utilize the basic vocabulary used for the study, preparation and production of a professional quality operatic performance." : 2017/18

- Criteria for success needs to be a greater %.

Plan for topic "Students completing MUSIC-133 will be able to Demonstrate a professional level of preparedness for each rehearsal and performance." : 2017/18

- The ability level of the four people completing the course were quite broad. Two were excellent, one was a beginner while the other struggled to learn notes and rhythms for the complicated music. An audition note needs to be added to the course outline, similar to the other musical ensembles. Some students need to complete MUS170 and 179 before enrolling in MUS133.

Plan for topic "Students completing MUSIC-133 will be able to Demonstrate the processes and techniques used to prepare and present a professional quality opera production or scenes." : 2014/15

- The variety of experience, talent and age in the class was very diverse. Better ways to include all levels but produce professional level performances will be challenging. The class will be divided into opera selection and scenes that are more based on talent and experience. The commitment level of each student was mixed.

Plan for topic "Students completing MUSIC-133 will be able to Utilize the basic vocabulary used for the study, preparation and production of a professional quality operatic performance." : 2014/15

- Similar to musical theater, the class probably needs more written tests/quizzes.

Plan for topic "Students completing MUSIC-133 will be able to Demonstrate a professional level of preparedness for each rehearsal and performance." : 2014/15

- This criteria has to be increased to at least 95%. Preparedness was quite poor from the students and attendance was sporadic. More detailed rehearsal schedules and expectations will be outlines for each student when the class is offered in the SPR16.
<table>
<thead>
<tr>
<th>Outcome Description</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students completing the course will be able to demonstrate the processes and techniques used to prepare and present a professional quality musical.</td>
<td>2017/18</td>
</tr>
<tr>
<td>This course will be assessed the next time it is offered.</td>
<td></td>
</tr>
<tr>
<td>Plan for topic &quot;Students completing MUSIC-134 will be able to demonstrate the processes and techniques used to prepare and present a professional quality musical.&quot;</td>
<td>2014/15</td>
</tr>
<tr>
<td>Achieving 100% of this goal is not unrealistic. Hopefully, class interest will continue to grow and the judging criteria can be raised. The course would like to add &quot;audition&quot; before the next assessment cycle.</td>
<td></td>
</tr>
<tr>
<td>Plan for topic &quot;Students completing MUSIC-134 will be able to sing the correct pitches as indicated by his/her choral/solo part with accurate intonation.&quot;</td>
<td>2014/15</td>
</tr>
<tr>
<td>Judging criteria needs to be addressed. Possibly more frequent quizzes, part checks throughout the semester. Part learning and memorization has to be completed earlier in the semester which would help this outcome better achieve this goal.</td>
<td></td>
</tr>
<tr>
<td>Plan for topic &quot;Students completing MUSIC-134 will be able to utilize the basic vocabulary of musical theater&quot;</td>
<td>2014/15</td>
</tr>
<tr>
<td>More attention needs to be given to this outcome. Since the course is taught by &quot;part-time&quot; faculty, better communication between lead faculty and part-time instructor is needed. Better assessment methods (written test/quiz) is probably needed.</td>
<td></td>
</tr>
<tr>
<td>Plan for topic</td>
<td>Outcome Assessment History</td>
</tr>
<tr>
<td>---------------</td>
<td>-----------------------------</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to sing in time with the rest of the choir and rhythm section.&quot;</td>
<td>2018/19</td>
</tr>
<tr>
<td>Similar to assessment #1. Those who did not complete SLO, did not achieve this goal.</td>
<td></td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to sing the correct pitches as indicated by his/her choral part with accurate intonation.&quot;</td>
<td>2018/19</td>
</tr>
<tr>
<td>This class has an audition to be allowed in the class. With the increase membership, there are more people participating who have a limited background and experience in choral singing. No changes needed.</td>
<td></td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to perform in all the rehearsals and performances of the semester as assigned.&quot;</td>
<td>2018/19</td>
</tr>
<tr>
<td>Criteria for this rubric should be higher. Tougher guidelines to the individuals who miss rehearsal or performances.</td>
<td></td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to sing in time with the rest of the choir and rhythm section.&quot;</td>
<td>2015/16</td>
</tr>
<tr>
<td>Since there is an audition to be in the class, most students can easily obtain this goal. This year, many beginners were excepted into the ensemble. For this reason, the level of some of the groups was not as high.</td>
<td></td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to sing the correct pitches as indicated by his/her choral part with accurate intonation.&quot;</td>
<td>2015/16</td>
</tr>
<tr>
<td>Since there is an audition to be in the class, criteria for judging the SLO needs to be much higher.</td>
<td></td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to perform in all the rehearsals and performances of the semester as assigned.&quot;</td>
<td>2015/16</td>
</tr>
<tr>
<td>Higher expectations of the students has been achieved in the ensemble. Peer pressure for excellence has increased. Addition of paid assistants for the class have helped maintain quality and retention. Those who drop or we lose happens very early in the semester.</td>
<td></td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to sing in time with the rest of the choir and rhythm section.&quot;</td>
<td>2011/12</td>
</tr>
<tr>
<td>Since there is an audition to be in the class, criteria for judging the SLO needs to be much higher.</td>
<td></td>

Course Action Plans  | Outcome Assessment History  | Page 1987 of 2394

Plan for topic "Students completing the course will be able to perform parts from jazz charts with section and ensemble intonation, rhythmic accuracy, blend, balance, style specific articulation, phrasing, and expression.": 2019/20

Having specific and special concert goals helps students engage, giving them an exciting challenge to work towards.

A concert program featuring a guest artist performing with the student bands is an excellent way to increase commitment to musical success and thus should be scheduled at least once each semester.

Plan for topic "Students completing the course will be able to provide effective ensemble accompaniment for a soloist during solo passages.": 2019/20

Listening to established masters perform and provide effective accompaniment is perhaps the most important educational approach to learning jazz music. While rehearsals are generally spent working on the concert repertoire, it is critical to take time each rehearsal to listen to examples of professional musicians perform recorded examples. This gives students a clear sonic goal to work towards.

Plan for topic "Students completing the course will be able to improvise an effective solo on a given set of chord changes.": 2019/20

It is necessary to include improvisation lessons in the ensemble rehearsal time, as well as introducing practice routines that will lead to enhanced success at improvisation. Students must also be encouraged to listen carefully to past masters so that they have clear models of effective musicians to emulate.

Plan for topic "Students completing the course will be able to perform parts from jazz charts with section and ensemble intonation, rhythmic accuracy, blend, balance, style specific articulation, phrasing, and expression.": 2016/17

Because many of the students returned in the SP17 semester, and the band grew in capabilities and commitment, the Music Department sponsored a trip to the Reno Jazz Festival in April, 2017. The four day, three night trip was a critical success; bonding the group both musically and personally. When we returned, the band camaraderie and musicality was significantly improved.

Jazz festival participation and band tours earlier in the semester (and academic year) will help build the program. A myriad of fall jazz festivals do exist and I plan on attending one each semester. Attending in the fall may also help recruit and retain students for the following spring semester.

Plan for topic "Students completing the course will be able to provide effective ensemble accompaniment for a soloist during solo passages.": 2019/20
The music department sponsored a number of guest artists and clinicians which came to perform for and work with the students on their specific musical selections. Having input from working professionals helps students tremendously in deciphering style-specific and appropriate accompaniments. Continued use of guest artists will encourage students' musical growth.

**Plan for topic "Students completing the course will be able to improvise an effective solo on a given set of chord changes."**: 2016/17

It is necessary to include improvisation lessons in the ensemble rehearsal time, as well as introducing practice routines that will lead to enhanced success at improvisation. Some students have previously enrolled in another course offered by the music department, Jazz Theory and Improvisation, and this helps tremendously. Students must also be encouraged to listen carefully to past masters so that they have clear models of effective musicians to emulate.

**Plan for topic "Students completing the course will be able to perform parts from jazz charts with section and ensemble intonation, rhythmic accuracy, blend, balance, style specific articulation, phrasing, and expression."**: 2013/14

Continue to improve the musical elements via earlier assessment, additional sectionals and a more rigorous audition process

**Plan for topic "Students completing the course will be able to provide effective ensemble accompaniment for a soloist during solo passages."**: 2013/14

Expand guest artist program, more rhythm sectionals, higher percentage of private instruction participation and additional lab hours

**Plan for topic "Students completing the course will be able to improvise an effective solo on a given set of chord changes."**: 2013/14

Include some improvisational coaching within ensemble rehearsals, encourage students to enroll in Jazz Theory and improvisation and encourage students to listen to jazz music more frequently

**Plan for topic "Students completing the course will be able to perform parts from jazz charts with section and ensemble intonation, rhythmic accuracy, blend, balance, style specific articulation, phrasing, and expression."**: 2010/11

continue to try to improve the music and the SLO percentages

**Plan for topic "Students completing the course will be able to provide effective ensemble accompaniment for a soloist during solo passages."**: 2010/11

continue to strive for improvement, especially in balancing the volume of the accompaniment with the solist, thus raising the percentages

**Plan for topic "Students completing the course will be able to improvise an effective solo on a given set of chord changes."**: 2010/11

continue to encourage all students to improve their improvisational abilities for better results
### 1144. Jazz Combos [MUSIC-137] belonging to Music [MUSIC]

#### Plan for topic "Students completing the course will be able to construct improvised solos in a small group context.": 2018/19

The class must remain an experiential endeavor for that is the best way to learn art; to do it. Students must be convinced to begin rehearsals on time to have as much time as possible to play together.

#### Plan for topic "Students completing the course will be able to demonstrate appropriate rehearsal techniques for small ensemble jazz.": 2018/19

Some students are natural leaders and more comfortable in this role. Others struggle to take charge and in some cases, do not have the musical knowledge and vocabulary to express their thoughts and opinions. Combining more experienced students with less skilled ones in the same band may help mentor the neophytes. Also, we do a group forum where everyone plays for each other in the same room and all students are expected to comment. Perhaps more of these early on in the semester would give confidence to new students to the music and class.

#### Plan for topic "Students completing MUSIC-137 will be able to perform in a variety of jazz styles.": 2018/19

Most students chose a concert program that showcases a wide variety of styles and thus they easily satisfy this SLO. Some student bands want to specialize according to their skill set and/or musical preferences, for instance funk or the music of Stevie Wonder. In these latter cases, professors must be more proactive in selecting and assigning material.

#### Plan for topic "Students completing the course will be able to construct improvised solos in a small group context.": 2015/16

All students are required to solo at each and every concert. Not all improvise on every song, but they must have at least one improvised solo in every performance. In art, we learn by doing.

#### Plan for topic "Students completing the course will be able to demonstrate appropriate rehearsal techniques for small ensemble jazz.": 2015/16

This is a difficult concept. Students are essentially learning to teach themselves and others; to be band leaders. Modeling correct rehearsal techniques at the beginning of the semester is critical. Having prior positive band experiences with excellent educators also offers successful models. Perhaps giving this as a tandem assignment, where two students work together, one more experienced and one new to bands and band leading may lead to improvement.

#### Plan for topic "Students completing MUSIC-137 will be able to perform in a variety of jazz styles.": 2015/16

At the beginning of each semester, all students are given three songs, each in a different style. After they learn these songs, student bands begin to choose their own material. Students tend to pick songs that they know and love. While this keeps them engaged in the class and the learning process, many of the songs are contemporary and similar. Assigned songs should be included in the final performances to ensure stylistic variety.

#### Plan for topic "Students completing the course will be able to construct improvised solos in a small group context.": 2012/13

None needed.

## DVC Instructional Course SLO Action Plans

### 1145. Wind Ensemble [MUSIC-140] belonging to Music [MUSIC]

**Plan for topic "Students completing the course will be able to differentiate between "in tune" and "out of tune" pitches (correct intonation) in a wind ensemble environment."**: 2018/19  
This course will be assessed the next time it is offered.

**Plan for topic "Students completing this course will be able to accurately perform individual rhythms in a wind ensemble environment."**: 2015/16  
This course is not scheduled to be taught in the current academic year. The music department will access the course the next time it is offered.

**Plan for topic "Students completing this course will be able to perform their parts with accurate intonation."**: 2015/16  
This course is not scheduled to be taught in the current academic year. The music department will access the course the next time it is offered.

**Plan for topic "Students completing this course will be able to demonstrate appropriate professional rehearsal and performance practices"**: 2015/16  
This course is not scheduled to be taught in the current academic year. The music department will access the course the next time it is offered.

**Plan for topic "Students completing the course will be able to differentiate between "in tune" and "out of tune" pitches (correct intonation) in a wind ensemble environment."**: 2012/13  
No action plan needed.
### 1146. Woodwind Ensemble [MUSIC-142] belonging to Music [MUSIC]

### 1147. Brass Ensemble [MUSIC-144] belonging to Music [MUSIC]

Plan for topic "Students completing the course will be able to differentiate between "in tune" and "out of tune" pitches (correct intonation) in a brass ensemble environment."**: 2018/19

This course will be assessed the next time it is offered.

Plan for topic "Students completing the course will be able to differentiate between "in tune" and "out of tune" pitches (correct intonation) in a brass ensemble environment."**: 2015/16

This course is not schedule to be taught in the current academic year. The music department will access the course the next time it is offered.

Plan for topic "Students completing the course will be able to appraise the quality of live brass ensemble performance."**: 2015/16

This course is not schedule to be taught in the current academic year. The music department will access the course the next time it is offered.

Plan for topic "Students completing the course will be able to perform rhythms in a brass ensemble environment."**: 2015/16

This course is not schedule to be taught in the current academic year. The music department will access the course the next time it is offered.

Plan for topic "Students completing the course will be able to differentiate between "in tune" and "out of tune" pitches (correct intonation) in a brass ensemble environment."**: 2012/13

No action plan required.

Plan for topic "Students completing the course will be able to classify assigned brass ensemble literature as being related to song or dance."**: 2012/13

No action plan required.

Plan for topic "Students completing the course will be able to appraise the quality of live brass ensemble performance."**: 2012/13

No action plan required.

Plan for topic "Students completing the course will be able to perform rhythms in a brass ensemble environment."**: 2012/13

No action plan required.
### Plan for topic "Students completing the course will be able to write and play major and minor pentascales in all keys." 2017/18

Because students have scored exceptionally well on the 14/15 assessment instructors added additional vocabulary terms and the expectations and standards of the rubric was raised from 70% to 80%. Although no further action plan is necessary at this time it is important to go over pentascales in class more frequently to prepare underachieving students for the quiz.

### Plan for topic "Students completing the course will be able to count aloud and play ten rhythm exercises." 2017/18

Assessment the playing of rhythm exercises in different rhythms was increased to fifteen since the 14/15 assessment and more individual attention was given to those students who are achieving less than 80% of the rubric. Even though the criteria for success was achieved it is important for those students who scored less than 80% to receive more tutoring during office hours.

### Plan for topic "Students completing the course will be able to recognize and define music vocabulary." 2017/18

Because students have scored exceptionally well in 14/15 instructors introduced additional vocabulary. Based on the record of 9 underachieving students instructors will spend more time using vocabulary in class before the quiz.

### Plan for topic "Students completing the course will be able to write and play major and minor pentascales in all keys." 2014/15

Because the number of students achieving the rubric is so high it is indicated that a wider variety of rhythms patterns be used for playing major and minor pentascales.

### Plan for topic "Students completing the course will be able to count aloud and play ten rhythm exercises." 2014/15

Most students indicate adequate success in achieving the rubric. For the next assessment the playing of rhythm exercises in different rhythms will be increased to fifteen and more individual attention given to those students who are achieving less than 80% of the rubric.

### Plan for topic "Students completing the course will be able to recognize and define music vocabulary." 2014/15

Because students have scored exceptionally well on this and the last assessment it important to introduce additional vocabulary and raise the expectations and standards of the rubric.

### Plan for topic "Students completing the course will be able to write and play major and minor pentascales in all keys." 2011/12

No plan necessary.

### Plan for topic "Students completing the course will be able to count aloud and play ten rhythm exercises." 2011/12

No plan necessary.

### Plan for topic "Students completing the course will be able to recognize and define music vocabulary." 2011/12

No plan necessary.

### Plan for topic "Students completing the course will be able to write and play major and minor pentascales in all keys." 2009/10

No plan necessary.

# DVC Instructional Course SLO Action Plans

**Plan for topic "Students completing the course will be able to count aloud and perform ten different rhythm exercises."**: 2016/17  
Current assessment method will continue being used. Additional rhythms using 16th notes will be incorporated.

**Plan for topic "Students completing this course will be able to harmonize melodies using primary and secondary triads, including transposition."**: 2016/17  
Instructors will continue using the current assessment methods.

**Plan for topic "Students completing this course will be able to play all Major, Minor, Augmented and diminished triads in root Position, 1st inversion and 2nd inversion."**: 2016/17  
Instructors will continue using the current assessment methods. Additional pieces of a slightly more difficult level need to be assigned.

**Plan for topic "Students completing the course will be able to demonstrate una corda and damper pedaling techniques."**: 2013/14  
Instructors will continue utilizing the current assessment.

**Plan for topic "Students completing the course will be able to recognize and define musical terms."**: 2013/14  
Instructors will continue utilizing the current assessment method.

**Plan for topic "Students completing the course will be able to count aloud and perform ten different rhythm exercises."**: 2013/14  
Instructors will continue utilizing the current assessment.

**Plan for topic "Students completing the course will be able to demonstrate una corda and damper pedaling techniques."**: 2011/12  
No plan necessary.

**Plan for topic "Students completing the course will be able to recognize and define musical terms."**: 2011/12  
No plan necessary.

**Plan for topic "Students completing the course will be able to count aloud and perform ten different rhythm exercises."**: 2011/12  
No plan necessary.

**Plan for topic "Students completing the course will be able to demonstrate una corda and damper pedaling techniques."**: 2009/10  
No plan necessary.

**Plan for topic "Students completing the course will be able to recognize and define musical terms."**: 2009/10  
No plan necessary.

**Plan for topic "Students completing the course will be able to count aloud and perform ten different rhythm exercises."**: 2009/10  
No plan necessary.

### Plan for topic "Students completing the course will be able to sing in time with the rest of the choir as directed by the conductor."

**2017/18**

Over the past two years, the choir has attempted less difficult music which makes this goal more obtainable by most people who complete the course. However, we are trying to give opportunities to "less experienced" singers in the auditioned ensemble. We have also created, "Buddy" programs to help less and more experienced singers as partners. The department also, has spend some money for a music subscription service which helps, less experienced singers learn their parts out side of the rehearsal. We have also raised the percentage for success in the SLO criteria.

### Plan for topic "Students completing the course will be able to sing the correct pitches as indicated by his/her choral part with accurate intonation.":

**2017/18**

Similar to outcome #1. In addition and with a little less difficult music, the course has has more time to basic voice training and vocal warmups to help with various intonation issues. (vowels, formants, expanding head voice ect.) Choir will select music similar to the 17-18 academic year to hopefully build upon it's intonation accomplishments.

### Plan for topic "Students completing the course will be able to adhere to professional level performance and rehearsal practices."

**2017/18**

This is a difficult one for our community college population. It is such a diverse ensemble. The expectations of the class have been outlined sooner and are more rigorous. The "Buddy" system has helped get students to class more often, on time, with their proper materials. they also learn proper rehearsal practices from each other. Those do not complete this goal most often do not return to the ensemble the next semester.

### Plan for topic "Students completing MUSIC-162 will be able to Sing in time with the rest of the choir as directed by the conductor.":

**2014/15**

Being a community college, much of the material is often very challenging for the more inexperienced singers in the choir. Still trying to give opportunities to "less experienced" singers in the auditioned ensemble. Trying to select a wider range and scope of music throughout the semester which appeals to a wide variety of people in the ensemble.

### Plan for topic "Students completing MUSIC-162 will be able to Sing the correct pitches as indicated by his/her choral part with accurate intonation."

**2014/15**

This outcome has been increasing over the past few semesters due to the stricter audition guidelines. Enrollment has also declined proportionally. The music department probably needs to reinstate 'lower level" choral ensemble to address students with less choral/vocal experience.

### Plan for topic "Students completing MUSIC-162 will be able to Perform in all the rehearsals and performances of the semester as assigned.":

**2014/15**

75% of the individuals in the choir, this is their only DVC course. For this reason, attendance in rehearsals and performances have become more sporadic. Stricter guidelines and expectations need to be developed for the students.
<table>
<thead>
<tr>
<th>Topic</th>
<th>Year 2011/12</th>
<th>Year 2009/10</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students completing the course will be able to sing in time with the rest of the choir as directed by the conductor.</td>
<td>Most students either reach 100% of the SLO, or fail to complete the course. Criteria for judging SLO should be increased to at least 90%.</td>
<td>As enrollment continues to grow, the measurement Criteria will remain the same but assessment methods should become more difficult.</td>
</tr>
<tr>
<td>Students completing the course will be able to sing the correct pitches as indicated by his/her choral part with accurate intonation.</td>
<td>More regularly scheduled testing required. Since the course meets once a week, many people missed part of the testing. More emphasis on grade without creating negative atmosphere around testing.</td>
<td>Individual changes within my grading rubric to create greater standards on pitch and intonation.</td>
</tr>
<tr>
<td>Students completing the course will be able to sing appropriately to the period of the composition.</td>
<td>Since there is a wide variety of ages and experiences in this course, the background knowledge to understand this SLO was difficult. More generic &quot;terms&quot; probably needed in testing students. Study sheet needs to be given at beginning of semester for all &quot;required&quot; terms.</td>
<td>Increased reinforcement of music history and style characteristics each class period. Encourage more listening to &quot;outstanding&quot; performances by in concert or on recordings.</td>
</tr>
<tr>
<td>Students completing the course will be able to adhere to professional level performance and rehearsal practices.</td>
<td>Greater expectations need to be given to students about professional behavior. The amount of absences and tardies has increased. More team building.</td>
<td>Greater emphasize on professional attitude and teamwork within classroom setting.</td>
</tr>
</tbody>
</table>
### 1152. Chamber Singers [MUSIC-166] belonging to Music [MUSIC]

**Plan for topic "Students completing the course will be able to gain an historical perspective of the choral/vocal literature."**: 2017/18

More time needs to be spent on the social, historical aspect of the selection. This is often neglected due to the amount of notes/rhythms/foreign languages that must be covered in the class. More attention is often given to those choral works who are composed by underrepresented populations. There is a more of an attempt to select music of these populations. Also, there is not a formal way to evaluate the students knowledge of the music covered in the course. A fun game or quiz might also help to evaluate this SLO.

**Plan for topic "Students completing MUSIC-166 will be able to Develop sight-singing, ear training, music reading skills for the rehearsal and performance of chamber choral literature."**: 2017/18

Great attention was spent on this SLO over this academic year. The increase was excellent. The increase in ability and confidence to sight sing can also be seen for those individuals who participate in the course for many consecutive semesters. More emphasis on sight singing at the beginning of class as well as when learning literature for performance. More "friendly" competitions between sections/small groups has also helped make this SLO more fun within daily activities of the class.

**Plan for topic "Students completing MUSIC-166 will be able to Demonstrate appropriate interpersonal skills with all members of the ensemble."**: 2017/18

The use of student leadership has greatly improved over the past 3-4 years including the 17-18 academic year. However, there are a few individuals in leadership roles who were a negative influence within their section and the entire course. The leader choices by the instructor should be based on personal qualities over musical abilities. No specific action needed.

**Plan for topic "Students completing MUSIC-166 will be able to Develop sight-singing, ear training, music reading skills for the rehearsal and performance of chamber choral literature."**: 2014/15

Great attention was spent on this SLO for the Fall 14 semester. The increase was remarkable, however SLO #2 and 3 seemed to suffer a little during this semester due to the amount of class time spent on this outcome. I feel more emphasis on #2 and #3 is more important to this course DVC and retainment of singers.

**Plan for topic "Students completing MUSIC-166 will be able to Exhibit appropriate vocal control, blend and balance, intonation with the ensemble."**: 2014/15

The musical aspect of the ensemble has continued to steadily improve over the past few semesters. No further actions needed.

**Plan for topic "Students completing MUSIC-166 will be able to Demonstrate appropriate interpersonal skills with all members of the ensemble."**: 2014/15

Student leadership has continued to improve with section leaders taking attendance and implementing singing exams. Students seem more responsive to being tested by their piers instead of instructor. Although these quizzes are not graded, the preparedness of the students has vastly improved and retention has seemed to increase over the past 6 semesters.

Plan for topic "Students completing the course will be able to perform rhythms in a percussion ensemble environment."

It is vital to the quality of music making by any ensemble that all its members are able to accurately read and perform indicated rhythms. As a plan of action, students in need of help will receive focused coaching by the instructor and/or more advanced students. Effective reading and practice methods, along with working with a metronome will be emphasized. The instructor will consult with the Department and local ensemble directors regarding their experience with this issue.

Plan for topic "Students completing this course will be able to collaborate with ensemble members and a conductor to create accurate, appropriate, and expressive performances."

It is vital to the quality of music making by any ensemble that all its members are able to collaborate and thus integrate as an ensemble. As a plan of action, students in need of help will receive focused coaching by the instructor and/or more advanced students. Aural awareness of the rest of the ensemble and reading the conductor's gestures will be emphasized. The instructor will consult with the Department and local ensemble directors regarding their experience with this issue.

Plan for topic "Students completing this course will be able to demonstrate appropriate professional rehearsal and performance practices."

Professional conduct by all members of an ensemble is paramount to an effective rehearsal and an excellent performance. As a plan of action, the instructor will address any problem students individually as to the importance of professional conduct. All the students will be taught to expect professional conduct from their fellow musicians in any ensemble. The instructor will consult with the Department and local ensemble directors regarding their experience with this issue.

Plan for topic "Students completing the course will be able to perform rhythms in a percussion ensemble environment."

Some of the student not meeting the standard need to work on reading skills and/or technique. Individual plans for remediation will be devised.

Plan for topic "Students completing this course will be able to collaborate with ensemble members and a conductor to create accurate, appropriate, and expressive performances."

Some students simply need more experience and this will improve over time.

Plan for topic "Students completing this course will be able to demonstrate appropriate professional rehearsal and performance practices."

It's a good group of students with excellent esprit de corps. The "outliers" will come along just fine.

Plan for topic "Students completing the course will be able to differentiate between "in tune" and "out of tune" pitches (correct intonation) in a percussion ensemble environment."

No action plan required.

Plan for topic "Students completing the course will be able to classify assigned percussion ensemble literature as being related to song or dance."

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to apply general concepts of vocal production.": 2019/20

This SLO is the main objective for most people taking this course. They are motivated to reach this outcome. No action needed.

Plan for topic "Students completing the course will be able to utilize a basic vocabulary for the discussion of proper tone production, breath control, vocal placement, and song interpretation.": 2019/20

Student have trouble identifying vocabulary to discuss this SLO. The past two semesters, due to Covid, instructors have students write more written critiques of singers. Instructors say this has better help achieve this outcome. Action would be to maintain Canvas critiques when classes resume face-to-face.

Plan for topic "Students completing the course will be able to critically evaluate vocal performances in terms of proper tone production, breath control, vocal placement, and song interpretation.": 2019/20

Although the course is an introduction, there is a wide ability and experience gap in each the sections of this course. Many students will not be able to achieve this outcome during one semester if ever. This outcome should improve with the MUS179, intermediate applied voice class. Criteria for this outcome should be reduced from 80 to 70% for this SLO.

Plan for topic "Students completing the course will be able to apply general concepts of vocal production.": 2016/17

The faculty this is a fairly good outcome for this objective. Many students who might not understand the material who are not invested in the class, seem to drop before the final. Possibly more rigorous objectives could be expected.

Plan for topic "Students completing the course will be able to utilize a basic vocabulary for the discussion of proper tone production, breath control, vocal placement, and song interpretation.": 2016/17

The students were much better at SLO #1 than SLO #2. Faculty have decided to try and use more systematic vocabulary with each of the classes which is repeated throughout the semester and various levels of the class. Assessments for written quizzes were better than oral examples.

Plan for topic "Students completing the course will be able to critically evaluate vocal performances in terms of proper tone production, breath control, vocal placement, and song interpretation.": 2016/17

This was the SLO with the largest discrepancies between sections. Some instructors spend much more time on student feedback while others provided much of the feedback for the course. These sections are often cross listed with intermediate applied voice. The ones with a strong representatives of MUS179, often stimulates more student feedback throughout the course. No action needed.

Plan for topic "Students completing the course will be able to apply general concepts of vocal production.": 2013/14
A standardized test for SLO Topic #1 should be developed across the various sections of the course. Teacher vary greatly on emphasis of material and approach to the course. Generally the ones who do NOT complete this SLO topic, do not complete the course.

Plan for topic "Students completing the course will be able to utilize a basic vocabulary for the discussion of proper tone production, breath control, vocal placement, and song interpretation." 2013/14

Teachers have been trying to use a more "uniform" vocabulary in classes. This seems to help with those who continue with one of the other teachers. However, each faculty continues to emphasize those terms and interpretation which is best for their personal teaching style.

Plan for topic "Students completing the course will be able to critically evaluate vocal performances in terms of proper tone production, breath control, vocal placement, and song interpretation." 2013/14

Goal will be changed for next SLO assessment. Although this is a goal for all teachers, the assessment method for each section has been very poor. The 85% figure represents only data from 2 of the 7 sections for the academic year.

Plan for topic "Students completing the course will be able to critically evaluate vocal performances in terms of proper tone production, breath control, vocal placement, and song interpretation." 2011/12

Plan for topic "Students completing the course will be able to apply general concepts of vocal production." 2011/12

With the wide variety of abilities and experiences of the students before they enroll in the course, percentages vary greatly from semester/semester and instructor to instructor. I still believe the goals for SLO’s are good.

Plan for topic "Students completing the course will be able to critically evaluate vocal performances in terms of proper tone production, breath control, vocal placement, and song interpretation." 2010/11

Plan for topic "Students completing the course will be able to critically evaluate vocal performances in terms of proper tone production, breath control, vocal placement, and song interpretation." 2010/11

Plan for topic "Students completing the course will be able to apply general concepts of vocal production." 2010/11

Plan for topic "Students completing the course will be able to utilize a basic vocabulary for the discussion of proper tone production, breath control, vocal placement, and song interpretation." 2010/11

Plan for topic "Students completing the course will be able to critically evaluate vocal performances in terms of proper tone production, breath control, vocal placement, and song interpretation." 2010/11
Plan for topic "Students completing the course will be able to apply a knowledge and understanding of jazz and popular vocal styles."

2019/20

Since the class was not offered SU19, the number of students in this course is quite low. Those who take MUS171, have usually completed MUS170, often with the same instructor. Therefore, unlike MUS170, individuals understand expectations of the course before registering. No action needed.

Plan for topic "Students completing the course will be able to critically evaluate proper tone production, breath control, vocal placement, and song interpretation": 2019/20

Faculty have utilized more common vocabulary with each of the classes MUS107, 171, 179 which helps to assess the students progress. Students are often better at orally than written communicating concepts. Assessed through written exams, concert reports and in class performance reviews.

Plan for topic "Students completing the course will be able to describe a the form and structure of songs."

2019/20

This SLO is not a high priority for the instructors and does not get the same attention as the first two SLO outcomes. Form and song structure should be tested orally/written as SLO 1 an 2.

Plan for topic "Students completing the course will be able to apply a knowledge and understanding of jazz and popular vocal styles."

2016/17

The faculty this is a fairly good outcome for this objective. Many students who might not understand the material who are not invested in the class, seem to drop before the final. Possibly more rigorous objectives could be expected. This is the same SLO as MUS170.

Plan for topic "Students completing the course will be able to critically evaluate proper tone production, breath control, vocal placement, and song interpretation": 2016/17

The students were much better at SLO #1 than SLO #2. Faculty have decided to try and use more systematic vocabulary with each of the classes which is repeated throughout the semester and various levels of the class. Assessments for written quizzes were better than oral examples. Since students are more familiar popular vocal tone, this outcome is a little greater than MUS170.

Plan for topic "Students completing the course will be able to describe a the form and structure of songs."

2016/17

Some of the sections did not assess this SLO well. Although it was discussed, no written examination was given. In the future, assess SLO #4.

Plan for topic "Students completing the course will be able to apply a knowledge and understanding of jazz and popular vocal styles."

2013/14

Since this course is similar to MUS170, 179, the criteria should be the same for this course. Only the literature study be students in this course in different. Student achieve this goal consistently well. Maybe additional material, examples and could be introduced.

Plan for topic "Students completing the course will be able to critically evaluate proper tone production, breath control, vocal..."
DVC Instructional Course SLO Action Plans

**placement, and song interpretation**: 2013/14

The method needs to be "Verbal evaluation" instead of "Written evaluation." Students achieve this goal very well. However, with the decrease of 7 sections per year, the classes have increased in population which makes assessment more difficult. There is not enough time in the class, to hear everyone's evaluation weekly. Goal is great, assessment method needs work.

**Plan for topic "Students completing the course will be able to describe the form and structure of songs."**: 2013/14

Either SLO needs to be addressed by all teachers or removed from the evaluation process. Since most people focus on "popular" voice and NOT jazz, the idea of form and structure of the song has less importance. 2 of the 3 teachers of this course do not systematically address this SLO. For that reason, the analysis numbers are very low.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to play in time with rest of the ensemble.": 2019/20

This cohort was more highly skilled than usual. Individual attention was rarely needed. Traditional rehearsal techniques and procedures includes evaluation of student performance and addressing student learning. The students responded well to rehearsal. As a result, more challenging literature was studied. A more formalized method of evaluation did not seem necessary but will be reserved for other cohorts who may not be so skilled and may benefit from it. Literature appropriate to cohort skill level will be always be chosen.

Plan for topic "Students completing MUSIC-176 will be able to Perform his/her part with accurate intonation.": 2019/20

This cohort was more highly skilled than usual. Individual attention was rarely needed. Traditional rehearsal techniques and procedures includes evaluation of student performance and addressing student learning. The students responded well to rehearsal. As a result, more challenging literature was studied. A more formalized method of evaluation did not seem necessary but will be reserved for other cohorts who may not be so skilled and may benefit from it. Literature appropriate to cohort skill level will be always be chosen.

Plan for topic "Students completing this course will be able to play appropriately to the period of the composition." : 2019/20

This cohort was more highly skilled than usual. Aspects of period appropriate performance were easily learned and demonstrated by the students without extensive coaching during rehearsal. Extensive coaching will be reserved for other cohorts who may not be so skilled and would benefit from it.

Plan for topic "Students completing MUSIC-176 will be able to Perform his/her part with accurate intonation.": 2016/17

Intonation is commonly an issue with this level of student musician. More individual assistance will be offered to students in need of help during the first hour of class. A more formalized method of evaluation will be devised and implemented.

Plan for topic "Students completing this course will be able to play in time with rest of the ensemble." : 2013/14

Do action needed.
<table>
<thead>
<tr>
<th>No action needed.</th>

</table>
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to apply intermediate concepts of vocal production." : 2017/18

Action is not much different than last plan in 14/15. Since this is a continuation of MUS170, Beginning Applied Voice, the individuals who continue in the sequence have a good understanding of vocal concepts. No further action needed.

Plan for topic "Students completing this course will be able to utilize an intermediate vocabulary for the discussion of proper tone production, breath control, vocal placement, and song interpretation." : 2017/18

Maybe increase the amount of vocabulary for each course. There is a wide variance in vocabulary used by each individual teacher. No action needed.

Plan for topic "Students completing this course will be able to critically evaluate vocal performances in terms of proper tone production, breath control, vocal placement, and song interpretation." : 2017/18

This past cycle, Pricco and Emigh's classes focused heavily on these issues. In the one week summer class by Peppo, the focus was mainly on song interpretation. Terms in this SLO (tone production, breath control, vocal placement, and song interpretation), could be broken down into multiple SLOs.

Plan for topic "Students completing this course will be able to apply intermediate concepts of vocal production." : 2014/15

Most of the students easily reach this goals. Those who did not reach the goals for MUS170 course seem to have difficulty when taking the next level. For a more accurate assessment, each level of voice should be able to be taken more than one time. Rubrics and assessments need to be rethought due to repeatability and families. The families have created a wider range of abilities in each class. Students used to take course multiple times until they achieved desired outcomes.

Plan for topic "Students completing this course will be able to utilize an intermediate vocabulary for the discussion of proper tone production, breath control, vocal placement, and song interpretation." : 2014/15

Vocabulary is easier than production for each student. Those who did not achieve this level should have remaining in the MUS170 course. Various instructors have different terms. Students who take one teacher for MUS170 and then switch to another instructor often have a disadvantage with this outcome.

Plan for topic "Students completing this course will be able to critically evaluate vocal performances in terms of proper tone production, breath control, vocal placement, and song interpretation." : 2014/15

This outcome is the same as the MUS170 course. Although it is an important emphasis in some instructors classes, other do not test for it. Faculty are trying to develop, written peer critiques for all students in all sections of MUS170, 171 and 179.
Plan for topic "Students completing the course will be able to sing his/her part with accurate intonation, rhythm, dynamics, phrasing and tone-color": 2017/18

Most people taking this course are "life long learners" with a great deal of experience singing choral music. This is the reason for the high success rate for each student. This SLO should be divided into two. Many individuals accomplish their part with proper intonation and rhythm, but their phrasing and tone color is not appropriate.

Plan for topic "Students completing the course will be able to sing his/her part with respect to his/her section and the ensemble": 2017/18

This was a great year with many great students who worked well with others in their sections. This often changes and is largely based on the individual personalities within the ensemble that semester. The change of choral formations, and increased social importance within the ensemble, has great helped this outcome. However, the result is an estimate and the difficult to quantify.

Plan for topic "Students completing the course will be able to contribute as an effective member to the organizational operation of a community chorus": 2017/18

There was great contribution of these members in the leadership of the chorus. Most people are willing to bring snacks, help pass out music, collect music, run sections, donate scholarships, set-up/tear down room or performance hall, etc. This seems for the students to take more ownership in the ensemble and build a better community feeling. I should track of individuals and their contributions each semester.

Plan for topic "Students completing MUSIC-180 will be able to Sing his/her part with accurate intonation, rhythm, dynamics, phrasing and tone-color according to the written music and the direction of the conductor.": 2014/15

No action needed. Most of these students are "life long learners" who have had a great deal of experience singing in choral ensembles.

Plan for topic "Students completing MUSIC-180 will be able to Sing his/her part with respect to his/her section and the ensemble.": 2014/15

No action needed. Most of these students are "life long learners" who have had a great deal of experience singing in choral ensembles.

Plan for topic "Students completing MUSIC-180 will be able to Contribute as an effective leader to the organizational operation of a community chorus.": 2014/15

Similar to MUS162, I will create section leaders and regular singing exams/sectionals led by the students in the ensemble. I will also give some of the "life long learning" students, a more active role in music selection, recruiting, programs, posters and the basic operation of the choral ensemble.

Plan for topic "Students completing the course will be able to sing his/her part with accurate intonation, rhythm, dynamics, phrasing and tone-color": 2013/14

Since the sample size is so small, most students either reach 100% of the SLO, or fail to complete the course. Criteria for judging SLO was increased but still difficult to assess.
due to the size and nature of the class. Most people taking this course are "life long learners" with a great deal of experience singing choral music. This is the reason for the high success rate for each student.

Plan for topic "Students completing the course will be able to sings his/her part with respect to his/her section and the ensemble":
2013/14

Criteria for judging SLO was also increased. Although 100% achieved SLO #1, one person did not sing the concert/final performance so could not successfully reach SLO #2. Grade was negatively affected.

Plan for topic "Students completing the course will be able to contribute as an effective member to the organizational operation of a community chorus": 2013/14

Class is very diverse (age), creating a strong "committee" in the class/vocal section is difficult. Team building exercises are being introduced to address this issue and help with retention and recruiting for the class. Like in other SLO outcomes, those can not complete the desired outcome, often drop the course.

Plan for topic "Students completing the course will be able to sing his/her part with accurate intonation, rhythm, dynamics, phrasing and tone-color": 2012/13

Since the sample size is so small, most students either reach 100% of the SLO, or fail to complete the course. Criteria for judging SLO should be increased to at least 90%.

Plan for topic "Students completing the course will be able to sings his/her part with respect to his/her section and the ensemble": 2012/13

Since the sample size is so small, most students either reach 100% of the SLO, or fail to complete the course. Criteria for judging SLO should be increased to at least 90%.

Plan for topic "Students completing the course will be able to contribute as an effective member to the organizational operation of a community chorus": 2012/13

Since the makeup of the class is so diverse, there are often many personality conflicts within the section or ensemble. Result seems to be more a reflection of student personality than instruction.
DVC Instructional Course SLO Action Plans

1159. Topics in Music [MUSIC-190] belonging to Music [MUSIC]
Plan for topic "Students completing 190MU will be able to employ rhythm, melody, harmony, and simple formal structures to develop a composition from concept to finished product.": 2016/17
This assessment affirms the existing curriculum and validates our current instructional practices.

Plan for topic "Students completing 190MU will be able to create a portfolio of original compositions for various ensembles/media and present them publicly.": 2016/17
This assessment affirms the existing curriculum and validates our current instructional practices.

Plan for topic "Students completing 190MU will be able to engrave music using music notation software.": 2016/17
This assessment affirms the existing curriculum and validates our current instructional practices.

Plan for topic "Students completing this course will be able to demonstrate increased clarity of expression on the written page."

Affirmation and reinforcement of the current curriculum.

Plan for topic "Students completing this course will be able to employ rhythm, melody, harmony, and advanced structures to develop a composition from concept to finished product."

This assessment affirms the existing curriculum and validates our current instructional practices.

Plan for topic "Students completing this course will be able to demonstrate professionalism in writing for established deadlines."

Affirmation and reinforcement of the current curriculum. At the end of course students were able to demonstrate an understanding of the professional behaviors required to in the world of composition.
Plan for topic "Students completing this course will be able to take rhythmic dictation, harmonic dictation that employs tonicization, and 3-part melodic dictation that employ a diatonic modulation.": 2018/19

Proficiency in singing melodies (in functional solfege) and rhythms and keyboard performance of chord progressions compliments taking dictation of the same. As a plan of action, more time will be spent vocalizing appropriately leveled rhythms and chromatic melodies, and playing chord progressions that change key. Dictation will then be given of the same material. This issue and plan of action will be discussed at the next Music Association of California Community Colleges conference at a focused panel discussion. The instructor will share findings with Department.

Plan for topic "Students completing this course will be able to utilize applied V7 (and inversions) and applied viio7 (and inversions) to complete a chord progression that tonicizes a series of diatonic harmonies. A standard rubric was used to evaluate student answers.": 2018/19

Meticulous attention to detail is required in order to form properly functioning tonicizations and modulations. As a plan of action, more time will be spent reviewing and carefully calculating applied V7 and viio7 and their proper resolutions. This issue and plan of action will be discussed at the next Music Association of California Community Colleges conference at a focused panel discussion. The instructor will share findings with Department.

Plan for topic "Students completing this course will be able to sing a given melody while playing a chord progression at the piano which together, using applied V7 (and inversions)) tonicize a series of diatonic harmonies.": 2018/19

Singing a chromatic melody while accompanying one's self at the keyboard is one of the most effective means of learning a harmonic concept. As a plan of action, proven practice strategies for these exercises will be explained and repeatedly demonstrated with each new exercise in order to encourage effective and adequate practice. This issue and plan of action will be discussed at the next Music Association of California Community Colleges conference at a focused panel discussion. The instructor will share findings with Department.

Plan for topic "Students completing this course will be able to realize figured bass lines that indicate the use of 5/3, 6/3, 6/4 techniques, sequences, melodic and rhythmic figuration, leading-tone 7th chords, mixture, diatonic applied dominants, and diatonic modulation.": 2015/16

The method of explanation of a concept (lecture), followed by the immediate application of the concept in a collaborative learning environment has proven successful for most students. A number of students however, do not benefit as much as others due to their lack of participation. Such participation needs to be better enforced via the firmer establishment of a culture of "taking turns at the white board."

Plan for topic "Students completing this course will be able to harmonize melodies utilizing 5/3, 6/3, 6/4 techniques, sequences, melodic and rhythmic figuration, leading-tone 7th chords, mixture, diatonic applied dominants, and diatonic modulation.": 2015/16

The method of explanation of a concept (lecture), followed by the immediate application of the concept in a collaborative learning environment has proven successful for most...
A number of students however, do not benefit as much as others due to their lack of participation. Such participation needs to be better enforced via the firmer establishment of a culture of "taking turns at the white board."

Plan for topic "Students completing this course will be able to compose music that employs larger musical forms such as sonata allegro form /3, 6/3, 6/4 techniques, sequences, melodic and rhythmic figuration, leading-tone 7th chords, mixture, diatonic applied dominants, and diatonic modulation. [ NA ] never": 2015/16

This final composition project is a culminating exercise. It applies all the concepts the students have learned throughout the semester. Due to its complexity, there is a need for even clearer and concise directions for the project.

Plan for topic "Students completing the course will be able to demonstrate musicianship skills including sight singing, rhythm reading, aural recognition, dictation, and keyboard realization using materials that include simple modulations and basic chromatic material.": 2012/13

None needed.

Plan for topic "Students completing the course will be able to utilize the principles of diatonic sequences, modulation, and basic chromatic harmony.": 2011/12

None needed.

Plan for topic "Students completing the course will be able to conduct harmonic analyses of musical examples with modulation and limited chromaticism.": 2011/12

None needed.
Plan for topic "Students completing the course will be able to utilize the principles of advanced chromatic harmony and the various 20th Century harmonic practices": 2017/18

This assessment shows a marked improvement over the last assessment. I decided that an increased amount of slower paced in-depth discussion of concepts being studied would be more effective for increasing student learning than merely recording daily homework as being done. This strategy has proved successful. To build upon this success and to demonstrate relevance of the concepts being studied, I plan to increase the amount of harmonic analysis of applicable examples from the literature.

Plan for topic "Students completing the course will be able to demonstrate musicianship skills including sight singing, rhythm reading, aural recognition, dictation, and keyboard realization using highly chromatic and 20th Century material.": 2017/18

For this year, new examination materials were used. I found some of them to be too difficult. Beginning Sp19, I will return to the original examination materials in order to achieve a fairer, more accurate assessment of musicianship skills. A number of students simply did not prepare for the exam. I will also release exam materials 2 weeks instead of just 1 week before the exam to encourage better preparation.

Plan for topic "Students completing this course will be able to compose music that exercises the principles of chromatic harmony and the various 20th Century harmonic practices, and employs larger musical structures such as theme and variation.,": 2017/18

This is the first time this assessment topic has been used. The final composition project is an extensive, demanding, semester long project, for which students are required to receive much supervision from the instructor. It facilitates individual assessment of and attention to the application of concepts learned. In future semesters, instead of just one final grade for the project, I plan to grade individual sections of the project at incremental due dates throughout the semester in order to encourage a more even, balanced workflow.

Plan for topic "Students completing the course will be able to utilize the principles of advanced chromatic harmony and the various 20th Century harmonic practices": 2014/15

The result for this assessment meets the criteria for success, but is lower than the last assessment (Spring 2012). Bi-weekly take-home quizzes which address this SLO have always been collected and graded. However, daily written homework which addresses this SLO is not collected nor recorded as being done. Instead, homework solutions are discussed extensively during class. Daily homework will now be collected and recorded as being done for credit to encourage more students to actually do the homework. Extensive discussion of homework solutions will continue.

Plan for topic "Students completing the course will be able to conduct harmonic analyses of highly chromatic and 20th Century musical examples.": 2014/15

The result for this assessment meets the criteria for success, but is lower than the last assessment (Spring 2012). Bi-weekly take-home quizzes which address this SLO have always been collected and graded. However, daily written homework which addresses this SLO is not collected nor recorded as being done. Instead, homework solutions are
discussed extensively during class. Daily homework will now be collected and recorded as being done for credit to encourage more students to actually do the homework. Extensive discussion of homework solutions will continue.

Plan for topic "Students completing the course will be able to demonstrate musicianship skills including sight singing, rhythm reading, aural recognition, dictation, and keyboard realization using highly chromatic and 20th Century material.": 2014/15

The result for this assessment meets the criteria for success, and is much higher than the last assessment (Spring 2012). Since the last assessment, I have given more attention to the musicianship aspects of the class, which has apparently paid off. I will continue the current level of attention, and hone the selection of exercises to create a most effective musicianship curriculum.

Plan for topic "Students completing the course will be able to utilize the principles of advanced chromatic harmony and the various 20th Century harmonic practices": 2011/12

None needed.

Plan for topic "Students completing the course will be able to conduct harmonic analyses of highly chromatic and 20th Century musical examples.": 2011/12

None needed.

Plan for topic "Students completing the course will be able to demonstrate musicianship skills including sight singing, rhythm reading, aural recognition, dictation, and keyboard realization using highly chromatic and 20th Century material.": 2011/12

None needed.
1165. Night Jazz Band [MUSIC-236] belonging to Music [MUSIC]

Plan for topic "Students completing the course will be able to improvise an effective solo in an appropriate style."": 2017/18

This course will be assessed the next time it is offered.

Plan for topic "Students completing the course will be able to improvise an effective solo in an appropriate style."": 2014/15

Continued encouragement for improvisational improvement via active listening to jazz masters on recordings and at live concerts.

Encourage students to enroll in Jazz Theory and Improvisation courses

Guest artists that give in-class demonstrations and perform with the students are very inspiring.

Plan for topic "Students completing the course will be able to perform part from Hip-Hop, odd-meter, Fast Swing or other Big Band jazz charts with professional level musicianship."": 2014/15

Expecting professional level musicianship from a community college jazz ensemble is a fallacy, and thus the course description and SLOs have been modified in the most recent Course Revision for this class. Choosing slightly easier music will lead to better musical results. There is a problem with recruitment, especially in the areas of brass players right now. This may stem from MDUSD's deletion of beginner band programs, which has led to a significant drop in number and quality of student instrumentalists in our immediate service area. Additional recruiting efforts are needed.

Plan for topic "Students completing the course will be able to sight read at an advanced level appropriate for performing professional big band music."": 2014/15

Professional level expectations are inappropriate. High school and/or collegiate level music is better suited for this ensemble. There are a number of local jazz educators that could be brought in for sight reading clinics and this will be scheduled for the SP16 semester. Continued sight reading is crucial for success in this area as it is a skill that can and should be developed.

Plan for topic "Students completing the course will be able to improvise an effective solo in an appropriate style."": 2010/11

continued encouragement for striving for improvisational improvement

Plan for topic "Students completing the course will be able to perform part from Hip-Hop, odd-meter, Fast Swing or other Big Band jazz charts with professional level musicianship."": 2010/11

continued emphasis on a variety of jazz styles for increased ability to play them professionally

Plan for topic "Students completing the course will be able to sight read at an advanced level appropriate for performing professional big band music."": 2010/11

continue emphasis on sight reading for continued improvement
### 1166. Symphonic Band [MUSIC-240] belonging to Music [MUSIC]

#### Plan for topic "Students completing the course will be able to play in time with their section and the symphonic band as directed by the conductor": 2018/19

It is vital to the quality of music making by any ensemble that all its members are able to play in time. As a plan of action, students will be asked to practice well with a metronome, specific sections of the music that are to be rehearsed at a given rehearsal, to rehearse as an ensemble with a self-provided beat (i.e., without a conductor), and to rehearse passages of the music as an ensemble at a variety of tempi. The instructor will consult with the Department and local ensemble directors regarding their experience with this issue.

#### Plan for topic "Students completing this course will be able to play correct pitches as indicated with accurate intonation.": 2018/19

It is vital to the quality of music making by any ensemble that all its members are able to play the correct pitches, and in tune. As a plan of action, instructors will place a greater emphasis upon harmonic awareness and spend more time tuning passages. Fast, chromatic passages will be practiced very slowly so that students have a chance to find their pitches and realize how they fit into the harmony. The instructor will consult with the Department and local ensemble directors regarding their experience with this issue.

#### Plan for topic "Students completing this course will be able to adhere to professional level symphonic band performance and rehearsal standards of conduct.": 2018/19

Professional conduct by all members of an ensemble is paramount to an effective rehearsal and an excellent performance. As a plan of action, the instructor will address any problem students individually as to the importance of professional conduct. All the students will be taught to expect professional conduct from their fellow musicians in any ensemble. The instructor will consult with the Department and local ensemble directors regarding their experience with this issue.

#### Plan for topic "Students completing the course will be able to play in time with their section and the symphonic band as directed by the conductor": 2015/16

Not all students were able to play with 100% rhythmic accuracy in more complex rhythmic structures. In simpler rhythmic situations, nearly 100% of students were able to play in time. By assigning enough complex music to challenge the skills of the weaker players without overwhelming them, their deficiencies can be improved over time.

#### Plan for topic "Students completing this course will be able to play correct pitches as indicated with accurate intonation.": 2015/16

For developing students, accurate intonation is still evolving. As they mature, these skills should improve on an individual basis; as a group, the ability to play in tune also varies with the skill level of new players, who must then be brought up to standard of the group if they are not already there.

#### Plan for topic "Students completing this course will be able to adhere to professional level symphonic band performance and rehearsal standards of conduct.": 2015/16

New guidelines and procedures will be developed that address the different circumstances of the undergraduate students and the community members. Expectations,

</tbody>
</table>
Plan for topic "Students completing this course will be able to play in tune with the rest of their section and the orchestra as a whole.": 2018/19

It is vital to the quality of music making by any ensemble that all its members are able to play the correct pitches, and in tune. As a plan of action, instructor will place a greater emphasis upon harmonic awareness and spend more time tuning passages. Fast, chromatic passages will be practiced very slowly so that students have a chance to find their pitches and realize how they fit into the harmony. The instructor will consult with the Department and local ensemble directors regarding their experience with this issue.

Plan for topic "Students completing this course will be able to contribute to a productive rehearsal by adhering to professional level orchestral rehearsal standards of behavior, engagement, and etiquette.": 2018/19

Professional conduct by all members of an ensemble is paramount to an effective rehearsal. As a plan of action, the instructor will make professional conduct mandatory for the class, as it should be for any college music performance class. The instructor has too often been lenient with those lax with this standard of conduct, and will now insist upon this standard from each and every student in the class. Students will be taught to expect professional conduct from their classmates as well. The instructor will consult with the Department and local ensemble directors regarding their experience with this issue.

Plan for topic "Students completing this course will be able to contribute to successful performances by participating in all assigned rehearsals.": 2018/19

Full participation by all members of an ensemble is paramount to an effective rehearsal. Too often, students place other classes or activities ahead of participation in this class. As a plan of action, the instructor will make very clear the importance of full participation. The instructor has too often been lenient with those with frequent unexcused absences, and will now devise and enforce grading consequences for lack of participation. The instructor will consult with the Department and local ensemble directors regarding their experience with this issue.

Plan for topic "Students completing the course will be able to play the correct pitches as indicated by his/her orchestral part with accurate intonation." 2015/16

Intonation is always an issue with this level of orchestra. Making students aware of who is doubling their part helps. Students need to be made more aware of the harmonic context of their individual part.

Plan for topic "Students completing this course will be able to demonstrate an awareness of ensemble within the orchestra and section thereof." 2015/16

Having different sections play their part of a chosen passage effectively brings awareness of what each section is playing during that passage. A number of students however still focus only on their part. Assigned listening to recordings of literature being rehearsed will help all students increase their awareness the musical context of their part.

Plan for topic "Students completing this course will be able to adhere to professional level performance and rehearsal practices."
Community Education members of the orchestra tend to well demonstrate professional level performance and rehearsal practices to regular student members. A more effective and convenient record keeping system needs to be devised and implemented to keep all students more accountable for their professionalism.

Plan for topic "Students completing the course will be able to play in time with rest of the orchestra as directed by the conductor."

<table>
<thead>
<tr>
<th>2012/13</th>
</tr>
</thead>
<tbody>
<tr>
<td>Increase criteria to 80% of the students will achieve a grade of at least &quot;B&quot;? based traditional orchestral performance standards.</td>
</tr>
</tbody>
</table>

</table>
A documentary essay at the end of the semester was very effective in determining the success of the student. However, periodic documentation of the student's experience is needed. As a plan of action, the instructor will require student(s) to document their experience with an ongoing journal to back up their final documentary essay on what they gained from the independent study. Such documentation could be shared with the Department to encourage others to engage in an independent study.

Plan for topic "Students completing this course will be able to meet outcomes as specified in the approved Application for Independent Study.": 2017/18

This course will be assessed the next time it is offered.

Plan for topic "Students completing this course will be able to meet outcomes as specified in the approved Application for Independent Study.": 2014/15

One student enrolled in Independent Study during Spring 2015 demonstrated a thorough understanding of the history of piano pedagogy. Current methods of analyzing and summarizing texts will continue being utilized.

Plan for topic "Students completing this course will be able to gain knowledge and skill through the successful completion of an independent study course.": 2014/15

One student was enrolled in Independent Study with an emphasis on piano pedagogy during Spring 2015. Although assessment of the student demonstrated a thorough understanding of group piano teaching, future assessments will require three or more group teaching demonstrations rather than one.

Plan for topic "Students completing this course will be able to demonstrate and/or apply independent academic learning skills.": 2014/15

One student was enrolled in Independent Study with an emphasis on piano pedagogy during Spring 2015. Future students enrolled in independent study with a focus on piano pedagogy will also evaluate the teaching methods of historical piano pedagogues through autobiographical writings and the notes compiled by their students.
### DVC Instructional Course SLO Action Plans

#### 1174. Student Instructional Assistant [MUSIC-299] belonging to Music [MUSIC]

Plan for topic "Students completing this course will be able to effectively assist the instructor with students in need of further instruction and guidance."

<table>
<thead>
<tr>
<th>2018/19</th>
</tr>
</thead>
<tbody>
<tr>
<td>The student made great strides in his level of communication with students and in devising effective pedagogy. However, better documentation of student progress is needed. As a plan of action, the instructor will require student(s) to document their experience with an ongoing journal and final analytical essay on what they gained from the assistantship. Such documentation could be shared with the Department to encourage others to engage a student instructional assistant.</td>

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to produce recorded music projects utilizing a Digital Audio Workstation that is MIDI capable." : 2017/18
This assessment affirms the existing curriculum and validates our current instructional practices.

Plan for topic "Students completing the course will be able to demonstrate professional behaviors required in the music industry." : 2017/18
This assessment affirms the existing curriculum and validates our current instructional practices.

Plan for topic "Students completing the course will be able to apply vocabulary used in working with a Digital Audio Workstation that is MIDI capable." : 2017/18
This assessment affirms the existing curriculum and validates our current instructional practices.

Plan for topic "Students completing the course will be able to produce recorded music projects utilizing a Digital Audio Workstation that is MIDI capable." : 2014/15
This assessment affirms the existing curriculum and validates our current instructional practices. On reflection however it is felt that the rubric needs to be broadened and more detailed regarding specific recording and editing techniques. In addition perhaps we are at a point in the program where the 75% success level should be raised. Our plan is to reevaluate the same topic the next time this course is due for assessment and reassess a new cohort with additional criteria and perhaps raising the bar of success.

Plan for topic "Students completing the course will be able to demonstrate professional behaviors required in the music industry." : 2014/15
This assessment affirms the existing curriculum and validates our current instructional practices. On reflection however it is felt that the rubric needs to be broadened and more detailed regarding specific time management issues. Our plan is to reevaluate the same topic the next time this course is due for assessment and reassess a new cohort with additional criteria in the instructor developed rubric. What is not apparent in the data is that the hours by arrangement required by our students barely passed muster with only 75% of reaching our benchmark. HBA must be monitored more closely with weekly progress reports.

Plan for topic "Students completing the course will be able to apply vocabulary used in working with a Digital Audio Workstation that is MIDI capable." : 2014/15
This assessment affirms the existing curriculum and validates our current instructional practices. On reflection however it is felt that the exam questions will need to be updated very soon as the software versions have outpaced the exam, text and tutorials. Our plan is to reevaluate the same topic the next time this course is due for assessment and reassess a new cohort with updated exam questions reflecting current software updates.

Plan for topic "Students completing the course will be able to produce recorded music projects utilizing a Digital Audio Workstation that is MIDI capable." : 2012/13
Affirmation and reinforcement of the current curriculum. The students consistently excelled at recording their music projects.

**Plan for topic "Students completing the course will be able to demonstrate professional behaviors required in the music industry.":** 2012/13

Affirmation and reinforcement of the current curriculum. Stressing these core values: dependability, time management, work ethic, and participation will continue to be a focus.

**Plan for topic "Students completing the course will be able to apply vocabulary used in working with a Digital Audio Workstation that is MIDI capable.":** 2012/13

Affirmation and reinforcement of the current curriculum. Although test scores indicate that this outcome needs to be carefully monitored.

This assessment affirms the existing curriculum and validates our current instructional practices. On reflection however it is felt that the rubric needs to be broadened and more detailed regarding specific recording techniques. Our plan is to reevaluate the same topic the next time this course is due for assessment and reassess a new cohort with additional criteria in the instructor developed rubric.

This assessment affirms the existing curriculum and validates our current instructional practices. On reflection however it is felt that the rubric needs to be broadened and more detailed regarding specific recording techniques. Our plan is to reevaluate the same topic the next time this course is due for assessment and reassess a new cohort with additional criteria in the instructor developed rubric.

**Plan for topic "Students completing the course will be able to produce recorded music projects utilizing a Reason/ACID equipped Digital Audio Workstation."**: 2013/14

This assessment affirms the existing curriculum and validates our current instructional practices. On reflection however it is felt that the rubric needs to be broadened and more detailed regarding specific recording techniques. Our plan is to reevaluate the same topic the next time this course is due for assessment and reassess a new cohort with additional criteria in the instructor developed rubric.

**Plan for topic "Students completing the course will be able to demonstrate professional behaviors required in the music industry."**: 2013/14

This assessment affirms the existing curriculum and validates our current instructional practices. But the sections small sample size makes it difficult to be absolutely certain of our conclusions. Our plan is to reevaluate the same topic the next time this course is due for assessment and compare and contrast the two cohorts to strengthen our conclusions.

**Plan for topic "Students completing MUSIC 177 will be able to ... apply vocabulary used in working with a Digital Audio Workstation equipped with the software Reason."**: 2013/14

This assessment affirms the existing curriculum and validates our current instructional practices. Our success is tempered by the knowledge that our sample size was small, both in the number of students and in the number of questions used in the assessment. Our plan is to reevaluate the same topic the next time this course is due for assessment and compare and contrast the two cohorts to strengthen our conclusions. We will also include a larger sample of exam questions to assure a better assessment of our students' knowledge.

**Plan for topic "Students completing the course will be able to apply vocabulary used in working with a Reason/ACID equipped Digital Audio Workstation."**: 2013/14

This assessment affirms the existing curriculum and validates our current instructional practices. 1197. Introduction to the Nutrition Professions [NUTRI-100] belonging to Health Science [NUTRI]
Plan for topic "Students completing the course will be able to assess diet for nutritional adequacy." : 2017/18

This diet analysis assignment is a program we use in NUTRI 160. It is a very detailed assignment and requires competency in the software. We may further develop this assignment to include ways to improve the diet rather than to only identify inadequacies.

Plan for topic "Students completing the course will be able to assess the diet for nutritional adequacy." : 2018/19

This diet analysis assignment is a program we use in NUTRI 160. It is a very detailed assignment and requires competency in the software. We may further develop this assignment to include ways to improve the diet rather than to only identify inadequacies.

Plan for topic "Students completing the course will be able to distinguish the 6 different nutrients and their roles in the body." : 2014/15

The plan is to assess a different learning outcome topic the next time this course is due for assessment.

Plan for topic "Students completing the course will be able to assess diet for nutritional adequacy." : 2014/15

Plans are to add more classroom activities to practice dietary assessment. A variety of methods can be included such as food labels, worksheets, software diet analysis programs used continuously throughout the semester. Instructors will attempt to use diet assessment concepts in projects throughout the semester to reinforce learning.

Plan for topic "Students completing the course will be able to assess the diet for nutritional adequacy." : 2014/15

Plans are to add more classroom activities to practice dietary assessment. A variety of methods can be included such as food labels, worksheets, software diet analysis programs used continuously throughout the semester. Instructors will attempt to use diet assessment concepts in projects throughout the semester to reinforce learning.

Plan for topic "Students completing the course will be able to identify the key dietary factors influencing the development of leading chronic diseases in the U.S." : 2013/14

Because the students did score above the criteria set for the learning outcome, instructors will continue their teaching strategies for this learning outcome. Either diet and disease will be covered in more depth in future semesters and/or other learning outcomes will be tested in the next assessment cycle.

Plan for topic "Students completing the course will be able to distinguish the 6 different nutrients and their roles in the body." : 2012/13

Instructors can add more material to add detail to lecture; learning objective questions may use higher level of Bloom's taxonomy in next cycle.

Plan for topic "Students completing the course will be able to assess diet for nutritional adequacy." : 2012/13

More questions can be added to formative evaluations for this learning objective. Also Nutrition Diet projects are a perfect opportunity to practice nutrient adequacy concepts using their own diets.

Plan for topic "Students completing the course will be able to assess the diet for nutritional adequacy." : 2012/13

More questions can be added to formative evaluations for this learning objective. Also Nutrition Diet projects are a perfect opportunity to practice nutrient adequacy concepts using their own diets.

Plan for topic "Students will be able to determine optimum intake of nutrients around exercise": 2017/18
Because all of the students scored above the success criteria set for the learning outcome, the instructor(s) will continue to use current strategies, while incorporating new learning methods to enhance pedagogy effectiveness. However, the instructor will use a different learning outcome to assess for the next cycle.

Plan for topic "Students completing the course will be able to determine the optimum intake of nutrients around exercise.": 2017/18
Because all of the students scored above the success criteria set for the learning outcome, the instructor(s) will continue to use current strategies, while incorporating new learning methods to enhance pedagogy effectiveness. However, the instructor will use a different learning outcome to assess for the next cycle.

Plan for topic "Students completing Nutri-120 will be able to differentiate the types of ergogenics used in athletics.": 2017/18
Because all of the students scored above the success criteria set for the learning outcome, the instructor(s) will continue to use current strategies, while incorporating new learning methods to enhance pedagogy effectiveness. However, the instructor will use a different learning outcome to assess for the next cycle.

Plan for topic "Students will be able to assess an athlete's diet for overall adequacy of energy needs for weight control.": 2017/18
Students did score above the success rate criteria for the first question. However, students failed to score above the success criteria for the second question. Instructor(s) will incorporate more teaching methods to emphasize on the categories of athletes that are predisposed to eating disorders. Case scenarios and websites with personal testimonies can be incorporated.

Plan for topic "Students completing the course will be able to assess an athlete's diet for overall adequacy of energy needs.": 2017/18
Students did score above the success rate criteria for the first question. However, students failed to score above the success criteria for the second question. Instructor(s) will incorporate more teaching methods to emphasize on the categories of athletes that are predisposed to eating disorders. Case scenarios and websites with personal testimonies can be incorporated.

Plan for topic "Students completing Nutri-120 will be able to identify the potential causes of disordered eating behavior among athletes.": 2017/18
Students did score above the success rate criteria for the first question. However, students failed to score above the success criteria for the second question. Instructor(s) will incorporate more teaching methods to emphasize on the categories of athletes that are predisposed to eating disorders. Case scenarios and websites with personal testimonies can be incorporated.

Plan for topic "Students will be able to evaluate efficacy of ergogenic aids for athletes": 2017/18
It is evident that students need improvement in demonstrating calculations pertaining to how to properly rehydrate. Taking obligatory water losses into consideration needs to be emphasized more when dealing with athletes. Providing learning opportunities and strategies that allow students to consider various components when providing hydration recommendations, will be implemented. Case scenarios, and team solving activities can be a great example of implementing strategies in one’s pedagogy to improve students ability to learn the hydration material in athletic settings.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to describe guidelines to maintain hydration status around exercise in the heat.":: 2017/18

It is evident that students need improvement in demonstrating calculations pertaining to how to properly rehydrate. Taking obligatory water losses into consideration needs to be emphasized more when dealing with athletes. Providing learning opportunities and strategies that allow students to consider various components when providing hydration recommendations, will be implemented. Case scenarios, and team solving activities can be a great example of implementing strategies in oneâ€™s pedagogy to improve students ability to learn the hydration material in athletic settings.

Plan for topic "Students completing Nutri-120 will be able to differentiate the types of ergogenics used in athletics.":: 2014/15

Because all of the students scored above the criteria set for the learning outcome, the instructor(s) will continue to use the improved strategies and modified learning styles for this topic and consider using a new learning outcome to assess for the next cycle.

Plan for topic "Students completing the course will be able to determine the optimum intake of nutrients around exercise.":: 2014/15

Because all of the students scored above the criteria set for the learning outcome, the instructor(s) will continue to use the improved strategies and modified learning styles for this topic and consider using a new learning outcome to assess for the next cycle.

Because all of the students scored above the criteria set for the learning outcome, the instructor(s) will continue to use the improved strategies and modified learning styles for this topic and consider using a new learning outcome to assess for the next cycle.

Plan for topic "Students will be able to evaluate efficacy of ergogenic aids for athletes": 2014/15

Students did not score above the criteria set for this learning outcome (for Q #2). The topic of hydration is more complex and difficult than students initially expect with calculations involved to determine water needs under various conditions. Therefore, more lecture and practice time must be committed to allow students to improve in their understanding and math skills around this topic. More formative evaluations will be conducted to determine their understanding and time and feedback to improve will be adjusted.

Plan for topic "Students completing the course will be able to describe guidelines to maintain hydration status around exercise in the heat.":: 2014/15

Students did not score above the criteria set for this learning outcome (for Q #2). Plan for topic "Students completing Nutri-120 will be able to differentiate the types of ergogenics used in athletics.": 2008/9

- a. Lecture power points and notes were modified to describe content better. Examples were included in lecture to demonstrate points and calculations better.
- b. The modifications above will also help improve students' understanding to improve in diet planning assignment.

Plan for topic "Students will be able to assess an athlete's diet for overall adequacy of energy needs for weight control.": 2008/9

- a. Handouts were given in class to provide more examples of how to calculate energy balance, as well as strategies for weight gain and weight loss.
- b. The modifications above will also help improve students' understanding to improve scores in calculations done in class activities.

Plan for topic "Students completing the course will be able to assess an athlete's diet for overall adequacy of energy needs.": 2008/9

- a. Handouts were given in class to provide more examples of how to calculate energy balance, as well as strategies for weight gain and weight loss.
- b. The modifications above will also help improve students' understanding to improve scores in calculations done in class activities.

Plan for topic "Students completing the course will be able to assess an athlete's diet for overall adequacy of energy needs.": 2008/9

- a. Handouts were given in class to provide more examples of how to calculate energy balance, as well as strategies for weight gain and weight loss.
- b. The modifications above will also help improve students' understanding to improve scores in calculations done in class activities.

Plan for topic "Students will be able to evaluate efficacy of ergogenic aids for athletes": 2008/9

- a. Library workshops have been included to improve students' ability to discern between scholarly information and other sources of information. Rubric was created to better communicate with students expectations of assignment and grading criteria. An extra class session is now dedicated on the use of quackery in the media.
- b. No modifications were made (regarding post-test) as scores were above standards set.

### Plan for topic "Differentiate among food habits and practices related to traditional food in selected cultures": 2017/18

The learning units covering the content for these particular question did have an online YouTube lecture provided in the learning unit for learning the content. Learning units are well organized and show a user-friendly format for students. Instructor will incorporate more critical thinking assignments that involve academic journals explore more. CQ researcher from our library resources will be used as a resource for these types of assignments. More videos will also be incorporated to enhance the learning experience of online courses. Finally, another field assignment will be added to give students a more social experience.

### Plan for topic "Trace the history of regions in relation to the impact of wars and world trade on food patterns.": 2017/18

The question that they scored the lowest on was related to the trading route known as the "slave triangle" for the Caribbean Islanders chapter. We did not provide an online YouTube lecture for this learning unit, due to the fact that the instructor was ill. A modified written lecture was provided instead. All the other questions that scored above a 70% did have an online YouTube lecture provided in the learning unit for learning the content. The instructor has determined that the different formats of lecture had a lot to do with the results of the question that scored a 34%. In addition, the instructor will have to find ways to encourage students to utilize their textbook and to read any additional documents that supplement or replace YouTube lectures in the future. It has been determined that the course will evaluate further the functions of migration patterns of countries and their influences on nutrition and food safety. Other methodologies that will be implemented to meet the is the use of CQ Researcher available through the Pleasant Hill library for students to learn more about the content of the response that most students got incorrect.

### Plan for topic "Compare and contrast different cultural views of health, illness, and their healing practices.": 2017/18

The learning units covering the content for these particular question did have an online YouTube lecture provided in the learning unit for learning the content. Learning units are well organized and show a user-friendly format for students. Instructor will incorporate more critical thinking assignments that involve academic journals explore more. CQ researcher
from our library resources will be used as a resource for
types of assignments. More videos will also be
incorporated to enhance the learning experience of online
courses. Finally, another field assignment will be added
to give students a more social experience. The grading rubrics for these updated assignments will be modified to reflect the changes.
Plan for topic "Students completing the course will be able to integrate basic mathematical skills in the study and application of nutrition information.": 2016/17

This SLO included math which is an area still needing improvement since the last assessment. Instructors will be advised and more diligent to include math in most of their class projects and activities. Diet analysis projects, food label activities, and self-assessment handouts to apply the math skills needed in nutrition will all be encouraged.

Plan for topic "Students completing the course will be able to demonstrate knowledge of nutrient digestion, absorption and metabolism.": 2016/17

This SLO covers the area of digestion and absorption. There is a chapter on digestion early in the semester. However, there is opportunities to cover digestion/absorption in subsequent chapters when lecturing on macronutrients. Therefore, the topic needs to be reinforced in other chapters and instructors need to include more class activities to have students learn and retain knowledge. Group work, board illustrations and videos all can be incorporated in class plans.

Plan for topic "Students completing the course will be able to integrate basic mathematical skills in the study and application of nutrition information.": 2013/14

Students scored lower on this this learning objective than on other objectives and fell short on the expectations. Therefore, instructors will be advised and expected to spend more time with class activities to practice math applications. Projects, assignments and other formative testing can help learners improve basic math skills needed in nutrition.

Plan for topic "Students completing the course will be able to demonstrate knowledge of nutrient digestion, absorption and metabolism.": 2013/14

More time needs to be planned in course calendar for "lipids" topic, particularly essential fatty acids and roles on health. Instructors will have students use case studies or projects to critically think and understand the relationship among various dietary fats and other dietary patterns and overall health effects.

Plan for topic "Students completing the course will be able to summarize the sources and functions of nutrients.": 2011/12

Instructors will improve in covering the content for this objective. Wording of questions will be changed to clarify meanings better.

Plan for topic "Students completing the course will be able to identify reliable nutrition resources and distinguish between scientific information and pseudo-scientific misinformation.": 2011/12

Instructors will improve in covering the content for this objective. Wording of questions will be changed to clarify meanings better.

Plan for topic "Students completing the course will be able to integrate basic mathematical skills in the study and application of nutrition information.": 2011/12

Instructors will maintain current instruction, using class activites to practice concepts

Plan for topic "Students completing the course will be able to demonstrate knowledge of nutrient digestion, absorption and metabolism.": 2011/12
DVC Instructional Course SLO Action Plans

Instructors continue lesson plan content but include other tools such as case studies that help students further explore and critically think about relationship between food choices and health status.

Plan for topic "Students completing the course will be able to identify reliable nutrition resources and distinguish between scientific information and pseudo-scientific misinformation.": 2008/9

a. Handouts were provided to help students better identify potential nutrition quackery and misinformation.

b. Instructions for assignments were modified with examples of scholarly sources. In-class ("hands-on") practice of using the library database for locating scholarly articles are now included in class activities.

Plan for topic "Students completing the course will be able to summarize the sources and functions of nutrients.": 2008/9

a. Handouts were provided to help students better identify potential nutrition quackery and misinformation.

b. Instructions for assignments were modified with examples of scholarly sources. In-class ("hands-on") practice of using the library database for locating scholarly articles are now included in class activities.

Plan for topic "Students completing the course will be able to integrate basic mathematical skills in the study and application of nutrition information.": 2008/9

a. Instructions for the assignment were modified for better clarification. Example calculations are done in class for practice before project due date.

b. No modifications were made, as most students were able to successfully complete the calculations.

Plan for topic "Students completing the course will be able to demonstrate knowledge of nutrient digestion, absorption and metabolism.": 2008/9

a. Instructors will be more thorough and clear in covering content of questions missed by the majority of students.

b. Instructions in diet project were modified to better clarify expectations. Students are referred to specific chapter and page numbers in textbook to assist them in locating proper information to answer questions.

DVC Instructional Course SLO Action Plans

1204. Student Instructional Assistant [NUTRI-299] belonging to Health Science [NUTRI]
### Plan for topic "Students completing the course will be able to apply basic knowledge of natural selection as it affects organisms within marine environment." 2016/17

The question worked. Results are below our goal of 75% correct. As a program, we will work on instruction methods for this particular topic. Some students seemed unclear about what an "adaptation" was and how natural selection can lead to adaptations.

**Plan for topic "Students completing the course will be able to apply basic knowledge of the scientific method." 2016/17**

Ocean 101 instruction methods for scientific method are working well.

**Plan for topic "e": 2016/17**

Ocean 101 instruction methods for scientific method are working well.

### Plan for topic "Students completing the course will be able to describe the interaction of marine organisms within and with the marine environment." 2013/14

Our goal was for 70% or more of students to answer SLO questions correctly. Results show that instructor needs to spend more time on this particular topic and possibly use different methods of instruction.

**Plan for topic "Students completing the course will be able to apply basic knowledge of the scientific method." 2013/14**

Results indicate that students are understanding this topic very well. Will continue to teach this topic as we have been.

**Plan for topic "e": 2013/14**

Results indicate that students are understanding this topic very well. Will continue to teach this topic as we have been.

### Plan for topic "Students completing the course will be able to apply basic knowledge of natural selection as it affects organisms within marine environment." 2012/13

Our goal was 70-75% of students answering question correctly. We will spend more time on natural selection in Ocean 101 sections in the future.

**Plan for topic "Students completing the course will be able to apply basic knowledge of the scientific method." 2012/13**

Results indicate that our methods of teaching scientific method are working well and we will continue to utilize these methods.

**Plan for topic "e": 2012/13**

Results indicate that our methods of teaching scientific method are working well and we will continue to utilize these methods.

**Plan for topic "Students completing the course will be able to apply basic knowledge of natural selection as it affects organisms within marine environment." 2010/11**

Instructors will spend more time teaching natural selection as it affects marine organisms. Specific examples and in-class discussion will be used in increase understanding of this topic.

Plan for topic "Students completing the course will be able to apply basic knowledge of the scientific method." : 2014/15
Oceanography instructors will discuss results at Fall flex meeting and share ideas for improving outcomes.

Plan for topic "Students completing the course will be able to apply basic knowledge of the scientific method." : 2013/14
Results indicate that methods for teaching scientific method are successful and we will continue to utilize these methods for this topic.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the geological, chemical, physical, biological, and ecological features of the oceans." : 2012/13
Results indicate that we need to spend more time working on concepts related to geological oceanography. We will possibly incorporate a work sheet requiring students to draw concepts.

Plan for topic "Students completing the course will be able to apply basic knowledge of the scientific method." : 2012/13
Results indicate that we are our methods of teaching the scientific method are succeeding. We will continue to teach this topic as we have been.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the geological, chemical, physical, biological, and ecological features of the oceans." : 2011/12
Question may be unnecessarily complicated. Will reword question for future use and also rework lecture material to make connections more clear.

Plan for topic "Students completing the course will be able to apply basic knowledge of the scientific method." : 2011/12
Question is too basic and easy/obvious. Will rewrite question so that students need to understand the order of the steps of the scientific method (rather than which of the following isn’t a part of the scientific method).

Plan for topic "e": 2011/12
Question seems to be working. Will increase amount of class time spent on biological evolution and adaptation in an effort to increase percentage of students answering question correctly.

DVC Instructional Course SLO Action Plans

1210. Second Term Persian [PERSN-121] belonging to Foreign Language [PERSN]

Plan for topic "Students completing the course will be able to write the basic letters and their variations using calligraphy.": 2019/20

WebSLOs had tech issue in regards to this class - SLO & Dept. Chairs will create a SLO Submission schedule for next assessment.

Plan for topic "Students completing this course will be able to write paragraphs of 400 or more words in Persian.": 2015/16

I was happy with the results, but will continue to improve student's writing skills assigning the cross-word puzzles which I created 200 of them and published as a book.

Plan for topic "Students completing the course will be able to write the basic letters and their variations using calligraphy.": 2012/13

The assigned homework have been effective in improving the vocabulary, writing. We are satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. We will continue using the same teaching methods to achieve similar or better results.

Plan for topic "Students completing the course will be able to write paragraphs of 400 or more words in Persian.": 2012/13

I was happy with the results, but will continue to improve student's writing skills assigning the cross-word puzzles which I created 200 of them and published as a book.

Plan for topic "Students completing the course will be able to write the basic letters and their variations using calligraphy.": 2010/11

Results are satisfactory. We plan to change the method of assessment from self to active.

Plan for topic "Students completing the course will be able to pronounce Persian words clearly and accurately and use them in sentences.": 2010/11

Results are satisfactory. We plan to change the method of assessment from self to active.

Plan for topic "Students completing the course will be able to use past and future tenses of verbs.": 2010/11

Results are satisfactory. We plan to change our method of assessment from self to active in the future.

Plan for topic "Students completing the course will be able to write the basic letters and their variations using calligraphy.": 2009/10

Very Satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction.

Plan for topic "Students completing the course will be able to pronounce Persian words clearly and accurately and use them in sentences.": 2009/10

DVC Instructional Course SLO Action Plans

1211. Topics in Persian [PERSN-150] belonging to Foreign Language [PERSN]
DVC Instructional Course SLO Action Plans

1212. Student Instructional Assistant [PERSN-299] belonging to Foreign Language [PERSN]

Plan for topic "Students completing this course will be able to help students pronounce Persian words clearly and accurately.": 2016/17

As a plan of action, the department will encourage instructors to dialogue about pronunciation approaches, as well as execution of cultural pragmatics and discussions when integrating a 299 student in the classroom. Also, the department will address the efficiency of their performance, not only focusing on their established proficiency, but their accessibility to students.

Plan for topic "Students completing this course will be able to help students pronounce Persian words clearly and accurately.": 2014/15

It was very helpful to have an assistant in class since some students constantly needed extra help. We will continue accepting students for this course and give native Persian students or advanced Persian learners an opportunity to use their skills and help others.
1213. Introduction to Philosophy [PHILO-120] belonging to Humanities and Philosophy [PHILO]

Plan for topic "Students completing the course will be able to recognize central philosophical issues and their application to everyday life." : 2018/19

In the Fall of 2019, we will create an SLO assessment kit for all Philosophy adjuncts. This kit will provide guidelines for SLO assessment and data collection. This will allow the Humanities and Philosophy department to more accurately analyze all student data over the course of the year.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the differing responses to basic philosophical issues such as the relationship between causality and free will, mind and body, knowledge and experience." : 2015/16

Methods of instruction that worked included: homework assignments, carefully constructed lectures and discussion, completion of study materials prior to testing and optional submission of those materials to the instructor for ungraded feedback prior to the test, time spent in class discussing various philosophers’ positions with regard to philosophical issues. Preparation for quizzes and exams was very important in most sections. Problems to address/possible solutions: Some students were not willing to do the work, and a large number dropped when the paper was due. The instructor noting this problem will likely drop the paper requirement. One instructor noted that continuous and regular evaluation of students combined with adapting to the students’ learning trends and needs could improve student success. Faculty noted a need for philosophy tutors. Several faculty noted that more one-on-one time with students would be helpful. One faculty suggested an assessment of basic skills be conducted in the first class meeting of the semester in order to better assess student needs. This is the first year the department has conducted assessment using this questionnaire method. Prior assessments used Survey Monkey questions answered by students, with students stating whether they considered themselves as having achieved success. The department was pleased that 75% of students completing the course achieved success, but notes that only 58% of students enrolled at census achieved success, with 22% of census enrollment withdrawing from the course. One of the problems lies with the difficulty of the subject matter, and the institutional lack of prerequisite skill levels for a course that must meet transfer requirements.

Plan for topic "Students completing PHILO-120 will be able to Students completing PHILO-120 will be able to demonstrate an understanding of the differing responses to basic philosophical issues such as the relationship between causality and free will, mind and body, knowledge and experience." : 2014/15

Outcome Assessment History
DVC Instructional Course SLO Action Plans

Tutors. Several faculty noted that more one-on-one time with students would be helpful. One faculty suggested an assessment of basic skills be conducted in the first class meeting of the semester in order to better assess student needs. This is the first year the department has conducted assessment using this questionnaire method. Prior assessments used Survey Monkey questions answered by students, with students stating whether they considered themselves as having achieved success. The department will be using these results to refine future assessment questionnaires, and at this point is involved in discussion about the best ways to measure success in courses that are not "cookie cuttered" but rather allow for a range of methodologies and variety of reading materials in order to fulfill course requirements per the course outline of record. The department was pleased that 75% of students completing the course achieved success, but notes that only 58% of students enrolled at census achieved success, with 22% of census enrollment withdrawing from the course. One of the problems lies with the difficulty of the subject matter, and the institutional lack of prerequisite skill levels for a course that must meet transfer requirements.

Plan for topic "Students completing PHILO-120 will be able to recognize central philosophical issues and their application to everyday life.": 2013/14

Our department has used the SurveyMonkey format for this and previous assessments. Now that a larger number of faculty are participating in the process, it is time to stop using this method and to actually assess real student outcomes via a completely different methodology. In the 2014-15 assessment, the instructors in any given course will assess the scheduled SLOs (the department will choose one or two SLOs per course scheduled for assessment). Instructors may link the SLO to an assignment or quiz question, or may conduct an assessment using another pedagogical method that is part of the actual course curriculum. The instructor will then give the results to the department. This will provide the department with meaningful data.

Plan for topic "Students completing PHILO-120 will be able to demonstrate an understanding of the differing responses to basic philosophical issues such as the relationship between causality and free will, mind and body, knowledge and experience.": 2013/14

Our department has used the SurveyMonkey format for this and previous assessments. In the 2014-15 assessment, the instructors in any given course will assess the scheduled SLOs (the department will choose one or two SLOs per course scheduled for assessment). Instructors may link the SLO to an assignment or quiz question, or may conduct an assessment using another pedagogical method that is part of the actual course curriculum. The instructor will then give the results to the department. This will provide the department with meaningful data.

Plan for topic "Students completing PHILO-120 will be able to assess these important philosophical issues in both oral and written form.": 2013/14

Our department has used the SurveyMonkey format for this and previous assessments. Now that a larger number of faculty are participating in the process, it is time to stop using this method and to actually assess real student outcomes via a completely different methodology. In the 2014-15 assessment, the instructors in any given course will assess the scheduled SLOs (the department will choose one or two SLOs per course scheduled for assessment). Instructors may link the SLO to an assignment or quiz
question, or may conduct an assessment using another pedagogical method that is part of the actual course curriculum. The instructor will then give the results to the department. This will provide the department with meaningful data.

Plan for topic "Students completing the course will be able to assess these important philosophical issues in both oral and written form.": 2012/13

This is a small number of respondents. The department will give frequent reminders to adjunct faculty that participation in SLO assessment is mandatory. The department will discuss ways to encourage students to participate in the survey.

Plan for topic "Students completing the course will be able to recognize central philosophical issues and their application to everyday life.": 2011/12

In future assessments all sections of the course will be asked to distribute questions to student respondents in order that a stronger response can be evaluated.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the differing responses to basic philosophical issues such as the relationship between causality and free will, mind and body, knowledge and experience.": 2011/12

The department will send several reminders to adjunct faculty that they must participate in this process. The department is considering ways to encourage students to participate in the survey. Other methods of assessment must also be discussed.

Plan for topic "Students completing the course will be able to recognize central philosophical issues and their application to everyday life.": 2010/11

Proper training of adjunct faculty

Plan for topic "Students completing the course will be able to recognize central philosophical issues and their application to everyday life.": 2009/10

The other 10% not answering correctly need to be assisted in the classroom in understanding the basic content for this course prior to their being asked questions on it.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the differing responses to basic philosophical issues such as the relationship between causality and free will, mind and body, knowledge and experience.": 2009/10

The other 10% not answering correctly need to be assisted in the classroom in understanding the basic content for this course prior to their being asked questions on it.

Plan for topic "Students completing the course will be able to assess these important philosophical issues in both oral and written form.": 2009/10

The other 10% not answering correctly need to be assisted in the classroom in understanding the basic content for this course prior to their being asked questions on it.
### DVC Instructional Course SLO Action Plans

#### 1214. Introduction to Ethics [PHILO-122] belonging to Humanities and Philosophy [PHILO]

**Plan for topic "Students completing the course will be able to analyze ethical issues from the perspective of different ethical theories.": 2017/18**

| Action plan for future student success: continue to assign short homework tasks that require attention to the assigned reading; encourage students to think of themselves as participating in an on-going conversation about ethical challenges all of us face in daily living; work a bit harder to touch base with students who don't seem engaged. |

**Plan for topic "Students completing PHILO-122 will be able to describe the nature of and justification of ethics.": 2013/14**

| Our department has used the SurveyMonkey format for this and previous assessments. Now that a larger number of faculty are participating in the process, it is time to stop using this method and to actually assess real student outcomes via a completely different methodology. In the 2014-15 assessment, the instructors in any given course will assess the scheduled SLOs (the department will choose one or two SLOs per course scheduled for assessment). Instructors may link the SLO to an assignment or quiz question, or may conduct an assessment using another pedagogical method that is part of the actual course curriculum. The instructor will then give the results to the department. This will provide the department with meaningful data. |

**Plan for topic "Students completing PHILO-122 will be able to recognize ethical issues in decision-making.": 2013/14**

| Our department has used the SurveyMonkey format for this and previous assessments. Now that a larger number of faculty are participating in the process, it is time to stop using this method and to actually assess real student outcomes via a completely different methodology. DVC Instructional Course SLO Action Plans

1217. Introduction to the Philosophy of Religion [PHILO-141] belonging to Humanities and Philosophy [PHILO]

Plan for topic "Students completing the course will be able to assess attempts to establish the existence of God from diverse historical periods and cultures.":: 2018/19

Because the average grade was a solid B, the instructor does not intend to make significant changes to the exams, but leaving more time during review sessions would be a way to give trailing students an opportunity to get more clarifications.

Plan for topic "Students completing the course will be able to extract the central themes and issues from a wide variety of religious discourse.":: 2017/18

This course has not been offered since Fall 2016. This course will be assessed when it is next offered in Fall 2019.

Plan for topic "Students completing PHILO-141 will be able to extract the central themes and issues from a wide variety of religious discourse.":: 2013/14

Our department has used the SurveyMonkey format for this and previous assessments. Now that a larger number of faculty are participating in the process, it is time to stop using this method and to actually assess real student outcomes via a completely different methodology. In the 2014-15 assessment, the instructors in any given course will assess the scheduled SLOs (the department will choose one or two SLOs per course scheduled for assessment). Instructors may link the SLO to an assignment or quiz question, or may conduct an assessment using another pedagogical method that is part of the actual course curriculum. The instructor will then give the results to the department. This will provide the department with meaningful data.

Plan for topic "Students completing PHILO-141 will be able to critique definitions and methodologies from the study of religion.":: 2013/14

Our department has used the SurveyMonkey format for this and previous assessments. Now that a larger number of faculty are participating in the process, it is time to stop using this method and to actually assess real student outcomes via a completely different methodology. Plan for topic "Students completing PHILO-141 will be able to explain concepts of revelation, faith, miracles and authority.": 2013/14

Plan for topic "Students completing PHILO-141 will be able to compare and contrast religion and science.": 2013/14

Plan for topic "Students completing PHILO-141 will be able to formulate and analyze some of the pertinent issues in religion.": 2013/14
DVC Instructional Course SLO Action Plans

department. This will provide the department with meaningful data.

Plan for topic "Students completing the course will be able to extract the central themes and issues from a wide variety of religious discourse.": 2011/12

We have only one full-time faculty member teaching philosophy. This course is taught by adjuncts only. The department will send several reminders to adjunct faculty that they must participate in this process. The department is considering ways to encourage students to participate in the survey. Other methods of assessment must also be discussed.

Plan for topic "Students completing the course will be able to critique definitions and methodologies from the study of religion.": 2011/12

Action plan:

Plan for topic "Students completing the course will be able to identify the characteristics both of primal religions and of historical descriptions of ultimate reality.": 2011/12

We have only one full-time faculty member teaching philosophy. This course is taught by adjuncts only. The department will send several reminders to adjunct faculty that they must participate in this process. The department is considering ways to encourage students to participate in the survey. Other methods of assessment must also be discussed.

Plan for topic "Students completing the course will be able to assess attempts to establish the existence of God from diverse historical periods and cultures.": 2011/12

We have only one full-time faculty member teaching philosophy. This course is taught by adjuncts only. The department will send several reminders to adjunct faculty that they must participate in this process. The department is considering ways to encourage students to participate in the survey. Other methods of assessment must also be discussed.

Plan for topic "Students completing the course will be able to explain concepts of revelation, faith, miracles and authority.": 2011/12

We have only one full-time faculty member teaching philosophy. This course is taught by adjuncts only. The department will send several reminders to adjunct faculty that they must participate in this process. The department is considering ways to encourage students to participate in the survey. Other methods of assessment must also be discussed.

Plan for topic "Students completing the course will be able to compare and contrast religion and science.": 2011/12

We have only one full-time faculty member teaching philosophy. This course is taught by adjuncts only. The department will send several reminders to adjunct faculty that they must participate in this process. The department is considering ways to encourage students to participate in the survey. Other methods of assessment must also be discussed.

Plan for topic "Students completing the course will be able to formulate and analyze some of the pertinent issues in religion.": 2011/12

We have only one full-time faculty member teaching philosophy. This course is taught by adjuncts only. The department will send several reminders to adjunct faculty that they must participate in this process. The department is considering ways to encourage students to participate in the survey. Other methods of assessment must also be discussed.
Plan for topic "Students completing this course will be able to discuss the fundamental metaphysical, epistemological, and ethical tenets of Asian philosophy.": 2019/20

This assessment demonstrates that the percentage of students comprehending the material remains high (90% success). Due to the sudden transition to DE from the Covid pandemic, a large number of students dropped the course mid-semester. Future assessments of this course will provide more accurate data concerning student success.

When this class is offered again spring 2021, we plan on having students utilize small group work on a more consistent basis. This method is successful in other classes, and I am confident it will affect positive student success in the future courses.
DVC Instructional Course SLO Action Plans

1219. Topics in Philosophy [PHILO-150] belonging to Humanities and Philosophy [PHILO]
1220. Introduction to Social and Political Philosophy [PHILO-160] belonging to Humanities and Philosophy [PHILO]
Plan for topic "Students completing the course will be able to identify, describe, compare, and critically analyze (in both oral and written form) the political theories of Plato, Aristotle, Hobbes, Locke, Marx, John Stuart Mill, John Rawls, and Robert Nozick.": 2018/19

Given the low enrollment (7 students), adequate data analysis and action plan will need to wait until the course is offered again.

</tbody>
</table>
1222. Comparative Religion [PHILO-220] belonging to Humanities and Philosophy [PHILO]

Plan for topic "Students completing the course will be able to describe the origins, development, thinking, and practice of the major living religions.": 2018/19

This assessment demonstrates that the percentage of students comprehending the material remains high (89% success). Student success was high due to the large number of university students enrolled. Approximately half of student enrolled are attending a four-year university and are home for the summer taking PHILO 220 as a GE requirement for their university.

When this class is offered again, hopefully in 2020, we plan on having students utilize small group work on a more consistent basis. This method is successful in other classes, and we are confident it will affect positive student success in the future courses.

Plan for topic "Students completing the course will be able to describe the origins, development, thinking, and practice of the major living religions.": 2017/18

This course has not been offered since Fall 2016. This course will be assessed when it is next offered in Fall 2019.

Plan for topic "Students completing the course will be able to describe the origins, development, thinking, and practice of the major living religions.": 2016/17

This topic is being assessed this semester (Spring 2017)

Plan for topic "Students completing the course will be able to describe the origins, development, thinking, and practice of the major living religions.": 2012/13

The department was disappointed with these results, and have subsequently emphasized that this assessment is mandatory. We are still struggling to bring our entire faculty in compliance with this process, and this is particularly problematic since most members of our faculty are adjunct. In Assessments gathered in AY 2013-14, individual sections will be assessed.

Plan for topic "Students completing the course will be able to compare and contrast the widely divergent religious positions currently held in various parts of the world.": 2012/13

The department was disappointed with these results, and have subsequently emphasized that this assessment is mandatory. We are still struggling to bring our entire faculty in compliance with this process, and this is particularly problematic since most members of our faculty are adjunct. In Assessments gathered in AY 2013-14, individual sections will be assessed.

Plan for topic "Students completing the course will be able to compare and contrast his or her own philosophies of life to the religious positions and experience of individuals in other cultures and historical periods.": 2012/13

In Assessments gathered in AY 2013-14, individual sections will be assessed.
1223. History of Western Philosophy: Pre-Socratic to Medieval Period [PHILO-224] belonging to Humanities and Philosophy [PHILO]

Plan for topic "Students completing the course will be able to evaluate diverse perspectives about human nature, the nature of human knowledge, and realities of the world around us through a study of ancient and medieval philosophy.": 2018/19

This assessment demonstrates that the percentage of students comprehending the material remains high (87% success). Student success is usually high in PHILO 224 due to the large number of philosophy majors/minors who have previously taken philosophy classes and are familiar with the methods and goals of philosophy courses.

When this class is offered again 2019, we plan on having students utilize small group work on a more consistent basis. This method is successful in other classes, and I am confident it will affect positive student success in the future courses.

Plan for topic "Students completing the course will be able to describe the historical development of major philosophical ideas from the pre-Socratics to the Medieval period.": 2012/13

The same format for gathering responses is in place for AY 2013-14, and data is being gathered for the Fall 2013 semester. The department will next discuss a different method to gather assessment information for this course for AY 2014-15 in order to assess what number of students actually have accomplished this outcome.

Plan for topic "Students completing the course will be able to analyze the central problems, conflicts, and contributions of philosophical thought to Western tradition from pre-Socratics to the Medieval period.": 2012/13

The same format for gathering responses is in place for AY 2013-14, and data is being gathered for the Fall 2013 semester. The department will next discuss a different method to gather assessment information for this course for AY 2014-15 in order to assess what number of students actually have accomplished this outcome.

Plan for topic "Students completing the course will be able to compare and contrast the main questions and solutions proposed by the major thinkers of the era.": 2012/13

The same format for gathering responses is in place for AY 2013-14, and data is being gathered for the Fall 2013 semester. The department will next discuss a different method to gather assessment information for this course for AY 2014-15 in order to assess what number of students actually have accomplished this outcome.
### 1224. History of Western Philosophy: Descartes to Present [PHILO-225] belonging to Humanities and Philosophy [PHILO]

**Plan for topic "Students completing the course will be able to evaluate diverse perspectives about human nature, the nature of human knowledge, and realities of the world around us through a study of 17th Century through 20th Century philosophy."**: 2019/20

This assessment demonstrates that the percentage of students comprehending the material remains high (90% success). Due to the sudden transition to DE from the Covid pandemic, a large number of students dropped the course mid-semester. Future assessments of this course will provide more accurate data concerning student success.

When this class is offered again 2021, we plan on having students utilize small group work on a more consistent basis. This method is successful in other classes, and I am confident it will affect positive student success in the future courses.

### Plan for topic "Students completing the course will be able to describe the historical development of major philosophical ideas from Descartes to the 20th Century."**: 2016/17

The level of learning by the current assessment demonstrates that the percentage of students comprehending the material remains high (89% success).

This is the first cycle of evaluation for this course (PHILO 225).

Outside accrediting agencies for this course are not applicable at this point.

Information gained from this assessment does not affect the program or certificate.
DVC Instructional Course SLO Action Plans

Action plan for future student success: When this class is offered again in Spring 2018, I plan on having students break into small groups the day of the quiz to review material together in preparation. I have recently found that this method is successful in other classes, and I am confident it will affect positive student success in future subsequent courses.

DVC Instructional Course SLO Action Plans

1225. Independent Study [PHILO-298] belonging to Humanities and Philosophy [PHILO]
Plan for topic "Students completing this course will be able to demonstrate and/or apply independent academic learning skills."

2018/19
This course will be assessed when it is next offered.

Plan for topic "Students completing this course will be able to demonstrate and/or apply independent academic learning skills."
2015/16
The student did suggest that some of the reading material was dense, and the paper assignments were high in number/content, compared to comparable courses she had taken. In the future, should this course be offered, actions will be taken to tailor the requirements more to an introductory level of such a course.
1226. Student Instructional Assistant [PHILO-299] belonging to Humanities and Philosophy [PHILO]
1227. Elementary Physics [PHYS-110] belonging to Physical Science/Physics/Astronomy/Geology/Geography [PHYS]

Plan for topic "Students will be able to correctly identify and apply one or more of the following skill sets or principles to solve a problem at the algebra level: position, speed, velocity, and acceleration.": 2019/20

| The department would like to maintain positive results on this SLO, as well as improve performance in the future. |
| Instructors will be encouraged to maintain their current methods of engagement, as well as exploring additional methods, such as group worksheets and active discussion. |

Plan for topic "Students will be able to correctly identify and apply one or more of the following skill sets or principles to solve a problem at the algebra level: conservation of momentum and conservation of energy.": 2019/20

| The department would like to maintain positive results on this SLO, as well as improve performance in the future. |

### Plan for topic "Students completing the course will be able to determine the total uncertainty in a measured quantity using a combination of the uncertainty in the measuring instrument and the uncertainty due to their experimental technique." 2019/20

The department would like to maintain positive results on this SLO, as well as improve performance in the future.

Instructors will be encouraged to maintain their current methods of engagement, as well as exploring additional methods, such as group worksheets and active discussion. This assessment may be anomalous due to the physical campus closure.

### Plan for topic "Students completing the course will be able to determine the correct number of significant digits in experimental results using the total uncertainty in the measured quantities." 2016/17

The department would like to maintain positive results on this SLO, as well as improve performance in the future. One possible action is to devote a few more questions/worksheets to highlight the meaning of uncertainty reporting and contrast reporting uncertainty to the method of significant figures. We plan to assess another SLO topic in the future.

### Plan for topic "Students completing PHYS-111 will be able to determine an experimental result by finding the trend-line of a graph of their data." 2013/14

Our goals were met; no changes are necessary.

### Plan for topic "Students completing the course will be able to determine the correct number of significant digits in experimental results using the total uncertainty in the measured quantities." 2012/13

Our goal was met; no changes are necessary.
Plan for topic "Students completing the course will be able to determine the total uncertainty in a measured quantity using a combination of the uncertainty in the measuring instrument and the uncertainty due to their experimental technique.": 2012/13

Our goal was met; no changes are necessary.

Plan for topic "Students completing PHYS-111 will be able to determine an experimental result by finding the trend-line of a graph of their data.": 2012/13

Our goal was met; no changes are necessary.
Plan for topic "Students completing the course will be able to describe gravity as a curvature of space-time."": 2018/19
While a 74% success rate has room for improvement, the success criterion of 100% correct completion of two multiple choice questions is overly stringent, as 91% achieved a score over 50%. We may adjust our success criteria in the next cycle, with a plan to assess SLO #2.

Plan for topic "Students completing the course will be able to apply the concepts of velocity, acceleration, force, and energy in the conceptual analysis of simple physical systems."": 2016/17
The course was not offered during the 2016/2017 assessment cycle. So it was not assessed. One of us is going on sabbatical in spring 2018 to write a book for this course. We plan on offering the class in the fall of 2018 and in subsequent semesters using the new book. Not only will the new book decrease the cost to our students by being made available through the DVC print shop, we also expect this book to have a positive impact on student learning. We plan on doing assessment topic # 3 in the fall of 2018, when this course is taught again.

Plan for topic "Students completing the course will be able to apply the concepts of velocity, acceleration, force, and energy in the conceptual analysis of simple physical systems."": 2013/14
Our goals were met; no changes are necessary.

Plan for topic "Students completing the course will be able to describe the relative nature of space and time when an observer is moving near light speed."": 2013/14
Our goals were met; no changes are necessary.

Plan for topic "Students completing the course will be able to describe gravity as a curvature of space-time."": 2013/14
Our goals were met; no changes are necessary.

Plan for topic "Students completing the course will be able to determine the possible number of photons and the energy of each photon emitted or absorbed given the energy levels of an atom or molecule."": 2013/14
Our goals were met; no changes are necessary.

Plan for topic "e": 2013/14
Our goals were met; no changes are necessary.
1230. General College Physics I [PHYS-120] belonging to Physical Science/Physics/Astronomy/Geology/Geography [PHYS]

Plan for topic "Students completing the course will be able to correctly identify and apply one or more of the following skill sets or principles to solve a mechanics problem at the algebra/trigonometry level: accelerated motion, momentum conservation, energy conservation and rotational motion."**: 2017/18

Inquiry design flaw: 36 students were assessed with a problem involving both momentum conservation AND the impulse-momentum theorem, which led to 13 students applying the skill set, but with significant misconceptions. Future SLO assessments will be sure to test one learning outcome in a given question.

Plan for topic "Students completing the course will be able to correctly identify and apply one or more of the following skill sets or principles to solve an oscillation problem at the algebra/trigonometry level: simple harmonic motion, wave motion, fluid interactions and gravitational interactions."**: 2012/13

Our goal was met; no changes are necessary.

Plan for topic "Students completing the course will be able to correctly identify and apply one or more of the following skill sets or principles to solve a mechanics problem at the algebra/trigonometry level: accelerated motion, momentum conservation, energy conservation and rotational motion."**: 2012/13

Our goal was met; no changes are necessary.

Plan for topic "Students completing the course will be able to correctly identify at the algebra/trigonometry level the forces acting on an object, draw a free-body diagram and apply Newton's laws of motion."*: 2014/15

This assessment covers important concepts, since it is fundamental to success in the more advanced topics that come later. Our initial target was that 70% of the students should be able to pass this requirement; therefore, we are pleased with the 77% success rate. Our plan is to continue our efforts to emphasize force identification and application of Newton's laws through both group problem sessions and lab work.

Plan for topic "Students completing the course will be able to correctly identify at the algebra/trigonometry level the forces acting on an object, draw a free-body diagram and apply Newton's laws of motion."*: 2011/12

Our goals were met; no changes are necessary.

Plan for topic "Students completing the course will be able to correctly identify at the algebra/trigonometry level the forces acting on an object, draw a free-body diagram and apply Newton's laws of motion."*: 2012/13

Plan for topic "Students completing the course will be able to correctly identify and apply one or more of the following skill sets or principles to solve a problem in electricity and/or magnetism at the algebra/trigonometry level: Coulomb's law, electric and magnetic fields, electric and magnetic force laws, electric potential, capacitance, electric current, resistance, Ampere's law, Faraday's law and basic electromagnetic waves.": 2017/18

Greater than 70% of students were successful. We will continue our current methods.

Plan for topic "Students completing the course will be able to correctly identify and apply one or more of the following skill sets or principles to solve a problem in geometric and/or wave optics at the algebra/trigonometry level: light as an electromagnetic wave, refraction and reflection, ray diagrams for lenses and mirrors, virtual images and objects, the lens/mirror equation, interference, diffraction and polarization.": 2017/18

Surpassed 70% student success rate. Will continue current methods.

Plan for topic "Students completing the course will be able to correctly identify and apply one or more of the following skill sets or principles to solve a problem in electricity and/or magnetism at the algebra/trigonometry level: Coulomb's law, electric and magnetic fields, electric and magnetic force laws, electric potential, capacitance, electric current, resistance, Ampere's law, Faraday's law and basic electromagnetic waves.": 2014/15

We plan to make changes in how we prepare students for the analysis of circuit components that are connected in parallel. The changes, focusing on parallel resistors, will involve group work during lab hours and discussion sections. We would like to increase the success rate to 70% or above.

Plan for topic "Students completing the course will be able to correctly identify and apply one or more of the following skill sets or principles to solve a problem in geometric and/or wave optics at the algebra/trigonometry level: light as an electromagnetic wave, refraction and reflection, ray diagrams for lenses and mirrors, virtual images and objects, the lens/mirror equation, interference, diffraction and polarization.": 2012/13

Our goals were met; therefore, we will continue our current methods.

Our goals were met; therefore, we will continue with our current methods.
Plan for topic "Students completing the course will be able to correctly identify and apply one or more of the following skill sets or principles to solve a problem in modern physics at the algebra/trigonometry level: light as a particle (photons), particles (electrons, protons, neutrons) as waves, quantum uncertainty, interaction of light with matter, atoms, molecules and atomic nuclei.": 2012/13

Our goals were met; therefore, we will continue with our current methods.
Plan for topic "Students completing the course will be able to apply integration in one dimension to calculate the center of mass or moment of inertia of highly symmetrical objects, or to analyze its motion."  2017/18
Since greater than 70% of students were successful, course will maintain current practices and assess a different topic next cycle.

Plan for topic "Students completing the course will be able to apply differentiation to analyze motion."  2014/15
Our plan is to continue offering this course in the current format where we emphasize group problem solving during class meetings. We had hoped to obtain at least 70% success rates and we have done so.

Plan for topic "Students completing the course will be able to apply differentiation to analyze motion."  2011/12
2011-08-06: This the first slo evaluated during the semester. Students were more successful in the second and third evaluation indicating that they might need more time to learn this concept. We can't give them more time; however, we will begin having a review session at the start of the second class meeting in order to provide more practice with this concept.
2012-11-20: Our goal was met; no changes are necessary.

Plan for topic "Students completing the course will be able to apply optimization to analyze motion."  2011/12
Goals were met; no changes are needed.

</table>
Plan for topic "Students completing the course will be able to correctly identify at the algebra/trigonometry level the forces acting on an object, draw a free-body diagram and apply Newton's laws of motion.": 2018/19

The success rate was excellent, showing that nearly all the students knew how to approach and solve the problem with only minor mistakes. As a plan of action, the department will continue to use worksheets and formative assessments with teaching emphasis on vector component equations. In addition, the department will be adopting a new textbook for this course sequence that emphasizes vector notation earlier than textbooks currently in use.

Plan for topic "Students completing the course will be able to correctly identify and apply one or more of the following skill sets or principles to solve a mechanics problem at the algebra/trigonometry level: accelerated motion, momentum conservation, energy conservation and rotational motion.": 2018/19

This was the first time that this SLO has been assessed, and the success rate was lower than other 129 SLOs have been. A new lab experiment has recently been developed by one of our faculty members that focuses on exactly this material, and at least two of our faculty members plan to incorporate it for the first time in the Spring 2019 semester. This lab will be made available to all 129 professors in the future. The action plan is to implement this lab and re-assess this SLO at the next opportunity.

Plan for topic "Students completing the course will be able to correctly identify and apply one or more of the following skill sets or principles to solve a problem at the algebra/trigonometry and beginning calculus level: simple harmonic motion, wave motion, fluid interactions and gravitational interactions.": 2015/16

Our action plan is to continue work with group activity sheets to support student learning of the physics principles and the correct application of math skills to the physics context. In future assessments, we would like to continue the investigation of applying the algebra and trigonometry skills to the physics context. We plan to assess topics one and two in the next cycle.

Plan for topic "e": 2015/16

Our action plan is to continue work with group activity sheets to support student learning of the physics principles and the correct application of math skills to the physics context. In future assessments, we would like to continue the investigation of applying the algebra and trigonometry skills to the physics context. We plan to assess topics one and two in the next cycle.

Plan for topic "Students completing the course will be able to correctly identify at the algebra/trigonometry level the forces acting on an object, draw a free-body diagram and apply Newton's laws of motion.": 2012/13

Our goals were met; therefore, we will continue with our current methods.
Plan for topic "Students completing the course will be able to correctly identify at the calculus level the forces acting on an object, draw a free-body diagram, and apply Newton's laws of motion.": 2015/16

Professors will incorporate more active-learning, for example interactive exercises utilizing new classroom video illustrations (Rodriguez Spring 2016 sabbatical project) to...
improve learning regarding the forces involved in circular motion. We plan to assess this SLO again in the next cycle.

Plan for topic "Students completing the course will be able to correctly identify and apply one or more of the following skill sets or principles to solve a mechanics problem at the calculus level: accelerated motion, momentum conservation, energy conservation and rotational motion." : 2015/16

We have concerns about student proficiency with using algebra to solve physics problems. This informs our action plan. Professors will focus on improving student skills sets regarding translation from verbal to pictorial representation, and translation from verbal/pictorial to an algebraic expression representing the problem. We plan to assess this SLO again in the next cycle.

Plan for topic "Students completing the course will be able to correctly identify and apply one or more of the following skill sets or principles to solve an oscillation problem at the calculus level: simple harmonic motion, wave motion, fluid interactions and gravitational interactions." : 2015/16

1236. Topics in Physics [PHYS-150] belonging to Physical Science/Physics/Astronomy/Geology/Geography [PHYS]
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to correctly identify and apply one or more of the following skill sets or principles to solve a problem in thermodynamics at the calculus level: temperature, heat, thermal expansion, kinetic theory, the ideal gas law, PV diagrams, internal energy, specific heat, the laws of thermodynamics, heat engines and entropy."

- 2018/19
  
  69% success rate can be improved. Previous success rate of 90% in Fall 2012 indicates greater emphasis on thermodynamic problem solving is needed. Difficulty level of questions may also have changed with new faculty and shifting department culture. Did not assess part-time faculty sections.

- 2015/16
  
  We have concerns about student proficiency with using algebra to solve physics problems. This informs our action plan. Professors will focus on improving student skills sets regarding translation from verbal to pictorial representation, and translation from verbal/pictorial to an algebraic expression representation. Special attention should be applied to the 3-D visualization skill set at the 230 level. Instructors can utilize interactive discussions or activities focused on 3-D visualization.

- 2012/13
  
  Our goal was met; no changes are necessary.

Plan for topic "Students completing the course will be able to correctly identify and apply one or more of the following skill sets or principles to solve a problem concerning moving charges and/or time-varying fields at the calculus level: electric current, resistance, Biot-Savart law, magnetic fields, magnetic force laws, Ampere's law, Faraday's law, Maxwell's equations and plane electromagnetic waves."

- 2015/16

DVC Instructional Course SLO Action Plans

1239. Student Instructional Assistant [PHYS-299] belonging to Physical Science/Physics/Astronomy/Geology/Geography [PHYS]
Plan for topic "Students will be able to balance the stoichiometric coefficients of a chemical equation.": 2018/19

82% success rate is acceptable, but can be improved. Will adjust SLO assessment topics in future to better match course SLOs, and ensure they match the official COR SLOs.

Plan for topic "Students will be able to apply the concepts of energy, power and efficiency to analyze alternative energy systems such as solar electric systems or gas/electric hybrid cars.": 2016/17

The department would like to maintain positive results on this SLO, as well as improve performance in the future. Instructors will be encouraged to maintain their current methods of engagement, as well as exploring additional methods, such as group worksheets and active discussion.

Plan for topic "Students will be able to describe what types of circular motions are responsible for producing the day, the lunar month and the year.": 2013/14

Our goals were met; no changes are necessary.
Students were able to learn the LaTeX typesetting language and the relevant particle physics for the table independently with regular faculty assistance. Creating a timeline for completion may improve efficacy of independent study courses in the future.

1262. Green Awareness [PLUMB-130] belonging to Architecture/Engineering [PLUMB]

Plan for topic "Students completing this course will be able to demonstrate general knowledge in the operation of water and mechanical systems."

The department feels that the students understand this topic and that other topics are more essential for Plumb 130. Therefore, the department recommends not assessing this topic during the next assessment cycle.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to interpret combinations of blueprint drawings, specifications, and submittals specific to the plumbing industry.": 2017/18

The department feels that the students understand this topic and that other topics are more essential for Plumb 131. Therefore, the department recommends not assessing this topic during the next assessment cycle.
1264. Topics in Plumbing [PLUMB-150] belonging to Architecture/Engineering [PLUMB]
1265. Independent Study [PLUMB-298] belonging to Architecture/Engineering [PLUMB]
### Plan for topic "Students completing the course will be able to locate themselves with some discernment and judgment among the assertions and choices in public life."

<table>
<thead>
<tr>
<th>Year</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>2016/17</td>
<td>Overall assessments proved to illustrate student success on this particular Student Learning Outcome. Having used a mixed-method exam allowed for students to grasp content in varying ways. This may have assisted in their applying their understanding when assessed. However, summer 2017 showed higher rates of success. This may be due to the compressed nature of the course. One take away from this may be to assess earlier or often throughout regular semester. One professor indicated with this latest assessment it may be wise to expand on these questions earlier in the semester. In addition, professor also mentions that more emphasis on SLO's to students in beginning may enhance opportunities for their success.</td>
</tr>
</tbody>
</table>

### Plan for topic "Students completing the course will be able to describe the choices of American political values and structures in the context of systems of political thought."

<table>
<thead>
<tr>
<th>Year</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>2013/14</td>
<td>Overall students demonstrated an understanding of the SLO. Stressing this material earlier and reviewing it along the way will increase overall level of mastery and will be addressed in subsequent semesters. There is a serious issue with foreign students lacking the comprehension skills necessary to do well on essay questions. To parse this with the SLO, foreign students do well &quot;describing the choices of American political values&quot;, but continue to have difficulty understanding &quot;the context of systems of political thought.&quot; Foreign students do fine with this, often memorizing slides verbatim. Foreign students consistently have difficulty with applying theory. It is easy for them to slip through the cracks of class discussion and group assignments. We must develop early assignments that can provide feedback, alerting these students to this deficiency; then make sure we guide them through the critical thinking process instead of providing direct answers (that they can once again memorize verbatim) to theory questions that may show up on tests.</td>

DVC Instructional Course SLO Action Plans

1268. Introduction to United States Government [POLSC-121] belonging to Social Science [POLSC]
Plan for topic "Students completing the course will be able to analyze the pathways of public policy formation.": 2016/17

| The assessment indicates substantial overall success. However, student performance was higher during Fall semester. It was also noted by one professor (Spring semester) that most students scoring below the passing threshold were students for whom English was their second language. This indicates early intervention may have a positive effect on these students™ success. It may be advantageous to monitor this finding in future assessments and to devise a means to address if warranted. Tutoring will be considered. This is the first time this outcome was assessed and the first time we have used multiple points to measure student success. Due to the number of instructors and the variety of methods and materials covered, the use of this format was somewhat cumbersome. Subsequent assessment of this outcome will take this into consideration when implementing. Otherwise, we appear to be doing well, with the understanding that we can continually strive to improve. |

Plan for topic "Students completing the course will be able to describe the basic structures and procedures of American government.": 2013/14

| While the assessment indicates substantial overall success, the data demonstrates a correlation between attendance, early success (quiz 1 performance) and subsequent mastery. Early intervention counseling may be helpful and will be stressed in subsequent semesters. |
DVC Instructional Course SLO Action Plans

1271. Introduction to Law and Democracy [POLSC-127] belonging to Social Science [POLSC]

Plan for topic "Students completing this course will be able to provide basic information about the history of law in American society."

<table>

<tbody>
<tr>
<td>Though scores overall are very strong, greater emphasis on the part of the Instructor of the primal significance of key cases accompanied by more studying on the part of student could improve the scores.</td>
</tr>
</tbody>
</table>
Plan for topic "Students completing the course will be able to assess and evaluate the political forces that are likely to shape the agenda and influence California policy choices.": 2017/18

The vast majority of students in both semesters successfully demonstrated comprehension of the material and their ability to achieve the learning outcome. Student success may have benefitted by the fact that the same instructor conducted both assessments and this Outcome factors prominently in a later writing assignment. The reinforcement of the Outcome over the course of the semester was likely influential. As a plan of action it is recommended that instructors scaffold the material over the course of the semester to reinforce student learning. The next assessment cycle will rely on a different method and rubric to measure student success.

Plan for topic "Students completing the course will be able to analyze issues and policy choices in California government."": 2014/15

Faculty have determined that students are able to successfully identify a current policy issue and most are able to determine an appropriate policy response as demonstrated via two assessment methods: in class exam (2012) and final research paper (2014, 2015). More instruction will be given in the future as to evaluating policy choices. For the next assessment cycle a different Assessment topic will be evaluated.

Plan for topic "Students completing the course will be able to analyze issues and policy choices in California government."": 2012/13

The faculty have determined that quiz based assessment needs to be replaced with a written demonstration of comprehension of the learning objective. This will be assessed against a SLO rubric to determine success. The new assessment system will be used during the next SLO cycle.

</tbody>
</table>
1274. Comparative Politics [POLSC-220] belonging to Social Science [POLSC]

Plan for topic "Students completing the course will be able to evaluate the institutional consequences of the adoption of any particular philosophy." : 2016/17

The assessment indicates substantial overall success. However, weaker students exhibited difficulty producing specific examples of the broader points they were making. This indicates a gap in utilizing the material in the assigned readings as evidence. This issue was discussed at our Fall 17 area meeting. Strategies to model the practice and encourage more timely reading were suggested and will be tested beginning Sp 18. Otherwise, we appear to be doing well, with the understanding that we can continually strive to improve.

Plan for topic "Students completing the course will be able to describe the content and origins of several significant world political philosophies." : 2013/14

These results indicate that most students are successful. A trend does appear in that students who struggle in early assessments are more likely to struggle with the final exam. Instructor is making an on-going effort to counsel those students and encourage them to seek additional help in office hours.

Plan for topic "Students completing the course will be able to differentiate the institutional structures which organize political behavior in several different political environments." : 2010/11

First, section 3556 was comprised of a large number of POLSC majors or those who had taken other POLSC courses while the vast majority of students in section 3557 had not taken a POLSC course prior to enrolling in this course. We will continue to monitor student accomplishment.

Plan for topic "Students completing the course will be able to differentiate the institutional structures which organize political behavior in several different political environments." : 2009/10

Results demonstrate the accomplishment of this outcome. We will continue to monitor the outcome and respond to any negative change in success if and when it occurs.
DVC Instructional Course SLO Action Plans

1275. Political Theory [POLSC-240] belonging to Social Science [POLSC]

Plan for topic "Students completing the course will be able to recognize concepts and principles of political thought in the routine operations of political systems.": 2017/18

Students met expectations in political theory. This course is designed to provide foundational inquiry into political philosophies, doing so allowed students to develop their own analysis and critique of thinkers. Faculty teaching this course have noted that international students need more resource and time to developing proper format structure. Perhaps providing more library workshop time and/or having writing center tutorials on formatting would prove useful.

Plan for topic "Students completing the course will be able to compare and contrast various political theories and theorists.": 2014/15

For the next assessment cycle it may be worthwhile to assess in both the Midterm and Final to determine if there is any measurable improvement in student performance within the semester.

Plan for topic "Students completing the course will be able to recognize fundamental political concepts as expressed by major political thinkers.": 2011/12

I will include the same 2 questions in the final exam of Fall 2012, compare the findings, and assess whether the question or the instruction needs to be modified.

Plan for topic "Students completing the course will be able to recognize concepts and principles of political thought in the routine operations of political systems.": 2010/11

This was the first assessment for this course. We will continue to monitor student accomplishment.
1276. International Relations [POLSC-250] belonging to Social Science [POLSC]

Plan for topic "Students completing the course will be able to discuss the principle historical factors, including the development of foreign policy, leading to the present international situation." : 2017/18

This course is designed to provide foundational inquiry into international relations. The curriculum allows students to develop their own analysis and critique of theorists and policy makers. Overall students completing the course met expectations in the theory of International Politics. The great unknown is how the students who leave the course without completing would perform on similar assessments and whether their inability to complete the tasks is the reason for their departure. Faculty teaching this course have noted that international students need more resources and time to developing writing and exam skill.

Plan for topic "Students completing the course will be able to recognize and discuss various elements of power in international relations." : 2014/15

While the assessment indicates that students who persist (to the midterm paper and final respectively) are successful in mastering the objective, the papers indicated a need for additional support for international students and English Language Learners. In future semesters, existing content provided to support issues revealed in those areas of weakness will be delivered in smaller segments and repeated to provide redundancy in instruction.

Plan for topic "Students completing POLSC-250 will be able to analyze major international problems with an understanding of (1) the identification of the actors, (2) the differing past-future linkages of the actors, and (3) the counterbalancing interests of the actors." : 2011/12

While the assessment indicates substantial overall success, the data demonstrates a correlation between early success (quiz 1 performance) and subsequent mastery. Early intervention counseling may be helpful and will be stressed in subsequent semesters.

DVC Instructional Course SLO Action Plans

1281. Psychology in Modern Life [PSYCH-122] belonging to Social Science [PSYCH]
Plan for topic "Students completing this course will be able to define and use basic biological, physiological, and psychological terminology to describe adjustment and psychological development across the lifespan." : 2016/17

This completes the SLO cycle of Psychology 122.

We had some issues with one of Psych122 sections that was taught by a specific PT professor for many years. Through our assessment and evaluation process of the course we learned that the instructor was not teaching the class based on the course outline.

We met with the instructor with our concerns and requested that the teaching of the course was aligned with the SLOs. Unfortunately, the professor would not change the approach to teaching the class and eventually lost their re-staffing preferences.

The use of SLOs coupled with a greater emphasis of how we evaluate our professors has strengthened our pedagogy and in turn, improved the classroom learning environment for our students.

Plan for topic "Students completing this course will be able to apply psychological principles to develop interpersonal, occupational, and social skills for life-long personal growth." : 2016/17

This completes the SLO cycle of Psychology 122.

We had some issues with one of Psych122 sections that was taught by a specific PT professor for many years. Through our assessment and evaluation process of the course we learned that the instructor was not teaching the class based on the course outline.

We met with the instructor with our concerns and requested that the teaching of the course was aligned with the SLOs. Unfortunately, the professor would not change the approach to teaching the class and eventually lost their re-staffing preferences.
The use of SLOâ€™s coupled with a greater emphasis of how we evaluate our professors has strengthened our pedagogy and in turn, improved the classroom learning environment for our students.

Plan for topic "Students completing the course will be able to analyze the relationship of social processes in everyday life to the basic concepts of psychology."

Because SLO #1 for Psychology 122 that were accessed in FA13 FAILED to meet the 70% criteria, the Psychology area re-access this course in the Fall14. The discussion with the professors teaching the course allowed us to choose items better suited for the measurement of SLO#1. This improved both the measurement and outcome. One note was that a professor teaching the course realized that students were not taking notes on information not written on chalk-board. The professor realized this issue after the assessment and will adjust his teaching approach in the class. This completes the assessment for this course.

Plan for topic "Students completing PSYCH-122 will be able to Explain theories and research in the field of psychology to modern life.":

Because SLO #1 for Psychology 122 that were accessed in FA13 FAILED to meet the 70% criteria, the Psychology area re-access this course in the Fall14. Generally we have been using 2-3 MC questions for each SLO outcome imbedded in quizzes/exams. We are discussing pre/post testing and the use of standardized items for specific courses. The difficulty comes with the SLO outcomes changing every cycle- which means a new set of validated measures would need to be developed every other term for 5-7 courses.

Plan for topic "Students completing PSYCH-130 will be able to Compare theories of motor and perceptual development." : 2014/15

The Psychology area continues to collect SLO data- changing the SLO outcomes every cycle. The Psychology area is in discussion about SLO's and the best methodology to collect accurate data. Generally we have been using 2-3 MC questions for each SLO outcome imbedded in quizzes/exams. We are discussing pre/post testing and the use of standardized items for specific courses. The difficulty comes with the SLO outcomes changing every cycle- which means a new set of validated measures would need to be developed every other term for 5-7 courses.

Plan for topic "Students completing this course will be able to synthesize models of brain functioning into an understanding of the brain as a determinant of behavior and apply this understanding practically." : 2014/15

The Psychology area continues to collect SLO data- changing the SLO outcomes every cycle. The Psychology area is in discussion about SLO's and the best methodology to collect accurate data. Generally we have been using 2-3 MC questions for each SLO outcome imbedded in quizzes/exams. We are discussing pre/post testing and the use of standardized items for specific courses. The difficulty comes with the SLO outcomes changing every cycle- which means a new set of validated measures would need to be developed every other term for 5-7 courses.

Plan for topic "Students completing PSYCH-130 will be able to Explain a basic model of brain functioning." : 2014/15
The Psychology area continues to collect SLO data—changing the SLO outcomes every cycle. The Psychology area is in discussion about SLOs and the best methodology to collect accurate data. Generally we have been using 2-3 MC questions for each SLO outcome imbedded in quizzes/exams. We are discussing pre/post testing and the use of standardized items for specific courses. The difficulty comes with the SLO outcomes changing every cycle—which means a new set of validated measures would need to be developed every other term for 5-7 courses.

Plan for topic "Students completing PSYCH-130 will be able to explain a basic model of brain functioning.": 2013/14

A new set of SLO outcome measures will be implemented for the next assessment cycle.

Plan for topic "Students will be able to demonstrate a fundamental understanding of the brain and its role in such processes as emotions, learning and learning disabilities, development, and social behavior.": 2013/14

A new set of SLO outcome measures will be implemented for the next assessment cycle.

Plan for topic "Students completing this course will be able to synthesize models of brain functioning into an understanding of the brain as a determinant of behavior and apply this understanding practically.": 2013/14

1283. Psychology of African-Americans in a Multicultural Society [PSYCH-140] belonging to Social Science [PSYCH]
Plan for topic "Students completing the course will be able to analyze those factors which are necessary to the creation and development of a psychologically healthy self-image in African Americans.": 2017/18

The "C" letter grade was attained for over 70% of the students enrolled in Psychology 140.

Using multiple methods to access our course SLO's has provided professor's flexibility in the methods they employ to gather data. We are discussing the idea of using mixed-methods to gather SLO data for a single outcome- for example an essay question and a MC question that correlate/converge for a single SLO.

Plan for topic "Students completing the course will be able to examine the psychological nature of prejudice and use the understanding to formulate solutions for prejudice reduction.": 2017/18

A 70% success rate for the 3 MC questions was attained for the students enrolled in Psychology 140.

Using multiple methods to access our course SLO's has provided professor's flexibility in the methods they employ to gather data. We are discussing the idea of using mixed-methods to gather SLO data for a single outcome- for example an essay question and a MC question that correlate/converge for a single SLO.

Plan for topic "Students completing the course will be able to appraise the experiences of African-Americans, as one of the "first minority groups," to subsequent treatment of Latinos/as, Asian Americans, and Native Americans, and how each group has reciprocally changed White, European-American Culture.": 2017/18

This completes the one year SLO cycle for this course. The course will be reassessed based on the next DVC SLO assessment date.
Plan for topic "Students completing the course will be able to compare similarities and differences between Mexican Americans, Cuban Americans, Puerto Rican Americans and others in the Latino collective."

The DVC Psychology Area has still not been able to systematically offer Psychology 141 due to P/T staffing shortages and lack of content expertise. We secured a new P/T faculty member to offer the class in Fall 2019- but had to cancel the class due to low enrollments. We plan to offer psychology 141 again in Fall 2020- the semester we plan to re-assess the course SLO’s.

Plan for topic "Students completing the course will be able to compare similarities and differences between Mexican Americans, Cuban Americans, Puerto Rican Americans and others in the Latino collective."

Psychology has offered 141 only two times in the last three years which has made gathering SLO’s very difficult. Once of my main reasons is finding qualified faculty to teach the 141 class. For three years, we have actively sought qualified faculty to teach the this course via our job P/T job postings with no success.

This term (Fall 2018) our area will be discussing other options for offering Psychology 141 in the near future. We will submit a new SLO plan at the end of the Fall 2018 Term that will outline the SLO plan for 141.

Plan for topic "Students completing the course will be able to analyze those factors which are necessary to the creation and development of a psychologically healthy self-image."

The Psychology area continues to collect SLO data- changing the SLO outcomes every cycle. The Psychology area is in discussion about SLO’s and the best methodology to collect accurate data. ## Plan for topic "Students completing the course will be able to compare similarities and differences between Mexican Americans, Cuban Americans, Puerto Rican Americans and others in the Latino collective."

- **2011/12**
  - The instructors for the course will met to develop and intervention to improve the success rate for SLO #2. We will reassess the SLO in Fall 2012.

### Plan for topic "Students completing the course will be able to analyze those factors which are necessary to the creation and development of a psychologically healthy self-image."

- **2011/12**
  - The instructors for the course will met to develop and intervention to improve the success rate for SLO #2. We will reassess the SLO in Fall 2012.

### Plan for topic "Students completing the course will be able to analyze the psychological nature of prejudice, and use this understanding to formulate solutions for prejudice reduction."

- **2011/12**
  - The instructors for the course will met to develop and intervention to improve the success rate for SLO #2. We will reassess the SLO in Fall 2012.
DVC Instructional Course SLO Action Plans

1285. Critical Thinking in Psychology [PSYCH-145] belonging to Social Science [PSYCH]
Plan for topic "Students in this course will be able to prepare well-organized and supported written arguments advocating ideas and positions.": 2016/17

This completes the Fall 2017 Assessment of Psychology 145.

For SP18- The Psychology Area is working on re-organizing the content of the course. We have been encouraging the class to be more presentation/discussion versus lecture based- which we are realizing is difficult for some teachers who have never taught a non-lecture style course.

We would like to develop a series of debate topics and writing assignments supported by content and class activities that can be used across all sections of Psychology 145.

We believe that these tools will help standardize the content and approach to the course and provide both students and professors more structure and greater accessibility to the content.

Plan for topic "Students completing PSYCH-145 will be able to Prepare well-organized and supported written arguments advocating ideas and positions.": 2016/17

Plan for topic "Students completing the course will be able to utilize critical thinking skills to analyze, evaluate, and make decisions regarding complex contemporary issues in psychology.":: 2013/14

Although the assessed course met the assessment criteria, it was only 1 of 3 sections of Psychology 145. Two of the three Psychology 145 faculty members were still in their first year of teaching classes at DVC and had little or no exposure to developing, implementing and evaluating SLOs. For this reason, the Psychology Area will reassess Psychology 145 in the FA14/SP15 academic year in order to achieve a larger course section sample along with better SLO support/instruction for the new faculty.

Plan for topic "Students completing PSYCH-145 will be able to Evaluate the quality of evidence used to support a claim, including statistical evidence, controlled studies and expert testimony.":: 2013/14

This completes the second year SLO cycle of Psychology 145. An important issue to note is the ability to critically evaluate evidence is a skill set that has to be continuously developed. For Psychology, the scientific method is the emphasis in many courses but is usually taught as a lecture(s) and not continuous across the semester (except for Psych 215- research methods). When considering Psych 145 and the results from the two sections that did not meet the assessment criteria, as an area we will have to consider how to best develop and implement “evaluation” skills across the semester.

Plan for topic "Students completing PSYCH-145 will be able to Identify errors in reasoning.": 2010/11

This completes the second year SLO cycle of Psychology 145.

Plan for topic "Students completing the course will be able to utilize critical thinking skills to analyze, evaluate, and make decisions regarding complex contemporary issues in psychology.": 2009/10

For the Fall 2009 semester, the results were satisfactory for SLO outcome #1. The same SLO outcome will be administered again for the Spring 2010 Semester.

Plan for topic "Students completing the course will be able to utilize critical thinking skills to analyze, evaluate, and make decisions regarding complex contemporary issues in psychology.": 2009/10

For the Fall 2009 semester, the results were satisfactory for SLO outcome #1. The same SLO outcome will be administered again for the Spring 2010 Semester.

Plan for topic "Students completing PSYCH-145 will be able to Evaluate the quality of evidence used to support a claim, including statistical evidence, controlled studies and expert testimony.": 2009/10

For the Fall 2009 semester, the results were satisfactory for SLO outcome #1. The same SLO outcome will be administered again for the Spring 2010 Semester.

Plan for topic "Students completing PSYCH-145 will be able to Identify errors in reasoning.": 2009/10

For the Fall 2009 semester, the results were satisfactory for SLO outcome #2. The same SLO outcome will be administered again for the Spring 2010 Semester.

Plan for topic "Students in this course will be able to evaluate the quality of evidence used to support a claim, including statistical evidence, controlled studies, and expert testimony.": 2009/10

For the Fall 2009 semester, the results were satisfactory for SLO outcome #2. The same SLO outcome will be administered again for the Spring 2010 Semester.

Plan for topic "Students in this course will be able to prepare well-organized and supported written arguments advocating ideas and positions.": 2009/10

This completes the second year SLO cycle of Psychology 145.

Plan for topic "Students completing PSYCH-145 will be able to Prepare well-organized and supported written arguments advocating ideas and positions.": 2009/10

This completes the second year SLO cycle of Psychology 145.
Plan for topic "Students completing 155D will be able to..."

1. have several working definitions of consciousness.

2. understand the states, levels, types, functions, and purposes of consciousness.

3. understand the purpose that dreams and dreaming play in our lives.

4. have a basic understanding of various approaches to dream analysis, and begin to be capable of analyzing their personal dreams."

Psychology 155 has not been offered since 2011. The class had been traditionally offered for "experimental" classes. Due to the development and alignment with the State's CID system, we have not offered courses that meet this criteria for 8 years. We seek guidance on whether this class should be removed from our course offerings and assessment schedule.

Plan for topic "Students completing 155D will be able to..."

1. have several working definitions of consciousness.

2. understand the states, levels, types, functions, and purposes of consciousness.

3. understand the purpose that dreams and dreaming play in our lives.

4. have a basic understanding of various approaches to dream analysis, and begin to be capable of analyzing their personal dreams."

Psychology 155 is a topics course and is not offered regularly in our area. The next time the course is offered, the plan will be to develop specific SLO's for the experimental course and measure the students success rate. As of right now (~ May 2015, SP16)- there are no plans to offer a Psychology 155 class in the near future.
1. have several working definitions of consciousness.

2. understand the states, levels, types, functions, and purposes of consciousness.

3. understand the purpose that dreams and dreaming play in our lives.

4. have a basic understanding of various approaches to dream analysis, and begin to be capable of analyzing their personal dreams."

For the Fall 2009 semester, the results were satisfactory for SLO outcome #3. The same SLO outcome will be administered again for the Spring 2010 Semester.
Plan for topic "Students completing PSYCH-160 will be able to Compare and contrast theories of gender development": 2018/19

As with previous assessments, Psychology 160 has been very easy to gather SLO data. This year, we had one of our new PT professor to assess the class SLOâ€™s. This allowed the Area to provide both training/information on gathering SLOâ€™s and ways to assess them to our new PT faculty member.

Our area continues to have discussions on both the name and outcomes for this course. Some faculty feel that thee class would attract more male students as a Psychology of "Gender" class (a more modern name). â€“Genderâ€• and not just women are typically covered in the class.

Plan for topic "Students completing PSYCH-160 will be able to Identify social, cultural, and physiological factors in gender identity formation and gender-related behavior.": 2018/19

As with previous assessments, Psychology 160 has been very easy to gather SLO data. This year, we had one of our new PT professor to assess the class SLOâ€™s. This allowed the Area to provide both training/information on gathering SLOâ€™s and ways to assess them to our new PT faculty member.

Plan for topic "Students completing PSYCH-160 will be able to Demonstrate knowledge of research findings in gender studies in psychology such as motivation, perception, learning, interpersonal relations, communication, and cognitive processes.": 2018/19

As with previous assessments, Psychology 160 has been very easy to gather SLO data. This year, we had one of our new PT professor to assess the class SLOâ€™s. This allowed the Area to provide both training/information on gathering SLOâ€™s and ways to assess them to our new PT faculty member.

Our area continues to have discussions on both the name and outcomes for this course. Some faculty feel that thee class would attract more male students as a Psychology of "Gender" class (a more modern name). â€“Genderâ€• and not just women are typically covered in the class.
This completes the second year SLO cycle of Psychology 160. Generally, Psychology 160 has been very easy to gather SLO data, since the two professors who typically teach 2 or more sections per term have experience with gathering SLO's in other Psychology courses (Hartshorn and Burnaford).

The area has been having discussions on both the name and outcomes for this course. Some feel that the class would attract more male students as a Psychology of “Gender” class (a more modern name). Gender and not just women are typically covered in the class.

Looking at the CID for the course this term showed that the official course outline is still framed as a “women” class. The psychology area has tabled the discussion for SP17 where we will consider alternatives to offering a more inclusive course.

*** With the many innovative pedagogy approaches being used in our classes, it would be good to discuss other ways to measure SLO’s beyond MC questions and essay rubrics. For instance- in a dance class/drama class- how do professor’s measure their course outcomes? This info may allow other departments/areas/programs to increase the methods they could use to collect SLO data.

Plan for topic "Students completing the course will be able to compare and contrast theories of gender development.": 2015/16

This completes the second year SLO cycle of Psychology 160. Generally, Psychology 160 has been very easy to gather SLO data, since the two professors who typically teach 2 or more sections per term have past experience with SLO's in other Psychology courses (Hartshorn and Burnaford).
The area has been having discussions on both the name and outcomes for this course. Some feel that the class would attract more male students as a Psychology of “Gender” class (a more modern name). Gender and not just women are typically covered in the class.

Plan for topic "Students completing the course will be able to explain the unique aspects of human growth and development during the adolescent period.": 2017/18

For Fall 2017, SLO #1 did not meet the 70% criteria for success.

The SLO coordinator (Akiyama) met with our Psychology 190 Professor (Idelson) and discussed the findings as well as other pedagogy approaches used to teach SLO #1.

Data for SLO #1 & #3 again in SP18- For the Spring 2018 semester, the 70% cumulative criteria was for Psychology 190 SLOâ€™s #1

Results for SLO #1- Spring 2018

SLO #1- Item #1 = 83% Success
SLO #1- Item #2 = 80.5% Success

Psychology 190 will be reassessed based on the SLO data cycle.

Plan for topic "Students completing the course will be able to define and analyze the basic concepts of psychology that contribute to a fuller understanding of human behavior generally and adolescent behavior specifically.": 2017/18

For Fall 2017, SLO #3 did meet the 70% criteria for success.
We did gather data on SLO #1 in SP18- with the same professor and same items used this term.

The re-assessment of SLO #1 using the same items results in meeting the 70% standard.

We will reassess new SLO's for Psychology 190 based on the SLO's Calendar.

Plan for topic "Students completing the course will be able to explain the unique aspects of human growth and development during the adolescent period." : 2014/15

The Psychology area continues to collect SLO data- changing the SLO outcomes every cycle. The Psychology area is in discussion about SLO's Ts and the best methodology to collect accurate data. Generally we have been using 2-3 MC questions for each SLO outcome imbedded in quizzes/exams. We are discussing pre/post testing and the use of standardized items for specific courses. The difficulty comes with the SLO outcomes changing every cycle- which means a new set of validated measures would need to be developed every other term for 5-7 courses.

Plan for topic "Students completing the course will be able to explain the process nature of human development, the antecedents of the adolescent period, as well as specific problem areas of this period as identified by our society." : 2014/15

### Plan for topic "Students completing the course will be able to explain the unique aspects of human growth and development during the adolescent period."
- 2010/11

Because the Psych 190 course is a single section - the area plans to meet with the part-time professor to discuss ways to improve the pedagogy approach to outcome #1. Once an agreed upon approach has been developed - the same SLO measure will be administered and analyzed for Fall 2011/Spring 2012.

### Plan for topic "Students completing the course will be able to explain the process nature of human development, the antecedents of the adolescent period, as well as specific problem areas of this period as identified by our society."
- 2010/11

A new SLO outcome measure will be developed and implemented for the Fall 2011/Spring 2012 semester.

### Plan for topic "Students completing the course will be able to define and analyze the basic concepts of psychology that contribute to a fuller understanding of human behavior generally and adolescent behavior specifically."
- 2010/11

A new SLO outcome measure will be developed and implemented for the Fall 2011/Spring 2012 semester.
1289. Psychology of Adult Development and Aging [PSYCH-195] belonging to Social Science [PSYCH]
Plan for topic "Students completing PSYCH-200 will be able to Apply lifespan principles to personal experience.": 2018/19

Psychology 200 is one of our most highly demanded classes by our students. Much of this popularity is due to its prerequisite status for many nursing programs.

With the recent retirements of Professor’s Hartshorn and Fournier, we have not been able to offer online/Hybrid sections of the course. Dr. Burnaford is now teaching a majority of the sections of Psychology 200 and is also developing an online version of her class.

In order to sustain the high quality of teaching offered to our students, the Psychology Area will be submitting a Box 2A for Fall 2019 and we hope to gain another (2) FT faculty due to the loss of a total of (3) FT faculty in two years.

Plan for topic "Students completing this course will be able to examine the nature of change over the lifespan.": 2018/19

Psychology 200 is one of our most highly demanded classes by our students. Much of this popularity is due to its prerequisite status for many nursing programs.

With the recent retirements of Professor’s Hartshorn and Fournier, we have not been able to offer online/Hybrid sections of the course. Our most recent FT hire- Dr. Burnaford is now teaching a majority of the sections of Psychology 200 and is also developing an online version of her class.

In order to sustain the high quality of teaching offered to our students, the Psychology Area will be submitting a Box 2A for Fall 2019 and we hope to gain another (2) FT faculty due to the loss of a total of (3) FT faculty in two years.

Plan for topic "Students completing this course will be able to discuss the influence of technology on experience and development.":
Psychology 200 is one of our most highly demanded classes by our students.

With the recent retirements of Professorâ€™s Hartshorn and Fournier, we have not been able to offer online/Hybrid sections of the course. Our most recent FT hire- Dr. Burnaford is now teaching a majority of the sections of Psychology 200 and is also developing an online version of her class.

The Psychology Area will be submitting a Box 2A for Fall 2019 and we hope to gain another (2) FT faculty due to the loss of a total of (3) FT faculty in two years.

Plan for topic "Students completing the course will be able to outline the stages of development throughout the lifespan according to major theorists such as Piaget, Erikson, Vygotsky, and Gillian.": 2016/17

This completes the SLO cycle of Psychology 200.

SLOâ€™s online and face to face found no significant differences in success rates.

One interesting results was for SLO #2: Which of the following is consistent with the proximodistal trend of body growth? 200-1601: 46/73 63% correct; 200-5165: 20/33 61% correct.

We found that both F2F and Online students had low success rates for this item.
Our plan is to discuss these findings with the Professor and determine if thereâ€™s a need to develop more activities around the topic of Proximodistal growth or if the finding are a confound with the wording of the MC item. If we find that there needs to be emphasis on this topic â€“ we will assist in the professor in developing additional resources around the topic.

Plan for topic "Students completing this course will be able to describe the sequences of physical, social, and cognitive development across the lifespan, using the constructs and conceptual framework provided by psychological perspectives.": 2016/17

This completes the SLO cycle of Psychology 200.

Plan for topic "Students completing PSYCH-215 will be able to identify a researchable topic that can be supported by the appropriate literature." : 2016/17

This completes the SLO cycle of Psychology 215.

Our psychology 215 course is typically the last course requirement that students take for our Psychology AA-T degree. With Math 142/Bus 240 Statistics as the prerequisite course for taking Psych 215- we have been concerned that statistics could be a road-block to our students completing our degree.

With this road-block in mind, we will be offering Psychology 214 (Psych Stats) in Fall 2018. Our plan is to eventually have cohorts of students taking our Psych214/215 classes- which should not only increase the numbers of students who obtain out SLO criteria but also the number of degrees we award each academic year.

Plan for topic "Students completing this course will be able to describe the basic characteristics of the scientific method." : 2016/17

There is a continued discussion if whether the Psychology Area would like to move back to standardized MC items across all assessed courses.

We also discussed having ALL MC SLO items be reviewed before employment as a general policy for our area. This would help in ensuring reliable and valid questions were being employed to measure the SLO outcomes. This practice would also help ensure alignment between MC items and course outcomes.

The 220 course will be reassessed based on the next DVC SLO assessment date.

Plan for topic "Students completing the course will be able to compare and apply theories used to explain behavior and mental processes.": 2015/16

This completes the SLO cycle for this course. There were some difficulties coordinating the SLO's with a new PT instructor. Although the three sections that were assessed employed different MC questions to measure the indicated outcomes- After reviewing all the items, questions seemed highly correlated with the intended course outcomes for 2 of the 3 sections assessed.

One section of 220 (section) employed two MC items that did not correlate well with outcomes #2 & #3. A meeting between the SLO coordinator and professor was scheduled and during the meeting it was agreed that the professor submit the MC items before measurement the next time he/she collects SLO data.

There was discussion in FA16 whether the Psych Area wanted to return to using standardized MC items across all assessed courses. We also discussed having ALL new SLO items be reviewed before employment as a general policy. This would help ensure alignment between MC items and course outcomes. We tabled the conversation for SP17.
The 220 course will be reassessed based on the next DVC SLO assessment date.

Plan for topic "Students completing the course will be able to articulate and evaluate the source, context, strengths, and limitations of various personality theorists.": 2015/16

1294. Social Psychology [PSYCH-225] belonging to Social Science [PSYCH]

Plan for topic "Students completing the course will be able to evaluate the applicability of social-psychological research to everyday life experiences.": 2016/17

This completes the SLO cycle of Psychology 225.

This course is taught by 3 FT faculty who have strong interest and training in Social Psychology. Although each professor approaches the course in slightly different ways, the grounding of materials in real world examples and the use of instructional aides (videos and in class assignments) coupled with the high level of expertise on the topic provides students with an excellent learning environment.

We have no plans in the future to change how we gather SLO's for this course.

Plan for topic "Students completing PSYCH-225 will utilize social psychology to uncover the common fallacies and misconceptions in human behavior.": 2016/17

This completes the SLO cycle of Psychology 225.

This course is taught by 3 FT faculty who have strong interest and training in Social Psychology. Although each professor approaches the course in slightly different ways, the grounding of materials in real world examples and the use of instructional aides (videos and in class assignments) coupled with the high level of expertise on the topic provides students with an excellent learning environment.

We have no plans in the future to change how we gather SLO's for this course.

Plan for topic "Students completing PSYCH-225 will be able to Critically evaluate social-psychological theories based upon current research evidence.": 2014/15

This completes the SLO cycle for Psychology 225. The course will be reassessed based on the next scheduled DVC SLO assessment cycle.

Plan for topic "Students completing PSYCH-225 will utilize social psychology to uncover the common fallacies and misconceptions in human behavior.": 2014/15

DVC Instructional Course SLO Action Plans

1295. Abnormal Psychology [PSYCH-230] belonging to Social Science [PSYCH]

Plan for topic "Students completing the course will be able to recognize how symptoms, treatments, and causes of abnormality vary across differing human populations and contextual situations, thus respecting human diversity and the complexity of human functioning." 2016/17

This completes the SLO cycle of Psychology 230.

Typically, this course is taught by 2 FT faculty who have a strong background in Abnormal Psychology. Although each professor approaches the course in slightly different approaches, the grounding of materials in real world examples and the use of instructional aides (videos and in class assignments) coupled with the high level of expertise on the topic provides students with an excellent learning environment.

There are no plans in the future to change how we gather SLOâ€™s for this course.

Plan for topic "Students completing this course will be able to define and use basic biological and psychological terminology to describe psychopathology and atypical behavior and mental processes." 2016/17

Define and use basic biological and psychological terminology to describe psychopathology and atypical behavior and mental processes.

Plan for topic "Students completing the course will be able to use the major perspectives of psychology (examples: behavioral, biological, cognitive, existential, psychoanalytic/dynamic) to explain the causes of abnormal behavior." 2014/15

The Psychology area continues to collect SLO data- changing the SLO outcomes every cycle. The Psychology area is in discussion about SLOâ€™Ts and the best methodology to collect accurate data. Generally we have been using 2-3 MC questions for each SLO outcome imbedded in quizzes/exams. We are discussing pre/post testing and the use of standardized items for specific courses. The difficulty comes with the SLO outcomes changing every cycle- which means a new set of validated measures would need to be developed every other term for 5-7 courses.

1296. Transpersonal Psychology [PSYCH-240] belonging to Social Science [PSYCH]
Plan for topic "Students completing the course will be able to recognize theoretical assumptions about consciousness from a variety of approaches": 2018/19

The professor for Psychology 240 (Dr. Ray Faulkenberry) is well known to use very effective non-traditional teaching methods in class. There was some concern about how to measure the course outcomes based on the non-traditional approaches being deployed in the class. After a few informal discussions about data gathering methods- we agreed that an essay formatted SLO assessment aligned best with the professor's teaching methodologies.

As discussed in the previous assessment of Psychology 240- With the many innovative pedagogy approaches being used in our classes, it would be good to discuss other ways to measure Psychology 240 SLO's beyond MC questions and essay rubrics.

Plan for topic "Students completing the course will be able to assess the effect of personal beliefs on everyday life.": 2018/19

The professor for Psychology 240 (Dr. Ray Faulkenberry) is well known to use very effective non-traditional teaching methods in class. Continue to do in class appraisal discussions using local MLS, public records from the county assessor's office and real appraisal examples
### 1303. Legal Aspects of Real Estate [RE-161] belonging to Business Administration [RE]

#### Plan for topic "Students completing the course will be able to identify legal aspects of real estate ownership and transactions."

- **2016/17**: Lecturing without engaging students in case studies of the issue surrounding legal aspects of transactions yields poor outcomes on testing. Retesting on issues that were introduced in this way improves scores and outcomes. But, in coming semesters we will engage in more "classroom flipping" strategies that, we expect, will yield much higher scores by (we hope) a higher percentage of test takers.

- **2013/14**: In future students will be reminded via D2L email of quiz deadlines so they will not have points deducted for missing or late quizzes.

#### Plan for topic "Students completing the course will be able to recognize and avoid legal problems."

- **2013/14**: In future students will be reminded via D2L email of the due date for the assignment and they will be directed toward the chapters in the textbook that address some examples of laws that assist the practitioner in avoiding problems for their clients and themselves. This should increase the percentage of students participating in the assigned discussions who will earn a score of 70% or higher.

#### Plan for topic "Students completing the course will be able to define legal responsibilities and liabilities of real estate licensees."

- **2013/14**: In future D2L email will be used to remind students of due dates for the discussion and quiz deadlines. This should increase percentage of students participation in the discussions and decrease number of students having points deducted for missing or late quizzes.

#### Plan for topic "Students completing RE-161 will be able to Students completing RE-161 will be able to satisfy the law course prerequisite for the real estate broker’s license"

- **2013/14**: In future will use D2L email to remind students of the quiz deadlines so students will not have points deducted for missing or late quizzes.

#### Plan for topic "Students completing the course will be able to apply techniques for the preparation of real estate transaction and transfer documents."

- **2013/14**: In future remind students via D2L email of the quiz deadlines. This should increase the scores of students because fewer students will have points deducted for missing or late quizzes.

#### Plan for topic "Students completing the course will be able to recognize and avoid legal problems."

- **2009/10**: In the future we will use the WebCT mail feature to remind students of the due date for the assigned discussion and point them toward the chapters in the textbook that address some examples of laws that assist the practitioner in avoiding problems for their clients and themselves. This should increase the percentage of students participating in the assigned discussions who will earn a score of 70% or higher.
Plan for topic "Students completing the course will be able to diagram the various steps of the appraisal process.": 2019/20

85% (17 out of 20 students) enrolled took the mid-term exam. Instructor will identify and concentrate on the course elements exposed by exam where students needed more reinforcement along with enhanced checking for comprehension during class discussions.

Plan for topic "Students completing the course will be able to relate real estate history, principles, finance, macro and microeconomics, construction, real estate development and related fields to solve valuation problems.": 2019/20

85% (17 of 20) of students took the final exam. Instructor will identify and concentrate on the course elements exposed by the exam where students needed more reinforcement in the future.

Plan for topic "Students completing the course will be able to complete an appraisal form or narrative.": 2019/20

Continue to discuss preparation of the demonstration appraisal in-class and answer student inquiries via email or teleconference. Students are supplied with appraisal examples, MLS data, public records from the county assessor's office, and the appraisal forms for students who do not have a laptop or computer access.

Plan for topic "Students completing the course will be able to diagram the various steps of the appraisal process.": 2015/16

100% of students enrolled took the mid-term exam. Instructor will identify and concentrate on the course elements exposed by the exam where students needed more reinforcement along with enhanced checking for comprehension during class discussions.

Plan for topic "Students completing the course will be able to complete an appraisal form or narrative.": 2015/16

Continue to discuss preparation of the demonstration appraisal in-class and answer student inquiries via email or telephone. Students are supplied with appraisal examples, MLS data, public records from the county assessor’s office and appraisal forms for those who do not have a laptop or computer access.

Plan for topic "Students completing the course will be able to estimate a property's value based on sound theoretical principles of appraisal.": 2011/12

There were 34 students enrolled in the course. 23 of 34 (68%) of the students enrolled in the course achieved a score of 70 or higher on the paper. Next time the instructor will spend more classroom time discussing the secondary market to encourage more students to write this paper.

Plan for topic "Students completing the course will be able to complete an appraisal form or narrative.": 2010/11

Continue to do in-class appraisal discussions using local MLS, public records from the county assessor’s office and real appraisal examples.
DVC Instructional Course SLO Action Plans

1305. Real Estate Practice [RE-163] belonging to Business Administration [RE]

Plan for topic "The Title V course objectives serve as student learning outcomes for this course. The SLO being evaluated this round is:

Students completing the course will be able to analyze and identify salesman/broker relationships." : 2019/20

Dept. Chair will assess SP20 sections and submit by 6/1/20 - posted by SLO Chair

Plan for topic "Students completing the course will be able to analyze and identify salesman/broker relationships." : 2019/20

Dept. Chair will assess SP20 sections and submit by 6/1/20 - posted by SLO Chair

Plan for topic "Students completing this course will be able to learn and understand the various California Statutory Mandatory Disclosures governing the sale of real estate residential properties for 1-4 units, in line with SLO [B]" : 2019/20

The level of learning is higher when class discussions and case exampples are given relevant to lecture topic at hand. Encourage participation through regular class attendance. Note: students learning results are typically lower to failing when they miss class or show very little interest. Invite guest speakers from different fields within RE community to giude students in their career choices. Include more visual aids, especially to illustrate various forms or examples. Provide students more handouts for class overview. Conduct field trip in lieu of class time to walk students through a Visual Inspection Project

Plan for topic "Students completing this course will be able to perform and complete a real estate purchase offer agreement and compliance with the agency confirmation for single family residence 1-4 unit properties. in line with SLO [E]" : 2015/16

While the success rate of individual students completing this project is encouraging, next semester, I plan to divide the class into small groups and making this a group project. I expect that this will encourage student success further and improve cohesiveness and teamwork. Share in their understanding of the subject matter and team work are essential soft skills in the practice of real estate.

Plan for topic "Students completing this course will be able to learn and understand the various California Statutory Mandatory Disclosures governing the sale of real estate residential properties for 1-4 units, in line with SLO [B]" : 2015/16

Should time permit and if our Division would allow, a field trip with the class to visit a vacant property to conduct a visual inspection project may prove beneficial. This will allow discussion and comparison of individual observations, as required by law in disclosing material facts.

Plan for topic "The Title V course objectives serve as student learning outcomes for this course. The SLO being evaluated this round is:

Students completing the course will be able to Identify and complete standard and required disclosure forms" : 2012/13

The faculty has determined that the current SLO assessments are sufficient and will further develop more hands on projects so the students can have a better understanding of...
Plan for topic "Students completing the course will be able to identify and complete standard and required disclosure forms." : 2012/13

The faculty has determined that the current SLO assessments are sufficient and will further develop more hands on projects so the students can have a better understanding of these topics and at the same time have the experience of completing them as what is required in the industry.

Plan for topic "The Title V course objectives serve as student learning outcomes for this course. The SLO being evaluated this round is:

Students completing the course will be able to identify and complete standard and required disclosure forms": 2011/12

The faculty has determined that the current SLO assessments are sufficient

Plan for topic "Students completing the course will be able to identify and complete standard and required disclosure forms." : 2011/12

The faculty has determined that the current SLO assessments are sufficient

Plan for topic "Students completing the course will be able to describe the practical responsibilities and ethics of a real estate agent." : 2009/10

2011-06-01: No students received totally unacceptable scores.
2012-01-27: We will continue to monitor this SLO for a possible developing trend

Plan for topic "The Title V course objectives serve as student learning outcomes for this course. The SLO being evaluated this round is:

Students completing the course will be able to describe the practical responsibilities and ethics of a real estate agent." : 2009/10

No SLO-related changes are recommended for the Title V course outline or instructional practice.

At the time of a curriculum update for this course, no later than once every five years, the measurement criteria for one of the stated student learning outcomes will be identified, implemented and analyzed. Any recommended changes in the curriculum outline or in instruction will be noted on the e-SLO data site.

### 1306. Real Estate Finance [RE-164] belonging to Business Administration [RE]

#### Plan for topic "Students completing the course will be able to describe the operation of the secondary mortgage market."

<table>
<thead>
<tr>
<th>Year</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>2016/17</td>
<td>6 students did notsubmit their 100 point paper describing the operations of and the players in the secondary market. 3 of those 6 students did complete the course. In the future the instructor will endeavor to encourage all students to complete this assignment by searching for a better video that may make this a more interesting topic.</td>
</tr>
<tr>
<td>2014/15</td>
<td>The current teaching method is very interactive. With a Median score of 83% we can continue teaching this subject in the same way.</td>
</tr>
<tr>
<td>2011/12</td>
<td>There were 34 students enrolled in the course. 23 of 34 (68%) of the students enrolled in the course achieved a score of 70 or higher on the paper. Next time the instructor will spend more classroom time discussing the secondary market to encourage more students to write this paper.</td>
</tr>
<tr>
<td>2009/10</td>
<td>In the future I will spend more class time discussing and explaining the Secondary Market in order to help the remaining students feel more competent to discuss this subject and encourage them to write their paper and submit in in a timely manner. This should increase the percentage of students earning a grade of 70 or higher on the secondary Market paper</td>
</tr>
</tbody>
</table>

#### Plan for topic "Students completing the course will be able to perform calculations regarding real estate loan payments, annual percentage rates APRs, and discount points for buying down interest rates."

<table>
<thead>
<tr>
<th>Year</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>2009/10</td>
<td>We will continue to teach the calculation methods, then assign homework that includes mortgage calculations and then review the calculations in class because that seems to be working well now.</td>
</tr>
</tbody>
</table>
Plan for topic "Students completing the course will be able to account for the impact of legal and regulatory restrictions on real estate markets": 2016/17

Although instructor was pleased that the results met the criteria, this activity covered too much material. Instructor plans on breaking the reading assignments down into 4 or 5 units and having two mid-term exams covering less material for the next offering of this course.

Plan for topic "Students completing RE-165 will be able to #4. apply economic principles in order to discuss, assess or critique the impact and role of government on real estate markets.": 2013/14

It is important to alter the readings for Real Estate Economics to include more economic theory of property rights so that students can understand the various meanings of ownership and rights on goods such as land and its uses.

Plan for topic "Students completing RE-165 will be able to recognize important factors that determine or impact value and return dynamics of commercial real estate": 2013/14

Will reassess in Spring of 2016. This SLO (#2) is key for students in Real Estate Economics. The main purpose of this class is for students to competently assess what factors affect property values--in this case, for commercial property. So the use of the present value model is a constant factor to be reassessed with regularity. Its coverage is so key that we want to ensure our students come out of the class using the spread sheet as a tool that is as intuitive to use as a phone app.

Plan for topic "Students completing RE-165 will be able to Students completing the course will be able to describe some of the impacts of technology and globalization on real estate markets and prices. (#5 follow-up from SP2010 to reassessment in SP2012)"": 2011/12

My expectations that at least 75% of students can read, comprehend, and create-within-a-team, a feasibility study was met. In some cases the students worked â?oharder and longer than they expectedâ?t on this project. More than half felt the assignment was â?overy difficultâ?t. But the learning outcome was met and the course goal is meaningfully improving the knowledge base of students; all agree this gives them a sense of the complexity of a real estate development and how globalization is impacting developments all over the world.

Plan for topic "Students completing the course will be able to describe some of the impacts of technology and globalization on real estate markets and prices.": 2009/10

The activity was very hard for some students, although all students learned a lot from it and their awareness of the complexity of the global mortgage finance system was very enlightening to all. The activity will be simplified a bit in future years (Spring 2012)
1308. Escrow Procedures [RE-166] belonging to Business Administration [RE]
Plan for topic "Students completing the course will be able to pro-rate taxes, figure title insurance, analyze lender's instruction and comply with the same, figure pay offs to existing lenders; figure transfer tax.": 2016/17

Next we will evaluate SLO [D] and hope that creation of these packets of activities serve as a manual that will guide students through these computation processes and job tasks in title companies correctly.

Plan for topic "Students completing the course will be able to create a rough draft of escrow instructions and settlement of funds in a property transfer file based upon parameters given in the transfer agreement." : 2013/14

The next time this course is offered we will submit SLO metrics for one of the five SLO's associated with this course.
### Plan for topic "Students completing this course will be able to identify the protected classes under the Federal and California Fair Housing laws": 2017/18

Almost every student submitting paper exceeded the criteria. Action needed is to motivate more students to write and submit the paper. As a plan of action the department will encourage instructors to suggest students utilize the library resources, including handouts or presentations/workshops put on by librarians. Most students are working full time with families. Motivations vary according to their circumstance, and time available to devote to the course. This information will be shared with the BUS Area Advisory Board.

### Plan for topic "Students completing the course will be able to demonstrate three methods of determining the value of commercial and multi-family residential properties.": 2014/15

1 student who took the Final exam did not submit the assignment. We could suggest that students who did not submit the assignment on time come to office hours for additional assistance with the accounting process or using Excel to encourage them to submit the assignment.

### Plan for topic "Students completing the course will be able to define and use techniques for the selection of tenants.": 2013/14

We will continue discussing this issue in class in order to maintain students focus on this important point.

### Plan for topic "Students completing the course will be able to demonstrate proficiency in using commonly accepted practices in financial management.": 2013/14

We will more time practicing creating Income Statements an Balance Sheets in the Computer Lab to ascertain that all students will be able to create these statements when requested to do so.

### Plan for topic "Students completing the course will be able to analyze financial data and create periodic reports for property owners in Excel or other spreadsheet format.": 2013/14

We will continue spending several class sessions in the computer lab so all students can improve their monthly reporting skills and continue to earn 70% or more on this assignment.

### Plan for topic "Students completing the course will be able to demonstrate three methods of determining the value of commercial and multi-family residential properties.": 2013/14

We will continue to practice performing valuation assignments and reminding them that it is the property manager's responsibility to maintain the

1310. Advanced Real Estate Studies [RE-201] belonging to Business Administration [RE]
1311. First Term Russian [RUSS-120] belonging to Foreign Language [RUSS]

Plan for topic "Students completing this course will be able to comprehend simple conversations.": 2016/17

Overall, we are satisfied with the results. However, the results have room for improvement. Oral comprehension usually is more difficult for students than the reading comprehension. Our goal is to include more oral comprehension practice in a daily classroom activity and encourage the students to spend more time doing their online assignments.

Plan for topic "Students completing the course will be able to read basic texts in Russian in the Cyrillic alphabet.": 2015/16

We will assess this course SLO and report it in the next cycle.

Plan for topic "Students completing RUSS-120 will be able to read basic texts in Russian in the Cyrillic alphabet, and comprehend basic conversations.": 2015/16

We will assess this course SLO and report it in the next cycle.

Plan for topic "Students completing the course will be able to read basic texts in Russian in the Cyrillic alphabet.": 2012/13

To encourage students to read short texts in Russian at home, and to have them discuss these readings in class and use them as parts of their oral presentations and written compositions.

Plan for topic "Students completing RUSS-120 will be able to read basic texts in Russian in the Cyrillic alphabet, and comprehend basic conversations.": 2012/13

To encourage students to read short texts in Russian at home, and to have them discuss these readings in class and use them as parts of their oral presentations and written compositions.

Plan for topic "Students completing RUSS-120 will be able to write sentences in the present tense.": 2012/13

Continue writing compositions describing the students’ everyday activities, subjects of study, living arrangements, family, etc.

Plan for topic "Students completing RUSS-120 will be able to read basic texts in Russian in the Cyrillic alphabet, and comprehend basic conversations.": 2010/11

Very satisfied with results. We changed the assessment method from online to in-class survey and were able to collect more results. We will continue with the extensive use of language and tutorial labs to support our methods of instruction.

Plan for topic "Students completing the course will be able to read basic texts in Russian in the Cyrillic alphabet.": 2010/11

Most of the students were able to name some contemporary Russian writers and composers and tell something about their work. However, to improve their cultural knowledge, we will encourage students to read stories of contemporary Russian writers and listen to music of contemporary Russian composers and to make oral and written presentations.

Plan for topic "Students completing the course will be able to differentiate between present, past and future tenses.": 2013/14

We are going to standardize the course objectives by language groups in order to unify the criteria for assessment across all sections.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the Russian case system." : 2013/14

We are going to standardize the course objectives by language groups in order to unify the criteria for assessment across all sections. Also, working more with prepositions which often are used in Russian language as indicators of cases. Practicing using different ways while asking the same question, which lead the students to use different cases in their replies. Playing more with different verb-noun combinations to practice using a noun in different cases.

Plan for topic "Students completing the course will be able to demonstrate knowledge of contemporary Russian writers and composers." : 2013/14

We are going to standardize the course objectives by language groups in order to unify the criteria for assessment across all sections. Also, encourage students to read stories of contemporary Russian writers and listen to music of contemporary Russian composers.

Plan for topic "Students completing the course will be able to differentiate between present, past and future tenses." : 2011/12

Even though I am pleased with the results, I hope next year the results will be even better. I will continue using my old techniques, and also I am going to introduce some new exercises.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the Russian case system." : 2011/12

Russian case system is quite complicated. Students did pretty well! I hope next year they will do even better: I already prepared some new exercises.

Plan for topic "Students completing the course will be able to demonstrate knowledge of contemporary Russian writers and composers." : 2011/12

I plan to spend more time introducing to my students some work of contemporary Russian writers and composers.
1313. Topics in Russian [RUSS-150] belonging to Foreign Language [RUSS]
Plan for topic "Students completing the course will be able to demonstrate knowledge of contemporary and historical Russian and Soviet culture."

All students demonstrated knowledge of some events and important figures in Russian and Soviet culture. We will have more oral presentations and discussions about important Russian historical figures, writers, poets and composers in class and encourage students to read Russian literature and watch Russian movies.

Plan for topic "Students completing the course will be able to comprehend intermediate level reading materials such as short stories or articles in magazines and newspapers."

We are going to standardize the course objectives by language groups in order to unify the criteria for assessment across all sections. Also, we will encourage students to read short articles in Russian magazines and newspapers at home, and have them discuss these readings in class and use them as parts of their oral presentations and written compositions.

Plan for topic "Students completing the course will be able to compose sentences using phrases with the future tense."

We are going to standardize the course objectives by language groups in order to unify the criteria for assessment across all sections. Also, write compositions about the students' plans for a coming weekend, holidays, vacations, future summer trips, which require using the future tense. Discussing the students' plans for the future in Russian.

Plan for topic "Students completing the course will be able to demonstrate knowledge of contemporary and historical Russian and Soviet culture."

Continue to provide the instruction, and class environment conducive of this achievement. We consider this a very good result because the grade is based on multiple tests or assessments, not just one.
### 1315. Fourth Term Russian [RUSS-221] belonging to Foreign Language [RUSS]

#### Plan for topic "Students completing the course will be able to demonstrate a high-intermediate fluency in oral expression.": 2016/17

All students demonstrated a high-intermediate fluency in oral expression. We will continue to have students memorize common Russian expressions and short poems and create situations to use them. Also, we will have them practice classroom discussions about common topics: family, work, study, sports more often.

<table>

DVC Instructional Course SLO Action Plans

1316. Student Instructional Assistant [RUSS-299] belonging to Foreign Language [RUSS]
## DVC Instructional Course SLO Action Plans

### 1317. American Sign Language (ASL) I [SIGN-280] belonging to Early Childhood Education [SIGN]

#### Plan for topic "Students completing this course will be able to demonstrate correct hand techniques while SIGNING": 2017/18

As a result of reviewing previous assessments prior to the current assessment cycle, it was decided to create a new rubric to be used among faculty. This lead to more uniformity of information gathering.

The Plan:

As a result of this assessment the faculty plans to provide more practice time (in-class 1:1 and small group). Other individual learning tools, such as videos on CANVAS to show the correct parameters of a sign, are reported as helpful to students and are encouraged. In addition, professors plan to identifying struggling students sooner through more individual contact during class practice times.

When SIGN 280 comes up for curriculum review the plan is for this course’s SLOs to be revised. This course supports the program learning outcomes for the ECE Master Teacher Certificate through student’s demonstration of knowledge in a specialization area. The current plan also includes assessing this SLO during the next SLO cycle.

#### Plan for topic "Students completing the course will be able to demonstrate proficiency in comprehension of American Sign Language for daily living contexts.": 2014/15

Although all courses passed the minimum success rate there was one course that performed lower than the others. Faculty will pay attention to future success rates and see if there is a trend. One instructor recommends more contact with students who are falling behind and to build vocabulary using ostory lines.

#### Plan for topic "Students completing SIGN-280 will be able to demonstrate proficiency in receptive comprehension of American Sign Language for daily living Contexts introducing self, family and activities.": 2014/15

Although all courses passed the minimum success rate there was one course that performed lower than the others. Faculty will pay attention to future success rates and see if there is a trend. One instructor recommends more contact with students who are falling behind and to build vocabulary using ostory lines.

#### Plan for topic "Students completing the course will be able to demonstrate proficiency in expressive ASL grammatical functions for daily living contexts.": 2014/15

More class activities both as a class and in groups enhanced learning. Continue to use a variety of ways to communicate progress with students. Recommendations to new instructor(s); increased use of technology to engage students. Students take a cell phone picture of homework on board. This has increased students communicating with each other who missed class.
### DVC Instructional Course SLO Action Plans

**Plan for topic "Students completing SIGN-280 will be able to demonstrate proficiency in expressive ASL grammatical functions for daily living contexts."**: 2014/15

| More class activities both as a class and in groups enhanced learning. Continue to use a variety of ways to communicate progress with students. Recommendations to new instructor(s); increased use of technology to engage students. Students take a cell phone picture of homework on board. This has increased students communicating with each other who missed class. |

**Plan for topic "Students completing SIGN-280 will be able to demonstrate proficiency in receptive comprehension of American Sign Language for daily living Contexts introducing self, family and activities."**: 2012/13

| The SIGN instructors teach ASL in a circular manner. Each section builds upon the previous one. From the previous plan instructors were to continue to increase communication with students (written; email and announcements in class) to help them take responsibility for class materials and deadlines. They are continuing to do this. The plan is to meet with the SLO dept representative in August 2013 at the c-contract meeting to discuss SLO's in more depth. |

**Plan for topic "Students completing the course will be able to demonstrate proficiency in receptive comprehension of American Sign Language for daily living contexts."**: 2012/13

| The SIGN department continues to have dialogue amongst themselves but the current plan is to meet with the SLO representative in August 2013 to have a more in-depth discussion of the SLO process and how to use SLO's to increase student learning and success. |

**Plan for topic "Students completing the course will be able to demonstrate proficiency in expressive ASL grammatical functions for daily living contexts."**: 2012/13

| The SIGN department continues to have dialogue amongst themselves but the current plan is to meet with the SLO representative in August 2013 to have a more in-depth discussion of the SLO process and how to use SLO's to increase student learning and success. |

**Plan for topic "Students completing SIGN-280 will be able to demonstrate proficiency in expressive ASL grammatical functions for daily living contexts."**: 2012/13

| The instructors are now requiring students to have their deaf event option approved of before they attend if it is different than ones suggested in class. This has enriched the understanding of the deaf culture. As mentioned above the SIGN Instructors will meet with the SLO representative in August of 2013 to discuss the process. |

**Plan for topic "Students completing SIGN-280 will be able to demonstrate proficiency in receptive comprehension of American Sign Language for daily living contexts."**: 2012/13

This has enriched the understanding of the deaf culture. As mentioned above the SIGN Instructors will meet with the SLO representative in August of 2013 to discuss the process. |
This semester the sign department implemented a student information and grade contact sheet which helped students chart their progress. This was done in response to previous SLO results. It was decided to continue with this process.

Plan for topic "Students completing the course will be able to demonstrate proficiency in comprehension of American Sign Language for daily living contexts.": 2010/11

Continued discussion with other members of the Sign department about the SLO process has proven helpful in student learning success and the evaluation of SLO's.

Plan for topic "Students completing SIGN-280 will be able to demonstrate proficiency in expressive ASL grammatical functions for daily living contexts.": 2010/11

It continues to be important to make sure that students understand what constitutes an appropriate “deaf culture” event. A percentage of students did the assignment wrong or attended an event that did not meet the exact criterion for the assignment. This assignment continues to be helpful for building awareness of the deaf culture.

Plan for topic "Students completing the course will be able to demonstrate comprehension of Deaf culture in daily living contexts.": 2010/11

Plan for topic "Students completing SIGN-280 will be able to demonstrate proficiency in receptive comprehension of American Sign Language for daily living Contexts introducing self, family and activities.": 2009/10

Plan for topic "Students completing the course will be able to demonstrate proficiency in expressive ASL grammatical functions for daily living contexts.": 2009/10
Plan for topic "Students completing SIGN-280 will be able to demonstrate proficiency in expressive ASL grammatical functions for daily living contexts.": 2009/10

Email the students that stop coming after the "w" date or are falling behind, more class time for instruction (other foreign languages are 5 hours compared with our 3), a lab for practice, paid tutors. these can be the plans for both class offerings.
1318. American Sign Language (ASL) II [SIGN-281] belonging to Early Childhood Education [SIGN]

Plan for topic "Students completing this course will be able to Incorporate correct facial expressions and body language/ head movements while SIGNING (non-manual behavior).": 2017/18

Review of previous assessment was done prior to current assessment. As a result a new rubric was created to assess this SLO.

The Plan: To maximize the in-class 1:1 and small group practice, the professor plans to assign students to different groups each week to minimize the chatting without signing. In addition, more time will be set aside for practice before the final exam. Attention also needs to be given to students struggling with fingering as a result of learning issues or motor coordination difficulties. When this course comes up for curriculum review the SLOâ€™s will be reviewed and revised as needed. This course supports the program learning outcomes for the ECE Master Teacher Certificate through a studentâ€™s demonstration of knowledge in a specialization area.

Plan for topic "Students completing the course will be able to demonstrate proficiency in comprehension of American Sign Language for daily living contexts": 2014/15

Although these scores are high and acceptable faculty should continue to dialogue with SIGN colleagues about ways to engage students.

Plan for topic "Students completing SIGN-281 will be able to demonstrate proficiency in receptive comprehension of American Sign Language for describing locations, family, homes and office.":: 2014/15

Plan for topic "Students completing the course will be able to demonstrate proficiency in expressive ASL grammatical functions for daily living contexts": 2014/15

Again, these scores are passing. The challenge is finding ways to engage the â??disengagedâ? student. Continue to share ideas when SIGN instructors meet and bi-annual c-contract meetings.

Plan for topic "Students completing SIGN-281 will be able to demonstrate proficiency in expressive ASL grammatical functions for daily living contexts including describing directions and making requests.":: 2014/15

Again, these scores are passing. The challenge is finding ways to engage the â??disengagedâ? student. Continue to share ideas when SIGN instructors meet and bi-annual c-contract meetings.

Plan for topic "Students completing SIGN-281 will be able to demonstrate understanding of deaf culture.":: 2014/15

Unless students have a strong incentive to finish this assignment, they donâ??t do it. Consider trying new ways to engage students in this activity.

Plan for topic "Students completing the course will be able to Demonstrate proficiency in comprehension of American Sign Language in daily living contexts. Describe directions and Identify. Make requests.":: 2014/15

Three sections assessed during Fall, 2013 and included both Pleasant Hill and San Ramon campuses. A total of 100 students were assessed. The SIGN instructors report that they are in communication throughout the semester about their teaching. Some suggestions for increasing student learning were to set up a "buddy" system pairing quick learners with emerging learners. Another was to increase classroom practice of signing directions and requests. The SIGN instructors continue to request and need tutoring for their students. This request has been shared with administration and administration should follow up on this. Also, SIGN instructors recommend that instructional time be increased to be consistent with other foreign languages.

The SIGN instructors report that they are in communication throughout the semester about their teaching. A suggestion to increase student learning is to have students view "real conversations" by the Deaf community from a variety of Deaf-related theme websites. The SIGN instructors continue to request and need tutoring for their students. This request has been shared with administration and administration should follow up on this. Also, SIGN instructors recommend that instructional time be increased to be consistent with other foreign languages. ### 1319. American Sign Language (ASL) III [SIGN-282] belonging to Early Childhood Education [SIGN]

**Plan for topic** "Students completing this course will be able to demonstrate the use of non-manual signals, classifiers, and locatives when engaging in ASL intermediate-level conversations."

*2019/20*

In order to increase learning the action plan is to increase the number of classifier activities in the lesson plan. In addition, the instructors plan to place students into groups to increase peer practicing and learning. Depending upon the success of this plan the instructors may or may not move onto a different SLO next cycle.

**Plan for topic** "Students completing SIGN-282 will be able to demonstrate proficiency in expressive ASL grammatical functions in daily living contexts, including the use of time signs."

*2016/17*

The SLO was met successfully however the SIGN faculty are noticing changes in the student population and recommend some of the following accommodations:

1. Acknowledge individual differences in American Sign Language interactions between classmates.

2. Identify one’s learning style (Student) at the beginning of the semester. During group activities, students are encouraged to try new learning techniques, while accommodating differences among each other.

3. Provide students with strategies that would help them be more successful in learning ASL expressive.

4. Provide more self-evaluation quizzes on a regular basis to promote self-regulate one’s learning.

5. Instructors will modify their testing assessment method to accommodate different learning styles and assist student’s ability to converse in a foreign language. For example: delivering SIGN evaluations over a longer period of time and at a slower pace.

Future possibility: To use computer for students to submit their recording of sign language to their teacher for evaluation purpose and receive a private feedback online. ASL tutors provided by the Tutoring Lab on campus.
This course is taught only by part-time SIGN instructors. They use common assignments and evaluation tools. Through discussion with the ECE Full-time faculty it has been determined that future student learning outcome assessments need to be more specific to more accurately determine student learning. The plan is to have an SLO Campus representative present at the C-contract meeting (fall 2017) to meet with the SIGN instructors in order to clarify and streamline the SLO assessment process. Discussed at the ECE department meeting 4/2017.

Plan for topic "Students completing SIGN-282 will be able to make suggestions, requests, and register complaints.": 2016/17

Plan for topic "Students completing the course will be able to demonstrate proficiency or and comprehension of American Sign Language in daily living contexts. Describe and show locations, family, homes, offices.": 2011/12
After this course was assessed, faculty in the SIGN department discussed the results. What was evident was that students who are not passing the class drop the class before the final project is completed. Therefore, the results are only reflective of students mastering the material. Discussion about retention and how to best assist failing students will continue. The instructor felt the class would benefit from the use of tutors and the addition of a lab time requirement.

Plan for topic "Students completing SIGN-282 will be able to Demonstrate proficiency in describing locations, family, homes and office.": 2011/12

Plan for topic "Students completing this course will be able to accurately describe and show family and locations using accurate ASL Structure, posture/eye contact, classifiers and conceptual accuracy." : 2017/18

As a result of this assessment the professor PLANS to do the following to increase student success. This includes:

1. Reviewing commonly missed SIGNS more during class.
2. To identify and give more assistance to those struggling.
3. And to reassign students to different groups so they can benefit from each other.

The Title V rewrite for SIGN 283 will be done fall, 2018. The additional PLAN is to include the sign instructors in the revisions/updates made to the SIGN 283 course material and course SLOâ€™s. These updates will determine which SLO is assessed during the next cycle.

Plan for topic "Students completing the course will be able to describe and identify items." : 2014/15

According to the results from the rubric assessment, the instructor reports wanting to increase studentâ€™s usage of sign choice and fluency.

To support this, the instructor plans to have the students watch a video showing the comparison of misusing of sign words, and the appropriate sign words, for each particular word.

Plan for topic "Students completing the course will be able to describe weekend activities." : 2014/15

Although all of the students met the SLO criteria, the instructor plans to increase a studentâ€™s use of classifiers (a method to describe the word without using a particular sign) to describe weekend activities. The instructor plans to increase demonstration of ASL adjective modulation for every sign word in order to model appropriate usage. Students will then re-tell their weekend activity with appropriate use of ASL adjective modulation including classifiers.

Plan for topic "Students completing the course will be able to exchange personal information." : 2011/12

Plan is tho continue with current practices. See "plan" for SLO #3, too.

### Plan for topic "Students completing the course will be able to look at their lives within a sociologically informed context."

**2016/17**

Overall we have had success on this measure. We will continue to emphasize the sociological imagination as a fundamental principle in sociology. Going forward, we plan to provide students with more opportunities to apply this concept to issues relevant to their own lives. Given our success on this measure, in future semester we will focus on assessing a new measure, sociological theories, which appears to be an area where our students need deeper comprehension.

### Plan for topic "Students completing the course will be able to demonstrate an understanding of the order and conflict theories, and use them to explain specific social facts."

**2016/17**

Overall, the majority of our students have been successful for this SLO. However, we have noticed that overall success rates are lower on the SLO than on others we have assessed.

**Action plan:** To improve our students’ understanding of these concepts, and their ability to distinguish between the two theories, we plan to utilize some new strategies for teaching these concepts. These include group presentations and class debates which will give students an opportunity to analyze and apply the two theories to current social issues.

### Plan for topic "Students completing the course will be able to look at their lives within a sociologically informed context."

**2013/14**

Action plan: those who were not successful seem to have struggled with note-taking, reading and writing skills. We are adding another assessment to address this.

### Plan for topic "Students completing the course will be able to demonstrate an understanding of the order and conflict theories, and use them to explain specific social facts."

**2012/13**

The students who did not develop this skill almost certainly needed help with reading, writing and note-taking. We have added a new assessment topic to address this for the next cycle.

### Plan for topic "Students completing the course will be able to define and apply sociological concepts correctly."

**2012/13**

Again, much of this problem has to do with note-taking, writing and reading skills, to be addressed through new topic.

### Plan for topic "Students completing SOCIO-120 will be able to identify, explain and provide possible solutions to social problems."

**2012/13**

This no longer seems to be a necessary area for further research, and may be dropped for the next cycle.

### Plan for topic "Students completing the course will be able to look at their lives within a sociologically informed context."

**2010/11**

Continue to monitor student understanding. Met goal, but about 25% students not meeting objective.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to demonstrate an understanding of the order and conflict theories, and use them to explain specific social facts."

- 2010/11
  Will continue to monitor use of these theories by the students.

Plan for topic "Students completing the course will be able to define and apply sociological concepts correctly."

- 2010/11
  Continue to monitor this area in future classes.
# DVC Instructional Course SLO Action Plans

## 1323. Introduction to Social Problems [SOCIO-121] belonging to Social Science [SOCIO]

### Plan for topic "Students will be able to identify and explain the social construction of social problems.": 2016/17

**What worked well:** The sociological understanding of social problems rests heavily on the concept of the social construction. We discuss this concept in some detail before turning to various theoretical perspectives that provide a further context for understanding social problems. Therefore most students understand that the analysis of social problems goes beyond individual pathologies or moralistic arguments and must take into account systemic factors.

**What needs more work:** students need to develop their research skills so that they can feel empowered to dig deeper into local problems. We plan to schedule and plan for exposing students to our library’s resources before they do presentations and write papers.

### Plan for topic "Students will be able to identify and explain the social construction of social problems.": 2013/14

The main finding is that those students who were not successful were those who had difficulty writing a college-level essay (i.e. they had not taken English 122 and most had not been assessed for their writing ability.)

### Plan for topic "Students completing the course will be able to...identify and describe the conflict paradigm perspective.": 2013/14

Soc. 121 students are mostly Sociology majors who have already successfully passed Soc. 120. As a result, these students have very high rates of success and retention. Next year, I will teach the course more intensively to cover more material, and this will require students to learn this material earlier with less support.

### Plan for topic "Students completing the course will be able to investigate and analyze specific efforts to address and solve a social problem.": 2013/14

Plan: based on the results, students in Fall 2014 are holding in-class small group discussions about their progress. These discussions are meant to focus students on the obstacles they are facing and to ask for support from peers and the instructor to address the issue.

### Plan for topic "Students will be able to identify and explain the social construction of social problems.": 2008/9

This assignment seemed to have been successful this semester, and the plan is to continue to use this assignment in the future.

### Plan for topic "Students completing the course will be able to...identify and describe the conflict paradigm perspective.": 2008/9

The results were less than expected. The plan is to present in more detail this view and practice applying the principles in class.
Plan for topic "Students completing the course will be able to compare and contrast the culture of poverty thesis and structural theory of poverty.": 2018/19

Given the importance of understanding the larger social implications of this theory, it would be useful to incorporate a real world or practical application of this theory to further student learning. One way to do this, is to ask students to conduct an interview with someone who is living in poverty or who is currently homeless or facing food insecurity. The students could examine whether this theory is an accurate interpretation of people's real lived experiences, and analyze how people actually go about thinking about poverty, and why it persist in society.

Plan for topic "Students completing the course will be able to evaluate evidence for a given argument.": 2013/14

I plan to expose all students in the classroom to the learning resources available at DVC before they hand in their final term paper. I have developed a detailed prompt for that assignment so that the guidelines are very clear. We have been working on multiple drafts of the term paper in collaborative writing groups so that the final draft of the term paper is of very good quality for all students.

Plan for topic "Students completing the course will be able to construct two positions on a social or cultural issue.": 2013/14

Research on pedagogy and my own experiences in the classroom have taught me that framing social issues in the most accessible way is vital. I will work harder to include all students and make sure that no one feels alienated.

Plan for topic "Students completing the course will be able to use order and conflict theory in sociology to analyze the different perspectives on social issues.": 2013/14

The plan is to further highlight the importance of evaluating academic writing from both perspectives on their strengths and weaknesses. This will give students a chance to see how each perspective can be very valuable when applied logically to understand social phenomena.

Plan for topic "Students completing the course will be able to compare and contrast the culture of poverty thesis and structural theory of poverty.": 2013/14

In the future, I would like to provide more structure to the debate on this issue by dividing students into groups where they are compelled to take a side. They will be assigned readings that will help them make their case. Students will be randomly assigned to a group. This exercise will enable them to grapple with explanations that they may not personally agree with. This will hone their critical thinking skills and deepen their understanding of the main arguments in the existing academic literature.

Plan for topic "Students completing the course will be able to explain the different arguments in favor of or against immigration.": 2013/14

In future classes, I would like to get suggestions from students about the most relevant issues that we would like to explore as a group. I will provide students with the exposure to major debates within the field of immigration and ask them to suggest topics that can be located within that discourse. I would like to include in our curriculum, topics that are most relevant to students at a community college. For instance, how do immigrant students juggle their academic responsibilities with their financial and family responsibilities?
What are the possible repercussions of enacting the DREAM Act? What kinds of resources would enable immigrant students to succeed and should we as a nation be interested in developing this human capital?

Plan for topic "Students completing SOCIO-122 will be able to identify and apply the major theoretical paradigms, functionalist, conflict and interactionist perspectives to analyze social and cultural issues.": 2013/14

Incorporate materials that highlight that functionalism can be a useful (and powerful) methodology to effectively address specific and well-targeted functional problems in society in general, and organizations, in particular.

Plan for topic "Students completing SOCIO-122 will be able to utilize data to study social phenomena.": 2013/14

Small group discussions and partner projects will help students keep each other accountable. The goal is to incorporate more group presentations where students with multiple perspectives are compelled to work together.

Plan for topic "Students completing the course will be able to compare and contrast the culture of poverty thesis and structural theory of poverty.": 2010/11

Continue to monitor question and content.

Plan for topic "Students completing the course will be able to explain the different arguments in favor of or against immigration.": 2010/11

Continue to present material and monitor exams.
1325. Introduction to Social Research [SOCIO-123] belonging to Social Science [SOCIO]

Plan for topic "Students completing the course will be able to Operationalize a social variable.": 2016/17

Mandatory, individual office hours with each student was helpful in making sure that students had a clear picture of how they would be operationalizing their variables for the research proposal.

For the 10% that were not successful, I will have to brainstorm ways of making office hours more accessible by suggesting online and phone communication. I will also have to incorporate more writing workshops during class time so that all students can receive prior feedback before their final project.

Plan for topic "Compare and contrast various methods of data collection, pointing out the benefits and drawbacks of each method.": 2016/17

The comprehensive discussion before the writing of the reflection plays an important role in the success of this exercise.

The 10% that are unsuccessful have invariably not completed the necessary reading or are simply absent for the group discussion. There is a need to create more opportunities to measure whether students can successfully evaluate different methodological approaches.

Plan for topic "Students completing the course will be able to Operationalize a social variable.": 2012/13

An assessment was redone at the end of the semester and all students were able to successfully operationalize a concept.

Plan for topic "Explain the sources of error which can arise in social research.": 2012/13

None Needed. Actual assessment of errors done several times throughout semester.
1326. Gender, Culture, and Society [SOCIO-124] belonging to Social Science [SOCIO]

Plan for topic "Students completing this course will be able to identify and discuss institutional arrangements which stratify society by gender, and examine their impact."

Plan for topic "Students completing this course will be able to identify and discuss institutional arrangements which stratify society by gender, and examine their impact."

Plan for topic "Students completing this course will be able to identify and discuss institutional arrangements which stratify society by gender, and examine their impact."

Plan for topic "Students completing the course will be able to analyze an advertisement and other media content from the viewpoint of feminism."

Plan for topic "Students completing the course will be able to analyze an advertisement and other media content from the viewpoint of feminism."

Plan for topic "Students completing this course will be able to compare and contrast gender roles in U.S. and other societies."

Plan for topic "Students completing this course will be able to compare and contrast gender roles in U.S. and other societies."

Plan for topic "Students completing this course will be able to compare and contrast gender roles in U.S. and other societies."

Plan for topic "Students completing this course will be able to compare and contrast gender roles in U.S. and other societies."

Plan for topic "Students completing this course will be able to compare and contrast gender roles in U.S. and other societies."
Plan for topic "Students completing the course will be able to explain the historical roots of America's different racial and ethnic family systems.": 2016/17

Overall, there was success on this measure. However, given that this topic is one of the most important themes of the course, it is important to achieve success among all students. To do this, more focus will be placed on engaging students in the material and helping them make the connection between their own reality, their family history, and the subject matter. Readings will be assigned that look at slave narratives in order to understand social barriers to forming families, and primary sources will be used to bring life to the discussion of legal barriers. In addition, students will write a paper that gives them the opportunity to analyze their own family history.

Plan for topic "Students completing the course will be able to explain the historical roots of America's different racial and ethnic family systems.": 2011/12

The assessment done with a combination of discussion and exam seems to work well in evaluating this SLO.

Plan for topic "Students completing the course will be able to evaluate and critique research on family life.": 2011/12

Continue to work with students with discussion and written criteria.

1329. Introduction to Race and Ethnicity [SOCIO-135] belonging to Social Science [SOCIO]

Plan for topic "Students completing the course will be able to identify and sociologically analyze a specific barrier to equal opportunity faced by a racial or ethnic group.": 2016/17

1. Distinguishing between prejudice and institutionalized racism is crucial to fully understanding the barriers to equal opportunity faced by specific racial and ethnic groups. In order to see greater success for our students, we would have to use many more contemporary examples during lecture that can help students see the difference. During in-class activities students will be asked to apply the concepts to real life situations so they can learn to apply the theory to the experiences of different racial and ethnic groups.

Plan for topic "Students completing the course will be able to explain specific concepts concerning race and ethnicity and use the concepts correctly when explaining social behavior.": 2016/17

Multiple drafts and well structured writing workshops were very useful for students to get feedback from their peer and the instructor.

Students also did short group presentations on these topics and this gave them a chance to develop passion and curiosity for a particular topic. This created a classroom dynamic where students were open to discussion and feedback.

For the 10% of students that are not successful on this measure I plan to implement early alert systems for the most vulnerable students followed up by intensive office hours.

Plan for topic "Students completing the course will be able to explain order and conflict theories to analyze different position on racial problems.": 2011/12

Continue to focus on theories throughout course and also tutoring services are recommended to achieve a goal of 100%

Plan for topic "Students completing the course will be able to identify and sociologically analyze a specific barrier to equal opportunity faced by a racial or ethnic group.": 2011/12

More work is needed to identify students who failed to turn in papers before due dates.

Plan for topic "Students completing the course will be able to explain specific concepts concerning race and ethnicity and use the concepts correctly when explaining social behavior.": 2011/12

Continue with style of presentation of concepts. No change needed at this time.
DVC Instructional Course SLO Action Plans

1330. Topics in Sociology [SOCIO-155] belonging to Social Science [SOCIO]
1331. Independent Study [SOCIO-298] belonging to Social Science [SOCIO]
Overwhelming we had success on this measure. Students are either: (1) eager to enter the teaching profession or (2) interested in Sociology. Most students express a combination of both. We will continue to utilize Instructional Teaching Assistants to provide both faculty support and student empowerment. We plan to provide students with more opportunities to apply their multiple skillsets and teaching abilities. For future semesters we will focus on assessing a new measure, the establishment of safe/brave spaces for students. An area of improvement would be concentrated weekly meetings to harness student expression and input more frequently.

### Plan for topic "Students completing SOCSC-123 will be able to Analyze the changing interpretations and critiques of American Popular culture." : 2018/19

Overall, the results show that students were highly successful on this SLO measure. This reveals that the instructional techniques used to for this learning outcome are producing positive outcomes. Going forward, other SLO measures will be assessed in order to determine if students are comprehending other key learning outcomes for the course.

### Plan for topic "Students completing SOCSC-123 will be able to Analyze the changing interpretations and critiques of American Popular culture." : 2014/15

For the most part this worked well for this class. The issue of poor student preparation is difficult to address but may be addressed by trying to reach individual students that did not do well and inquire what would help them prepare.

### Plan for topic "Students completing SOCSC-123 will be able to Compare the various kinds of popular culture in the American experience." : 2014/15

This exercise works well for this group of students. It encourages thoughtful consideration of how everyone can demonstrate expertise in popular culture. I would continue to use this exercise because it provides a way of giving students confidence in their understanding of how popular culture changes and a basis critiquing popular culture.
1338. Topics in Social Science [SOCSC-155] belonging to Social Science [SOCSC]
Plan for topic "Students completing the course will be able to examine the significance of gender as a factor in shaping experience and opportunity of American women in the 20th and 21st centuries.": 2018/19

Students were very engaged during the 2 weeks that we focused on issues of women in the labor force. Through the use of historical analysis, documentary films, statistics illustrating the economic issues faced by women throughout history and today, and discussions with students about their own career aspirations, I believe the students were able to develop a multifaceted understanding of the material, leading to a higher level of understanding. I will continue to incorporate multiple ways of presenting this material as it seems to have been quite beneficial. In order to increase success rates even more, I will consider incorporating some empirical work. Perhaps giving the students an opportunity to interview a woman about whether gender has been significant in shaping her work experiences, could bring the topic to light even more.

Plan for topic "Students completing the course will be able to examine the significance of gender as a factor in shaping experience and opportunity of American women in the 20th and 21st centuries.": 2012/13

In reviewing the data the faculty have determined that the SLO was met by the majority of students. The faculty have determined that the current SLO assessments are well developed but would like to make a few adjustments. The faculty determined that they will be more explicit in the outcomes for the assignments used in the assessments. They will provide the students with the expected outcomes at the beginning of the assignment. This process will be reviewed during the next cycle.

Plan for topic "Students completing the course will be able to compare the significance of race, class, sexual orientation, and culture in the differential experiences and opportunities of women in the U.S.": 2012/13

In reviewing the data the faculty have determined that the SLO was met by the majority of students. The faculty have determined that the current SLO assessments are well developed but would like to make a few adjustments. The faculty determined that they will be more explicit in the outcomes for the assignments used in the assessments. They will provide the students with the expected outcomes at the beginning of the assignment. This process will be reviewed during the next cycle.

Plan for topic "Students completing the course will be able to evaluate progress toward political, social, and economic equality for all women": 2012/13

In reviewing the data the faculty have determined that the SLO was met by the majority of students. The faculty have determined that the current SLO assessments are well developed but would like to make a few adjustments. The faculty determined that they will be more explicit in the outcomes for the assignments used in the assessments. They will provide the students with the expected outcomes at the beginning of the assignment. This process will be reviewed during the next cycle.

Plan for topic "Students completing the course will be able to examine the significance of gender as a factor in shaping experience and opportunity of American women in the 20th and 21st centuries.": 2010/11

There needs to be improvement in this area, better success rate is desired. Will continue to monitor how students address and discuss the issues.

Plan for topic "Students completing the course will be able to compare the significance of race, class, sexual orientation, and culture in the differential experiences and opportunities of women in the U.S.": 2010/11
Plan for topic "Students completing the course will be able to evaluate progress toward political, social, and economic equality for all women": 2010/11

While acceptable result, overall there needs to be improvement in this area. Will continue to monitor this objective.

DVC Instructional Course SLO Action Plans

1344. First Term Spanish [SPAN-120] belonging to Foreign Language [SPAN]

Plan for topic "Students completing this course will be able to comprehend basic conversations and basic texts." : 2018/19

Although the results were average, we have noticed some inconsistencies across the Spanish 120 sections. For this reason, as well as the time lapse of the previous literary assessment (2009/2010), the program is actively discussing ways in which reading can be strengthened in and outside the classroom (including a deeper focus on reading strategies, adding more complex readings in assessments, assigning particular reading materials as homework).

Plan for topic "Students completing this course will be able to comprehend basic conversations." : 2015/16

This is the first time all the sections have used the exact same method of assessment. Overall, we are satisfied with the results. However, even though most if not all of the students receiving a low grade are students who did not pass the class, the results have room for improvement.

We are also aware that oral comprehension lags behind the reading comprehension in all classes. Our goal is to continue reinforcing the oral comprehension practice in the classroom and on the online assignments, in all of our sections.

Plan for topic "Students completing this course will be able to communicate in daily situations (ordering a meal, making a reservation, etc.)." : 2012/13

The instructors were very satisfied with the use of the Spanish language by the students in class to express themselves genuinely in daily situations. Continue offering Lab practice and teaching styles.

Plan for topic "Students completing this course will be able to communicate in daily situations (ordering a meal, making a reservation, etc.)." : 2009/10

Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. Plan to expand assessment to all sections to achieve similar results. We are also planning to add direct assessment in the next cycle.

Plan for topic "Students completing this course will be able to comprehend basic conversations and basic texts." : 2009/10

Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. Plan to expand assessment to all sections to achieve similar results. We are also planning to add direct assessment in the next cycle.

Plan for topic "Students completing this course will be able to acquire valuable contemporary information about the Spanish-speaking world." : 2009/10

Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. Plan to expand assessment to all sections to achieve similar results. We are also planning to add direct assessment in the next cycle.
DVC Instructional Course SLO Action Plans

1345. Second Term Spanish [SPAN-121] belonging to Foreign Language [SPAN]

Plan for topic "Students completing this course will be able to comprehend conversations and texts of medium difficulty." : 2018/19

Considering the less than satisfactory results as well as the time lapse of the previous literary assessment (2009/2010), the program will discuss ways in which reading can be strengthened in and outside the classroom (including a deeper focus on reading strategies, adding more complex readings in assessments, assigning particular reading materials as homework). We plan to reassess the same topic during the next cycle in order to compare data and trace any significant changes in student performance. This future analysis will be discussed in future department meetings and flex workshops.

Additionally, since the Spanish 121 online section was not accurately assessed, we will discuss ways to follow up with faculty to ensure completion.

Plan for topic "Students completing this course will be able to comprehend conversations and texts of medium difficulty." : 2015/16

Overall, we are satisfied with the results. However, curiously many of the students who got a 4 or lower, missed the same question on the assessment (#2). After reviewing the question and comparing it to the other questions in the assessment, we realized that the question had a particularly complicated grammatical structure that perhaps some students were less familiar with.

We have discussed in the department some strategies to share with all instructors to make sure sufficient time is spent learning these structures in an oral/listening format. Moreover, we will implement more oral comprehension practice into classroom instruction in order to improve students overall listening skills.

Plan for topic "Students completing this course will be able to acquire the ability to communicate in daily situations, expand the ability to describe situations, tell a story, speak about future plans, etc." : 2012/13

We need to continue doing the assigned listening / speaking lab activities we are doing. More listening and recording activities from the book’s super site can be assigned.

Plan for topic "Students completing this course will be able to apply basic aspects of Spanish grammar and syntax in written and spoken language." : 2012/13

1. Students will need to continue to practice the Laboratory assignments and extra work given during the time of Lab by Arrangement [HBA]. More listening and recording activities from the books super-site can be assigned. 2. The students did well. We should continue to use the web based reading assignments and Computer Lab activities. We can spend more time talking about reading strategies.
### Plan for topic "Students completing this course will be able to acquire the ability to communicate in daily situations, expand the ability to describe situations, tell a story, speak about future plans, etc."": 2009/10

DVC Instructional Course SLO Action Plans

1346. Topics in Spanish [SPAN-150] belonging to Foreign Language [SPAN]
1347. First Term Beginning Conversational Spanish [SPAN-155] belonging to Foreign Language [SPAN]

Plan for topic "Students completing the course will be able to acquire basic vocabulary for travelling situations and for encounters with the Hispanic community here in the United States." : 2016/17

It is important for students to feel comfortable asking and answering questions in a dialog in Spanish without the fear of making mistakes and a lot of hesitation. Natural fluidity will come as they avoid translations and to try to think in the target language. Corrections are made after the students complete their dialogs. Students will improve on the skills and confidence necessary to travel and have simple conversations with native speakers.

Plan for topic "Students completing the course will be able to acquire basic vocabulary for travelling situations and for encounters with the Hispanic community here in the United States." : 2013/14

We are going to standardize the course objectives by language groups in order to unify the criteria for assessment across all sections.

Plan for topic "Students completing the course will be able to read simple paragraphs in the present tense." : 2013/14

We are going to standardize the course objectives by language groups in order to unify the criteria for assessment across all sections.

Plan for topic "Students completing SPAN-155 will be able to comprehend simple conversations in the present tense." : 2013/14

We are going to standardize the course objectives by language groups in order to unify the criteria for assessment across all sections.

Plan for topic "Students completing the course will be able to acquire basic vocabulary for travelling situations and for encounters with the Hispanic community here in the United States." : 2011/12

Continue using same teaching strategies to accomplish similar or even better results. Also, maybe combine SLO #1 and #3 into one, since they seem to describe two aspects of the same outcome.
DVC Instructional Course SLO Action Plans

1348. Second Term Beginning Conversational Spanish [SPAN-156] belonging to Foreign Language [SPAN]
Plan for topic "Students completing the course will be able to converse in basic Spanish using the present, preterit and imperfect tenses.": 2016/17

Action plans should address the following items, at minimum:

To improve speaking skills more activities targeted on speaking.

Make the class setting comfortable for students to speak and not feel uncomfortable.

Give everyone the opportunity to speak in the classroom to get them ready to do a conversation in front of everyone.

Take class time to go over Spanish sounds.

Ask them to record themselves at home reading short paragraphs for pronunciation.

Read with them during office hours to improve pronunciation and targeted language accent.
### DVC Instructional Course SLO Action Plans

Meet with students during office hours to speak Spanish to them informally.

Ask questions to students on the spot to help improvisation and not something memorized.

DVC Instructional Course SLO Action Plans

1350. Third Term Spanish [SPAN-220] belonging to Foreign Language [SPAN]

Plan for topic "Students completing this course will be able to achieve a greater knowledge of Hispanic culture through reading of short stories or magazine articles on Spanish and Latin American life and culture."

WebSLOs had tech issue in regards to this class - SLO & Dept. Chairs will create a SLO Submission schedule for next assessment.

Plan for topic "Students completing this course will be able to refine and improve listening comprehension at an intermediate level."

2015/16

We are satisfied with these results since the reading was complex and sophisticated in both subject and style.

Our teaching method seems to be working well for the students, and at the same level as the reading comprehension.

Although we consider this level of comprehension in the classes high, we certainly would like to improve it closer to a one hundred percent.

We plan to continue teaching the classes entirely in Spanish, emphasizing the oral communication, both understanding and speaking, since it is always the skill that lags behind the written one.

Plan for topic "Students completing this course will be able to achieve a greater knowledge of Hispanic culture through reading of short stories or magazine articles on Spanish and Latin American life and culture."

2012/13

Continue to provide reading comprehension activities, while acquiring a greater knowledge of Spanish and Latin American life and culture.

Plan for topic "Students completing this course will be able to understand intermediate level conversations of daily situations."

Review and work more closely with students in the contextualization of vocabulary and idioms. More assignments in this area in the Computer Lab.

Plan for topic "Students completing this course will be able to achieve a greater knowledge of Hispanic culture through reading of short stories or magazine articles on Spanish and Latin American life and culture."

2011/12

Students showed steady improvement of reading comprehension of authentic materials. We will continue extensive use of authentic materials in the classroom.

Plan for topic "Students completing this course will be able to understand intermediate level conversations of daily situations."

Students' aural skills' progress through the use of this method was very encouraging. We will continue using audio-visual materials in the classroom.

Plan for topic "Students completing this course will be able to achieve a greater knowledge of Hispanic culture through reading of short stories or magazine articles on Spanish and Latin American life and culture."

2009/10

Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. We are planning to add direct

Plan for topic "Students completing this course will be able to Refine and improve listening comprehension at a high-intermediate level.": 2016/17

Results were encouraging and the students’ skills improved compared to the beginning of the semester. We shall continue to employ the strategy of identifying cognates and listening to challenging material as a class. We will adhere the strategy of practicing aloud the material as a class and in small groups to further engage with the language.

Plan for topic "Students completing this course will be able to demonstrate a general command of all aspects of the written and spoken language, both in understanding and expression.": 2013/14

Even though the students did well with this activity, I realize that some legends contain very idiomatic vocabulary and very sophisticated imagery and metaphors. The student population will be better served in the future if I select the legends and distribute them to them.

Plan for topic "Students completing this course will be able to have an expanded command of passive and active vocabulary, with an emphasis on idioms."": 2012/13

Continue with current methods and materials used. Search for anthologies that have useful, interesting, enjoyable in-class activities.

Plan for topic "Students completing this course will be able to use Spanish grammar and syntax, both verbally and in writing including the imperfect and pluperfect subjunctive tenses.": 2012/13

Continue with current methods and materials used. Search for anthologies that have useful, interesting, enjoyable in-class activities.

Plan for topic "Students completing this course will be able to have an expanded command of passive and active vocabulary, with an emphasis on idioms."": 2009/10

Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. Plan to expand assessment to all sections to achieve similar results.

We are also planning to add direct assessment in the next cycle.

### 1352. Fifth Term Spanish [SPAN-230] belonging to Foreign Language [SPAN]

**Plan for topic** "Students completing the course will be able to demonstrate reading comprehension of literary and journalistic writings, including poetry."

*: 2019/20

WebSLOs had tech issue in regards to this class - SLO & Dept. Chairs will create a SLO Submission schedule for next assessment.

**Plan for topic** "Students completing this course will be able to read and demonstrate comprehension and critical thinking of advanced literary and journalistic writings, including poetry."

*: 2015/16

Overall, we are satisfied with the results.

---

We always present literary readings, including poetry, but students, in general tend to feel uncomfortable around poetry.

This showed that they are certainly ready to work into more challenging literary work that should be included in the course offering.

---

Next semester we plan to include more poetry than we did in the past.

**Plan for topic** "Students completing the course will be able to communicate effectively in Spanish while discussing topics of general interest."

*: 2012/13

Continue with current methods and materials used. Search for anthologies that have useful, interesting, enjoyable in-class activities.

**Plan for topic** "Students completing the course will be able to demonstrate reading comprehension of literary and journalistic writings, including poetry."

*: 2010/11

These grades are in my opinion the result of a very rigorous and consistent methodology used in class. I would be happy to get same results every semester the class is taught. My plan includes gathering data for a similar class taught in the evening, whenever applicable, to compare results.

**Plan for topic** "Students completing the course will be able to prepare and present an oral report about a variety of subjects, including
To continue encouraging the students to prepare carefully for their oral presentations. As for outcome #1, I would like to compare results with a class taught in the evening.

Plan for topic "Students completing the course will be able to communicate effectively in Spanish while discussing topics of general interest.": 2010/11

The results of this outcome are very satisfactory. Again for this outcome, I think it reflects the result of very hard work on the part of the students and myself. As for the two other previous outcomes, I would like to compare results with the evening class when possible.

Plan for topic "Students completing the course will be able to demonstrate reading comprehension of literary and journalistic writings, including poetry.": 2009/10

Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. Plan to expand assessment to all sections to achieve similar results.

We are also planning to add direct assessment in the next cycle.

Plan for topic "Students completing the course will be able to prepare and present an oral report about a variety of subjects, including current events or certain specialized topics.": 2009/10

Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. Plan to expand assessment to all sections to achieve similar results.

We are also planning to add direct assessment in the next cycle.

</tbody>
</table>
### Plan for topic "Students completing the course will be able to read a full-length literary work in Spanish and write a report on it."

**2012/13**

Continue with current methods and materials used. Search for books of fiction that are interesting and enjoyable, and would provide stimulating discussions in class.

**2010/11**

The results are satisfactory in my opinion. The two students who submitted the work did an outstanding job. In the future, I would continue working hard to encourage students to do their very best. I also plan to assess the evening class when offered, to be able to assess a bigger pool of students, and to compare results.

**2009/10**

Same as for outcome #1. The results are satisfactory in my opinion. The two students who submitted the work did an outstanding job. In the future, I would continue working hard to encourage students to do their very best. I also plan to assess the evening class when offered, to be able to assess a bigger pool of students, and to compare results.

### Plan for topic "Students completing the course will be able to present prepared and extemporaneous reports in Spanish on assigned topics."

**2010/11**

Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. Plan to expand assessment to all sections to achieve similar results.

We are also planning to add direct assessment in the next cycle.

**2009/10**

DVC Instructional Course SLO Action Plans

1356. Independent Study [SPAN-298] belonging to Foreign Language [SPAN]
1357. Student Instructional Assistant [SPAN-299] belonging to Foreign Language [SPAN]

Plan for topic "Students completing this course will be able to provide assistance to students with questions."

**2017/18**

As an action plan the department will encourage more dialogue with instructors in department meetings that address how to facilitate the incorporation of the 299 student into the classroom, the manner in which we instruct the student, and their performance efficiency working with other students. Additionally, the department will address the uniformity of the objectives for all foreign languages.

**2014/15**

We are very happy to have instructional assistants in our Spanish courses. Students seem comfortable to seek help from them and interact with them. We will continue accepting assistants and promoting this 299 course, not only to native Spanish speakers, but also to students who have taken all levels of Spanish courses and wish to further their career in teaching.
### DVC Instructional Course SLO Action Plans

#### 1358. Introduction To Disabilities [SPEDU-101] belonging to DSS [SPEDU]

**Plan for topic "Students completing the course will be able to understand how culture affects relationships among children with disabilities, families, and school": 2018/19**

In Spring 2019, a total of 12 students in this section were assessed. The sections included 16 face to face classes that were held weekly. Of the 12 students, 87% (11 students) were successful in the assessment for this topic. A closer analysis of the results show that the remaining student struggled most often due to a lack of understanding of this topic. The above results indicate that this is a satisfactory assessment and the students are attaining satisfactory mastery of this outcome. I will make no changes in the next academic year.

<table>

### 1359. Historical Perspectives of Disabilities and the Law [SPEDU-102] belonging to DSS [SPEDU]

#### Plan for topic "Students completing the course will be able to demonstrate an understanding of the history of disability legislation in the United States."

<table>
<thead>
<tr>
<th>Year</th>
<th>Plan for topic</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>2016/17</td>
<td>The results for this assessment topic were very promising at almost 100%. The main theme of the class is to explore disability legislation and its evolution throughout American history, and so every class session revolves around this topic. One area that may need further attention is to further identify the specific nuances between the various laws, as often this can be an area of confusion for some students.</td>
<td></td>
</tr>
<tr>
<td>2016/17</td>
<td>This percentage was lower than expected, although it still met the benchmark criteria. It is also more difficult to assess the student's level of understanding of such a broad idea (i.e. both federal and state laws, which comprise a large amount of information). In the future, I think using several assessment instruments to evaluate the student's grasp of the SLO would be beneficial. It is not always possible for a student to convey their complete understanding of a broad topic in specific final exam questions.</td>
<td></td>
</tr>
<tr>
<td>2013/14</td>
<td>The assessment results for this topic were very promising. On the final exam, students were able to analyze scenarios which pertained to student and parents rights in several situations. The analysis asked to students to identify which laws incorporated those rights as well.</td>
<td></td>
</tr>
<tr>
<td>2010/11</td>
<td>72% of students in course demonstrated satisfactory understanding of disability legislation as demonstrated by final exam results. Criteria met.</td>
<td></td>
</tr>

**Course Action Plans**
DVC Instructional Course SLO Action Plans

1360. Classroom Strategies for the Special Education Paraeducator [SPEDU-103] belonging to DSS [SPEDU]

Plan for topic "Students completing the course will be able to evaluate basic patterns of effective verbal and non-verbal communication styles." 2018/19

As a plan of action there will be more modeling of the various types of communication styles, and differences of, demonstrated by the instructor. The above results indicate that this is a satisfactory assessment and the students are attaining satisfactory mastery of this outcome.

Plan for topic "Students completing the course will be able to identify cultural and gender differences in communication styles." 2018/19

As a plan of action there will be an extension activity provided to each student to complete their understanding of how cultural backgrounds and other influencing factors (including gender) influence or color the lense of how we view others. The above results indicate that this is a satisfactory assessment and the students are attaining satisfactory mastery of this outcome.

Plan for topic "Students completing the course will be able to apply tactile, visual verbal, visual nonverbal and auditory learning styles and strategies." 2018/19

We have discussed multi-sensory strategies but have not put them into practice. The hands on portion of the class, students will be able to practice these strategies. Their teacher role play will be the final assessment for this topic. The above results indicate that this is a satisfactory assessment and the students are attaining satisfactory mastery of this outcome.

Plan for topic "Students completing the course will be able to evaluate basic patterns of effective verbal and non-verbal communication styles." 2014/15

While the percentage of successful students is high, in order to build on this success, the instructor plans to include more in-class activities in which students take an active role in conveying effective verbal and non-verbal communication styles. This may come in the form of role plays, student-led demonstrations, etc.

Plan for topic "Students completing the course will be able to identify cultural and gender differences in communication styles." 2014/15

While the percentage of successful students is high, new issues involving cultural and gender differences are constantly emerging in today's society. To give students the most relevant information possible, the instructor plans to bring in new instructional materials to reflect these current issues and how communication practices adjust to reflect

**Plan for topic "e": 2012/13**

Results are acceptable. Will incorporate student feedback into future course design.

**Plan for topic "Students completing the course will be able to apply job safety and how its application in the field."": 2012/13**

Results are acceptable. Will incorporate student feedback into future course design.
## 1364. Trade Mathematics [STMFT-111] belonging to Architecture/Engineering [STMFT]

### Plan for topic "Students completing the course will be able to measure and convert metric measurements.": 2017/18

The department feels that the students understand this topic and that other topics are more essential for STMFT 111. Therefore, the department recommends not assessing this topic during the next assessment cycle.

### Plan for topic "Students completing the course will be able to measure and convert metric measurements.": 2013/14

Results are acceptable. Will incorporate student feedback into future course design.

### Plan for topic "Students completing the course will be able to apply mathematical formulae used in steamfitting.": 2013/14

Results are acceptable. Will incorporate student feedback into future course design.

### Plan for topic "Students completing the course will be able to take pipe and pipe fitting measurements.": 2013/14

Results are acceptable. Will incorporate student feedback into future course design.

### Plan for topic "e": 2013/14

Results are acceptable. Will incorporate student feedback into future course design.

### Plan for topic "Students completing the course will be able to measure and convert metric measurements.": 2012/13

Results are acceptable. Will incorporate student feedback into future course design.

### Plan for topic "Students completing the course will be able to apply mathematical formulae used in steamfitting.": 2012/13

Results are acceptable. Will incorporate student feedback into future course design.

### Plan for topic "e": 2012/13

Results are acceptable. Will incorporate student feedback into future course design.

### Plan for topic "Students completing the course will be able to take pipe and pipe fitting measurements.": 2012/13

Results are acceptable. Will incorporate student feedback into future course design.
1365. Use and Care of Tools [STMFT-112] belonging to Architecture/Engineering [STMFT]

Plan for topic "Students completing the course will be able to operate safely in work environments.": 2018/19

The Construction Program feels that the students understand this topic. Therefore, the department recommends not assessing this topic during the net assessment cycle.

Plan for topic "Students completing the course will be able to operate safely in work environments.": 2013/14

Results are acceptable. Will incorporate student feedback into future course design.

Plan for topic "Students completing the course will be able to identify industrial tools.": 2013/14

Results are acceptable. Will incorporate student feedback into future course design.

Plan for topic "Students completing the course will be able to maintain tools properly.": 2013/14

Results are acceptable. Will incorporate student feedback into future course design.

Plan for topic "Students completing the course will be able to operate safely in work environments.": 2011/12

No SLO related changes are recommended for this course.

Plan for topic "Students completing the course will be able to identify industrial tools.": 2011/12

No SLO related changes are recommended for this course.

Plan for topic "Students completing the course will be able to maintain tools properly.": 2011/12

No SLO related changes are recommended for this course.

Plan for topic "Students completing the course will be able to operate safely in work environments.": 2010/11

No SLO related changes are recommended for this course.

Plan for topic "Students completing the course will be able to identify industrial tools.": 2010/11

No SLO related changes are recommended for this course.

Plan for topic "Students completing the course will be able to maintain tools properly.": 2010/11

No SLO related changes are recommended for this course.

### 1391. Construction Management in Steamfitting [STMFT-140] belonging to Architecture/Engineering [STMFT]

#### Plan for topic "Students completing the course will be able to apply appropriate administrative procedures related to the construction industry."

**2017/18**

The department feels that the students understand this topic and that other topics are more essential for Stmft 140. Therefore, the department recommends not assessing this topic during the next assessment cycle.

#### Plan for topic "Students completing the course will be able to apply appropriate administrative procedures related to the construction industry."

**2013/14**

Results are acceptable. Will incorporate student feedback into future course design.

### Plan for topic "Students completing the course will be able to explain the responsibilities of the many agencies, departments, and specific districts that require variances or permits for construction."

**2013/14**

Results are acceptable. Will incorporate student feedback into future course design.

### Plan for topic "Students completing the course will be able to analyze the responsibilities of and the relationship between the Architect, Engineer, General Contractor and Subcontractor, Superintendent, and Inspector."

**2013/14**

Results are acceptable. Will incorporate student feedback into future course design.

### Plan for topic "Students completing the course will be able to allocate responsibilities in construction to ones self and to others."

**2013/14**

Results are acceptable. Will incorporate student feedback into future course design.
Plan for topic "Students completing this course will be able to compare and contrast the basic principle of hydrostatic pumps and test packages.": 2019/20

The department feels that the students understand this topic and that other issues are essential for Stmft 141. Therefore, the department recommends not assessing this topic during the next assessment cycle.

Plan for topic "Students completing this course will be able to compare and contrast the basic principle of hydrostatic pumps and test packages.": 2018/19

The department feels that the students understand this topic and that other topics are more essential for Stmft 141. Therefore, the department recommends not assessing this topic during the next assessment cycle.
1393. Topics in Steamfitting [STMFT-150] belonging to Architecture/Engineering [STMFT]
1395. Addressing Barriers to Employment I: Getting a Job [WRKP-090NC] belonging to DSS [WRKP]
DVC Instructional Course SLO Action Plans

1396. Addressing Barriers to Employment II: Keeping a Job [WRKP-091NC] belonging to DSS [WRKP]
## DVC Instructional Course SLO Action Plans

### 1397. General Work Experience Education [WRKX-160] belonging to Interdisciplinary [WRKX]

**Plan for topic "Students completing this course will be able to identify and improve upon selected work habits. [A]": 2017/18**

WRKX department is in the process of stabilizing our team and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.

### Plan for topic "Students completing this course will be able to research and explore careers. [B]": 2017/18

WRKX department is in the process of stabilizing our team and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.

### Plan for topic "Students completing this course will be able to increase competencies in present employment [C]": 2017/18

WRKX department is in the process of stabilizing our team and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.
## DVC Instructional Course SLO Action Plans

### 1398. Occupational Work Experience Education [WRKX-170] belonging to Interdisciplinary [WRKX]

**Plan for topic "Students completing this course will be able to identify and improve selected professional work habits and employability skills. [A]": 2017/18**

WRKX department is in the process of stabilizing our team and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.

**Plan for topic "Students completing this course will be able to develop professional expertise related to career path. [B]": 2017/18**

WRKX department is in the process of stabilizing our team and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.

**Plan for topic "Students completing this course will be able to develop a plan to continue or gain employment in career area. [C]": 2017/18**

WRKX department is in the process of stabilizing our team and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.
DVC Instructional Course SLO Action Plans

1399. Internship in Occupational Work Experience Education [WRKX-180] belonging to Interdisciplinary [WRKX]
Plan for topic "Identify and improve selected professional work habits and employability skills such as time management, communication, and teamwork. Students completing this course will be able to": 2018/19

WRKX department has built out a great team of supportive faculty members. In addition, we have redefined our SLOs (for more effective analysis) and have created an assessment tool which will be integrated into Canvas (once the updated SLOs are approved) and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.

Plan for topic "Explore and develop strategies to secure employment. Students completing this course will be able to": 2018/19

ACTION PLAN

WRKX department has built out a great team of supportive faculty members. In addition, we have redefined our SLOs (for more effective analysis) and have created an assessment tool which will be integrated into Canvas (once the updated SLOs are approved) and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.

Plan for topic "Link academic coursework to work-based learning. Students completing this course will be able to": 2018/19

WRKX department has built out a great team of supportive faculty members. In addition, we have redefined our SLOs (for more effective analysis) and have created an assessment tool which will be integrated into Canvas (once the updated SLOs are approved) and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.
