1. Introduction to the Administration of Justice [ADJUS-120] belonging to Administration of Justice [ADJUS]

Plan for topic "Students completing the course will be able to identify a career in Administrative Justice field." 2017/18

Department faculty have been working on increasing the success of course SLOs. Instructors have spent more time focusing on lecture and study in criminological theories, and have included directed study, small group activities and class presentations. Directed focus of this SLO has successfully resulted in improved student learning and retention. Our next department meeting will focus on improving SLO achievement and increased results in on-line courses.

Plan for topic "Students completing ADJUS-120 will be able to demonstrate an understanding of criminological theories used to explain crime and criminality." 2017/18

Department faculty have been working on increasing the success of course SLOs. Instructors have spent more time focusing on lecture and study in criminological theories, and have included directed study, small group activities and class presentations. Directed focus of this SLO has successfully resulted in improved student learning and retention. Our next department meeting will focus on improving SLO achievement and increased results in on-line courses.

Plan for topic "Students completing the course will be able to critique causes of crime and criminology studies." 2017/18

Department faculty have been working on increasing the success of course SLOs. Instructors have spent more time focusing on lecture and study in policing history and function, and have included directed study, small group activities and class presentations. Directed focus of this SLO has successfully resulted in improved student learning and retention. Our next department meeting will focus on improving SLO achievement and increased results in on-line courses.

Plan for topic "Students completing ADJUS-120 will be able to demonstrate an understanding of how the CJ system works." 2017/18

Department faculty have been working on increasing the success of course SLOs. Instructors have spent more time focusing on lecture and study in law principles and crime

DVC Instructional Course SLO Action Plans

2. Criminal Law [ADJUS-121] belonging to Administration of Justice [ADJUS]

Plan for topic "Students completing the course will be able to analyze corpus delecti of California criminal statutes": 2016/17

Faculty are generally satisfied with these results. Both standard f2f and on-line class performance results were similar. The department has discussed the use of additional learning methodologies in the classroom, including the incorporation of, or additional use of, written case studies, in-class exercises, video scenarios, and the use of the video scenario-force options simulator to increase student comprehension, retention and application.

Plan for topic "Students completing ADJUS-121 will be able to Summarize the basic concept of California Criminal Law.": 2016/17

Faculty are generally satisfied with these results. Both standard f2f and on-line class performance results were similar. The department has discussed the use of additional learning methodologies in the classroom, including the incorporation of, or additional use of, written case studies, in-class exercises, video scenarios, and the use of the video scenario-force options simulator to increase student comprehension, retention and application.

Plan for topic "Students completing the course will be able to analyze case law principles": 2016/17

Faculty are generally satisfied with these results. Both standard f2f and on-line class performance results were similar. The department has discussed the use of additional learning methodologies in the classroom, including the incorporation of, or additional use of, written case studies, in-class exercises, video scenarios, and the use of the video scenario-force options simulator to increase student comprehension, retention and application.

Plan for topic "Students completing ADJUS-121 will be able to Analyze California criminal codes and distinguish the different classifications of crimes.": 2016/17

Faculty are generally satisfied with these results. Both standard f2f and on-line class performance results were similar. The department has discussed the use of additional learning methodologies in the classroom, including the incorporation of, or additional use of, written case studies, in-class exercises, video scenarios, and the use of the video scenario-force options simulator to increase student comprehension, retention and application.

Plan for topic "Students completing the course will be able to apply the principles of the philosophy of the law to community based policing": 2016/17

Faculty are generally satisfied with these results but will be working on improvement of student performance. The on-line course results were 8% lower than the standard f2f class. The department will address this difference and has discussed the use of additional learning methodologies in the courses, including the incorporation of, or additional use of, written case studies, in-class exercises, video scenarios, and the use of the video scenario-force options simulator to increase student comprehension, retention and application. The additional video applications are believed to enhance and benefit the on-line course specifically.

Plan for topic "Students completing ADJUS-121 will be able to Distinguish between crimes against the person and crimes against
Faculty are generally satisfied with these results but will be working on improvement of student performance. The on-line course results were 8% lower than the standard f2f class. DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to apply the principles of the philosophy of the law to community based policing": 2009/10

Not satisfied with the outcome, implement pedagogical changes that emphasize specific principles of these concepts, such as classroom exercises, case studies and testing models, all in order to achieve a higher success rate.
3. Criminal Procedure [ADJUS-122] belonging to Administration of Justice [ADJUS]
Plan for topic "Students completing the course will be able to differentiate between consensual contact, detention, and probable cause to arrest": 2017/18

Department faculty have been working on increasing the success of course SLOs. Instructors have spent more time focusing on lecture and study in legal detentions and arrests, and have included directed study and written exercises in case law and hypothetical scenarios. Directed focus of this SLO has successfully resulted in improved student learning and retention. Our next department meeting will focus on improving SLO achievement and increased results in on-line courses.

Plan for topic "Students completing the course will be able to understand the principle stages within the criminal trial process.": 2017/18

Department faculty have been working on increasing the success of course SLOs. Instructors have spent more time focusing on lecture and study in the legal stages involved in the criminal trial process and have included directed study, a study schematic and the use of case studies. We had hoped for higher success but will continue with directed focus of this SLO to achieve higher success in future semesters. Our next department meeting will focus on improving SLO achievement and increased results in on-line courses.

Plan for topic "Students completing the course will be able to differentiate between two routes through the accusatory process": 2017/18

Department faculty have been working on increasing the success of course SLOs. Instructors have spent more time focusing on lecture and study in legal searches, seizures and arrests, and have included directed study and written exercises in Constitutional and case law and hypothetical scenarios. Directed focus of this SLO has successfully resulted in improved student learning and retention. Our next department meeting will focus on improving SLO achievement and increased results in on-line courses.

Plan for topic "Students completing ADJUS-122 will be able to Describe the history and application of the exclusionary rule in shaping criminal procedure.": 2017/18

Department faculty have been working on increasing the success of course SLOs. Instructors have spent more time focusing on lecture and study in legal searches, seizures and arrests, and have included directed study and written exercises in Constitutional and case law and hypothetical scenarios. Directed focus of this SLO has successfully resulted in improved student learning and retention. Our next department meeting will focus on improving SLO achievement and increased results in on-line courses.
and arrests, and have included directed study and written exercises in Constitutional and case law and hypothetical scenarios. Directed focus of this SLO has successfully resulted in improved student learning and retention. Our next department meeting will focus on improving SLO achievement and increased results in on-line courses.

Plan for topic "Students completing ADJUS-122 will be able to Describe the purpose, history and functions of the agencies charged with the administration and execution of criminal justice.": 2017/18

Department faculty have been working on increasing the success of course SLOs. Instructors have spent more time focusing on lecture and study in the history and function of the various criminal justice agencies and have included directed study and the use of case studies. We had hoped for higher success but will continue with directed focus of this SLO to achieve higher success in future semesters. Our next department meeting will focus on improving SLO achievement and increased results in on-line courses.

Plan for topic "Students completing the course will be able to describe the purpose, history and functions of the agencies charged with the administration and execution of criminal justice.":

Plan for topic "Students completing the course will be able to differentiate between consensual contact, detention, and probable cause to arrest": 2014/15

The department is satisfied with the results and they are similar to regular face to face classes. We will continue to analyze the curriculum and instruction methods to improve student learning in this area. We will consider using different assessment topics and methods next cycle.

Plan for topic "Students completing the course will be able to understand the principle stages within the criminal trial process.": 2014/15

The department is satisfied with the results and they are similar to regular face to face classes. We will continue to analyze the curriculum and instruction methods to improve student learning in this area. We will consider using different assessment topics and methods next cycle.

Plan for topic "Students completing ADJUS-122 will be able to describe the history and application of the exclusionary rule in shaping criminal procedure.": 2014/15

Plan for topic "Students completing ADJUS-122 will be able to Describe the history and application of the exclusionary rule in shaping criminal procedure.": 2013/14

2013-12-27: Although satisfied with the outcome, consider pedagogical changes that emphasize specific principles of these concepts, such as classroom exercises, case studies and testing models, all in order to achieve a higher success rate.

2014-09-12: The department is satisfied with the result but we will continue to analyze the curriculum and instruction methods to improve student learning in this area.

Plan for topic "Students completing ADJUS-122 will be able to Describe the purpose, history and functions of the agencies charged with the administration and execution of criminal justice.": 2013/14

Although satisfied with the outcome, consider pedagogical changes that emphasize specific principles of these concepts, such as classroom exercises, case studies and testing models, all in order to achieve a higher success rate.

Plan for topic "Students completing the course will be able to differentiate between consensual contact, detention, and probable cause to arrest": 2012/13
We are satisfied with the results as they show a solid achievement rate above 70%, and this is also significant improvement over the last semester period.

Plan for topic "Students completing the course will be able to understand the principle stages within the criminal trial process": 2012/13
We are satisfied with this result but of course will discuss pedagogy amongst instructors to attempt continued improvement.

Plan for topic "Students completing the course will be able to differentiate between two routes through the accusatory process": 2012/13
We are satisfied with this result but of course will discuss pedagogy amongst instructors to attempt continued improvement.

Plan for topic "Students completing ADJUS-122 will be able to Describe the history and application of the exclusionary rule in shaping criminal procedure": 2012/13
We are satisfied with this result but of course will discuss pedagogy amongst instructors to attempt continued improvement.

Plan for topic "Students completing the course will be able to differentiate between consensual contact, detention, and probable cause to arrest": 2011/12
2012-02-01: We are satisfied with the results as they show a solid achievement rate above 70%, and this is also significant improvement over the last semester period.
2012-12-14: Very satisfied with the results.

Plan for topic "Students completing the course will be able to understand the principle stages within the criminal trial process": 2011/12
2012-02-01: Although satisfied with the outcome, consider pedagogical changes that emphasize specific principles of these concepts, such as classroom exercises, case studies and testing models, all in order to achieve a higher success rate.
2012-12-14: Very satisfied with the results.

Plan for topic "Students completing the course will be able to differentiate between two routes through the accusatory process": 2011/12
2012-02-01: We are satisfied with the results as they show a near 90% achievement rate, and this is also significant improvement over the last semester period.
2012-12-14: The department is satisfied with the result but we will continue to analyze the curriculum and instruction methods to improve student learning in this area.

Plan for topic "Students completing ADJUS-122 will be able to Describe the history and application of the exclusionary rule in shaping criminal procedure": 2011/12
2012-02-01: We are satisfied with the results as they show a near 90% achievement rate, and this is also significant improvement over the last semester period.
2012-12-14: The department is satisfied with the result but we will continue to analyze the curriculum and instruction methods to improve student learning in this area.

Plan for topic "Students completing the course will be able to differentiate between consensual contact, detention, and probable cause to arrest": 2010/11
Although satisfied with the outcome, consider pedagogical changes that emphasize specific principles of these concepts, such as classroom exercises, case studies and testing models, all in order to achieve a higher success rate.
Plan for topic "Students completing the course will be able to understand the principle stages within the criminal trial process.": 2010/11
Did not achieve success at the 70% level. Implement pedagogical changes that emphasize specific principles of these concepts, such as classroom exercises, case studies and testing models, all in order to achieve a higher success rate.

Plan for topic "Students completing the course will be able to differentiate between two routes through the accusatory process": 2010/11
Although satisfied with the outcome, consider pedagogical changes that emphasize specific principles of these concepts, such as classroom exercises, case studies and testing models, all in order to achieve a higher success rate.

Plan for topic "Students completing ADJUS-122 will be able to Describe the history and application of the exclusionary rule in shaping criminal procedure.": 2010/11
Although satisfied with the outcome, consider pedagogical changes that emphasize specific principles of these concepts, such as classroom exercises, case studies and testing models, all in order to achieve a higher success rate.
DVC Instructional Course SLO Action Plans

4. Elements of Corrections [ADJUS-124] belonging to Administration of Justice [ADJUS]

Plan for topic "Students completing the course will be able to identify the different types of correctional facilities and their missions.": 2016/17

- Faculty are very satisfied with these results. This particular SLO involved field trips and guest speakers and the results for the students was clearly very positive.

Plan for topic "Students completing ADJUS-124 will be able to identify and describe the evolving philosophy of punishment within the corrections subsystem of the criminal justice system.": 2016/17

- Faculty are very satisfied with these results. This particular SLO involved field trips and guest speakers and the results for the students was clearly very positive.

Plan for topic "Students completing ADJUS-124 will be able to identify and differentiate clients in each of the types of correctional institutions, the issues and challenges each type of client presents to a correctional institution.": 2016/17

- Faculty are very satisfied with these results. This particular SLO involved field trips and guest speakers and the results for the students was clearly very positive.

Plan for topic "Students completing the course will be able to recognize major patterns of deviant behavior unacceptable to society.": 2016/17

- Faculty are generally satisfied with these results but will continue to look for methods to improve. The department has discussed the use of additional learning methodologies in the classroom, including the additional use of written case studies and video documentaries to increase student comprehension and application.

Plan for topic "Students completing ADJUS-124 will be able to identify the alternatives to punishment and describe their impact on the criminal justice system and society at large.": 2016/17

- Faculty are generally satisfied with these results but will continue to look for methods to improve. The department has discussed the use of additional learning methodologies in the classroom, including the additional use of written case studies and video documentaries to increase student comprehension and application.

Plan for topic "Students completing ADJUS-124 will be able to identify the innovative programs designed for specific correctional institutions and describe their impact on the corrections client and society at large." : 2016/17

- Faculty are very satisfied with these results but will continue to look for methods to improve. As in SLO #1, the guest speakers and field trips worked extremely well and had a direct impact on the student's understanding. The department has discussed the use of additional case studies and video documentaries.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing ADJUS-124 will be able to identify and describe the evolving philosophy of punishment within the corrections sub-system of the criminal justice system.": 2016/17

Faculty are very satisfied with these results but will continue to look for methods to improve. As in SLO #1, the guest speakers and field trips worked extremely well and had a direct impact on the student's understanding. Very satisfied with the results.
### 5. Report Preparation for Criminal Justice [ADJUS-125] belonging to Administration of Justice [ADJUS]

#### Plan for topic "Students completing the course will be able to organize crime information for various types of report writing": 2018/19

Faculty felt that one on one instruction was significant in raising the student writing performance. Also very effective was emphasis placed on both basic writing grammar skills and experiencing scenario-based and video-based exercises, where students interviewed persons and determined facts and evidence and then documented these in a standard report format.

The Action Plan would involve adding more of the scenario-based exercises, using video technology and Canvas.

#### Plan for topic "Students completing the course will be able to compare report writing techniques between state and federal levels": 2018/19

In addition to one on one instruction and emphasis placed on both basic writing and grammar skills and experiencing scenario-based and video-based exercises, students were lectured on the different reporting formats. Instruction and testing utilized these different formats. These instruction methods were effective.

The Action Plan would involve adding more of the scenario-based exercises, using video technology and Canvas, and incorporating these different report formats.

#### Plan for topic "Students completing the course will be able to evaluate techniques in various communication styles": 2018/19

Students were exposed to lecture and scenario-based instruction in both verbal and writing skills that explored various communication styles. Emphasis was placed here in role play and scenario-based instruction and exercises. In this area, students completed a pre-exam in the first week. Results were compared to their final scores and improvement was significant across the board.

The Action Plan would involve adding more of the scenario-based exercises, using role play, video technology and Canvas.

#### Plan for topic "Students completing the course will be able to organize crime information for various types of report writing": 2015/16

Students showed significant improvement in this area from the previous semester, which we feel is a direct result of focused instruction on the basic English grammar and writing skills. We will continue to focus instruction on writing fundamentals.

#### Plan for topic "Students completing the course will be able to compare report writing techniques between state and federal levels": 2015/16

Students showed significant improvement in this area from the previous semester, which we feel is a direct result of focused instruction on the basic English grammar and writing skills. We will continue to focus instruction on writing fundamentals.

#### Plan for topic "Students completing the course will be able to evaluate techniques in various communication styles": 2015/16

Students showed significant improvement in this area from the previous semester, which we feel is a direct result of focused instruction on the basic English grammar and writing skills. We will continue to focus instruction on writing fundamentals.
writing skills. We will continue to focus instruction on writing fundamentals.

**Plan for topic "Students completing the course will be able to organize crime information for various types of report writing": 2014/15**

Results took a dip this semester causing us concern. We will discuss this result amongst the faculty and we will analyze the curriculum and instruction methods to improve student learning in this area.

**Plan for topic "Students completing the course will be able to compare report writing techniques between state and federal levels": 2014/15**

The results are good and an improvement over last semester. The department is satisfied with the result but we will continue to analyze the curriculum and instruction methods to improve student learning in this area.

**Plan for topic "Students completing the course will be able to evaluate techniques in various communication styles": 2014/15**

The results are extremely positive. We will most likely create and use new assessment topics and methods for the next cycle.

**Plan for topic "Students completing the course will be able to compare report writing techniques between state and federal levels": 2013/14**

Although satisfied with the outcome, we will focus specifically on the concepts involved in both state and federal organizations.

**Plan for topic "Students completing the course will be able to evaluate techniques in various communication styles": 2013/14**

Although satisfied with the outcome, focus on classroom presentation and performance exercises to increase student success.

7. Cultural Diversity in Criminal Justice [ADJUS-130] belonging to Administration of Justice [ADJUS]

Plan for topic "Students completing the course will be able to explain the changing demographics of California and the implications of those changes to the public safety professions.": 2018/19

Our faculty had reviewed the past SLO results from previous assessment cycles and had chosen to spend more time lecturing and reviewing this subject within the curriculum and to also focus on this specific area within their written assignment, which involved case studies and data analysis. The results were effective and showed an improvement from previous semesters. The improved results were consistent in all three class formats. Faculty are pleased with the results and will continue to evaluate instruction methods and continue to focus instruction of this specific topic with lecture and additional written assignments.

Plan for topic "Students completing the course will be able to identify the evolution of human rights, the nature and origins of prejudice, the nature and origins of discrimination, and how understanding these issues can contribute to more effective cultural contacts.": 2018/19

Our faculty had reviewed the past SLO results from previous assessment cycles and had chosen to spend more time lecturing and reviewing this subject within the curriculum and to also focus on this specific area within their written assignment, which involved current events. The results were effective and showed an improvement from previous semesters. The improved results were consistent in all three class formats. Faculty are pleased with the results and will continue to evaluate instruction methods and continue to focus instruction of this specific topic with lecture and additional written assignments.

Plan for topic "Students completing the course will be able to explain the values, beliefs, and behaviors of people from a wide variety of cultures found in California.": 2018/19

DVC Instructional Course SLO Action Plans

8. Gangs and Threat Groups in America [ADJUS-139] belonging to Administration of Justice [ADJUS]

Plan for topic "Students completing the course will be able to demonstrate an understanding of the historical, cultural and current structure of gangs.": 2018/19

Our faculty had reviewed the past SLO results from previous assessment cycles and had chosen to spend more time lecturing and reviewing this subject within the curriculum and to also focus on this specific area within their written assignments, which involved case studies and gang history. The results were effective and showed an improvement from previous semesters. The improved results were consistent in both class formats. Faculty are pleased with the results and will continue to evaluate instruction methods and continue to focus instruction of this specific topic with lecture and additional research and written assignments.

Plan for topic "Students completing ADJUS-139 will be able to successfully demonstrate knowledge of the criminal gang statute.": 2018/19

Our faculty had reviewed the past SLO results from previous assessment cycles and had chosen to spend more time lecturing and reviewing this subject within the curriculum and to also focus on this specific area within their written assignments, which involved constantly reviewing the law and its application in case studies and current events. The results were effective and showed an improvement from previous semesters. The improved results were consistent in both class formats. Faculty are pleased with the results and will continue to evaluate instruction methods and continue to focus instruction of this specific topic.

Plan for topic "Students completing the course will be able to contrast the essential differences between prison and criminal street gangs.": 2018/19

Our faculty had reviewed the past SLO results from previous assessment cycles and had chosen to spend more time lecturing and reviewing this subject within the curriculum and to also focus on this specific area within their written assignments, which involved case studies and current events and trends. The results were effective and showed an improvement from previous semesters. The improved results were consistent in both class formats. Faculty are pleased with the results and will continue to evaluate instruction methods and continue to focus instruction of this specific topic with lecture and additional written assignments.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the historical, cultural and current structure of gangs.": 2015/16

The department is not satisfied with this result. More instructional time and other methods will be spent on the history and culture of gangs, including video, lecture and group discussion.

Plan for topic "Students completing ADJUS-139 will be able to successfully demonstrate knowledge of the criminal gang statute.": 2015/16

We are satisfied with this result but of course will discuss pedagogy and curriculum improvement amongst instructors within our department meetings to attempt continued improvement.

Plan for topic "Students completing the course will be able to contrast the essential differences between prison and criminal street gangs."
We are satisfied with this result but of course will discuss pedagogy and curriculum improvement amongst instructors within our department meetings to attempt continued improvement.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the historical, cultural and current structure of gangs."

- 2014/15

Although satisfied, modify instruction to spend more time on gang and organized crime areas, where students demonstrated some difficulty.

Plan for topic "Students completing ADJUS-139 will be able to successfully demonstrate knowledge of the criminal gang statute."

- 2014/15

Although very satisfied with the assessment results, spend more lecture time on Juvenile Law and costs of incarceration.

Plan for topic "Students completing the course will be able to contrast the essential differences between prison and criminal street gangs."

- 2014/15

Although satisfied with the assessment outcome, spend more lecture time on CDCR's criteria for prison gang identification and which groups are identified as gangs.
DVC Instructional Course SLO Action Plans

9. Topics in Administration of Justice [ADJUS-150] belonging to Administration of Justice [ADJUS]
Plan for topic “Students completing the course will be able to explain the various scientific principles utilized in the processing of crime scenes.”: 2017/18

This course is very unique in our program given the emphasis on laboratory and the application of skills and knowledge, and in-addition, having two instructors for typically a small number of students (approx. 20.) Instructors have the luxury of focusing on topics and the hands-on application in the laboratory. The department is very pleased with this outcome. Our next department meeting will focus on improving SLO achievement and factors learned in this class will be shared with other instructors in other courses.

Plan for topic “Students completing the course will be able to demonstrate knowledge of the relative value of different kinds of physical evidence.”: 2017/18

This course is very unique in our program given the emphasis on laboratory and the application of skills and knowledge, and in-addition, having two instructors for typically a small number of students (approx. 20.) Instructors have the luxury of focusing on topics and the hands-on application in the laboratory. The department is very pleased with this outcome. Our next department meeting will focus on improving SLO achievement and factors learned in this class will be shared with other instructors in other courses.

Plan for topic “Students completing the course will be able to explain the various scientific principles utilized in the processing of crime scenes.”: 2014/15

The department is satisfied with the result but we will continue to analyze the curriculum and instruction methods to improve student learning in this area. We will also consider changing assessment topics and methods for the next cycle.

Plan for topic “Students completing the course will be able to demonstrate knowledge of the relative value of different kinds of physical evidence.”: 2014/15

The department is satisfied with the result but we will continue to analyze the curriculum and instruction methods to improve student learning in this area. We will also consider changing assessment topics and methods for the next cycle.

Plan for topic “Students completing the course will be able to apply the principles of recognition, collection, recording and preserving physical evidence for use in the forensic setting.”: 2014/15

The department is satisfied with the result but we would like to improve the curriculum and instruction methods to improve student learning in this area. We will also consider changing assessment topics and methods for the next cycle.

Plan for topic “Students completing the course will be able to explain the various scientific principles utilized in the processing of crime scenes.”: 2013/14

These results show improvement from the previous semester. The department is satisfied with the result but we will continue to analyze the curriculum and instruction methods to improve student learning in this area.

Plan for topic “Students completing the course will be able to demonstrate knowledge of the relative value of different kinds of physical evidence.”: 2013/14
### Plan for topic "Students completing the course will be able to apply the principles of recognition, collection, recording and preserving physical evidence for use in the forensic setting."

2013/14

These results show improvement from the previous semester. The department is satisfied with the result but we will continue to analyze the curriculum and instruction methods to improve student learning in this area.

### Plan for topic "Students completing the course will be able to explain the various scientific principles utilized in the processing of crime scenes."

2012/13

The department is satisfied with the result but we will continue to analyze the curriculum and instruction methods to improve student learning in this area.

### Plan for topic "Students completing the course will be able to demonstrate knowledge of the relative value of different kinds of physical evidence."

2012/13

The department is satisfied with the result but we will continue to analyze the curriculum and instruction methods to improve student learning in this area.

### Plan for topic "Students completing the course will be able to apply the principles of recognition, collection, recording and preserving physical evidence for use in the forensic setting."

2012/13

The department is not completely satisfied with the result and will analyze the curriculum and instruction methods to improve student learning in this area.
### 11. Legal Aspects of Evidence [ADJUS-221] belonging to Administration of Justice [ADJUS]

**Plan for topic "Students completing the course will be able to demonstrate an understanding of the concept of judicial review and its role in establishing the rules governing search and seizure, admissibility and presentation of evidence in criminal trials."**: 2017/18

Department faculty have been working on increasing the success of course SLOs. Achievement results in this course are satisfactory but can be improved. Our department feels the challenge here is teaching law classes on-line. We need to incorporate more focus on the SLO topic as well as case law and hypothetical written exercises. Our next department meeting will focus on improving SLO achievement and increased results in on-line courses.

**Plan for topic "Students completing the course will be able to analyze situations and/or events to determine how the rules of evidence and the concepts of evidentiary law apply."**: 2017/18

Department faculty have been working on increasing the success of course SLOs. Achievement results in this course are satisfactory but can be improved. Our department feels the challenge here is teaching law classes on-line. We need to incorporate more focus on the SLO topic as well as case law and hypothetical written exercises. Our next department meeting will focus on improving SLO achievement and increased results in on-line courses.

**Plan for topic "Students completing the course will be able to compare and contrast different types of evidence commonly used in criminal prosecution."**: 2017/18

These results are an improvement over past semesters. The department is satisfied with the results and they are similar to regular face to face classes. We will continue to analyze the curriculum and instruction methods to improve student learning in this area. We will consider using different assessment topics and methods next cycle.

**Plan for topic "Students completing the course will be able to demonstrate an understanding of the concept of judicial review and its role in establishing the rules governing search and seizure, admissibility and presentation of evidence in criminal trials."**: 2014/15

The department is satisfied with the results and they are similar to regular face to face classes. We will continue to analyze the curriculum and instruction methods to improve student learning in this area. We will consider using different assessment topics and methods next cycle.

**Plan for topic "Students completing the course will be able to analyze situations and/or events to determine how the rules of evidence and the concepts of evidentiary law apply."**: 2014/15

These results are an improvement over past semesters.

**Plan for topic "Students completing the course will be able to compare and contrast different types of evidence commonly used in criminal prosecution."**: 2014/15

Course Action Plans | Outcome Assessment History | Page 32 of 2394
Plan for topic "Students completing the course will be able to analyze situations and/or events to determine how the rules of evidence and the concepts of evidentiary law apply.": 2009/10

Although satisfied with the outcome, consider pedagogical changes that emphasize specific principles of these concepts, such as classroom exercises, case studies and testing models, all in order to achieve a higher success rate.

Plan for topic "Students completing the course will be able to compare and contrast different types of evidence commonly used in criminal prosecution.": 2009/10

Not satisfied with the outcome, consider pedagogical changes that emphasize specific principles of these concepts, such as classroom exercises, case studies and testing models, all in order to achieve a higher success rate.
### DVC Instructional Course SLO Action Plans

#### 12. Criminal Investigation [ADJUS-222] belonging to Administration of Justice [ADJUS]

**Plan for topic "Students completing the course will be able to conduct Interviews and interrogation."**: 2017/18

Department faculty have been working on increasing the success of course SLOs. Instructors have spent more time focusing on lecture and practical exercises and hypothetical scenarios. Directed focus of this SLO has successfully resulted in improved student learning and retention but can be improved. Our next department meeting will focus on improving SLO achievement and increased results in on-line courses.

**Plan for topic "Students completing the course will be able to develop a crime scene notebook."**: 2017/18

Department faculty have been working on increasing the success of course SLOs. Achievement results in this course are satisfactory but can be improved. Our department feels the challenge here is teaching investigation and skill-based classes on-line. We need to incorporate more focus on the SLO topic as well as hypothetical written exercises and the use of technology. Our next department meeting will focus on improving SLO achievement and increased results in on-line courses.

**Plan for topic "Students completing the course will be able to explain the procedures and techniques involved in the processing of a crime scene for evidence."**: 2017/18

Department faculty have been working on increasing the success of course SLOs. Instructors have spent more time focusing on lecture, practical crime scene exercises and the incorporation of forensic technology. Directed focus of this SLO has successfully resulted in improved student learning and retention. Our next department meeting will focus on improving SLO achievement and increased results in on-line courses.

Plan for topic "Students completing the course will be able to demonstrate an understanding of general and verified principles and other kinds of knowledge regarding the process of law, crime, and treatment or prevention as they apply to juveniles."

Our faculty had reviewed the past SLO results from previous assessment cycles and had chosen to spend more time lecturing and reviewing this subject within the curriculum and to also focus on this specific area within their written assignments. The results were effective and showed consistent results from previous semesters. Faculty are pleased with the results and will continue to evaluate instruction methods and continue to focus instruction of this specific topic with lecture, current trends and events and additional written assignments.

Plan for topic "Students completing the course will be able to demonstrate a familiarity with legal codes and standards pertaining to delinquency control."

Our faculty had reviewed the past SLO results from previous assessment cycles and had chosen to spend more time lecturing and reviewing this subject within the curriculum and to also focus on this specific area within their written assignments. The results were effective and showed consistent results from previous semesters. Faculty are pleased with the results and will continue to evaluate instruction methods and continue to focus instruction of this specific topic with lecture, current trends and events and additional written assignments.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the function of probation, parole, and institutions and their relationship to juvenile justice."

Our faculty had reviewed the past SLO results from previous assessment cycles and had chosen to spend more time lecturing and reviewing this subject within the curriculum and to also focus on this specific area within their written assignments. The results were effective and showed consistent results from previous semesters. Faculty are pleased with the results and will continue to evaluate instruction methods and continue to focus instruction of this specific topic with lecture, current trends and events and additional written assignments.

Plan for topic "Students completing the course will be able to demonstrate an understanding of general and verified principles and other kinds of knowledge regarding the process of law, crime, and treatment or prevention as they apply to juveniles."

Essentially the same results as last semester. Even though the department is satisfied with the result, we will continue to analyze the curriculum and instruction methods in our department meetings with the goal to improve student learning in this area.

15. The Police: Roles, Methods, and Operations [ADJUS-260] belonging to Administration of Justice [ADJUS]

Plan for topic "Students completing the course will be able to demonstrate an understanding of the qualifications needed for employment in the law enforcement industry.": 2018/19

Department faculty have been working on increasing the success of course SLOs. The results here are not acceptable and need to be improved. This SLO covers core concepts in this CTE field. Instructors will need to spend more time focusing on lecture in police organizations, policies and procedures, and need to incorporate directed study, scenarios and written exercises. Our next department meeting will focus on improving SLO achievement and increased results in on-line courses.

Plan for topic "Students completing the course will be able to demonstrate the knowledge and techniques required daily be peace officers.": 2018/19

Department faculty have been working on increasing the success of course SLOs. This SLO covers many of the primary concepts of this course. Instructors have spent considerable class time focusing on lecture and class activities directed in this area, including case studies and hypothetical scenarios. Directed focus of this SLO has successfully resulted in improved student learning and retention. Our next department meeting will focus on improving SLO achievement and increased results in on-line courses.

Plan for topic "Students completing the course will be able to identify the police functions and the relationship between law enforcement officer, fellow workers, supervisors, the press, and the public.": 2018/19

16. Personal Self Defense and Firearms [ADJUS-270] belonging to Administration of Justice [ADJUS]

Plan for topic "Students completing the course will be able to demonstrate knowledge of defensive tactics and firearms, including the laws governing possession and use of dangerous weapons and the moral and legal aspects of the use of force and dangerous weapons.": 2016/17

Faculty are generally satisfied with these results. The department has discussed the use of additional learning methodologies in the classroom, including the incorporation of additional written case studies, in-class exercises, video scenarios, and the increased use of the video scenario-force options simulator to increase student comprehension and performance.

Plan for topic "Students completing the course will be able to explain the legal issues in the use of force and powers of arrests by private citizens.": 2016/17

Faculty are generally satisfied with these results. The department has discussed the use of additional learning methodologies in the classroom, including the POST LD series and the incorporation of additional written case studies, in-class exercises, video scenarios, and the increased use of the video scenario-force options simulator to increase student comprehension and performance.

Plan for topic "Students completing the course will be able to demonstrate the ability to make arrests safely and properly.": 2016/17

At least 70% of the students assessed will correctly answer SLO specific test questions incorporated within the final examination.

Faculty are generally satisfied with these results. The department has discussed the use of additional learning methodologies in the classroom, including the POST LD series, and the incorporation of additional written case studies, in-class practical exercises, video scenarios, and the increased use of the video scenario-force options simulator to increase student comprehension and performance.

Plan for topic "Students completing the course will be able to demonstrate knowledge of defensive tactics and firearms, including the laws governing possession and use of dangerous weapons and the moral and legal aspects of the use of force and dangerous weapons.": 2013/14

These results show improvement from the previous semester. The department is satisfied with the result but we will continue to analyze the curriculum and instruction methods to improve student learning in this area.

19. Interviewing and Counseling [ADJUS-284] belonging to Administration of Justice [ADJUS]

Plan for topic "Students completing the course will be able to analyze theories and current methods of communication as applied in casework in the criminal justice system." : 2018/19

Our faculty had reviewed the past SLO results from previous assessment cycles and had chosen to spend more time focusing on this subject within the curriculum and to also utilize more in-class active role play, including video taping the exercises. The results were effective and showed improved results from previous semesters. Faculty are pleased with the results and will continue to evaluate instruction methods and continue to focus instruction of this specific topic with continued use of video training and expanded use of role play exercises.

Plan for topic "Students completing the course will be able to develop rudimentary skills in interviewing and counseling." : 2018/19

Our faculty had reviewed the past SLO results from previous assessment cycles and had chosen to spend more time focusing on this subject within the curriculum and to also utilize more in-class active role play, including video taping the exercises. The results were effective and showed improved results from previous semesters. Faculty are pleased with the results and will continue to evaluate instruction methods and continue to focus instruction of this specific topic with continued use of video training and expanded use of role play exercises.

Plan for topic "Students completing the course will be able to recognize procedures and techniques to serve as a base for further study in the more sophisticated methods utilized in interviewing and counseling." : 2018/19

Our faculty had reviewed the past SLO results from previous assessment cycles and had chosen to spend more time focusing on this subject within the curriculum and to also utilize more in-class active role play, including video taping the exercises. The results were effective and showed consistent results from previous semesters. Faculty are satisfied with the results but would like to improve them and will continue to focus instruction of this specific topic with continued use of video training and expanded use of role play exercises.

Plan for topic "Students completing the course will be able to analyze theories and current methods of communication as applied in casework in the criminal justice system." : 2015/16

Although the department is satisfied with the result, we will focus instruction to improve student learning in this area. We intend on incorporating more live interactive role playing for interview and counseling instruction, using role players from psychology and drama.

Plan for topic "Students completing the course will be able to develop rudimentary skills in interviewing and counseling." : 2015/16

Although the department is satisfied with the result, we will focus instruction to improve student learning in this area. We intend on incorporating more live interactive role playing for interview and counseling instruction, using role players from psychology and drama.

Plan for topic "Students completing the course will be able to recognize procedures and techniques to serve as a base for further study in the more sophisticated methods utilized in interviewing and counseling." : 2015/16

Although the department is satisfied with the result, we will focus instruction to improve student learning in this area. We intend on incorporating more live interactive role playing for interview and counseling instruction, using role players from psychology and drama.
for interview and counseling instruction, using role players from psychology and drama.

Plan for topic "Students completing the course will be able to analyze theories and current methods of communication as applied in casework in the criminal justice system.": 2014/15

The department is satisfied with the result but we will continue to analyze the curriculum and instruction methods to improve student learning in this area. We will consider changing assessment topic and testing methods next cycle.

Plan for topic "Students completing the course will be able to develop rudimentary skills in interviewing and counseling.": 2014/15

Results are the same from last cycle. The department is very satisfied with the result but we will continue to analyze the curriculum and instruction methods to improve student learning in this area. We will consider changing assessment topic and testing methods next cycle.

Plan for topic "Students completing the course will be able to recognize procedures and techniques to serve as a base for further study in the more sophisticated methods utilized in interviewing and counseling.": 2014/15

Results are slight improvement from the last cycle. The department is very satisfied with the result but we will continue to analyze the curriculum and instruction methods to improve student learning in this area. We will consider changing assessment topic and testing methods next cycle.

Plan for topic "Students completing the course will be able to analyze theories and current methods of communication as applied in casework in the criminal justice system.": 2013/14

The department is satisfied with the result but we will continue to analyze the curriculum and instruction methods to improve student learning in this area.

Plan for topic "Students completing the course will be able to develop rudimentary skills in interviewing and counseling.": 2013/14

The department is satisfied with the result but we will continue to analyze the curriculum and instruction methods to improve student learning in this area.

Plan for topic "Students completing the course will be able to recognize procedures and techniques to serve as a base for further study in the more sophisticated methods utilized in interviewing and counseling.": 2013/14

Although satisfied with the outcome, consider pedagogical changes that emphasize specific principles and concepts within this area, such as classroom exercises and case studies in order to achieve a higher success rate.

### DVC Instructional Course SLO Action Plans

#### 24. Introduction to Motivational Interviewing Skills [ADS-102] belonging to Health Science [ADS]

**Plan for topic "Students completing the course will be able to identify the key components of motivational interviewing."**: 2016/17

This class is the second course to take in the series of Addiction counseling and is critical for learning skills in counseling. The observational practicum is a good plan to really observe the skills. We will record these in the future for students to use and practice.

**Plan for topic "Students completing the course will be able to demonstrate basic listening skills."**: 2014/15

I will develop a guideline sheet (rubric) for peers to use when evaluating each other and provide a sample of how to use it before having them use it to rank each other.

**Plan for topic "Students completing the course will be able to identify the steps of the Stages of Change model."**: 2013/14

The results are in line with our expectation of the students in regards to their ability to identify the steps of the Stages of Change model. The essay questions also got at their ability to apply their understanding of this information. We will assess another topic next time this course is due for assessment. We will continue to develop more vignettes for students so they can practice identifying the stages of change model and applying that knowledge towards determining effective treatment strategies.

**Plan for topic "Students completing the course will be able to demonstrate basic listening skills."**: 2010/11

94% of the students agreed and strongly agreed to achieving the student learning outcome, which shows a success in nearing the target goal of 95%. If this student learning outcome is assessed again in the future, the goal would be to surpass 95% of the students to achieve the outcome. Since it appears by the results that the outcome was successfully achieved, a new student learning outcome will be assessed in the future, with the goal of achieving the 95% or above successful results.
25. Topics in Addiction Studies [ADS-150] belonging to Health Science [ADS]
DVC Instructional Course SLO Action Plans

26. Ethical and Legal Concerns for ADS Counselors [ADS-151] belonging to Health Science [ADS]

Plan for topic "Students completing the course will be able to compare and contrast the legal and ethical issues related to confidentiality." : 2016/17

Using these online certification programs that students will likely have to complete in their career anyway seems like a great assessment tool that we will continue to use. They can take the test as many time as they need, so all are more likely to succeed at this outcome.

Plan for topic "Students completing the course will be able to compare and contrast the legal and ethical issues related to confidentiality." : 2013/14

These results validates our instruction in this area. We will assess topic #3 next cycle.

Plan for topic "Students completing the course will be able to examine the ethical and legal guidelines (HIPPA) used when counseling." : 2011/12

To increase survey completion rate we will offer an incentive to return survey.
27. Relapse Prevention [ADS-152] belonging to Health Science [ADS]

Plan for topic "Students completing the course will be able to demonstrate at least one relapse prevention technique used to help people with addiction problems."

- 2017/18
  ADS students tend to use personal experience rather than theory learned through course materials. We need to remind them that the theory is based on research and is to be cited. We will include this in the rubric.

Plan for topic "Students completing the course will be able to identify the role of triggers in relapse."

- 2013/14
  We have noted that some students were not successful in explaining and understanding successful strategies to prevent relapse. More lecture and activities will be covered.

Plan for topic "Students completing the course will be able to identify the relapse dynamic in chronic alcoholism and addiction."

- 2011/12
  Continue to monitor and adapt curriculum to refine students understanding of relapse.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to identify recommended treatment approaches for clients with co-occurring disorders.": 2017/18

- It would work best if we determine clientele at each facility prior to sending students to make sure they are serving co-occurring clients. We may need to reduce the observation to 2 instead of 3 center visits.

Plan for topic "Students completing the course will be able to utilize the Diagnostic Statistical Manual IV in order to distinguish alcohol abuse from chemical dependency.": 2014/15

- The assignment planning was not long enough. More guidance needs to be done in class. Plan is to add a class day to discuss rough drafts prior to final submission

Plan for topic "Students completing the course will be able to compare and contrast various co-occurring disorders.": 2011/12

- Maintain essay for final exam. Assess topic #2 on next cycle.
<table>
<thead>
<tr>
<th>Plan for topic</th>
<th>Year</th>

</tbody>
</table>
**DVC Instructional Course SLO Action Plans**

**Plan for topic "Students completing the course will be able to recognize the importance of social and community systems in the treatment and recovery process."**: 2016/17

Places students into the community is so valuable for learning application of content. We will likely pursue more assignments like this as we see it as very valuable for students to see how Addiction community resources function.

**Plan for topic "Students completing the course will be able to create treatment strategies based on clients' stage of dependence change or recovery."**: 2014/15

Stages of change and cognitive behavioral therapy needs to be further broken done to 2 steps for each stage-- we used to cover the whole stage-- now we will go over each stage and offer examples and practice before moving to next stage.

**Plan for topic "Students completing the course will be able to understand a variety of addiction treatment models."**: 2012/13

The likert scale has not been the best way to assess depth of understanding. We will assess with objective essay grading for the 2013-2014 class.
DVC Instructional Course SLO Action Plans

31. Introduction to Codependency and Family Issues [ADS-170] belonging to Health Science [ADS]

Plan for topic "Students completing the course will be able to create treatment strategies based on clients' stage of dependence change or recovery.": 2018/19

With a new instructor starting, we would like to maintain this activity and likely revise the rubric to meet newer treatment plan requirements

Plan for topic "Students completing this course will be able to identify functional and dysfunctional family patterns of behavior": 2015/16

This assignment is a 3 week assignment requiring family oral and online family research. The family tree once developed then needs further research into known family behavior patterns and/or outcomes. Even with this extensive time commitment the learning that comes out of this is valuable for counselors in training. We will look into some more efficient online sources further for possible use (i.e. ancestry.com)

Plan for topic "Students completing the course will be able to recognize the importance of social and community systems in the treatment and recovery process.": 2013/14

reassess with more objective measure such as paper evaluation
32. ADS Field Work I [ADS-171] belonging to Health Science [ADS]

Plan for topic "Students completing the course will be able to recognize the importance of social and community systems in the treatment and recovery process."

Most students took the time to review their placement sites database of local outside social and community agencies. They were able to describe in detail the purpose and benefit of the selected organizations as well as list the necessary information in order to make an effective referral to a future client. What would be useful in the future is to follow this with a group assignment that would have each student assist in the creation of a class directory of local resources developed by all of the students in the course.

Plan for topic "Students completing this course will be able to demonstrate through role-play and written assignments basic interviewing skills necessary."

I want to make the interview role-plays more poignant for the students by having them videotape their role-plays. It will take me doing this assignment over more time in and out of class time.

Plan for topic "Students completing the course will be able to create helping strategies and treatment plans for people with a variety of addiction problems."

Although the sample is small (only one section each semester), the results are good. We will continue to work with onsite supervisors to spend time with students as they prepare treatment plans. We will also work to develop some more treatment planning tools to put in the online course for students.
33. ADS Field Work II [ADS-172] belonging to Health Science [ADS]

Plan for topic "Students completing ADS-172 will be able to create helping strategies and a case study on a client at an addiction treatment facility."

As agencies change their protocols on client files and case notes, we will need to modify our assignments related to this SLO to reflect the current standards in the field.

Plan for topic "Students completing the course will be able to recognize the importance of social and community systems in the treatment and recovery process."

This class is a field work class. Each student spends 135 hours in a community based recovery treatment facility. To encourage more opportunities for the student to engage with the administration, we will create a survey students will use to interview a staff member and get the information to complete the assignment.

Plan for topic "Students completing ADS-172 will be able to create helping strategies and a case study on a client at an addiction treatment facility."

These are good results. We will continue what we are doing that is working and in addition we will start earlier in the semester helping students identify a person at their clinic that is a good candidate for a case study.
34. Student Instructional Assistant [ADS-299] belonging to Health Science [ADS]
Plan for topic "Students completing the course will be able to apply scientific methodologies and concepts of evolutionary theory to the study of primate evolution."

Data were derived from three semesters of day courses. A total of nine individual courses were included. A total of 114 students were assessed. Of the 114 students, 4 out of 5 of the students were successful in the assessment for this topic. A closer analysis of the results shows that the remaining 22 students struggled most often with providing appropriate evidence and supporting statements to describe the subject.

Plan for topic "Students completing the course will be able to analyze and integrate information from various disciplines to develop interpretive models of primate biology, ecology, and behavior."

As a plan of action the department will be to direct instructors to give students research paper assignments that allow students to correlate scientific approaches with specific discoveries related primate biology, ecology, behavior, and evolution. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing the course will be able to apply the theoretical frameworks of paleontology and evolutionary theory to analyzing and interpreting the fossil record of primate evolution."

As a plan of action the department will direct instructors to use subject matter vocabulary handouts with illustrations, and to give assignments that have students visually outline the fossil record of primate evolution. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing the course will be able to apply scientific methodologies and concepts of evolutionary theory to the study of primate evolution."

Overall, a high percentage of students achieved desired result, no plan for further action.

Plan for topic "Students completing the course will be able to analyze and integrate information from various disciplines to develop interpretive models of primate biology, ecology, and behavior."

Course Action Plans

Outcome Assessment History

Page 63 of 2394
No new plan, overall, students performed well on this assessment.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to discern the functions of religion in human society.": 2017/18

As a plan of action the department will direct instructors to provide students with writing samples and direct them to resources such as journals available in the library databases regarding the functions of beliefs regarding magic, witchcraft, and religion in various human societies in the Americas. Instructors will also be directed to collect and evaluate student notes at regular intervals during the course. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing ANTHR-120 will be able to Students successfully completing Anthropology 120 will be able to read, take detailed notes, and write or compose grammatically correct college-level, essay-style responses to questions regarding the functions of beliefs regarding magic, witchcraft, and religion in various human societies in the Americas": 2017/18

As a plan of action the department will direct instructors to provide students with writing samples and direct them to resources such as journals available in the library databases regarding the functions of beliefs regarding magic, witchcraft, and religion in various human societies in the Americas. Instructors will also be directed to collect and evaluate student notes at regular intervals during the course. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing the course will be able to demonstrate an understanding of different religious belief systems in the Americas since prehistoric colonization.".: 2017/18

As a plan of action the department will direct instructors to provide students with writing samples and direct them to resources such as journals available in the library databases regarding different religious belief systems that have developed or been established in the Americas since the colonization of the New World. Instructors will also be directed to collect and evaluate student notes at regular intervals during the course. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing ANTHR-120 will be able to Students successfully completing Anthropology 120 will be able to read, take detailed notes, and write or compose grammatically correct college-level, essay-style responses to questions regarding different religious belief systems that have developed or been established in the Americas since the colonization of the New World." : 2017/18

As a plan of action the department will direct instructors to provide students with writing samples and direct them to resources such as journals available in the library databases regarding different religious belief systems that have developed or been established in the Americas since the colonization of the New World. Instructors will also be directed to collect and evaluate student notes at regular intervals during the course. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing the course will be able to analyze the processes of cultural interaction and cultural change that have occurred in various regions of the New World." : 2017/18

As a plan of action the department will direct instructors to provide students with writing samples that are related to the processes of cultural interaction and cultural change that have occurred in various regions of the New World. Instructors will also be directed to collect and evaluate student notes at regular intervals during the course. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.
### DVC Instructional Course SLO Action Plans

#### Plan for topic "Students completing the course will be able to discern the functions of religion in human society.":

- **2013/14**

  **Interpretation of Results:** Results indicate that the desired outcome for SLO had been obtained in all sections assessed. Summary of Plan: All sections assessed met or exceeded the established criteria for SLO. Course will be assessed again during its regularly scheduled time.

#### Plan for topic "Students completing the course will be able to demonstrate an understanding of different religious belief systems in the Americas since prehistoric colonization."

- **2013/14**

  **Interpretation of Results:** Results indicate that the desired outcome for SLO had been obtained in all sections assessed. Summary of Plan: All sections assessed met or exceeded the established criteria for SLO. Course will be assessed again during its regularly scheduled time.

#### Plan for topic "Students completing ANTHR-120 will be able to Students successfully completing Anthropology 120 will be able to read, take detailed notes, and write or compose grammatically correct college-level, essay-style responses to questions regarding different religious belief systems that have developed or been established in the Americas since the colonization of the New World.":

Plan for topic "Students completing the course will be able to understand how human culture develops, changes and adapts, and how cultural characteristics and the direction in which change takes place can be predictive.": 2017/18

As a plan of action the department will direct instructors to provide students with writing samples and direct them to resources such as journal in the library databases to assist them in understanding how human culture develops, changes and adapts, and the direction in which change takes place can be predictive. Instructors will also be directed to collect and evaluate student notes at regular intervals during the course. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing the course will be able to understand that archaeological remains take many forms, both material and non-material, and the methods by which archaeologists retrieve them, analyze them interpret them.": 2017/18

As a plan of action the department will direct instructors to provide students with writing samples and direct them to resources such as journals available in databases regarding the ways archaeological remains take many forms, both material and non-material, and the methods by which archaeologists retrieve them, analyze them interpret them. Instructors will also be directed to collect and evaluate student notes at regular intervals during the course. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing the course will be able to understand archaeological ethics are based on ideas that archaeologists should act as stewards of the archaeological record.": 2017/18

As a plan of action the department will direct instructors to provide students with writing samples that are related to understanding how archaeological ethics are based on ideas that archaeologists should act as stewards of the archaeological record. Instructors will also be directed to collect and evaluate student notes at regular intervals during the course. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing the course will be able to understand how human culture develops, changes and adapts, and how cultural characteristics and the direction in which change takes place can be predictive.": 2013/14
The data for the SLO Assessment topics has not been desegregated during this cycle but in future cycles the department will begin to separate the SLO assessment topics. In considering the increase of tests scores with the use of in-class exercises which reinforced assigned material, the instructor plans to use additional techniques to encourage critical thinking and learning. One method is the use of peer discussions on assigned topics as the lesson comes to an end and is in need of summarization. Mandatory office visits for students not meeting minimum assessment levels.

**Plan for topic "Students completing the course will be able to understand that archaeological remains take many forms, both material and non-material, and the methods by which archaeologists retrieve them, analyze them interpret them."**: 2013/14

**Plan for topic "Students completing the course will be able to understand archaeological ethics are based on ideas that archaeologists should act as stewards of the archaeological record."**: 2013/14

**Plan for topic "Students completing the course will be able to understand how human culture develops, changes and adapts, and how cultural characteristics and the direction in which change takes place can be predictive."**: 2010/11

Overall improvement is needed in this area. Will continue to monitor this area.

**Plan for topic "Students completing the course will be able to understand that archaeological remains take many forms, both material and non-material, and the methods by which archaeologists retrieve them, analyze them interpret them."**: 2010/11

Some improvement is necessary for this objective and will continue to monitor student results.

**Plan for topic "Students completing the course will be able to understand archaeological ethics are based on ideas that archaeologists should act as stewards of the archaeological record."**: 2010/11

Overall good success in having students understand the ethical dimensions of archaeological work.
38. Introduction to Archaeological Field Methods [ANTHR-126] belonging to Social Science [ANTHR]
### 39. Cultural Anthropology [ANTHR-130] belonging to Social Science [ANTHR]

Plan for topic "Students completing the course will be able to analyze how behavior in different cultures' groups is adaptive and/or maladaptive."

</tr>
</tbody>
</table>
Plan for topic "Students completing the course will be able to apply the scientific method to understand human cultural behavior.": 2018/19

As a plan of action the department will encourage instructors to use subject matter handouts with illustration that point out how scientific methods are used to understand the subject matter. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing the course will be able to evaluate importance of saving traditional cultures.": 2018/19

As a plan of action the department will encourage instructors to direct students to specific subject matter resources, such journals, video lectures and presentation, and to use the library resources, that illustrate the need to preserve traditional courses so ad to augment the lecture they give on this particular topic. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing the course will be able to analyze how behavior in different cultures' groups is adaptive and/or maladaptive.": 2013/14

The data for the SLO Assessment topics has not been desegregated during this cycle but in future cycles the department will begin to separate the SLO assessment topics. In considering the increase of tests scores with the use of in-class response papers, the instructors plan to use additional techniques to reenforce learning while the material is still fresh in the students mind and provide timely feedback on weak areas. One method that will be tried is mandatory office visit by students not meeting early assessment levels. Another planed action is the use of more peer discussions on the topics assigned to the in-class daily response papers before submission.

Plan for topic "Students completing the course will be able to describe the advantages and disadvantages of cultural relativism.": 2013/14

The data for the SLO Assessment topics has not been desegregated during this cycle but in future cycles the department will begin to separate the SLO assessment topics. In
considering the increase of tests scores with the use of in-class response papers, the instructors plan to use additional techniques to reenforce learning while the material is still fresh in the students mind and provide timely feedback on weak areas. One method that will be tried is mandatory office visit by students not meeting early assessment levels. Anther planed action is the use of more peer discussions on the topics assigned to the in-class daily response papers before submission.

Plan for topic "Students completing the course will be able to apply the scientific method to understand human cultural behavior.": 2013/14

The data for the SLO Assessment topics has not been desegregated during this cycle but in future cycles the department will begin to separate the SIO assessment topics. In considering the increase of tests scores with the use of in-class response papers, the instructors plan to use additional techniques to reenforce learning while the material is still fresh in the students mind and provide timely feedback on weak areas. One method that will be tried is mandatory office visit by students not meeting early assessment levels. Anther planed action is the use of more peer discussions on the topics assigned to the in-class daily response papers before submission.

Plan for topic "Students completing the course will be able to evaluate importance of saving traditional cultures.": 2013/14

The data for the SLO Assessment topics has not been desegregated during this cycle but in future cycles the department will begin to separate the SIO assessment topics. In considering the increase of tests scores with the use of in-class response papers, the instructors plan to use additional techniques to reenforce learning while the material is still fresh in the students mind and provide timely feedback on weak areas. One method that will be tried is mandatory office visit by students not meeting early assessment levels. Anther planed action is the use of more peer discussions on the topics assigned to the in-class daily response papers before submission.

Plan for topic "Students completing the course will be able to analyze how behavior in different cultures' groups is adaptive and/or maladaptive.": 2010/11

Results were acceptable. Continued monitoring on this objective will continue.

Plan for topic "Students completing the course will be able to assess the impact of modernization and globalization on human cultures.": 2010/11

Continue to present material in similar manner and continue to monitor results.

Plan for topic "Students completing the course will be able to evaluate importance of saving traditional cultures.": 2010/11

Continue to monitor responses from students.
### 40. Native Americans [ANTHR-135] belonging to Social Science [ANTHR]

**Plan for topic "Students completing the course will be able to demonstrate knowledge of the array of indigenous cultures that developed in the Americas prior to European contact."**: 2017/18

This course will be evaluated the next time it is offered.

**Plan for topic "Students completing the course will be able to demonstrate knowledge of the array of indigenous cultures that developed in the Americas prior to European contact."**: 2011/12

No action plan for course.

**Plan for topic "Students completing the course will be able to analyze the effects of European contact on cultural patterns in the Americas."**: 2011/12

No plan for course on this outcome. Very satisfactory results.
DVC Instructional Course SLO Action Plans

41. Biological Anthropology [ANTHR-140] belonging to Social Science [ANTHR]
Plan for topic "Students completing the course will be able to apply scientific methodologies to understanding evolutionary processes.": 2017/18
As a plan of action the department will direct instructors to use subject matter vocabulary handouts with illustration that will assist students in applying scientific methodologies and the theory of evolution by natural selection to explain the patterns of evolutionary diversification that produced the Tree of Life. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing ANTHR-140 will be able to apply scientific methodologies and the theory of evolution by natural selection to explain the patterns of evolutionary diversification that produced the Tree of Life."": 2017/18
As a plan of action the department will direct instructors to use subject matter vocabulary handouts with illustration that will assist students in applying scientific methodologies and the theory of evolution by natural selection to explain the patterns of evolutionary diversification that produced the Tree of Life. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing the course will be able to incorporate knowledge of basic principles of genetics, heredity, and evolution."": 2017/18
As a plan of action the department will direct instructors to create handouts or presentations that provide more clear examples of the three basic principles to augment the lectures they give on this particular topic. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing the course will be able to apply paleontological evidence of different fossil hominid species to explain aspects of how humans evolved from chimp-like forms."": 2017/18

As a plan of action the department will direct instructors to provide students with writing samples that are related to the subject matter resources such as journals available in the library databases. Instructors will also be directed to collect and evaluate student notes at regular intervals during the course. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

### Plan for topic "Students completing ANTHR-140 will be able to SLO #3. Students successfully completing Anthropology 140 will be able to read, take detailed notes, and write or compose grammatically correct, college level, essay-style responses to questions on hominin evolution and adaptation."*: 2017/18

As a plan of action the department will direct instructors to provide students with writing samples that are related to the subject matter resources such as journals available in the library databases. Instructors will also be directed to collect and evaluate student notes at regular intervals during the course. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

### Plan for topic "Students completing ANTHR-140 will be able to SLO #3. Students successfully completing Anthropology 140 will be able to apply scientific methodologies and the theory of evolution by natural selection to explain the patterns of evolutionary diversification that produced the Tree of Life."*: 2013/14

Summary of Plan: All sections assessed met or exceeded the established criteria for SLO. Because of the new modular frameworks being introduced progressively, department will continue to assess this course for 2014-2015.

### Plan for topic "Students completing the course will be able to apply scientific methodologies to understanding evolutionary processes."*: 2013/14

Summary of Plan: All sections assessed met or exceeded the established criteria for SLO. Because of the new modular frameworks being introduced progressively, department will continue to assess this course for 2014-2015.

### Plan for topic "Students completing the course will be able to apply paleontological evidence of different fossil hominid species to explain aspects of how humans evolved from chimp-like forms."*: 2013/14

Summary of Plan: All sections assessed met or exceeded the established criteria for SLO. Because of the new modular frameworks being introduced progressively, department will continue to assess this course for 2014-2015.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing ANTHR-140 will be able to SLO #3. Students successfully completing Anthropology 140 will be able to read, take detailed notes, and write or compose grammatically correct, college level, essay-style responses to questions on hominin evolution and adaptation.": 2013/14

Summary of Plan: All sections assessed met or exceeded the established criteria for SLO. Because of the new modular frameworks being introduced progressively, department will continue to assess this course for 2014-2015.

Plan for topic "Students completing the course will be able to apply scientific methodologies to understanding evolutionary processes.": 2010/11

Performance summaries indicated that students did better on these questions covered in the last two units.

Plan for topic "Students completing ANTHR-140 will be able to Students successfully completing Anthropology 140 will be able to apply scientific methodologies and the theory of evolution by natural selection to explain the patterns of evolutionary diversification that produced the Tree of Life."": 2010/11

Performance summaries indicated that students did better on these questions covered in the last two units.

Plan for topic "Students completing the course will be able to incorporate knowledge of basic principles of genetics, heredity, and evolution."": 2010/11

Student performance was satisfactory. I may consider assessing each objective at the end of relevant units rather than waiting until the end of the semester.

Plan for topic "Students completing the course will be able to apply paleontological evidence of different fossil hominid species to explain aspects of how humans evolved from chimp-like forms."": 2010/11

I may consider assessing relevant objectives earlier in the semester rather than at the end of the semester.

Plan for topic "Students completing ANTHR-140 will be able to SLO #3. Students successfully completing Anthropology 140 will be able to read, take detailed notes, and write or compose grammatically correct, college level, essay-style responses to questions on hominin evolution and adaptation."": 2010/11

I may consider assessing relevant objectives earlier in the semester rather than at the end of the semester.
DVC Instructional Course SLO Action Plans

42. Biological Anthropology Laboratory [ANTHR-141L] belonging to Social Science [ANTHR]

Plan for topic "Students completing the course will be able to demonstrate knowledge of the array of scientific approaches and techniques, and their application to the study of hominid biology, ecology, behavior, and evolution." : 2017/18

As a plan of action the department will be to direct instructors to give students research paper assignments that allow students to correlate scientific approaches with specific discoveries related to the subject matter of the assessment. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing the course will be able to apply paleontological and comparative anatomical techniques to analyze the biological, evolutionary, and adaptational patterns of known hominid species." : 2017/18

As a plan of action the department will direct instructors to give students handouts that point out the patterns of adaptation found in various hominin species, and to create assignments that allow students to illustrate patterns of adaptations relevant to this SLO. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing ANTHR-141L will be able to SLO #2. Students successfully completing Anthropology 141L will be able to apply paleontological and comparative anatomical techniques to document and analyze the patterns of adaptation found in various hominin species." : 2017/18

As a plan of action the department will direct instructors to give students handouts that point out the patterns of adaptation found in various hominin species, and to create assignments that allow students to illustrate patterns of adaptations relevant to this SLO. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing this course will be able to develop a working understanding of the basics of cell biology, molecular biology, and genetics and apply these to the analysis of the genetic basis of human variation." : 2017/18

As a plan of action the department will direct instructors to use subject matter vocabulary handouts with illustrations, and to give assignments that have students visually outline the basics of cell biology, molecular biology, and genetics. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.
Plan for topic "Students completing the course will be able to apply paleontological and comparative anatomical techniques to analyze the biological, evolutionary, and adaptational patterns of known hominid species.": 2013/14
Summary of Plan: All sections assessed met or exceeded the established criteria for SLO. Because of the new modular frameworks being introduced progressively, department will continue to assess this course for 2014-2015.

Plan for topic "Students completing ANTHR-141L will be able to SLO #2. Students successfully completing Anthropology 141L will be able to apply paleontological and comparative anatomical techniques to document and analyze the patterns of adaptation found in various hominin species.": 2013/14
Summary of Plan: All sections assessed met or exceeded the established criteria for SLO. Because of the new modular frameworks being introduced progressively, department will continue to assess this course for 2014-2015.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the array of scientific approaches and techniques, and their application to the study of hominid biology, ecology, behavior, and evolution.": 2011/12
No plan, overall good results.

Plan for topic "Students completing the course will be able to apply paleontological and comparative anatomical techniques to analyze the biological, evolutionary, and adaptational patterns of known hominid species.": 2011/12
no Plan, overall, ok results for the assessment.

Plan for topic "Students completing ANTHR-141L will be able to SLO #2. Students successfully completing Anthropology 141L will be able to apply paleontological and comparative anatomical techniques to document and analyze the patterns of adaptation found in various hominin species.": 2011/12
no Plan, overall, ok results for the assessment.
43. Topics in Anthropology [ANTHR-155] belonging to Social Science [ANTHR]
44. Independent Study [ANTHR-298] belonging to Social Science [ANTHR]
DVC Instructional Course SLO Action Plans

45. Student Instructional Assistant [ANTHR-299] belonging to Social Science [ANTHR]
Plan for topic "Students completing the course will be able to understand and apply information about Arabic culture and customs related to food.": 2016/17

Overall, we are satisfied with the results.

An overwhelming majority of students got 5 out of 5.

Of the 2 students who failed, one had an overall grade of C, and the other a C. Both students were struggling in the class and had a poor attendance record.

The quiz was probably too easy, since most of the class time was spent on teaching the alphabet and there was not much vocabulary and grammar to be tested in.

We will try to see if we can shorten the time spent on the alphabet and introduce more texts and dialogues.

Plan for topic "Students completing the course will be able to recognize and understand Arabic words and basic sentences in writing and speech." : 2016/17

Overall, we are satisfied with the results.

An overwhelming majority of students got 5 out of 5.

Of the 2 students who failed, one had an overall grade of C, and the other a C. Both students were struggling in the class and had a poor attendance record.

The quiz was probably too easy, since most of the class time was spent on teaching the alphabet and there was not much vocabulary and grammar to be tested in.

DVC Instructional Course SLO Action Plans

47. Second Term Arabic [ARABC-121] belonging to Foreign Language [ARABC]

Plan for topic "Students completing the course will be able to recognize words and sentence structure and to comprehend them.": 2018/19

This course will be assessed in Spring 2020

Plan for topic "Students completing this course will be able to practice communicating verbally in daily situations, at a basic-intermediate level with clear pronunciation in Arabic.": 2015/16

Students overall performance was satisfactory. Students who received A or B prepared their presentations earlier and consulted with me before the presentation. Most students chose the easy subject of talking about themselves, however, I was happy to see a few students who ventured into other subjects and did well.

I will require students to turn in their first draft and give them suggestions before the presentation.

Plan for topic "Students completing the course will be able to express themselves in Arabic.": 2012/13

Reading and comprehension results are satisfactory. We will continue encouraging students to go to the FL computer and tutorial labs.

Plan for topic "Students completing the course will be able to demonstrate an understanding of some socio-linguistic and cultural aspects of Arabic.": 2012/13

Very satisfied with the results. We started oral presentations and role-plays early in the semester and it helped students develop their conversational skills. We will continue using the same teaching methods and encouraging students to go to the FL computer and tutorial labs.

Plan for topic "Students completing the course will be able to recognize words and sentence structure and to comprehend them.": 2011/12

Incorporate oral presentations and role in class activities and find ways to measure competence.

Plan for topic "Students completing the course will be able to express themselves in Arabic.": 2011/12

Incorporate oral presentations and role in class activities and find ways to measure competence.

Plan for topic "Students completing the course will be able to demonstrate an understanding of some socio-linguistic and cultural aspects of Arabic.": 2011/12

Come up with themes of cultural activities as out of class activities.

Plan for topic "Students completing the course will be able to recognize words and sentence structure and to comprehend them.":

### 52. Introduction to Architecture and Environmental Design [ARCHI-120] belonging to Architecture/Engineering [ARCHI]

#### Plan for topic "Students completing the course will be able to communicate architectural concepts using graphic conventions and representational methods."

- **2017/18**: No action plan is needed at this time.

#### Plan for topic "Students completing the course will be able to construct physical models of architectural elements and spaces."

- **2017/18**: No action plan needed at this point, continue teaching course using same instructional methods.

#### Plan for topic "Students completing the course will be able to identify notable architects, design concepts, canonical buildings, and precedents in architecture."

- **2014/15**: No action needed at this time.

#### Plan for topic "Students completing the course will be able to communicate architectural concepts using graphic conventions and representational methods."

- **2011/12**: No SLO related changes are recommended for this course.

- **2010/11**: No action plan needed at this time, continue with current course teaching methods.

#### Plan for topic "Students completing the course will be able to construct physical models of architectural elements and spaces."

- **2010/11**: No action plan needed at this point, continue teaching course using same instructional methods.

#### Plan for topic "Students completing the course will be able to demonstrate an understanding of building components, structures, and systems in relation to design."

- **2010/11**: No action plan needed at this time, continue teaching course with current instructional methods.

#### Plan for topic "Students completing the course will be able to identify notable architects, design concepts, canonical buildings, and precedents in architecture."

- **2010/11**: No action plan needed at this point, continue teaching course using current instructional methods.

#### Plan for topic "Students completing the course will be able to identify the historical and contemporary role of architects in the profession and related design fields."

- **2010/11**: No action plan needed at this point, continue teaching course using current instructional methods.

No action is needed at this time

Plan for topic "Students completing the course will be able to successfully draw objects in the model space of AutoCAD." : 2014/15
Although all students were successful in completing this competency, the older adult students require more assistance to accomplish the task. Although younger students like the element of online instruction, it was determined that this type of course should only be taught in a face-to-face format, so the distance education option was removed from this course outline.

Plan for topic "Students completing ARCHI-126 will be able to use all the Draw and Modify functions to create a CAD drawing." : 2014/15
Although all students were successful in completing this competency, the older adult students require more assistance to accomplish the task. Although younger students like the element of online instruction, it was determined that this type of course should only be taught in a face-to-face format, so the distance education option was removed from this course outline.

Plan for topic "Students completing the course will be able to utilize orthographic projection methods and multi-view drawings to describe three dimensional objects.": 2017/18

After the assignment was graded, students reviewed the project with the instructor and with each their classmates to address the unclear area.

Plan for topic "Students completing the course will be able to construct shadows of architectural objects.": 2017/18

After the assignment was graded, students reviewed the project with the instructor and with their classmates to address the unclear area.

Plan for topic "Students completing the course will be able to render materials, surfaces and contours using a range of drafting conventions and media.": 2017/18

After the assignment was graded, students reviewed the project with the instructor and with their classmates to address the unclear area. Then students were asked to redo or correct the incorrect elements.

Plan for topic "Students completing the course will be able to utilize orthographic projection methods and multi-view drawings to describe three dimensional objects.": 2014/15

No action needed at this time.

Plan for topic "Students completing the course will be able to utilize orthographic projection methods and multi-view drawings to describe three dimensional objects.": 2011/12

Do more repetitions will definitely improve percentage, but class time does not allow it.

Plan for topic "Students completing the course will be able to construct shadows of architectural objects.": 2011/12

Will slow down when introducing shadows to students. Perhaps will create 3d visualization animation to demonstrate better (if find more time to prepare). Generally I am happy with the results.

Plan for topic "Students completing the course will be able to render materials, surfaces and contours using a range of drafting conventions and media.": 2011/12

Will slow down when introducing shadows to students. Perhaps will create 3d visualization animation to demonstrate better (if find more time to prepare). Generally I am happy with the results.

Plan for topic "Students completing the course will be able to utilize orthographic projection methods and multi-view drawings to describe three dimensional objects.": 2009/10

Observe class for several more semesters, possibly require ARCHI 119 as prerequisite for course.

Plan for topic "Students completing the course will be able to construct shadows of architectural objects.": 2009/10

No action needed at this time, observe course and possibly require ARCHI 119 as prerequisite in future.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to render materials, surfaces and contours using a range of drafting conventions and media.": 2009/10

No action needed at this time. Final assignment to be modified in new form to compare outcomes for different projects.

Plan for topic "Students completing the course will be able to construct advanced multi-view drawings of buildings and building elements.": 2018/19

No action plan is needed as the teaching methods have evolved over years and the current structure of the course is consistently successful.

Plan for topic "Students completing the course will be able to render materials, surfaces, contextual elements and entourage using a range of drafting conventions and media.": 2018/19

No action plan is needed at this point.

Plan for topic "Students completing the course will be able to utilize perspective representational methods to describe three dimensional objects.": 2015/16

No actions are needed at this time.

Plan for topic "Students completing the course will be able to utilize perspective representational methods to describe three dimensional objects.": 2012/13

No action plan needed at this time, results are excellent.

Plan for topic "Students completing the course will be able to construct advanced multi-view drawings of buildings and building elements.": 2012/13

No action plan needed at this time, results are excellent.

Plan for topic "Students completing the course will be able to communicate architectural concepts using graphic conventions and representational methods.": 2018/19
No change required at this time, continue with course instructional methods and projects.

Plan for topic "Students completing the course will be able to demonstrate an understanding of building components, structures and systems in relation to design.": 2018/19
No change required at this time, continue with course instructional methods and projects.

Plan for topic "Students completing the course will be able to construct physical models or architectural elements and spaces.": 2018/19
No change necessary, but allow students to begin models earlier in the semester to allow more time.

Plan for topic "Students completing the course will be able to communicate architectural concepts using graphic conventions and representational methods.": 2015/16
No action needed at this time.

Plan for topic "Students completing the course will be able to demonstrate an understanding of building components, structures and systems in relation to design.": 2011/12
No plan needed, current results are satisfactory. Course material is challenging and is a capstone project for students exiting the program.

Plan for topic "Students completing the course will be able to construct physical models or architectural elements and spaces.": 2011/12
No plan needed, current results are satisfactory.

Plan for topic "Students completing the course will be able to communicate architectural concepts using graphic conventions and representational methods.": 2010/11
No action plan required, however ARCHI 135 is now a prerequisite for the course to improve computer skills for students entering the class.

Plan for topic "Students completing the course will be able to demonstrate an understanding of building components, structures and systems in relation to design.": 2010/11
No action plan required, new textbook to be used for Spring 2012 covering expanded building system information. potential co-requisite of ARCHI 207 in future.

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to create custom menus and macros.": 2018/19

The software has changed from menu to ribbon interface. Therefore this topic is no longer applicable.

Plan for topic "Students completing the course will be able to develop a drawing database to be used for project management, including bill of materials and estimation.": 2018/19

Right now the assignment is focused primarily on architecture. Next step is to incorporate both architecture and product design assignments.

Plan for topic "Students completing this course will be able to develop three-dimensional digital models for design and presentation": 2018/19

No action plan is needed at this time.

Plan for topic "Students completing the course will be able to develop 3-dimensional drawings for product design and development.": 2015/16

No action plan is needed at this time.

Plan for topic "Students completing the course will be able to develop 3-dimensional drawings for product design and development.": 2015/16

No action plan is needed at this time.

Plan for topic "Students completing the course will be able to develop 3-dimensional drawings for product design and development.": 2012/13

Assessment showed that the current methods used are satisfactory with no need to change those methods of instruction.

Plan for topic "Students completing the course will be able to develop 3-dimensional drawings for product design and development.": 2012/13

Assessment showed that the current methods used are satisfactory with no need to change those methods of instruction.

Plan for topic "Students completing the course will be able to create custom menus and macros.": 2012/13

Assessment showed that the current methods used are satisfactory with no need to change those methods of instruction.

Plan for topic "Students completing the course will be able to develop a drawing database to be used for project management, including
### Plan for topic "Students completing the course will be able to develop a drawing database to be used for project management, including bill of materials and estimation": 2012/13

Assessment showed that the current methods used are satisfactory with no need to change those methods of instruction.

### Plan for topic "Students completing the course will be able to develop 3-dimensional drawings for product design and development.": 2011/12

With 100% of the students responding feeling at least somewhat confident that they were able to complete the SLO, no action or change is planned at this time.

### Plan for topic "Students completing the course will be able to create custom menus and macros." 2011/12

There may need to be more time spent working with the development of macros. The students who responded 'somewhat confident' felt macros was their weak topic.

### Plan for topic "Students completing the course will be able to develop a drawing database to be used for project management, including bill of materials and estimation": 2011/12

**no change at this time**

73. Introduction to Two-Dimensional Design [ART-101] belonging to Art [ART]
Plan for topic "Students completing ART-101 will be able to demonstrate basic color usage within a two-dimensional design context.": 2020/21
While students thought they understood color theory well enough to apply it in practice, their ability to actually do so in practice could have been more successful (moving some "Cs" to "Bs" and "Bs" to "As." Some simpler, low-stakes projects to lead into the assessed color tessellation project might help students to gain a clearer sense of their practical understanding of color manipulation. As well, so activities having students analyze color compositions might clarify their understanding of color theory when applied in a specific compositional context.

Plan for topic "Students completing ART-101 will be able to critique their own work and the work of others using appropriate design vocabulary.": 2020/21
A small, predictable number of students were the most participatory and articulate with others offering their thoughts only when prompted. Canvas allowed students to offer one another written feedback through Discussion Boards) versus verbally during a live (zoom) critique giving shy or less verbal students an alternative way to share their thoughts with the class. This did not seem to translate to greater participation during live critiques, however.

Plan for topic "Students completing this course will be able to describe basic usage and manipulation.": 2020/21
Although 8 students failed to submit a written explanation of their thinking about and use of color in their tessellation design, and while 3 received an assessment of "C," the use of the assignment comment function in Canvas was a very useful way to gain insight into students' understanding of their own knowledge and process.

In the future, I plan to make such student explanations of their planning and execution of their projects a more common requirement for key assignments. Also, I will remind students of the requirement by Canvas announcements as well as by email.

Plan for topic "Students completing ART-101 will be able to utilize basic two-dimensional design principles.": 2017/18
Even though both sections have successfully covered design principles, some students in section 1295 felt not confident on design principles. The instructor will continue looking for better practices by talking with instructor of section 1291.
ART101 faculty is currently discussing effective method of assessing student success in the outcome using methods other than student Likert scale. We will discuss during SP19 FLEX week.

Plan for topic "Students completing ART-101 will be able to Students completing the course will be able to identify examples of contemporary and historical two-dimensional design.": 2017/18

### DVC Instructional Course SLO Action Plans

**ART101 faculty is currently discussing effective method of assessing student success in the outcome using methods other than student Likert scale. We will discuss during SP19 FLEX week.**

**Plan for topic "Students completing ART-101 will be able to Students completing the course will be able to critique their own work and the work of others using appropriate design vocabulary.": 2017/18**

After sharing experiences between instructors, we will continue looking for more effective critique methodologies.

**Plan for topic "Students completing ART-101 will be able to Students completing the course will be able to utilize basic two-dimensional design principles." : 2014/15**

We are satisfied by the fact 100% of students became able to use 2-D design principles in both Fall 2014 and Spring15 semester. Instructors of two sections communicated during semester about effectiveness of the assignments. Since this is relatively new class, we will encourage communication between instructors before, during, and end of semester. During FLEX week of SP2015 instructors had a short meeting. During FLEX week of FA2015 semester, instructors will have another short meeting between instructors who taught and assigned to teach for the first time to share assignments and outcomes.

**Plan for topic "Students completing ART-101 will be able to Students completing the course will be able to identify examples of contemporary and historical two-dimensional design.": 2014/15**

On top of technical demonstrations, instructors may need to show more slide presentations of various art and design samples relating to the topic. Or we may revisit this outcome. During flex week, we will discuss our slide presentation experience. Slide presentation will be more encouraged in ART101. We started to discuss sharing text books. We will further discuss the way to share textbook, audio visual sources, PowerPoint files, etc. Some students in section 1087 suggested to change the name of course. Since it is named as Intro to 2D Design, they expected more design projects. The instructor introduced more of studio foundation assignments. The name was changed from Fundamentals of 2D Design to Introduction to 2D Design. We will discuss more on title and objectives of ART101.

**Plan for topic "Students completing ART-101 will be able to Students completing the course will be able to apply the elements that define two-dimensional art to design projects." : 2014/15**

The results show studio assignments were effective to class level. However, the Topic 1 and 3 wording are very similar and results are also shows similar numbers. We may consolidate these topics into one.
**Plan for topic "Students completing ART-101 will be able to Students completing the course will be able to demonstrate basic color usage within a two-dimensional design context."**: 2014/15

Even though we were satisfied to the results, we should keep improving lectures on color theory and demonstrations on color mixing. One assignment in section 1087 (Color Transformation project) is a little bit too rigorous to some student, instructor may modify the assignment.

**Plan for topic "Students completing ART-101 will be able to Students completing the course will be able to identify, apply, and compare cross cultural theories and concepts of two-dimensional design."**: 2014/15

Presenting art works from various cultures may be encouraged. Students may be given research projects about comparison of various artists from different back ground. Even though we introduced this topic, discussion time was not given. We will need to have a discussion after introducing cross-cultural topic. One student commented â?”learning about Toruâ?’Ts own personal art and style was very beneficial to my learningâ”?. Sometimes, sharing personal experience of art making during class time may engage students in deeper level, instead of talking only theories.

**Plan for topic "Students completing ART-101 will be able to Students completing the course will be able to critique their own work and the work of others using appropriate design vocabulary."**: 2014/15

Even though we were satisfied to the results, we realize that critique process is always difficult for some students. There are so many approaches to classroom critiques. In order to accommodate more people to be engaged to critiques, we will further discuss and share methods if critiques. Section 1087 was very quiet class, so the instructor tried post-it notes instead of verbal comments.
DVC Instructional Course SLO Action Plans

74. Introduction to Three-Dimensional Design and Sculpture [ART-102] belonging to Art [ART]
Plan for topic "Students completing ART-102 will be able to 1. Identify and understand the concepts, terminology, and organizing principles of three-dimensional design. 2. Discuss, analyze, and critique three-dimensional works of art through references to the formal principles of three-dimensional design. 3. Recognize the presence of specific design elements and subject matter in works of three-dimensional art in cross cultural and historical contexts. 4. Recognize the general possibilities of spatial manipulation and three-dimensional design. 5. Independently produce objects, forms, and problem solving projects that successfully incorporate the basic elements and organizing principles of three-dimensional design. 6. Apply individual aesthetic decisions and judgments related to students' own design work. 7. Translation of ideas and visual experiences into tactile form, using both formal and conceptual approaches. 8. Compose in three-dimensions and work in a variety of media which may include but is not limited to clay, wood, plaster, fibers, and mixed media in an appropriate and safe manner."

This Fall 2018, we re-worked the Art 102 course as a part of Title V. SLOs for the course were changed, especially B4. This Assessment confirms that students were being mislead slightly by this SLO. Students in Art 102 do not work with Steel or Clay, so we took this out. We will also work with adjunct to emphasize to students how broad sculpture media is, and that Art 102 is not media-based, but design-based. We also re-worded B4 to clear confusion about what materials MAY be used, and does not mean ALL will be used.

Plan for topic "Students completing ART-102 will be able to 1. Identify and understand the concepts, terminology, and organizing principles of three-dimensional design. 2. Discuss, analyze, and critique three-dimensional works of art through references to the formal principles of three-dimensional design. 3. Recognize the presence of specific design elements and subject matter in works of three-dimensional art in cross cultural and historical contexts. 4. Recognize the general possibilities of spatial manipulation and three-dimensional design. 5. Independently produce objects, forms, and problem solving projects that successfully incorporate the basic elements and organizing principles of three-dimensional design. 6. Apply individual aesthetic decisions and judgments related to students' own design work. 7. Translation of ideas and visual experiences into tactile form, using both formal and conceptual approaches. 8. Compose in three-dimensions and work in a variety of media which may include but is not limited to clay, wood, plaster, fibers, and mixed media in an appropriate and safe manner."

Student survey question #2 seemed the weakest results from the student assessment. The question regarded students self assessment that they “Applied individual aesthetic decisions and judgement related to my own art work.” The question could be better framed to reflect on SLO #2 for this course. Student might feel they do not have enough aesthetic freedom because of project prompts. Instructors now discussing the balance between allowing more freedom of expression versus following formal guidelines for design topics. Most other assessments seem satisfactory.
This section was the first time ART-103 was offered by DCV. An inherent challenge, I found, was for students to understand how important each assignment is to their final grade, as there are fewer of them, in exchange for more lecture and discussion of the historical/cultural context of color that prepares students for each assignment. While not an "action plan" as such, my intent is to make my powerpoints and lectures even more focused and clear, and to better emphasize the need for students to fully invest themselves in each assignment.
DVC Instructional Course SLO Action Plans

76. Drawing I [ART-105] belonging to Art [ART]

Plan for topic "Students completing this course will be able to apply sighting and measuring methods to observational drawing."

2016/17

While this student outcome was a success, there is always room for improvement in ART 105 and its learned outcomes. We will continue to monitor this learned outcome, and all others.

Plan for topic "Students completing this course will be able to apply chiaroscuro drawing techniques."

2016/17

While this student outcome was a success, there is always room for improvement in ART 105 and its learned outcomes. We will continue to monitor this learned outcome, and all others.

Plan for topic "Students completing this course will be able to apply principles of composition (design and organization) in their drawing."

2016/17

While this student outcome was a success, there is always room for improvement in ART 105 and its learned outcomes. We will continue to monitor this learned outcome, and all others.

Plan for topic "Students completing this course will be able to apply the principles of linear perspective."

2016/17

While this student outcome was a success, there is always room for improvement in ART 105 and its learned outcomes. We will continue to monitor this learned outcome, and all others.

Plan for topic "Students completing this course will be able to demonstrate the use of a variety of materials."

2016/17

While this student outcome was a success, there is always room for improvement in ART 105 and its learned outcomes. We will continue to monitor this learned outcome, and all others.

Plan for topic "Students completing this course will be able to identify examples historical and contemporary drawing, critical trends, materials, and approaches."

2016/17

While this student outcome was a success, there were a few students who did not quite understand the question. After going over the learned outcome (after the surveys were collected), I heard a few "oh that's what you meant" responses from students who did understand the topic, just not how it was worded on the survey. There is always room for improvement in ART 105 and its learned outcomes. We will continue to monitor this learned outcome, and all others.

Plan for topic "Students completing this course will be able to critique their own work and the work of others."

2016/17

While this student outcome was a success, there is always room for improvement in ART 105 and its learned outcomes. We will continue to monitor this learned outcome, and all others.

Plan for topic "Students completing the course will be able to identify the elements that define two-dimensional art"

2013/14

There is still room for improvement in this area as far as teaching the material goes. It is hoped that students will acquire even more skill and understanding in upcoming

Course Action Plans | Outcome Assessment History | Page 135 of 2394
Plan for topic "Students completing ART-105 will be able to Students completing ART-105 will be able to demonstrate the use of a variety of drawing mediums.": 2013/14

Because the SLO results are overwhelmingly positive, we will continue teaching it with its current methods. Yet, we plan to ensure supply list on each instructor’s syllabus to cover at least 3 different drawing media including dry and wet medium.

Plan for topic "Students completing ART-105 will be able to Students completing ART-105 will be able to identify examples of historical and contemporary drawing, critical trends, materials and approaches." : 2013/14

Because the SLO results are overwhelmingly positive, we will continue teaching it with its current methods. Yet, because of various strength and discipline by each instructor, different samples and lectures related to class topics are presented by each instructor. We should set up shared holder such as jpeg and PDF library accessible by instructors.

Plan for topic "Students completing ART-105 will be able to Students completing ART-105 will be able to critique their own work and the work of other students in classroom critiques": 2013/14

These results are strong but can certainly be improved upon. Critique is inherently difficult for shy or less articulate students, but this does not mean that they do not understand the critical and technical aspects of drawing. I plan to augment in-class oral critiques with written and paired critiquing to try and ease students into the process and allow them to express their thoughts and observations in a less intimidating situation than the full-class group critique.

Plan for topic "Students completing ART-105 will be able to Upon completion of this course, I am able to demonstrate basic drawing skills, color manipulation, and design principles." : 2012/13

No plan of action as we had over 99% student learned outcome achievement.

Plan for topic "Students completing the course will be able to identify the elements that define two-dimensional art": 2012/13

No plan of action as we had over 99% student learned outcome achievement.

Plan for topic "Students completing the course will be able to demonstrate basic drawing skills, color manipulation, and application of design principles": 2012/13

No plan of action as we had 100% student learned outcome achievement.

Plan for topic "Students completing ART-105 will be able to Upon completion of this course, I am able to identify the elements that define two-dimensional art": 2012/13

No plan of action as we had 100% student learned outcome achievement.

Plan for topic "Students completing ART-105 will be able to Students completing Art 105 will be able to demonstrate basic drawing skills, color manipulation, and design principles." : 2012/13

The plan of action for this course is to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and
align this SLO to reflect the Program’s SLO patterns. While the results were overwhelmingly positive, our plan is to continue to monitor student learned outcomes as we find that the results are be helpful in addressing our students’ needs in relation to their learning.

Plan for topic "Students completing ART-105 will be able to #4 Upon completion of this course, I am able to critique my artwork and the artworks of others.": 2012/13
No plan of action as we had over 99% student learned outcome achievement.

Plan for topic "Students completing the course will be able to critique their own artwork and the artwork of others": 2012/13
No plan of action as we had over 99% student learned outcome achievement.

Plan for topic "Students completing Art-105 will be able to Students completing this course will be able to upon completion of this course, I am able to identify the correlation between interdisciplinary fundamentals, techniques, and concepts of art.": 2012/13
No plan of action as we had over 99% student learned outcome achievement.

Plan for topic "Students completing the course will be able to identify the elements that define two-dimensional art": 2011/12
Increase amount of out of class exercises to increase student competence at lab exercises and focus great student attention on the critique of one another’s work during class critiques, as well as require short written critiques of one another’s work.

Plan for topic "Students completing ART-105 will be able to Upon completion of this course, I am able to demonstrate basic drawing skills, color manipulation, and design principles.": 2011/12

77. Drawing and Color [ART-106] belonging to Art [ART]

Plan for topic "Students completing the course will be able to improve their ability to draw from direct observation": 2016/17

We have since rewritten ART-106 Drawing II. In the fall of 2018 it will be Art and Color. Our plan then is to decrease the time spent of reviewing the use of black and white drawing techniques that are taught in ART 105. We plan to create FLEX workshops on the new course for part-time faculty.

Spring 2017

The results are strong enough to not warrant actions to improve student achievement in this area. While new approaches may be ventured, students clearly feel confident in this area.

We also plan to continue to refine and improve our assessment techniques. As faculty, we have many high-quality discussions about improving our pedagogy in informal settings that do not result in any hard data that can be submitted here. However, when courses such as ART-106 are taught by multiple faculty, going forward, we will collect all of the data from each faculty and have just one faculty submit the results at the end of the semester year. As art faculty we are committed to equity, excellence, and inclusion.

Plan for topic "Students completing ART-106 will be able to creatively interpret and apply formal design elements in the production of images in a wide range of media, format, and surfaces.": 2016/17

Plan for topic "Students completing this course will be able to apply sighting and measuring methods to observational drawing": 2016/17

The results are strong enough to not warrant actions to improve student achievement in this area. While new approaches may be ventured, students clearly feel confident in this area.

Plan for topic "Students completing this course will be able to demonstrate skill in the use of a variety of black and white mediums to create drawings": 2016/17

We all agree that one of the challenges we face is the relatively large number of students in the 2D art area who have cognitive or behavioral challenges and, despite our efforts, do not take advantage of the DSS program offered by DVC.
Results were positive for this learning outcome. We will continue with the assignments as defined in the course outline.

Going forward, we will meet as faculty to collect our data to assess collectively at the end of the year.

**Plan for topic "Students completing this course will be able to demonstrate skill in the use of a variety of color mediums to create drawings": 2016/17**

This course has been rewritten as Color and Drawing so the topics will vary slightly in the fall of 2018 with a greater emphasis on color assignments. We believe this revision will create more student success.

For the majority of the responses we will keep to the same assignments in the course outline. For improvement: color theory examples will be displayed in the classroom for reference with each color assignment.

**Plan for topic "Students completing this course will be able to identify and apply historical and contemporary drawing styles, materials, and subject matter.": 2016/17**

References to historical and contemporary drawing styles will continue. Discussion in class during assignments will continue to reinforce the importance of the ability to recognize different drawing styles, both historical and contemporary, and how they relate to the assignment.

**Plan for topic "Students completing this course will be able to identify and apply principles of two-dimensional design including color theory in the production of drawings": 2016/17**

The results are strong enough to not warrant actions to improve student achievement in this area. While new approaches may be ventured, students clearly feel confident in this area.

**Plan for topic "Students completing this course will be able to critique their own work and the work of other students in classroom critiques." : 2016/17**
DVC Instructional Course SLO Action Plans

While the results are strong enough to not warrant actions to improve student achievement in this area we will continue to demonstrate and use appropriate vocabulary in class critiques to reinforce student's confidence in this area.

Plan for topic "Students completing ART-106 will be able to produce drawings that creatively interpret and apply formal design elements in the production of images in a wide range of media, format, and surfaces.": 2013/14

The results are strong enough to not warrant actions to improve student achievement in this area. While new approaches may be ventured, students clearly feel confident in this area.

Plan for topic "Students completing the course will be able to improve their ability to draw from direct observation": 2013/14

The results are strong enough to not warrant actions to improve student achievement in this area. While new approaches may be ventured, students clearly feel confident in this area.

Plan for topic "Students completing the course will be able to create a portfolio of work demonstrating their individual expression and conceptual skills": 2013/14

The plan of action for this course is to continue teaching it with its current methods while figuring out ways to address issues that some students do not understand the difference between subjective and expressive use of value in their work.

Plan for topic "Students completing ART-106 will be able to design and produce a portfolio of drawings and multiple mediums and formats that demonstrates subjective and expressive use of value.": 2013/14

The plan of action for this course is to continue teaching it with its current methods while figuring out ways to address issues that some students do not understand the difference between subjective and expressive use of value in their work.

Plan for topic "Students completing ART-106 will be able to design and produce a portfolio of drawings and multiple mediums and formats that demonstrates techniques and concepts of abstraction and non-objective art.": 2013/14

We will continue to discuss and compare non objective art and/or abstract art concepts with our students in ART-106. It is true that some students struggle with the merit of these concepts as they want to just learn how to draw "real things", but we feel that it is important component to the overall growth of a student learning how to draw with more depth and variety. This semester's assessment were extremely positive. We feel that most students do enjoy this objective.

Plan for topic "Students completing the course will be able to critique their work and the work of others presented in class": 2013/14

We will continue to discuss and compare non objective art and/or abstract art concepts with our students in ART-106. It is true that some students struggle with the merit of these concepts as they want to just learn how to draw "real things", but we feel that it is important component to the overall growth of a student learning how to draw with more depth and variety. This semester's assessment were extremely positive. We feel that most students do enjoy this objective.
Plan for topic "Students completing ART-106 will be able to design and produce a portfolio of drawings and multiple mediums and formats that demonstrates experimentation with combinations of wet and dry mediums."

In teaching material usage in ART-106 we will continue to stress the importance of using both dry and wet drawing materials. This objective is tricky in that some students are more adept at using and understanding dry materials, and vice versa. Yet it is asked as a single objective. We will discuss perhaps splitting this objective. That said, overwhelmingly positive results in students' responses to this objective.

Plan for topic "Students completing ART-106 will be able to design and produce a portfolio of drawings and multiple mediums and formats that demonstrates observational, expressive, and conceptual analysis or application of color."

Color is a vast subject, and in some ways very subjective. I plan to undertake further study of ways to teach this material to fully explain the simultaneously very scientific aspect of color as a phenomenon of physics, and color as a subjective, emotional element of art and design.

Plan for topic "Students completing ART-106 will be able to design and produce a portfolio of drawings and multiple mediums and formats that demonstrates application and drawing techniques for a variety of color media."

Students respond to this objective well as they love to use color in their work. We will continue to stress the importance of color manipulation with the use of different wet and dry materials. Challenges that arise in this objective are students' ability to use a color technique in depth due to time constraints. Overall our results were very positive, none the less.

Plan for topic "Students completing ART-106 will be able to design and produce a portfolio of drawings and multiple mediums and formats that demonstrates non traditional compositions, formats, surfaces and materials."

While we had positive results, we need to continue to monitor this outcome. The use of non traditional formats/compositions/materials/structures keeps the subject fresh for both us, as teachers, and for our students as well. The challenge might be to keep the options down to a manageable level within the time frame and level/skill of the class.

Plan for topic "Students completing ART-106 will be able to design and produce a portfolio of drawings and multiple mediums and formats that demonstrates conceptually oriented approaches to drawing."

I feel that this objective is a bit redundant. We will discuss its merit.

Plan for topic "Students completing ART-106 will be able to design and produce a portfolio of drawings and multiple mediums and formats that demonstrates integration of form and content."

Extremely positive result. The integration of form and content in the making of artwork is the core of art instruction. We will monitor this objective very closely. Ideally this should
Plan for topic "Students completing ART-106 will be able to construct and prepare appropriate supports and surfaces for a mixed-media drawing."": 2013/14

99% positive response to this objective. We are doing something right. I'd like to suggest that this is covered under the portfolio assessment for the same topic.

Plan for topic "Students completing ART-106 will be able to evaluate and critique class projects using relevant terminology in oral and written formats."": 2013/14

This is always a difficult rubric to judge since many students are simply shy or inarticulate, but don't necessarily grasp the material any less than those who participate regularly in class critiques. By exploring other means of assessing students analytical skills (written and paired critiques, for example), I hope to tease out students who fail to participate in critiques because of shyness, versus a lack of understanding of the formal/critical aspects of visual art.

Plan for topic "Students completing ART-106 will be able to develop and express ideas and concepts through verbal and visual means."": 2013/14

An important objective/component in any studio course. Students need to understand that visual art is not just about making images, it's about expressing a subject, concept, idea, or feeling. It is a way of communicating. Despite our high rate of students comprehending this objective (97%), it is paramount to a visual artist to learn how to do this objective skillfully. We will push this objective in our courses while keep it relevant to our students interests and educational persuits.

Plan for topic "Students completing the course will be able to improve their ability to draw from direct observation": 2012/13

No plan of action as we had 100% student learned outcome achievement.

Plan for topic "Students completing ART-106 will be able to produce drawings that creatively interpret and apply formal design elements in the production of images in a wide range of media, format, and surfaces."": 2012/13

No plan of action as we had 100% student learned outcome achievement.

2008/9

No modifications needed.

Plan for topic "Students completing the course will be able to critique their work and the work of others presented in class": 2008/9

No modifications needed.
### DVC Instructional Course SLO Action Plans

**Plan for topic "Students completing the course will be able to develop observational skills in drawing the human figure.": 2018/19**

We continue to develop strategies to increase student success in observational drawing with demonstrations by the instructor and additional Canvas videos. Most students show great improvement by repeated practice. The limitation of students being able to take only four classes in a "family" hinders development in some students who need more drawing practice to be successful at a higher level.

**Plan for topic "Students completing the course will be able to accurately depict anatomical proportions.": 2018/19**

Since I began devoting one class period to allow students to work on this homework assignment in class, the quality has improved and more students are completing the project. We continue to enhance our instruction of anatomy within figure drawing by taking advantage of many instructional U-tube videos through Canvas. We have found that this improves the students' comprehension of the underlying anatomical structure of the human figure which is crucial to accurate depiction.

**Plan for topic "Students completing ART-107 will be able to compose the figure in an environmental context.": 2018/19**

We are pleased with the improvement we tend to see when we compare the drawing done at the start of the semester before instruction begins with the final drawing. Again, the limitation of students being able to take only four classes in a "family" hinders development in some students who need more drawing practice to be successful at a higher level.

**Plan for topic "Students completing ART-107 will be able to apply knowledge and skill in the traditional drawing media of charcoal and ink.": 2018/19**

Our plan going forward is to continue to develop strategies to increase student success in the use of these materials. Our "Model-thon" figure drawing marathon held once each semester has been increasing in popularity. We might try holding it twice in one semester to provide students with more opportunities to practice the application of pencil, charcoal, and ink techniques.

**Plan for topic "Students completing this course will be able to depict the human figure in an art historical context": 2018/19**

We are continuing to research and provide examples of diverse contemporary artists who meet the criteria to be considered a "master" as examples for our students. Their source does not necessarily have to be Italian Renaissance. We also continue to caution students to verify the source of their master drawing to make sure they are not copying someone else's drawing.

**Plan for topic "Students completing the course will be able to develop observational skills in drawing the human figure."": 2015/16**

We endeavor to demonstrate and reinforce the skills necessary for students to be successful in our figure drawing classes. Most students are but it is the nature of drawing classes that students benefit from the opportunity for repeated practice. Since students may only take figure drawing I once, that opportunity is limited. In addition, it is difficult for us to take in to account the percentage of students with developmental disabilities who take college-level drawing classes. Our plan is to invite a counselor and staff from DSS to our next art department meeting to further discuss strategies for working with students with these challenges.

**Plan for topic "Students completing the course will be able to accurately depict anatomical proportions."": 2015/16**
While most students were successful in the outcome, in order to help address those who were not, we are in the process of creating a new course in the art department called "Anatomy for Artists." The goal for this experimental topics course to provide students the opportunity to better understand structural anatomy so that they will be better prepared for other courses that involves the depiction of the human figure such as figure drawing, figure painting, animation and 3D modeling. We hope that this course may also be a way to bring students from the sciences into the art area as many may benefit from the hands-on experience a drawing class provides. This also ties in to our mission to increase awareness of the synergies possible with the arts and sciences, i.e. S.T.E.A.M..

Plan for topic "Students completing the course will be able to critique work presented in class.": 2015/16
We have noticed an improvement in our students' participation in critiques since we have instituted semi-regular FLEX workshops on best practices for critique. We plan to continue to share ideas in this area to continue to improve student success in this outcome.

Plan for topic "Students completing the course will be able to develop observational skills in drawing the human figure.": 2012/13
2012-12-19: We are satisfied with the results of the survey. Students express confidence in their observational drawing skills. We will continue to emphasize this important aspect of figure drawing in our teaching methods.
2013-05-29: We have revised our surveys to better reflect how the students see their own performance in the class. In the case of topic 1 the students' self survey results closely match the observations of the two instructors. We will revise the surveys again before our next assessment.

Plan for topic "Students completing the course will be able to accurately depict anatomical proportions.": 2012/13
2012-12-19: We met our goal of 70% or more. We will continue to refine our methods of instruction in regard to communicating methods of depicting anatomical proportions.
2013-05-29: We are pleased that our revision of the wording in the survey has given students some clarification on how to better express their assessment of their ability to "accurately depict anatomical proportions." Most answered "I excel here. I am extremely confident in my ability in this area." or "I am confident in my ability in this area though I see room for improvement." Four students did admit that "My skills have improved but I still struggle with this." (Disagree) We will take another look at the wording of the survey and perhaps remove "though I see room for improvement." A few students commented that "There's always room for improvement."

Plan for topic "Students completing the course will be able to critique work presented in class.": 2012/13
2012-12-19: Our goal has been met. Our plan is to continue to improve our instructional methods to enhance students' critique skills and visual art vocabulary.
2013-05-29: We continue to experiment with critique procedures and rubrics. We want every student to feel confident in their ability to use visual art vocabulary to asses their own work and feel confident providing constructive criticism to their classmates.

Plan for topic "Students completing ART-107 will be able to recognize and draw value pattern of surface anatomy.": 2012/13
2012-12-19: We will continue to assess the students and refine our teaching methods in the areas of anatomy and tonal drawing techniques.
2013-05-29: As the lead faculty in figure drawing, I plan to revise the figure drawing course, removing ART 106 as a prerequisite. We have rewritten our lower level drawing and design courses and the new ART 105 will be a more appropriate course to recommend to students before taking figure drawing. ART 105 has a tonal drawing component which will better prepare students to achieve this outcome.
<table>
<thead>
<tr>
<th>Topic</th>
<th>2012-12-19</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students completing ART-107 will be able to compose the figure in an environmental context.</td>
<td>While our goal was met, the fact that a relatively large number (5) did not express confidence in the skill, we will spend more time in class discussing the issues of background, context, environment and perspective. 2013-05-29: I plan to reword this topic to better express the goal which is to draw the figure accurately in perspective in an interior space. The word &quot;environmental&quot; may be confusing to students in this context.</td>
</tr>
<tr>
<td>Students completing ART-107 will be able to apply knowledge and skill in the traditional drawing media of charcoal and ink.</td>
<td>Our goal was met so no major revisions are planned at this time. We will continue to assess the outcome on a regular basis as required. 2013-05-29: After reading the student comments on the surveys, it was realized that the use of charcoal and the use of ink might need to be separate topics. Ink wash is a more challenging medium so a few students qualified their responses expressing less confidence with ink than with charcoal. We will consider this option and reassess when next scheduled to do so.</td>
</tr>
<tr>
<td>Students completing the course will be able to develop observational skills in drawing the human figure.</td>
<td>The measurement criteria have been met so no modifications are planned at this time. 2012-05-17: The measurement criteria have been met so no major adjustments are planned at this time, though we plan to reassess next semester.</td>
</tr>
<tr>
<td>Students completing the course will be able to accurately depict anatomical proportions.</td>
<td>The measurement criteria were met for the outcome, so no modifications are planned at this time. 2012-05-17: The measurement criteria were met for the outcome, though I would like to continue to refine instruction techniques for communicating the principles of observing anatomical proportions in figure drawing.</td>
</tr>
<tr>
<td>Students completing the course will be able to critique work presented in class.</td>
<td>Since the measurement criteria for the outcome were met, no modifications are planned at this time. 2012-05-17: While a cohort of over 70% of the students agreed that they felt the course prepared them for critiques, the three who answered in the negative are a concern. We need to continue to emphasize the importance of critiques and provide students with clearer rubrics and vocabulary in these situations.</td>
</tr>
<tr>

DVC Instructional Course SLO Action Plans

79. Figure Drawing II [ART-108] belonging to Art [ART]

Plan for topic "Students completing the course will be able to demonstrate their ability to the use color in drawing the figure." : 2018/19

I created a film of myself painting a head in gouache. This seemed to help the students, as they could have access to the video anytime after it was published on Canvas. We teach Figure Drawing I and II concurrently, so it is difficult to devote equal time to demonstrating multiple techniques in class to 2 groups of students. I plan to create a pastel demo video for next semester, as well.

Plan for topic "Students completing the course will be able to critique their work and other work presented." : 2018/19

I have developed a few successful methods for improving student participation in group critiques and we as a department continue to discuss best practices for critique and create FLEX workshops on the topic.

Plan for topic "Students completing ART-108 will be able to demonstrate and build on skills obtained in a beginning figure drawing course." : 2018/19

This outcome is rather vague so we plan to rewrite this SLO the next time the course is due for Title V rewrites.

Plan for topic "Students completing ART-108 will be able to demonstrate stylistic expression in figure compositions." : 2018/19

The wording of this SLO will be revised when we rewrite the course. "Stylistic expression" is too vague to describe what students actually do, which is to objectively depict the whole figure accurately applying the color techniques demonstrated in class. A student can only improve their drawing skills by repeated practice. We continue to figure out ways to better serve our students by providing them with extra figure drawing opportunities, like the Model-thon drawing workshop, but a figure drawing "family" would serve our students better. Ideally, an undergrad art student should have 4 semesters of figure drawing before transferring.

Plan for topic "Students completing the course will be able to create drawings in a variety of media." : 2015/16

We will continue to improve our instruction in the use of pastel and gouache as applied to figure drawing, through instructor demonstrations and slide presentations of the work of other artists.

Plan for topic "Students completing the course will be able to create drawings in a variety of media." : 2012/13

We have reworded our surveys to give students clarification on what "Strongly Agree" ("I excell here. I am extremely confident in my ability in this area.") and Agree ("I am confident in my ability in this area though I see room for improvement.") versus Disagree ("My skills have improved but I still struggle with this.") denote. I think we can still better word these surveys. We will do so when we are scheduled to assess the course again.

Plan for topic "Students completing the course will be able to demonstrate their ability to the use color in drawing the figure." : 2012/13

ART 108 is taught concurrently with ART 107. The classroom is often crowded and the curriculum is face paced for both courses. The instructor's challenge is to provide...
enough time in class to give demos for both groups. As instructors we are constantly experimenting with more efficient ways to do this. My observations in class are consistent with the survey results but I plan to modify my color (pastel and gouache) demos to better explain the concepts of muting colors with their compliments, for example.

| Plan for topic "Students completing the course will be able to critique their work and other work presented." | 2012/13 |
|---------------------------------------------------------------------------------------------------------------|
| 2012-12-06: We are pleased that the students feel confident in their critique skills. We will continue to revise and refine the techniques used in class to better prepare students for speaking about drawing. |
| 2013-05-29: We are pleased with the results of the surveys but will continue to refine our objectives and rubrics for critiques. We want all students to feel confident in their ability to use visual art vocabulary to assess their own work and provide constructive criticism to their classmates. |

| Plan for topic "Students completing ART-108 will be able to demonstrate and build on skills obtained in a beginning figure drawing course." | 2012/13 |
|---------------------------------------------------------------------------------------------------------------|
| 2012-12-06: We are happy with the results. They confirm the that our curriculum is sufficiently challenging for students transitioning from Beginning Figure Drawing to Intermediate Figure Drawing. Our plan is to continue to refine the lab and lectures for ART 108. |
| 2013-05-29: We are pleased with the survey results. However, I feel the topic could be reworded to better describe the particular skills from ART 107 that are built on in ART 108. |

| Plan for topic "Students completing ART-108 will be able to demonstrate stylistic expression in figure compositions." | 2012/13 |
|---------------------------------------------------------------------------------------------------------------|
| 2012-12-06: We plan to assess this course again in the spring of 2013. No changes to the curriculum are planned currently but we will continue to emphasize the basic concepts and techniques of figure drawing which lead to competence in individual stylistic expression. |
| 2013-05-29: We are encouraged by the survey results. Nevertheless, I plan to place a greater emphasis on intermediate figure drawing students' individual expression in the third quarter of the semester after pastel and gouache techniques have been presented and implemented. |

| Plan for topic "Students completing the course will be able to create drawings in a variety of media." | 2011/12 |
|---------------------------------------------------------------------------------------------------------------|
| 2012-01-04: The measurement criteria have been met, therefore no modifications are planned at this time. |
| 2012-05-17: The measurement criteria were met so no modifications are planned at this time. We will assess again in the fall. |

| Plan for topic "Students completing the course will be able to demonstrate their ability to use color in drawing the figure." | 2011/12 |
|---------------------------------------------------------------------------------------------------------------|
| 2012-01-04: The measurement criteria have been met, therefore no modifications are planned at this time. |
| 2012-05-17: The criteria were met so no major modifications are required. We will continue to refine our teaching techniques in communicating the use of ink wash, pastel and gouache in figure drawing. We will assess again in the fall. |

| Plan for topic "Students completing the course will be able to critique their work and other work presented." | 2011/12 |
|---------------------------------------------------------------------------------------------------------------|
| 2012-01-04: The measurement criteria were met so no modifications are planned at this time. |
| 2012-05-17: While the criteria were met, we will redouble our efforts to emphasize to all instructors teaching the course that critique plays an important role in the teaching of |
### Plan for topic "Students completing the course will be able to create drawings in a variety of media."": 2009/10

The measurement criteria have been met, therefore no modifications are planned at this time.
DVC Instructional Course SLO Action Plans

80. Printmaking: Monotype [ART-109] belonging to Art [ART]
Plan for topic "Students completing the course will be able to demonstrate their skills in a broad range of monotype and mono print techniques": 2016/17
Continue seeking effective and dynamic assignments to horn student skills in a broad range of monotype and mono print techniques. We will further develop more assignments including collagraph, which had successful results.

Plan for topic "Students completing the course will be able to combine various printmaking techniques into one print": 2016/17
Continue assign various approaches in monotype and encourage students to combine those various methods. As mixed media approach is encouraged in this class, we are considering changing name to such as Monotype & Mixed Media to clarify the class content.

Plan for topic "Students completing the course will be able to critique their work and the work of others.": 2016/17
Continue seeking effective critique methods. Since two instructors taught to class, they must have exposed to various critique methods, and we will share the methods from each other more.

Plan for topic "Students completing the course will be able to demonstrate their skills in a broad range of monotype and mono print techniques": 2013/14
We are satisfied by the fact 100% of students became able to demonstrate their drawing skills in monotype techniques, which most of students tried for the first time. Yet, one student did not demonstrate enough skill. This may be due to the fact the summer semester is short and there was not enough time to try further between sessions if they miss classes. And after midterm assignment, students were assigned in more photo-mechanical processes. If we teach this class next time in summer, we will further think of better and more effective order of assignments to ensure students can try drawing based processes throughout semester.

Plan for topic "Students completing ART-109 will be able to Students completing the course will be able to combine various printmaking techniques into one print.": 2013/14
We are satisfied by the fact 100% of students became able to combine various techniques into one print as mixed media approach. This is due to the fact most of the students in this semester had prior drawing and painting or another printmaking medium experiences. One student had no prior art experiences, but she was a nurse and her focusing mind and manual skill were suited to printmaking media. If we had other kind of students who have no prior art experience in future semester, we would have to be prepared to come out with additional approaches to make the student to be in this level.

Plan for topic "Students completing ART-109 will be able to Students completing the course will be able to critique their work and the work of others.": 2013/14
Even though we were satisfied to the results, we realize that critique process is always difficult for some students. There are so many approaches to classroom critiques, but neither of us has tried other than what we have been doing. In order to accommodate more people be engaged to critique, we will start to study other methods if critiques.
81. Introduction to Printmaking [ART-110] belonging to Art [ART]

**Plan for topic "Students completing this course will be able to critique their work and the work of others.": 2017/18**

There are various methodologies for critique. Toru Sugita will communicate with Anthony Ryan who taught FA16 for gaining more effective methods of critiques.

**Plan for topic "Students completing this course will be able to create a portfolio demonstrating ideas in a broad range of printmaking techniques."**: 2017/18

Covering all areas: relief, intaglio, planography, and stencil is challenging in one semester. We will continue seeking more effective lesson plan and assignments to cover all. Or we are thinking of removing Stencil from SLO in this class.

**Plan for topic "Students completing the course will be able to demonstrate drawing and composition skills by working in a series of prints.": 2017/18**

We will continue looking for effective assignments to incorporate drawing activity to render 3D forms, as well as composition/design activities for effective communication.

**Plan for topic "Students completing this course will be able to have a basic knowledge of printmaking history."**: 2017/18

Even though survey results shows the lesson have strong component of print history lecture, the lecture can be more broken into small segments to give a chance to have deeper conversation to print history.

**Plan for topic "Students completing this course will be able to critique their work and the work of others.": 2016/17**

There are various methodologies for critique. I will keep widening my perspectives in critiques by learning from other instructors including Anthony Ryan.

**Plan for topic "Students completing this course will be able to create a portfolio demonstrating ideas in a broad range of printmaking techniques."**: 2016/17

We will continue looking for effective combination of assignment to have students understand various printmaking techniques. We will continue seeking more effective methods of image transfer.

**Plan for topic "Students completing the course will be able to demonstrate drawing and composition skills by working in a series of prints.": 2016/17**

We will continue looking for effective assignments to incorporate drawing activity to render 3D forms, as well as composition/design activities for effective communication.

**Plan for topic "Students completing this course will be able to critique their work and the work of others.": 2013/14**

4 students answered “Agree.” It means some students seems less confident than others. I will continue to encourage students to participate in classroom critiques.

**Plan for topic "Students completing this course will be able to combine various printmaking processes into one print.": 2013/14**

Even though 92 % students answered either "strongly agree" or "agree," one student marked "disagree."• I will be continuously helping each student individually for his/her mixed media assignment.

**Plan for topic "Students completing this course will be able to create a portfolio demonstrating ideas in a broad range of printmaking techniques."**: 2013/14
Even though 92% students answered either "strongly agree" or "agree," one student marked "disagree." I will be continuously helping each student individually for each assignment.

Plan for topic "Students completing this course will be able to critique their work and the work of others." 2013/14

No plan of action as we had 100% student learned outcome achievement.

Plan for topic "Students completing this course will be able to combine various printmaking processes into one print." 2012/13

No plan of action as we had 100% student learned outcome achievement.

Plan for topic "Students completing this course will be able to create a portfolio demonstrating ideas in a broad range of printmaking techniques." 2012/13

No plan of action as we had 100% student learned outcome achievement.

Plan for topic "Students completing this course will be able to critique their work and the work of others." 2010/11

No action plan needed as we have 100% achievement for this outcome.

Plan for topic "Students completing this course will be able to combine various printmaking processes into one print." 2010/11

No action planned as we surpassed our achievement goal.

Plan for topic "Students completing this course will be able to create a portfolio demonstrating ideas in a broad range of printmaking techniques." 2010/11

No planned action as we have surpassed our goal (70%) for student achievement for this outcome (95%).

Plan for topic "Students completing this course will be able to critique their work and the work of others." 2009/10

The measurement criteria have been met, therefore no modifications are planned at this time.

Plan for topic "Students completing this course will be able to combine various printmaking processes into one print." 2009/10

The measurement criteria have been met, therefore no modifications are planned at this time.

Plan for topic "Students completing this course will be able to create a portfolio demonstrating ideas in a broad range of printmaking techniques." 2009/10

The measurement criteria have been met, therefore no modifications are planned at this time.
82. Printmaking: Etching I [ART-111] belonging to Art [ART]

Plan for topic "Students completing the course will be able to develop a portfolio demonstrating their ideas in a broad range of intaglio techniques.": 2017/18

Piggy backing ART109 and 111 made me extremely busy throughout semester. Since these classes deal with completely different mediums and lesson plan, I was constantly busy on demos, lectures, critiques, and did not have enough time to assist student studio activities. I will offer each class separately and put in popular time slot to ensure more enrollment.

Plan for topic "Students completing the course will be able to create and produce an etching editioned print." : 2017/18

Edition assignment has been given as print exchange project at the end of semester. Even though students understand the concept of edition print, they had not completed edition at the time of survey. I may give them a small edition project as midterm in future semester. Also, one student produced great edition prints but indication part was wrong. I will look for better lecture and handout on print indication as well.

Plan for topic "Students completing the course will be able to create and produce a multiple color plate etching print": 2017/18

Multi-plate color etching print is the biggest and technically most complex assignment. This semester, in order to enhance student comprehension, I introduced two-plate color layering earlier in semester. And this time I introduced only one of two methods of color separation. More number of students came up with good results this semester. Still two students struggled in this assignment by not receiving enough assistance during lab hours. I will teach only ART111 and 112 Etching classes without ART109 Monotype next time.

Plan for topic "Students completing the course will be able to develop a portfolio demonstrating their ideas in a broad range of intaglio techniques." : 2014/15

Students were given semester-long theme at the beginning and various techniques were assigned throughout the semester. Students feel like a lot techniques were covered. But 20% feel not enough time was given to understand each technique. I will go over each assignment results and analyze which techniques were successful and which ones were not. I will edit by possibly reduce amount of technique or assignments.

Plan for topic "Students completing the course will be able to create and produce an etching editioned print." : 2014/15

Edition assignment has been given as print exchange project at the end of semester. Even though students understand the concept of edition print, they had not completed edition at the time of survey. I may give them a small edition project as midterm in future semester.

Plan for topic "Students completing the course will be able to create and produce a multiple color plate etching print": 2014/15

Multi-plate color etching print is the biggest and technically most complex assignment. Even though result shows positive and this semester was one of best semester in this assignment result, I am aware of some students need more time for this assignment. I will find a way to assign earlier semester so students will have more time to modify and develop.
The plan of action for this course is to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program's SLO patterns. While the results were overwhelmingly positive, our plan is to continue to monitor student learned outcomes as we find that the results are be helpful in addressing our students’ needs in relation to their learning.

### DVC Instructional Course SLO Action Plans

#### 83. Printmaking: Etching II [ART-112] belonging to Art [ART]

**Plan for topic "Students completing the course will be able to demonstrate understanding of intaglio printmaking as the traditional media and application of contemporary methods."**: 2017/18

In Spring18, ART112 was offered in the same time of ART111 & ART109. ART109 & 111 had enrollment but ART112 did not. That is why ART112 did not run in SP18. We will assess next time it runs.

**Plan for topic "Students completing the course will be able to create and produce a developed multiple color plate etching print."**: 2017/18

In Spring18, ART112 was offered in the same time of ART111 & ART109. ART109 & 111 had enrollment but ART112 did not. That is why ART112 did not run in SP18. We will assess next time it runs.

**Plan for topic "Students completing the course will be able to demonstrate photo mechanical procedures in printmaking."**: 2017/18

In Spring18, ART112 was offered in the same time of ART111 & ART109. ART109 & 111 had enrollment but ART112 did not. That is why ART112 did not run in SP18. We will assess next time it runs.

**Plan for topic "Students completing the course will be able to create and produce a developed multiple color plate etching print."**: 2014/15

ART111 covers multiple plate color so I may rewrite outcome slightly different or I will incorporate multiple plate color printing assignment to as required to ART112 students.

**Plan for topic "Students completing the course will be able to demonstrate photo mechanical procedures in printmaking."**: 2014/15

Photo mechanical processes can be more incorporated to ART112. I will gain some new approaches during my sabbatical and will revisit the lesson plan and assignments.

**Plan for topic "Students completing the course will be able to demonstrate understanding of intaglio printmaking as the traditional media and application of contemporary methods."**: 2012/13

The plan of action for this course is to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program's SLO patterns. While the results were overwhelmingly positive, our plan is to continue to monitor student learned outcomes as we find that the results are be helpful in addressing our students' needs in relation to their learning.

**Plan for topic "Students completing the course will be able to create and produce a developed multiple color plate etching print."**: 2012/13

While the results were overwhelmingly positive, our plan is to continue to monitor student learned outcomes as we find that the results are be helpful in addressing our students' needs in relation to their learning.
### DVC Instructional Course SLO Action Plans

#### 84. Printmaking: Woodblock [ART-114] belonging to Art [ART]

**Plan for topic "Students completing the course will be able to demonstrate multi-block registration methods for woodblock."**: 2017/18

I did not use the method Anthony Ryan introduced in FA16. It can be implemented future semesters and compare the outcomes to analyze effectiveness.

**Plan for topic "Students completing the course will be able to demonstrate the reduction method from single-plate color printing."**: 2017/18

Woodblock is piggy back with ART110 Intro to Printmaking. Thus I often do not have time to check the students work over the shoulder. I would like to separate these two classes to teach in different time slots to give more supervision onto this activity.

**Plan for topic "Students completing the course will be able to apply skills of wood engraving for book illustration."**: 2017/18

Many expressed wood engraving was difficult because different from woodblock, yet there was no time to practice. This is another reason for offering woodblock from Intro class. So Woodblock I (introductory) can be taught with woodblock II (advanced). Wood engraving should be assigned only to Woodblock II students.

**Plan for topic "Students completing this course will be able to develop their color theory and sensitivity."**: 2017/18

Continue seeking effective assignments and methodology of teaching color theory through printmaking projects. It may be useful to compose a lecture on color mixing and layering.

**Plan for topic "Students completing the course will be able to demonstrate imaging through printing with letterpress"**: 2017/18

Develop the letterpress area by acquiring complete sets of cast types to teach hand-set types to associate to printed image. Seek funding for necessary equipment and experts to develop area. We invited letterpress artist for a demo this semester, and letterpress area was organized by work study person. As the area lead, Toru Sugita took letterpress class from CCSF and will continue acquiring types and tools and equipment needed. Our letterpress was tough to manage, it needs some maintenance work by specialist.

**Plan for topic "Students completing this course will be able to identify the role of woodblock printmaking in art history"**: 2017/18

Continue develop wood block part in print history lecture. At this point wood block is a part of print history lecture to Intro to Printmaking class. We would look into separate lecture for block printing history if wood block class is separated from Intro to Printmaking class.

**Plan for topic "Students completing the course will be able to demonstrate multi-block registration methods for woodblock."**: 2016/17

The registration system Anthony Ryan introduced to classroom can be implemented future semesters and compare the outcomes to analyze effectiveness.

**Plan for topic "Students completing the course will be able to demonstrate the reduction method from single-plate color printing."**: 2016/17

The registration system Anthony introduced to classroom was for both multi-block and reduction block. It can be implemented future semesters and compare the outcomes to analyze effectiveness.

**Plan for topic "Students completing the course will be able to apply skills of wood engraving for book illustration."**: 2016/17

As well as continue seeking effective methodology to teach wood engraving, we may have to re-visit this topic to open to include other book illustration techniques other than

### Plan for topic "Students completing the course will be able to critique their artwork and the artwork of others": 2014/15

For the past few years we have had one instructor teaching this course and we have historically scheduled this course for the morning hours. In Fall 2015 we are offering a second section of this course in the evening. This will bring in a new population of our students. We predict this new student population will add new value to our critique sessions.

### Plan for topic "Students completing the course will be able to develop skills in the handling of watercolor painting media": 2014/15

Students have expressed their confidence in this area but the instructor noticed that there could be improvement. The instructor will review some of the techniques that were introduced earlier in the semester to ensure best results for the final project.

### Plan for topic "Students completing the course will be able apply their skills and ideas in a broad range of watercolor painting techniques": 2014/15

Students have expressed their confidence in this area but the instructor noticed that there could be improvement. The instructor will review some of the techniques that were introduced earlier in the semester to ensure best results for the final project.

### Plan for topic "Students completing the course will be able to critique their artwork and the artwork of others": 2011/12

The measurement criteria were met so no modifications are needed at this time.

### Plan for topic "Students completing the course will be able to develop skills in the handling of watercolor painting media": 2011/12

The measurement criteria were met so no modifications are necessary.

### Plan for topic "Students completing the course will be able apply their skills and ideas in a broad range of watercolor painting techniques": 2011/12

No major modifications are necessary since the measurement criteria have been met. We will continue to assess this course each time it is offered.

### Plan for topic "Students completing the course will be able to critique their artwork and the artwork of others": 2010/11

The results were overwhelmingly positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

### Plan for topic "Students completing the course will be able to develop skills in the handling of watercolor painting media": 2010/11

The results were overwhelmingly positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

### Plan for topic "Students completing the course will be able apply their skills and ideas in a broad range of watercolor painting techniques": 2010/11

The results were overwhelmingly positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to critique their artwork and the artwork of others": 2009/10
The results were overwhelmingly positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

Plan for topic "Students completing the course will be able to develop skills in the handling of watercolor painting media": 2009/10
The results were overwhelmingly positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

Plan for topic "Students completing the course will be able apply their skills and ideas in a broad range of watercolor painting techniques": 2009/10
The results were overwhelmingly positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.
### Plan for topic "Students completing this course will be able to discuss watercolor painting in an art historical, contemporary, and cultural context with a focus on content and narrative": 2017/18

Michele Krup will continue to present various historical and contemporary watercolor artists as examples of techniques in the watercolor medium and will continue to demonstrate effective applications of these selected techniques. Examples of historical and contemporary narrative in painting will continue with in class presentations.

### Plan for topic "Students completing this course will be able to describe intermediate watercolor materials and techniques.": 2017/18

Michele Krup will continue to introduce and demonstrate intermediate watercolor non-traditional materials, mixed mediums, and techniques. The class will continue with the successful assignment introducing the watercolor monotype printmaking technique with the assistance of Toru Sugita and the DVC art department printmaking classroom and equipment.

### Plan for topic "Students completing this course will be able to discuss strategies for research and the use of reference materials.": 2017/18

Michele Krup will continue with this successful assignment. Students are introduced to research methods, library use, data bases such as ARTSTOR and Google Art. Students will continue to create preliminary studies as they resolve the compositional changes for the final painting. Michele Krup will continue to provide guidance in research techniques and painting methods that apply to the selected assignment.

### Plan for topic "Students completing this course will be able to discuss and review the elements of color theory as applied to watercolor painting.": 2017/18

Michele Krup will continue to research and refine color theory lectures, demonstrations, assignments and exercises. A collection of classroom examples will continual to be updated for student reference.

### Plan for topic "Students completing this course will be able to discuss the process of exploration of various intermediate painting techniques, subject matter, and style.": 2017/18

Michele Krup will continue to refine successful combinations of assignments and materials, incorporating both traditional and non-traditional techniques. Assignment design will continue to explore the opportunity to incorporate subject matter and style by referencing art from historical and contemporary periods.

### Plan for topic "Students completing this course will be able to discuss the role of critical thinking and the use of visual art vocabulary through group and self-evaluation.": 2017/18

Michele Krup will continue explore and apply various methodologies for critique sessions.

### Plan for topic "Students completing the course will be able to create examples of intermediate level techniques and skills in the handling of watercolor painting media": 2014/15
Students have expressed their confidence in this area but the instructor noticed that there could be improvement. The instructor will review some of the techniques that were introduced earlier in the semester to ensure best results for the final project.

**Plan for topic "Students completing the course will be able to identify important watercolor artists throughout history": 2014/15**

Students have expressed their confidence in this area but the instructor noticed that there could be improvement. The instructor will review the artwork of some of the important watercolor artists that were introduced earlier in the semester to ensure better retention.

**Plan for topic "Students completing the course will be able to critique their own artwork and the work of others."": 2014/15**

Students have expressed their confidence in this area but the instructor noticed that there could be improvement. The instructor will introduce new methods of critique both written and oral to insure that all students participate in each critique session.

**Plan for topic "Students completing the course will be able to create examples of intermediate level techniques and skills in the handling of watercolor painting media": 2011/12**

The measurement criteria have been met so no modifications are necessary at this time.

**Plan for topic "Students completing the course will be able to identify important watercolor artists throughout history": 2011/12**

The measurement criteria have been met so no modifications are necessary at this time. We will continue to add new artists to the roster of historical watercolorists.

**Plan for topic "Students completing the course will be able to critique their own artwork and the work of others."": 2011/12**

The measurement criteria have been met so no modifications are necessary at this time. We will continue to assess this course each time it is offered.

**Plan for topic "Students completing the course will be able to create examples of intermediate level techniques and skills in the handling of watercolor painting media": 2009/10**

The results were overwhelmingly positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

**Plan for topic "Students completing the course will be able to identify important watercolor artists throughout history": 2009/10**

The results were overwhelmingly positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

**Plan for topic "Students completing the course will be able to critique their own artwork and the work of others."": 2009/10**

The results were overwhelmingly positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.
### 88. Painting I: Introduction to Painting [ART-126] belonging to Art [ART]

**Plan for topic "Students completing the course will be able to create a painting with a full range of value."**: 2017/18

While the success rate was extremely high for this outcome, our department will continue to monitor the success rate and evaluate how we can continue with its success.

**Plan for topic "Students completing the course will be able to apply the process and procedures necessary to create an oil or acrylic painting."**: 2017/18

While the success rate was extremely high for this outcome, our department will continue to monitor the success rate and evaluate how we can continue with its success.

**Plan for topic "Students completing the course will be able to develop critical thinking and discussion skills through self and group evaluation."**: 2017/18

While the success rate was extremely high for this outcome, our department will continue to monitor the success rate and evaluate how we can continue with its success. This assessment was the most difficult for many students as we have many students from foreign countries who are not native English speakers, inhibiting their ability to participate in a high level. We have implemented written critiques (via CANVAS) which has allowed for some improvement in student success.

**Plan for topic "Students completing ART-126 will be able to apply painting theory and practice through an exploration of various techniques, subject matter and style."**: 2017/18

While the success rate was extremely high for this outcome, our department will continue to monitor the success rate and evaluate how we can continue with its success as we create new assignments to address this outcome.

**Plan for topic "Students completing ART-126 will be able to demonstrate knowledge of the concepts, tools, methods and philosophies of painting."**: 2017/18

While the success rate was extremely high for this outcome, our department will continue to monitor the success rate and evaluate how we can continue with its success and adapt to any changing needs in addressing this outcome from our students.

**Plan for topic "e"**: 2017/18

While the success rate was extremely high for this outcome, our department will continue to monitor the success rate and evaluate how we can continue with its success and adapt to any changing needs in addressing this outcome from our students.

**Plan for topic "Students completing the course will be able to create a painting with a full range of value."**: 2014/15

We plan to continue to emphasize to students the importance of value contrast in painting. This is reinforced in the curriculum of our two drawing courses, ART-105 Drawing I and ART-106 Drawing II, and in our Introduction to Design Art-101 course that precede ART 126 on the curricular pathway i.e. "flowchart" for courses in the art area.

**Plan for topic "Students completing the course will be able to apply the process and procedures necessary to create an oil or acrylic painting."**: 2014/15

---

Course Action Plans  
Outcome Assessment History  
Page 169 of 2394
We are pleased that most students felt confident at the end of the semester regarding this topic, though one student did comment "Overall I feel that I am very close to getting it but all aspects have not fully clicked yet so I tend to struggle when starting a painting." We as faculty will continue to improve our demonstration skill and in the process of mentoring new part-time instructors, continue to emphasize the importance of instructors performing demonstrations.

Plan for topic "Students completing the course will be able to develop critical thinking and discussion skills through self and group evaluation.": 2014/15
The critique process is an SLO in all of the courses in our programs so as faculty we continually discuss improving our methods to improve student participation and success. We are pleased students feel confident in this area but we will not rest on our laurels. Our plan is to continue to hold regular FLEX workshops where faculty may share "best critique practices."

Plan for topic "Students completing ART-126 will be able to apply painting theory and practice through an exploration of various techniques, subject matter and style.": 2014/15
The course curriculum addresses the topics and the instructors are providing the content with lectures, demonstrations and examples. While most of the students expressed confidence in their abilities, two did not. This is often the case with skills that require practice such as painting. This is why we hope at some point our students will have the opportunity to repeat courses to improve their success and equity. Our plan is to continue to advocate on behalf of our students in this regard.

Plan for topic "Students completing ART-126 will be able to demonstrate knowledge of the concepts, tools, methods and philosophies of painting.": 2014/15
We plan to continue to rely on student surveys to help us collect SLO data. Since two students did not feel confident, and one who did also commented that they "could learn more on the methods" we clearly need to pay attention here. We plan to continue to compare our survey results to what we as instructors observe in the classroom. We will also more strongly encourage students to make comments on their surveys.

Plan for topic "e": 2014/15
We plan to continue to rely on student surveys to help us collect SLO data. Since two students did not feel confident, and one who did also commented that they "could learn more on the methods" we clearly need to pay attention here. We plan to continue to compare our survey results to what we as instructors observe in the classroom. We will also more strongly encourage students to make comments on their surveys.

Plan for topic "Students completing the course will be able to create a painting with a full range of value.": 2012/13
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to apply the process and procedures necessary to create an oil or acrylic painting.": 2012/13

The goals for this outcome were met. We will assess as required, continuing to refine our teaching methods regarding communicating the methods of oil and acrylic painting.

Plan for topic "Students completing the course will be able to develop critical thinking and discussion skills through self and group evaluation.": 2012/13

We will continue to assess this outcome as required and monitor students' response regarding their confidence in their critical thinking and discussion skill as applied to painting.

Plan for topic "Students completing ART-126 will be able to apply painting theory and practice through an exploration of various techniques, subject matter and style.": 2012/13

Our plan is to continue to assess this outcome and to refine our teaching methodologies in this area.

Plan for topic "e": 2012/13

We will continue to assess as required, refining our teaching methods as applied to communicating to students the concepts, tools, methods and philosophies of painting.

Plan for topic "Students completing ART-126 will be able to demonstrate knowledge of the concepts, tools, methods and philosophies of painting.": 2012/13

We will continue to assess as required, refining our teaching methods as applied to communicating to students the concepts, tools, methods and philosophies of painting.

Plan for topic "Students completing the course will be able to create a painting with a full range of value.": 2011/12

This are strong positive responses, however, I will continue look for ways to reinforce students’ understanding of value as a primary compositional and modeling device in painting (and drawing.)

Plan for topic "Students completing the course will be able to apply the process and procedures necessary to create an oil or acrylic painting.": 2011/12

I believe this survey result demonstrates the efficacy of ART-126 pedagogy, specifically an emphasis on practical, hands-on lab experience reinforced by theoretical and technical principles and historical context during lecture.

Plan for topic "Students completing the course will be able to develop critical thinking and discussion skills through self and group evaluation.": 2011/12

I believe this survey result demonstrates the efficacy of ART-126 pedagogy, specifically an emphasis on practical, hands-on lab experience reinforced by theoretical and technical principles and historical context during lecture.

Plan for topic "Students completing the course will be able to create a painting with a full range of value.": 2009/10

89. Painting II: Intermediate Painting [ART-127] belonging to Art [ART]

Plan for topic "Students completing the course will be able to create paintings from direct observation of subject matter.": 2016/17

Overall the assignment given for this learned outcome (Personal still-life study) was successful at engaging the student to meet its goal to paint from observation.

Things to consider: perhaps challenging the student to create more thumbnail sketches for better composition before committing to the painting.

Plan for topic "Students completing the course will be able to create paintings from research and reference materials.": 2016/17

The Self Portrait Collage was one of the more popular assignments, as it gave students a lot of creativity while allowing there to be a strong sense of form and structure by use of painting from a collage. The challenge of finding visual elements that describe one’s identity was an enriching experience for students.

Next time: give the students an extra week to complete the assignment. It felt rushed to many.

Plan for topic "Students completing the course will be able to demonstrate their knowledge of the elements of color theory as applied to painting.": 2016/17

This assignment, create a monochrome painting while only using its compliment to darken and to create contrast and space, was given early on during the semester. It was invaluable in learning how to create a more cohesive rendering of form, and to create more realistic shadows. I believe that it was highly successful and needs no tinkering.

Plan for topic "Students completing the course will be able to critique their own artwork and the artwork of others.": 2016/17

I tried several modes of critiquing artwork for each critique. There were three major group critiques, and as many as six one on one critiques. In each, students had to explain their concepts, technique, subject matter, and use of color.

To keep it interesting to all involved, I like to mix up the critiques to ensure that I am not always directing them.

Plan for topic "Students completing the course will be able to create paintings from direct observation of subject matter.": 2012/13

We are satisfied with the results. Students express confidence in their ability to paint from direct observation though we will continue to reiterate the importance of observational drawing skills in painting.
Plan for topic "Students completing the course will be able to create paintings from research and reference materials.": 2012/13

We are satisfied with the results though we will continue to refine our teaching methods to better assist students with taking advantage of a wide range of reference tools available to artists.

Plan for topic "Students completing the course will be able to demonstrate their knowledge of the elements of color theory as applied to painting.": 2012/13

While 100% of the students answered the survey in the positive, I noticed in two of the students some weaknesses in their comprehension of color mixing. We will spend more time in the future reviewing this basic skill for intermediate painting students at the start of the semester.

Plan for topic "Students completing the course will be able to critique their own artwork and the artwork of others.": 2012/13

100% of the students expressed confidence in their critique skills. My observation at the final critique confirmed the results of the student self-survey.

Plan for topic "Students completing the course will be able to create paintings from direct observation of subject matter.": 2011/12

2012-02-29: Due to the crowded nature of SRC's painting studio students do not spend a great deal of time working from direct observation (of still life setups.) Also, lighting in the studio is not optimal for such exercises. I will, however, seek to work around these impediments in order for intermediate students to spend more and better quality time working from direct observation and will also attempt to implement some plein air to supplement in-studio painting.

2012-05-21: The measurement criteria were met so no modifications are planned.

Plan for topic "Students completing the course will be able to create paintings from research and reference materials.": 2011/12

2012-02-29: Students complete several projects based upon photographic references. The range of responses to this question may simply reflect a slight misunderstanding of the question itself. However, this can still be ameliorated by placing more emphasis during lecture on the role of research and reference materials in the act of planning, composing and executing a painting.

2012-05-21: The measurement criteria were met so no modifications are planned. We will continue to assess the course as required.

Plan for topic "Students completing the course will be able to demonstrate their knowledge of the elements of color theory as applied to painting.": 2011/12

2012-02-29: These survey results speak to the efficacy of painting as a medium to thoroughly explore color and its role in composition. While theory classes may teach the concepts of color theory, successfully completing the assignments of ART-127 require an ability to actually manipulate color within the context of a finished work of art.

2012-05-21: The measurement criteria were met so no modification are planned, though as instructors we need to review these concepts with students continually. We will assess this course again in accordance with the SLO schedule.

Plan for topic "Students completing the course will be able to create paintings from direct observation of subject matter.": 2010/11

no plan of action as we have met 100% student learned outcome for this result.

Plan for topic "Students completing the course will be able to create paintings from research and reference materials.": 2010/11

Course Action Plans
### DVC Instructional Course SLO Action Plans

**Plan for topic "Students completing the course will be able to demonstrate their knowledge of the elements of color theory as applied to painting."**: 2010/11

<table>
<thead>
<tr>
<th>Outcome Assessment History</th>
</tr>
</thead>
<tbody>
<tr>
<td>2010/11</td>
</tr>
<tr>
<td>No plan of action as we have met 100% learned outcome achievement.</td>
</tr>
</tbody>
</table>

- no plan of action as we have 100% student learned outcome results.
### DVC Instructional Course SLO Action Plans

#### Plan for topic "Students completing the course will be able to create a series of thematic paintings."

- **2018/19**
  
  I am currently developing "work books" that will serve as a useful reference text for students once they have completed a class, and represent a nexus point for what students are learning in class, through the online component of studio art courses, and their own reflections and research for a given class. This will help "offload" some of the instruction and student work that would otherwise occur in class, allowing greater time to work with more advanced students (like those in 128) in combined sections.

- **2016/17**
  
  We will assess the courses the next time they are offered.

- **2013/14**
  
  We are pleased that the students expressed confidence in their ability to prepare a series proposal and this is consistent with what I, the instructor observed. One issue some of the students had was following through with the proposal, in that a couple were not able to complete as many studies and finished paintings as they had planned. Next time we will work more with students on time management and setting realistic goals.

#### Plan for topic "Students completing the course will be able to demonstrate a refinement of skills in the use of various painting methods and materials."

- **2013/14**
  
  Painting requires repeated practice and fundamental drawing skills. We have been rewriting our painting courses, articulating the necessary skills required to be successful in the class. It is our observation that he lack of repeatability in drawing courses has already impacted the performance of our students in higher level painting courses. As painting instructors it often necessary to provide remedial instruction in some areas of drawing. The student who answered Disagree did not make a comment. We plan to continue to help students improve the quality of their series studies.

#### Plan for topic "Students completing ART-128 will be able to Construct supports for the painting series."

- **2013/14**
  
  We recently created a secured fenced in outdoor space behind A012. This has become an ideal workshop for students to use to prepare stretched canvases and build wood panels. Some students are more comfortable with power tools and some better at stretching canvases but these techniques are demonstrated at least once in every painting class. We plan to continue to emphasize these skills to our students and keep our workshop stocked, accessible and up-to-date.

#### Plan for topic "Students completing ART-128 will be able to create a series of paintings exploring various painting methods and materials demonstrated in class."

- **2013/14**
  
  We are pleased that students are expressing confidence in their ability to employ the various painting techniques and materials demonstrated in class. This is consistent with...
what I as the instructor observed. We plan to continue to present students with a range of technical approaches and encourage exploration in the process of their development as artists.

Plan for topic "Students completing ART-128 will be able to synthesize research and references into a series of finished paintings.": 2013/14

We are pleased student express confidence in their ability to use research materials and references(e.g. books, photography, the internet)to create their paintings. We have notice an overreliance in some cases of students using photo references collected from the internet. We will continue to communicate to students the importance of artists using their own photography and imagination as inspiration for their work and we plan to assist students with these skills.

Plan for topic "Students completing ART-128 will be able to demonstrate critical thinking and the use of art vocabulary through group and self evaluation.": 2013/14

Critique skills are part of very studio course SLO so we are constantly working on improving student abilities in this area. Some students are more reticent by nature so we hold different types of critiques, some of which include a writing component or following rubrics. Our biggest challenge is improving the confidence of students for whom English is a second language. We hold regular critique strategy FLEX workshops for faculty and plan to continue offering these workshops.

Plan for topic "Students completing the course will be able to create a series of thematic paintings.": 2012/13

All student responses were positive. The department will continue to reflect on the teaching methods and curriculum for this class. The department has recently updated and realigned its curriculum and system of recommended/prerequisite courses, and will continue to monitor the student success to make sure that students are meeting this course outcome. Flex workshops on best practices will support student success for this outcome.

Plan for topic "Students completing the course will be able to demonstrate a refinement of skills in the use of various painting methods and materials.".: 2012/13

Students all responded positively in their self-assessments. The department has recently completed a revision and realignment of curriculum to ensure that students are properly prepared for the course through a recommended sequence of courses. The department will continue to monitor the student success level for this outcome, to see if our curricular changes improve student self-assessments. Flex workshops on best teaching practices will also support student success for this outcome.

Plan for topic "Students completing ART-128 will be able to Construct supports for the painting series.": 2012/13

Students all responded positively in their self-assessments. The department has recently completed a revision and realignment of curriculum to ensure that students are properly prepared for the course through a recommended sequence of courses. The department will continue to monitor the student success level for this outcome, to see if our curricular changes improve student self-assessments. Flex workshops on best teaching practices will also support student success for this outcome. In addition, the department has chosen to focus on this objective in both the individual courses that pertain to critique, and for the program-level objective that measures critique. We have given and will continue to give workshops that focus on student success in this outcome.

Plan for topic "Students completing the course will be able to critique their paintings from an objective perspective.": 2012/13
Students all responded positively in their self-assessments. The department has recently completed a revision and realignment of curriculum to ensure that students are properly prepared for the course through a recommended sequence of courses. The department will continue to monitor the student success level for this outcome, to see if our curricular changes improve student self-assessments. Flex workshops on best teaching practices will also support student success for this outcome. We have given and will continue to give workshops that focus on student success in this outcome.
### Plan for topic "Students completing the course will be able to create a cohesive and thematic series of paintings."

#### 2016/17

Based on the results of this SLO, I feel that we have achieved its desirable outcome. We will continue to monitor this learned outcome and its assessment.

#### 2015/16

This course will be assessed during the Fall 2016 term.

### Plan for topic "Students completing the course will be able to demonstrate their ability to critically think and speak about painting"

#### 2016/17

Based on the results of this SLO, I feel that we have achieved its desirable outcome. We will continue to monitor this learned outcome and its assessment.

### Plan for topic "Students completing the course will be able to analyze and solve problems within their paintings"

#### 2016/17

Based on the results of this SLO, I feel that we have achieved its desirable outcome. We will continue to monitor this learned outcome and its assessment.

#### 2012/13

The Art Department has scheduled a Best Practices Round-up during the FA13 Flex days, where the SLO results and recommendations will be discussed, and strategies for increased student success will be shared.

### Plan for topic "Students completing the course will be able to create a cohesive and thematic series of paintings.

#### 2012/13

All students met the desired outcome. To maintain this success, instructors should share best practices and discuss their methods informally.

### Plan for topic "Students completing the course will be able to demonstrate their ability to critically think and speak about painting"

#### 2012/13

The Art Department has scheduled a Best Practices Round-up during the FA13 Flex days, where the SLO results and recommendations will be discussed, and strategies for increased student success will be shared.

### Plan for topic "Students completing the course will be able to analyze and solve problems within their paintings"

#### 2012/13

The results were positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

### Plan for topic "Students completing the course will be able to create a cohesive and thematic series of paintings.

#### 2009/10

The results were positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

### Plan for topic "Students completing the course will be able to demonstrate their ability to critically think and speak about painting"

#### 2009/10

The results were positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

### Plan for topic "Students completing the course will be able to analyze and solve problems within their paintings"

#### 2009/10

The results were positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.
success in meeting the objective.
## DVC Instructional Course SLO Action Plans

### 92. Figure Painting [ART-130] belonging to Art [ART]

#### Plan for topic "Students completing ART-130 will be able to demonstrate proportion and anatomy of the human figure in painting."

**2018/19**

This course will be assessed the next time it is offered. This course will be offered SP20.

#### Plan for topic "Students completing ART-130 will be able to demonstrate proportion and anatomy of the human figure in painting."

**2014/15**

We will continue to emphasize the importance of understanding anatomical structure as applied to figure painting. This is difficult for students to achieve in one semester of figure painting so we plan to create two new courses in the future, Figure Painting II and Anatomy for Artists to improve students success.

#### Plan for topic "Students completing ART-130 will be able to create paintings using the human figure as subject matter."**2014/15**

We plan to reword this topic as it is too vague in describing the manner of the depiction of the human figure. The course content is focuses on objective and representational approaches so this needs to be articulated in the assessment topic.

#### Plan for topic "Students completing ART-130 will be able to demonstrate critical thinking and discussion skills through self and group evaluation."

**2014/15**

Critique skills are included in all of the studio courses in our programs. We plan to continue to meet as faculty to discuss "best practices" for greater student success in critiques.

#### Plan for topic "Students completing ART-130 will be able to 4. Compare historical and contemporary perspectives of the human figure in art."**2014/15**

We plan to give this topic more emphasis. We have been working on creating a new Powerpoint lecture that will present an art historical context for representational figurative painting. We will use it the next time the course is taught.

#### Plan for topic "Students completing ART-130 will be able to Apply critical thinking in the analysis of figurative painting."

**2014/15**

This topic will be reworded and folded in with topic #3.

#### Plan for topic "Students completing ART-130 will be able to Create paintings from imagination, observation, and reference materials."**2014/15**

This is many of the students’ favorite aspect of the class. Some students prefer working from life but most love to use photo references and work from their imagination. Our final assignment addressed this topic directly and all students were successful though most could have used more time to complete their projects. we plan to create a Figure Painting II course to improve student success.
Plan for topic "Students completing this course will be able to Create a painting series proposal utilizing abstraction as a main theme or concept." 2016/17

Much of what was explained seemed to work for the students as they all performed good to excellent on this learned outcome. I will continue to monitor this learned outcome and its assessments.

Plan for topic "Students completing this course will be able to develop a series of preliminary studies referencing contemporary, historical, or cultural examples of abstraction." 2016/17

Much of what was explained seemed to work for the students as they all performed good to excellent on this learned outcome. I will continue to monitor this learned outcome and its assessments.

Plan for topic "Students completing this course will be able to construct supports for the painting series." 2016/17

I believe that the success rate for this assessment speaks for itself. I will continue to monitor this learned outcome and its assessment.

Plan for topic "Students completing this course will be able to create a series of abstract paintings exploring various painting methods and materials demonstrated in class." 2016/17

Much of what was explained was grasped by the students as they all performed good to excellent on this learned outcome. I will continue to monitor this learned outcome and its assessments.

Plan for topic "Students completing this course will be able to synthesize research and references into a series of finished paintings." 2016/17

Much of what was explained was grasped by the students as they all performed good to excellent on this learned outcome. I will continue to monitor this learned outcome and its assessments.

Plan for topic "Students completing this course will be able to demonstrate critical thinking and the use of art vocabulary through group and self evaluation." 2016/17

Much of what was explained was grasped by the students as they all performed good to excellent on this learned outcome. I will continue to monitor this learned outcome and its assessments.

<th>Plan for topic</th>
<th>2016/17</th>
<th>2013/14</th>
</tr>
</thead>
<tbody>
<tr>
<td>&quot;Students completing the course will be able to demonstrate the basic technical skills necessary for the preparation and presentation of art works.&quot;</td>
<td>Based on the results of this SLO. I feel that we have achieved its desirable outcome. We will continue to monitor this learned outcome and its assessment.</td>
<td>Based on the results of this SLO. I feel that we have achieved its desirable outcome. We will continue to monitor this learned outcome and its assessment.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to evaluate the aesthetics of gallery and museum exhibition design.&quot;</td>
<td>Based on the results of this SLO. I feel that we have achieved its desirable outcome. We will continue to monitor this learned outcome and its assessment.</td>
<td>Instructors collected student examples and will use them to inform assignment design and provide models for future students, which will improve instruction and communication of expectations. Instructors will continue to discuss field trip schedule and adapt assignments to local and state-wide exhibition venues.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to interpret the visual relationship between art forms and the display thereof.&quot;</td>
<td>Based on the results of this SLO. I feel that we have achieved its desirable outcome. We will continue to monitor this learned outcome and its assessment.</td>
<td>Instructors debriefed the assignment and how to provide students with more support during the planning and implementation of the project. Student examples were collected and will provide models for future classes. Assignment will be given earlier in the semester, with more instructor feedback during the process. Alteration of the class format from one day to two days per week will provide a better structure for lab/lecture/individual work and individual feedback from instructor(s).</td>
</tr>
</tbody>
</table>

Students did very well with material, but instructors discussed and agreed that the format in which the course was presented was very fatiguing for the students, and might be better presented in a 2 day per week format instead of one day 6 hour class. Students’ abilities to work without fatigue in physical roles and absorb lecture material would be improved. Instructors will continue to accumulate resources regarding technical care and presentation of artworks to provide a better resource pool for student instruction.

Instructors will discuss field trip schedule and adapt assignments to local and state-wide exhibition venues.

Assignment will be given earlier in the semester, with more instructor feedback during the process. Alteration of the class format from one day to two days per week will provide a better structure for lab/lecture/individual work and individual feedback from instructor(s).
95. Sculpture I [ART-138] belonging to Art [ART]

Plan for topic "Students completing this course will be able to create sculpture that utilize basic skills and craftsmanship in various sculpture media.": 2018/19

All students assessed were successful in creating sculpture that utilized basic skills in woodworking, plaster working, and mold making. All students showed evidence of having used basic handtools and evidence of material manipulation. Faculty discussion on this resulted in success linked to focus of basic skills taught in lab curriculum. However, evidence of craftsmanship varied greatly. Levels of mastery of material discussed by faculty as craftsmanship. Action plan includes a sub-division of "craftsmanship" in student grading rubric and expectations for our students to include intentional markmaking or successful handling that highlights material qualities or refined joinery, surface quality, and/or durability.

Plan for topic "Students completing this course will be able to apply technical skill to create sculptures in a variety of materials including but not limited to metal, wood, plaster, modeling material, and found object assemblage.": 2015/16

Students were given 4-5 various projects throughout the semester, reflecting a variety of media. Each new project used a new media. 8 students felt that they only Agreed, not Strongly Agreed, that they were able to create sculpture in a variety of media. In order to achieve even better results, we will try to further demonstrate techniques for each material. We feel that the students who do not Strongly Agree must need further instruction in technical skill rather than introducing a variety of materials.

Plan for topic "Students completing this course will be able to create sculptures that demonstrate the elements and skills of 3-D design of sculpture (such as modeling, mold making, assemblage, subtractive, additive, full round, positive/negative space, line, plane, etc).": 2015/16

The student results for topic number 2 were the same as for topic number 1. We feel we have successfully presented a variety of elements of design topics into the course projects. The 8 students who did not strongly agree might be referring to not having been shown each element of design listed on the topic (Modeling, mold making, assemblage, subtractive, additive, full round, pos/neg space, line, plane, etc). We feel that the "subtractive" design element is one that we have the weakest project guidelines for. We will try to strengthen this project. We are also considering techniques and materials that are best suited for this project.
96. Sculpture II [ART-139] belonging to Art [ART]

Plan for topic "Students completing ART-139 will be able to Students completing ART-135 will be able to apply technical skill to create sculpture in a variety of traditional materials including but not limited to fabrication, foundry, woodworking, and mold-making."**: 2016/17

We will certainly keep offering an assignment in each of the areas: 1. woodworking 2. metal casting 3. welding 4. mold making. It is difficult to work with other techniques and materials; the SLO determines this need. We discussed the technical language in this SLO and determined that it is specific enough to ensure that each technique is taught, but also broad enough that each instructor still has autonomy in the form of the projects around each technique and media.

Plan for topic "Students completing ART-139 will be able to Students completing ART-135 will be able to apply technical skill to create sculpture in a variety of traditional materials including but not limited to fabrication, foundry, woodworking, and mold-making."**: 2013/14

The plan of action for this course is to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program’s SLO patterns. While the results were overwhelmingly positive, our plan is to continue to monitor student learned outcomes as we find that the results are be helpful in addressing our students’ needs in relation to their learning.

Plan for topic "Students completing ART-139 will be able to Students completing ART-135 will be able to demonstrate advanced critical thinking and problem-solving skills in each sculpture project."**: 2013/14

The plan of action for this course is to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program’s SLO patterns. While the results were overwhelmingly positive, our plan is to continue to monitor student learned outcomes as we find that the results are be helpful in addressing our students’ needs in relation to their learning.

Plan for topic "Students completing ART-139 will be able to Students completing ART-135 will be able to Create a body of sculptural artwork that is presented in a final art portfolio."**: 2013/14

The plan of action for this course is to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program’s SLO patterns. While the results were overwhelmingly positive, our plan is to continue to monitor student learned outcomes as we find that the results are be helpful in addressing our students’ needs in relation to their learning.

Plan for topic "Students completing ART-139 will be able to Students completing ART-135 will be able to Use tools and equipment properly and safely to create sculpture, including but not limited to welding equipment, stationary wood power tools, and basic electric and hand tools."**: 2013/14

The plan of action for this course is to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program’s SLO patterns. While the results were overwhelmingly positive, our plan is to continue to monitor student learned outcomes as we find that the results are be helpful in addressing our students’ needs in relation to their learning.
97. From Clay to Bronze [ART-141] belonging to Art [ART]

Plan for topic "Students completing the course will be able to critique their own work and the work of others, addressing aesthetic concerns."

: 2016/17

We decided that the students were not strongly agreeing that they were able to critique their own work and the work of others, or able to fully address aesthetic concerns. We understand that this is a result of the specific art course being very technically heavy, with little room in the curriculum for introductory lessons in elements of 3-D design. While we do not require a prerequisite of Design foundation courses for this course, we see that it is affecting this learning outcome. Everything else in the course is working very well (applying 3-D processes, spatial manipulation, and design to create sculpture), but students are not able to get rich and substantive critiques in the course. We decided to require curriculum that addresses critique work earlier in the semester, and more often, rather than the large end of term critique. We feel that this will address this particular curriculum much better.

Plan for topic "Students completing the course will be able to critique their own work and the work of others, addressing aesthetic concerns."

: 2015/16

This course will be assessed during the Fall 2016 term

Plan for topic "Students completing the course will be able to critique their own work and the work of others, addressing aesthetic concerns."

: 2012/13

The plan of action for this course to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program's SLO patterns. All sections for this course were assessed this semester.

Plan for topic "Students completing the course will be able to critique their own work and the work of others, addressing aesthetic concerns."

: 2010/11

The results were positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

Plan for topic "Students completing the course will be able to apply intermediate three dimensional processes to create sculpture."

: 2010/11

The results were positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

Plan for topic "Students completing the course will be able to recognize some of the general possibilities of spatial manipulation and three dimensional design."

: 2010/11

No modifications are currently planned, since the data indicates that students are meeting the outcome.

Plan for topic "Students completing the course will be able to apply intermediate three-dimensional processes to create sculpture"
No modifications are planned at this time, since the assessment criteria were met.
98. Metal Casting Techniques I [ART-144] belonging to Art [ART]

Plan for topic "Students completing the course will be able to demonstrate aspects of moldmaking for non-ferrous and ferrous metal."

2017/18

Art 144 was re-written as a part of the Title V process in Fall 2018. SLOs were revised to more specifically describe the course work. SLO: B refers to multiple moldmaking techniques. The responses from students indicated that they felt they were not getting various techniques, but perhaps only one technique. This assessment confirms that there are issues with the SLO and the course description in this specific case, and changes were made in Title V.

Plan for topic "Students completing ART-144 will be able to "Upon completion of this course, I am able to use various mold making techniques for multiple kinds of metals."

2017/18

Art 144 was re-written as a part of the Title V process in Fall 2018. SLOs were revised to more specifically describe the course work. SLO: B refers to multiple moldmaking techniques. The responses from students indicated that they felt they were not getting various techniques, but perhaps only one technique. This assessment confirms that there are issues with the SLO and the course description in this specific case, and changes were made in Title V.

Plan for topic "Students completing the course will be able to "Upon completion of this course, I am able to create finished metal art works."

2014/15

Student assessment indicates successful implementation of assessment topic. Because of the 2 students who marked "agree" rather than "strongly agree", we will work to balance the various mold making techniques so that there is more balanced varieties of techniques. We will make each project reflect a different type of mold making process. For example, Ceramic Shell technique, 2-part resin bonded sand mold technique, and standard investment technique.

Plan for topic "Students completing ART-144 will be able to "Upon completion of this course, I am able to use various mold making techniques for multiple kinds of metals."

2014/15

Student assessment indicates successful implementation of assessment topic. Because of the 2 students who marked "agree" rather than "strongly agree", we will work to balance the various mold making techniques so that there is more balanced varieties of techniques. We will make each project reflect a different type of mold making process. For example, Ceramic Shell technique, 2-part resin bonded sand mold technique, and standard investment technique.

Plan for topic "Students completing the course will be able to create finished metal art works."

2014/15

The student assessment for topic #3 indicates successful application of SLO. Because 2 students indicated "Agree" instead of "Strongly agree" we will work harder to allow time in the course schedule for students to complete their work by the end of the semester. We will do this by allowing more lab time to complete the work. We will also analyze the project guidelines to assess how difficult the projects are for completion by the end of the semester. We will look at changing the project guidelines to ask students to make smaller, or less ambitious projects in order to assure that ALL projects can be completed but the end of the semester by all students.
The student assessment for topic #3 indicates successful application of SLO. Because 2 students indicated "Agree" instead of "Strongly agree" we will work harder to allow time in the course schedule for students to complete their work by the end of the semester. We will do this by allowing more lab time to complete the work. We will also analyze the project guidelines to assess how difficult the projects are for completion by the end of the semester. We will look at changing the project guidelines to ask students to make smaller, or less ambitious projects in order to assure that ALL projects can be completed but the end of the semester by all students.

Plan for topic "Students completing ART-144 will be able to Upon completion of this course, I am able to participate in group critiques.":

2014/15

The student assessment indicated success in implementing this student learning outcome. Action plan at this time will involve continuing to strengthen the Critique outcomes.

Plan for topic "Students completing the course will be able to demonstrate skills in metal casting techniques of iron, bronze, and aluminum.":

2014/15

Student results indicated successful implementation of the course SLO topic. Action Plan is to continue to create project guidelines that engage students in the processes of metal casting techniques.

Plan for topic "Students completing ART-144 will be able to Upon completion of this course, I am able to demonstrate skills in metal casting techniques or iron, bronze, and aluminum based on design projects given by the instructor.":

2014/15

Student results indicated successful implementation of the course SLO topic. Action Plan is to continue to create project guidelines that engage students in the processes of metal casting techniques.

Plan for topic "Students completing the course will be able to demonstrate aspects of moldmaking for non-ferrous and ferrous metal.":

2009/10

The results were overwhelmingly positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

Plan for topic "Students completing ART-144 will be able to "Upon completion of this course, I am able to use various mold making techniques for multiple kinds of metals."":

2009/10

The results were overwhelmingly positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

We decided that the students were not strongly agreeing that they were able to critique their own work and the work of others, or able to fully address aesthetic concerns. Much like Art 141, we understand that this is a result of the specific art course being very technically heavy, with little room in the curriculum for introductory lessons in elements of 3-D design. While we do not require a prerequisite of Design foundation courses for this course, we see that it is affecting this learning outcome. Furthermore, Art 145 is the most advanced Metal Arts course available, but students are not required to take the lower Metal Arts classes. Everything else in the course is working very well (perform aspects of casting techniques and employ advanced mold making techniques), but students are not able to get rich and substantive critiques in the course. We decided to require curriculum that addresses critique work earlier in the semester, and more often, rather than the large end of term critique. We feel that this will address this particular curriculum much better.

This course will be assessed the next time it is offered.

No plan of action as we had 100% learned outcome achievement.

No plan of action as we had 100% student learned outcome achievement.

No plan of action as we had 100% student learned outcome achievement.
100. Metalsmithing and Jewelry I [ART-146] belonging to Art [ART]

Plan for topic "Students completing this course will be able to explain and discuss design principles and form for jewelry.": 2018/19

Each of the students present in the final critique were able to discuss design principles and form in their own work and the work of others. This suggests clear success for this SLO. However, we discovered that this only happened in the final critique of the semester because only one final critique has been possible during the course of the semester. Due to extremely high technical requirements in this course, multiple critiques for discussion of design are not possible at this time. Action plans include introducing hybrid online critiques, as well as in-class "concept boards" for students.

Plan for topic "Students completing the course will be able to demonstrate skills in beginning metalsmithing and jewelry techniques.": 2015/16

We feel that this topic is being addressed very well in the course. It is a very broad assessment topic, so we discussed ways that we can create sub-questions for the topic in the surveys next time, in order to gain more insight on which techniques are being demonstrated best, and which techniques are a challenge, if any.

Plan for topic "Students completing the course will be able to create jewelry pieces in silver and copper.": 2015/16

We feel that the survey reflects success in the course instruction. However, the students who Agree, rather than Strongly Agree is much higher in this topic than in the other topics. Overall, we feel that this is because students in the beginning jewelry class work predominantly in copper rather than silver. While both metals are crafted using the same techniques, silver is a little bit more advanced and also much more expensive for beginner students. We feel that the final project in silver is appropriate for beginner students, and are considering changing the SLO topic to reflect the pre-dominance of copper over silver in the course. We will also change the content of the course with regards to copper-working to include more information on how it translates to silver for each application of copper.

Plan for topic "Students completing the course will be able to demonstrate skills in beginning metalsmithing and jewelry techniques.": 2012/13

The plan of action for this course is to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program's SLO patterns. While the results were overwhelmingly positive, our plan is to continue to monitor student learned outcomes as we find that the results are be helpful in addressing our students’ needs in relation to their learning.

Plan for topic "Students completing the course will be able to create jewelry pieces in silver and copper.": 2012/13

While the results were overwhelmingly positive, our plan is to continue to monitor student learned outcomes as we find that the results are be helpful in addressing our students’ needs in relation to their learning.

Plan for topic "Students completing the course will be able to demonstrate silver soldering and fabrication.": 2012/13

The plan of action for this course is to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program's SLO patterns. While the results were overwhelmingly positive, our plan is to continue to monitor student learned outcomes as we find that the results are be helpful in addressing our students’ needs in relation to their learning.

The results were overwhelmingly positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

Plan for topic "Students completing the course will be able to create jewelry pieces in silver and copper."": 2009/10
The results were overwhelmingly positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

Plan for topic "Students completing the course will be able to demonstrate silver soldering and fabrication."": 2009/10
The results were overwhelmingly positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.
DVC Instructional Course SLO Action Plans

101. Metalsmithing and Jewelry II [ART-147] belonging to Art [ART]

Plan for topic "Students completing this course will be able to develop a personal aesthetic design for use in a portfolio": 2018/19

The level of personal aesthetic designs varied greatly. Students whose successful personal aesthetic designs aligned with the instructor's technical demonstrations were most successful. Design aesthetics that required new technical skills beyond what the instructor presented were not successful. About 30% of the students presented weak development of portfolios because the instructor was not able to work on new techniques with this group. This is a result of teaching "staked" classes of Art 146 and 147 together. Instruction is primarily focused on new students in Art 146. Action plan includes working with campus wide cohorts on ways to manage schedule to lower enrollment caps for stacked classes, gain more support staff for staked classes, or separate the staked classes.

Plan for topic "Students completing the course will be able to demonstrate skills in advanced metalsmithing and jewelry techniques.":: 2015/16

We feel that this course is running successfully. However, we wonder why not all students felt strongly about the topic. We feel that the topic question taken directly from the SLO is too broad. In our next assessment we will change the surveys to have sub-questions such as "I am able to demonstrate skills required to create complex chains", "I am able to solder using easy and hard silver solder", and "I am able to fabricate in copper". We hope to gain more insight from changing the surveys. Also, we were able to have a conversation on the complexity of offering many demonstrations for Art 147 students who take the class concurrently with Art 146 (beginner) students. It is harder to offer the Art 147 students much needed one on one time while they practice, while there is a majority of beginner students just beginning and needing lots of attention. We will work on offering more attention to Art 147 students during class and have a sub question that reflects this in the next assessment, such as "I feel that I get adequate time to work, and demonstrations on advanced techniques during the class time such as silver solder, how to emboss, how to develop complex jump ring chains".

Plan for topic "Students completing the course will be able to create complex jewelry pieces in silver.":: 2015/16

We feel that this course is running successfully. Again, we wonder why not all students felt strongly about the topic. Again, like the first topic, we feel that the topic question taken directly from the SLO is too broad. In our next assessment we will change the surveys to add a list of what they were able to successfully complete. We hope to gain more insight from changing the surveys. Also, we were able to have a conversation on the complexity of offering many demonstrations for Art 147 students who take the class concurrently with Art 146 (beginner) students. It is harder to offer the Art 147 students much needed one on one time while they practice, while there is a majority of beginner students just beginning and needing lots of attention. We will work on offering more attention to Art 147 students during class and have a sub question that reflects this in the next assessment, such as "I feel that I get adequate time to work, and demonstrations on advanced techniques during the class time such as silver solder, how to emboss, how to develop complex jump ring chains".

Plan for topic "Students completing the course will be able to demonstrate skills in advanced metalsmithing and jewelry techniques.":: 2012/13

The plan of action for this course is to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program's SLO patterns. While the results were overwhelmingly positive, our plan is to continue to monitor student learned outcomes as we find that
Plan for topic "Students completing the course will be able to create complex jewelry pieces in silver.": 2012/13

The plan of action for this course is to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program's SLO patterns. While the results were overwhelmingly positive, our plan is to continue to monitor student learned outcomes as we find that the results are be helpful in addressing our students' needs in relation to their learning.

Plan for topic "Students completing the course will be able to fabricate hollow forms in silver.": 2012/13

The plan of action for this course is to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program's SLO patterns. While the results were overwhelmingly positive, our plan is to continue to monitor student learned outcomes as we find that the results are be helpful in addressing our students' needs in relation to their learning.

Plan for topic "Students completing the course will be able to critique their own artwork and the artwork of others.": 2012/13

The plan of action for this course is to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program's SLO patterns. While the results were overwhelmingly positive, our plan is to continue to monitor student learned outcomes as we find that the results are be helpful in addressing our students' needs in relation to their learning.

Plan for topic "Students completing the course will be able to demonstrate skills in advanced metalsmithing and jewelry techniques.": 2010/11

The results were positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

Plan for topic "Students completing the course will be able to create complex jewelry pieces in silver.": 2010/11

The results were positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

Plan for topic "Students completing the course will be able to fabricate hollow forms in silver.": 2010/11

The results were positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

Plan for topic "Students completing the course will be able to demonstrate skills in advanced metalsmithing and jewelry techniques.": 2009/10

The results were positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

Plan for topic "Students completing the course will be able to create complex jewelry pieces in silver.": 2009/10

**DVC Instructional Course SLO Action Plans**

102. Topics in Studio Art [ART-150] belonging to Art [ART]

Plan for topic "Students completing this course will be able to 1. Develop a personal style in their depictions of the figure": 2017/18

The course is team taught by a printmaking faculty and a figure drawing faculty. In order to provide more instruction in the depiction of the figure for students taking the class with less experience in that area, we are discussing revising the sequence of instruction. The next time we offer the course, we would like to try doing the painting and drawing portion of the course before the printmaking portion.

Plan for topic "Students completing this course will be able to develop a portfolio demonstrating interpretations of the figure in a broad range of mixed media drawing/painting techniques.": 2017/18

Going forward, we plan to add an additional critique/class discussion to provide students the opportunity to present their individual approaches to the figure using appropriate course vocabulary. We believe this will empower students to more thoughtfully talk about their work and the ideas therein. We may also revise the instruction to spend more time on the use of pastel over monotype.

Plan for topic "Students completing this course will be able to Identify the bones of the human skeleton": 2016/17

This was an experimental topics class that was offered concurrently with Figurative Ceramics I & II. Human anatomy for artists is a complex subject and ideally would be offered as a class by itself.

Plan for topic "Students completing this course will be able to Identify the superficial muscles of the human body": 2016/17

This course would be best offered by itself rather than "piggy-backed" with Figurative Ceramics I & II. Also, the students need to be encouraged to study harder. Anatomy is ultimately about memorization.

Plan for topic "Students completing this course will be able to apply sculptural skills to the depiction of the superficial muscles of the human figure.": 2016/17

While we are pleased with this outcome and the students were successful, the final projects could have demonstrated a greater depth of knowledge and have been more ambitious if the students had been given more time. Ideally, this course would be better if it could be offered on its own. Going forward, we will continue to study the student interest in an anatomy for artists course.

Plan for topic "Students completing ART-150pj will be able to 1. Identify the aesthetic and conceptual attributes of various artistic genres": 2014/15

Continue to refine assignments.

Plan for topic "Students completing ART-150AF will be able to formulate creative concepts using the human figure as subject matter.": 2013/14

We are pleased with the results. We have rewritten the course as ART 130 Figurative Concepts and plan to offer this on a regular basis as students are increasingly interested in the study of the figure through painting.

Course Action Plans

Outcome Assessment History
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing ART-150AF will be able to Critique their paintings and the paintings of other students from an objective perspective." : 2013/14

We are pleased that our students are expressing a growing confidence in critique since it is an SLO for all of our studio classes. We will continue to provide our students with clear rubrics for the process and explore various techniques for improving their performance.

Plan for topic "Students completing ART-150AF will be able to demonstrate knowledge of proportion and anatomy of the human figure in painting." : 2013/14

We think it would benefit students if repeatability of figure drawing were reinstated. Currently, students only have the option to take Figure Drawing I and Figure Drawing II. We plan to write another figure drawing course that focuses more on human anatomy as applied to fine art. We believe this would improve figure drawing skills and thus improve performance in figurative painting.

Plan for topic "Students completing ART-150PN will be able to deepen their understanding of color theory and sensitivity." : 2012/13

No plan of action as we had 100% student learned outcome achievement.

Plan for topic "Students completing ART-150PN will be able to display skills of wood engraving for book illustration." : 2012/13

No plan of action as we had 100% student learned outcome achievement.

Plan for topic "Students completing ART-150PN will be able to incorporate text to image through printing with letter press." : 2012/13

No plan of action as we had 100% student learned outcome achievement.

Plan for topic "Students completing ART-150AF will be able to demonstrate their knowledge of proportion and anatomy of the human figure in painting." : 2012/13

One student commented "I need to practice more." Summer courses provide unique and challenging opportunities for students to work intensely but for a shorter duration. While most students express confidence in this area we will compare the results with those gathered in the fall.

Plan for topic "Students completing ART-150AF will be able to formulate creative concepts using the human figure as subject matter." : 2012/13

We have rewritten this course so it will be a regularly offered class (ART 130 Figurative Concepts). We are pleased with the results here but the new class will have more SLOs and their wording will be refined.

Plan for topic "Students completing ART-150AF will be able to Critique their paintings and the paintings of other students from an objective perspective." : 2012/13

All of our studio courses emphasize critique. One of our challenges as instructors is to be sure everyone participates and feels confident using appropriate terminology. We will continue to develop rubrics and refine our methods of group and self-evaluation in the context of classroom critiques.

Plan for topic "Students completing ART-150PN will be able to understand color printing through reduction process from a single

103. Visual Theory and Practice - Ceramic Art [ART-151] belonging to Art [ART]
Plan for topic "Students completing this course will be able to exercise creative problem solving skills while exploring alternative methods of learning through hands on experience."
The pedagogical methods designed to reach this outcome seem to be successful. During the next assessment cycle we will assess another outcome.

Plan for topic "Students completing this course will be able to describe social, psychological, political, religious, economic, and/or philosophical issues that contextualize the artistic eras studied."
The pedagogical methods designed to reach this outcome seem to be successful. During the next assessment cycle we will assess another outcome.

Plan for topic "Students completing this course will be able to distinguish and describe characteristics of various artistic styles, forms, and representative works from the cultures studied using appropriate vocabulary."
The results of this SLO is satisfactory. An overwhelming 85% of students were successful. In order to encourage an even larger percentage of students to research various artistic styles and complete their journal assignments we will develop increased handouts specific to the class. These will provide supplementary resources where students can explore content relevant to class. This may include assignment lists and expectations, images reviewed in class and links to helpful sites.

Plan for topic "Students completing this course will be able to create original artworks that re-contextualize historic symbols to demonstrate contemporary relevance."
The results of this SLO is satisfactory. An overwhelming 88% of students were successful. In order to encourage an even larger percentage of students to do research in order to re-contextualize historical symbols in their creative work we will develop additional handouts and visuals specific to the class. These will provide a supplementary resource where students can explore content relevant to class. Specifically, additional images reviewed in class and links to helpful sites where they can research historical art and contemporary issues.
### Plan for topic "Students completing the course will be able to identify the formal design elements of art": 2016/17

We are pleased with the results of this outcome and believe it is an accurate and positive measure of student success.

### Plan for topic "Students completing the course will be able to construct basic pottery forms.": 2016/17

We are pleased with the results of this outcome and believe it is an accurate and positive measure of student success.

### Plan for topic "Students completing this course will be able to Create original functional pottery forms.": 2016/17

We are pleased with the results of this outcome and believe it is an accurate and positive measure of student success.

### Plan for topic "Students completing the course will be able to Summarize and describe the ceramic process.": 2016/17

We are pleased with the results of this outcome and believe it is an accurate and positive measure of student success.

### Plan for topic "Students completing the course will be able to construct basic pottery forms.": 2013/14

81% of students felt they completely understood this material, and 19% somewhat understood this material. Additional assignments regarding this topic may be added to the curriculum to increase student's understanding of this topic.

### Plan for topic "Students completing the course will be able to identify the formal design elements of art": 2013/14

81% of students felt they completely understood this material, and 19% somewhat understood this material. Additional assignments regarding this topic may be added to the curriculum to increase student's understanding of this topic.

### Plan for topic "Students completing the course will be able to formally compare the attributes of ceramics and other art forms": 2013/14

The results for this SLO seem satisfactory. No changes in curriculum are triggered by these results.

### Plan for topic "Students completing the course will be able to identify pottery forms from diverse cultures.": 2013/14

The results for this SLO seem satisfactory. No changes in curriculum are triggered by these results.

### Plan for topic "Students completing the course will be able to create original works of ceramic art.": 2013/14

Results for this SLO are satisfactory and do not trigger any changes to curriculum.

### Plan for topic "Students completing the course will be able to apply design decisions in the construction of pottery forms.": 2013/14

Results for this SLO are satisfactory and do not trigger any changes to curriculum.

### Plan for topic "Students completing the course will be able to identify the formal design elements of art": 2011/12

Mr. Tsuruta does an exemplary job of demanding a solid theoretical understanding of three-dimensional design issues generally, as well as issues more specifically pertaining to the medium of wheel-thrown ceramics. These results indicate he should continue developing his pedagogy which has yielded such strong results.
<table>

</tbody>
</table>
Plan for topic "Students completing the course will be able to construct complex forms integrating technical and analytical skills.": 2017/18
The pedagogical methods designed to reach this outcome seem to be successful. During the next assessment cycle we will assess another outcome.

Plan for topic "Students completing this course will be able to identify creative problem-solving strategies for the development of form and surface.": 2014/15
The result for this SLO are satisfactory. An overwhelming 100% of students marked positively. Nonetheless, in order sustain and improve student success, we will introduce additional supplementary handouts and Power Points to further support existing class demonstrations.

Plan for topic "Students completing this course will be able to create original glazes through experimentation.": 2014/15
The result for this SLO is satisfactory but there is room for improvement. An overwhelming 80% of students marked positively, but 20% felt they had not achieved this objective. The majorities of students in Wheel-Thrown Ceramics classes are learning skills and content for the first time. 153 students, who are a minority, have already completed a semester in the studio and are more self-directed. This survey information suggests that all 153 students need to be monitored more closely to guide a larger percentage to successfully complete glaze experiments. This can be accomplished by performing more glaze calculation demonstrations early in the semester for 153 students, clarifying this as their priority during studio time and holding them more stringently to project deadlines.

Plan for topic "Students completing the course will be able to analyze the aesthetic and conceptual attributes of various ceramic genres": 2011/12
These conceptual aspects of ceramics are more difficult for students to grasp than the more hands-on technical skills required by the medium. I will work with Mr. Tsuruta to try and address this. It should be noted that Mr. Tsuruta is already very rigorous in this regard but can still find room to be even more successful.

Plan for topic "Students completing the course will be able to define the fundamentals of three-dimensional design.": 2011/12
This survey sample is too small to be statistically meaningful, however, I will still work with Mr. Tsuruta to seek to improve his students’ understanding of the basic fundamental concepts of three-dimensional design.

DVC Instructional Course SLO Action Plans

106. Hand-Built Ceramics I [ART-154] belonging to Art [ART]

Plan for topic "Students completing this course will be able to identify creative problem-solving strategies to explore unique hand-built ceramics.": 2017/18

We feel that 87% is an acceptable success rate. We will assess different outcomes during the next cycle.

Plan for topic "Students completing this course will be able to Create original Hand-built pottery.": 2017/18

We feel that 87% is an acceptable success rate. We will assess different outcomes during the next cycle.

Plan for topic "Students completing this course will be able to implement basic techniques to construct hand-built pottery.": 2017/18

We feel that 87% is an acceptable success rate. We will assess different outcomes during the next cycle.

Plan for topic "Students completing this course will be able to identify creative problem-solving strategies to explore unique hand-built ceramics.": 2014/15

The result for this SLO seems satisfactory. An overwhelming 95% majority of students marked positively. Nonetheless, in order sustain and improve student success, we will introduce additional supplementary handouts and Power Points to further support existing class demonstrations.

Plan for topic "Students completing this course will be able to apply design decisions in order to synthesize hand-built ceramic form and function.": 2014/15

The result for this SLO seems satisfactory. An overwhelming 95% majority of students marked positively. Nonetheless, in order sustain and improve student success, we will introduce additional supplementary handouts and Power Points to further support existing class demonstrations.

Plan for topic "Students completing the course will be able to analyze the aesthetic and conceptual attributes of various ceramic genres.": 2011/12

These are overwhelmingly positive numbers that speak to Mr. Tsuruta's ability to engage students' interest in an exploration of a range of ceramics genres. These results indicate he should continue as he has been doing.

Plan for topic "Students completing the course will be able to compare the formal attributes of ceramics and other art forms.": 2011/12

As with student response to SLO 1, these are very positive results and speak well of Mr. Tsuruta's thorough treatment of the historical context of ceramics. Still, small improvements to this area of his curriculum could boost these numbers even higher. As coordinator in this area of the Applied Arts and Social Sciences department of SRC, I will work with Mr. Tsuruta to brainstorm ways to achieve this.

Plan for topic "Students completing the course will be able to outline the evolution of ceramic art and its relevance to cultural trends.": 2011/12

As with student response to SLO 1, these are very positive results and speak well of Mr. Tsuruta's thorough treatment of the historical context of ceramics. Still, small improvements to this area of his curriculum could boost these numbers even higher. As coordinator in this area of the Applied Arts and Social Sciences department of SRC, I
## DVC Instructional Course SLO Action Plans

**Plan for topic "Students completing the course will be able to outline the evolution of ceramic art and its relevance to cultural trends."**: 2011/12

These numbers cannot be any higher, and set against the somewhat less enthusiastic responses to questions of this nature put to beginning or intermediate wheel-thrown students, they would seem to indicate a natural evolution in which student conceptual understanding eventually catches up with their technical development. No action seems required in relation to this SLO.

**Plan for topic "Identify the formal design elements and organizational principles of art through projects created in class."**: 2011/12

These numbers cannot be any higher, and set against the somewhat less enthusiastic responses to questions of this nature put to beginning or intermediate wheel-thrown students, they would seem to indicate a natural evolution in which student conceptual understanding eventually catches up with their technical development. No action seems required in relation to this SLO.

**Plan for topic "Students completing the course will be able to outline the evolution of ceramic art and its relevance to cultural trends."**: 2010/11

The results were positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

**Plan for topic "Students completing the course will be able to compare the formal attributes of ceramics and other art forms."**: 2010/11

The results were positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

Plan for topic "Students completing this course will be able to Create original ceramic sculpture": 2016/17
Using the results of a specific assignment to evaluate the successful completion of student learning outcomes has proven to be a meaningful indicator of success. We will continue to use individual assignment grades to evaluate specific outcomes. The success rate of 85% on this student learning outcome is considered acceptable for our program.

Plan for topic "Students completing this course will be able to Apply design decisions in order to synthesize sculpture form and intent.": 2016/17
Using the results of a specific assignment to evaluate the successful completion of student learning outcomes has proven to be a meaningful indicator of success. We will continue to use individual assignment grades to evaluate specific outcomes. The success rate of 85% on this student learning outcome is considered acceptable for our program.

Plan for topic "Students completing this course will be able to choose and apply techniques to construct ceramic sculpture forms.": 2016/17
Using the results of a specific assignment to evaluate the successful completion of student learning outcomes has proven to be a meaningful indicator of success. We will continue to use individual assignment grades to evaluate specific outcomes. The success rate of 85% on this student learning outcome is considered acceptable for our program.

Plan for topic "Students completing the course will be able to identify the formal design elements and organizational principles of art.": 2013/14
We are pleased with the results of the survey because the measurement criteria for outcome # 1 have been met overwhelmingly. However, we have just submitted a re-write for Art-155 in order to meaningfully sequence it's content with a new ceramic sculpture course. This will effect the specific SLO's for Art 155 at the next survey.

Plan for topic "Students completing the course will be able to formally compare the attributes of ceramics and other art forms.": 2013/14
We are pleased with the results of the survey because the measurement criteria for outcome # 2 have been met. However, we have just submitted a rewrite for Art-155 in order to meaningfully sequence it's content with a new ceramic sculpture course. This will effect the specific SLO's for Art-155 at the next survey.

Plan for topic "Students completing the course will be able to trace the evolution of ceramic art and it's relevance to technical, social, cultural and political trends.": 2013/14
We are pleased with the results of the survey because the measurement criteria for outcome # 3 have been met. However, we have just submitted a re-write for Art-155 in order to meaningfully sequence content with a new ceramic sculpture course. This will effect the specific SLO's for Art-155 at the next survey.

Plan for topic "Students completing the course will be able to critique their own artwork and the artwork of others.": 2013/14
We are positive about the results of the survey because the measurement criteria for outcome # 4 have been met. We will, however, emphasize the courses component of
Plan for topic "Students completing the course will be able to identify the formal design elements and organizational principles of art."": 2012/13

For a more focused view on SLOs for this course, student surveys are being reconsidered.

Plan for topic "Students completing the course will be able to formally compare the attributes of ceramics and other art forms."": 2012/13

For a more focused view on SLOs for this course, student surveys are being reconsidered.
The results were positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.
### 108. Figurative Ceramics I [ART-156] belonging to Art [ART]

#### Plan for topic "Students completing the course will be able to both identify and apply the formal design elements and organizational principles of art.": 2016/17

We will continue to reinforce the vocabulary of 2D and 3D design and its principles when we offer the class again in the fall of 2018.

#### Plan for topic "Students completing the course will be able to identify and discuss major Western and non-Western examples of historical and contemporary figurative ceramic art.": 2016/17

The students were a little confused by the wording of this SLO. We will revisit it when the course is due for Title V rewrites.

#### Plan for topic "Students completing the course will be able to critically compare figurative ceramics and other art forms.": 2016/17

The art department as a whole will continue to meet either informally or in FLEX workshops to discuss best practices for student critiques, since it is an SLO for all of our studio classes.

#### Plan for topic "Students completing the course will be able to both identify and apply the formal design elements and organizational principles of art.": 2014/15

We have rewritten the SLOs for ART-156, as part of the Title V process, to emphasize the figurative aspect of the class (students work from live models and other references). The new SLO reads "identify the formal design elements and organizational principles of art through figurative projects created in class." This will help students to make the distinction between our figurative ceramics course and our hand building course, a ceramic sculpture course that does not have an emphasis on depicting the human form.

#### Plan for topic "Students completing the course will be able to identify and discuss major Western and non-Western examples of historical and contemporary figurative ceramic art.": 2014/15

While the majority of responses were positive, a couple of students answered in the "Disagree" category. Given the multi-cultural make-up of our students this does cause some concern. While I did show slides of historical work from Nigeria, Central America, and Asia (both historical and contemporary), the next time this course is taught we plan to place a stronger emphasis on non-Western examples of figurative ceramics. The final project a?oFigure as Metaphora?¯ was an opportunity for students to create a sculpture that included personal iconography. Many brought to the assignment elements from their own cultures, (e.g. a Mexican-American student incorporating Aztec imagery). Perhaps an assignment where students are required to research figurative sculptures from a culture not their own would have been better. This was my first time teaching this course. In the process of creating slide presentations for the students I found myself becoming increasingly interested in the figurative ceramics from countries about which I was previously unaware. I plan to keep this in mind the next time I teach the class.

#### Plan for topic "Students completing the course will be able to critically compare figurative ceramics and other art forms.": 2014/15

This topic about critique is a component of all of our studio classes. We are always interested in finding new ways to improve student participation. This particular group of students was very engaged in the process, probably due to the fact that ceramics in tends to be co-operative, e.g. students load kilns and make clay together. Students tend to perform better in critique when they feel comfortable with other students. We plan to continue to encourage group activities in all of our studio classes to continue to improve...

Plan for topic "Students completing this course will be able to calibrate and manipulate standard photographic equipment and materials (film cameras, traditional darkroom materials, and digital technology) to create photographs." : 2017/18

This assignment is the very first technical shooting assignment and one of the biggest hurdles at that point in the semester is access to supplies as some students are still waiting on funds. We will work to make more resources readily available early on along with working more closely with those students who are still feeling unsure about their cameras. Through CANVAS we have adapted most of our handouts so that they are available electronically, but we will continue to do so to increase accessibility.

Plan for topic "Students completing the course should demonstrate an understanding of basic black and white photographic printing techniques." : 2014/15

Students have expressed their confidence in this area but the instructor noticed that there could be improvement. The instructor will review some of the techniques that were introduced earlier in the semester to ensure best results for the projects.

Plan for topic "Students completing the course should demonstrate knowledge of proper black and white photographic film exposure and film processing techniques." : 2014/15

Students have expressed their confidence in this area but the instructor noticed that there could be improvement. The instructor will review some of the techniques that were introduced earlier in the semester to ensure best results for the final project.

Plan for topic "Students completing the course should demonstrate an understanding of the basic principles and concepts of composition and design to communicate visually using black and white photographs." : 2014/15

Students have expressed their confidence in this area but the instructor noticed that there could be improvement. The instructor will review and modify some of the critique methods that were introduced earlier in the semester to ensure best results for the critique sessions.

Plan for topic "Students completing this course will be able to produce a more complex journalistic project that would be appropriate to use as a work sample in a job application." : 2014/15

Students have expressed their confidence in this area but the instructor noticed that there could be improvement. The instructor will review and modify some of the critique methods that were introduced earlier in the semester to ensure best results for the critique sessions.

Plan for topic "Students completing the course should demonstrate an understanding of basic black and white photographic printing techniques." : 2011/12

The plan of action for this course to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program's SLO patterns. All sections for this course were assessed this semester.

Plan for topic "Students completing the course should demonstrate knowledge of proper black and white photographic film exposure and film processing techniques." : 2011/12

Plan for topic "Students completing the course will be able to develop a body of work that reflects intermediate level of skill in lighting, printing, and exposures as well as a unique, personal photographic style and vision." : 2017/18

There are ways in which we can refine our evaluation processes to make more clear what students should expect to be graded on. We will continue to work on that. We will also provide more materials via CAVNAS for assistance with writing, what artist statements are, and how to refine a project.

Plan for topic "Students completing the course will be able to develop a body of work that reflects intermediate level of skill in lighting, printing, and exposures as well as a unique, personal photographic style and vision." : 2014/15

Students have expressed their confidence in this area but the instructor noticed that there could be improvement. The instructor will review some of the techniques that were introduced earlier in the semester to ensure best results for the final project.

The plan of action for this course to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program's SLO patterns. All sections for this course were assessed this semester.
As this class has been completely restructured and has not run since 2003, there are definitely some elements that we will work out in future semesters. First, more access to printed materials (not online). We are working with the library to update the photography book collection as it is lacking in several areas. More assistance with writing: providing online resources via CANVAS to assist students. More emphasis on how to conduct proper research: this is not always a topic in art classes, but with documentary projects, research is key. We will work to improve and promote best practices.
Plan for topic "Students completing ART-164 will be able to compose and revise a written statement that conveys personal approach to photographic practice." 2017/18

We need to find more ways to stress the importance of writing in the arts. We will work to provide more examples of artists writing about their work and provide more access to writing resources via CANVAS and the DVC library. We will continue to show examples of artwork and discuss the artist's intentions in class but along with that provide more written examples to give clarity to those students writing their first project proposals. We will also discuss the importance of drafts and how editing writing, just like artwork, is critical.

Plan for topic "Students completing ART-164 will be able to assemble a cohesive and focused portfolio of photographs that present a clear theme" 2014/15

Students have expressed their confidence in this area but the instructor noticed that there could be improvement. The instructor will review some of the guidelines for the project that were introduced earlier in the semester to ensure best results for the final project.

Plan for topic "Students completing ART-164 will be able to create a body of work that reflects an advanced level of skill in: a. Lighting b. Film and digital methods of exposure c. Film and digital methods of printing d. Digital manipulation e. Digital uploading f. Film and digital print finishing and sequencing" 2014/15

For the academic year Fall 2014-Spring 2015 we were only able to assess the Fall 2014 class because the Spring 2015 class was canceled due to low enrollment. The low enrollment could be contributed to the recent a?ofamily of classesa? restriction and the lack of a full-time photography instructor.

Plan for topic "Students completing ART-164 will be able to implement professional presentation methods in a final portfolio that are consistent with artistic intent." 2014/15

For the academic year Fall 2014-Spring 2015 we were only able to assess the Fall 2014 class because the Spring 2015 class was canceled due to low enrollment. The low enrollment could be contributed to the recent a?ofamily of classesa? restriction and the lack of a full-time photography instructor.

Plan for topic "Students completing ART-164 will be able to critique class portfolios" 2014/15

For the academic year Fall 2014-Spring 2015 we were only able to assess the Fall 2014 class because the Spring 2015 class was canceled due to low enrollment. The low enrollment could be contributed to the recent a?ofamily of classesa? restriction and the lack of a full-time photography instructor.
113. Advanced Photographic Portfolio Development [ART-165] belonging to Art [ART]
Plan for topic "Students completing this course will be able to create, revise, and assemble a cohesive personal portfolio of photographs that communicate the chosen theme.": 2017/18

This course asks for students to be very independent thinkers and independently driven. We will create more resources for those students who have not been asked to work this way so that they can be successful. We will work with the library, CANVAS and ArtStor to have resources accessible for research purposes. We will spend more time with each student via scheduled individual meetings to ensure the students are working at the correct pace.
114. Projects in Art [ART-250] belonging to Art [ART]

Plan for topic "Students completing ART-250 will be able to produce drawings that creatively interpret and apply observational drawing skills." : 2018/19

We did not offer this course in FA18/SP19. This course will be assessed the next time it is offered.

Plan for topic "Students completing ART-250 will be able to produce drawings that creatively interpret and apply observational drawing skills." : 2014/15

As the instructor, I was very pleased with the quality of the observational drawing skills of the students in the class. All of them had taken ART 105 and Art 106 at DVC so it was gratifying to see those skills applied to more sophisticated drawing problems. We plan to work more on the "interpret" aspect of the topic, however. This may be done on a case by case basis as students enter this slightly higher level class with differing skill levels and may not be appropriate for all of them.

Plan for topic "Students completing ART-250 will be able to produce drawings demonstrating competence in a variety of mixed mediums such as charcoal, ink, pastel, gouache, collage, assemblage, or performance." : 2014/15

We plan to get the 2D faculty together to create this as a new course and offer it again, perhaps in the spring of 2015. It is a great opportunity for students who want to make drawing their preferred medium for artistic expression.

Plan for topic "Students completing ART-250 will be able to Create a thematically consistent series of drawings." : 2014/15
I wrote the curriculum and taught the course for the first time. My hope was that the students would be self-starters and motivated to work independently and this worked well the case of 2 of the 3 students. One student struggled with following through with a “thematically consistent series of drawings” and needed more instruction in this area. When we rewrite the course we will factor in the fact that some students do not work as well independently and need more guidelines and instruction on the preparation of a project proposal.

DVC Instructional Course SLO Action Plans

118. Ceramic Sculpture II [ART-255] belonging to Art [ART]
Plan for topic "Students completing this course will be able to apply techniques to construct ceramic sculpture forms as well as formulate and apply surfaces.": 2018/19

We will confer with instructors teaching level 1 Ceramic Sculpture in order to facilitate students entering level 2 with a more robust understanding of developing surface applications for ceramic sculpture. This will reduce the review time at the beginning of this class.

Plan for topic "Students completing this course will be able to Identify creative Problem-solving strategies to create appropriate surfaces on ceramic sculptural forms.": 2015/16

We will continue to use this assignment to evaluate our students successful comprehension of this SLO.

Continued discussion with DSS is necessary to help support students with severe learning disabilities.

Plan for topic "Students completing this course will be able to apply techniques to construct ceramic sculpture forms as well as formulate and apply surfaces.": 2015/16

We will continue to use this assignment to evaluate our students successful comprehension of this SLO.

Continued discussion with DSS is necessary to help support students with severe learning disabilities.

Plan for topic "Students completing this course will be able to create original ceramic sculpture with a focus on surface.": 2015/16

We will continue to use this assignment to evaluate our students successful comprehension of this SLO.

Continued discussion with DSS is necessary to help support students with severe learning disabilities.
119. Figurative Ceramics II [ART-256] belonging to Art [ART]
Plan for topic "Students completing this course will be able to create original ceramic figure sculpture with a focus on surface."

"": 2018/19
We will confer with instructors teaching level 1 Figurative Ceramic Sculpture in order to facilitate students entering level 2 with a more robust understanding of developing original surface applications for figurative ceramic sculpture. This will reduce the review time at the beginning of this class.

Plan for topic "Apply techniques to construct ceramic figurative sculpture as well as formulate and apply surfaces." : 2015/16
We plan to revise the assignments by placing more emphasis on applying hollow construction techniques sufficient to supporting a range of surface treatments.

Plan for topic "Students completing this course will be able to apply design decisions in order to synthesize ceramic figurative sculpture and surface." : 2015/16
Students commented on the strong impact seeing work by other artists had on them, either projected on the screen in class or viewed in a museum or gallery. We hope to bring in more visiting artists to perform lecture/demonstrations in this area.

Plan for topic "Students completing this course will be able to create original ceramic figure sculpture with a focus on surface."

": 2015/16
Going forward. we plan to more clearly define and demonstrate distinct surface techniques e.g. engobe, terra sigilata, sgraffito, mishima, and align each technique with a specific assignment e.g. torso study with sgraffito.
### Plan for topic "Students completing ART-298 will be able to demonstrate proficiency in advanced oil painting techniques."

The student observed for this SLO was an excellent example of a one who has benefited from the wide range of art courses offered at DVC while focusing on her interest in painting. We plan to continue to encourage our students to experience our breadth of art courses offered while helping them to work toward a preferred discipline.

### Plan for topic "Students completing ART-298 will be able to write a proposal for a series of paintings and follow through with completing the paintings as described in the proposal."

We are pleased with the success of this student. Our plan is to make this kind of success the norm in the art department by continuing to focus or teaching on strong technical skills and challenge our students conceptually.

### Plan for topic "Students completing ART-298 will be able to critique their work and the work of others using relevant visual art vocabulary."

Since critique skills are included in all of our studio course SLOs, we as a department continue to discuss and create new ways to enhance student success in this area. We hold regular FLEX workshops on critique methods and informally share ideas on the topic.

### Plan for topic "Students completing ART-298 will be able to demonstrate knowledge of block print techniques using water based inks."

We will continue to assess independent study as required.

### Plan for topic "Students completing ART-298 will be able to comprehend relief printmaking process of multi-block color registration and reduction process."

We plan to continue assessing independent study as required. Students are expressing confidence in the application of the skill the are acquiring from the professor.

### Plan for topic "Students completing ART-298 will be able to have knowledge of various paper suited to relief printing."

Our goal was met so we do not plan to revise our teaching methods, though we plan to continue to assess independent study courses as required.

### Plan for topic "Students completing ART-298 will be able to demonstrate the ability to perform a final presentation to their faculty adviser."

The outcome was achieved so no major revisions to the teaching methods are required. We will continue to assess independent study as required.

### Plan for topic "Students completing ART-298 will be able to demonstrate critical thinking skills."

We are pleased with the success of this student. Our plan is to make this kind of success the norm in the art department by continuing to focus or teaching on strong technical skills and challenge our students conceptually.

### Plan for topic "Students completing ART-298 will be able to comprehend relief printmaking process of multi-block color registration and reduction process."

We plan to continue assessing independent study as required. Students are expressing confidence in the application of the skill the are acquiring from the professor.

### Plan for topic "Students completing ART-298 will be able to have knowledge of various paper suited to relief printing."

Our goal was met so we do not plan to revise our teaching methods, though we plan to continue to assess independent study courses as required.

### Plan for topic "Students completing ART-298 will be able to demonstrate the ability to perform a final presentation to their faculty adviser."

The outcome was achieved so no major revisions to the teaching methods are required. We will continue to assess independent study as required.

### Plan for topic "Students completing ART-298 will be able to demonstrate critical thinking skills."

We are pleased with the success of this student. Our plan is to make this kind of success the norm in the art department by continuing to focus or teaching on strong technical skills and challenge our students conceptually.
The outcome was achieved. We do not plan to revise the teaching methods but will continue to emphasize critical thinking skills and assess independent study as required.
DVC Instructional Course SLO Action Plans

121. Student Instructional Assistant [ART-299] belonging to Art [ART]

Plan for topic "Students completing ART-299 will be able to C. Expand subject matter knowledge by assisting the instructor.": 2018/19

The Art Department has a good track record thus far with our ART 299s. However, we could formalize the responsibilities for each course we run in the labs so as to make each student's individual tasks more clearly defined. We could also implement a training session PRIOR to the start of classes (if student's schedules allow) so that we do not need to train them during their assigned class session.

Plan for topic "Students completing ART-299 will be able to A. Increase learning through involvement as a teacher's aid, lab assistant or research assistant.": 2017/18

We have a good track record thus far with our ART299s. However, we could formalize the responsibilities for each course we run in the lab so as to make each student's individual tasks more clearly defined. We could also implement a training session PRIOR to the start of classes (if student's schedules allow) so that we do not need to train them during their assigned class session.

Plan for topic "Students completing ART-299 will be able to A. Increase learning through involvement as a teacher’s aid, lab assistant or research assistant.": 2014/15

The result for this SLO is satisfactory. No changes in curriculum are triggered by these results. Nonetheless, in order sustain and improve student success, we will introduce additional supplementary handouts, specifically those pertaining to studio operations, to further support existing class demonstrations.
122. Introduction to the History and Development of Digital Media [ARTDM-100] belonging to Media Studies [ARTDM]
The ARTDM 101 course is a new class that was developed specifically for high school articulation. The class will be part of our entry level ARTDM Certificate of Accomplishment. The class was taught for the first time as a dual enrollment class on a high school campus last Spring. The class was small because it was being taught at the high school and only had 13 students enrolled. We are still trying to figure out enrollment and have developed a credit by exam for the course.
DVC Instructional Course SLO Action Plans

124. Introduction to Digital Imaging [ARTDM-105] belonging to Media Studies [ARTDM]

Plan for topic "Students completing this course will be able to compare and contrast the benefits of using various tool options for the creation of digital imaging projects." 2019/20

The instruction regarding this SLO appears to be working well. We may begin to focus on a more advanced use of imaging tools in Photoshop. This may require us to revise the SLOs for this course to be more specific with certain important imaging techniques.

Plan for topic "Students completing this course will be able to compare and contrast the benefits of using various tool options for the creation of digital imaging projects." 2015/16

The Art Digital Media department recognizes the need to offer relevant peripheral devices related to digital imaging. We will add an additional 30 drawing tablets that will allow us to cover two entire labs. This increases the variety of input devices and is industry standard as indicated by our advisory board.

Department wide plan:

The Art Digital Media department has determined that the Likert scale method is not providing adequate data. Our new assessment will allow for either project or test related assessment topics. We have begun using this method of assessment Fall 16 for some classes and plan to fully implement for Spring 17. An important outcome for all courses assessed is the need to have a better channel of communication between adjunct and full time faculty. Our new assessment method will foster more opportunities for faculty communication. Another important outcome for our department is the low volume of data collected. Using a project or tests as an assessment method will increase data volume and provide more meaningful data.
125. Digital Imaging for the Artist [ARTDM-112] belonging to Media Studies [ARTDM]

Plan for topic "Students completing the course will be able to create images suitable for printing or multimedia applications.": 2016/17

The results for this course are positive. Printing projects is something we would like to improve upon. We are in the design process of a new art building, one benefit for this course will be an integrated printing lab. The lab will be available outside of class hours and will extend printing times for students.

The department has decided to make this a partial online course next Fall. The instructor is preparing curriculum and will be updating Canvas to manage online materials.

Plan for topic "Students completing the course will be able to create images suitable for printing or multimedia applications.": 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

Plan for topic "Students will digitize and then analyze studio art work and make improvements, applying principles of color theory and composition.": 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

Plan for topic "Students completing the course will be able to use image-editing applications.": 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to apply basic graphic design principles of color, typography, alignment to designing interfaces": 2018/19

The students were prepared to pass this SLO based on the following: first students practiced assessing existing web designs for adherence to design principles. Next, they completed the assigned reading/video content. Finally, they practiced applying the principles to their project.

Having more small scale practice assignments may give students more opportunity to prepare for larger design assessments.

Plan for topic "Students completing this course will be able to evaluate existing web interfaces and user experience design": 2018/19

A combination of lecture/demonstration of existing competitive analysis documents and assigned readings discussing and demonstrating this learning outcome proved to be a successful approach.

In the future, a more detailed example of selecting a non-direct competitor would help students to benefit from design solutions outside of the project domain.

Plan for topic "Students completing this course will be able to apply user-centered design principles": 2018/19

Providing students with several examples of successful wireframes helped them to understand the required level of thought and attention required to solve, strategize, and empathise with the intended audience.

Plan for topic "Students completing the course will be able to create digital images for multimedia projects": 2015/16

The Art Digital Media department has rewritten ARTDM-115 to be an interface design course to align with our web offerings. The course is new and all student learning outcomes will be rewritten Spring 17. This course increases web design offerings and is industry standard as indicated by our advisory board.

Department wide plan:

The Art Digital Media department has determined that the Likert scale method is not providing adequate data. Our new assessment will allow for either project or test related assessment topics. We have begun using this method of assessment Fall 16 for some classes and plan to fully implement for Spring 17. An important outcome for all courses
assessed is the need to have a better channel of communication between adjunct and full time faculty. Our new assessment method will foster more opportunities for faculty communication. Another important outcome for our department is the low volume of data collected. Using a project or tests as an assessment method will increase data volume and provide more meaningful data.

Plan for topic "Students completing the course will be able to create digital images for multimedia projects.": 2010/11

Continue methods of instruction
Plan for topic "Students completing the course will be able to manually translate traditional drawings and photographs into digital format using vector paths.": 2016/17

While we were unable to obtain reliable data, we were able to infer that the course is doing well. We are working with the art department and printmaking courses to include more options for printing. The 117 course is a possible area of collaboration. The department will be looking at how to implement this collaboration most effectively.

For this year the department tried to use a new assessment method based on assigned material and not the Likert method. We were not successful in implementing the new process. It was cumbersome, time consuming, and files were lost. We will be looking at ways to use Canvas to help us organize assessment results and provide a forum for communication with adjunct and full time faculty.

Plan for topic "Students completing the course will be able to create, edit and rasterized vector graphics.": 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

Plan for topic "Students completing the course will be able to demonstrate the basic principles of Digital Illustration." : 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

Plan for topic "Students completing the course will be able to manually translate traditional drawings and photographs into digital format using vector paths.": 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

Plan for topic "Students completing the course will be able to create, edit and rasterized vector graphics.": 2012/13

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing possibly developing a form to instructors to determine student success on final project based on student learning outcomes.

Plan for topic "Students completing the course will be able to demonstrate the basic principles of Digital Illustration." : 2012/13

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing possibly developing a form to instructors to determine student success on final project based on student learning outcomes.

Plan for topic "Students completing the course will be able to manually translate traditional drawings and photographs into digital format using vector paths." : 2012/13
The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing possibly developing a form to instructors to determine student success on final project based on student learning outcomes.
### Plan for topic "Students completing the course will be able to apply various audio file formats": 2016/17

While we were unable to obtain reliable data, we were able to infer that the course is doing well. The course is almost entirely online with 10 hours of face to face time. The big change has been to start the semester meeting the first five Saturdayâ€™s of the semester instead of one Saturday per month. This has been a good change in policy.

For this year the department tried to use a new assessment method based on assigned material and not the Likert method. We were not successful in implementing the new process. It was cumbersome, time consuming, and files were lost. We will be looking at ways to use Canvas to help us organize assessment results and provide a forum for communication with adjunct and full time faculty.

### Plan for topic "Students completing the course will be able to identify the basic vocabulary used for the study of digital audio."": 2013/14

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing how updates to new software have impacted student learning outcomes. The comments of students suggest the new software has been a good decision. We will continue to use and assess the new software.

### Plan for topic "Students completing the course will be able to utilize production tools for digital audio for multimedia projects."": 2013/14

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing how updates to new software have impacted student learning outcomes. The comments of students suggest the new software has been a good decision. We will continue to use and assess the new software.

### Plan for topic "Students completing the course will be able to apply various audio file formats": 2013/14

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing how updates to new software have impacted student learning outcomes. The comments of students suggest the new software has been a good decision. We will continue to use and assess the new software.
Plan for topic "[A.1] Students completing this course will be able to identify, discuss and apply the basic principles of digital photography, as well as comparable concepts in traditional photography.": 2019/20

In order to stress the importance of learning this skill, it is being considered to weighting this assignment grade heavier in order to encourage completion.

Plan for topic "[A.1] Students completing this course will be able to identify, discuss and apply the basic principles of digital photography, as well as comparable concepts in traditional photography.": 2015/16

Assessment results are positive but adjunct faculty have identified lighting projects as an area for consideration in that there is no lab space to properly set up lighting equipment to handle this activity efficiently. The Art Digital Media department is advocating for a studio lab space in the new art building complex to address the issue.

Department wide plan:

The Art Digital Media department has determined that the Likert scale method is not providing adequate data. Our new assessment will allow for either project or test related assessment topics. We have begun using this method of assessment Fall 16 for some classes and plan to fully implement for Spring 17. An important outcome for all courses assessed is the need to have a better channel of communication between adjunct and full time faculty. Our new assessment method will foster more opportunities for faculty communication. Another important outcome for our department is the low volume of data collected. Using a project or tests as an assessment method will increase data volume and provide more meaningful data.

Plan for topic "[A.1] Students completing this course will be able to identify, discuss and apply the basic principles of digital photography, as well as comparable concepts in traditional photography.": 2012/13

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing possibly developing a form to instructors to determine student success on final project based on student learning outcomes.

Plan for topic "Students will be able to critically evaluate and interpret digital photographs.": 2012/13

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing possibly developing a form to instructors to determine student success on final project based on student learning outcomes.

Plan for topic "Students will be able to acquire necessary skills for resolution management and output of digital files to print.": 2012/13

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing possibly developing a form to instructors to determine student success on final project based on student learning outcomes.

Plan for topic "Students completing this course will be able to produce a more complex journalistic project that would be appropriate to
The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing possibly developing a form to instructors to determine student success on final project based on student learning outcomes.
Plan for topic "Students will be able to critically evaluate animation techniques and their effective use in a variety of digital media.": 2016/17

While a positive result we are disappointed with the amount of student involvement with the Likert scale.

This course has benefited from the proximity to the new equipment checkout. The checkout has been understaffed, we are hoping to have the position staffed properly for next semester. The department is still considering if this course should be offered only in Spring. Our advisory board still sees this as an important skill set, we will continue to evaluate the relevance of this course.

Plan for topic "Students completing the course will be able to...compare and contrast benefits of various tools and methods used to create motion graphics.": 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

Plan for topic "Students will be able to critically evaluate animation techniques and their effective use in a variety of digital media.": 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

Plan for topic "Students will be able to recognize digital image types and how they are composited to create motion graphics.": 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

Plan for topic "Students completing the course will be able to...compare and contrast benefits of various tools and methods used to create motion graphics.": 2010/11

Since only one section was offered and evaluated, this data may be less statistically accurate than desirable. Surveys and percentages were only gathered from students who were present that week, possibly another factor in the positive response rate as the students who did not meet the criteria often have poor attendance (possibly a correlating factor).

Plan for topic "Students will be able to critically evaluate animation techniques and their effective use in a variety of digital media.": 2010/11

Since only one section was offered and evaluated, this data may be less statistically accurate than desirable. Surveys and percentages were only gathered from students who
were present that week, possibly another factor in the positive response rate as the students who did not meet the criteria often have poor attendance (possibly a correlating factor).

132. Topics in Digital Media [ARTDM-150] belonging to Media Studies [ARTDM]

Plan for topic "Students completing 150CR will be able to...

1. create images suitable for printing or multimedia applications.

2. digitize and then analyze studio art work and make improvements, applying principles of color theory and composition.

3. use image-editing applications." : 2016/17

This was a high school articulation and outreach project. While we do not have adequate data the outcome was overwhelmingly positive. The department is committed to offering another section this summer. The department tried to use a new assessment method based on assigned material and not the Likert method. We were not successful in implementing the new process. It was cumbersome, time consuming, and files were lost. We will be looking at ways to use Canvas to help us organize assessment results and provide a forum for communication with adjunct and full time faculty.
DVC Instructional Course SLO Action Plans

133. 3D Modeling and Animation I [ARTDM-160] belonging to Media Studies [ARTDM]

Plan for topic "Students completing ARTDM-160 will be able to comprehend the use of course level models and how they relate to complex models.": 2016/17

The department is happy with the success rate for course level modeling. The department has identified basic animation techniques from the 12 principles of animation should be introduced in this course. The department will be evaluating best practices for implementation.

Plan for topic "Students will be able to apply techniques of 3D modeling and animation.": 2013/14

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing ways to include more emphasis on vocabulary. The comments of students suggest the new software has been a good decision. We will continue to use and assess the new software.

Plan for topic "Students will be able to compare and contrast benefits of various tools and methods used to create 3D modeling.": 2013/14

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing ways to include more emphasis on vocabulary. The comments of students suggest the new software has been a good decision. We will continue to use and assess the new software.

Plan for topic "Students completing the course will be able to identify the basic vocabulary used for the study and understanding of 3D modeling and animation.": 2013/14

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing ways to include more emphasis on vocabulary. The comments of students suggest the new software has been a good decision. We will continue to use and assess the new software.

Plan for topic "Students will be able to apply techniques of 3D modeling and animation.": 2011/12

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing possibly adding a pre assessment component to the existing system.

Plan for topic "Students will be able to compare and contrast benefits of various tools and methods used to create 3D modeling.": 2011/12

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing possibly adding a pre assessment component to the existing system.

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing possibly adding a pre assessment component to the existing system.
134. 3D Modeling and Animation II [ARTDM-161] belonging to Media Studies [ARTDM]

Plan for topic "Students will be able to utilize 3D animation production tools."": 2019/20

There is room for improvement in the use of Skeleton five Advanced Rigging System. Some of the issues revolve around the complexity of the system setup. We will integrate the process of instancing character model in a basic way in the animation 160 class. This will prepare students for the Animation 161 for the complexity of managing character assets. We will continue to monitor this technology as it is an important process in the industry.

Another new technology we will be investigating is PBR texture software to modernize the texture process for 3D models.

Plan for topic "Students critically evaluate advanced 3D modeling techniques and their effective use in 3D animation presentations."": 2015/16

The Art Digital Media department is pleased with the results for this course. New advancements with software will require new processes to consider. Rigging processes should be considered for next assessment.

Department wide plan:

The Art Digital Media department has determined that the Likert scale method is not providing adequate data. Our new assessment will allow for either project or test related assessment topics. We have begun using this method of assessment Fall 16 for some classes and plan to fully implement for Spring 17. An important outcome for all courses assessed is the need to have a better channel of communication between adjunct and full time faculty. Our new assessment method will foster more opportunities for faculty communication. Another important outcome for our department is the low volume of data collected. Using a project or tests as an assessment method will increase data volume and provide more meaningful data.

Plan for topic "Students will be able to utilize 3D animation production tools."": 2012/13

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing possibly developing a form to instructors to determine student success on final project based on student learning outcomes.

Plan for topic "Students will be able to utilize 3D animation production tools."": 2012/13

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing possibly developing a form to instructors to determine student success on final project based on student learning outcomes.
Plan for topic "Students critically evaluate advanced 3D modeling techniques and their effective use in 3D animation presentations."

2012/13

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing possibly developing a form to instructors to determine student success on final project based on student learning outcomes.
Plan for topic "Students will be able to correlate interdisciplinary fundamentals, techniques, and concepts related to cartooning.": 2013/14

We are assessing alternatives to the Likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

Plan for topic "Students will be able to create a fully developed cartoon ready for animating.": 2013/14

We are assessing alternatives to the Likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

Plan for topic "Students will be able to correlate interdisciplinary fundamentals, techniques, and concepts related to cartooning.": 2016/17

Well. This course is a hands on class that requires room for students to draw and scan projects. We are looking to see if there are options for lab facilities to allow for more drawing space at each station.

For this year the department tried to use a new assessment method based on assigned material and not the Likert method. We were not successful in implementing the new process. It was cumbersome, time consuming, and files were lost. We will be looking at ways to use Canvas to help us organize assessment results and provide a forum for communication with adjunct and full time faculty.

Plan for topic "Students completing this course will be able to produce a more complex journalistic project that would be appropriate to use as a work sample in a job application.": 2016/17

Well. This course is a hands on class that requires room for students to draw and scan projects. We are looking to see if there are options for lab facilities to allow for more drawing space at each station.

**DVC Instructional Course SLO Action Plans**

**Plan for topic "Students completing the course will be able to apply the principles of animation theory to projects."**: 2016/17

166 is a dual section with 165 issues for both classes are similar. From past experience the dual model works well in this case.

While we were unable to obtain reliable data, we were able to infer that the course is doing well. This course is a hands on class that requires room for students to draw and scan projects. We are looking to see if there are options for lab facilities to allow for more drawing space at each station.

For this year the department tried to use a new assessment method based on assigned material and not the Likert method. We were not successful in implementing the new process. It was cumbersome, time consuming, and files were lost. We will be looking at ways to use Canvas to help us organize assessment results and provide a forum for communication with adjunct and full time faculty.

**Plan for topic "Students completing the course will be able to distinguish among traditional and non-traditional animation styles."**: 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

**Plan for topic "Students completing the course will be able to analyze and deconstruct an animation production."**: 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

137. Digital Animation [ARTDM-167] belonging to Media Studies [ARTDM]

Plan for topic "Students completing this course will be able to utilize tools and methods in the creation of animation projects. [Â NAÂ ]

2019/20": 2019/20

Students are using stop motion animation techniques to great effect in this class. Implementing the 2D and 3D animation with stop motion is still a difficult task but is getting better. Overall we are happy with the results.

Future assessments should consider the group aspects of an animation project, specifically the role of Project Manager as it relates to daily screenings and task management.

Plan for topic "Students completing the course will be able to compare and contrast benefits of various tools, methods, and strategies used for web production projects.": 2010/11

Since only one section was offered and evaluated, this data may be less statistically accurate than desirable. Surveys and percentages were only gathered from students who were present that week, possibly another factor in the positive response rate as the students who did not meet the criteria often have poor attendance (possibly a correlating factor).

Plan for topic "Students will be able to use basic vocabulary used for the study and understanding of web production tools.": 2010/11

Since only one section was offered and evaluated, this data may be less statistically accurate than desirable. Surveys and percentages were only gathered from students who were present that week, possibly another factor in the positive response rate as the students who did not meet the criteria often have poor attendance (possibly a correlating factor).
Plan for topic "Students completing this course will be able to construct and publish web pages using current versions of HTML, CSS, and web design tools.": 2017/18

Observations for the course show that the ratio of course instruction spent on wireframing and style tiles reduces the amount of instruction on the technical instruction and student practice on the technical aspects of writing HTML and CSS.

As we move to the 16 week semester, a plan to consider is to provide students with a set of premade wireframes with which they would use as a guide for constructing the site HTML and CSS, rather than spending time creating these planning documents.

Plan for topic "Students completing the course will be able to construct and publish web pages.": 2014/15

Due to the new WebSLO 3.0 course assignment this course was not assessed for the 2014/15 year. This course has been assessed already for 2015/16 year and will be reported in the next cycle.

Our previous plans have highlighted maintaining current software. This is becoming increasingly more difficult as the industry adopts new licensing strategies and product updates. Adobe licensing issues has consumed 90 percent of our lab technicians 10 hours per week. Other applications need updating on a monthly basis. Maintaining current versions of software on all computers is becoming a major issue. We would like to increase lab technician hours to 20 hours per week to help keep software up to date during the semester.

Plan for topic "Students completing the course will be able to construct and publish web pages.": 2011/12

DVC ArtDM Faculty have determined that the SLO was met by the majority of students. The faculty have determined that self-assessment surveys should be required instead of being optional for the students so that more data can be gathered. The new assessment system will be used during the next SLO cycle.

Plan for topic "Students will be able to apply the basic vocabulary used for the study of web design.": 2011/12

DVC ArtDM Faculty have determined that the SLO was met by the majority of students. 142. Web and Mobile Design with JavaScript [ARTDM-174] belonging to Media Studies [ARTDM]
143. Game Design I [ARTDM-180] belonging to Media Studies [ARTDM]

Plan for topic "Students completing this course will be able to apply the basic processes of game design."

- **2017/18**: The department is pleased with the results and feel that the game mechanic aspect of the curriculum is strong. Assessing the course in the future will focus on asset development, possibly introducing new software such as Houdini a procedural 3d modeling/animation tool.

- **2014/15**: The faculty has determined that the current SLO assessments based on Likert scales are well developed and will continue to use the method. The department has begun conversations to include alternative assessment methods. Our previous plans have highlighted maintaining current software. This is becoming increasingly more difficult as the industry adopts new licensing strategies and product updates. Adobe licensing issues has consumed 90 percent of our lab technicians 10 hours per week. Other applications need updating on a monthly basis. Maintaining current versions of software on all computers is becoming a major issue. We would like to increase lab technician hours to 20 hours per week to help keep software up to date during the semester.

Based on assessments for this class we would like to work with title 5 to reword class recommendations to include ARTDM-160. We also would like to change the title of the course from "Intro to Game Design" to "Game Design 1".

145. Digital Media Projects [ARTDM-190] belonging to Media Studies [ARTDM]  
Plan for topic "Students completing this course will be able to demonstrate the design and development processes of a digital media project." : 2017/18  
The nature of this course is for students to develop experience and deepen their knowledge of problem solving and media creation techniques and tools. Students from multiple ARTDM sub-disciplines enroll in this course. Currently, assignments established for each sub-discipline.

It might be better to have students identify and propose a plan for their projects according to the needs of their portfolios.

Plan for topic "Students completing the course will be able to utilize basic vocabulary used for the study of the multimedia design and development process." : 2016/17  
The department will access this class in Fall 2017.

Plan for topic "Students completing the course will be able to utilize basic vocabulary used for the study of the multimedia design and development process." : 2013/14  
The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing how updates to new software have impacted student learning outcomes. The comments of students suggest the new software has been a good decision. We will continue to use and assess the new software.

Plan for topic "Students completing the course will be able to describe the design and development processes of a multimedia project." : 2013/14  
The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing how updates to new software have impacted student learning outcomes. The comments of students suggest the new software has been a good decision. We will continue to use and assess the new software.

Plan for topic "Students will be able to critically evaluate techniques used in the design and development of multimedia projects and their effective use in a variety of digital media": 2013/14  
The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. Plan for topic "Students completing the course will be able to apply the design and development processes of a professional multimedia portfolio.": 2016/17

We are offering 191 and 190 as a double section course. 190 and 191 are capstone courses that are required for most of our degrees. By offering it both Spring and Fall students have more flexibility to complete degrees. We are not happy with the double section solution. We are discussing how we could combine curriculum for both classes so that we don't have a situation where only one student is taking 191 and the rest of the class is taking 190.

Plan for topic "Students completing the course will be able to critically evaluate multimedia design techniques and their effective use in the development of a professional digital portfolio.": 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

Plan for topic "Students completing the course will be able to compare and contrast benefits of various tools and methods used to create a professional digital portfolio.": 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. DVC Instructional Course SLO Action Plans

148. Introduction to Graphic Design [ARTDM-214] belonging to Media Studies [ARTDM]

Plan for topic "Students will be able to identify formal elements of design.": 2016/17

The department is pleased with this course, it is a general education course and is often a gateway course for our department. This is a hands on course requiring students to use traditional hand techniques. Our current labs do not facilitate hand work well we are hoping the new art facility will provide some flex space for hand technique projects. The department is looking to expand the subject matter for this class by creating an intermediate graphic design course.

Plan for topic "Students completing this course will be able to produce a more complex journalistic project that would be appropriate to use as a work sample in a job application.": 2016/17

The department is pleased with this course, it is a general education course and is often a gateway course for our department. This is a hands on course requiring students to use traditional hand techniques. Our current labs do not facilitate hand work well we are hoping the new art facility will provide some flex space for hand technique projects. The department is looking to expand the subject matter for this class by creating an intermediate graphic design course.

Plan for topic "Students completing the course will be able to create graphic design projects.": 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

Plan for topic "Students will be able to critically evaluate graphic designs.": 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

Plan for topic "Students completing this course will be able to produce a more complex journalistic project that would be appropriate to use as a work sample in a job application.": 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

Plan for topic "Students will be able to identify formal elements of design.": 2013/14

We are assessing alternatives to the likert scale and will determine if other options are better suited to gathering data. We will be revising degrees and certificates to be more in line with academic models and industry. We are adding new courses, to meet industry trends. We will evaluate over the course of the year.

Plan for topic "Students completing the course will be able to create graphic design projects.": 2011/12

The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing possibly adding a pre assessment component to the existing system.

149. Typography [ARTDM-224] belonging to Media Studies [ARTDM]

Plan for topic "Students completing the course will be able to create typographic designs.": 2017/18
The department is pleased with the results. One area of issue is students lack of prerequisites for the course, the department will discuss strategies to encourage students to take courses in coherent order.

Plan for topic "Students completing the course will be able to create typographic designs.": 2014/15
Due to the new WebSLO 3.0 course assignment this course was not assessed for the 2014/15 year. This course has been assessed already for 2015/16 year and will be reported in the next cycle.

Plan for topic "Students completing the course will be able to create typographic designs.": 2011/12
Our previous plans have highlighted maintaining current software. This is becoming increasingly more difficult as the industry adopts new licensing strategies and product updates. Adobe licensing issues has consumed 90 percent of our lab technicians 10 hours per week. Other applications need updating on a monthly basis. Maintaining current versions of software on all computers is becoming a major issue. We would like to increase lab technician hours to 20 hours per week to help keep software up to date during the semester.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the vocabulary of typographic form.": 2011/12
The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing possibly adding a pre assessment component to the existing system. One thing to note the sample of students responding was small because it is only offered once a year.

Plan for topic "Students completing the course will be able to use computers in typographic design.": 2011/12
The faculty have determined that the current SLO assessments based on likert scales are well developed and see no need to change the process. The faculty are discussing possibly adding a pre assessment component to the existing system. One thing to note the sample of students responding was small because it is only offered once a year.

Plan for topic "Students completing the course will be able to create typographic designs.": 2010/11
The results were positive (though only one section was offered and evaluated, and so, this data may be less statistically accurate than desirable) indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student success in meeting the objective.

DVC Instructional Course SLO Action Plans

150. Occupational Work Experience Education in ARTDM [ARTDM-295] belonging to Media Studies [ARTDM]
151. Internship in Occupational Work Experience Education in ARTDM [ARTDM-296] belonging to Media Studies [ARTDM]
152. Independent Study [ARTDM-298] belonging to Media Studies [ARTDM]
DVC Instructional Course SLO Action Plans

153. Student Instructional Assistant [ARTDM-299] belonging to Media Studies [ARTDM]

Plan for topic "Students completing this course will be able to recognize facial variations within different animation styles": 2019/20

The results for this topic appear to be successful. In the future it has been determined to include both a hand drawn and digital version of the project.

Plan for topic "Students completing this course will be able to increase learning through involvement as a teachers aide, lab assistant or research assistant.": 2018/19

This course will be assessed the next time it is offered

Plan for topic "Students completing this course will be able to increase learning through involvement as a teachers aide, lab assistant or research assistant.": 2015/16

Results are positive but the department feels we could do better. The Art Digital Media department considers this course a great opportunity for students to work on collaboration and leadership skills. Encouraging faculty to emphasize collaborative and leadership opportunities for students enrolled in this class will increase student learning.

Department wide plan:

The Art Digital Media department has determined that the Likert scale method is not providing adequate data. Our new assessment will allow for either project or test related assessment topics. We have begun using this method of assessment Fall 16 for some classes and plan to fully implement for Spring 17. An important outcome for all courses assessed is the need to have a better channel of communication between adjunct and full time faculty. Our new assessment method will foster more opportunities for faculty communication. Another important outcome for our department is the low volume of data collected. Using a project or tests as an assessment method will increase data volume and provide more meaningful data.

### DVC Instructional Course SLO Action Plans

#### 156. History of Asian Art [ARTHS-193] belonging to Art [ARTHS]

**Plan for topic "Students completing the course will be able to apply art historical concepts and vocabulary to the art of specific Asian cultures and time periods": 2017/18**

The Art Department understands that the Likert Scale assessment methodology is not longer considered robust enough to use for SLO assessment. An "Art History SLO Retreat" is planned for January 2019, where all ARTHS faculty will be informed of the SLO assessment process and will collectively create assignments, rubrics, and questions to use for future SLO assessments.

**Plan for topic "Students completing the course will be able to compare the art and culture of Asia and the West including differences in aesthetics, culture, religion, and the social role of art and the artist": 2017/18**

The Art Department understands that the Likert Scale assessment methodology is not longer considered robust enough to use for SLO assessment. An "Art History SLO Retreat" is planned for January 2019, where all ARTHS faculty will be informed of the SLO assessment process and will collectively create assignments, rubrics, and questions to use for future SLO assessments.

**Plan for topic "Students completing the course will be able to describe the intersection of culture, politics, religion, and the arts in specific Asian cultures and time periods": 2017/18**

The Art Department understands that the Likert Scale assessment methodology is not longer considered robust enough to use for SLO assessment. An "Art History SLO Retreat" is planned for January 2019, where all ARTHS faculty will be informed of the SLO assessment process and will collectively create assignments, rubrics, and questions to use for future SLO assessments.

**Plan for topic "Students completing the course will be able to distinguish characteristics of various artistic styles, forms, and works from Asian cultures": 2017/18**

The Art Department understands that the Likert Scale assessment methodology is not longer considered robust enough to use for SLO assessment. An "Art History SLO Retreat" is planned for January 2019, where all ARTHS faculty will be informed of the SLO assessment process and will collectively create assignments, rubrics, and questions to use for future SLO assessments.

**Plan for topic "Students completing the course will be able to describe the intersection of culture, politics, religion, and the arts in specific Asian cultures and time periods": 2014/15**

Overall, the high self-reported achievement rate matches the instructor assessments made through class writing, quizzes and exams, and a formal paper. The fact that one student did not feel fully successful prompts me again to reflect on what may be causing difficulty for some students and to research ways to expand student success. I wonder if the anomalous negative response reflects the fact that the course covers so very much historical and cultural material in 18 short weeks. It is clear to me that some students struggle to master the immense sweep of ideas and history explored this course, which requires thinking about Buddhism, Hinduism, Confucianism, Daoism, and Shinto as major cultural philosophies, along with thousands of years of history, a complex pattern of geographic relationship, and terminology from Sanskrit, Chinese, Japanese, and...
**Plan for topic "Students completing the course will be able to distinguish characteristics of various artistic styles, forms, and works from Asian cultures": 2014/15**

This high success rate is satisfying; it shows that all students attained an understanding of the course’s essential knowledge and skills. My actions will focus on sustaining this success while looking for ways to enhance students’ engagement with actual artworks – giving them the experience of moving beyond the limits of learning from photographs of art. My course has required students to visit the Asian Art Museum for their formal paper, but I am also working on gathering a small collection of (modest, not rare or expensive) artworks to facilitate students’ engagement with actual art objects over the duration of the semester. I also would like to establish more connections examining the lively influence of Asian culture on today’s global consumer culture, such as anime and the popularity of "Asian chic." I’m also working on using more film and video resources to give students a deeper, multi-sensory experience of the subject matter.

**Plan for topic "Students completing the course will be able to apply art historical concepts and vocabulary to the art of specific Asian cultures and time periods": 2013/14**

We are satisfied by the fact 100% of students were able to achieve and apply this skill. There is room for improvement in helping the 14 students who checked "agree" to attain a higher degree of confidence with this skill, bringing them closer to the 66% that choose the "strongly agree" option. With that in mind, I have been working to break down these skills into smaller "building block" steps with the writing "to-learn" assignments. I have also redesigned my handouts as active worksheets, which require students to define, explain, and illustrate key vocabulary on a week-by-week basis.

**Plan for topic "Students completing the course will be able to compare the art and culture of Asia and the West including differences in aesthetics, culture, religion, and the social role of art and the artist": 2013/14**

One student reported a sense of not having met this objective. In response to this student’s self-assessment, I am researching new ways to reinforce this knowledge area in my lessons. I am also reflecting on reasons why a student might not feel a sense of mastery in this area. Does it relate to the fact that some students have never before taken art history, and therefore feel too little knowledge of western art to compare it effectively to Asian art? To address this issue, I plan to use discussions of materials and techniques as opportunities to compare and contrast the western tradition. (I might, for example, contrast the use of marble in European high art sculpture with the reverence for wood in the Japanese tradition.) Making links that focus on concrete physical features will help reinforce connections without presupposing a background in the main outlines of western art history. In the longer run, I’d also be interested in seeing this question rephrased to focus on art of "other cultures," not just the west, since I also find it useful to make connections to the arts of the Americas, Ancient Egypt, etc.

**Plan for topic "Students completing the course will be able to apply art historical concepts and vocabulary to the art of specific Asian cultures and time periods": 2010/11**

The results were positive, indicating that students were meeting the course objective. At this time, no modifications are planned, since the assessments are indicating student...

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to identify the various visual arts and styles and their relationship to cultural values from the paleolithic through the Roman eras": 2017/18

| The overall difference between student self-assessment and assignment performance seems important to continue to explore. Designing robust and effective assessments that measure a students' overall course achievement of the learning outcomes may not be possible with a single test question or assignment. Action plan: convening discipline faculty in advance of the next SLO assessment to design a common assessment. |

Plan for topic "Students completing the course will be able to develop an art historical vocabulary by recognizing major styles and works of art: describe, classify, compare/contrast works of art to better identify developments and changes throughout history.": 2017/18

| The overall difference between student self-assessment and assignment performance seems important to continue to explore. Designing robust and effective assessments that measure a students' overall course achievement of the learning outcomes may not be possible with a single test question or assignment. Action plan: convening discipline faculty in advance of the next SLO assessment to design a common assessment. |

Plan for topic "Students completing the course will be able to distinguish and summarize possible relationships between artists and their societies.": 2017/18

| The assignment based assessment was closer to the self-assessment results for this SLO, but the sample size of one section is small. |

Plan for topic "Students completing the course will be able to identify the various visual arts and styles and their relationship to cultural values from the paleolithic through the Roman eras": 2016/17

| Lizzy Gand collected the SLO assessments for the 2016-17 academic year. She is currently on medical leave and will not return until after December 31, 2017. The remainder of the department does not have access to the data she collected. The department plans to complete the assessment for ARTHS-195 after Lizzy returns and provides access to the SLO assessments, ideally in January 2018 but certainly before the end of SP18 semester. |

| As a backup measure, in case the data has been lost, the department is reassessing ARTHS-195 this academic year, and would be able to submit an alternate set of assessments by June 2018. |

Plan for topic "Students completing the course will be able to develop an art historical vocabulary by recognizing major styles and works of art: describe, classify, compare/contrast works of art to better identify developments and changes throughout history.": 2016/17

Plan for topic "Students completing the course will be able to distinguish and summarize possible relationships between artists and their societies.": 2016/17

Lizzy Gand collected the SLO assessments for the 2016-17 academic year. She is currently on medical leave and will not return until after December 31, 2017. The remainder of the department does not have access to the data she collected. The department plans to complete the assessment for ARTHS-195 after Lizzy returns and provides access to the SLO assessments, ideally in January 2018 but certainly before the end of SP18 semester.

As a backup measure, in case the data has been lost, the department is reassessing ARTHS-195 this academic year, and would be able to submit an alternate set of assessments by June 2018.

Plan for topic "Students completing the course will be able to evaluate and apply concepts from critical, historical, and primary texts to interpret works of art": 2016/17

Lizzy Gand collected the SLO assessments for the 2016-17 academic year. She is currently on medical leave and will not return until after December 31, 2017. The remainder of the department does not have access to the data she collected. The department plans to complete the assessment for ARTHS-195 after Lizzy returns and provides access to the SLO assessments, ideally in January 2018 but certainly before the end of SP18 semester.

As a backup measure, in case the data has been lost, the department is reassessing ARTHS-195 this academic year, and would be able to submit an alternate set of assessments by June 2018.

Plan for topic "Students completing the course will be able to identify the various visual arts and styles and their relationship to cultural values from the paleolithic through the Roman eras": 2013/14

We are satisfied by the results showing a 100% achievement rate, as evidenced by student response and by instructor assessments made through class writing, quizzes and exams, and a formal paper. Based on these results, I'll be focusing my actions on sustaining what is working effectively while looking for ways to enhance student interest in the critical thinking issues that pertain to this topic, such as questions of evidence, reliability of sources, and critically examining assumptions.

Plan for topic "Students completing the course will be able to develop an art historical vocabulary by recognizing major styles and works of art: describe, classify, compare/contrast works of art to better identify developments and changes throughout history": 2013/14
We are satisfied by the results showing a 100% achievement rate, as evidenced by student response and by instructor assessments made through class writing, quizzes and exams, and a formal paper. Based on these results, I’ll be focusing my efforts on reinforcing and refining student opportunities to learn, apply, and reflect on the language of art history. I’ve modified the handouts so that they prompt students to more actively practice defining terms and relating them to relevant artworks. I’m also working on devising some word games that help students playfully master technical vocabulary and the art of description.

Plan for topic "Students completing the course will be able to distinguish and summarize possible relationships between artists and their societies.": 2013/14

To expand the number of students who report full success in this area, I am designing ways to clarify and enhance the issues of how to relate art to politics. I am looking for ways to engage more active, creative ways of discussing and reflecting on the significance of different political and religious concepts, including enhanced lessons that use role-playing, more primary sources, and multi-media resources to help students who may need more help in these areas.

Plan for topic "Students completing the course will be able to evaluate and apply concepts from critical, historical, and primary texts to interpret works of art": 2013/14

Although the overall success rate is high, I would like to continue to add tools that help students remember and use technical vocabulary. My action plan for this area is also to devise games that function as self-testing memory exercises to build vocabulary while enhancing the sense of community in the class, helping students feel more at ease working with unfamiliar terminology.

Plan for topic "Students completing the course will be able to identify the various visual arts and styles and their relationship to cultural values from the paleolithic through the Roman eras": 2011/12

The plan of action for this course to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program’s SLO patterns.

Plan for topic "Students completing the course will be able to develop an art historical vocabulary by recognizing major styles and works of art: describe, classify, compare/contrast works of art to better identify developments and changes throughout history.": 2011/12

The plan of action for this course to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program’s SLO patterns. All sections for this course were assessed this semester.

Plan for topic "Students completing the course will be able to distinguish and summarize possible relationships between artists and their societies.": 2011/12

The plan of action for this course to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program’s SLO patterns and needs. All sections for this course were assessed this semester.
### History of Medieval and Renaissance Art [ARTHS-196] belonging to Art [ARTHS]

#### Plan for topic "Students completing the course will be able to distinguish differences in patronage and art production in Medieval and Renaissance art and architecture": 2018/19

This type of data analysis has allowed the department to compare data by sections and by all students. We have discovered that we need to work on certain concepts with students such as medieval attitudes about the classical era, and changes in patronage as a result of the rise of the bourgeoisie. The department plans to meet and discuss how to improve teaching of these concepts. It is also possible that the wording of the questions is confusing--it may be worthwhile to revisit the manner in which the questions are asked.

### Plan for topic "Students completing the course will be able to appraise the changing role of the artist in the Middle Ages and Renaissance": 2018/19

This type of data analysis has allowed the department to compare data by sections and by all students. We have discovered that we need to work on certain concepts with students such as the status of the artist in comparison to other types of labor, and the professionalization of artists in the Middle Ages through guilds. The department plans to meet and discuss how to improve teaching of these concepts. It is also possible that the wording of the questions is confusing--it may be worthwhile to revisit the manner in which the questions are asked.

### Plan for topic "Students completing the course will be able to analyze works of art in terms of historical circumstances and cultural values of Western Europe from early Christian period through the Renaissance": 2015/16

We will phase out student self-reporting surveys as our SLO assessment tool, in response to feedback that these are not a preferred method. Instead, we will use assignments, essays, and quizzes/exams used to assess this objective, defining success as achievement of a rubric score or grade.

To make this change, art history faculty will engage in dialogue to identify effective assignments we have designed (or are working to design) that provide good opportunities to assess SLOs, with the goal of building a system for sharing our results and "best practices" for art history SLO assessment.

### Plan for topic "Students completing the course will be able to compare and contrast painting, sculpture, and architecture using an art historical vocabulary in the various styles of the chronological periods": 2015/16

We will phase out student self-reporting surveys as our SLO assessment tool, in response to feedback that these are not a preferred method. Instead, we will use assignments, essays, and quizzes/exams used to assess this objective, defining success as achievement of a rubric score or grade.

To make this change, art history faculty will engage in dialogue to identify effective assignments we have designed (or are working to design) that provide good opportunities to assess SLOs, with the goal of building a system for sharing our results and "best practices" for art history SLO assessment.

### Plan for topic "Students completing the course will be able to distinguish differences in patronage and art production in Medieval and Renaissance art and architecture": 2018/19

This type of data analysis has allowed the department to compare data by sections and by all students. We have discovered that we need to work on certain concepts with students such as medieval attitudes about the classical era, and changes in patronage as a result of the rise of the bourgeoisie. The department plans to meet and discuss how to improve teaching of these concepts. It is also possible that the wording of the questions is confusing--it may be worthwhile to revisit the manner in which the questions are asked.

The department plans to meet and discuss how to improve teaching of these concepts. It is also possible that the wording of the questions is confusing--it may be worthwhile to revisit the manner in which the questions are asked.
That six students chose "disagree" indicates a small subset of students have difficulty distinguishing the economic structures of the medieval world from that Renaissance mercantile cities. This gap is being addressed in recent semesters by incorporating high quality documentary videos that dramatize concepts students find difficult to grasp from reading alone.

We will phase out student self-reporting surveys as our SLO assessment tool, in response to feedback that these are not a preferred method. Instead, we will use assignments, essays, and quizzes/exams used to assess this objective, defining success as achievement of a rubric score or grade.

To make this change, art history faculty will engage in dialogue to identify effective assignments we have designed (or are working to design) that provide good opportunities to assess SLOs, with the goal of building a system for sharing our results and "best practices" for art history SLO assessment.

Plan for topic "Students completing the course will be able to appraise the changing role of the artist in the Middle Ages and Renaissance": 2015/16

We will phase out student self-reporting surveys as our SLO assessment tool, in response to feedback that these are not a preferred method. Instead, we will use assignments, essays, and quizzes/exams used to assess this objective, defining success as achievement of a rubric score or grade.

To make this change, art history faculty will engage in dialogue to identify effective assignments we have designed (or are working to design) that provide good opportunities to assess SLOs, with the goal of building a system for sharing our results and "best practices" for art history SLO assessment.

Plan for topic "Students completing the course will be able to analyze works of art in terms of historical circumstances and cultural values of Western Europe from early Christian period through the Renaissance": 2012/13

The Art Department has scheduled a Best Practices Round-up during the FA13 Flex days, where the SLO results and recommendations will be discussed, and strategies for increased student success will be shared.

Plan for topic "Students completing the course will be able to compare and contrast painting, sculpture, and architecture using an art

### 159. History of Baroque to 20th Century Art [ARTHS-197] belonging to Art [ARTHS]

**Plan for topic "Students completing the course will be able to analyze works of art in terms of historical circumstances and cultural values of Western Europe from the Baroque period to early twentieth century": 2018/19**

For future assessments, the department will: convene instructors earlier in the semester to discuss short answer questions and how to conduct a more normed assessment, such as requiring the same question of students, norming the evaluation of a short answer response, and making sure all instructors are aware of the SLO assessment and the importance of participating in and reporting SLO assessments. While students seem to be doing well on the assessment overall, the evaluation process has multiple variables and the department can improve the assessment process by making the assessments more standardized over all sections and students.

**Plan for topic "Students completing the course will be able to compare and contrast painting, sculpture, and architecture using appropriate aesthetic vocabulary in the various styles of the chronological period - Baroque, Rococo, Neoclassicism, Romanticism, Realism, Impressionism, Post-impressionism, Expressionism, Cubism, and Dada": 2015/16**

We will phase out student self-reporting surveys as our SLO assessment tool, in response to feedback that these are not a preferred method. Instead, we will use assignments, essays, and quizzes/exams used to assess this objective, defining success as achievement of a rubric score or grade.

To make this change, art history faculty will engage in dialogue to identify effective assignments we have designed (or are working to design) that provide good opportunities to assess SLOs, with the goal of building a system for sharing our results and "best practices" for art history SLO assessment.

**Plan for topic "Students completing the course will be able to analyze works of art in terms of historical circumstances and cultural values of Western Europe from the Baroque period to early twentieth century": 2015/16**

We will phase out student self-reporting surveys as our SLO assessment tool, in response to feedback that these are not a preferred method. Instead, we will use assignments, essays, and quizzes/exams used to assess this objective, defining success as achievement of a rubric score or grade.

To make this change, art history faculty will engage in dialogue to identify effective assignments we have designed (or are working to design) that provide good opportunities to assess SLOs, with the goal of building a system for sharing our results and "best practices" for art history SLO assessment.

**Plan for topic "Students completing the course will be able to distinguish differences in styles and art patronage within these centuries": 2015/16**

A subset of students seem to be having difficulty learning and remembering unfamiliar terminology, such as foreign names of artists or art styles. We will devise assignments that help students practice these skills.
We will phase out student self-reporting surveys as our SLO assessment tool, in response to feedback that these are not a preferred method. Instead, we will use assignments, essays, and quizzes/exams used to assess this objective, defining success as achievement of a rubric score or grade.

To make this change, art history faculty will engage in dialogue to identify effective assignments we have designed (or are working to design) that provide good opportunities to assess SLOs, with the goal of building a system for sharing our results and "best practices" for art history SLO assessment.

Plan for topic "Students completing the course will be able to evaluate the changing role of the artist from the baroque to the early 20th century": 2015/16

As the only thing students seem hesitant about is describing works of art conceptually using specific vocabulary terms, the encouragement of best teaching practices involving class discussions and low-stakes practice opportunities for students is the best course of action. The Art Department has scheduled a Best Practices Round-up during the FA13 Flex days, where the SLO results and recommendations will be discussed, and strategies for increased student success will be shared.

Plan for topic "Students completing the course will be able to analyze works of art in terms of historical circumstances and cultural values of Western Europe from the Baroque period to early twentieth century": 2012/13

Students often have a weak grasp of historical events, which contributes to their lack of confidence. In addition, they need practice in analyzing works of art in terms of their historical circumstances, best given as low-stakes discussion and writing. Again, getting the department to share teaching strategies seems like the most effective solution.
Art Department has scheduled a Best Practices Round-up during the FA13 Flex days, where the SLO results and recommendations will be discussed, and strategies for increased student success will be shared.

Plan for topic "Students completing the course will be able to distinguish differences in styles and art patronage within these centuries": 2012/13

Students need resources to fill in the gaps of their historical knowledge, and they need practice in taking historical information and applying it to works of art. One suggestion is to create a department pool of resources such as web pages or videos that students may want to use to supplement their reading and class activities. The Art Department has also scheduled a Best Practices Round-up during the FA13 Flex days, where the SLO results and recommendations will be discussed, and strategies for increased student success will be shared.

Plan for topic "Students completing the course will be able to evaluate the changing role of the artist from the baroque to the early 20th century": 2012/13

DVC Instructional Course SLO Action Plans

160. Contemporary Art History [ARTHS-199] belonging to Art [ARTHS]

Plan for topic "Students completing the course will be able to identify, describe, and analyze important issues related to art making in the last half of the 20th century, including significant social, economic, scientific, and political forces that helped shape the character of the art produced during this time": 2016/17

Both assessment methods indicated that students were succeeding above the threshold of success set by the department. However, the lower rate of success in Method 2 indicates that students may be over-representing their success. The department intends to continue using two methods to analyze the SLO data, and expand the cohort being assessed through Method 2. We will do this by facilitating communication of all ARTHS 199 instructors in the next SLO cycle at the beginning of the semester(s), to set the method of analysis and prepare adjunct instructors for the new means of assessment.

It was agreed by all instructors that giving students more low-stakes opportunities to practice analysis of artworks and issues would be beneficial to student success in this SLO. To facilitate this practice, the instructors discussed setting up a common Canvas site for Art History, with sample rubrics, assignments, and a repository of practice questions and assignments. Sharing effective practices between instructors will facilitate consistency of instruction and enrich the learning experience of all students. In addition, several adjunct faculty have mentioned a desire to have more opportunity to collaborate and converse with other art history instructors. The department will facilitate more collaboration opportunities between art history instructors.

Plan for topic "Students completing the course will be able to recognize key works of art produced during the last half of the 20th Century": 2016/17

As with the other SLOs, instructors agreed that it is beneficial for students to have lots of low-stakes practice in identifying and discussing images. The more that students have to use recall and practice identifying images, the better they know those artworks. It is possible to incorporate practice in identifying images in many other types of assignments—image identification can be part of higher-level critical thinking questions, such as practice slide comparisons or other assignments. The planned Canvas ARTHS site and area discussions/collaborations will also benefit student achievement of this SLO in giving instructors examples of effective practices and assignment ideas.

Plan for topic "Students completing the course will be able to critically analyze the nature of contemporary art and its significance with regard to their own lives and society at large": 2016/17

The Canvas ARTHS share site and collaborative opportunities mentioned in SLO #1’s action plan will also benefit this SLO. Giving students lots of opportunities to apply their knowledge and connect art to social issues and their own lives in low-stakes assignments will help students meet this SLO. Instructors were able to discuss shared values of art history, and look forward to continuing this discussion. Some instructors take a much more â€œtraditionalâ€ and concrete approach to the subject matter, while others tend to emphasize personal choice and individual interaction with the subject. This variability of approaches seems appropriate and reflects the variety of methodologies in the discipline, but does make consistent assessment of this SLO difficult.
Plan for topic "Students completing the course will be able to apply concepts from critical, historical, and primary sources using appropriate art historical vocabulary": 2016/17

It is the strong belief of the lead faculty that rubrics are a more effective practice for student learning than a letter grade, especially if not many comments are written to explain the grade to the student.

It was agreed among all instructors that students are not as proficient at collecting and evaluating sources as we would like them to be.

The Canvas shared ARTHS site and collaboration opportunities mentioned by other SLO action plans will also be a benefit to this SLO. In particular, we can share assignments or tools designed to teach students how to research, identify sources, and evaluate their quality.

Plan for topic "Students completing the course will be able to identify, describe, and analyze important issues related to art making in the last half of the 20th century, including significant social, economic, scientific, and political forces that helped shape the character of the art produced during this time": 2013/14

The department will continue to discuss and consider its assessment methods and teaching strategies. The results are positive, but there are several factors to consider, with the most important being the robustness of the assessment methods. One possibility during the next assessment cycle is to keep the student self-assessment and cross-check it with an additional assessment method such as an essay rubric category or an exam question. This would verify the results.

Plan for topic "Students completing the course will be able to recognize key works of art produced during the last half of the 20th Century": 2013/14

The department will continue to discuss and consider its assessment methods and teaching strategies. This would verify the results.

Plan for topic "Students completing the course will be able to critically analyze the nature of contemporary art and its significance with regard to their own lives and society at large": 2013/14

The department will continue to discuss and consider its assessment methods and teaching strategies. The results are positive, but there are several factors to consider, with the most important being the robustness of the assessment methods. One possibility during the next assessment cycle is to keep the student self-assessment and cross-check it with an additional assessment method such as an essay rubric category or an exam question. This would verify the results. In addition, the cognitive difficulty of this SLO should not be underestimated. Giving students more concrete low-stakes opportunities to analyze the nature of contemporary art and connect it to their lives would be a good strategy. This is one way in which the short-term class may have actually succeeded better than the traditional sections, as the student cohort was so small, and the class time
so compressed and intensive, the instructor was able to personalize the material. These strategies and this SLO in particular would be a good discussion topic for the best practices workshops that are now held regularly by the department.

Plan for topic "Students completing the course will be able to apply concepts from critical, historical, and primary sources using appropriate art historical vocabulary": 2013/14

The department will continue to discuss and consider its assessment methods and teaching strategies. The results are positive, but there are several factors to consider, with the most important being the robustness of the assessment methods. One possibility during the next assessment cycle is to keep the student self-assessment and cross-check it with an additional assessment method such as an essay rubric category or an exam question. This would verify the results. In addition, more direct communication about types of sources and how to use them, or concrete identification of tasks or breaking tasks related to this SLO into discrete steps and clearly labeling the steps may help students to correctly identify their skills in this area.

Plan for topic "Students completing the course will be able to identify, describe, and analyze important issues related to art making in the last half of the 20th century, including significant social, economic, scientific, and political forces that helped shape the character of the art produced during this time": 2011/12

The plan of action for this course to continue teaching it with its current methods, because the SLO results are so overwhelmingly positive. We will continue to evaluate and align this SLO to reflect the Program's SLO patterns. All sections for this course were assessed this semester.

Plan for topic "Students completing the course will be able to recognize key works of art produced during the last half of the 20th Century": 2011/12

<th>Plan for topic &quot;understand the geometric cause of the day/night cycle, stars rising and setting, the year etc&quot;: 2009/10</th>
</tr>
</thead>
<tbody>
<tr>
<td>These results are consistent with the percentages expected for a challenging course. We expect to continue working with this material.</td>
</tr>
</tbody>
</table>

We expect to continue requiring homework, tests, and a comprehensive final to ensure that students review. Some sections provide extensive review materials to allow students to practice and review the concepts.
DVC Instructional Course SLO Action Plans

163. Visible Universe With Laboratory [ASTRO-112] belonging to Physical Science/Physics/Astronomy/Geology/Geography [ASTRO]
164. Elementary Astronomy [ASTRO-120] belonging to Physical Science/Physics/Astronomy/Geology/Geography [ASTRO]

Plan for topic "combine observational evidence with theoretical assumptions to develop a model of the underlying physical structure.": 2017/18

The level of mastery was closely correlated with class attendance and participation. Those students attending lectures regularly, completing course homework and participating in the solar observing session all achieved at least 7 out of 10 points. This was the first assessment of this particular SLO. Students that made use of department tutoring also performed at (at least) the satisfactory level. Going forward, encouragement of student tutoring resources should always be emphasized early in the semester. Additional material and content for display in the planetarium should also be acquired and utilized to aid in the understanding of this topic.

Plan for topic "analyze electromagnetic radiation to yield results concerning the composition and structure of our solar system, galaxy and universe.": 2013/14

The results have met the goals of the sub-department. Continue teaching these topics and reinforcing throughout the semester.

Plan for topic "use graphs and plots to represent data and to make inferences from the data provided.": 2011/12

Continue to stress these skills. Do more classwork and group work to improve their skills.
DVC Instructional Course SLO Action Plans

<table>
<thead>
<tr>
<th>165. The Universe for Beginners [ASTRO-128] belonging to Physical Science/Physics/Astronomy/Geology/Geography [ASTRO]</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Plan for topic &quot;Students completing ASTRO-128 will be able to Evaluate the limits of our current knowledge&quot;:</strong> 2018/19</td>
<td>This course has not been offered in years and thus, not evaluated.</td>
</tr>
<tr>
<td><strong>Plan for topic &quot;Students completing the course will be able to Observe selected celestial phenomena.&quot;</strong>: 2014/15</td>
<td>The students meet the assessment criterion. We plan to continue to having the students complete these projects as they are central to the scientific method and the core learning objectives of the program.</td>
</tr>
<tr>
<td><strong>Plan for topic &quot;Students completing the course will be able to...Summarize major components of knowledge of the constituents of the Universe.&quot;</strong>: 2012/13</td>
<td>The students meet the assessment criterion. We plan to continue to provide written material and lectures supporting the students' continuing understanding of our knowledge of the Universe.</td>
</tr>
<tr>
<td><strong>Plan for topic &quot;Use mathematics and graphical material to reach quantitative and qualitative conclusions.&quot;</strong>: 2012/13</td>
<td>The students met the criterion for this assessment. Because using math and graphs is a key reasoning skill we hope to instill, we plan to continue both homework and tests that involve computations and use of graphs. We have in person meetings on a regular to improve students' success, by getting them to work together and avoid giving up.</td>
</tr>
<tr>
<td><strong>Plan for topic &quot;Students completing ASTRO-128 will be able to Apply scientific methods and logic to understand the physical world&quot;:</strong> 2012/13</td>
<td>Students met the achievement level required. The plan is to continue providing, text materials, homework assignments and in person activities to push students into using scientific principles. As activities come up for review and revision, more emphasis on drawing conclusions will be incorporated when possible.</td>
</tr>
</tbody>
</table>
### Plan for topic "Formulate conclusions based on scientific data such as stellar angular positions, duration of eclipses, positions of craters and spectral features.": 2017/18

Completing three laboratory exercises on the sub-topics of spectral analysis: Origins & analysis, Spectral analysis and Doppler-shift of spectral lines serves as both a comprehensive as well as a reinforcing set of topics appropriate for this academic level. Having students analyze real spectra via diffraction gratings and spectral tubes is working with regards to analyzing types of spectra with a high success rate. The analysis of stellar spectral classification is also well understood due to the large number of samples the student is introduced to in the laboratory. Areas that need improving deal with the mathematical analysis of doppler-shifted and doppler-broadened spectral lines. More time spent with the students doing sample problems prior to having them do problems independently is encouraged going forward. Finally, the interpretation of the mathematical results is the weakest area of proficiency. More lecturing, followed-up with some real examples should aid in the understanding of the numerical data.

### Plan for topic "Communicate results in concise written form, distinguishing measurements and observations": 2013/14

The results were better than the goal set. Continue having the students write laboratory reports. Intervene as early as possible when the reports do not meet minimum standards.

### Plan for topic "Analyze, measure and interpret star and planet positions, spectra, planetary features": 2010/11

Students met the requirement overall. The results on one of the finals, the most challenging were not as robust as desired. Putting this question toward the start of the exam and also giving more feedback for student practice is expected to help.
### 167. Independent Study [ASTRO-298] belonging to Physical Science/Physics/Astronomy/Geology/Geography [ASTRO]

**Plan for topic "Students completing the course will be able to State specific goals and challenges to pursue as part of the student's educational goals."**: 2018/19

This course has not been offered in years and thus, not evaluated. The course is highly specific to the student wishing to enroll and hence, the methods of evaluation can be quite diverse.

**Plan for topic "Students completing ASTRO-298 will be able to Explain how Dark Matter became a viable option for the flaws in classical (Newtonian) gravitational theory."**: 2013/14

The research paper is a good method of assessment for independent study courses. Specific goals and assessments should be designed for the specific topic agreed upon by both instructor and student.

A few years ago, the department developed a handout that described several misconceptions that are common regarding evolution. One of these misconceptions is that evolution and natural selection are the same thing. The use of this teaching tool appears to be successful based on the large percentage of students who understood the difference between evolution and natural selection. We plan to continue to use this handout as a useful teaching tool so that not only this misconception regarding evolution, but many others as well are addressed in class.

**Plan for topic "Students completing the course will be able to understand and apply the scientific method."**: 2015/16

After analyzing the data, it is clear that the students are getting the concept of the scientific method and the steps of the scientific method. All sections had over 90% success rates, which is over the 80% success rate. There is nothing we plan on working on for this concept.

On the other hand, there was very mixed results for the second question. It varied from section to section which is due to how much emphasis each teacher puts on it. The action plan is for the department to talk about whether or not this is an essential concept that they want students to learn in this class. If so, we need to let all the instructors (these are all taught by adjunct instructors) to emphasize this concept. This is a common misconception for many students as the media uses the term "theory" in a way that is really a hypothesis in scientific terms. We can spend more time contrasting the general term theory and scientific theory, and have them analyze examples.

**Plan for topic "Students completing the course will be able to understand and apply the theory of evolution by means of natural selection."**: 2012/13

Since the student learning was very good, no major changes are needed. However, there were 3 students who scored less than 15 out of 20. If this assessment tool is used again, it is recommended that students who score less than 15 out of 20 be required to visit the tutor room for additional help.

**Plan for topic "Students completing the course will be able to understand and apply the theory of evolution by means of natural selection."**: 2010/11

There is no immediate plan for these results as students demonstrated achievement of the learning outcome. However, in the future it would be better if more students were able to achieve this learning outcome. So, faculty teaching this course will be told to make sure they emphasize this learning outcome.

**Plan for topic "Students completing the course will be able to understand and apply the theory of evolution by means of natural selection."**: 2007/8

After analyzing the data from this semester's assessment, the department developed a handout that covers some of the important aspects of evolution. This was shared with the
### DVC Instructional Course SLO Action Plans

After analyzing the data from this semester's assessment, the department developed a handout that covers some of the important aspects of evolution. This was shared with the faculty teaching this course and the faculty were instructed to share the handout with their students.

**Plan for topic "Students completing the course will be able to understand and apply the theory of evolution by means of natural selection."**: 2007/8

- After analyzing the data from this semester's assessment, the department developed a handout that covers some of the important aspects of evolution. This was shared with the faculty teaching this course and the faculty were instructed to share the handout with their students.

**Plan for topic "e"**: 2007/8

- After analyzing the data from this semester's assessment, the department developed a handout that covers some of the important aspects of evolution. This was shared with the faculty teaching this course and the faculty were instructed to share the handout with their students.
170. Fundamentals of Biological Science with Laboratory [BIOSC-102] belonging to Biological Science [BIOSC]
Plan for topic "Students completing the course will be able to understand the difference between evolution and natural selection."
2018/19

A few years ago, the department developed a handout that described several misconceptions that are common regarding evolution. One of these misconceptions is that evolution and natural selection are the same thing. The use of this teaching tool appears to be successful based on the large percentage of students who understood the difference between evolution and natural selection. We plan to continue to use this handout as a useful teaching tool so that not only this misconception regarding evolution, but many others as well are addressed in class.

Plan for topic "Students completing the course will be able to properly use the microscope."
2018/19

The instructions for the use of the microscope in the lab manual were revised prior to the semester in which the students were assessed in an attempt to make the procedure more simple and easier to understand. A success rate of 83.6% would indicate that these revisions did help. But 16.4% of the students had at least some difficulty with the proper use of the microscope. As a plan of action, instructors will be encouraged to individually watch students use of the microscope after they have demonstrated the technique and individually assist those who did not understand/follow the instructions.

Plan for topic "e": 2018/19

The instructions for the use of the microscope in the lab manual were revised prior to the semester in which the students were assessed in an attempt to make the procedure more simple and easier to understand. A success rate of 83.6% would indicate that these revisions did help. But 16.4% of the students had at least some difficulty with the proper use of the microscope. As a plan of action, instructors will be encouraged to individually watch students use of the microscope after they have demonstrated the technique and individually assist those who did not understand/follow the instructions.

Plan for topic "Students completing the course will be able to understand and apply the scientific method."
2015/16

The results of questions # 3 and 4 clearly demonstrate the students overall had a good understanding about the difference between a hypothesis and a scientific theory with 93 and 91% respectively correct answers. A somewhat weaker outcome can be reported regarding the knowledge of the method of a scientific inquiry. Question #1 was correctly answered by 72% and #2 by 88%. The relatively low outcome for #1 can be interpreted that students do not understand that a scientific inquiry should only test one variable at a time and not several. This misunderstanding should be more clarified when instructors teach this part of the subject in the future.

The discrepancy in outcome between the 102 sections stated here and those of 101 below can be attributed to the fact that 101 students do not have a lab component to their course and therefore do not get as much training in the execution of the scientific method.
After analyzing the data, it is clear that the students are getting the concept of the scientific method and the steps of the scientific method. All sections had over 90% success rates, which is over the 80% success rate. There is nothing we plan on working on for this concept.

On the other hand there was very mixed results for the second question. It varied from section to section which is due to how much emphasis each teacher puts on it. The action plan is for the department to talk about whether or not this is an essential concept that they want students to learn in this class. If so, we need to let all the instructors (these are all taught by adjunct instructors) to emphasize this concept. This is a common misconception for many students as the media uses the term "theory" in a way that is really a hypothesis in scientific terms. We can spend more time contrasting the general term theory and scientific theory, and have them analyze examples.

**Plan for topic "Students completing the course will be able to understand the difference between evolution and natural selection."**: 2014/15

As student responses were significantly positive, and indicated a very high degree of learning in this subject area, it is suggested that faculty continue to teach evolution and natural selection in the same high quality manner in which they have been currently teaching this subject. No changes or improvements are needed or suggested at this time.

**Plan for topic "Students completing the course will be able to understand the difference between evolution and natural selection."**: 2012/13

Since the student learning was very good for this topic, it is suggested that the Biology faculty continue to stress the importance of evolution in Biology and the distinction between evolution and natural selection.

**Plan for topic "Students completing the course will be able to properly use the microscope."**: 2010/11

Instructor must try to spend time with each student to make sure they can use the scope properly. Individual instruction is essential for some students.

**Plan for topic "Students completing the course will be able to understand the difference between evolution and natural selection."**: 2009/10

After analyzing the data from this semester’s assessment, the department developed a handout that covers some of the important aspects of evolution. This was shared with the faculty teaching this course and the faculty were instructed to share the handout with their students.
DVC Instructional Course SLO Action Plans

171. Genetics and Evolution [BIOSC-107] belonging to Biological Science [BIOSC]

Plan for topic "Students completing this course will be able to predict the outcome of a genetic cross": 2016/17

These results are encouraging as 2/3 showed complete mastery of the topic with completely being able to solve the most difficult type of genetic cross considered. The remaining 1/3 had a mastery level somewhere between zero and almost complete.

It would be a good idea to assess exactly where these students had difficulty. Were they able to predict the outcome of a simpler one-factor genetic cross? Could they combine the results of more than one single-factor cross, or perhaps they understood the genetic cross, but made a mistake with the mathematical calculation required to get the correct answer.

It might also be useful to see whether the students who did not show mastery of this topic ended up with a passing grade in the course.

Plan for topic "Students completing this course will be able to predict the outcome of a genetic cross": 2015/16

The results indicate a relatively high rate of success for a difficult topic. It would be instructive to assess the rate of success for a simple one factor cross. If the results indicate very high rate of success (85% or more), then more instruction time should be devoted to showing students the steps needed to analyze more than one trait. If results show less than 85% success, then more instruction time should be spent with the basics of determining the outcome of a simple cross and it would not be necessary to spend additional time with analysis of multiple traits simultaneously.

Plan for topic "Students completing BIOSC-107 will be able to use common techniques to conduct a genetic cross.": 2013/14

No changes are needed in terms of instruction related to students conducting a genetic cross as all students were able to do this. However, identification of the traits was problematic for one group of students. So, a lab quiz that includes identification of the traits may prove useful in the future to ensure all students can successfully identify the traits being studied.

Plan for topic "Students completing the course will be able to distinguish between evolution and natural selection": 2011/12

Although the results were satisfactory, there is still room for improvement, and more emphasis on this key point should be given in future semesters.
DVC Instructional Course SLO Action Plans

Plan for topic "Student will be able to understand the terms and concepts associated with the human circulatory system.": 2017/18

Human Biology is a General Ed class taken by students with very different levels of preparation. A success rate of 85% is therefore quite good for this discipline. The 75% success rate in the evening section needs to be improved. It is difficult to move the needle because all the sections of Biosc 116 are taught by adjunct faculty. I plan on meeting with the adjuncts teaching this course next semester to encourage them to incorporate more on-line learning tools, more small group work and more at home assignments (i.e., worksheets) to help struggling students master the material.

Plan for topic "e": 2017/18

Human Biology is a General Ed class taken by students with very different levels of preparation. A success rate of 85% is therefore quite good for this discipline. The 75% success rate in the evening section needs to be improved. It is difficult to move the needle because all the sections of Biosc 116 are taught by adjunct faculty. I plan on meeting with the adjuncts teaching this course next semester to encourage them to incorporate more on-line learning tools, more small group work and more at home assignments (i.e., worksheets) to help struggling students master the material.

Plan for topic "Students completing BIOSC-116 will be able to understand genetics terminology, be able to do genetics problems and understand inheritance patterns in humans.": 2014/15

The results look quite good. However, we could probably bring some of the numbers up a bit. We need to really teach study skills as well as biology. Many of us are finding that students need to be given specific assignments every day or they do not keep up with the material. We plan to assign homework, worksheets and reading assignments more frequently. Some instructors are planning to use more of the online resources provided by publishers. The new software is adaptive and tailors the material to a student's current knowledge. This software can really help focus a student's studying.

Plan for topic "Students completing BIOSC-116 will be able to Students will understand the terms and concepts associated with the human immune system.": 2013/14

Since all the sections of Biosc 116 are taught by adjunct faculty, I will take the lead in providing data; I will also be the "clearinghouse" for sharing ideas on how to improve students understanding of difficult subjects like the immune system. I am heartened that so many students got the question about vaccination correct since this is a "real-world" issue that impacts the everyday lives of our students. We clearly can do a better job. I will suggest that we share any worksheets or other homework assignments we use to improve student performance. Since the individual with the best results uses quizzes and exams in lecture I will suggest that we try to incorporate more quizzes (either take home or in class")to force students to study throughout the semester, rather than just before an exam.

Plan for topic "Students completing the course will be able to understand the theory of evolution by means of natural selection, including the evolution of humans.": 2010/11

All of our Biosc 116 sections are taught by adjunct faculty. Although we have tried to provide all our instructors with the important info they should cover in their classes, we have clearly not adequately informed some of our adjunct instructors. We have developed a handout and last semester we had a flex activity. I think we need to modify the...

173. Human Biology with Laboratory [BIOSC-117] belonging to Biological Science [BIOSC]

Plan for topic "Students completing this course will be able to understand the terminology and concepts for the human cardiovascular system": 2016/17

The results of the assessment were disappointing. While I know we cannot get every student to grasp every concept, too many of our students could not answer basic questions about the cardiovascular system. The four sections of Biosc 117 assessed are taught by 3 different instructors - one full-time and two part-time. All of the instructors had similar success rates, despite real differences in how we teach the class. We have all talked and we all find that we have a significant percentage of students who do not read and write well enough to succeed in this class. All of us have also found that a significant number of students do not turn in assignments, homework and worksheets or complete online assignments.

All of the instructors use PowerPoint presentations during their lectures on the cardiovascular system. Two of the instructors use Canvas quite extensively, while the evening instructor does not. One of the instructors has incorporated Connect - an online learning system - into her course. While students have reported how much they like the online assignments, this did not help as much as we would like.

We clearly need to find a way to help more of our students master the material in this course. I plan on having students complete an online assignment before the material is covered in class so that I can incorporate more small group work into my lectures. I also plan on using clickers in the future so I get instant feedback during class. Because the Biology department at DVC will be getting a set of laptops for use in our labs, I plan on using some of the laboratory time to make sure that everyone is really using the materials (PowerPoint presentations, animations, worksheets, etc) posted on Canvas and the online learning system. I also plan on talking to each student who does not turn in one of the first few assignments.

The instructors for this class also need to get together to discuss the material we cover in the class and what depth and breadth is appropriate for a non-majors introductory biology class. We also need to discuss what to do about students who do not complete their assignments or do not study outside of class.
DVC Instructional Course SLO Action Plans

Plan for topic "Student will be able to understand the terms and concepts associated with the human circulatory system.": 2016/17

The results of the assessment were disappointing. While I know we cannot get every student to grasp every concept, too many of our students could not answer basic questions about the cardiovascular system. We also need to discuss what to do about students who do not complete their assignments or do not study outside of class.

Plan for topic "Students completing BIOSC-117 will be able to Students will know the terminology (and therefore concepts) for the human immune system": 2013/14
These results show that we have more to do. I plan on creating a worksheet for each topic covered in Human Biology. Having students complete a worksheet seems to keep them studying all the time rather than just before the test. I also plan on working with the other faculty teaching Biosc 116 or Biosc 117 to see what they are doing differently. I also plan on reworking my powerpoint presentations and lecture outlines. I may also begin using quizzes as well as exams in lecture. I also plan to share these ideas with any other faculty (currently all adjuncts) teaching this class.

Plan for topic "Students completing the course will be able to use a microscope to study cells and tissues.": 2010/11
Instructors must make an effort to work with each student individually. Instructors must also make sure that students who missed the microscope lab are required to learn its proper use.

Plan for topic "Students completing the course will be able to understand the theory of evolution by means of natural selection, including the evolution of humans." : 2009/10
After analyzing the data from this semesters assessment, the department developed a handout that covers some of the important aspects of evolution. This was shared with the faculty teaching this course and the faculty were instructed to share the handout with their students.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to explain the fundamental concepts and techniques in biotechnology.":

2017/18

Since this was the first time we assessed biotechnology, we were pleased with the results. The BIOSC 119 curriculum does not have as much opportunity for biotechnology lecture and labs as the BIOSC 146 course, so we were concerned that students would not learn as much in this growing area. In order to pick up even more students, we will be adding a gel electrophoresis lab and lab activity in the fall. We will reevaluate the biotechnology component during the next SLO cycle.

Plan for topic "Students completing the course will be able to discuss the ecology of microbes, the methodology used to study them and how to control their growth.": 2015/16

We changed the SLO assessment topic to align better with the revised Title V.

Plan for topic "Students completing this course will be able to examine common methodologies used in microbiology such as microscopy, staining and sterile technique.": 2015/16

We changed the SLO assessment topic to align better with the revised Title V.

Plan for topic "Students completing this course will be able to analyze microbial structure and function at the molecular and cellular levels.": 2015/16

We changed the SLO assessment topic to align better with the revised Title V.

Plan for topic "Students completing this course will be able to investigate microbial growth, identification and control.": 2015/16

We changed the SLO assessment topic to align better with the revised Title V.

Plan for topic "Students completing this course will be able to explain the fundamental concepts and techniques in biotechnology.": 2015/16

We changed the SLO assessment topic to align better with the revised Title V.

Plan for topic "Students completing this course will be able to discuss how humans and microbes interact in health and disease, highlighting the significance of the immune system in disease control and prevention.": 2015/16

We changed the SLO assessment topic to align better with the revised Title V.

Plan for topic "Students completing this course will be able to analyze microbial structure and function at the molecular and cellular levels.": 2014/15

Since students have performed fairly consistently on this topic over 2 cycles, we will switch our emphasis to assessment topic #1 next time.

Plan for topic "Students completing this course will be able to analyze microbial structure and function at the molecular and cellular levels.": 2011/12

<td>Our previous plan was to modify the assessments since questions seemed to be too specific. Scoring was also changed--instead of looking at averages for each question, a score of 3/4 correct questions became our criteria for success. We are pleased with the consistent student performance on these questions between all five sections. We plan to continue using these questions and gather more data during the next cycle. We also plan to only focus on this one outcome before moving ahead with the others.</td>
</tr>
</tbody>
</table>
### DVC Instructional Course SLO Action Plans

1. Restart evaluations to collect more data.

2. Change question #3 (HIV) because two answer choices were very similar.

3. Make sure that material in question #1 (nosocomial infections) is being emphasized in lectures.

Make sure that material in question #4 (vaccines) is being covered by all instructors.

**Plan for topic "Students completing this course will be able to investigate microbial growth, identification and control."**: 2008/9

1. Restart evaluations to collect more data.

2. Make sure that material in questions #2 (transformation) and #4 (restriction endonucleases) is being covered by all instructors.

3. Make sure instructors emphasize material in question #3 (gene therapy).
Plan for topic "Students completing Biosc-120 will be able to demonstrate knowledge of the human body via dissection.": 2017/18
The instructor had the students begin dissecting very early in the semester. This was possible because the students were provided with dissecting tools. In Biosc 139 the students have to provide their own tools so this delays the start of the dissection. The students in Biosc 120 actually dissected for fours each-twice as much as required. Providing the dissection tools early in the semester works well and should be continued as well as the instructor(s) encouraging the early start.

Plan for topic "Students completing Biosc-120 will be able to demonstrate knowledge of the human body via dissection.": 2014/15
The students will be frequently monitored to make sure that they are progressing toward the required amount of dissection. In addition, the students will be lent the necessary equipment so that they can promptly begin dissecting.

Plan for topic "Students completing Biosc-120 will be able to demonstrate knowledge of the human body via dissection.": 2011/12
The instructor will monitor the time spent dissecting by each student to make sure each student is making adequate progress to the two hours of dissection. Adequate opportunities will be provided for dissection. The instructor will make sure the student knows their progress and will be encouraged to dissect at least two hours.
176. Ecology and Field Biology [BIOSC-126] belonging to Biological Science [BIOSC]

Plan for topic "Students completing the course will be able to compare and contrast the ecological properties of several local communities.": 2016/17

From this assessment we see a need to incorporate or stress how organisms can influence their environment around them when describing non-disturbed communities. For example how the peeling bark on chaparral plants increases the likelihood of a fire in the community. This concept of organisms influencing their environment is covered in detail for invasive species and other disturbed habitats, but seemed not to be as well emphasized within intact ecosystems.

Plan for topic "Students completing the course will be able to identify the ways in which specific California plants and animals are adapted to their unique environments.": 2013/14

Given the success, I will move on to assessing other SLO topics in the future.

Plan for topic "Students completing the course will be able to identify common plant and animal species from the communities studied.": 2012/13

Next time I will assess the SLO focusing on Plant Identification.
DVC Instructional Course SLO Action Plans

177. Principles of Cellular and Molecular Biology [BIOSC-130] belonging to Biological Science [BIOSC]

Plan for topic "Students completing the course will be able to describe and compare the structure and function of cell organelles (including biochemical pathways that take place in each) and understand different cellular communication and homeostatic control mechanisms.": 2018/19

The majority of other BIOSC 130 learning outcomes had higher success rates, leading us to focus on this topic.

The last action plan involving this topic shows 48% of students answered the question correctly ("Question 2 is complex and addresses a common misconception. More focused instruction around this will be needed in the future.") In response to this, a Cell Organelle speed-dating hand-out/activity was devised and implemented. While the current % correct is now 55%, we will revisit this worksheet and better incorporate the ETC to deal with the continued misconception mentioned above.

Plan for topic "Students completing the course will be able to understand and apply the scientific method.": 2015/16

We are in the process of modifying the project to maintain the core learning objectives (scientific method, collection/analysis/communication of scientific information), but reduce the burden on students and instructors. The current plan is to continue with the experimental design phase and have the students write research grant proposals and present them to the class, who will act as a grant panel, but to eliminate the actual carrying out of the experiments. The hopes are to better align the time required for the project with its overall worth (15% of total grade) and remove inequities (financial, time) that existed with the previous structure.

Plan for topic "Students completing the course will be able to identify, retrieve and evaluate peer-reviewed published scientific research material and incorporate it appropriately into their own written and orally presented research paper.": 2015/16

We are in the process of modifying the project to maintain the core learning objectives (scientific method, collection/analysis/communication of scientific information), but reduce the burden on students and instructors. The current plan is to continue with the experimental design phase and have the students write research grant proposals and present them to the class, who will act as a grant panel, but to eliminate the actual carrying out of the experiments. The hopes are to better align the time required for the project with its overall worth (15% of total grade) and remove inequities (financial, time) that existed with the previous structure.

Plan for topic "Students completing the course will be able to... Describe the structure, function, and control of genetic material on the molecular level and how it relates to the development and maintenance of an organism, describe the flow of genetic information through mitosis and meiosis, and apply the principles of classical genetics in the realization of that information.": 2015/16

The desired improvements were observed with both questions, and the overall final percent correct with question 4 is acceptable, however less than 50% of the students answered question 5 correctly at the end of the course. The question contained some confusing terminology that some instructors do not use, so it will be changed in the next cycle.

Plan for topic "Students completing the course will be able to understand and apply the scientific method of inquiry using appropriate
**Plan for topic "Students completing the course will be able to describe and compare the structure and function of cell organelles (including biochemical pathways that take place in each) and understand different cellular communication and homeostatic control mechanisms."": 2015/16

Desired improvements were observed for all questions except 3. Question 3 is complex and addresses two concepts, covered in different sections of the course, simultaneously. This integrative thinking is challenging for students and will need to be more explicitly stressed by instructors in the future. Question 3 also addresses some content that not all instructors cover, so it should be modified to represent more universal material (or instruction should be adjusted to cover this content). With questions 1 and 6 at least two-thirds of students answered them correctly in the post-assessment (76% and 67%, respectfully), so instruction seems adequate in those areas. However with questions 2 and 7, less than 50% of students chose the correct answer in the post-assessment (48% and 41%, respectfully). Question 2 is complex and addresses a common misconception. More focused instruction around this will be needed in the future. The wording of question 7 is a little confusing (choosing a negative) and could be clarified in the future.

**Plan for topic "Students completing the course will be able to understand and apply the scientific method of inquiry using appropriate and effective tools in obtaining, evaluating, and interpreting data and information."": 2013/14

After working on an experimental research project of their own design and writing it up in a publishable format the students are generally very knowledgable in the method of...
scientific inquiry including obtaining and graphing data. We will continue to monitor these achievements especially since we want to update and redesign the project tutorial and its grading.

Plan for topic "Students completing the course will be able to describe and compare the structure and function of cell organelles (including biochemical pathways that take place in each) and understand different cellular communication and homeostatic control mechanisms." : 2013/14

In the next cycle we either have to give better instruction to the students on the format of these multiple choice questions or change the format matching to what they are used to to really objectively analyze their performance for this SLO.

Plan for topic "Students completing the course will be able to understand and apply the scientific method." : 2010/11

The outcome of question 1 in this cycle was overall lower than in previous years. This might be due to the low score of one particular class.

The outcome for question #2 was with 47% correct answers at the end of the semester again in the same range as prior semesters.

Since the sections are relatively small, variations are to be expected. Tabulating all 7 SLO cycles over the years showed an average increase in learning for question #1 of 10 +/- 8 % and for question #2 an increase of 23 +/- 10 %. This is within the range we predicted. Overall half to 3/4 of the students get these answers correct at the end of the semester

Plan for topic "Students completing the course will be able to identify, retrieve and evaluate peer-reviewed published scientific research material and incorporate it appropriately into their own written and orally presented research paper." : 2010/11

Since the same evaluation criteria are used here as in SLO 1 the action plan will be the same as under SLO1.

Plan for topic "Students completing the course will be able to..."Describe the structure, function, and control of genetic material on the molecular level and how it relates to the development and maintenance of an organism, describe the flow of genetic information through mitosis and meiosis, and apply the principles of classical genetics in the realization of that information." : 2010/11

The data as stated before have not changed much and since we do not expect (after 7 cycles of analysis) much improvement beyond what we already reached. We will test with other questions the SLO in the next cycle.

Plan for topic "Students completing the course will be able to understand and apply the scientific method of inquiry using appropriate and effective tools in obtaining, evaluating, and interpreting data and information." : 2010/11

This part of the evaluation was the non-multIPLE choice component. Since students produce an extensive experimental research paper, we chose to continue to look at the quality of these papers across the entire teaching faculty for this course especially since we have two new hires which did this for the second time. We are pretty assured that we all teach to the same standard. We hope to continue to be consistent in the grading among all of us. We will not evaluate this part of the course next cycle since it is a huge
amount of work and not much variation was observed over 6 cycles. We will however do this again in the not too distant future.

Plan for topic "Students completing the course will be able to describe and compare the structure and function of cell organelles (including biochemical pathways that take place in each) and understand different cellular communication and homeostatic control mechanisms.":: 2010/11

Since we achieved pretty consistent results, given the small sample size, over the last 7 cycles, we will design other questions to evaluate SLOs in the next cycle.

Plan for topic "Students completing the course will be able to describe and compare the structure and function of cell organelles (including biochemical pathways that take place in each) and understand different cellular communication and homeostatic control mechanisms.":: 2009/10

These results are generally consistent with the previous cycles. Since we do not expect (after 6 cycles of analysis) much improvement beyond what we already reached. We will test the exact questions again in 2 years. If consistency persists we will move on to another type of question.

Plan for topic "Students completing the course will be able to understand and apply the scientific method.":: 2008/9

The outcome of question 1 in this cycle was with 80% correct answers post class overall considerably higher than on average matched the prior years with around 63% - 65% correct answers.

The outcome for question #2 was with 45% again in the same range as prior semesters.

Since the sections are relatively small, variations are to be expected. The improvement in SLO #1 is very likely due to the fact that our new hires taught more consistently with the rest of the instructors. More effort was invested in teaching students the importance of primary resource information and the principles of the scientific method.

The additional information in how to fill out the multiple choice questions might also have helped.

SLO #2 did not increase outcome primarily because the multiple choice questions on which our analysis is based is quite challenging.

Plan for topic "Students completing the course will be able to identify, retrieve and evaluate peer-reviewed published scientific research material and incorporate it appropriately into their own written and orally presented research paper.":: 2008/9

Since the same evaluation criteria are used here as in SLO 1 the action plan will be the same as under SLO1.

Plan for topic "Students completing the course will be able to..."  
Describe the structure, function, and control of genetic material on the molecular level and how it relates to the development and maintenance of an organism, describe the flow of genetic information through mitosis and meiosis, and apply the principles of classical genetics in the realization of that information.":: 2008/9

Additional material in form of even practice questions in the genetic lab will hopefully has improved outcome for question #6. Since we do not expect (after 6 cycles of analysis) much improvement beyond what we already reached. We will test the exact question again in 2 years. If consistency persists we will move on to another type of question.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to understand and apply the scientific method of inquiry using appropriate and effective tools in obtaining, evaluating, and interpreting data and information.": 2008/9

This part of the evaluation was the non-multiple choice component. Since students produce an extensive experimental research paper, we chose to continue to look at the quality of these papers across the entire teaching faculty for this course especially since we have two new hires which did this for the second time. Plan for topic "Students completing the course will be able to understand and apply the scientific method.": 2007/8

2011-01-23: There was a lot of variation in question number 1 improvement among the different sections. However, the outcome on average matched the prior years with around 65% correct answers. The same is true with outcome for question #2. Since the sections are relatively small variations are to be expected. In addition it matters if students already took BioSc 131 prior which is more often the case in the spring than in the fall. They have to do a library research project in that course which gives them more of a foundation to answer these questions. Nevertheless more effort should be invested in teaching students the importance of primary resource information. This will be communicated to the instructors two of them were new hires.

2011-01-26: Again the outcome on average matched the prior years with around 63% correct answers. The same is true with outcome for question #2. Since the sections are relatively small, variations are to be expected. In addition it matters. The idea that it may matter if students already took BioSc 131 prior which is more often the case in the spring than in the fall did not materialize in the analysis of this spring semester. More effort should be invested in teaching students the importance of primary resource information and the principles of the scientific method. However, the multiple choice questions on which our analysis is based are quite challenging, and students might be too quick to answer it. We therefore will be more specific in the instructions to the test, to not mark the question at all if they don't know the answer.

Plan for topic "Students completing the course will be able to identify, retrieve and evaluate peer-reviewed published scientific research material and incorporate it appropriately into their own written and orally presented research paper.": 2007/8

Since the same evaluation criteria are used here as in SLO 1 the action plan will be the same as under SLO1.

DVC Instructional Course SLO Action Plans

**Plan for topic "Students completing the course will be able to understand and apply the scientific method of inquiry using appropriate and effective tools in obtaining, evaluating, and interpreting data and information."*: 2007/8**

Additional material in form of even practice questions in the genetic lab will hopefully improve the performance on question #6.

This part of the evaluation was the non-multiple choice component. Since students produce an extensive experimental research paper, we chose to continue to look at the quality of these papers across the entire teaching faculty for this course especially since we have two new hires. This will assure that we all teach to the same standard. We hope to continue to be consistent in the grading among all of us. We will continue to evaluate this aspect of the course in the same manner. Of all the evaluations this is probably the most extensive having very detailed rubrics grouped into 5 categories to evaluate a 4-6 week experimental research project written up and orally presented. We are very pleased with the relatively small degree of grade fluctuations among instructors and semesters. At this point we don't see the need for modifications.

**Plan for topic "Students completing the course will be able to describe and compare the structure and function of cell organelles (including biochemical pathways that take place in each) and understand different cellular communication and homeostatic control mechanisms."*: 2007/8**

2011-01-26: These results are generally consistent with the previous cycles. We will however see in the fall how the two new hires will fall in this evaluation. The more detailed instructions for how to answer the multiple choice describe in SLO 1 and 2 will hopefully also impact this outcome next cycle.

2011-01-26: The variation again seems to reflect that the new hires need to be mentored more about the type of rigor this course requires. We will work with the new faculty to improve this.

**Plan for topic "Students completing the course will be able to understand and apply the scientific method."*: 2006/7**

2010-08-18: The modified more challenging questions in spring of 2007 represented a more accurate reflection of the students’ learning. Each of us also noticed that we needed to teach certain aspects in greater depths than we did anticipated. Which area that was varied from instructor to instructor.

2011-01-19: Maintain or possibly improve the learning outcome in the next semester with 5 sections including SRC.

**Plan for topic "Students completing the course will be able to identify, retrieve and evaluate peer-reviewed published scientific research material and incorporate it appropriately into their own written and orally presented research paper."*: 2006/7**

2011-01-19: The modified more challenging questions in spring of 2007 represented a more accurate reflection of the students’ learning. Each of us also noticed that we needed to teach certain aspects in greater depths than we did anticipated. Which area that was varied from instructor to instructor.

2011-01-23: Maintain and possibly improve the outcome in the next cycle testing 5 sections including one at SRC.

**Plan for topic "Students completing the course will be able to...**

Describe the structure, function, and control of genetic material on the molecular level and how it relates to the development and maintenance of an organism, describe the flow of genetic information through mitosis and meiosis, and apply the principles of classical

Plan for topic "Apply the processes of scientific inquiry, phylogenetic analysis, and experimental design to the diversity of organisms in a report on a peer-reviewed scientific article on an environmental or evolutionary topic. Students completing this course will be able to": 2018/19

The student power point presentation to their peers in the class is very successful. More assistance should be provided towards designing and writing the detailed outline of the project. The instructors will meet during Flex of Spring 2019 to design a sample outline to provide student to demonstrate the expected depth of detail and analysis required in a proper detailed outline.

Plan for topic "Compare and contrast the development, life cycles, anatomical and physiological characteristics of major taxa of organisms. Students completing this course will be able to": 2018/19

Instructors met in during Flex of Spring 2019 to review their scores for their section’s SLO. To better prepare students for the first ID exam, we designed clearer instructions for the students to use to distinguish between the anatomical features and will go over the earthworm more slowly. This being on the first dissection ID exam, instructors will incorporate a lab activity over the earthworm dissection as a review/quiz during that lab so students know better what is expected of them on the lab exam for a dissection ID.

Plan for topic "Students completing the course will be able to provide evidence for the theory of evolution by natural selection and be able to compare microevolution, speciation and macroevolution.": 2015/16

While we are satisfied that the average student received over 70% on the question, we are going to try to give them more scenario questions in the future to apply the conditions to a natural environment.

Plan for topic "Students completing the course will be able to categorize organisms into major systematic groups in a phylogenetic classification scheme and be identify major anatomical structures of the different groups of fungi, plant and animals, and differentiate among life cycles for the different groups of fungi, plant and animals.": 2015/16

We are happy with the over 70% total, but think we can reword the question to be more specific what we are looking for by breaking down the separate sections of the question in a more logical manner.

Plan for topic "Students completing the course will be able to provide evidence for the theory of evolution by natural selection and be able to compare microevolution, speciation and macroevolution.": 2013/14

Overall we are pleased with these results. Out of the 3 questions, 2 of them had very high success rates (over 87% success). For the one where success was low, we noticed it was more of a higher level thinking on the subject. In the future we will address this by incorporating more critical thinking scenarios in the lecture (using worksheets or questions) and by adding more critical thinking questions on the exams.

Plan for topic "Students completing the course will be able to provide evidence for the theory of evolution by natural selection and be able to compare microevolution, speciation and macroevolution.": 2010/11
We are satisfied with these results, but want to increase the percentage who say they agree and get it correct. We will give more in class assignments and homework to help the students retain the knowledge.

Plan for topic "Students completing the course will be able to categorize organisms into major systematic groups in a phylogenetic classification scheme and be identify major anatomical structures of the different groups of fungi, plant and animals, and differentiate among lifecycles for the different groups of fungi, plant and animals.": 2010/11

While the students felt they learned information in the class (77% and 80% strongly agreed or agreed, respectively) the number of students answering the follow up questions correctly was low. We plan on utilizing more in class assignments and homework to improve the outcomes.
### Plan for topic "Students completing the course will be able to demonstrate ability to perform human cadaver dissections.": 2017/18

Frequent close monitoring and the imposed penalty for not completing the allotted hours encouraged students to work on the cadaver. The purchase of additional tools (more needed) at SRC also facilitated this. At SRC the day sections had a low success rate because the elevator used to transport the cadavers broke down and 8 students were unable to finish their dissection. An alternative is having the cadavers stored in a room off the lab. Starting the dissections as early as possible should help and getting the dissection tools earlier would facilitate this.

### Plan for topic "Students completing the course will be able to demonstrate ability to perform human cadaver dissections.": 2014/15

The students will be frequently monitored to make sure they are progressing toward the required amount of dissection. In addition, I will make sure that they get the necessary dissection tools as soon as possible so that they can begin dissecting promptly. There will be a penalty for not dissecting the required amount and a small amount of extra credit for dissecting more than the required amount.

### Plan for topic "Students completing the course will be able to demonstrate ability to perform human cadaver dissections.": 2011/12

There will be careful monitoring of the time spent with hands-on dissection for each student. Those students that are not making good progress towards the two hours will be approached and encouraged to dissect more often. There will be many opportunities given for dissection throughout the semester. Students will also be encouraged to exceed the criterion.
180. Human Physiology [BIOSC-140] belonging to Biological Science [BIOSC]

Plan for topic "Students completing the course will be able to perform varied physiological experiments, obtain, record and analyze the results in a written form." : 2018/19

While 83.1% of students met the criteria, only 76.6 percent got a perfect score. Furthermore, a fair amount of students were either unable to do the math correctly when presented with the formula or were unable to find the unknown.

Therefore, we propose having the students practice calculating RF values and finding unknowns. This will most likely have to be in the form of a worksheet because the lab uses consumables. Therefore, to have students practice more in the laboratory, the science budget at both campuses would have to increase in order to buy more material for this lab.

Plan for topic "Students completing this course will be able to distinguish the molecular processes of membrane transport and explain their importance to the function of physiologic systems." : 2018/19

The previous action plan was to provide students a worksheet prior to the exam where they would be exposed to a similar type of essay questions. Therefore, worksheets were provided to students prior to the exam. Student success on the question went from 73.3 percent to 78.7 percent which is an improvement. While this is only a 5.4 percent increase, it does show improvement and therefore, the practice of giving a worksheet prior to the exam should be continued.

Plan for topic "Students completing this course will be able to distinguish the molecular processes of membrane transport and explain their importance to the function of physiologic systems." : 2016/17

This will serve as the benchmark for further assessments on this particular objective. In this instance, less than ¾ of the students were able to successfully answer this question (73.3%). Asking students to achieve a mark of 75% or better for success is fairly rigorous as most grading standards have a lower overall percentage to earn a letter grade of C. In addition, the percentage of successful students is already higher than college standard of 72% for student success and the 2015-2016 department percentage for student success of 72% as well despite the fairly rigorous criteria. We are pleased with the initial benchmark level, but will try to make improvements in the overall student success rate.
One particular aspect of this assessment is that it was given as part of the first exam of the semester and utilizes a tabular type essay format that many students are not used to seeing at this level. The action plan would be to help improve student test taking skills on this type of exam by having a worksheet with similarly structured questions, but different content prior to taking exam itself. In addition, a handout which emphasizes transport mechanisms will be improved to help students decipher the subtle differences between specific concepts to try to avoid common errors.

Plan for topic "Students completing this course will be able to use common laboratory tools and equipment such as the BIOPAC Data Acquisition System, spirometers, glucose meters, pH meters, sphygmomanometers, hemocytometers, force transducers, microscopes, and spectrophotometers to collect and record data.": 2016/17

This will serve as the benchmark for further assessments on this particular objective. In this instance, over 90% of the students were able to successfully demonstrate the laboratory skill of applied use of the spectrophotometer (91.2%), which is much higher than the 72% college standard for student success. We are pleased with the initial benchmark level, but will try to make improvements in the overall student success rate.

In this case, one particular action that may help increase student success would be to provide students with better hands on experience with the equipment. In order to do that, there is a need for additional spectrophotometers, so requesting this equipment in program review is one action plan. In addition, having students work individually on the technique with greater practice will also be implemented in order to improve the already high student success rate on this objective.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the basic concepts responsible for the function and interactions of the body’s systems.": 2013/14

While the ultimate outcome exceeded our goal of 80% scoring a 3 or better, it should be noted that more than one third of the students met the bare minimum or less on this criterion. The current professors teaching BISC 140 will meet and discuss ways to improve the integration portion of the course, especially for students at the lower end of the scale so they will be able to answer questions like this in the future and incorporate that into the teaching of the course.

Plan for topic "Students completing the course will be able to perform varied physiological experiments, obtain, record and analyze the results in a written form.": 2013/14

This outcome exceeded our goal of 90% of the enrolled student scoring 80% or better on their research papers. Again, we would like to target those 7% that scored less than the goal and attempt to improve the scores of others when possible, by providing a newly developed worksheet to help students avoid the common pitfalls when writing a
Plan for topic "Students completing the course will be able to demonstrate the ability to conduct a search for specific scientific information.":: 2013/14

This outcome exceeded our goal of 90% of the enrolled student scoring 80% or better on their research papers. Again, we would like to target those 7% that scored less than the goal and attempt to improve the scores of others when possible, by providing a newly developed worksheet to help students avoid the common pitfalls when writing a research paper such as this one.

Plan for topic "Students completing BIOSC-140 will be able to Students completing the course will be able to identify and integrate parameters responsible for systemic physiological processes, and be able to discuss how changes of these parameters will influence the system and the body as a whole.":: 2013/14

While the ultimate outcome exceeded our goal of 80% scoring a 3 or better, it should be noted that one fourth of the students met the bare minimum or less on this criterion. The current professors teaching BISC 140 will meet and discuss ways to improve the integration portion of the course, especially for students at the lower end of the scale so they will be able to answer questions like this in the future and incorporate that into the teaching of the course.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the basic concepts responsible for the function and interactions of the body's systems.":: 2010/11

The results generally yielded affirmation and reinforcement of current teaching methods and curriculum. However, concerted effort will be made to emphasize the basic concepts dealing with those questions where the students scored lower on the survey. This is especially evident in Q10 where less than half of the students (43.4%) finishing course were able to answer this question regarding differences in stroke volume between cardiac patients and athletes correctly. A worksheet reinforcing the concept has been developed so that the students get more practical experience in this area. In addition, Q3 dealing with increased water consumption at altitude will also be emphasized more in the future as slightly less than two-thirds of the class (63.9%) were able to answer this question correctly. At least 80% of the students were able to correctly answer the other content questions indicating a good overall knowledge base for the class.

Plan for topic "Students completing the course will be able to perform varied physiological experiments, obtain, record and analyze the results in a written form.":: 2010/11

The results generally yielded affirmation and reinforcement of current teaching methods and curriculum as over 96% of the students strongly agreed or somewhat agreed that they were proficient in this area. We will continue to stress laboratory protocol and provide feedback to the students on their scientific writing skills with suggestions on how to improve in that area.

Plan for topic "Students completing the course will be able to demonstrate the ability to conduct a search for specific scientific information.":: 2010/11

The results generally yielded affirmation and reinforcement of current teaching methods and curriculum as over 97% of the students strongly agreed or somewhat agreed that
they were able to demonstrate the ability to conduct a search for specific scientific information. We will continue to research protocol and provide assignments on how to search for scientific information.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the basic concepts responsible for the function and interactions of the body's systems.": 2008/9

Affirmation and reinforcement of current methods and curriculum. However, concerted effort will be made to emphasize these basic concepts dealing with Q3 (increased water consumption at altitude), Q4 (glucose in urine of diabetics) and Q5 (primary control of ventilation) to ensure that a greater percentage of students understand these concepts.

Plan for topic "Students completing the course will be able to perform varied physiological experiments, obtain, record and analyze the results in a written form.": 2008/9

Affirmation and reinforcement of current methods and curriculum. Continue to stress laboratory protocol and provide feedback to the students on their formal laboratory reports.

Plan for topic "Students completing the course will be able to demonstrate the ability to conduct a search for specific scientific information.": 2008/9

Affirmation and reinforcement of current methods and curriculum. Continue to stress the topic of research methods for specific scientific information and continue to improve the class project on the topic to further their skills.
181. Principles of Microbiology [BIOSC-146] belonging to Biological Science [BIOSC]

Plan for topic "Students completing this course will be able to explain the fundamental concepts and techniques in biotechnology.": 2017/18

Since this was the first time we administered this assessment, we were pleased with the results. In BIOSC 146, there is an emphasis on molecular biology, including biotechnology. Interestingly, this group scored exactly the same as the BIOSC 119 group who have less biotechnology curriculum. We will be adding a gel electrophoresis lab in the fall to hopefully bring students up even more. We will reassess during the next SLO cycle.

Plan for topic "Students completing the course will be able to discuss the ecology of microbes, the methodology used to study them and how to control their growth.".: 2015/16

We changed the SLO assessment topic to align better with the revised Title V.

Plan for topic "Students completing this course will be able to examine common methodologies used in microbiology such as microscopy, staining and sterile technique.".: 2015/16

We changed the SLO assessment topic to align better with the revised Title V.

Plan for topic "Students completing this course will be able to analyze microbial structure and function at the molecular and cellular levels.".: 2015/16

We changed the SLO assessment topic to align better with the revised Title V.

Plan for topic "Students completing this course will be able to investigate microbial growth, identification and control.".: 2015/16

We changed the SLO assessment topic to align better with the revised Title V.

Plan for topic "Students completing this course will be able to explain the fundamental concepts and techniques in biotechnology.".: 2015/16

We changed the SLO assessment topic to align better with the revised Title V.

Plan for topic "Students completing this course will be able to discuss how humans and microbes interact in health and disease, highlighting the significance of the immune system in disease control and prevention.".: 2015/16

We changed the SLO assessment topic to align better with the revised Title V.

Plan for topic "Students completing this course will be able to analyze microbial structure and function at the molecular and cellular levels.".: 2014/15

We were pleased with the improvement and plan to switch to assessment topic #1 next time.

Plan for topic "Students completing this course will be able to analyze microbial structure and function at the molecular and cellular levels.".: 2011/12
Our previous plan was to modify the assessments since questions seemed to be too specific. Scoring was also changed—instead of looking at averages for each question, a score of 3/4 correct questions became our criteria for success. While 75.6% seems adequate, we would like to improve scores even further and equalize discrepancies between the classes. To do this, we plan to change the vaccine question to be more broad and to make sure all instructors are emphasizing the material. We also plan to only focus on this one outcome for now before moving ahead with the others.

**Plan for topic "Students completing this course will be able to analyze microbial structure and function at the molecular and cellular levels."**: 2009/10

After viewing data from two cycles, it was evident that scores had not necessarily improved. We decided to look more closely at the assessments since participating instructors stated that they had covered the material and that students had done well on previous tests with similar questions. Our conclusion was that the assessments were too specific and did not emphasize the big ideas enough. Our plan is to modify the assessments and gather more data.

**Plan for topic "Students completing this course will be able to investigate microbial growth, identification and control."**: 2009/10

After viewing data from two cycles, it was evident that scores had not necessarily improved. We decided to look more closely at the assessments since participating instructors stated that they had covered the material and that students had done well on previous tests with similar questions. Our conclusion was that the assessments were too specific and did not emphasize the big ideas enough. Our plan is to modify the assessments and gather more data.

**Plan for topic "Students completing the course will be able to discuss the ecology of microbes, the methodology used to study them and how to control their growth."**: 2008/9

1. Restart evaluations to collect more data.

2. Make sure instructors emphasize material in questions #1 (endoscopes) and #3 (penicillin).

**Plan for topic "Students completing this course will be able to examine common methodologies used in microbiology such as microscopy, staining and sterile technique."**: 2008/9

1. Restart evaluations to collect more data.

2. Make sure instructors emphasize material in questions #1 (endoscopes) and #3 (penicillin).

**Plan for topic "Students completing this course will be able to analyze microbial structure and function at the molecular and cellular levels."**: 2008/9

1. Restart evaluations to collect more data.

2. Change question #3 (HIV) because two answer choices similar.
### DVC Instructional Course SLO Action Plans

3. Make sure instructors emphasize material in question #4 (vaccines).

**Plan for topic "Students completing this course will be able to investigate microbial growth, identification and control."**: 2008/9

182. Topics in Biology [BIOSC-150] belonging to Biological Science [BIOSC]
Plan for topic "Students completing the course will be able to apply knowledge of the scientific method to the marine sciences."

**2017/18**

Results show that only 1 student missed this question. We can infer that Professor Cole-Ekberg's instruction on this topic was quite effective. The question is used throughout our Marine Bio and Oceanography courses and appears to be an effective question. We'll recommend that instruction methods for this topic (Scientific Method) be incorporated into other Marine Bio and Ocean courses.

**2015/16**

The student responses were over 80% accurate for this question, indicating that the learning outcome was met. In the future we could ask a follow up question about which phylum exhibits each of these steps, however the overall concept was addressed here.

Plan for topic "Students completing the course will be able to describe and interpret biotic and abiotic factors that impact marine organisms within the marine ecosystem."

**2015/16**

For these four questions, the accuracy of student responses ranged from 74% to 100%, the instructor has determined the objective has been met for this topic. The range in response implies the level of detail retained by various students on multiple habitats discussed in this course, and this may be indicative that the students were a mixture of biology majors and non-major students. One strategy to further evaluate student understanding for this objective in the future would be to ask students to describe how some of these factors impact marine organisms in a more open-ended short answer question.

**2014/15**

The methodology already in use is successful for a majority of the students for this topic. The fourth question was a more challenging question, which involved a deeper understanding for evolutionary relationships from a big picture view. In order to improve on this outcome, it may be beneficial to spend more time on phylogenetic trees, and utilize active learning techniques.

Plan for topic "Students completing the course will be able to describe and interpret biotic and abiotic factors that impact marine organisms within the marine ecosystem."

**2014/15**

For the first two questions, the students responses were both greater than 80%, which indicates the students are understanding the concept assessed. The responses from third question may indicate a lack of comprehension of the details of this topic, or it may indicate a lack of understanding of the vocabulary terms despite an understanding of the process. In order to tease these factors apart, I could ask a similar question without the terms biotic and abiotic to determine if more emphasis needs to be placed on the concepts or terms.
It is obvious that the students learned the information for the exam directly after the information was presented in the class, but that they didn't retain the information at the end of the semester. To help this students need to repeat the information more in class. It is important that in the future we will make sure we come back to the information throughout the course to emphasize the evolutionary relationship between animals. While clicker questions were used for this topic in the class, we will reevaluate the clicker question, and make sure that we present it in multiple ways. Additionally, we will add small group work and have the students work together to explain evolutionary relationships.

Plan for topic "Students completing the course will be able to describe and interpret biotic and abiotic factors that impact marine organisms within the marine ecosystem.": 2012/13

We are happy with these results for this question. In the future we would like to assess a question looking at abiotic factors that impact marine organisms.

Plan for topic "Students completing the course will be able to critically evaluate current societal-environmental issues as they relate to marine ecosystems.": 2012/13

We are very pleased with the success on the multiple choice question. For the short answer question, we plan on asking clicker questions about the subject during the lecture to gauge student answers during the lecture. Also, having students working in groups to verbalize and write the answers may help with success in the short answer questions.

Plan for topic "e": 2012/13

We are very pleased with the success on the multiple choice question. For the short answer question, we plan on asking clicker questions about the subject during the lecture to gauge student answers during the lecture. Also, having students working in groups to verbalize and write the answers may help with success in the short answer questions.

Plan for topic "Students completing the course will be able to apply knowledge of the scientific method to the marine sciences.": 2011/12

After looking at the data, this was only one question for a very broad subject. However, it is clear that the students did not retain the information from this question. The instructors will look at 2 options. First, was the question to complex for a General Education course, and second, the instructors will attempt more in class assignments to make sure the students retain this information in future semesters.

Plan for topic "Students completing the course will be able to describe and interpret biotic and abiotic factors that impact marine organisms within the marine ecosystem.": 2011/12

The instructor have determined that the current SLO assessment for this objective was meet and that the students obtained the and retained an important part of the concept.

Plan for topic "e": 2011/12

The instructor have determined that the current SLO assessment for this objective was meet and that the students obtained the information and retained an important part of the concept of how humans are impacting the marine environment.

Plan for topic "Students completing the course will be able to critically evaluate current societal-environmental issues as they relate to
marine ecosystems." 2011/12

The instructor have determined that the current SLO assessment for this objective was meet and that the students obtained the information and retained an important part of the concept of how humans are impacting the marine environment.

DVC Instructional Course SLO Action Plans

185. Environmental Science [BIOSC-170] belonging to Biological Science [BIOSC]

Plan for topic "Students completing the course will be able to evaluate current threats to biodiversity.":: 2018/19

We are happy with 87%, especially since the topic was covered early in the semester. What worked was that the theme was incorporated into our discussions throughout the semester and revisited as we explored different examples and case studies over several months.

Plan for topic "Students completing the course will be able to differentiate among properties of populations, communities and ecosystems.":: 2015/16

We are satisfied with this data. However, we would like to ask pre and post assessment questions in the future to make sure that the students are not coming into the class with this information. Additionally, we would like to ask more questions.

Plan for topic "Students completing the course will be able to evaluate current threats to biodiversity.":: 2015/16

While this is great success data. In the future we would ask more questions to make sure the students are achieving this outcome.

Plan for topic "Students completing the course will be able to identify the links between air pollution and global warming.":: 2015/16

There was over 80% correct answers. While this is above what we were hoping, we would like to ask more questions during the next assessment, including pre and post assessment.

Plan for topic "e": 2015/16

There was over 80% correct answers. While this is above what we were hoping, we would like to ask more questions during the next assessment, including pre and post assessment.

Plan for topic "Students completing the course will be able to differentiate among properties of populations, communities and ecosystems.":: 2012/13

This question is an important concept that students should get after this course. While the multiple choice question defining community had a good success rate, the short answer question only had a 73% success rate. Therefore, we need to work to make sure students learn this information. In the future, we will add clicker questions (depending on the instructor) during the lecture to make sure students are learning the material during the lecture. If we don't use a clicker question, we will attempt to make a worksheet or case study to emphasize the difference.

Plan for topic "Students completing the course will be able to evaluate current threats to biodiversity.":: 2012/13

This subject is something that is part of many topics in this course. This assessment only picked 2 specific topics to get a small slice of what the class covers. The success rates of these questions though were lower than expected. In the future, we plan on using clicker questions before and after the subject to assess students during class times. While the students did have a worksheet on this subject, in the future we will attempt to go over the answers during lecture. Additionally, we will look for case studies we can do in the class to help the students understand this material.

Plan for topic "e": 2012/13

</table>
187. Student Instructional Assistant [BIOSC-299] belonging to Biological Science [BIOSC]

Plan for topic "Students completing biosc-299 will be able to expand subject matter knowledge by assisting the instructor.": 2018/19

The students' comments indicated that they mainly reinforced the material that they had previously studied and learned how to communicate that material to the students. Only one student specifically said he expanded his knowledge. The other students may have expanded their knowledge but may not have expressed it specifically. Telling students at the beginning of the semester that they would be expected to say how they have expanded their knowledge should help in getting more specific positive results.

Plan for topic "Students completing biosc-299 will be able to increase learning through involvement as a teacher's aide, lab assistant or research assistant.": 2015/16

It was important to give the teaching assistants the course syllabus covering the topics to be covered. A written evaluation of each teaching assistant should be done periodically (e.g., after each student exam). The teaching assistants should be informed that they will be given a written evaluation at the start of their service. This should be more effective than just oral evaluations which have been used in the past.

Plan for topic "Students completing biosc-299 will be able to develop objectives, which will reflect new learning or expanded responsibility.": 2012/13

I will continue to have the students submit three meaningful objectives at the beginning of the class. I will also follow-up with them at the end of the semester to see if they met their objectives.
188. Keyboarding [BUS-100] belonging to Business Administration [BUS]
### Plan for topic "Students completing this course will be able to understand the ethics involved in writing clearly and correctly in a business environment." 2016/17

The data shows that the combination of lecture, textbook, pre-test, homework, and post-test enables the participating student to achieve the student learning outcome.

We recommend no changes at this time.

### Plan for topic "Students completing the course will be able to evaluate a business document for accuracy in grammar and mechanics usage." 2013/14

It is clear that Business English students struggle with the important concepts of subject-verb and pronoun-antecedent agreement. Based on this assessment, we will improve how these concepts are introduced to students in the lecture notes. We will also provide an increased number of practice exercises so that more students will master the content.

### Plan for topic "Students completing the course will be able to compose an effectively written e-mail message." 2013/14

We are very pleased with these results. This assessment took place during the 8th week of the semester, and it is clear from these results that students are learning how to properly identify grammatical and mechanical errors in business documents. In addition, they are learning how to improve business documents and how to give constructive feedback to their classmates.

### Plan for topic "Students completing the course will be able to distinguish correct usage of commonly confused words." 2013/14

We are extremely pleased with these results. The overall scores in all three sections were high, and 100% of these averages was greater than 70%. Students seem to have the most trouble with "every day" versus "everyday," and we will continue to point out the difference between these two words to students to ensure that they are able to use them properly.

### Plan for topic "Students completing the course will be able to distinguish correct usage of commonly confused words." 2011/12

Results are acceptable; will maintain this outcome without any changes.

Plan for topic "Students completing this course will be able to operate a business calculator.": 2017/18

| The course was offered but did not fill. The department will work on a possible program revision to remove from program or change program requirements. |

Course Action Plans

Outcome Assessment History

Page 349 of 2394

Plan for topic "Students completing the course will be able to calculate the following: interest, trade and cash discounts, markups and markdowns, bank discounts, present values, periodic payments and payroll." : 2016/17

The project provides a real-world scenario for the application of a number of concepts learned in this class. The outcome data shows that this is a useful assignment and outcome measurement.

We recommend continuing this assignment and to expand it to even include a couple more concepts.

Plan for topic "Students completing the course will be able to calculate the following: Interest, trade and cash discounts, markups and markdowns, bank discounts, present values, periodic payments, and payroll, simple and compound interest." : 2016/17

The project provides a real-world scenario for the application of a number of concepts learned in this class. The outcome data shows that this is a useful assignment and outcome measurement.

We recommend continuing this assignment and to expand it to even include a couple more concepts.

Plan for topic "Students completing the course will be able to calculate periodic payments, given a principle, interest rate, and time period." : 2016/17

The data shows that the combination of lecture, textbook, pre-test, homework, and post-test enables the participating student to achieve the student learning outcome.

We recommend no changes at this time.

Plan for topic "Students completing the course will be able to calculate the following: Interest, trade and cash discounts, markups and markdowns, bank discounts, present values, periodic payments, and payroll, simple and compound interest." : 2013/14

This assessment is a excellent candidate for a mastery approach, facilitated by the MyMathlab cloud ware under the direction and oversight of the instructor.

Plan for topic "Students completing the course will be able to calculate the following: interest, trade and cash discounts, markups and markdowns, bank discounts, present values, periodic payments and payroll." : 2013/14

This assessment is a excellent candidate for a mastery approach, facilitated by the MyMathlab cloud ware under the direction and oversight of the instructor.

Plan for topic "Students completing the course will be able to calculate present value, given an interest rate, period of time, payment amount, and a future value." : 2013/14

The assessment provided students the opportunity to apply the theoretical learning, and all students who participated were successful. No changes to the teaching and assessment are planned at this time.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to use mathematical key concepts and applications in solving business problems and in effective business decision making.": 2013/14
The assessment provided students the opportunity to apply the theoretical learning, and all students who participated were successful. No changes to the teaching and assessment are planned at this time.

Plan for topic "Students completing the course will be able to calculate the following: interest, trade and cash discounts, markups and markdowns, bank discounts, present values, periodic payments and payroll.": 2011/12
Positive results; will continue to use this SLO assessment method with no changes

Plan for topic "Students completing the course will be able to calculate the following: Interest, trade and cash discounts, markups and markdowns, bank discounts, present values, periodic payments, and payroll, simple and compound interest.": 2011/12
Positive results; will continue to use this SLO assessment method with no changes

Plan for topic "Students completing the course will be able to calculate the following: Interest, trade and cash discounts, markups and markdowns, bank discounts, present values, periodic payments, and payroll, simple and compound interest.": 2010/11
The SLOs listed have been completed and assessed at this time in the semester. The data is therefore assessment cycle completed prior to spring 2011. Action plan: The SLOs for Bus 103 will be edited during fall 2010 to be more specific. Also, both Bus 103 sections will be included in the assessment data set.

Plan for topic "Students completing the course will be able to calculate the following: interest, trade and cash discounts, markups and markdowns, bank discounts, present values, periodic payments and payroll.": 2010/11

192. Exploring Careers in Business Administration [BUS-104] belonging to Business Administration [BUS]
193. Introduction to Business [BUS-109] belonging to Business Administration [BUS]
Plan for topic "Students completing the course will be able to contrast business practices in a variety of functional areas, including management, marketing, finance, human resources, and information technology." : 2015/16

On the whole, the criterial for success were easily met on all of the five criteria in both methods of instruction-- face-to-face (f2f) and online (OL).

Explore ways to enrich content in management and organizational design, where experts (faculty) believe it necessary.

These results are based on data collected in Fall 2016.

---

Plan for topic "Students completing the course will be able to compare the evolution formation and management of American and International operations." : 2013/14

The results for one of the questions, covering the Production Era, are very positive. The results of the other two questions, although still acceptable, are lower than the other one. This shows that we must cover the Industrial Revolution and the Relationship Era in more detail in class.

---

Plan for topic "Students completing the course will be able to analyze the role of business in a market economy." : 2012/13

No action is necessary to improve student understanding of this SLO. However, we may change the instrument from a survey to another method of inquiry that may yield comparable or contradictory evidence of achievement; only then will we consider modifying our teaching strategies and delivery modes.

---

Plan for topic "Students completing the course will be able to analyze the role of business in a market economy." : 2011/12

Continue to gather this information every semester and watch for any negative trends.

<table>
<thead>
<tr>
<th>Continue to track student outcome and maintain/supass current success rates.</th>
</tr>
</thead>
</table>
An item analysis revealed that the topics students did well in include E-business history, E-business models and social media marketing. The topic that needs improvement is customer segmentation.

Plan for topic "Students completing the course will be able to analyze data using statistical tools. Specifically students will be expected to know which concepts best serve the purpose of describing data samples and when interference is appropriate.": 2018/19

The level of learning demonstrated by the current assessment is satisfactory. Action plans of previous cycles did not include these SLOs; this is the first time we assess confidence interval estimation and hypothesis testing. No issue regarding outside accrediting agencies is impacted by these SLOs. Our department advisory board is interested in the potential delivery of more information and decision analytic courses within Business Administration and we are going ahead with the development of further business analytics courses and certificates.

Plan for topic "Students completing BUS-240 will be able to Determine what constitutes "reasoning with numbers" and gauge the strength of conclusions and generalizations from statistical evidence.": 2014/15

We will assess topic #3 from lecture once again in the spring of 2014. We will continue to exercise software skills in lab to complement lecture on these topics—central to this GE requirement in critical thinking with data (Quantitative reasoning), along with SLO for LAB #2.

Plan for topic "Students completing BUS-240 will be able to Determine what constitutes "reasoning with numbers" and gauge the strength of conclusions and generalizations from statistical evidence.": 2012/13

224 students responded to four or more of the six questions correct and earned a successful grade in this activity. They represent a 92% rate of achievement on the tow-part outcome described above.

Plan for topic "Students completing the course will be able to organize and present arranged data in graphical form or using summary statistics.": 2009/10

Need to improve results next cycle by educating students on the various statistical terms and techniques, and how they are addressed in practical terms using the survey project.

Plan for topic "Students completing the course will be able to analyze data using statistical tools. Specifically students will be expected to know which concepts best serve the purpose of describing data samples and when interference is appropriate.": 2009/10

Need to improve results next cycle by educating students on the various statistical terms and techniques, and how they are addressed in practical terms using the survey project.

Plan for topic "Students will be able to analyze, interpret and draw inferences from data using statistical techniques such as simple linear regression and correlation.": 2009/10

Need to improve results next cycle by educating students on the various statistical terms and techniques, and how they are addressed in practical terms using the survey project.

Plan for topic "The Title V course objectives serve as student learning outcomes for this course. The SLO being evaluated this round is:

Students completing the course will be able to demonstrate ability to use language symbols clearly and precisely to create effective communications through written and verbal media." : 2016/17

The face-to-face classes will dedicate more time to in-class writing, making this class into a lecture/lab class.

For the online class version, we will have to work on creating a guided approach that students can see through. We do not have a solid action plan at this time.

Plan for topic "Students completing the course will be able to demonstrate ability to use language symbols clearly and precisely to create effective communications through written and verbal media." : 2016/17

The face-to-face classes will dedicate more time to in-class writing, making this class into a lecture/lab class.

For the online class version, we will have to work on creating a guided approach that students can see through. We do not have a solid action plan at this time.

Plan for topic "Students completing the course will be able to utilize basic technology to communicate effectively and professionally." : 2015/16

At this point, we recommend continuing the use of presentations to assess the ability to utilize technology effectively and professionally.

More than one presentation - whether done in person, via video conference like Zoom, or recorded by the student, is strongly recommended.

Plan for topic "Students completing the course will be able to utilize basic technology to communicate effectively and professionally." : 2012/13

The continued assessment of effective written and oral communication skills, as well as their improvement throughout the semester, is recommended.

Plan for topic "The Title V course objectives serve as student learning outcomes for this course. The SLO being evaluated this round is:

Students completing the course will be able to demonstrate ability to use language symbols clearly and precisely to create effective communications through written and verbal media." : 2012/13

The continued assessment of effective written and oral communication skills, as well as their improvement throughout the semester, is recommended.

Plan for topic "Students completing the course will be able to evaluate communications critically by analyzing and defining the
Problem: 2012/13

The continuation of the process - draft, student edit, second draft - is recommended.

Plan for topic "Students completing the course will be able to demonstrate competence in formulating solutions to communication problems, with special emphasis upon those in a business context.": 2012/13

Continuation of the practice is recommended throughout the semester.

Plan for topic "Students completing the course will be able to utilize basic technology to communicate effectively and professionally.": 2012/13

The continuation of offering this project is recommended. Constantly changing technology (Google Voice, Google Hangouts, Skype, etc.) students benefit greatly from this assessment.

Plan for topic "Students completing the course will be able to demonstrate ability to use language symbols clearly and precisely to create effective communications through written and verbal media.": 2010/11

No action recommended.

Plan for topic "The Title V course objectives serve as student learning outcomes for this course. The SLO being evaluated this round is:

201. Investments [BUS-261] belonging to Business Administration [BUS]

Plan for topic "Students completing the course will be able to identify and select investments that meet established investment objectives and philosophy in order to construct personalized investment portfolios."

- 2016/17: Students have problems with the nuances of the complex math and statistics of how the financials are computed; they have a very good understanding of what the numbers mean. Developing modules that teach students to use commonly available apps that perform the computations and help summarize the financial statistics needed to build a portfolio will occur in the content development over the next title 5 cycle.

Plan for topic "Students completing the course will be able to use basic investment vocabulary and apply the fundamental investment principle of the "risk vs. return" trade off." 

- 2013/14: Improve survey response rate and continue to track student outcome and maintain/surpass current success rates.

Plan for topic "Students completing the course will be able to conduct research on common investment vehicles such as stocks, bonds, and mutual funds."

- 2013/14: Improve survey response rate and continue to track student outcome and maintain/surpass current success rates.

Plan for topic "Students completing the course will be able to conduct research on common investment vehicles such as stocks, bonds, and mutual funds." 

- 2011/12: SLOs is an appropriate criteria for evaluating student learning in this course.

Plan for topic "Students completing the course will be able to use basic investment vocabulary and apply the fundamental investment principle of the "risk vs. return" trade off." 

- 2009/10: Continue to track student outcome and maintain/surpass current success rates.

Plan for topic "Students completing the course will be able to conduct research on common investment vehicles such as stocks, bonds, and mutual funds." 

- 2009/10: Need to improve results next cycle by emphasizing investment research methodologies.

Plan for topic "Students completing the course will be able to identify and select investments that meet established investment objectives and philosophy in order to construct personalized investment portfolios." 

- 2009/10: Continue to track student outcome and maintain/surpass current success rates.
Plan for topic "Students completing the course will be able to evaluate issues that may have legal significance in the business environment.": 2016/17

Previous action plans recommended continuing case studies to further student achievement. While this was successful for some students it is apparent that we need to encourage our students to more thoroughly read the basic material. Discussions during the Fall 2017 FLEX will be undertaken in an effort to determine the best method for achieving this outcome and the SLOs will be updated at that time.

Plan for topic "Students completing the course will be able to compare and contrast alternative legal theories as they apply to a hypothetical fact situation.": 2013/14

The original plan was for a "passing" rate of 65%. It appears that goal has been achieved. So the plan would be to keep the current plan in force.

Plan for topic "Students completing the course will be able to evaluate issues that may have legal significance in the business environment.": 2011/12

Continue using cases and assignments to develop students' ability to identify and classify legal issues.
Due to the nature of the course, a process for SLO assessment is currently under development. Working with the new CTE dean, we will create an assessment module and report the outcome at the next reporting cycle.
204. Internship in Occupational Work Experience Education in BUS [BUS-296] belonging to Business Administration [BUS]

Plan for topic "Students completing this course will explore and develop strategies to secure employment.": 2016/17

Due to the nature of the course, a better process for SLO assessment is currently under development. Working with the new CTE dean, we will create an assessment module and report the outcome at the next reporting cycle.
205. Independent Study [BUS-298] belonging to Business Administration [BUS]
DVC Instructional Course SLO Action Plans

206. Student Instructional Assistant [BUS-299] belonging to Business Administration [BUS]
DVC Instructional Course SLO Action Plans

207. Topics in Business Accounting [BUSAC-150] belonging to Business Administration [BUSAC]
Plan for topic "Students completing the course will be able to prepare end-of-period financial statements by utilizing the accounting cycle and end-of-period adjustments.": 2016/17

In future semesters, the instructor will place emphasis on the question with the lowest score with additional emphasis and explanations. In general, the overall goal of assessment is attained. Instructors will select other areas of assessment in the next cycle.

Plan for topic "Students completing the course will be able to analyze, interpret and accurately record the effects of a variety of business transactions in conformity to the accounting equation and the double-entry framework using manual and computerized accounting systems.": 2013/14

Students were given thorough feedback on their projects. If errors were made, they were asked to go back and track down and correct the errors. Being able to find errors in accounting records is a skill that all accountants must possess, and this plan of action allowed students to learn from their errors.
Plan for topic "Students completing the course will be able to collect necessary data and create a computer-based file for an individual taxpayer.": 2016/17

To improve future results and attain a higher level of success, the instructor is planning to do the following: 1) Encourage students to work more practice problems involving actual tax forms. 2) Assign additional practice problems on how to make the connection between the theory of the tax law and the reporting issues. It is important for the students to comprehend the practical implications of the concepts they learn in class.

Plan for topic "Students completing the course will be able to collect necessary data and create a computer-based file for an individual taxpayer.": 2013/14

SLO considered an appropriate measure of a skill required for this course. No further action considered necessary.

Plan for topic "Students completing BUSAC-182 will be able to research both online and hard copy tax resources to determine correct treatment and processing of tax related information": 2013/14

SLO was revised and considered an appropriate measure of a skill required for this course. No further action considered necessary

Plan for topic "Students completing the course will be able to demonstrate a knowledge of the basic tax formula for individuals, filing status, exemptions and dependents.": 2013/14

SLO considered an appropriate measure of the skills required for this SLO. No further action considered necessary.
### 210. QuickBooks Accounting for Business I [BUSAC-185] belonging to Business Administration [BUSAC]

**Plan for topic "Students completing this course will be able to prepare end of year adjusting entries."**: 2016/17

The relatively lower number of students taking the quiz may be attributed to the fact that the quiz was given as extra credit, rather than counted as part of course grade. Accordingly, the majority of students did not take this quiz. To increase student participation, it is recommended that future SLO assessment tests be considered as part of the basic course grade.

**Plan for topic "Students completing the course will be able to use QuickBooks software in the business world."**: 2015/16

The BUSAC department will assess this course in Spring 2017 so that we are in compliance with our SLO commitments. We are offering 3 sections in that term and they will all be assessed. The data will be analyzed and an action plan will be compiled. The action plan will be vetted by the department and then submitted by 12/31/17.

**Plan for topic "Students completing the course will be able to use QuickBooks software in the business world."**: 2012/13

No action is required at this time. Company files are provided by the textbook publisher and they are easily accessed and used.

**Plan for topic "Students completing the course will be able to apply accounting concepts to QuickBooks software by setting up and working with company files."**: 2012/13

No action is required at this time. Company files are provided by the textbook publisher and they are easily accessed and used.

**Plan for topic "Students completing the course will be able to use QuickBooks software to implement the accounting cycle for a service business."**: 2012/13

No action required at this time.

Plan for topic "Students completing this course will be able to prepare operating and financial budgets as parts of the master budget and identify the four types of responsibility centers."": 2016/17

Repeated administration of the same test in future semesters is needed to validate the results. The same test is administered again in fall 2017 and spring 2018. Analysis of results will take place at the end of term.

Plan for topic "Students completing BUSAC-187 will be able to Prepare and analyze information and reports for job costing, process costing and activity-based costing systems."": 2013/14

The department believes that the assessment of student learning in this area validates our current instructional practices and that we are doing a quality job of teaching the topics assessed in this accounting course. Our plan is to assess different topics next time this course is due for assessment. However, the department recommends a better coordination between the two campuses in Pleasant Hill and San Ramon and among different teaching modalities (e.g., F2F/Online, and day/evening). The department plans to use scores on multiple choice questions administered through Pearson Accounting Laboratory to standardize the assessment instrument and evaluation criteria.

Plan for topic "Students completing the course will be able to explain the role of managerial accounting and the primary informational needs of managers."": 2011/12

Continue to gather this information every semester.

Plan for topic "Students completing the course will be able to explain how ethics could be applied in one of the following situations: in performing cost-volume-profit analysis and its use as a predictive tool; in preparation of operational budgets including the flexible budget and in explaining the role in planning and controlling operations and cost; in identifying and using relevant costs in making decisions, including capital budgeting decisions; in the development and use of standard costs; in comparing and contrasting alternative costing systems including job costing, process costing and activity based costing; in preparing and interpreting variance reports and relating it to responsibility accounting and cost controls."": 2011/12

2012-05-08: Continue to gather this information every semester. Watch for any trends in those two areas of disagreement by 1 of 16 students and communicate to instructors if it continues to pay special attention in the 3 chapters where those concepts are covered.

2012-05-24: Continue to gather this information every semester, watch for any pattern of disagreement with meeting the SLO and take corrective actions.

### Plan for topic "Students completing the course will be able to interpret current payroll topics through library and Internet research."

**2016/17**

Plans to address the failure rate of 24%, include reminders to students via email of the upcoming deadline. Putting in BOLD print the requirements of the paper so that students do not miss important instructions outlined in the syllabus regarding this research project. Since some students expressed concern over the fast pace of the course (January 23, 2017 to March 17, 2017), the department may want to consider increasing the number of credit units and therefore extending the length of time needed to complete the course.

### Plan for topic "Students completing the course will be able to calculate rates of pay for hourly and salaried employees."

**2015/16**

The BUSAC department will assess this course in Spring 2017 so that we are in compliance with our SLO commitments. We are offering 2 sections in that term and they will all be assessed. The data will be analyzed and an action plan will be compiled. The action plan will be vetted by the department and then submitted by 12/31/17.

Plan for topic "Students completing the course will be able to interpret current payroll topics through library and Internet research.":
2009/10
(Department did not provide an action plan)
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to apply the revenue recognition model by identifying the performance obligations in a contract and allocating the contract price to those performance obligations."

- 2017/18
  In the next assessment, include one additional contract variable affecting the contract price and incorporate one question each that assesses the allocation of a contract price using adjusted market assessment approach, the expected cost-plus-profit margin approach, and the residual income approach.

- 2014/15
  This project is highly challenging and reflective of upper division college work. It is interesting for students and that motivates theme to do well, especially since it is a required skill to have in accounting practice. This project will continue as is.

- 2011/12
  Continue with same SLO since project is vital to the substance of the course.

- 2009/10
  At the start of this semester I obtained, at special university pricing, a VTEA grant for a DVC institution subscription to the new FASB (Financial Accounting Standards Board) codification "Professional View" web site containing all accounting pronouncements recently codified by topic. This is the same web site that accounting firms now use in practice when researching accounting implementation issues and that accounting professionals sitting for the CPA exam will use when taking the exam. Students were given lab assignments during the semester to prepare them for this semester project which required them to research emerging issues and exposure drafts on new accounting treatments by the FASB. This preparation allowed them to feel comfortable navigating the site and research an accounting topic of their interest while analyzing an actual treatment by a company of their choosing.

Plan for topic "Students completing the course will be able to prepare complex financial statements and interpret them by the use of financial ratios, disclosure notes, supplementary schedules, and alternative external sources of information."

- 2009/10
  This SLO is a crucial outcome and will remain with this course. The current method of assessment will remain because it is the most effective and comprehensive way to measure achievement. The assessment method is representative of what the vocational attributes would be in an occupational setting as identified by our Advisory Committee.

Note: The results are as of Spring 2010.

Plan for topic "Students completing the course will be able to evaluate and explain an accounting pronouncement and analyze its application by reviewing a company’s treatment of the accounting topic."

- 2009/10
  This SLO is a crucial outcome and will remain with this course. The current method of assessment will remain because it is the most effective and comprehensive way to measure achievement. Plan for topic "Students completing the course will be able to prepare complex financial statements and interpret them by the use of financial ratios, disclosure notes, supplementary schedules, and alternative external sources of information."

No SLO-related changes are recommended for the Title V course outline or instructional practice.

At the time of a curriculum update for this course, no later than once every five years, the measurement criteria for one of the stated student learning outcomes will be identified, implemented and analyzed. Any recommended changes in the curriculum outline or in instruction will be noted on the e-SLO data site.

### Plan for topic "Students completing the course will be able to prepare and analyze budgets."

- **2016/17**: Since approximately 85% of the students attained 70% or higher on the quiz, this learning outcome is reached. No further action is needed. Other learning outcomes will be assessed in the future.

- **2013/14**: We plan to modify the instructional process and provide individualized guidance to students to help them in budget preparation. This course used a new assessment process to gather the SLO data. The new process used multiple quizzes over the duration of the semester built into the MyAccountLab website. We will continue to use the same process in future semesters with minor changes in the questions. Since this course is only offered once a year (Spring) we will assess it again the next time it is offered and compare those results to this baseline.

#### Plan for topic "Students completing the course will be able to explain the basic federal income tax formula and its components."

<table>
<thead>
<tr>
<th>Year</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>2016/17</td>
<td>Overall, students did extremely well on the labs, slightly below the goal on Income Tax Returns, and met the goal on the Mid-Term exam. For future improvement, students will be encouraged to do more practice problems involving tax forms. Additional practice problems will be added to future classes to connect the theory of tax law and reporting issues related to practical implications.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Year</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>2015/16</td>
<td>This is an advance account class was last assessed in 2010/2011 and because of the SLO 33% ratio system in place at the time, it did not get assessed again before the system was converted to a 3-year per course process.</td>
</tr>
</tbody>
</table>

The department will assess this course in Fall 2016 so that we are in compliance with our SLO commitments. We are offering only 1 section, taught by Prof. Ku. We have contacted the SLO Co-Chair, Mario Tejada and he is working with Mohamed Eisa to provide assistance to Prof. Ku in completing the assessment of BusAcct-285.

**Plan for topic "Students completing the course will be able to analyze income tax scenarios for individuals and solve for possible solutions."**: 2010/11

<table>
<thead>
<tr>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Results are considered very satisfactory. Next level is to have students explain solutions orally to assure solutions are fully understood. This may be an approach added to future evaluation of outcomes.</td>

**DVC Instructional Course SLO Action Plans**

### 219. Governmental and Not-For-Profit Accounting [BUSAC-286] belonging to Business Administration [BUSAC]

**Plan for topic "Students completing the course will be able to explain the financial reporting standards and accounting and budgeting procedures for state and local government and not-for-profit organizations."**: 2016/17

To improve future results and attain a higher level of success, the instructor is planning to do the following:
1. Encourage students to work more practice problems
2. Assign additional practice problems
3. Help students improve their time management throughout the semester.

### 2013/14

**Plan for topic "Students completing the course will be able to explain the financial reporting standards and accounting and budgeting procedures for state and local government and not-for-profit organizations."**: 2013/14

Continue with this assessment because it is a major conceptual component for other topics of the course.

**Plan for topic "Students completing the course will be able to apply fund accounting standards and procedures in preparing and evaluating accounting information."**: 2013/14

Assessment seen as successful but this SLO is a major conceptual component to the content of the course.

**Plan for topic "Students completing BUSAC-286 will be able to Lab Component: Review and evaluate selected government/not for profit accounting reports for adequate disclosure and reporting standards"**: 2013/14

This lab component still needs to assessed in future evaluations by re-engineering the preparation assignment (i.e. homework, in-class demo, etc) prior to the lab assignment.

**Plan for topic "Students completing the course will be able to explain the financial reporting standards and accounting and budgeting procedures for state and local government and not-for-profit organizations."**: 2010/11

Found that this outcome is too broad; next time will rewrite to be more specific.

**Plan for topic "Students completing the course will be able to apply fund accounting standards and procedures in preparing and evaluating accounting information."**: 2010/11

Although the overall objective was passed per our standard of 70%, we believe the results of this outcome should improve and we will assess it with another method next time.

**Plan for topic "Students completing the course will be able to analyze and interpret financial information of state and local government and not-for-profit organizations."**: 2010/11

Found that this outcome is too broad; next time will rewrite to be more specific.

Plan for topic "Students completing the course will be able to..." The course will be assessed when offered after our CPA Prep certificate gets created and put in the catalog. This course was last scheduled for Spring 2017 but did not have enough students to be offered (only 7 enrolled). This course will be accessed when it is next offered.

- 2016/17
  - The course was scheduled for Spring 2017 but did not have enough students to be offered (only 7 enrolled). This course will be accessed when it is next offered.

- 2015/16
  - This is a capstone course that will be offered in the future. The course is not currently being offered because of a shortage of qualified faculty to teach this advance accounting course. The department will assess the course at its next scheduled offering so that we are in compliance with our SLO commitments. When the course is next scheduled, we will contact the SLO Co-Chair and provide a complete File Assessment Plan at that time that will include the instructor of record, class information and update this plan accordingly.

Plan for topic "Students completing the course will be able to consolidate financial statements": 2011/12

- The department believes that this outcome will remain as an outcome for this course since it is essential to the contents.

Plan for topic "Students completing the course will be able to..." The course will be assessed when offered after our CPA Prep certificate gets created and put in the catalog. This course was last scheduled for Spring 2017 but did not have enough students to be offered (only 7 enrolled). This course will be accessed when it is next offered.

- 2008/9
  - Course has not yet been offered so no data is available.

Plan for topic "Students completing the course will be able to..."

- B. Analyze published financial statements and recast accounting results under different accounting methods for comparative purposes to other industry competitors.": 2008/9
  - Course has not yet been offered so no data is available.

- Plan for topic "Students completing the course will be able to prepare entries to account for consolidations of two business entities."": 2008/9
  - Course has not yet been offered so no data is available.
DVC Instructional Course SLO Action Plans

221. Intermediate Accounting II [BUSAC-292] belonging to Business Administration [BUSAC]
222. Accounting Ethics and Accountants’ Professional Responsibilities [BUSAC-293] belonging to Business Administration [BUSAC]
DVC Instructional Course SLO Action Plans

223. Student Instructional Assistant [BUSAC-299] belonging to Business Administration [BUSAC]
224. Introduction to Management Studies [BUSMG-120] belonging to Business Administration [BUSMG]

Plan for topic "Students completing the course will be able to explain the four functions of management."

Rather than just listing the four functions of management--Bloom level 1--the department decided to have students apply and evaluate--Bloom levels 3 and 5--for this SLO.

While this requires higher-level thinking of the students, it also makes the assignment relevant to them. We strongly recommend to continue either with this assignment or to create an assignment that is also connecting with the students’ experience to ensure relevance.

Plan for topic "Students completing the course will be able to demonstrate an understanding of communications as a management skill."

Experiencing management-related communication and actively participating and analyzing it provides the students with the opportunity to appreciate the difficulty and the reward of management-level communication. The department recommends to continue with this approach, and add at least an assessment scale tool like proficient (80-100%), trainee (70-79%), and beginner (below 70%).

Plan for topic "Students completing the course will be able to identify the main events that contributed to the management movement."

The observation assignment at an actual place of business motivates students to actively engage with theories stipulated by the management theorists. At this time, no changes in assessment method is recommended.

Plan for topic "Students completing the course will be able to compare and contrast several contemporary management models."

The students gain experience in recognizing, comparing and contrasting, and explaining contemporary management models. At this time, no changes in assessment methods are recommended.

Plan for topic "Students completing the course will be able to identify the main events that contributed to the management movement."

The data for learning SLO 1 supports that students are able to identify at least six of eight pairs describing the main events that contributed to the management movement.

Plan for topic "Students completing the course will be able to explain the four functions of management."

The data for learning outcome for SLO 2 supports that more than 70% of students are able to list and explain the four management functions.

Plan for topic "Students will be able to explain the threshold issues involved in the legal, ethical, and social responsibilities of management."

Errors in the order of ethical decision making steps are mostly concerning the first step, switching 'identifying' and 'diagnosing'. In future classes, more effort will be spent on ensuring that students understand the meaning of 'diagnose' in the context of ethical decision making.
Plan for topic "Students completing the course will be able to explain the four functions of management.": 2012/13
This assessment provides a baseline for future assessments. Instructors teaching this class will continue using the current teaching methods since the results was more than satisfactory.

Plan for topic "Students completing the course will be able to demonstrate an understanding of communications as a management skill.": 2012/13
This assessment provides a baseline for future assessments. Instructors teaching this class will continue using the current teaching methods since the results was more than satisfactory.

226. Managing Diversity in the Workplace [BUSMG-131] belonging to Business Administration [BUSMG]

Plan for topic "Students completing the course will be able to analyze research concerning female authority and gender differences in leadership style.":: 2016/17

The assessment results demonstrate that the current teaching method promotes essential learning in achieving this course SLO. The next time that this course SLO is assessed, examining differences between women and men in terms of presence and power (Hofstede's power distance dimension, or perhaps use another model of national culture as it applies to leadership, such as Trompenaars' cross-cultural organization culture) in organizations around the world might be considered.

Plan for topic "Students completing the course will be able to explain aspects of diversity, such as age, culture, heritage, gender, race, social class, ethnicity, and others.":: 2013/14

The assessment shows that the current teaching methodology allows students to be successful in achieving this SLO.

Plan for topic "Students completing the course will be able to analyze research concerning female authority and gender differences in leadership style.":: 2013/14

The assessment shows that the current teaching methodology allows students to be successful in achieving this SLO.

Plan for topic "Students completing the course will be able to assess workplace diversity issues and challenges.":: 2013/14

The assessment shows that the current teaching methodology allows students to be successful in achieving this SLO.

Plan for topic "Students completing the course will be able to synthesize information on the changing demographics of the workforce and current work environment, with the goal of managing the workforce of the future.":: 2013/14

The assessment shows that the current teaching methodology allows students to be successful in achieving this SLO.

Plan for topic "Students completing the course will be able to explain aspects of diversity, such as age, culture, heritage, gender, race, social class, ethnicity, and others.":: 2012/13

No action required at this time.

Plan for topic "Students completing the course will be able to analyze research concerning female authority and gender differences in leadership style.":: 2012/13

No action required at this time.

Plan for topic "Students completing the course will be able to analyze organizations' diversity management.":: 2010/11

Continue using this assessment method in gathering data for SLO#5. Will compare this data with future assessments.

</table>
228. Topics in Management Studies [BUSMG-150] belonging to Business Administration [BUSMG]
**229. Managing Conflict and Workplace Relationships [BUSMG-160] belonging to Business Administration [BUSMG]**

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing this course will be able to explain how communication shapes conflict.&quot;</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>2018/19</strong></td>
<td>This course will be deleted because our Office Professional Program needs a redesign.</td>
</tr>
<tr>
<td><strong>2015/16</strong></td>
<td>Students successfully achieved the SLO by using both the textbook assigned for the class as well as insight provided through lecture and class discussion. Students were also prompted to provide additional research and insights both from research and personal experience to achieve the learning outcomes of the course.</td>
</tr>
</tbody>
</table>

Recommendation: continue with this teaching approach.
### Plan for topic: "Students completing this course will be able to create an action plan for improving team communication." 2018/19

This course will be deleted because our Office Professional Program needs a redesign.

### Plan for topic: "Students completing this course will be able to apply appropriate team performance techniques (e.g. connecting, defining, communicating, conflicting, energizing, and evaluating)." 2018/19

This course will be deleted because our Office Professional Program needs a redesign.

### Plan for topic: "Students completing this course will be able to create an action plan for improving team communication." 2017/18

<table>
<thead>
<tr>
<th>Outcome Assessment History</th>
</tr>
</thead>
<tbody>
<tr>
<td>The combination of lecture, small group work, white board work, and writing provided opportunities for students of all learning style preferences to learn.</td>
</tr>
</tbody>
</table>

Using past experiences and story telling created opportunities for engagement and showcased relevance to each student.

### Plan for topic: "Students completing this course will be able to apply appropriate team performance techniques (e.g. connecting, defining, communicating, conflicting, energizing, and evaluating)." 2017/18

Considering the diverse student body in the course, encouraging the sharing of past experiences helped make students aware of the presence of team participation in their lives outside of the classroom experience.

Students are clearly more engaged when the team performance techniques were connected to their own backgrounds.

This activity should be continued.
231. Managing Stress [BUSMG-165] belonging to Business Administration [BUSMG]
Plan for topic "Students completing this course will be able to explain and analyze factors that influence stress levels and coping responses": 2018/19
This course will be deleted because our Office Professional Program needs a redesign.
Plan for topic "Students completing this course will be able to recognize the extent major life events can increase stress and reduce productivity.": 2018/19
This course will be deleted because our Office Professional Program needs a redesign.
Plan for topic "Students completing this course will be able to explain and analyze factors that influence stress levels and coping responses": 2015/16
The combination of in- and out-of-class work together with the requirement to connect their learning to their personal experience worked well.
Our recommendation is to continue this assessment.
Plan for topic "Students completing this course will be able to recognize the extent major life events can increase stress and reduce productivity.": 2015/16
By making the assignment relevant to the students' experience and life situation, 100% completion and success rate was achieved.
We recommend continuing this assignment and assessment.
## 232. Time Management [BUSMG-166] belonging to Business Administration [BUSMG]

**Plan for topic "Students completing this course will be able to develop a plan to utilize time effectively to complete a work project."**:

2018/19

This course will be deleted because our Office Professional Program needs a redesign.

**Plan for topic "Students completing this course will be able to analyze methods of how to spend time on priorities and activities."**:

2018/19

This course will be deleted because our Office Professional Program needs a redesign.

**Plan for topic "Students completing this course will be able to develop a plan to utilize time effectively to complete a work project."**:

2015/16

It is recommended to start the assignment in class. Completing the plan for one day as a class cohort will clarify the assignment and its challenges to all students.

**Plan for topic "Students completing this course will be able to analyze methods of how to spend time on priorities and activities."**:

2015/16

All students attained the learning goal. The teaching method as well as the assessment should be continued.

<th>Plan for topic &quot;Students completing this course will be able to write the abstract for a business plan.&quot;</th>
<th>Year</th>
</tr>
</thead>
<tbody>
<tr>
<td>This course will be deleted because our Office Professional Program needs a redesign.</td>
<td>2018/19</td>
</tr>
<tr>
<td>Considering the topic of the class and the relevance of the assessment topic, we recommend the continuation of the method.</td>
<td>2015/16</td>
</tr>
</tbody>
</table>
Most of the 42% (22 students) who did not achieve the 70% success mark lost points for spelling errors and lack of organization in the writing.

Our action plan is two-pronged: first, make a sample document part of the assignment--we cannot assume that students already know how to use paragraphs, headings, numbered lists in documents; second, share the assessment outcome with the Bus 101 and Bus 250 instructors for the Year Up program so that these earlier courses are a part of the scaffolding process.

In order to assist all students in possible achievement, multiple channels to complete the assignment can be offered: creating a video, making a podcast, giving a presentation. For this class, the ability to write an answer is not the only appropriate way to assess success.

238. Intercultural Communication in the Workplace [BUSMG-173] belonging to Business Administration [BUSMG]

Plan for topic "Students completing this course will be able to analyze how communication techniques relate to a multicultural work environment": 2018/19

This course will be deleted because our Office Professional Program needs a redesign.

Plan for topic "Students completing this course will be able to determine if co-workers come from an individualistic or a collective frame of reference": 2018/19

This course will be deleted because our Office Professional Program needs a redesign.

Plan for topic "Students completing this course will be able to analyze how communication techniques relate to a multicultural work environment": 2017/18

The assignment is a mini project, combining lecture, small group work, writing, research, and online discussion board work.

This allows the students to engage with the topic over a length of time which deepens the learning.

Considering the positive outcome, the assignment will be repeated in future classes.

Plan for topic "Students completing this course will be able to determine if co-workers come from an individualistic or a collective frame of reference": 2017/18

This assignment process was successful because it requires explanation and then meaningful organization from the students. This provides students several opportunities to remember the vocabulary and concepts, and, because it is based on their own experiences, it creates meaning.

The assignment will be repeated in future classes.
<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing this course will be able to discuss business ethics terms and concepts.&quot;: 2017/18</th>
</tr>
</thead>
</table>
| The teaching strategy was driven by the desire to create relevance for the students. To achieve that, the students completed the assignment on companies that offer internships to Year Up students. The students know that their internship (second 6 months of the program) can take place at any of the companies.

The students successfully used business ethics and corporate responsibility terms and concepts. The department recommends continuing both, the teaching and the assessment methodology. |

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to describe the entrepreneurial process, i.e. how to develop successful business ideas and turn them into new entrepreneurial ventures."

- 2015/16: The learning and assessment method are showing positive results. Continuation is recommended.

Plan for topic "Students completing the course will be able to distinguish between entrepreneurship and small business management."

- 2015/16: The learning and assessment method are showing positive results. Continuation is recommended.

Plan for topic "Students completing the course will be able to describe the entrepreneurial process, i.e. how to develop successful business ideas and turn them into new entrepreneurial ventures."

- 2014/15: The learning and assessment method are showing positive results. Continuation is recommended.

- 2014/15: The learning and assessment method are showing positive results. Continuation is recommended.

Plan for topic "Students completing the course will be able to recognize opportunities and generate ideas for new ventures by conducting feasibility analysis as well as industry and competitor analysis."

- 2014/15: The learning and assessment method are showing positive results. Continuation is recommended.

Plan for topic "Students completing the course will be able to describe the entrepreneurial process, i.e. how to develop successful business ideas and turn them into new entrepreneurial ventures."

- 2011/12:
The process of making the business plan a semester-long process with focus on the parts of the plan as we study the corresponding chapter in class is successful. Since the plan constitutes 20% of the total class grade assessment, if a small number of students decide not to participate, the highest grade they can achieve is a C. It is not recommended to increase the percentage at this time.

Plan for topic "Students completing the course will be able to distinguish between entrepreneurship and small business management.":: 2011/12

Having the students involved in the definition process creates a sense of ownership. Bringing the definition question back frequently creates almost a class mantra. Continuation is recommended.

Plan for topic "Students completing the course will be able to recognize opportunities and generate ideas for new ventures by conducting feasibility analysis as well as industry and competitor analysis.":: 2011/12

The learning and assessment method are showing positive results. Continuation is recommended.

Plan for topic "Students completing the course will be able to apply business models to types of ventures.":: 2011/12

This is a challenging assignment since it combines research and business communication. In future classes, it is recommended to make this a separate assessment with at least 10% weight in the class grade.

Plan for topic "Students completing the course will be able to plan the marketing, management and growth of an entrepreneurial firm, and develop an exit strategy.":: 2011/12

The process of guiding the students through the parts of the business plan as it correlates to the textbook chapters is successful. Continuation is recommended.

Plan for topic "Students completing the course will be able to describe the entrepreneurial process, i.e. how to develop successful business ideas and turn them into new entrepreneurial ventures.":: 2010/11

The outcome for SLO is positive, and no changes are recommended at this time.

Plan for topic "Students completing the course will be able to distinguish between entrepreneurship and small business management.":: 2010/11

Considering the positive student learning outcome, no changes are recommended at this time.

Plan for topic "Students completing the course will be able to recognize opportunities and generate ideas for new ventures by conducting feasibility analysis as well as industry and competitor analysis.":: 2010/11

2011-10-28: This assessment and data has been compiled during the fall 2010 semester - for assessment cycle completed prior to spring 2010. For the next cycle, assessment at the end of the semester is recommended.

2011-10-28: I recommend to have the students complete a concept statement first, and then emphasize the difference between a concept statement and a feasibility analysis. That will make the requirements for the feasibility analysis clearer.
Plan for topic "Students completing the course will be able to apply business models to types of ventures."

- 2010/11 (not entered)

Plan for topic "Students completing the course will be able to plan the marketing, management and growth of an entrepreneurial firm, and develop an exit strategy."

- 2010/11 (not entered)

Plan for topic "Students completing the course will be able to describe the entrepreneurial process, i.e. how to develop successful business ideas and turn them into new entrepreneurial ventures."

- 2009/10

Considering the very positive student learning outcome for SLOs 1 - 4, no changes are recommended at this time.

Plan for topic "Students completing the course will be able to distinguish between entrepreneurship and small business management."

- 2009/10

Considering the very positive student learning outcome for SLOs 1 - 4, no changes are recommended at this time.

Plan for topic "Students completing the course will be able to recognize opportunities and generate ideas for new ventures by conducting feasibility analysis as well as industry and competitor analysis."

- 2009/10

Considering the very positive student learning outcome for SLOs 1 - 4, no changes are recommended at this time.

Plan for topic "Students completing the course will be able to apply business models to types of ventures."

- 2009/10

Considering the very positive student learning outcome for SLOs 1 - 4, no changes are recommended at this time.

Plan for topic "Students completing the course will be able to plan the marketing, management and growth of an entrepreneurial firm, and develop an exit strategy."

- 2009/10

Starting in the fall term of 2010, exit strategies will be included in the business plan that the students complete. In preparation for this additional part of the assignment, supplemental resources in addition to the textbook will be covered in the class.

Plan for topic "Students completing the course will be able to analyze the nature and importance of group processes for increasing productivity and group member satisfaction."

Plan for topic "Students completing the course will be able to evaluate the utility of a variety of decision-making processes under different working conditions."

- While the criteria for success was achieved, the recommendation is to rephrase the question to provide additional guidance for students. The term ‘utility’ threw off several students, according to the feedback from the class.

Plan for topic "Students completing the course will be able to develop awareness and demonstrate sensitivity toward individual and cultural differences."

- The assessment method and result showed good success. No changes to the teaching and assessment are planned at this time.

Plan for topic "Students completing the course will be able to apply effective assessment models to group performance."

- While the basic method of the assessment is valid - taped observations of group interactions - some technical difficulties arose for students that led to frustration. For future assignments, it is recommended to embed the videos rather than to depend on links.

Plan for topic "Students completing the course will be able to analyze the nature and importance of group processes for increasing productivity and group member satisfaction."

- The case study activity proved to be a successful learning tool for this SLO. It is recommended to continue this activity.

Plan for topic "Students completing the course will be able to identify and develop appropriate leader and group member roles in a

</tbody>
</table>
Plan for topic "Students will be able to employ effective sales tools and techniques for evaluating and enhancing personal selling skills." 2018/19

As a plan of action, the department will encourage instructors to continue using the case approach to expose students to real-world sales scenarios in order to help students enhance their personal selling skills. To increase the level of difficulty in future assessments for this topic, it is suggested that students are asked to write their own sales dialogue between a buyer and a seller in a typical selling situation.

Plan for topic "Students will be able to demonstrate a practical knowledge and application of the steps involved in the personal selling process." 2015/16

Continue to require rough drafts and have regular check-ins with individuals and project groups throughout the semester.

Implement a "pre-test" to assess students' knowledge of the subject matter and their comfort level with technology and software (e.g., PowerPoint, Prezi, etc.)

Continue to incorporate relevant new technologies and web-tools (e.g., online project planning, LinkedIn, etc.) as they evolve.

Plan for topic "Students will be able to demonstrate a practical knowledge and application of the steps involved in the personal selling process." 2012/13

74%, while adequate, is still not an excellent result. I plan to improve upon such results next time the same SLO gets evaluated.

Plan for topic "Students will be able to demonstrate a practical knowledge and application of the steps involved in the personal selling process." 2008/9

No SLO related changes are recommended for the Title V course outline or for instructional methodology.

When this class next undergoes a Title V rewrite, or no later than five years from now, an evaluation of another learning outcome for this class will be conducted and evaluated,
DVC Instructional Course SLO Action Plans

with results reported on the eSLO website.
245. Advertising [BUSMK-255] belonging to Business Administration [BUSMK]
Plan for topic "Students completing the course will be able to illustrate regulatory, social, economic, and ethical aspects of advertising." : 2018/19
Learning how to do content analysis is an important skill for advertising students. It enables them to evaluate the elements of brands’ advertising strategies and, in particular, the social effects of gendered advertising. It is, therefore, suggested that this assignment, or some version of it, be used in future advertising classes.

Plan for topic "Students completing the course will be able to analyze the communications process, consumer behavior, budgeting, creative strategy, and media." : 2015/16
While the assessment results are impressive, changing the instructions such that students must include in their sample one or two pitch persons (endorsers) who do not have star power, such as a “regular person,” could make this assessment method a little more challenging if repeated. Students tend to include actresses, actors, singers, and athletes in their sample. Information on and a discussion of the success or failure of celebrity endorsements are easier to pull than those of regular people cast as endorsers.

Plan for topic "Students completing BUSMK-255 will be able to to use the Internet to collect data and information on consumer and brand insights used in the development of an advertising campaign." : 2012/13
Writing a Creative Brief is a vital skill for advertising students, as it helps them hone their research abilities as well as their ability to synthesize a body of information. Based on the results of the data, continue to offer students an assignment that requires them to do research and write about their findings.

Plan for topic "Students completing the course will be able to analyze the communications process, consumer behavior, budgeting, creative strategy, and media." : 2010/11
Sustain current teaching methods and gather more data during the next cycle.

Plan for topic "Students completing the course will be able to define and target audiences, create and evaluate advertising strategies, develop a strategic plan, and develop an integrated marketing communications plan." : 2009/10
Not including students who withdrew from the class, while not dropping the class

Plan for topic "Students completing the course will be able to analyze the communications process, consumer behavior, budgeting, creative strategy, and media." : 2009/10
Sustain current teaching methods and gather more data during the next cycle.

Plan for topic "The Title V course objectives serve as student learning outcomes for this course. The SLO being evaluated this round is:"

Students completing the course will be able to analyze markets, marketing strategy, the marketing environment, and the marketing mix variables of product, price, promotion, and distribution.".: 2016/17

The students are successfully learning what we are aiming to teach under this SLO. We do not recommend any changes or additional actions at this time.

Plan for topic "Students completing the course will be able to explain the basic theories and concepts, principles and practices of modern marketing.".: 2016/17

The students are successfully learning what we are aiming to teach under this SLO. We do not recommend any changes or additional actions at this time.

Plan for topic "Students completing the course will be able to analyze markets, marketing strategy, the marketing environment, and the marketing mix variables of product, price, promotion, and distribution.".: 2016/17

The topic of strategic planning clearly is one that is most ambiguous to students.

The textbook - both BusMk 256 instructors used the same one - dedicates ch. 2 to strategic planning. Considering that ch. 2 arrives early in the semester when students are still learning much of the basic vocabulary of marketing, the topic might just be too abstract to allow deep learning of the concept.

We recommend making strategic planning a thread in the course to bring the topic back at the beginning of most chapter to illustrate its significance and application.

Plan for topic "Students completing the course will be able to explain the basic theories and concepts, principles and practices of modern marketing.".: 2016/17

247. Advertising and Gender [BUSMK-258] belonging to Business Administration [BUSMK]
The ability to create a campaign plan is a critical skill for business marketing students who study digital marketing or are preparing for a career in this field. Creating a digital marketing campaign gives students an opportunity to learn how to analyze an organization’s competencies, existing and potential customers, and the business environment; articulate measurable objectives; build a digital marketing strategy; identify digital marketing tactics; develop a budget; and implement and evaluate the results of a campaign. Therefore, it is recommended that this assignment, or some version of it, be adopted in future digital marketing fundamentals classes.
### Plan for topic "Students completing this course will be able to construct a social media marketing plan" 2019/20

Since the ability to develop a real-life SMM plan is a critical component of this course, it is recommended to keep this project or parts of it as an important part of the course going forward. Future effort should focus on improving student performance on this learning outcome, including possibly providing sample project assignments for students.
The ability to evaluate internet content of keywords is a critical skill for business marketing students who study digital marketing or are preparing for a career in this field. Creating a keyword research plan gives students an opportunity to learn how to analyze measurable internet content for potential organizations, potential customers, and the evolving online business environment. The results from a keyword research plan help build an internet strategy to develop a budget around search tactics that are measurable around key performance indicators. Therefore, it is recommended that this assignment be adopted in future digital marketing fundamentals classes.
| 251. Content Marketing [BUSMK-262] belonging to Business Administration [BUSMK] |
| Plan for topic "Students completing this course will be able to create content for a variety of content types and channels."
| 2019/20 |

The ability to create and publish content is an essential skill for business marketing students, especially for those students who plan to go into some aspect of digital marketing that requires content creation or curation. Therefore, it is recommended that an assignment that calls for students to create content be included in future content marketing classes.
DVC Instructional Course SLO Action Plans

252. Email Marketing [BUSMK-263] belonging to Business Administration [BUSMK]
Plan for topic "Students completing this course will be able to describe the importance of email marketing as part of an organization’s marketing strategy.": 2019/20

While the assignment demonstrated the student’s ability to identify some understanding of at least two fundamental principles, it did not assess a student’s breadth of comprehension. A "fill in the blank" or "multiple choice" type of assignment should be added to the course to better assess a student’s understanding of the many ways email marketing contributes to an overarching marketing strategy.

Student success on this particular assignment would have been higher if reminder Canvas messages were sent on a periodic basis to those students who had yet to complete the assignment.
DVC Instructional Course SLO Action Plans

253. Search Marketing [BUSMK-264] belonging to Business Administration [BUSMK]

Plan for topic "1. Students completing this course will be able to describe the importance of Search Marketing as part of an organization’s marketing strategy.": 2019/20

<table>
<thead>
<tr>
<th>While the assignment demonstrated the student’s ability to identify some understanding of at least two fundamental principles, it did not assess a student’s breadth of comprehension. A fill in the blank or multiple choice type of assignment should be added to the course to better assess a student’s understanding of the many ways email marketing contributes to an overarching marketing strategy.</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Student success on this particular assignment would have been higher if reminder Canvas messages were sent on a periodic basis to those students who had yet to complete the assignment.</th>
</tr>
</thead>
</table>
254. Independent Study [BUSMK-298] belonging to Business Administration [BUSMK]
255. College and Career Readiness I [CARER-100] belonging to Counseling [CARER]
Plan for topic "Students completing this course will be able to develop a goal based on an analysis of their interests and aptitudes":
2018/19

Will assess the next time this course is offered
256. College and Career Readiness II [CARER-101] belonging to Counseling [CARER]
Plan for topic "Students completing this course will be able to describe various post-secondary educational options for themselves."

Will assess the next time the course is offered.
DVC Instructional Course SLO Action Plans

257. Career and Life Planning [CARER-110] belonging to Counseling [CARER]

Plan for topic "Students completing CARER-110 will be able to Produce an electronic resume appropriately formatted.": 2018/19
Provide additional time to review the rubric to be sure that all understand the assignment and the components that they need to include in the paper.

Plan for topic "e": 2018/19
Provide additional time to review the rubric to be sure that all understand the assignment and the components that they need to include in the paper.

As the outcome was successfully met, it could be that this high of completion was an anomaly or not. It would be useful to measure this SLO another time to ensure that this assessment was out of the ordinary or that the method in teaching this objective is actually this effective.

Plan for topic "Students completing the course will be able to express a better understanding of the resources and methodology that can be used in making career and life decisions.": 2013/14
Career 110 instructors will review materials for consistency across sections and evaluate the usefulness of the textbook.

Plan for topic "By attending a counseling appointment, students will leave with improved knowledge on how to address the issue(s) they came in to discuss.": 2013/14
The usefulness and assessment method of this SLO needs to be evaluated for its usefulness. The results will be presented to the department for its input.

Plan for topic "Students completing the course will be able to express a better understanding of the resources and methodology that can be used in making career and life decisions.": 2012/13
This class is focused on career and life planning. This SLO is an important measure of successful learning. Faculty will review the effectiveness of the assessment tool.

Plan for topic "Students completing the course will be able to use critical thinking and decision making skills in the evaluation of research materials.": 2012/13
While 79% is an acceptable number, faculty will review the effectiveness of the assignment, and the materials used in this unit of the class.

Plan for topic "Students completing the course will be able to evaluate their own career/vocational interests, aptitudes, values, and desired work environment.": 2011/12
We will continue to assess our results on this outcome to evaluate the effectiveness of our instruction and instructional materials.

Plan for topic "Students completing the course will be able to express a better understanding of the resources and methodology that can be used in making career and life decisions.": 2008/9
Look at more effective way of incorporating in class activities (e.g., increased use of computer assessment, research, etc) into course, and seriously consider the value of and cost/benefit of textbooks to students before requiring one for this course.

Plan for topic "By attending a counseling appointment, students will leave with improved knowledge on how to address the issue(s) they came in to discuss.": 2008/9

This SLO needs to be repeated with the survey question measuring only the factor relating to the SLO so that we can obtain a true assessment of our efforts in this regard.

DVC Instructional Course SLO Action Plans

259. Career and Major Exploration [CARER-130] belonging to Counseling [CARER]

Plan for topic "Students completing the course will be able to use a computerized program such as EUREKA, to research potential occupational and educational opportunities." : 2018/19

Since this basic SLO has been achieved, future methodology will look at some of the specific aspects of EUREKA we would like students to understand and utilize.

Plan for topic "Students completing the course will be able to analyze major and educational options, work and organizational environments and labor market trends." : 2014/15

During the next cycle, we will measure a different assessment topic to ensure that students are mastering all of the content of the course.

Plan for topic "Students completing the course will be able to use a computerized program such as EUREKA, to research potential occupational and educational opportunities." : 2012/13

Since this class is only offered in the spring, career planning faculty will meet in the fall to reevaluate the effectiveness of the assignment in meeting the learning objectives of the course.

Plan for topic "Students completing the course will be able to analyze major and educational options, work and organizational environments and labor market trends." : 2012/13

While the criteria for this SLO have been met, the career planning faculty will meet in the fall to assess the overall effectiveness of the instructional materials and learning outcomes for the course.

Plan for topic "Students completing the course will be able to examine concepts and issues related to the selection of career and/or major goals." : 2012/13

Since this class is only taught in the spring, career planning faculty will meet in the fall 2013 to evaluate and update the web based research tools used, and determine the appropriateness of the assignment in meeting the SLO's.

Plan for topic "Students completing Carer 130 will be able to use computerized career information systems, college and career websites, for major and career research." : 2012/13

Since this class is only taught in the spring, career planning faculty will meet in the fall 2013 to evaluate and update the web based research tools used, and determine the appropriateness of the assignment in meeting the SLO's.

Plan for topic "Students completing the course will be able to use a computerized program such as EUREKA, to research potential occupational and educational opportunities." : 2011/12

We will continue to examine our instructional materials and approaches to maintain these results.

Plan for topic "Students completing the course will be able to use a computerized program such as EUREKA, to research potential occupational and educational opportunities." : 2009/10

### 262. Chemistry for Non-Science Majors [CHEM-106] belonging to Chemistry [CHEM]

#### Plan for topic "Students completing CHEM-106 will be able to Solve quantitative problems related to chemical concepts": 2017/18

The data partially supports the criteria for the quantitative problem solving learning objective. The data correlates well with the widely reported differences in basic mathematical and reasoning skills among community college students in the general population, who are those enrolled in Chem 106 as opposed to students focusing on a STEM major. Most all of the students enrolled in Chem 106 have the mathematical skill to solve Part a) by using a ratio. By understanding the problem and recognizing the necessary information among a larger collection of information to solve it offers alternative mathematical approaches that also lead to a correct solution. A number of students among the top quartile provided different mathematical solutions other than using a simple ratio. Part b) is a more rigorous question requiring the application of stoichiometry and an understanding of reaction chemistry, which is mathematically more demanding to solve, presenting a challenge that many of the students in the lower quartile could not satisfactorily meet. Considering the nature of the course and the student cohort, it seems appropriate to develop and implement quantitative objectives that incrementally build on simple, direct mathematical operations, which students can use to acquire higher mathematical skills. This will better serve a larger proportion of the class.

#### Plan for topic "Students completing CHEM-106 will be able to Apply basic concepts of Chemistry to problems in everyday life": 2017/18

The data supports the learning objectives with no significant difference between a traditional lecture course and a hybrid online course.

#### Plan for topic "Students completing this course will be able to analyze current societal issues related to chemistry.": 2017/18

The data supports the learning objectives.

#### Plan for topic "Students completing CHEM-106 will be able to Solve quantitative problems related to chemical concepts": 2014/15

This result equals are goal for percentage of correct answers. No further plan needed.

#### Plan for topic "Students completing CHEM-106 will be able to Apply basic concepts of Chemistry to problems in everyday life": 2014/15

Students seem to have difficulty with multiple choice questions that say NOT... The students answering correctly stayed about the same. Perhaps it would be interesting to have two questions that are similar, but one has a NOT and the other doesn't.

#### Plan for topic "Students completing CHEM-106 will be able to Solve quantitative problems related to chemical concepts": 2013/14

This outcome involves higher level problem solving skills because of the application process to various concepts. The question was multiple choice and therefore "correct or not correct". Perhaps the question needs assess the steps in the application to better inform us as to where the student went wrong in the process. Will reassess in Spring 2015.
263. Integrated Inorganic, Organic, and Biological Chemistry [CHEM-107] belonging to Chemistry [CHEM]
Plan for topic "Students completing this course will be able to identify whether a molecule is polar or non-polar using the Lewis diagram": 2018/19

The analysis shows that the majority were successful, but more practice with these concepts and models may increase confidence in relating diagrams to polarity. This concept is very important to future topics and involves visualization of three-dimensional molecules. The department will emphasize to all faculty that using models and visualization techniques helps students deepen their understanding of the relationship between shape and polarity.

Plan for topic "Students completing this course will be able to analyze molecular structure and predict solubility trends in water.": 2018/19

This results indicate the successful students made the connection between molecular structure, intermolecular forces, and solubility in water. The department is pleased with the success achieved in this assessment because these are foundational concepts that are needed for better understanding of future topics. We need to continue to emphasize this importance and help students to make these connections by developing visualization techniques and demonstrations.

Plan for topic "Students completing this course will be able to recognize the structure of proteins.": 2015/16

This was the first time we have offered this course at DVC. We needed to develop this course because of a change in the nursing program prerequisites. Most nursing programs only require one semester of Chemistry now. It is important for the Nursing programs to include topics from Inorganic, Organic, and Biological Chemistry (Chem 108 and 109). Since this was the first time we were offering this course and we only had one section, the number of students was statistically small. We would like to reassess in Spring 2017. Also we would like to assess with the appropriate questions in some 108 and 109 sections to see if having an integrated course affects the assessment.

Plan for topic "Students completing this course will be able to recognize the structure of lipids.": 2015/16

This was the first time we have offered this course at DVC. We needed to develop this course because of a change in the nursing program prerequisites. Most nursing programs only require one semester of Chemistry now. It is important for the Nursing programs to include topics from Inorganic, Organic, and Biological Chemistry (Chem 108 and 109). Also we would like to assess with the appropriate questions in some 108 and 109 sections to see if having an integrated course affects the assessment.

Plan for topic "Students completing this course will be able to name inorganic compounds using IUPAC nomenclature rules.": 2016/17

Most of the students who answered incorrectly chose the same wrong answer.

The topic will be reassessed during the next SLO cycle. A Best Practices Workshop for all Chem 108 instructors prior to the beginning of the semester will include a discussion of how to teach students to avoid making the most prevalent nomenclature errors.

Plan for topic "Students completing this course will be able to use chemical stoichiometry to calculate the yield of a limiting reactant problem." 2016/17

79% of students were able to carry out the fundamental step of solving the problem: converting grams to moles.

The topic will be reassessed during the next SLO cycle. A Best Practices Workshop for all Chem 108 instructors prior to the beginning of the semester will include a discussion of successful approaches to teaching the topic.

Plan for topic "Students completing this course will be able to demonstrate proficiency in basic laboratory techniques.": 2016/17

There may be factors inherent in the design of the experiment and the way in which it is carried out by individual instructors that lead to a larger percent error in the results.

These factors will be examined by full-time instructors next semester, and if results improve, any necessary changes will be made to the student laboratory manual and all instructors will be informed of best practices for carrying out the experiment.

Plan for topic "Students completing CHEM-108 will be able to Construct chemical equations and balance them." 2013/14

Since the goal was met, we will not assess this question again, but choose another topic in the future.

Plan for topic "Students completing CHEM-108 will be able to Distinguish between molecules by drawing and recognizing Lewis diagrams." 2013/14

Since we met our goal, we will not assess this topic again immediately, but move on to a new topic in the next assessment cycle.
Plan for topic "Students will analyze, balance, and use chemical equations to determine quantitative relationships among reactants and products."

Balancing is typically not the issue when doing a multi-step stoichiometry problem. Next assessment should concern the set up of the stoichiometry problem and its results.

Plan for topic "Students will analyze, balance, and use chemical equations to determine quantitative relationships among reactants and products."

a. All students completing the course were assessed. Not all of these students were successful - they did not receive a passing grade. The percentages would probably have been higher if only students who received grades of A, B, or C were considered. In any case, the percentages of correct responses were to higher level questions and were close to the target. Additional practice to these types of problems will be proved through additional worksheets, WebAssign problems and/or on-line tutorials and worksheets.

Plan for topic "Students completing the course will be able to perform on the Chemistry Diagnostic Test to a satisfactory level."

A better method for administering the test needs to be developed. There is insufficient time to administer the test in a 50 minute class period and there is no mechanism for giving DSS students additional time.

Plan for topic "Students shall demonstrate proficiency in basic laboratory techniques and recording of experimental observations."

1a. The goal was met.

1b. Students had trouble identifying the presence of the barium ion. The success rate might be improved by increasing the concentration of barium in the unknown and increasing the amount of sulfuric acid added in the step for confirmation for barium.

Plan for topic "Students shall use the predictive properties pf the periodic table to categorized bonding in compounds, to determine charges on ions and to deduce chemical formulas."

The goals were met on three of the four questions. Analysis of question #22 appears to indicate that the students did not recognize Cs (a relatively obscure element) as a metal.
DVC Instructional Course SLO Action Plans

265. Introduction to Organic and Biochemistry [CHEM-109] belonging to Chemistry [CHEM]

Plan for topic "Students completing the course will be able to Describe the physical and chemical properties of various functional groups including hydrocarbons, alcohols, ethers, thiols, aldehydes, ketones, carboxylic acids, esters, amines and amides."": 2017/18

The data was shared at a Chemistry department meeting. Discussion included in the future recording which response the students gave to help decide what the underlying misconception was. Would the order of the responses affect the response? Perhaps the question could be reworded for better success. Perhaps having more than one question for students to answer that assess a similar topic would be helpful.

Plan for topic "Students completing this course will be able to apply the knowledge gained in organic chemistry to biochemical molecules, metabolism, and molecular genetics": 2017/18

The data was shared at a Chemistry department meeting. Discussion included in the future recording which response the students gave to help decide what the underlying misconception was. Would the order of the responses affect the response? Perhaps the question could be reworded for better success. Perhaps having more than one question for students to answer that assess a similar topic would be helpful.

Plan for topic "Students completing the course will be able to Describe the physical and chemical properties of various functional groups including hydrocarbons, alcohols, ethers, thiols, aldehydes, ketones, carboxylic acids, esters, amines and amides.": 2014/15

None necessary since above 70% of the students answered this question correctly.

Plan for topic "Students completing this course will be able to apply the knowledge gained in organic chemistry to biochemical molecules, metabolism, and molecular genetics": 2014/15

Not necessary, but would be interesting to try some multiple choice questions asked both with a NOT and without but asking the same question to see if there is a difference in success.

Plan for topic "Students completing the course will be able to Describe the physical and chemical properties of various functional groups including hydrocarbons, alcohols, ethers, thiols, aldehydes, ketones, carboxylic acids, esters, amines and amides.": 2013/14

Since this did not meet our target, we will reassess in the Spring of 2015. Increased emphasis will be placed on the pH concept and how it relates to various functional groups. Also the question will be rewritten to show the generalized formula of the functional groups, instead of just the name of the functional groups.

Plan for topic "Students completing the course will be able to Recognize the functional groups from I.U.P.A.C. names or structures": 2010/11

Continue to emphasize the importance of recognizing functional groups in Chem 109

Plan for topic "Students completing the course will be able to Describe the physical and chemical properties of various functional groups including hydrocarbons, alcohols, ethers, thiols, aldehydes, ketones, carboxylic acids, esters, amines and amides.": 2010/11

</tr>
</tbody>
</table>
### Plan for topic "Students completing the course will be able to develop and demonstrate appropriate chemical laboratory techniques."

**Perform a titration to determine the concentration of an unknown component.**

Handling of NaOH solutions at the PHC site will be looked at carefully for improvements. The precise cause is currently unclear.

**Plan for topic "Students completing the course will be able to construct and balance net ionic equations (Spring 2011)"**

The best performing sections on Q2 had 56% fully correct. That instructor placed enormous emphasis on molecular-level imagining and thinking about the relationship of structure to acid strength. Perhaps greater conceptual emphasis and microscopic imagery would improve success with weak electrolytes? This line of thinking will be encouraged.

**Plan for topic "Students completing this course will be able to develop chemical problem solving skills as applied to kinetics."**

A co-curricular math-in-science course is under development.

Homework problems which emphasize interpretation of graphical data will be promoted.

**Plan for topic "Students completing this course will be able to construct and balance net ionic equations (Spring 2011)"**

Writing NIEs continues to be a skill that students struggle with. A few instructors noted that these assessment questions were on very long exams and that the students felt rushed. Perhaps a better way of collecting this data would be to have every instructor give this as a mini quiz during lab time. Another thought is that we are assessing students too early in the semester on this topic. For example, the concept of ammonia (NH3) generating hydroxide ions (OH-) in water is a confusing topic that cannot be fully understood until equilibrium is covered, so we should be assessing this topic on the final exam, not just on the exam covering chapter 4.

Many of the chem 120 sections assessed were taught by newer adjuncts who have less knowledge of the curriculum and are perhaps unaware of how important writing NIEs becomes in future courses. Some of the skills we are assessing through these 3 questions are not covered in the textbook, so we have added some supplemental material to the student lab manual. We are currently trying to better educate our adjunct instructors so that they are all aware of the availability of this material. We are also hoping to hold monthly meetings for Chem 120 instructors (both full time and adjunct) so that we can share our thoughts on what topics should be emphasized and our strategies for teaching these topics. Finally, we have a set of videos available on how to write NIEs (these were developed by Karen Long a few years ago), and we will continue to encourage instructors to use these videos in their classes and make them available to students.

**Plan for topic "Students completing this course will be able to use a volumetric pipet correctly. [B.1]"**

The criteria for success was met. We found that requiring students to repeat the experiment until they came up with an accurate density value ensured that all students
mastered this lab skill. We will continue to advise Chem 120 instructors to conduct this lab in fashion.

Plan for topic "Students completing this course will be able to determine the acidity or basicity of a variety of aqueous solutions.": 2015/16

We did not meet our goal with question 1. We suspect that most students erroneously answered choice (B) because they forgot to double the [OH] when calculating pH, although we did not collect data to verify this assumption. If we decide to use an assessment question like this in the future, we should also collect data on how many students chose choice (B).

For question 2, it would have also been helpful to know what the most common wrong answers were (the correct answer was (D) slightly basic). We are not sure if students are misunderstanding the difference between weak and strong bases, or if they are misunderstanding the difference between acids and conjugate bases.

We currently have an optional lab called "pH of Lots of Stuff" in our curriculum, and we also have supplementary practice problems in our lab manual that deal with more in-depth acid-base questions. We will continue to encourage all instructors to use these practice problems with their classes. Perhaps the lab should be replaced with an activity or a problem-solving session that focuses more on the types of problems students are having trouble with.

Many of the chem 120 sections assessed were taught by newer adjuncts who have less knowledge of the curriculum and are perhaps unaware of how important writing NIEs becomes in future courses. We are hoping to hold monthly meetings for Chem 120 instructors (both full time and adjunct) so that we can share our thoughts on what topics should be emphasized and our strategies for teaching these topics.

Plan for topic "Students completing the course will be able to explain and illustrate bonding in various compounds": 2012/13

Essentially all sections met the goal on all questions. There is not a significant difference between FT and PT instructors. No action is needed.

Plan for topic "Students completing the course will be able to construct, process, and interpret computer-generated graphs correctly.": 2012/13

Good results on the R2 objective are due to all instructors emphasizing that students should review the quality of their data BEFORE leaving the lab. We believe this practice should be continued and encouraged. Students had trouble meeting the 2% accuracy goal at the 50% level. The 5% accuracy goal was achievable at the 70% level. It is not clear how to improve these results - perhaps we are asking for more than the technique can deliver. We will continue to monitor the results.

Plan for topic "Students completing the course will be able to construct and balance net ionic equations.": 2012/13

Assessment (B) was flawed - a bad question was chosen. Students still struggled with getting all of the little details right in (A). More practice and drill may be called for. Question (C) is a special case (ammonia asa weak base), but an important one. Most sections met the goal, so perhaps only a little extra emphasis is warranted.

Plan for topic "Students completing the course will be able to construct, process, and interpret computer-generated graphs correctly.":
Goals were met for both a and b. Students use of both computers and the Logger Pro software has improved over the past few years. They are more adept with the computers, but also the chemistry faculty has developed detailed instructions for the use of the software and subsequent calculations.

### Plan for topic "Students completing the course will be able to construct and balance net ionic equations."
2010/11

The department will discuss these results in the Spring 2012 semester. It is anticipated that additional worksheets and/or on-line problems will be developed.

### Plan for topic "Students completing the course will be able to develop problem solving skills as applied to thermochemistry."
2010/11

DVC Instructional Course SLO Action Plans

267. General College Chemistry II [CHEM-121] belonging to Chemistry [CHEM]

Plan for topic "Students completing the course will be able to design, construct, and interpret diagrams and graphs accurately."

2018/19

Training in the use of Excel throughout the general chemistry series appears to be allowing students to develop some comfort with using it in data analysis. Most formatting issues were the result of ignoring tips at the end of a long list. Giving students a "peer review" opportunity to see what's right or wrong about their graphs may encourage them to find these deficiencies and learn how to fix them for future work.

Plan for topic "Students completing this course will be able to apply concepts of ionic equilibria to explain observations of chemical reactivity by writing balanced equations to represent the reactions."

2018/19

Problem design may be to blame for student struggles on the second observation (choosing a metal ion that couldn't bond to several of the other reactants present, like nickel, could have streamlined their reasoning). Overall, increased emphasis on the role of the concentration and pH necessary for certain reactions to take place could promote better reasoning in this course, as well as the organic chemistry sequence to follow. Reflecting on qualitative analysis laboratory reactions could frame this dependence (e.g., "ammonia and water produce hydroxide; aluminum can complex with hydroxide; so, why didn't aluminum complex in an ammonia solution?").

Plan for topic "Students completing this course will be able to analyze and solve quantitative problems including chemical equilibria and thermodynamics."

2018/19

Even those who recognized the need solve an equilibrium problem in part (b) struggled somewhat with remembering their mathematical strategies. We intend to add a few problems like this one to our "department problems" print in our lab manual to allow students to remain "brushed up" on these strategies through the entire course, rather than treating them as "midterm 1 material".

Plan for topic "Students completing the course will be able to construct and balance chemical equations."

2015/16

The assessments of the section with the highest percent success was not assessed in the same manner as the other sections, so better instructions are needed about the protocols for assessing the SLO so that we are able to draw reliable conclusions. The three data points that were acquired following the protocol show that students struggle with Net Ionic Equations (NIEs). In particular, forming a metal hydroxide using NH3 is a difficult concept in chem 120 and it would appear that they are coming from Chem 120 without mastering that concept.

To try to address this issue we created a one day lab project focusing on visualizing and writing NIEs in groups. The hope is that discussing and teaching each other will make the concept of NIEs more concrete. We ran the experiment in the fall semester and will again use the project in the spring. If this is successful, we could try to incorporate a similar project into chem 120.

Plan for topic "Students completing the course will be able to develop and demonstrate appropriate chemical laboratory techniques, and perform a variety of chemical experiments, record data/observations, analyze and communicate the results."

2015/16
Despite the instructions that data should not need to be "eyeballed" not all instructors analyzed with that restriction. Student success for the SLO as defined was lower than the desired outcome. To improve the student success, more explicit instructions and a corresponding example of appropriate vs unacceptable were added to the student laboratory manual. Thus, students can not only hear how to work up data in the lab discussion, but they can refer back to their lab manual for parallel instructions in the lab manual.

Plan for topic "Students completing CHEM-121 will be able to develop and demonstrate appropriate chemical laboratory techniques, and perform a variety of chemical experiments, record data/observations, analyze and communicate the results.":: 2015/16

Plan for topic "Students completing the course will be able to develop problem solving skills.":: 2015/16

With the exception of making sure that the same conditions are used in all sections, the students were successful in this measure.

Plan for topic "Students completing the course will be able to construct and balance chemical equations.":: 2013

Net ionic equations give students great difficulty. More regular assessment (both in 121 and in the pre-requisite, Chem 120) is needed to emphasize the importance of this topic, as it is fundamental to understanding the more complex chemistry investigated in Chem 121.

Plan for topic "Students completing the course will be able to demonstrate the ability to retrieve and utilize information from textbook, reference materials, and articles to answer and solve problems.":: 2013

Affirmation of current curriculum -- no changes needed.

Plan for topic "Students completing the course will be able to develop and demonstrate appropriate chemical laboratory techniques, and perform a variety of chemical experiments, record data/observations, analyze and communicate the results.":: 2013

(a) Affirmation of course curriculum -- no changes needed. (b) This was the students’ first attempt at graphing in Chem 121. During the next assessment cycle, it would be beneficial to provide feedback on the first graphing assignment, and assess the students' work on a second such assignment.

Plan for topic "Students completing CHEM-121 will be able to develop and demonstrate appropriate chemical laboratory techniques, and perform a variety of chemical experiments, record data/observations, analyze and communicate the results.":: 2013

(a) Affirmation of course curriculum -- no changes needed. (b) This was the students’ first attempt at graphing in Chem 121. During the next assessment cycle, it would be beneficial to provide feedback on the first graphing assignment, and assess the students' work on a second such assignment.

Plan for topic "Students completing the course will be able to construct and balance chemical equations.":: 2011

a) this is the second time we have assessed students ability to correctly write this type of chemical equation. we now believe that this is a B level concept. a more reasonable expectation is that a C level student will grasp the concepts qualitatively. next time we will assess at a qualitative level. b) both section met the goals

Plan for topic "Students completing the course will be able to demonstrate the ability to retrieve and utilize information from textbook,
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to design, construct, and interpret diagrams and graphs accurately.": 2010/11

In the second section, the SLO question was embedded within a larger problem. We feel this presentation may have impacted student success. In the future the SLO question will be treated as a separate question so that there are no distractors that could potentially affect the results.

Plan for topic "Students completing the course will be able to construct and balance chemical equations.": 2008/9

(a) More practice recognizing and writing formulas for complex ions will be given in class.

(b) Affirmation of current curriculum -- no changes needed.

Plan for topic "Students completing the course will be able to develop and demonstrate appropriate chemical laboratory techniques, and perform a variety of chemical experiments, record data/observations, analyze and communicate the results.": 2008/9

Affirmation of current curriculum -- no changes needed.

Plan for topic "Students completing CHEM-121 will be able to develop and demonstrate appropriate chemical laboratory techniques, and perform a variety of chemical experiments, record data/observations, analyze and communicate the results.": 2008/9

Affirmation of current curriculum -- no changes needed.

Plan for topic "Students completing the course will be able to develop problem solving skills.": 2008/9

The average results of all students evaluated indicated that the measurement criteria was met. No changes in curriculum are needed.
268. Topics in Chemistry [CHEM-150] belonging to Chemistry [CHEM]

Plan for topic "Students completing the course will be able to develop and demonstrate appropriate lab techniques.": 2018/19

The department feels that measuring the melting point of a substance is an important laboratory technique that should be mastered by OChem students. As such, the department will recommend to all CHEM 226 instructors to allow students to repeat the measurements to improve on their skills of measuring melting point.

Plan for topic "Students completing the course will be able to develop chemical problem solving skills. Integrate multiple ideas in the problem solving process. Assessed topic: multistep reaction mechanisms." : 2018/19

Although our overall goal was met, the results of question (c) show that students need more practice identifying the difference between constitutional isomers and identical molecules. One instructor’s sections that did rather well on this question (79% correct). The instructor shared their pedagogical practices with the department and the department will encourage all CHEM 226 instructors to use these best practices. As such, we will work to improve the achievement on this outcome by spending time in class on practice problems similar to this when teaching about Newman projections, and then revisit this type of problem when teaching about nomenclature (giving students a useful suggestion to name the molecules - if they have the same name, they are identical!). To address the results for question (d) the department recommends giving to students more exposure and opportunities to practice converting wedge-and-dash structures to Fischer projections.

Plan for topic "Students completing CHEM-226 will be able to contrast the difference in reactivity of molecules based on bonding structure and acid-base properties and use this information to predict physical properties and reaction outcomes." : 2018/19

The concept of acid-base equilibrium is challenging, and question (b) was an especially difficult question. When looking at individual answers, we see that 85% of students chose a response that included NaH, so there is some useful knowledge there. Or maybe question (b) could be reworded to be more clear. The concept of acids and bases is introduced early in the semester and is revisited throughout the semester, but perhaps the fast pace of the semester and lack of review time (due to there being a condensed schedule and no official finals week) contributed to these low scores.

Plan for topic "Students completing this course will be able to interpret experimental data to identify an organic compound" : 2018/19

The department recommends that when this topic will be used in another assessment cycle, the wording of the question will be changed to improve clarity.

Plan for topic "Students completing the course will be able to develop and demonstrate appropriate lab techniques." : 2015/16

Goal met. No modifications needed.

Plan for topic "Students completing the course will be able to develop chemical problem solving skills. Integrate multiple ideas in the problem solving process. Assessed topic: multistep reaction mechanisms." : 2015/16

We feel there was sufficient coverage of chirality across the sections but that the strange wording for one of the three assessment questions skewed the data. When this topic is assessed again, we will revise the wording of the question to improve clarity and meet the goal.

Plan for topic "Students completing the course will be able to provide a correct name, given a structure, and to provide a correct structure for a compound given its correct name." : 2015/16
Plan for topic "Students completing the course will be able to explain how microscopic models predict macroscopic properties.": 2015/16

Four of the five sections underperformed on the question concerning basicity. The instructors feel that this was because we emphasized relationships in acidity but could have placed more emphasis on the relationship between the acidity of a compound and correlating basicity of the conjugate base. Instructors will be asked to place more emphasis on this relationship in their instruction on this topic.

Plan for topic "Students completing CHEM-226 will be able to contrast the difference in reactivity of molecules based on bonding structure and acid-base properties and use this information to predict physical properties and reaction outcomes.": 2015/16

Flow charts for acid/base extractions are requested regularly throughout the laboratory curriculum. While we did not meet the 65% target, we were just shy of the target. However, we did improve student performance from the previous assessment of this outcome. We believe that this is a challenging topic and that modifications to our instruction (requiring students to generate extraction procedure flowcharts as prelab assignments) have improved this skill. We will continue to make this analysis an emphasis in the laboratory curriculum.

Plan for topic "Students completing the course will be able to develop chemical problem solving skills. Integrate multiple ideas in the problem solving process. Assessed topic: multistep reaction mechanisms.": 2010/11

Although our goal was met, students performed poorly on the question where they were asked to identify the relationship between pairs of molecules. To address this problem, we are going to require students to purchase molecular model kits which will be used in several molecular modeling workshops.

Plan for topic "Students completing the course will be able to provide a correct name, given a structure, and to provide a correct
Plan for topic "Students completing the course will be able to explain how microscopic models predict macroscopic properties.": 2010/11

The separation of compounds based on solubility and acidity will be emphasized in both lecture and lab. Students will be required to draw flowcharts for these separations as part of pre-lab assignments. In lab, they will conduct hands-on experiments in which they use acid-base extraction to separate a mixture of compounds.

Plan for topic "Students completing the course will be able to develop and demonstrate appropriate lab techniques.": 2008/9

A. Goals met.

B. Between 2005 and 2008, the unknowns were carefully reevaluated. Substances consistently giving unusually difficult behavior for the allotted project time or which were determined to be originally impure were omitted and others were added. Student results greatly improved.

Plan for topic "Students completing the course will be able to develop chemical problem solving skills. Integrate multiple ideas in the problem solving process. Assessed topic: multistep reaction mechanisms.": 2008/9

Results used by instructors to ensure common standards and student progress in this course sequence.

Goals met.

Plan for topic "Students completing the course will be able to provide a correct name, given a structure, and to provide a correct structure for a compound given its correct name.": 2008/9

Goals met.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to differentiate between aromatic, anti-aromatic and nonaromatic compounds using structural analysis and to relate aromaticity to the acid-base properties of compounds.": 2018/19

To improve achievement for this topic, the department will emphasize the following to all OChem instructors at the beginning of each semester:

1. The department recommends to give students more exposure to a variety of examples that emphasize the differences between the hybridization of charged carbon atoms and charged heteroatoms like nitrogen and oxygen.

2. The department recommends to emphasize to students the implications of lone pair delocalization on the basic properties of a compound. If the lone pair is involved in aromaticity it will be significantly less likely to act as a base and form a bond with a proton.

3. The department recommends revisiting the acid-base properties of organic compounds in the context of aromaticity and stressing to students to always add a proton to a chemical species when a conjugate acid is to be formed.

Plan for topic "Students completing this course will be able to predict the major product of an electrophilic aromatic substitution on a substituted ring." : 2018/19

Because almost all students were successful in this learning outcome measurement, the department will recommend to continue to teach this topic with the level of depth currently used. Most instructors likely show the mechanism for this reaction and use the stability of the sigma complex intermediate to explain the regiochemistry of the product. This method of instruction should be maintained and continue to be monitored as successful in subsequent semesters.

Plan for topic "Students completing this course will be able to carry out a Friedel-Crafts acylation reaction, isolate, purify, and identify the product." : 2015/16

The department will recommend that instructors expose students to more examples of conflicting data that disagree with each other, and follow this exposure with a group discussion on how to draw conclusions from conflicting data. This discussion will help guide students in prioritizing use of data to determine a structure.

Plan for topic "Students completing the course will be able to develop and demonstrate appropriate lab techniques." : 2015/16

Earlier improvements to the lab and further removal of challenging compounds continued to help students be more successful. Goal met.

Plan for topic "Students completing the course will be able to demonstrate adequate overall preparation in this two semester organic chemistry course compared to comparable courses at other institutions." : 2015/16

Results from 2004, 2005, and 2008 suggested that we should raise our criteria from 50% of students get 50th percentile to 70% of our students should get greater than 50th percentile. Our results continued to show that our students are performing higher than the national average when assessed via a standardized exam, often substantially higher.

272. Student Instructional Assistant [CHEM-299] belonging to Chemistry [CHEM]

Plan for topic "Students completing this course will be able to apply vertical farming research to introductory chemistry": 2017/18

Will assess Chem 299 each time offered.

Plan for topic "Students completing this course will be able to assist the instructor by guiding students through the acquisition and interpretation of organic spectra.": 2015/16

Goal met. No modifications needed.

Plan for topic "Students completing this course will be able to develop problem-solving sessions and lead classroom discussion over lecture content.": 2015/16

Goal met. But in the future, I might provide the student a debriefing survey after each lecture that would allow them to give me better feedback on how the guest lecture went and make valuable suggestions for the student instructor and for me as the teacher.

Plan for topic "Students completing this course will be able to provide one-to-one instruction on laboratory procedures with students.": 2015/16

Goal met. No modifications needed. But based on the paper, I would say that I identified one area that should always be emphasized when we offer this course. I think my favorite reflection from Mike's paper was, "I think there is an obligation to be enthusiastic about what is being taught because it would be unreasonable to expect a student to be excited about learning something that I didn't appear excited to teach." If we teach aspiring teachers nothing else, we should teach them that they need to be passionate about the topics they teach to students. A lecture without passion rarely succeeds in improving student learning. I would recommend that this lesson always be incorporated when mentoring student instructors.
273. First Term Mandarin Chinese [CHIN-120] belonging to Foreign Language [CHIN]

Plan for topic "Students completing the course will be able to demonstrate correct pronunciation of official Chinese language.": 2018/19

The course will be accessed in 19/20

Plan for topic "Students completing the course will be able to apply basic Chinese grammar rules to writing.": 2015/16

Overall, we are satisfied with the results. However, there was a student who earned only 1 out of 5 points in the twice-a-week course, and there was one student in each course scoring only 2 points. After examining the results of those students, we learned that 3 of them didn’t complete the assignments of online listening exercise, and the student who earned 1 point didn’t pass the course.

We are going to using flash cards competition, classroom daily 5 minute’s conversation practice, and implement three stories reading comprehension exercises in class to improve students’ listening skills.

Plan for topic "Students completing the course will be able to carry out simple conversations in Chinese on a limited range of daily-life topics.": 2015/16

**274. Second Term Mandarin Chinese [CHIN-121] belonging to Foreign Language [CHIN]**

**Plan for topic "Students completing the course will be able to combine Chinese pronunciation and complicated words to make complex statements."**: 2016/17

Overall, we are satisfied with the results. There were only 2 students who earned a score of 3, one student earned a score of 2, and no student scored 1 or 0 point out of the 5 questions.

After discussing with other Chinese instructors, we decided to continue the routine of doing a fair amount of listening and oral practice in class. We will also increase practice time for online assignments, and daily 5 minute's conversation practice to improve students' listening skills.

**Plan for topic "Students completing the course will be able to describe aspects of Chinese culture."**: 2016/17

Overall, we are satisfied with the results. There were only 2 students who earned a score of 3, one student earned a score of 2, and no student scored 1 or 0 point out of the 5 questions.

After discussing with other Chinese instructors, we decided to continue the routine of doing a fair amount of listening and oral practice in class. We will also increase practice time for online assignments, and daily 5 minute's conversation practice to improve students' listening skills.

**Plan for topic "Students completing the course will be able to describe contemporary Chinese society."**: 2013/14

Students need more practice with pronunciation and listening skills. They also need more practice in conversation. New activities will be created.

**Plan for topic "Students completing the course will be able to read and communicate verbally in Chinese in daily situations."**: 2013/14

Students need more practice with pronunciation and listening skills. They also need more practice in conversation. New activities will be created.

**Plan for topic "Students completing the course will be able to describe contemporary Chinese society."**: 2011/12

Satisfied with results. We are planning to continue working on read and oral communication.

**Plan for topic "Students completing the course will be able to read and communicate verbally in Chinese in daily situations."**: 2011/12

Satisfied with results. We are planning to continue working on read and oral communication.

**Plan for topic "Students completing the course will be able to write Chinese at a novice-high level."**: 2011/12

Students need more work on read and write Chinese characters. When they remembered the words, they are doing very good job. We are planning to add more games to
assist students learning.

**Plan for topic "Students completing the course will be able to write a standard note."**: 2011/12

Students need more work on read and write Chinese characters. When they remembered the words, they are doing very good job. We are planning to add more games to assist students learning.

**Plan for topic "Students completing the course will be able to combine Chinese pronunciation and complicated words to make complex statements."**: 2011/12

Most students did well on the prepared topics, but some non-heritage students need more work on the detail information. We are planning to continue with the extensive use of language and tutorial labs to support our methods of instruction and add more on-line research to enhance students capability.

**Plan for topic "Students completing the course will be able to describe aspects of Chinese culture."**: 2009/10

Most students did well on the prepared topics, but some non-heritage students need more work on the detail information. We are planning to continue with the extensive use of language and tutorial labs to support our methods of instruction and add more on-line research to enhance students capability.

**Plan for topic "Students completing the course will be able to describe contemporary Chinese society."**: 2009/10

Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. We are also planning to add direct assessment in the next cycle.

**Plan for topic "Students completing the course will be able to read and communicate verbally in Chinese in daily situations."**: 2009/10

Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. We are also planning to add direct assessment in the next cycle.

Very satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. We are also planning to add direct assessment in the next cycle.
275. Topics in Chinese [CHIN-150] belonging to Foreign Language [CHIN]
276. Third Term Mandarin Chinese [CHIN-220] belonging to Foreign Language [CHIN]
Plan for topic "Students completing this course will be able to demonstrate listening comprehension."

": 2016/17
Overall, we are satisfied with the results. There was only 1 student who earned a score of 3 out of the 5 questions.

We will continue to assign listening and oral practice to students in class and as homework.

Plan for topic "Students completing CHIN-220 will be able to write intermediate level compositions comparing and contrasting Chinese cultures based on the analysis of articles, films and short stories." : 2013/14
I will focus on more writing practice.

Plan for topic "Students completing CHIN-220 will be able to achieve a greater knowledge of Chinese culture and literature through reading and analysis of short stories and articles on Chinese life and culture." : 2013/14
I will guide students to engage more in Chinese literature and culture.

Plan for topic "Students completing CHIN-220 will be able to interpret Chinese Tang Dynasty poems and culture." : 2013/14
I will do more interpretation training.

Plan for topic "Students completing CHIN-220 will be able to demonstrate an intermediate command of complement of time, quantity, and resultative construction." : 2013/14
I will use the same methods as before.

Plan for topic "Students completing the course will be able to participate in intermediate level conversations concerning daily situations." : 2011/12
Students demonstrated appropriate level. We will continue using the same teaching methods to achieve similar or better results.

Plan for topic "Students completing the course will be able to use given words to develop a paragraph." : 2011/12
Students demonstrated appropriate level. We will continue using the same teaching methods to achieve similar or better results.
Plan for topic "Students completing the course will be able to demonstrate an intermediate command of complement of time, quantity, and resultative construction." : 2011/12

Students demonstrated awareness of various aspects of Chinese society and culture.

Plan for topic "Students completing the course will be able to demonstrate reading comprehension of cultural selection." : 2011/12

Students demonstrated awareness of various aspects of Chinese society and culture.

Plan for topic "Students completing the course will be able to interpret Chinese Tang dynasty poems and culture." : 2011/12

Most students did well on the prepared speeches, but making the spontaneous conversation was more challenging for some non-heritage students. We will continue to practice conversation in the classroom as a part of the overall instruction to ensure the oral production is satisfactory.

Plan for topic "Students completing the course will be able to understand intermediate level conversation." : 2011/12

DVC Instructional Course SLO Action Plans

277. Fourth Term Mandarin Chinese [CHIN-221] belonging to Foreign Language [CHIN]
Plan for topic "Students completing this course will be able to discuss major historical events of China.": 2016/17
We are very satisfied with the results. We will continue to spend time in class to have students do listening and oral practice.

Plan for topic "Students completing CHIN-221 will be able to employ advanced level use of idioms and dialectical expressions.":: 2013/14
I will Guide students to engage more in Chinese literature and culture.

Plan for topic "Students completing CHIN-221 will be able to demonstrate advanced level written and spoken comprehension.":: 2013/14
I will use the same methods as before, practice more writing.

Plan for topic "Students completing CHIN-221 will be able to demonstrate appreciation of Chinese culture and literature.":: 2013/14
I will Use textbook as a foundation to introduce more Chinese culture.

Plan for topic "Students completing CHIN-221 will be able to discuss major historical events of China.":: 2013/14
I will use the same methods as before, giving more topics to encourage students to discuss.

Plan for topic "Students completing the course will be able to use of the Chinese word with an idioms and dialectical expressions.":: 2011/12
Students generally demonstrated oral competence. We will continue working on students' oral skills through extensive practice in the classroom and assigned presentations.

Plan for topic "Students completing the course will be able to create dialogues using the learned vocabulary, idioms and topics.":: 2011/12
Students generally demonstrated oral competence. We will continue working on students' oral skills through extensive practice in the classroom and assigned presentations.

Plan for topic "Students completing the course will be able to describe realistic aspects of life in China using complex sentences.":: 2011/12
Students did a very good job by applying the learned vocabulary and sentence patterns in the writing. We will continue to help students write short paragraphs and essays in the classroom.

Plan for topic "Students completing the course will be able to present a real-life situation in Chinese, and converse on topics of interest without preparation.":: 2011/12
Speeches were good. But a couple of students had some difficulty to do the spontaneous conversation. We will continue assigning cultural readings and presentations.

Plan for topic "Students completing the course will be able to comprehend a cultural reading.":: 2011/12
Speeches were good. But a couple of students had some difficulty to do the spontaneous conversation. We will continue assigning cultural readings and presentations.

Plan for topic "Students completing the course will be able to use of the Chinese word with an idioms and dialectical expressions."

2009/10

Satisfied with results. We plan to continue with the extensive use of language and tutorial labs to support our methods of instruction. We are also planning to add direct assessment in the next cycle.

Plan for topic "Students completing the course will be able to create dialogues using the learned vocabulary, idioms and topics."

2009/10

</tr>
</thead>
<tbody>
<tr>
<td>2014/15</td>
<td>We are very satisfied with the result. To write a 300 word Chinese essay is a big challenge. Writing such an essay and presenting it orally is a unique achievement. Our Chinese program will continue to support students to take independent study course and help them develop their skills to use Chinese language correctly and appropriately.</td>
</tr>
<tr>
<td>279. Student Instructional Assistant [CHIN-299] belonging to Foreign Language [CHIN]</td>
<td></td>
</tr>
</tbody>
</table>
| Plan for topic "Students completing this course will be able to write Chinese characters on the white board following teacher’s instructions, and practice effective classroom activities to help students write Chinese characters."

| 2017/18 |
| As an action plan, the Chinese program will keep holding the pre-class session meetings. It will also improve the students’ preparation curriculum by emphasizing their familiarization with the textbook and vocabulary presented in class. To strengthen their vocabulary knowledge, the program will encourage more practice from the 299 students in order to improve their performance in class. |

| 2014/15 |
| We are very satisfied with the results. To write Chinese characters at different levels correctly is very challenging, and our students achieved the skills. |

We will continue accepting Chin-299 students in our classrooms to help reinforce our teaching methods.

<tr>
<td>The faculty have determined that the current SLO assessment process based on achievement rubric is well developed but we feel we could gather better and more authentic data by embedding the assessments into current assignments. In addition, by embedding the assessments, we hope to increase the amount of data that is being gathered in each course/section. We are making this change because even moving the assessment tool from an outside location - SurveyMonkey - to the Canvas survey tool, we have noticed a significant drop-off on assessment completions.</td>
</tr>
</tbody>
</table>

To accomplish this embedding of SLO assessments, we will need to manually update each CIS course with the SLO's listed on the Course Outline of Record (COR). Currently, there is not an import or automated process for bulk uploading of course SLOs, so we are going to try and update each course manually.

Finally, since we are placing the assessment tool in Canvas it will be easier to require the completion of the SLO survey so as to have a better student response. The department currently assesses every class section offered but we have decided to only access courses during their cycles so that we can manually insert the COR SLOs as each class cycles for SLO assessment.
Plan for topic "Students completing the course will be able to explain the tools for networking a computer.": 2016/17

Course Level Action Plan:

Even though, this SLO had a drop off compared to the other 2 SLOs, the data sample was so small that the department does not feel the need to radically change anything at this time. In past history, this SLO has performed well and we look forward to review the SLO data as we transitions to a new assessment system.

We have developed a process for moving the assessment tool into Canvas, thus making it easier to require the completion of the SLO survey so as to have a better student response (see Department Level Action Plan below). We do not see anything in this data that needs to be addressed via program review. This data will be presented to our CTE advisory committee for their review and comment.

Plan for topic "Students completing the course will be able to demonstrate basic graphical user interface operations in the Windows environment": 2013/14

The faculty have determined that the current SLO assessments based on achievement rubric are well developed and we see no need to change the wording of the assessment tool. However, we have decided to incorporate a Pre and Post assessment for the class and move the assessment tool from Survey Monkey to the Survey tool in D2L. The assessment trend over the last 2 years has shown that this area is fairly consistent and so the department will look to replace these assessment topics during 2014/2015 academic year. Finally, since we are placing the assessment tool in D2L it will be easier to require the completion of the SLO survey so as to have a better student response. The department currently assesses every class section offered but we are discussing if we are going to continue this pattern in the future. We do not see anything in this data that needs to be addressed via program review. This data will be presented to our CTE advisory committee for their review and comment.

Plan for topic "Students completing the course will be able to demonstrate basic graphical user interface operations in the Windows environment": 2012/13

The faculty have determined that the current SLO assessments based on achievement rubric are well developed and we see no need to change the process. We had toyed with the idea of a Pre and Post assessment but decided to postpone that implementation until after the upgrade in software. The department has decided to re-assess this class since the version of the software will be updated during the Spring 2014 semester. Since the 2013/2014 academic year will see different versions of the software during Fall 2013 and then it will be upgraded in Spring 2014. We decided we will also assess during the 2014/2015 academic year. We decided since we have the assessment tools in
place, we should gather as much data as possible during this software transition and look for an impact on the SLOs. This class will be transitioning to the new Windows 8.1 software so the department decided to schedule this course for assessment during Spring 2013, Fall 2013 and Spring 2014.

Plan for topic "Students completing the course will be able to demonstrate basic graphical user interface operations in the Mac OS environment.": 2016/17

Course Level Action Plan:

We have developed a process for moving the assessment tool into Canvas, thus making it easier to require the completion of the SLO survey so as to have a better student response (see Department Level Action Plan below).

We do not see anything in this data that needs to be addressed via program review. This data will be presented to our CTE advisory committee for their review and comment.

Department Level Action Plan:

As is typical in CIS courses, we are constantly getting software updates and in this past academic year, this class had a major upgrade over the winter break. The department is consciously trying to use assessment topics that can bridge software updates but still allow us to assess core skills. We feel that we did this successfully for this course and will implement this process in other CIS courses.

The faculty have determined that the current SLO assessment process based on achievement rubric is well developed but we feel we could gather better and more authentic data by embedding the assessments into current assignments. In addition, by embedding the assessments, we hope to increase the amount of data that is being gathered in each course/section. We are making this change because even moving the assessment tool from an outside location - SurveyMonkey - to the Canvas survey tool, we have noticed a significate drop-off on assessment completions.
To accomplish this embedding of SLO assessments, we will need to manually update each CIS course with the SLO's listed on the Course Outline of Record (COR). Currently, there is not an import or automated process for bulk uploading of course SLOs, so we are going to try and update each course manually.

Finally, since we are placing the assessment tool in Canvas it will be easier to require the completion of the SLO survey so as to have a better student response. The department currently assesses every class section offered but we have decided to only access courses during their cycles so that we can manually insert the COR SLOs as each class cycles for SLO assessment.

**Plan for topic "Students completing the course will be able to establish a connection to the Internet.": 2016/17**

**Course Level Action Plan:**

We have developed a process for moving the assessment tool into Canvas, thus making it easier to require the completion of the SLO survey so as to have a better student response (see Department Level Action Plan below).

We do not see anything in this data that needs to be addressed via program review. This data will be presented to our CTE advisory committee for their review and comment.

**Department Level Action Plan:**

As is typical in CIS courses, we are constantly getting software updates and in this past academic year, this class had a major upgrade over the winter break. The department is consciously trying to use assessment topics that can bridge software updates but still allow us to assess core skills. We feel that we did this successfully for this course and will implement this process in other CIS courses.
The faculty have determined that the current SLO assessment process based on achievement rubric is well developed but we feel we could gather better and more authentic data by embedding the assessments into current assignments. In addition, by embedding the assessments, we hope to increase the amount of data that is being gathered in each course/section. We are making this change because even moving the assessment tool from an outside location - SurveyMonkey - to the Canvas survey tool, we have noticed a significant drop-off on assessment completions.

To accomplish this embedding of SLO assessments, we will need to manually update each CIS course with the SLO's listed on the Course Outline of Record (COR). Currently, there is not an import or automated process for bulk uploading of course SLOs, so we are going to try and update each course manually.

Finally, since we are placing the assessment tool in Canvas it will be easier to require the completion of the SLO survey so as to have a better student response. The department currently assesses every class section offered but we have decided to only access courses during their cycles so that we can manually insert the COR SLOs as each class cycles for SLO assessment.

Plan for topic "Students completing the course will be able to demonstrate basic graphical user interface operations in the Mac OS environment.": 2013/14

The faculty have determined that the current SLO assessments based on achievement rubric are well developed and we see no need to change the wording of the assessment tool. However, we have decided to incorporate a Pre and Post assessment for the class and move the assessment tool from Survey Monkey to the Survey tool in D2L. The assessment trend over the last 2 years has shown that this area is fairly consistent and so the department will look to replace these assessment topics during 2014/2015 academic year. Finally, since we are placing the assessment tool in D2L it will be easier to require the completion of the SLO survey so as to have a better student response. The department currently assesses every class section offered but we are discussing if we are going to continue this pattern in the future. We do not see anything in this data that needs to be addressed via program review. This data will be presented to our CTE advisory committee for their review and comment.

We decided we will also assess during the 2014/2015 academic year. We decided since we have the assessment tools in place, we should gather as much data as possible during this software transition and look for an impact on the SLOs. This class will be transitioning to the new DreamWeaver CC software so the department decided to schedule this course for assessment during Spring 2013, Fall 2013 and Spring 2014. The department feels that the inclusion of more targeted Troubleshooting Assignments has helped to further develop that skill set in the students. We are now looking to include a section on developing web sites for mobile devices. The department has decided to re-assess this class since these new course objectives, we hope, will be updated during the next Title 5 rewrite of the course. In reviewing the gathered data, it will then help us determine if we should add these additional components to the curriculum objectives. The department feels that it needs at least...
### DVC Instructional Course SLO Action Plans

#### Plan for topic "Students completing the course will be able to plan a website.": 2011/12
The faculty have determined that the current SLO assessments based on achievement rubric are well developed and we see no need to change the process. We are discussing possibly adding a pre assessment component to the existing system.

#### Plan for topic "Students completing the course will be able to design web pages.": 2011/12

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to utilize Dreamweaver's server behavior to connect to a database.": 2016/17

Course Level Action Plan:

We have developed a process for moving the assessment tool into Canvas, thus making it easier to require the completion of the SLO survey so as to have a better student response (see Department Level Action Plan below).

Even though, this SLO had a drop off compared to the other 2 SLOs, the data sample was so small that the department does not feel the need to radically change anything at this time. In past history, this SLO has performed well and we look forward to review the SLO data as we transitions to a new assessment system.

This course is going though a Title 5 rewrite to remove the need to use DreamWeaver as the authoring tool and it has been forwarded to the Curriculum Committee.

We do not see anything in this data that needs to be addressed via program review. This data will be presented to our CTE advisory committee for their review and comment.

Department Level Action Plan:

The faculty have determined that the current SLO assessment process based on achievement rubric is well developed but we feel we could gather better and more authentic data by embedding the assessments into current assignments. In addition, by embedding the assessments, we hope to increase the amount of data that is being gathered in each course/section. We are making this change because even moving the assessment tool from an outside location - SurveyMonkey - to the Canvas survey tool, we have noticed a significate drop-off on assessment completions.
To accomplish this embedding of SLO assessments, we will need to manually update each CIS course with the SLO's listed on the Course Outline of Record (COR). Currently, there is not an import or automated process for bulk uploading of course SLOs, so we are going to try and update each course manually.

Finally, since we are placing the assessment tool in Canvas it will be easier to require the completion of the SLO survey so as to have a better student response. The department currently assesses every class section offered but we have decided to only access courses during their cycles so that we can manually insert the COR SLOs as each class cycles for SLO assessment.

Plan for topic "Students completing the course will be able to utilize Dreamweaver's server behavior to connect to a database.": 2013/14

The faculty have determined that the current SLO assessments based on achievement rubric are well developed and we see no need to change the wording of the assessment tool. However, we have decided to incorporate a Pre and Post assessment for the class and move the assessment tool from Survey Monkey to the Survey tool in D2L. The assessment trend over the last 2 years has shown that this area is fairly consistent and so the department will look to replace these assessment topics during 2014/2015 academic year. Finally, since we are placing the assessment tool in D2L it will be easier to require the completion of the SLO survey so as to have a better student response. The department currently assesses every class section offered but we are discussing if we are going to continue this pattern in the future. We do not see anything in this data.

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to install WordPress on a server": 2016/17

Course Level Action Plan:

We have developed a process for moving the assessment tool into Canvas, thus making it easier to require the completion of the SLO survey so as to have a better student response (see Department Level Action Plan below).

This course is an advanced class as the assessment criteria is of a higher skill level compared to introduction level courses thus decline in certain performance criteria.

In SLO #1, the requirement to understand the installation process is critical but not the need for being able to technically complete the installation. Many server installations are handled by the IT staff. This SLO is really to make sure future WordPress authors have a basic understanding of that process.

We do not see anything in this data that needs to be addressed via program review. This data will be presented to our CTE advisory committee for their review and comment.

Department Level Action Plan:

The faculty have determined that the current SLO assessment process based on achievement rubric is well developed but we feel we could gather better and more authentic data by embedding the assessments into current assignments. In addition, by embedding the assessments, we hope to increase the amount of data that is being gathered in each course/section. We are making this change because even moving the assessment tool from an outside location - SurveyMonkey - to the Canvas survey tool, we have noticed a significant drop-off on assessment completions.

The department currently assesses every class section offered but we have decided to only access courses during their cycles so that we can manually insert the COR SLOs as each class cycles for SLO assessment.

Plan for topic "Students completing this course will be able to install user plugins in WordPress": 2016/17

Course Level Action Plan:

We have developed a process for moving the assessment tool into Canvas, thus making it easier to require the completion of the SLO survey so as to have a better student response (see Department Level Action Plan below).
This course is an advanced class as the assessment criteria is of a higher skill level compared to introduction level courses thus decline in certain performance criteria.

In SLO #3, the requirement to understand the use of plug-ins in WordPress is a critical concept. The use of plug-ins allows the web site content software to expand its capabilities to include functions like embedding forms, posting blogs, and utilizing shopping carts tools. The department, has decided to require that students use more plug-ins in various assignments so that the repetition helps solidify the creation process. The difficulty for the department is in finding plug-ins that are free and do not require an additional financial commitment by the student, but we will find some to some to utilize for our assignments.

We do not see anything in this data that needs to be addressed via program review. This data will be presented to our CTE advisory committee for their review and comment.

Department Level Action Plan:

The faculty have determined that the current SLO assessment process based on achievement rubric is well developed but we feel we could gather better and more authentic data by embedding the assessments into current assignments. Plan for topic "Students completing this course will be able to publish content using WordPress": 2014/15

The CIS department is changing the way we assess this class. The department will now use this existing self assessment as a pre-assessment given at the beginning of class. It will continue to use the final project rubric to evaluate the success of the SLO.
Course Level Action Plan:

We have developed a process for moving the assessment tool into Canvas, thus making it easier to require the completion of the SLO survey so as to have a better student response (see Department Level Action Plan below).

This course is an advanced class as the assessment criteria is of a higher skill level compared to introduction level courses thus decline in certain performance criteria.

In all the SLO Assessment Topics, we found them to be very strong during this and previous cycles, so the department will look at assessing 3 completely different topics during the next cycle.

As is typical in CIS courses, we are constantly getting software updates and in this past academic year, this class had a major software upgrade before the fall term. The department is consciously trying to use assessment topics that can bridge software updates but still allow us to assess core skills. We feel that we did this successfully for this course and will implement this process in other CIS courses.

We do not see anything in this data that needs to be addressed via program review. This data will be presented to our CTE advisory committee for their review and comment.

The faculty have determined that the current SLO assessments based on achievement rubric are well developed and we see no need to change the process. We had toyed with the idea of a Pre and Post assessment but decided to postpone that implementation until after the upgrade in software. The department has decided to re-assess this class since the version of the software will be updated during the Spring 2014 semester. Since the 2013/2014 academic year will see different versions of the software during Fall 2013 and then it will be upgraded in Spring 2014. We decided we will also assess during the 2014/2015 academic year. We decided since we have the assessment tools in place, we should gather as much data as possible during this software transition and look for an impact on the SLOs. This class will be transitioning to the new MS Word 2013 software so the department decided to schedule this course for assessment during Spring 2013, Fall 2013 and Spring 2014.
Plan for topic "Students completing the course will be able to create a mail merge." : 2013/14

The faculty have determined that the current SLO assessments based on achievement rubric are well developed and we see no need to change the process. We had toyed with the idea of a Pre and Post assessment but decided to postpone that implementation until after the upgrade in software. The department has decided to re-assess this class since the version of the software will be updated during the Spring 2014 semester. Course Level Action Plan:

We have developed a process for moving the assessment tool into Canvas, thus making it easier to require the completion of the SLO survey so as to have a better student response (see Department Level Action Plan below).

As in our CIS-115 MS Word course, in all the SLO Assessment Topics, we found them to be very strong during this and previous cycles, so the department will look at assessing 3 completely different topics during the next cycle.

As is typical in CIS courses, we are constantly getting software updates and in this past academic year, this class had a major software upgrade before the fall term. The department is consciously trying to use assessment topics that can bridge software updates but still allow us to assess core skills. We feel that we did this successfully for this course and will implement this process in other CIS courses.

We do not see anything in this data that needs to be addressed via program review. This data will be presented to our CTE advisory committee for their review and comment.

Department Level Action Plan:

The faculty have determined that the current SLO assessment process based on achievement rubric is well developed but we feel we could gather better and more authentic data by embedding the assessments into current assignments. In addition, by embedding the assessments, we hope to increase the amount of data that is being gathered in
DVC Instructional Course SLO Action Plans

Each course/section. We are making this change because even moving the assessment tool from an outside location - SurveyMonkey - to the Canvas survey tool, we have noticed a significant drop-off on assessment completions.

To accomplish this embedding of SLO assessments, we will need to manually update each CIS course with the SLO's listed on the Course Outline of Record (COR). Currently, there is not an import or automated process for bulk uploading of course SLOs, so we are going to try and update each course manually.

Finally, since we are placing the assessment tool in Canvas it will be easier to require the completion of the SLO survey so as to have a better student response. The department currently assesses every class section offered but we have decided to only access courses during their cycles so that we can manually insert the COR SLOs as each class cycles for SLO assessment.

### DVC Instructional Course SLO Action Plans

**Plan for topic "Students completing the course will be able to develop charts based on spreadsheet data."**: 2009/10

The bar is set fairly high for this outcome, since we are testing for "proficiency". Proficiency usually takes more practice than one can get in a 2-unit, 5-month course. Increase the number of student participants by making the survey a required assignment during finals week. So we feel that this is a good result. Results also confirm that all subjects are equally-well covered in the current curriculum, and that online sections do as well as face-to-face. The plan is to continue with the mix of offerings in the schedule.

We do not see anything in this data that needs to be addressed via program review. This data will be presented to our CTE advisory committee for their review and comment.
Department Level Action Plan:

The faculty have determined that the current SLO assessment process based on achievement rubric is well developed but we feel we could gather better and more authentic data by embedding the assessments into current assignments. In addition, by embedding the assessments, we hope to increase the amount of data that is being gathered in each course/section. We are making this change because even moving the assessment tool from an outside location - SurveyMonkey - to the Canvas survey tool, we have noticed a significant drop-off on assessment completions.

To accomplish this embedding of SLO assessments, we will need to manually update each CIS course with the SLO’s listed on the Course Outline of Record (COR). Currently, there is not an import or automated process for bulk uploading of course SLOs, so we are going to try and update each course manually.

Finally, since we are placing the assessment tool in Canvas it will be easier to require the completion of the SLO survey so as to have a better student response. The department currently assesses every class section offered but we have decided to only access courses during their cycles so that we can manually insert the COR SLOs as each class cycles for SLO assessment.

Plan for topic "Students completing the course will be able to develop a presentation." : 2013/14

The faculty have determined that the current SLO assessments based on achievement rubric are well developed and we see no need to change the process. We had toyed with the idea of a Pre and Post assessment but decided to postpone that implementation until after the upgrade in software. The department has decided to re-assess this class since the version of the software will be updated during the Spring 2014 semester. Since the 2013/2014 academic year will see different versions of the software during Fall 2013 and then it will be upgraded in Spring 2014. We decided we will also assess during the 2014/2015 academic year. We decided since we have the assessment tools in place, we should gather as much data as possible during this software transition and look for an impact on the SLOs. This class will be transitioning to the new MS PowerPoint 2013 software so the department decided to schedule this course for assessment during Spring 2013, Fall 2013 and Spring 2014.

The faculty have determined that the current SLO assessments based on achievement rubric are well developed and we see no need to change the process. We are discussing possibly adding a pre assessment component to the existing system.

Plan for topic "Students completing the course will be able to develop a presentation.":: 2010/11

2010-11-11: To increase the number of students participating in the survey, we will make it a required assignment during finals week. We feel that the results are valid but we will confirm that all objectives are equally-well covered in the current curriculum. The plan is to restate the current SLOs with more specifically targeted SLOs thus we will be better able to align the SLOs with the course objectives.

2012-01-06: Continue to assess every semester to get more feedback by requiring the survey to be completed during finals week. The department is considering a Pre-Assessment for CIS course using the Comsc and Speech areas model to be implemented in the 2012-2013 academic year.

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to design schedules.": 2016/17

Course Level Action Plan:

We have developed a process for moving the assessment tool into Canvas, thus making it easier to require the completion of the SLO survey so as to have a better student response (see Department Level Action Plan below).

This class generated the same number of successful student achievement (by the responding students) in all three SLOs. The SLOs accessed this term we found them to be very strong during this and previous assessment cycles. The department will look at assessing 3 completely different topics during the next cycle.

We do not see anything in this data that needs to be addressed via program review. This data will be presented to our CTE advisory committee for their review and comment.

Department Level Action Plan:

The faculty have determined that the current SLO assessment process based on achievement rubric is well developed but we feel we could gather better and more authentic data by embedding the assessments into current assignments. Plan for topic "Students completing the course will be able to design schedules.": 2014/15

The CIS department is changing the way we assess this class. The department will now use this existing self assessment as a pre-assessment given at the beginning of class. It will help determine the experience level of the class with the MS Outlook software. We will then use a rubric based assessment project to determine how well students can design schedules with the software as a final assessment.

Plan for topic "Students completing the course will be able to use the email features of Outlook.": 2014/15

In addition, we are attempting to increase the participation in our SLO survey by giving the students additional time to submit the survey.

Plan for topic "Students completing the course will be able to use Photoshop Element tools to enhance images.": 2009/10

The faculty have determined that the current SLO assessments based on achievement rubric are well developed and we see no need to change the process. We are discussing possibly adding a pre assessment component to the existing system. In addition, we are attempting to increase the participation in our SLO survey by giving the students additional time to submit the survey.

Plan for topic “Students completing the course will be able to create transition, effects, and titles to video clips”: 2016/17

Course Level Action Plan:

We have developed a process for moving the assessment tool into Canvas, thus making it easier to require the completion of the SLO survey so as to have a better student response (see Department Level Action Plan below).

Our CIS-132 Adobe Premiere course has had a new software version and we incorporated those changes into the current class. This course is only offered once a year thus it gives us time to updated any software changes.

The SLOs Assessment Topics are written to bridge the new software upgrades and be retroactive back to the previous version. The SLOs accessed this term we found them to be very strong during this and previous assessment cycles. The department will look at assessing 3 completely different topics during the next cycle.

We do not see anything in this data that needs to be addressed via program review. This data will be presented to our CTE advisory committee for their review and comment.

Department Level Action Plan:

The faculty have determined that the current SLO assessment process based on achievement rubric is well developed but we feel we could gather better and more authentic data by embedding the assessments into current assignments. In addition, by embedding the assessments, we hope to increase the amount of data that is being gathered in each course/section. We are making this change because even moving the assessment tool from an outside location - SurveyMonkey - to the Canvas survey tool, we have
noticed a significant drop-off on assessment completions.

To accomplish this embedding of SLO assessments, we will need to manually update each CIS course with the SLOs listed on the Course Outline of Record (COR). Currently, there is not an import or automated process for bulk uploading of course SLOs, so we are going to try and update each course manually.

Finally, since we are placing the assessment tool in Canvas it will be easier to require the completion of the SLO survey so as to have a better student response. The department currently assesses every class section offered but we have decided to only access courses during their cycles so that we can manually insert the COR SLOs as each class cycles for SLO assessment.

Plan for topic "Students completing the course will be able to produce video on DVDs and other digital formats": 2016/17

Course Level Action Plan:

We have developed a process for moving the assessment tool into Canvas, thus making it easier to require the completion of the SLO survey so as to have a better student response (see Department Level Action Plan below).

Plan for topic "Students completing the course will be able to create transition, effects, and titles to video clips": 2013/14

The faculty have determined that the current SLO assessments based on achievement rubric are well developed and we see no need to change the wording of the assessment tool. However, we have decided to incorporate a Pre and Post assessment for the class and move the assessment tool from Survey Monkey to the Survey tool in D2L. The assessment trend over the last 2 years has shown that this area is fairly consistent and so the department will look to replace these assessment topics during 2014/2015 academic year. Finally, since we are placing the assessment tool in D2L it will be easier to require the completion of the SLO survey so as to have a better student response. The department currently assesses every class section offered but we are discussing if we are going to continue this pattern in the future. We do not see anything in this data that needs to be addressed via program review. This data will be presented to our CTE advisory committee for their review and comment.

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to identify and connect network devices on a home or office local area network." : 2017/18

This course is an experimental course and has been processed and approved by the Curriculum Committee to become CIS-170 Networking for Non-IT Professionals. Further SLO Assessment will be done under that course number - CIS-170.

Plan for topic "CIS-150A - Students completing this course will be able to describe content management systems fundamentals." : 2014/15

The CIS department is changing the way we assess this class. The department will now use this existing self assessment as a pre-assessment given at the beginning of class. It will continue to use the final project rubric to evaluate the success of the SLO.

Plan for topic "CIS-150B - Students completing this course will be able to utilize the xcode development environment." : 2014/15

The CIS department is changing the way we assess this class. The department will now use this existing self assessment as a pre-assessment given at the beginning of class. It will continue to use the iOS project rubric to evaluate the success of the SLO.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to understand basic relational database concepts.": 2016/17

Course Level Action Plan:

We have developed a process for moving the assessment tool into Canvas, thus making it easier to require the completion of the SLO survey so as to have a better student response (see Department Level Action Plan below).

This class generated a wide range of success in (75% to 92%) successful student achievement (by the responding students) in all three SLOs. The SLOs accessed this term we found them to fluctuate from a strong (SLO 3) to an adequate level (75%) during these 2 assessment cycles. The department will look at what we can do to help boost student achievement in SLOs 1 & 2 and access 1 additional topic during the next cycle.

We do not see anything in this data that needs to be addressed via program review. This data will be presented to our CTE advisory committee for their review and comment.

Plan for topic "Students completing the course will be able to create queries to create a MySql database and tables."; 2013/14

The faculty have determined that the current SLO assessments based on achievement rubric are well developed and we see no need to change the process. We had toyed with the idea of a Pre and Post assessment but decided to postpone that implementation until after the upgrade in software. We might start using a different set of scripting tools in the class, so we decided since we have the assessment tools in place, we should gather as much data as possible during this transition and look for an impact on the SLOs. The department decided to schedule this course for assessment during Fall 2013 and Spring 2014.

### Plan for topic "Students completing this course will be able to describe types of networks."
- **2017/18**

The department has included this course as an elective in our CIS degree and this has boosted enrollment from SP18 to Fall 2018. The instructor has continued to develop new hands-on networking labs, which in turn has helped solidify learning objective in the class. The department will continue to assess this course for the next several years to verify that we are reaching our students. This information has been disseminated to all our CIS faculty and advisory board members.

### Plan for topic "Students completing this course will be able to select and install networking hardware"
- **2017/18**

The department has included this course as an elective in our CIS degree and this has boosted enrollment from SP18 to Fall 2018. The instructor has continued to develop new hands-on networking labs, which in turn has helped solidify learning objective in the class. The department will continue to assess this course for the next several years to verify that we are reaching our students. This information has been disseminated to all our CIS faculty and advisory board members.

### Plan for topic "Students completing this course will be able to configure network software."
- **2017/18**

The department has included this course as an elective in our CIS degree and this has boosted enrollment from SP18 to Fall 2018. The instructor has continued to develop new hands-on networking labs, which in turn has helped solidify learning objective in the class. The department will continue to assess this course for the next several years to verify that we are reaching our students. This information has been disseminated to all our CIS faculty and advisory board members.

### Plan for topic "Students completing this course will be able to connect to the internet."
- **2017/18**

The department has included this course as an elective in our CIS degree and this has boosted enrollment from SP18 to Fall 2018. The instructor has continued to develop new hands-on networking labs, which in turn has helped solidify learning objective in the class. The department will continue to assess this course for the next several years to verify that we are reaching our students. This information has been disseminated to all our CIS faculty and advisory board members.
Plan for topic "Students completing the course will be able to apply the principles of the Project Management Institute's (PMI) processes of project management.": 2016/17

Course Level Action Plan:

We have developed a process for moving the assessment tool into Canvas, thus making it easier to require the completion of the SLO survey so as to have a better student response (see Department Level Action Plan below).

Our CIS-180 Project Management PREP class has transitioned from a hybrid class to a 100% online class. We did see an increase in student enrollment in this new format, the course showed near equivalent success rates.

The SLOs accessed this term we found them to be very strong during this and previous assessment cycles. The department will look at assessing 4 completely different topics during the next cycle.

We do not see anything in this data that needs to be addressed via program review. This data will be presented to our CTE advisory committee for their review and comment.

Department Level Action Plan:

The faculty have determined that the current SLO assessment process based on achievement rubric is well developed but we feel we could gather better and more authentic data by embedding the assessments into current assignments. In addition, by embedding the assessments, we hope to increase the amount of data that is being gathered in
DVC Instructional Course SLO Action Plans

each course/section. We are making this change because even moving the assessment tool from an outside location - SurveyMonkey - to the Canvas survey tool, we have noticed a significant drop-off on assessment completions.

To accomplish this embedding of SLO assessments, we will need to manually update each CIS course with the SLO's listed on the Course Outline of Record (COR). Currently, there is not an import or automated process for bulk uploading of course SLOs, so we are going to try and update each course manually.

Finally, since we are placing the assessment tool in Canvas it will be easier to require the completion of the SLO survey so as to have a better student response. The department currently assesses every class section offered but we have decided to only access courses during their cycles so that we can manually insert the COR SLOs as each class cycles for SLO assessment.

Plan for topic "Students completing the course will be able to apply key formulas to scheduling, costing, estimating, and other problems.": 2016/17

Plan for topic "Students completing the course will be able to track projects using Gantt charts": 2017/18

A technical issue with a change in MS Project 2016 causes a majority of students to drop from the original 25 enrolled down to the 9 listed. The department recognizes that a change in software for this class is needed because of the restricted access to MS Project for our students.

Plan for topic "Students completing the course will be able to define a project plan": 2014/15

The CIS department is changing the way we assess this class (as we have in other CIS classes using Self-Assessment Achievement Rubrics). The department will now use this existing self assessment as a pre-assessment to be given at the beginning of class. It will help determine the experience level of the class with the Project Management concepts. We will then use a rubric based assessment project to determine how well students can define a project plan as a final assessment.

Plan for topic "Students completing the course will be able to define a project plan": 2011/12

The faculty have determined that the current SLO assessments based on achievement rubric are well developed and we see no need to change the process. We are discussing possibly adding a pre assessment component to the existing system. ## DVC Instructional Course SLO Action Plans

The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Fall 2018 term. The quiz questions and results will be discussed to modify the quizzes for data collection.

### Plan for topic "Students completing this course will be able to identify the basics of virtualization, desktop imaging, and deployment."

**2017/18**

The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Fall 2018 term. The quiz questions and results will be discussed to modify the quizzes for data collection.
Plan for topic "Students completing this course will be able to describe and differentiate the devices and services used to support communications in data networks and the Internet." : 2017/18
Will be assessed in Fall 2018 using Survey Monkey.

Plan for topic "Students completing this course will be able to describe the role of protocol layers in data networks." : 2017/18
The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Fall 2018 term. The quiz questions and results will be discussed to modify the quizzes for data collection.

Plan for topic "Students completing this course will be able to evaluate the importance of addressing and naming schemes at various layers of data networks in IPv4 and IPv6 environments." : 2017/18
The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Fall 2018 term. The quiz questions and results will be discussed to modify the quizzes for data collection.

Plan for topic "Students completing this course will be able to design, calculate, and apply subnet masks and addresses to fulfill given requirements in IPv4 and IPv6 networks." : 2017/18
The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Fall 2018 term. The quiz questions and results will be discussed to modify the quizzes for data collection.

Plan for topic "Students completing this course will be able to explain fundamental Ethernet concepts such as media, services, and operations." : 2017/18
The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Fall 2018 term. The quiz questions and results will be discussed to modify the quizzes for data collection.

Plan for topic "Students completing this course will be able to build a simple Ethernet network using routers and switches." : 2017/18
The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Fall 2018 term. The quiz questions and results will be discussed to modify the quizzes for data collection.

Plan for topic "Students completing this course will be able to compose Cisco command-line interface (CLI) commands to perform basic
router and switch configurations."": 2017/18

The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Fall 2018 term. The quiz questions and results will be discussed to modify the quizzes for data collection.
Plan for topic "Students completing the course will be able to describe the tasks involved in administrating and maintaining a Windows network [À NAÀ ] 2011/12": 2017/18
The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Fall 2018 term. The quiz questions and results will be discussed to modify the quizzes for data collection.

Plan for topic "Students completing the course will be able to secure a Windows network.": 2017/18
The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Fall 2018 term. The quiz questions and results will be discussed to modify the quizzes for data collection.

Plan for topic "Students completing the course will be able to describe the features of the common protocols used in Windows networking": 2017/18
The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Fall 2018 term. The quiz questions and results will be discussed to modify the quizzes for data collection.

Plan for topic "Students completing this course will be able to use windows tools for basic administration.": 2017/18
The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Fall 2018 term. The quiz questions and results will be discussed to modify the quizzes for data collection.
Plan for topic "Students completing the course will be able to describe the features of the common protocols used in Windows networking": 2012/13
Continue to have students work in pairs to complete the labs and deploy the subject protocols.

Plan for topic "Students completing the course will be able to describe the tasks involved in administrating and maintaining a Windows network [Â NAÂ ] 2011/12": 2011/12
Success numbers across the board were reduced by as much as 50%, yet I made no changes to the structure of the class. The only change that I note was changing the criteria from "agree" to "strongly agree". Obviously the numbers call for action, but I uncertain what to recommend other than go back to "agree"

Plan for topic "Students completing the course will be able to secure a Windows network.": 2011/12

## DVC Instructional Course SLO Action Plans

### Plan for topic "Students completing the course will be able to identify the concepts of the Active Directory directory service and its logical and physical structure." : 2009/10

- Affirmation and reinforcement of current methods and curriculum. Consider moving to an achievement matrix for next assessment.

### Plan for topic "Students completing the course will be able to implement Group Policy to centrally manage a network using Active Directory directory services." : 2009/10

- Affirmation and reinforcement of current methods and curriculum. Consider moving to an achievement matrix for next assessment.

### Plan for topic "Students completing the course will be able to install Active Directory on a computer running Windows Server and perform post-installation and maintenance tasks." : 2009/10

- Affirmation and reinforcement of current methods and curriculum. Consider moving to an achievement matrix for next assessment.
308. Routing and Switching Essentials [CNT-120] belonging to Computer Science [CNT]
Plan for topic "CNT 120 is scheduled for SLO assessment next time it is offered. This course was to be assessed in Fall 2017 and Spring 2018, but the course was canceled due to low enrollment on both terms.": 2019/20

The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Fall 2020 term. The results will be discussed to modify the project for data collection.
DVC Instructional Course SLO Action Plans

309. Introduction to Virtualization Technology [CNT-125] belonging to Computer Science [CNT]

Plan for topic "Students completing the course will be able to implement a virtual environment using VMWare.": 2017/18

The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Spring 2019 term. The quiz questions and results will be discussed to modify the quizzes for data collection.

Plan for topic "Students completing the course will be able to install and configure Microsoft HyperV.": 2017/18

The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Spring 2019 term. The quiz questions and results will be discussed to modify the quizzes for data collection.

Plan for topic "Students completing the course will be able to install and configure VMWare VSphere.": 2017/18

The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Spring 2019 term. The quiz questions and results will be discussed to modify the quizzes for data collection.

Plan for topic "Students completing the course will be able to implement a virtual environment using VMWare.": 2014/15

The last time this course was offered, 2012/13, CNT did not collect any assessment data for any of its courses. It is on the SP16 schedule. The CS dept chair Robert Burns will contact Vonberg directly to impress upon him the need to conduct pre and post assessments in January and May.
The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Fall 2019 term. The quiz questions and results will be discussed to modify the quiz for data collection.
Plan for topic "This course has not been offered yet": 2019/20

The results will be discussed and analyzed by CNT faculty in CNT faculty meeting before Fall 2020 term. The results will be discussed to modify the project for data collection.

### Plan for topic "This course has not been offered yet.": 2019/20

CNT 149 was offered in Spring 2020 and was canceled due to low enrollment. It will be offered in Spring 2021 and the data will be collected then.
314. Topics in Computer Networking [CNT-150] belonging to Computer Science [CNT]

Plan for topic "Students completing 150VT will be able to..."

1. list and explain the tasks involved in installing and configuring various virtual environments.

2. explain the differences between storage area networks and network-attached storage.

3. install and configure Microsoft HYPERV.": 2018/19

The results will be discussed and analyzed by CNT faculty in CNT faculty meeting. The survey questions and results will be discussed to modify for data collection. CNT plans to create a formal course from this experimental course.

Plan for topic "Students completing 150VT will be able to..."

1. list and explain the tasks involved in installing and configuring various virtual environments.

2. explain the differences between storage area networks and network-attached storage.

3. install and configure Microsoft HYPERV.": 2017/18

This is an experimental course created in Spring 2017 and offered once in Summer 2018.

A survey with questions mapping to SLOs will be administered in Summer 2019 when the course is scheduled to be offered.

Plan for topic "Students completing 150VT will be able to..."

1. list and explain the tasks involved in installing and configuring various virtual environments.

2. explain the differences between storage area networks and network-attached storage.

3. install and configure Microsoft HYPERV.": 2015/16

DVC Instructional Course SLO Action Plans

316. Connecting Networks [CNT-220] belonging to Computer Science [CNT]
DVC Instructional Course SLO Action Plans

317. Internship in Occupational Work Experience Education in CNT [CNT-296] belonging to Computer Science [CNT]
DVC Instructional Course SLO Action Plans

318. Public Speaking [COMM-120] belonging to Communication Studies [COMM]

Plan for topic "Students completing COMM-120 will be able to After completing this course students will be able to identify and effectively use primary and quality secondary sources (academic and journalistic) to support ideas.": 2016/17

The results showed that a significant number of the 247 students who, while overall successful in meeting the SLO criteria for success, did miss the same question on the quiz which leads the department to believe that the question was poorly worded. The instructors whose class results were largely successful had implemented techniques such as PowerPoint, lecture, activities, worksheets, and trips to the library for presentations on source credibility and types of sources.

Instructors whose classes were for the most part unsuccessful in meeting the SLO criteria for this topic acknowledged that much more time in class needed to be spent on this topic with more direct instruction and practice in identifying primary vs. secondary sources. Utilizing the Library and its Learning Success Workshops were also mentioned as valuable tools in helping to increase student success with this learning objective. Instructors who limited the coverage of this topic to one lecture found that this was not sufficient in achieving a successful learning outcome for the majority of their students.

As a plan of action the department will encourage instructors to use the library resources be they handouts or presentations/workshops put on by librarians to augment the lecture they give on this particular topic. Resources, such as assignments and activities, reinforcing this SLO will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

Plan for topic "Students completing COMM-120 will be able to After completing this course students will be able to support an idea using presentation aids correctly and confidently.": 2013/14

The Department feels that the results of this assessment confirm what we have long believed which is the poor technology in the PAC classrooms negatively impact student learning and success with this course learning objective, if not completely prevents it from being achieved. Therefore as our plan moving forward, the department will be pursuing a quality media set up in each of our classrooms that is consistently maintained and supported by the college. In addition, the Department will be creating a new assessment topic for the next time this course is up for assessment that will enable the department to provide data that supports not only the Program Level Outcomes for our AA-T degree in Comm Studies but also the General Education Learning Outcomes with which our courses are aligned. One of our goals stated in our action plan the last time this course was assessed is to make an effort to assess sections offered in the Spring, not just the Fall semesters. We did that with this assessment and will continue to do so in the future.

Plan for topic "Students completing the course will be able to demonstrate confidence when presenting a public speech." : 2011/12

The department is pleased with the results and like knowing what students find most helpful in improving their confidence in giving a speech. While the pre- and post-test was illuminating, it was decided that we would not assess in this method again due to the expense of the scantrons. The department has decided that we will assess a different objective topic the next time this course is assessed.
Plan for topic "Students completing the course will be able to identify a variety of organizational structures that are used in public speeches."

**2011/12**

The department feels that we are doing a consistent, quality job of teaching organizational structure in the Speech 120 class. Our plan is to assess a different learning outcome the next time this course is due for assessment.

Plan for topic "Students completing the course will be able to effectively construct an outline a speech."

**2011/12**

The department feels that we are doing a good job of teaching outlining skills and will focus on a different learning outcome the next time this course comes due for assessment.

Plan for topic "Students completing the course will be able to demonstrate confidence when presenting a public speech."

**2007/8**

1a. Inform instructors of the notable improvement in student confidence. Instructors may use this for recruiting students to the class and for encouraging students to complete the course.

1b. Inform instructors of this positive finding.

Plan for topic "Students completing the course will be able to identify a variety of organizational structures that are used in public speeches."

**2007/8**

2a. Inform instructors of this positive finding.

2b. Distribute information on Monroe's theory of persuasion to all instructors. Encourage them to teach it, if they are not currently doing so.

Plan for topic "Students completing the course will be able to effectively construct an outline a speech."

**2007/8**

3a. Inform instructors of this finding and encourage them to teach more about speech conclusions. This was done 1/10/08 in a department meeting.

3b. Inform instructors of this positive finding. This was done 1/10/08 in a department meeting.
Plan for topic "Students completing the course will be able to classify sources as either primary or secondary.": 2016/17

The instructors teaching these sections felt that more time in class needed to be spent on the concept of Toulmin, particularly in helping students learn to identify the warrant in an argument. One instructor also noted that there was a substantial amount of time between when the concept of Toulmin's Model was taught and when the exam occurred and that also may have contributed to students not being successful in answering the exam questions.

It is recommended going forward that more in-class lecture and activities be devoted to this concept and more timely assessment be implemented to keep the concepts fresh in the students' minds.

Plan for topic "Students completing the course will be able to implement the Toulmin Model (claim, data, warrant) into a persuasive speech.": 2016/17

The instructors teaching these sections felt that more time in class needed to be spent on the concept of Toulmin, particularly in helping students learn to identify the warrant in an argument. One instructor also noted that there was a substantial amount of time between when the concept of Toulmin's Model was taught and when the exam occurred and that also may have contributed to students not being successful in answering the exam questions.

It is recommended going forward that more in-class lecture and activities be devoted to this concept and more timely assessment be implemented to keep the concepts fresh in the students' minds.

Plan for topic "Students completing the course will be able to identify the components of Schwartz’s Perspective on Media Usage.": 2016/17

The instructors whose sections were assessed felt that the combination of time spent in class on this topic (at least one full week) and the use of PowerPoint, small group activities, assigned reading, handouts and exam review sheets all helped students be successful with this learning objective.

The plan going forward is for these instructors to share their materials, activities and examples with other faculty in the department that are currently or will be in the future, teaching this class in order to ensure continued and consistent success.

Plan for topic "Students completing the course will be able to recognize and define 3 different types of logical fallacies.": 2016/17

The instructors whose sections were assessed felt that the combination of time spent in class on this topic (at least one full week) and the use of PowerPoint, small group
activities, assigned reading, handouts and exam review sheets all helped students be successful with this learning objective.

The plan going forward is for these instructors to share their materials, activities and examples with other faculty in the department that are currently or will be in the future, teaching this class in order to ensure continued and consistent success.

Plan for topic "Students completing the course will be able to identify inductive and deductive arguments.": 2013/14

The department is pleased with the results of this learning objective and feel that we are doing a good job in teaching this important skill. The department plans on continuing its methods of teaching outlining for persuasive speeches and will create a new assessment topic for this course that touches on a different learning objective for the next time this course is up for assessment.

Plan for topic "Students completing the course will be able to construct an outline for a persuasive speech.": 2013/14

The department is pleased with the results of this learning objective and feel that we are doing a good job in teaching this important skill. The department plans on continuing its methods of teaching outlining for persuasive speeches and will create a new assessment topic for this course that touches on a different learning objective for the next time this course is up for assessment.

Plan for topic "Students completing the course will be able to classify sources as either primary or secondary.": 2013/14

In reflecting on the results the department feels that students would benefit from more in-class examples, handouts and lecture on this topic. One instructor noted the new textbook that was used didn't do a very good job of covering the Toulmin Model and not enough classroom instruction was devoted to argument deconstruction. It was also surmised that multiple-choice questions were perhaps not the most accurate way to assess this topic and a stronger assessment method will be developed for the next time this course is assessed. Instructors will also spend more class time reviewing the Toulmin Model and reinforce the instruction with handouts and activities.

Plan for topic "Students completing the course will be able to implement the Toulmin Model (claim, data, warrant) into a persuasive speech.": 2013/14

In reflecting on the results the department feels that students would benefit from more in-class examples, handouts and lecture on this topic. It was also surmised that multiple-choice questions were perhaps not the most accurate way to assess this topic and a stronger assessment method will be developed for the next time this course is assessed. Instructors will also spend more class time reviewing the Toulmin Model and reinforce the instruction with handouts and activities.

Plan for topic "Students completing the course will be able to identify the components of Schwartz’s Perspective on Media Usage.": 2013/14

In both the exam questions and the activity, the small number of students who did not achieve this learning objective were believed to have missed class the day that topic was taught. The plan is to integrate a take-home worksheet on fallacies as a points earning assignment so that even students who miss the classroom lecture will have motivation to
Plan for topic "Students completing the course will be able to recognize and define 3 different types of logical fallacies.": 2013/14

In both the exam questions and the activity, the small number of students who did not achieve this learning objective were believed to have missed class the day that topic was taught. The plan is to integrate a take-home worksheet on fallacies as a points earning assignment so that even students who miss the classroom lecture will have motivation to learn the material.

Plan for topic "Students completing the course will be able to construct an outline for a persuasive speech.": 2011/12

The department is satisfied with this result and feels that the instruction given in class on outlining, as well as the supplemental materials such as the text and example outline handouts, contribute to this positive result. The department will work on obtaining a broader sample when conducting the assessment of this class in the future.

Plan for topic "Students completing the course will be able to construct an outline for a persuasive speech.": 2011/12

While this result meets the criteria for success set by the department, we wish to see a higher percentage of students who understand and can implement this core concept. Greater emphasis will be placed on teaching the Toulmin Model in Speech 121 as well as increased class activities and worksheets allowing students to practice with the technique to better be able to incorporate it into their work.

Plan for topic "Students completing the course will be able to implement the Toulmin Model (claim, data, warrant) into a persuasive speech.": 2011/12

While this result meets the criteria for success set by the department, we wish to see a higher percentage of students who understand and can implement this core concept. Greater emphasis will be placed on teaching the Toulmin Model in Speech 121 as well as increased class activities and worksheets allowing students to practice with the technique to better be able to incorporate it into their work.

Plan for topic "Students completing the course will be able to recognize and define 3 different types of logical fallacies.": 2011/12

The department is satisfied with these results and will continue to approach the teaching of logical fallacies in the same way. The department will try for a broader sample the next time this course is up for assessment.

Plan for topic "Students completing the course will be able to identify the components of Schwartz's Perspective on Media Usage.": 2011/12

The department is satisfied with these results and will continue to approach the teaching of logical fallacies in the same way. The department will try for a broader sample the next time this course is up for assessment.

Plan for topic "Students completing the course will be able to construct an outline for a persuasive speech.": 2010/11
The department is satisfied with these results and feels that the instruction and handouts given in class are providing students with sufficient guidance in how to properly construct an outline. The department will discuss a more uniform approach to data collection so a wider range of course sections are represented in the assessment.

**Plan for topic "Students completing the course will be able to identify inductive and deductive arguments."**: 2010/11

The department is satisfied with these results and feels that the instruction and handouts given in class are providing students with sufficient guidance in how to properly construct an outline. The department will discuss a more uniform approach to data collection so a wider range of course sections are represented in the assessment.

**Plan for topic "Students completing the course will be able to implement the Toulmin Model (claim, data, warrant) into a persuasive speech."**: 2010/11

The department is satisfied with these results. A discussion of an easier method of data collection will be held to enable the department to generate a more diverse sample of data.

**Plan for topic "Students completing the course will be able to classify sources as either primary or secondary."**: 2010/11

The department is satisfied with these results. A discussion of an easier method of data collection will be held to enable the department to generate a more diverse sample of data.

**Plan for topic "Students completing the course will be able to implement the Toulmin Model (claim, data, warrant) into a persuasive speech."**: 2010/11

The department is satisfied with these results. A discussion of an easier method of data collection will be held to enable the department to generate a more diverse sample of data.

**Plan for topic "Students completing the course will be able to classify sources as either primary or secondary."**: 2010/11

The department is satisfied with these results. A discussion of an easier method of data collection will be held to enable the department to generate a more diverse sample of data.

**Plan for topic "Students completing the course will be able to classify sources as either primary or secondary."**: 2007/8

Inform instructors of this finding. Done on 2/5/08.

**Plan for topic "Students completing the course will be able to construct an outline for a persuasive speech."**: 2007/8

Inform instructors of this finding. Done on 2/5/08.

**Plan for topic "Students completing the course will be able to classify sources as either primary or secondary."**: 2007/8

Inform instructors of this finding. Done on 2/5/08.

**Plan for topic "Students completing the course will be able to implement the Toulmin Model (claim, data, warrant) into a persuasive speech."**: 2007/8

Inform instructors of this finding. Done on 2/5/08.

DVC Instructional Course SLO Action Plans

320. Argumentation and Debate [COMM-123] belonging to Communication Studies [COMM]

Plan for topic "Students completing the course will be able to evaluate evidence used in arguments.":: 2018/19

Overall, the instructor was happy with the results. In the fall the instructor reports that students were successful because of this assignment. It is a smaller assignment that helps to scaffold the larger debate assignment. Before breaking it down the overall debate assignment into smaller assignment the quality of evidence might have gotten lost amongst the other requirements of the debate, but with a specific research analysis assignment students have to focus on the quality of their evidence. In the Spring, the instructor reports success because he spends a significant amount of time on the importance of research analysis and make the students complete similar assignments multiple times to understand the importance of evaluation of evidence. For those who did not succeed, many either never turned in the assignment or turned it in late for a penalty. That skewed the data some. Going forward this deep focus on evidence analysis should continue.

Plan for topic "Students completing the course will be able to identify inductive and deductive reasoning.":: 2015/16

The course will integrate more real world applications of argument classification to help move students from learning the key terms to being able to apply them to actual examples.

Plan for topic "Students completing the course will be able to express confidence when presenting a public, oral argument.":: 2011/12

Students did very well on the confidence measure for SLO#1. After the class, the students ranked their self confidence in delivering speeches significantly higher than before. This improvement is probably due to the number of speeches delivered in the class, something that will be continued or increased in future semesters.

Plan for topic "Students completing the course will be able to evaluate evidence used in arguments.":: 2011/12

On SLO #2, students scored well on some questions about evidence and not as well on others. An activity on how to create an effective survey may help improve the scores and it will be implemented in future semesters.

Plan for topic "Students completing the course will be able to identify inductive and deductive reasoning.":: 2011/12

On SLO#3, students scored well on the questions about inductive reasoning and worse on the ones about deductive. For Spring, 2012 a new textbook was used in the class that paid a lot more attention to this issue compared to the old textbook. The new book in addition to the new activities from the book on reasoning will hopefully improve the outcomes on this issue.

Plan for topic "Students completing the course will be able to express confidence when presenting a public, oral argument.":: 2007/8

May 2008

a. Inform speech area of the findings. Recommend continuing current practices.

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to demonstrate an understanding of speech physiology.": 2016/17

The instructor feels that the longer class time that a once-a-week class schedule permits allows for individual attention and feedback that would be impossible in two shorter sessions. That being said, if students miss one class they have, in effect, missed 2 class sessions. The two students who did not meet the SLO standards for this topic were those who had missed two or more classes. The instructor feels that the high demand of the course, due to the fact that it is part of the Comm Studies degree, is enough to support 2 or more sections each semester. This will keep class sizes low enough to ensure continued success.

Plan for topic "Students completing the course will be able to perform breathing exercises and vocal warm ups.": 2016/17

The instructor feels that the longer class time that a once-a-week class schedule permits allows for individual attention and feedback that would be impossible in two shorter sessions. That being said, if students miss one class they have, in effect, missed 2 class sessions. The two students who did not meet the SLO standards for this topic were those who had missed two or more classes. The instructor feels that the high demand of the course, due to the fact that it is part of the Comm Studies degree, is enough to support 2 or more sections each semester. This will keep class sizes low enough to ensure continued success.

Plan for topic "Students completing the course will be able to perform vocal strength, resonance, vocal variety, and articulation exercises.": 2016/17

The instructor feels that the longer class time that a once-a-week class schedule permits allows for individual attention and feedback that would be impossible in two shorter sessions. That being said, if students miss one class they have, in effect, missed 2 class sessions. The two students who did not meet the SLO standards for this topic were those who had missed two or more classes. The instructor feels that the high demand of the course, due to the fact that it is part of the Comm Studies degree, is enough to support 2 or more sections each semester. This will keep class sizes low enough to ensure continued success.

Plan for topic "Students completing the course will be able to demonstrate an understanding of speech physiology.": 2013/14

Reason for success: the physiology related to Speech is covered very early in the semester and is reinforced on an ongoing basis throughout the course. The instructor is pleased with this result and will continue this practice in future semesters. An assessment of this course is planned for the following academic year when more than one section will be offered to determine if students will continue to be successful with this particular learning outcome.

Plan for topic "Students completing the course will be able to perform breathing exercises and vocal warm ups.": 2013/14

Students are taught correct breathing and vocal warm up techniques at the beginning of the semester; they practice them at every class session and are tested regularly on them throughout the course. The instructor feels that the results indicate this method of instruction regarding this student learning outcome is the reason for such a high percentage of success. The plan is to continue this approach when teaching the course in the future. An assessment of this course is planned for the following academic year when more than one section will be offered to determine if students will continue to be successful with this particular learning outcome.

Plan for topic "Students completing the course will be able to perform vocal strength, resonance, vocal variety, and articulation exercises.": 2013/14

Course Action Plans
Outcome Assessment History

Page 629 of 2394
Exercises are done in a building block sequence. Students start with breathing techniques and building vocal strength, which allows them to improve and develop their resonance, articulation and vocal variety. The instructor is pleased with the success rate and feels it is evidence of how this approach to teaching these skills is effective. This approach will be continued into future semesters. An assessment of this course is planned for the following academic year when more than one section will be offered to determine if students will continue to be successful with this particular learning outcome.

Plan for topic "Students completing the course will be able to demonstrate an understanding of speech physiology.": 2011/12

DVC Instructional Course SLO Action Plans

322. Intercultural Communication [COMM-125] belonging to Communication Studies [COMM]
Plan for topic "Students completing this course will be able to identify how different cultural contexts shape communication behaviors.": 2018/19

The instructor reports that the results were okay, but not spectacular. Perhaps more discussion of this vocabulary in the future would help more students to grasp the concepts. He also think this topic should be reassessed with a new instructor. He believes he is the only instructor who has ever assessed it. While there was another instructor teaching this concept, this instructor did not assess the correct SLO for the Spring. As a result, for the next round of assessments we will make sure professors better communicate about what SLO they are assessing before and during the process.

Plan for topic "Students completing this course will be able to demonstrate the role of social constructionism in the relationship between culture and communication.": 2015/16

This is the first time this course was offered and assessed. It also had low enrollment. Therefore, this assessment topic will be assessed again, ideally with a larger class size and a new instructor, to see if the outcomes are significant.
DVC Instructional Course SLO Action Plans

323. Interpersonal Communication [COMM-128] belonging to Communication Studies [COMM]

Plan for topic "Students completing this course will be able to identify and explain the effect of communication on personal identities.": 2016/17

The success rate on this SLO is high. The department feels that the formula for success was a combination of class lecture, activity and a final exam study guide.

The department is disappointed in the low response rate of the faculty who were teaching 128 in the Fall 2016 semester and who were directed to assess their students on this topic. The department will make more effort to communicate with and impress upon the faculty the need to comply with requests for SLO assessment.

Plan for topic "Students completing the course will be able to identify effective and ineffective listening behaviors.": 2013/14

The Department is satisfied with the results and will develop a different learning outcome topic for the next time this course is assessed. Particular attention will be paid to how the data from assessing this course supports the Program level Learning Outcomes and the General Education-level Learning Outcomes in creating new topics for assessment.

Plan for topic "Students completing the course will be able to identify and analyze individual interpersonal communication strengths and weaknesses.": 2013/14

The Department is satisfied with the results and will develop a different learning outcome topic for the next time this course is assessed. Particular attention will be paid to how the data from assessing this course supports the Program level Learning Outcomes and the General Education-level Learning Outcomes in creating new topics for assessment.

Plan for topic "Students completing the course will be able to identify the possible outcomes when resolving conflict.": 2013/14

The Department is satisfied with the results and will develop a different learning outcome topic for the next time this course is assessed. Particular attention will be paid to how the data from assessing this course supports the Program level Learning Outcomes and the General Education-level Learning Outcomes in creating new topics for assessment.

Plan for topic "Students completing the course will be able to demonstrate knowledge of basic principles and concepts of interpersonal communication.": 2013/14

The department feels that the results of this assessment are satisfactory but it was noted that while 95% of students met the learning objective of the impact of self-disclosure on interpersonal relationships, the students did not comment to this relationship on the exam which failed to specifically ask about that relationship. It is recommended that an exam question be included to assess knowledge of the interconnections among these concepts.

Plan for topic "Students completing the course will be able to identify the positive ways self disclosure impacts interpersonal relationships.": 2013/14

The department feels that the results of this assessment are satisfactory but it was noted that while 95% of students met the learning objective of the impact of self-disclosure on interpersonal relationships, the students did not comment to this relationship on the exam which failed to specifically ask about that relationship. It is recommended that an exam question be included to assess knowledge of the interconnections among these concepts.

Plan for topic "Students completing the course will be able to identify effective and ineffective listening behaviors.": 2011/12
It seems that the in-class activities are effective in having students apply the techniques of active listening. However, the ability to correctly answer test questions needs improvement. It is recommended that more time be spent going over terminology and definitions to better prepare students for exam questions on this SLO.

Plan for topic "Students completing the course will be able to identify the possible outcomes when resolving conflict.": 2011/12
The department is satisfied that the students have successfully achieved this learning outcome and will continue to have students apply the concepts and theories learned in class directly to their own lives.

Plan for topic "Students completing the course will be able to identify and analyze individual interpersonal communication strengths and weaknesses.": 2011/12
The department is satisfied that the students have successfully achieved this learning outcome and will continue to have students apply the concepts and theories learned in class directly to their own lives.

Plan for topic "Students completing the course will be able to identify the positive ways self disclosure impacts interpersonal relationships.": 2011/12
The department is pleased with this result and feels that students readily understand this concept and its implications for their relationships. We will discuss assessing a different student learning objective the next time this course is up for assessment.

Plan for topic "Students completing the course will be able to demonstrate knowledge of basic principles and concepts of interpersonal communication.": 2011/12
The department is pleased with this result and feels that students readily understand this concept and its implications for their relationships. We will discuss assessing a different student learning objective the next time this course is up for assessment.

Plan for topic "Students completing the course will be able to identify effective and ineffective listening behaviors.": 2010/11
The department is satisfied with the results of this assessment. The department will discuss the possibility of changing the assessment method to an activity or project-based method. This will

Course Action Plans

### DVC Instructional Course SLO Action Plans

Enable students to demonstrate a deeper understanding of self-disclosure's impact and apply the concept to their own lives.

**Plan for topic "Students completing the course will be able to identify the positive ways self disclosure impacts interpersonal relationships."**: 2010/11

The department is satisfied with these results. The department will discuss the possibility of changing the assessment method to an activity or project-based method. This will enable students to demonstrate a deeper understanding of self-disclosure's impact and apply the concept to their own lives.

**Plan for topic "Students completing the course will be able to identify effective and ineffective listening behaviors."**: 2009/10

The department feels that this is a good result and the results also confirm that all subjects are equally-well covered in the three sections surveyed. In assessing this SLO the department realized the learning objective is too broad and vague. Our action plan is to revise the SLO to be more specific about the types of listening skills we wish students to learn.

**Plan for topic "Students completing the course will be able to identify and analyze individual interpersonal communication strengths and weaknesses."**: 2009/10

The department feels that this is a good result and the results also confirm that all subjects are equally-well covered in the three sections surveyed. In assessing this SLO the department realized the learning objective is too broad and vague. Our action plan is to revise the SLO to be more specific.

**Plan for topic "Students completing the course will be able to identify the possible outcomes when resolving conflict."**: 2009/10

The department feels that this is a good result and the results also confirm that all subjects are equally-well covered in the three sections surveyed. In assessing this SLO the department realized the learning objective is too broad and vague. Our action plan is to revise the SLO to be more specific.

**Plan for topic "Students completing the course will be able to identify the positive ways self disclosure impacts interpersonal relationships."**: 2009/10

The department feels that this is a good result and the results also confirm that all subjects are equally-well covered in the three sections surveyed. In assessing this SLO the department realized the learning objective is too broad and vague. Our action plan is to revise the SLO to be more specific.

**Plan for topic "Students completing the course will be able to demonstrate knowledge of basic principles and concepts of interpersonal communication."**: 2009/10

The department feels that this is a good result and the results also confirm that all subjects are equally-well covered in the three sections surveyed. In assessing this SLO the department realized the learning objective is too broad and vague. Our action plan is to revise the SLO to be more specific.
## 324. Small Group Communication [COMM-130] belonging to Communication Studies [COMM]

### Plan for topic "Students completing the course will be able to understand the process and importance of norm creation in groups."

#### 2018/19

| The results show that a significant number of students taking the assessment, 136, were successful in meeting the SLO criteria. Our department attributes this success to the variety of strategies used to teach this criteria. While all three instructors report lecturing on norms, all do some activity such as the social activity group project or the “Perfect Society” game which allows students to apply the concepts from lecture. |
| All three instructors also attributed this success to the appropriate amount of time allocated to teaching the concepts as well as having a discussion activity. Based on the multiple strategies instructors used, it is clear they are also assessing multiple learning styles and achieving success with this learning outcome. As a result, for our next SLO assessment we will move onto a new topic. |

### Plan for topic "Students completing the course will be able to describe reasons why people join groups."

#### 2015/16

| The department feels that the results show students are successfully learning this SLO topic. Instructors feel that having students explore why they join groups followed by lecture on what the research reveals is an effective method for teaching this SLO. |
| One suggestion was to have effective online resources that allow students to meet online in small groups outside of class such as Zoom and Google Docs. |
| The department feels that we can move off of this particular topic and focus on a different learning outcome for the next time this course is to be assessed. |

### Plan for topic "Students completing the course will be able to analyze the advantages and disadvantages of working in groups."

#### 2015/16

| The department feels that success rates are high with this particular topic. |
| The department will choose a different learning objective to assess next time we review this course. |

### Plan for topic "Students completing the course will be able to understand the process and importance of norm creation in groups."

#### 2012/13

| Almost all students were able to identify the definition of a norm, but were less successful at picking the example of what a norm was. Action plan to improve: Instructor will give more examples along with the definition. In class activity will be added to the course to help students identify norms. A study guide for the final exam may help here as well. |
### DVC Instructional Course SLO Action Plans

**Plan for topic "Students completing the course will be able to describe reasons why people join groups."**: 2010/11

Students could generate reasons why people join small groups with great effectiveness as shown in question 3, but they did not do well on the first two questions that used terms and theories from the class that were on the same issue. Action plan to improve: instructor will work to teach the key terms and explain how the reasons the students self-generated were actually the same concepts as the course terms. Instructor will use a study guide for the final exam that may assist students in learning the terms.

**Plan for topic "Students completing the course will be able to analyze the advantages and disadvantages of working in groups."**: 2010/11

Students performed well on this objective in that they could identify positive and negative aspects of group-work. Action plan to improve: continue to focus on the issue in class by connecting the self evaluation papers students write to the issue.

**Plan for topic "Students completing the course will be able to understand the process and importance of norm creation in groups."**: 2010/11

Students were able to identify the definition of a norm, but were less successful at picking the example of what a norm was. Action plan to improve: Instructor will give more examples along with the definition. In class activity will be added to the course to help students identify norms.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to identify poetic forms.": 2016/17

Assessment topic #1 was successful due to the instructor’s emphasis on self-reflection and growth. It is critical to create an environment in which students are open to taking risks, failing or succeeding, and exploring their performance abilities. With this growth mindset in place, students can then develop stronger performance choices and reflect on their performance choices. The action plan going forward for improvement is to schedule more one on one time with students outside of class. Students could better utilize the speech team room as well as office hours for specific work on their performances.

Plan for topic "Students completing the course will be able to demonstrate confidence when performing a piece of literature.": 2016/17

Assessment topic #1 was successful due to the instructor’s emphasis on self-reflection and growth. It is critical to create an environment in which students are open to taking risks, failing or succeeding, and exploring their performance abilities. With this growth mindset in place, students can then develop stronger performance choices and reflect on their performance choices. The action plan going forward for improvement is to schedule more one on one time with students outside of class. Students could better utilize the speech team room as well as office hours for specific work on their performances.

Plan for topic "Students completing the course will be able to apply critical and aesthetic principles to the evaluation of literature.": 2016/17

Assessment topic #2 was successful due to the instructor’s range of assignments and lecture/discussion of literary genre. Much attention is paid to the differences between each literary genre and how that is manifested in their performances. Lecture, video, discussion, performance and critique all contribute to student understanding of the differences of literary genre throughout the semester. Continuing development of traditional formative and summative assessments such as quizzes and essays that compare and contrast the various forms of literature in the course will be added to the class in the future.

Plan for topic "Students completing the course will be able to demonstrate the ability to identify and distinguish different literary genres.": 2016/17

Assessment topic #2 was successful due to the instructor’s range of assignments and lecture/discussion of literary genre. Much attention is paid to the differences between each literary genre and how that is manifested in their performances. Lecture, video, discussion, performance and critique all contribute to student understanding of the differences of literary genre throughout the semester. Continuing development of traditional formative and summative assessments such as quizzes and essays that compare and contrast the various forms of literature in the course will be added to the class in the future.

Plan for topic "Students completing the course will be able to apply principles of criticism to the oral performance of literature.": 2016/17

Assessment topic #3 was successful due to the course assignments and class time dedicated to critique and reflection. Since this course is a performance workshop, the instructor schedules structured workshop time for students to receive and give feedback to students as well as written assignments that allow students to reflect on their performance choices. The action plan going forward is the use of video recording for in and out of class critique of performances.

Plan for topic "Students completing the course will be able to demonstrate confidence when performing a piece of literature.": 2013/14
DVC Instructional Course SLO Action Plans

Reassess all SLO topics again the next time this course is up for assessment, ideally with a different instructor to see if findings stand up and are significant. Reword SLO topic #1 from "demonstrate confidence when performing a piece of literature" to "demonstrate improved confidence when performing a piece of literature." Some students walk into the class with confidence, so the word "improved" would help to better focus on the effectiveness of the instruction.

Plan for topic "Students completing the course will be able to identify poetic forms.": 2013/14

Reassess all SLO topics again the next time this course is up for assessment, ideally with a different instructor to see if findings stand up and are significant. Reword SLO topic #1 from "demonstrate confidence when performing a piece of literature" to "demonstrate improved confidence when performing a piece of literature." Some students walk into the class with confidence, so the word "improved" would help to better focus on the effectiveness of the instruction.

Plan for topic "Students completing the course will be able to apply critical and aesthetic principles to the evaluation of literature.": 2013/14

Reassess all SLO topics for this course the next time it comes up for assessment, ideally with a different instructor to see if findings stand up and are significant.

Plan for topic "Students completing the course will be able to demonstrate the ability to identify and distinguish different literary genres.": 2013/14

Reassess all SLO topics for this course the next time it comes up for assessment, ideally with a different instructor to see if findings stand up and are significant.

Plan for topic "Students completing the course will be able to apply principles of criticism to the oral performance of literature.": 2013/14

Reassess this SLO topic for this course the next time it comes up for assessment, ideally with a different instructor to see if findings stand up and are significant.

Plan for topic "Students completing the course will be able to demonstrate confidence when performing a piece of literature.": 2010/11

The instructor is pleased with the results and will continue to emphasize rehearsal and frequent performance in order to maintain this result in future classes.

Plan for topic "Students completing the course will be able to identify poetic forms.": 2010/11

The instructor is pleased with the results and will continue to emphasize rehearsal and frequent performance in order to maintain this result in future classes.

Plan for topic "Students completing the course will be able to demonstrate the ability to identify and distinguish different literary genres.": 2010/11

The instructor believes the range of assignments and class lectures on literary genres contributed to the success of this outcome and will continue to focus on these areas in future classes.

Plan for topic "Students completing the course will be able to apply critical and aesthetic principles to the evaluation of literature.": 2010/11

The instructor believes the range of assignments and class lectures on literary genres contributed to the success of this outcome and will continue to focus on these areas in future classes.

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing COMM-163 will be able to Demonstrate improved speaking confidence and effectiveness.": 2018/19

Our program maintains a positive team culture which focuses on camaraderie and a growth mindset; for example, before every round we have vocal and physical warm ups which help decrease anxiety. Our coaching staff has standards for tournament competition which must be met before students can attend a competition; this prevents students from having a negative experience which would harm their self-confidence. The reward system, length of competition, as well competitive experience at a tournament allows students to desensitize themselves round to round, thus decreasing their communication apprehension and building confidence. In order to improve for the future, we can have more explicit discussions about stress and anxiety.

Plan for topic "Students completing COMM-163 will be able to Effectively use academic research in support of a forensics event.": 2018/19

Successful due to instructor expertise and rigor of competition. Students have weekly meetings to work on their event type. During debate practices students participate in practice debates, review lecture, video, key concepts, and critical deliberation strategies which directly apply to tournament competition. At tournaments before each round of debate, students prepare as a group applying the strategies learned in lecture in an authentic competitive environment. For future: Offer less events and focus on key growth areas. There are 3 forms of debate, and 11 different speaking events in speech & debate. This is difficult to organize and hard to coach.

Plan for topic "Students completing COMM-163 will be able to Apply the principles of criticism to the performance of a forensics event.": 2018/19

Successful in that we require every student, regardless of their unit count, to attend at least one tournament. This means every student has an authentic competitive experience allowing them to apply their knowledge. We attend 5 to 7 tournaments a semester which gives students multiple opportunities to work around their schedule to compete. For future: We can host a tournament on campus at DVC which would give students with traveling restrictions an easy opportunity to compete on our campus. Note: we did plan on having a tournament this Fall but it was cancelled due to the Camp Fire.

Plan for topic "Students completing COMM-163 will be able to Demonstrate improved speaking confidence and effectiveness.": 2014/15

This topic should be reassessed soon. As this is the first time the department has used these topics, the sample size is very small and the findings are not yet that significant. For topic #1, there should be an emphasis on getting students to tournaments sooner in the semester. Those who failed to meet topic #1 were those who put off attending a tournament until the end of the semester. As a result of this procrastination they did not achieve the improved speaking confidence and effectiveness that others who, did attend a tournament early in the semester, achieved.

Plan for topic "Students completing COMM-163 will be able to Effectively use academic research in support of a forensics event.": 2014/15

This is the first time offering this course and since the sample population is small, consisting of members of the DVC Forensics Team, the department plans to assess this course again in the very near future. The department has recently hired a new full time Assistant Director of Forensics and will be interested to see the impact of more full time
### DVC Instructional Course SLO Action Plans

Plan for topic "Students completing COMM-163 will be able to Apply the principles of criticism to the performance of a forensics event."

2014/15

This is the first time offering this course and since the sample population is small, consisting of members of the DVC Forensics Team, the department plans to assess this course again in the very near future. The department has recently hired a new full time Assistant Director of Forensics and will be interested to see the impact of more full time faculty involved in the Forensics program on student success.
328. Introduction to Communication Theory [COMM-180] belonging to Communication Studies [COMM]
Plan for topic "Students completing this course will be able to identify several methods of research that are used in the field of communication.": 2016/17

Questions embedded in the final exam showed that students overwhelmingly understood that theory making is an important and evolving part of the communication field. However, scores were much lower when students were asked specific questions about type of methodologies that are used in the field.

Action Plan: When this class is taught again in fall 2017, an additional assignment will be added to the class to teach more about methodological processes used in research.

Plan for topic "Students completing this course will be able to identify basic concepts in the general field of communication": 2016/17

Embedded questions in the final exam illustrate that students are understanding basic concepts in the field of communication, including the communication process model and culture creation.

Action Plan: Since this class was almost entirely composed of COMM Studies majors, the department should feel good that they understand the basics of the field. In the future, this class should continue to reinforce these key concepts.

The next time the course is assessed this SLO topic should be refined so as not to be so broad.

Plan for topic "Students completing this course will be able to compare and contrast between specializations within the discipline": 2016/17

When assessing this objective next time, the instructor needs to use a different method. Since 10 of the students ended up skipping this question, the results are not as clear as they could be. On the positive side, the students who did complete the question were ones who needed the points and of those 93% of them could accurately compare and contrast two specializations in the field.
I feel like Comm 299 was a success for the TA student and for me as the instructor. The TA student and I feel like we do not need to change a thing about the course. The TA student improved his own communication skills by having the responsibility of formally critiquing students work both verbally and in writing.

Plan for topic “Students completing this course will be able to increase knowledge of public speaking writing, organization and delivery skills through mentoring and evaluating students in class.”: 2015/16

The department feels that giving Teaching Assistants the responsibility of formally critiquing students both verbally and in writing improves their ability to discern and articulate key elements in the speech giving process. This approach will be continued in future offerings of this course. Given that 299 usually enrolls one or two students per section, more assessment data will be needed to confirm the effectiveness of this approach.
Plan for topic "Students completing this course will be able to identify the components of a desktop computer, including the motherboard, drives, CPU, fans, RAM, and power supply.": 2018/19

There was an increase in the success rate from the pre-survey to the post-survey for all six assessment topics in both Fall 2018 and Spring 2019. However, the post-survey success rates for assessment topic #2 (Students completing the course will be able to create a Python program that includes decisions (if statements)) and assessment topic #6 (Students completing this course will be able to identify the major components of a network, including internet switches, home routers, wireless access points, and WIFI adapters.) were lower compared to the post-survey success rates for the other four assessment topics. For assessment topic #6, instructors should consider giving more examples and/or assignments related to networking, and students may need more clarification and examples on the differences between routers vs switches and MAC addresses vs IP addresses. For assessment topic #2, instructors should consider giving their students in-class coding exercises in addition to their programming assignments/homework; having the students do small coding exercises during lecture helps to develop their skills and confidence with programming, and gives them the opportunity to apply what they are learning in real-time during lecture. In addition to this, students may also need more instruction/examples on if statements in general and how they are used to make decisions and branch within the program.

Plan for topic "Students completing the course will be able to create a Python program that includes decisions ("if" statements).": 2018/19

We discussed why any student would not reach highest achievement. It was noted that some students are not well prepared for COMSC 110 -- some have trouble with basic math and logic skills that we expect them to have. MATH 090 (Elementary Algebra, formerly MATH 110) is already a prerequisite. Staff to consider if MATH-120 (Intermediate Algebra) should become the prerequisite instead. It was noted that some students are taking 100 and 110 at the same time, and without completing 100 (a recommended for 110) they may not be well prepared for 110. It was noted that students sometimes expect that they will earn a good grade just by showing up for class each day in order to earn a good grade. It was suggested that 110 students be directed to take the "you might be a programmer if" assessment for which there is a link on the department home page, www.dvc.edu/academics/mcsd/computer-science, to make sure they know what they will be getting into. It was suggested to put the MasterMind video and the Rock-scissor-paper exercise on the textbook's website www.rdb3.com/cpp.

### Plan for topic "Students completing the course will be able to write programs that have subprograms (i.e., "functions" or "methods") with parameter (or "argument") lists.": 2012/13

Results do demonstrate that learning is taking place. Results are consistent with past cycles, even though the dept COMSC 110 website is not widely used anymore, and instructors are pretty much on their own to design their curriculum. We see no reason to change that.

### Plan for topic "Students completing the course will be able to write programs that apply arrays.": 2012/13

Results do demonstrate that learning is taking place. Results are consistent with past cycles, even though the dept COMSC 110 website is not widely used anymore, and instructors are pretty much on their own to design their curriculum. The drop off in summer results needs to be confirmed, so this course will be assessed again next summer (2014).

### Plan for topic "Students completing the course will be able to write programs that use constructs of sequence, selection (ifs), and iteration (loops).": 2011/12

Results demonstrate that learning is taking place. To help validate the assessment tool, we might consider whether to include a placebo question in the ISSA surveys as a control group.

### Plan for topic "Students completing the course will be able to write programs that have subprograms (i.e., "functions" or "methods") with parameter (or "argument") lists.": 2011/12

Results demonstrate that learning is taking place. To help validate the assessment tool, we might consider whether to include a placebo question in the ISSA surveys as a control group.

### Plan for topic "Students completing the course will be able to write programs that apply arrays.": 2011/12

Results demonstrate that learning is taking place. To help validate the assessment tool, we might consider whether to include a placebo question in the ISSA surveys as a control group.

### Plan for topic "Students completing the course will be able to write programs that use constructs of sequence, selection (ifs), and iteration (loops).": 2010/11

Continue teaching from Burns textbook. Start encouraging instructors to use the dept COMSC 110 website and its class materials.

### Plan for topic "Students completing the course will be able to write programs that have subprograms (i.e., "functions" or "methods") with parameter (or "argument") lists.": 2010/11
### Plan for topic "Students completing the course will be able to write programs that apply arrays."

- **2010/11**
  - Continue teaching from Burns textbook. Start encouraging instructors to use the dept COMSC 110 website and its class materials. Start doing pre- and post-test self-evaluations, to get a better measure of learning over the semester.

- **2009/10**
  - Affirmation and reinforcement of current methods and curriculum, and better consistency among sections after faculty started considering the results of their own SLO surveys from previous semesters. Action plan is to continue with the face-to-face vs online mix, the variety of instructors, and the DVC-faculty-written textbook.

### Plan for topic "Students completing the course will be able to write programs that use constructs of sequence, selection (ifs), and iteration (loops)."

- **2009/10**
  - Functions continue to be a tough subject, as evidenced by somewhat lower student achievement compared to the other outcomes. The chapter on functions is covered in 2 weeks vs one for all other chapters, to accommodate this. The next edition of the book could cover this subject better, with more examples. Action plan is to continue with the face-to-face vs online mix, the variety of instructors, and the DVC-faculty-written textbook.

### Plan for topic "Students completing the course will be able to write programs that have subprograms (i.e., "functions" or "methods") with parameter (or "argument") lists."

- **2009/10**
  - Much improved achievement in another tough conceptual area, after previous semesters' results showed room for improvement. Affirmation and reinforcement of current methods and curriculum. Action plan is to continue with the face-to-face vs online mix, the variety of instructors, and the DVC-faculty-written textbook.

### Course Action Plans

- **09-07-21**: Affirmation and reinforcement of current methods and curriculum, but pay closer attention to dropping non-participating students from the roster.
- **09-10-12**: Affirmation and reinforcement of current methods and curriculum, but stronger results for some instructors that others. Instructors directed to consider their own SLO survey results prior to FA09, and results to be discussed in peer reviews.

### Outcome Assessment History

- **09-08-27**: Affirmation and reinforcement of current methods and curriculum.
- **10-01-29**: Affirmation and reinforcement of current methods and curriculum, but stronger results for some instructors that others. Instructors directed to consider their own SLO survey results prior to FA09, and results to be discussed in peer reviews.

Plan for topic "Students completing the course will be able to create and maintain database objects - tables, views, indexes and constraints." 2017/18

Only 6 students completed the pre survey and 4 students completed the post survey, so conclusions that can be drawn from the data are very limited. In future semesters, instructors should place a much greater emphasis on having students complete both the pre and post surveys. The results indicate that at the beginning of the semester, none of the students that took the survey felt confident about any of the topics related to the SLOs', which is likely because they did not have any prior experience with these topics. At the end of the semester, the majority of the students that completed the post survey (3/4) indicated that they were very confident with the topics related to the three SLOs that were assessed.

Plan for topic "Students completing the course will be able to manipulate data in a database by using DML and DDL commands: create, alter, drop, rename, truncate, update, delete and insert." 2017/18

Plan for topic "Students completing the course will be able to create and maintain database objects - tables, views, indexes and constraints." 2014/15

Per cognos, 17 were enrolled in this course at the end. But only 3 completed the survey -- totally inconclusive results. The next time this is offered (FA16?) the CS dept chair Robert Burns at the time of scheduling will impress upon the instructor (Steve Youn?). Committing to doing so will be a condition of accepting the teaching assignment.

- Data has never been collected for 150i, and it will likely not be offered again as a 150.
- There are no more 150's planned at this time, but the next time one is offered, it WILL be assessed by the CS department.
- This course was a scaled down version of COMSC-110X, to fix in the FTEFs available to the department. It seems to have worked well, so we will continue to schedule experimental courses like this one.

Plan for topic "Students completing the course will be able to define a "struct" and create struct-based objects." : 2014/15
Find out what the SP/SU instructors did, because it worked better that what the FA's did...

Plan for topic "Students completing the course will be able to work with sequential (TXT text) and random access (DAT binary) files." : 2014/15
Find ways to include more file I/O. Use the animal program to emphasize binary I/O. Use opportunities for text file input instead of console.

Plan for topic "Students completing the course will be able to work with pointers and create a linked list." : 2014/15
Focus on linked structure assignments. Find better book that covers pointers better.

Plan for topic "Students completing the course will be able to define a "struct" and create struct-based objects." : 2013/14
This is a primary skill in 165, and everything depends on it. It's hard to get through this course without high achievement in this area. Really nothing to say here in terms of a plan, but it's a good topic to check, because it serves as a control for the other topics.

Plan for topic "Students completing the course will be able to work with sequential (TXT text) and random access (DAT binary) files.":
DVC Instructional Course SLO Action Plans

2013/14

Action plan is to make sure 165 instructors include assignments that require binary file I/O.

Plan for topic "Students completing the course will be able to work with pointers and create a linked list."
Since pointers and linked lists are the primary focus of 165, we should (a) make sure we continue to provide supplementary materials on linked lists, (b) look for more and better sources of materials on linked lists, and (c) see if we can get printed versions of supplementary materials in the bookstore for students.

Plan for topic "Students completing the course will be able to define a "struct" and create struct-based objects."
It seems like this should be a lot closer to 100% because it is such a pervasive element throughout the whole last half of the semester. It may be that the question is not worded well. It should be modernized to speak of "struct" and "objects" because we refer to them that way in the course materials.

Plan for topic "Students completing the course will be able to work with sequential (TXT text) and random access (DAT binary) files."
The results confirm that learning took place. But results could be better. We need to make sure that our course materials cover both text file IO and binary, with enough opportunities in lab work for students to become comfortable with files.

Plan for topic "Students completing the course will be able to work with pointers and create a linked list."
A higher percentage of students should be able to answer this one in the affirmative -- too many describe themselves as needing help in order to do this. But the results do vary quite a bit by instructor, so the department needs to make sure that all instructors have the proper emphasis on this topic in their curriculum.

Plan for topic "Students completing the course will be able to define a "struct" and create struct-based objects."
Results demonstrate that learning is taking place. To help validate the assessment tool, we might consider whether to include a placebo question in the ISSA surveys as a control group.

Plan for topic "Students completing the course will be able to work with sequential (TXT text) and random access (DAT binary) files."
Results demonstrate that learning is taking place. To help validate the assessment tool, we might consider whether to include a placebo question in the ISSA surveys as a control group.

## DVC Instructional Course SLO Action Plans

### Plan for topic "Students completing the course will be able to operate a standard UNIX shell (bash or ksh).": 2017/18

The sample size (20 and 8, respectively, for post SP17 and SP18 surveys) is much smaller than in the past (a more typical value is over 30). This undermines the validity of the data somewhat, but overall suggests a need to increase focus on this SLO in the course. As the department has had a change in leadership since the last assessment, the next step is to review the current course content and identify any changes needed to add more coverage of this SLO, and implement a plan to increase the number of respondents to the survey.

### Plan for topic "Students completing the course will be able to find and understand UNIX documentation.".: 2017/18

The 'post' surveys suffer from small sample sizes, which undermines the validity of the data somewhat. The SP2018 numbers suggest a positive trend, but more data is needed. The action plan is to work with the instructor to ensure that more students respond to the "after" survey, and to review the course content and identify what is responsible for the positive difference between SP2017 and SP2018 (or is it due to a smaller sample size) and identify any additional emphasis needed for this SLO in the curriculum. This also may reflect the increased availability of Internet resources for documentation.

### Plan for topic "Students completing the course will be able to edit text files on a UNIX system.".: 2017/18

This assessment also suffers from a very low "post" sample size, especially for SP2018. The action plan is to work with the instructor to ensure more students are taking the post-course assessment, and identify what additional assignments or exercises could improve the results, such as adding an explicit assignment for learning more than one text editor. It may be the case that the actual results vary considerably due to the small sample size, this will be assessed.

### Plan for topic "Students completing the course will be able to operate a standard UNIX shell (bash or ksh).": 2014/15

This course started with 71 enrolled and ended with 32. Better turnout for the pre and post surveys is needed, and the CS dept chair needs to discuss with the instructor Stuart Fogg about the receipt at the end of the survey so that Fogg can expect students to send receipts to him.

### Plan for topic "Students completing the course will be able to find and understand UNIX documentation.".: 2014/15

The previous plan to give "an explicit assignment to research some command" seems to have had a positive effect, but there is still room for improvement. The plan is to put more emphasis on such assignments and use them multiple times throughout the semester.

### Plan for topic "Students completing the course will be able to edit text files on a UNIX system.".: 2014/15

About the same results as 3 years ago, so the action plan did not seem to have much of an effect. The CS dept chair is to find out from the instructor Stuart Fogg how the plan was implemented.

### Plan for topic "Students completing the course will be able to operate a standard UNIX shell (bash or ksh).": 2011/12

In general, happy with the results, which is a bit of a surprise since that's one of the more difficult aspects of the class.

### Plan for topic "Students completing the course will be able to find and understand UNIX documentation.".: 2011/12

In general, happy with the results. The numbers look good for fall 2011, not as good for spring 2012. Didn't change anything there so not sure why the results differ. Will
### Plan for topic "Students completing the course will be able to edit text files on a UNIX system.": 2011/12

This outcome represents just basic understanding. The numbers aren't bad (82% and 75% top two responses) but show room for improvement. Ask the students to study just one editor (either vi or emacs), which explains the smaller number of top responses. Consider asking the students to explicitly edit something other than their programs (possibly their documentation research) mentioned above.

### Plan for topic "Students completing the course will be able to operate a standard UNIX shell (bash or ksh).": 2010/11

Happy with the improvement shown after instructor reviewed these results. But not real pleased with the level of participation in the survey. Will try pre- and post-testing to make students more aware of the survey and SLOs.

### Plan for topic "Students completing the course will be able to find and understand UNIX documentation." : 2010/11

Not real pleased with the level of participation in the survey. Will try pre- and post-testing to make students more aware of the survey and SLOs.

### Plan for topic "Students completing the course will be able to edit text files on a UNIX system.": 2010/11

Not real pleased with the level of participation in the survey. Will try pre- and post-testing to make students more aware of the survey and SLOs.

### Plan for topic "Students completing the course will be able to operate a standard UNIX shell (bash or ksh).": 2009/10

Overcame drop-off noted in previous semester's results. Satisfied with the student achievement of this outcome. Plan is to continue Comsc 171 with the instructor and facilities as in previous semesters, and consider offering Comsc 172 with the same instructor and facilities, as budget permits.

### Plan for topic "Students completing the course will be able to find and understand UNIX documentation." : 2009/10

A bit better data than in previous semester's results. Satisfied with the student achievement of this outcome. Plan is to continue Comsc 171 with the instructor and facilities as in previous semesters, and consider offering Comsc 172 with the same instructor and facilities, as budget permits.

### Plan for topic "Students completing the course will be able to edit text files on a UNIX system.": 2009/10

A bit better data than in previous semester's results, using the new survey method. Satisfied with the student achievement of this outcome. Plan is to continue Comsc 171 with the instructor and facilities as in previous semesters, and consider offering Comsc 172 with the same instructor and facilities, as budget permits.

### Plan for topic "Students completing the course will be able to operate a standard UNIX shell (bash or ksh).": 2008/9

Not clear why the drop-off -- maybe too few data. No change, but watch FA09 results.

### Plan for topic "Students completing the course will be able to find and understand UNIX documentation." : 2008/9

Maybe too little data -- check FA09 results for trends.

### Plan for topic "Students completing the course will be able to edit text files on a UNIX system.": 2008/9

Affirmation and reinforcement of current methods and curriculum, but too little data in either semester to tell very much. Instructor to encourage more participation in SLO survey, or use a different method.
Plan for topic "Students completing the course will be able to install the Linux operating system": 2017/18

It is not clear what led to the results for this SLO, given that the "post" sample size is approximately one half of the "pre" sample size, this variation may be due to sampling error. The action is to identify which is actually the case, through a discussion with the instructor and review of the syllabus. The abnormally high "pre" rate may indicate that this SLO needs to be updated, this will also be assessed.

Plan for topic "Students completing the course will be able to configure TCP/IP networking on a Linux computer.": 2017/18

This data suffers from a small sample size in both the "pre" and "post" survey results. The action plan is to identify if there were more students that should have taken the survey, and whether the data indicate a low success rate or simply an anomaly because of the low sample sizes. It is worth noting that in the SP2016 "after" survey, an additional 4 students answered "fairly confident", which may just reflect the increasing complexity of TCP/IP networking in Linux (i.e. secure Linux, application firewalls and packet filtering). This will be assessed with the instructor.

Plan for topic "Students completing the course will be able to configure disks and file systems on Linux.": 2017/18

Similarly with the data for the other two SLOs for this course, the samples are small. Additionally with this particular question the wording needs to be reviewed for more precise wording, i.e. it is not clear what the difference between "real good" and "fairly good" is here. This will be reviewed with the instructor. The success rate suggests that an additional assignment and/or course content adjustment may need to be made here, this will also be assessed, including whether the success rate is actually higher and the data suffers from bias due to its small size.

Plan for topic "Students completing the course will be able to install the Linux operating system": 2014/15

The section started with 19 enrolled and ended with 13. The CS dept chair Robert Burns is to let the instructor Stuart Fogg know about the receipt feature of the surveys and get his students to use them -- it would be good to get a higher turnout on the surveys.

Results are noticeably better since the action plan 3 years ago, so the plan is to continue to explain the relevant VM options.

Plan for topic "Students completing the course will be able to configure TCP/IP networking on a Linux computer.": 2014/15

It looks like one student could configure TCP/IP with the highest level of achievement, coming into the course and leaving it. This is way down from the last assessment 3 years ago. The department needs to consider if this is a reasonable outcome to expect...

Plan for topic "Students completing the course will be able to install the Linux operating system": 2011/12

Generally pleased - all the responses were among the top two. Had one slow but persistent student who didn’t get everything despite a lot of one-on-one help. Also the virtual machines complicate disk configuration a little and complicate network configuration a lot. Will try to explain the relevant VM options better.

In both Fall 2017 and Spring 2018 less students took the post survey compared to the pre survey, although participation in the post survey improved substantially between these two semesters. Instructors should strongly emphasize the completion of both the pre and post surveys. In the pre surveys for both Fall 2017 and Spring 2018, the success rate for slo #1 (write a class and create objects of the class) was substantially higher compared to the success rates for the other three sloâ€™s at the beginning of the semester. This is likely because some students are coming into the course with some exposure to classes and objects from COMSC 165. In the post surveys for both semesters, the success rate for slo #4 (implement polymorphism using virtual functions) was lower compared to the success rates for the other three sloâ€™s at the end of the semester, so instructors may need to spend more time covering polymorphism and virtual functions and give more assignments related to these topics.

Plan for topic "Students completing the course will be able to overload built-in operators." 2017/18

Need to make sure all instructors know to conduct the "pre" surveys.

Plan for topic "Students completing the course will be able to implement polymorphism by creating child classes from an abstract parent class.": 2013/14

Results are strong across all assessed topics, so the action plan is to continue the balance among the topics in our curricula. Instructors do use different textbooks (Gaddis and Deitel), so that does not seem to be an issue with student learning, so no need to enforce standardization of textbooks. But the first part of any such textbook probably covers what we cover in COMSC-165, so it would be good to have a book that can be used in both courses, like Deitel. Need to make sure all instructors know to conduct the "pre" surveys.

Plan for topic "Students completing the course will be able to create a C++ class and create class-based objects.": 2012/13

There continues to be 1 or 2 students who stay in the course to the end, but do not fully understand this most fundamental part of the material. This is also consistent with observations by the instructor that 1 or 2 students per class remain on the roster, come to class, but do not keep up with the work, and end up failing the course. The instructor has interacted with these students throughout the semester, offering help and making them aware of their status, but they seem content to attend and fail. This result has improved over previous assessment cycles, probably because of instructor attention to lagging students, so the action plan continue tracking and encouraging lagging students, because it does help.

Plan for topic "Students completing the course will be able to overload built-in operators.": 2012/13

Comparing pre numbers for the topic and the classes/objects topic suggests that overloaded operators is a less familiar topic for incoming students. But by the end of the class, it's learned as well as classes/objects. This probably means that the balance between these topics is correct, and the action plan for this topic should also be to continue tracking and encouraging lagging students.

Plan for topic "Students completing the course will be able to implement inheritance by creating a class from an existing class.":
DVC Instructional Course SLO Action Plans

2012/13

Inheritance: Results are consistent with past pre/post assessments. The action plan is to continue the balance among these topics: classes and objects, overloaded operators, and inheritance.

Plan for topic "Students completing the course will be able to implement polymorphism by creating child classes from an abstract parent class.": 2012/13

Post results are consistently lower than for the other topic, but it's a bit more obscure and less applied than the others, so there is no indication that the balance needs adjusting. The 2nd highest level of achievement catches nearly all the remaining students surveyed, confirming this assessment.

Plan for topic "Students completing the course will be able to create a C++ class and create class-based objects.": 2011/12

This is a fundamental skill in a class like this. It really should be 100% success. To the extent that it was less, all the rest of the students were in the 2nd tier in the rubric. All we can do is continue to give lots of assignments week to week, to build up students’ skill levels and confidence.

Plan for topic "Students completing the course will be able to overload built-in operators.": 2011/12

This is a fundamental skill in a class like this. It really should be 100% success. But the only student not in the top tier was in the 2nd tier of the rubric. There are quite a lot of details and different situations and rules for students to learn with overloaded operators, so it’s really quite complicated. We achieve this level of success by getting to the subject early in the semester and fitting them into just about every weekly assignment.

Plan for topic "Students completing the course will be able to implement inheritance by creating a class from an existing class.": 2011/12

We do not spend a lot of time on inheritance, and instead skew the curriculum towards the more complicated topic of encapsulation. Only one student who was not in the top tier was below the 2nd tier (3rd). In order to promote this area of the curriculum, we’d have to take away from the encapsulation part. But the details of inheritance can be recalled well enough from references, so the balance between these topics seems right.

Plan for topic "Students completing the course will be able to create a C++ class and create class-based objects.": 2010/11

Very satisfied with the student achievement of this outcome, confirming the online method of course delivery. But not pleased with the level of participation in the survey. Will try pre- and post-testing to make students more aware of the survey and SLOs.

Plan for topic "Students completing the course will be able to overload built-in operators.": 2010/11

- 2008/9

   - Affirmation and reinforcement of current methods and curriculum. 210 and 260 should be this good.
339. Program Design and Data Structures [COMSC-210] belonging to Computer Science [COMSC]

Plan for topic "Students completing the course will be able to create C++ templates for custom data structures that allow saving, retrieving, and removing values.": 2016/17

Learning took place in both semesters. No difference noted among instructors PT or FT, among modes of delivery online vs on ground.

Plan for topic "Students completing the course will be able to create C++ templates for custom data structures that allow saving, retrieving, and removing values.": 2014/15

Reword topic because "template" may be misunderstood. Avoid OOP-specific examples from Childs that are not useful in data structures. Like overloaded operators in the Fraction class.

Plan for topic "Students completing the course will be able to create C++ templates for custom data structures that allow saving, retrieving, and removing values.": 2013/14

Results for the first two topics are good and as expected, so the action plan is to continue the instruction in these areas with the same emphasis we are giving these areas now.

We are using different textbooks to the same effect, so no need to standardize on one book.

Plan for topic "Students completing the course will understand the differences among the various search techniques (linear, binary, and binary trees) and can implement all of them.": 2013/14

Results for the first two topics are good and as expected, so the action plan is to continue the instruction in these areas with the same emphasis we are giving these areas now.

We are using different textbooks to the same effect, so no need to standardize on one book.

Results for the first two topics are good and as expected, so the action plan is to continue the instruction in these areas with the same emphasis we are giving these areas now.

We are using different textbooks to the same effect, so no need to standardize on one book.

Plan for topic "Students completing the course will understand the difference among various O(n lg n) sorting algorithms and can implement quick sort, merge sort, and heap sort.": 2013/14

Big Oh results improved after implementing a previous year’s action plan to include algorithmic efficiency concepts early in the course, before getting to the big oh topic. The action plan is to have all 210 instructors do likewise.

Plan for topic "Students completing the course will be able to create C++ templates for custom data structures that allow saving, retrieving, and removing values.": 2012/13

The summer session’s results are rather weak, maybe due to the 3X shorter time period. The department should consider whether this course should be taught over the summer. For fall and spring, there continues to be 1 or 2 students who stay in the course to the end, but do not fully understand this most fundamental part of the material. This
is also consistent with observations by the instructor that 1 or 2 students per class remain on the roster, come to class, but do not keep up with the work, and end up failing the course. The instructor has interacted with these students throughout the semester, offering help and making them aware of their status, but they seem content to attend and fail. This result has improved over previous assessment cycles, probably because of instructor attention to lagging students, so the action plan continue tracking and encouraging lagging students, because it does help.

**Plan for topic "Students completing the course will be able to understand the differences among the various search techniques (linear, binary, and binary trees) and can implement all of them."**: 2012/13

The summer session's results are rather weak, maybe due to the 3X shorter time period. The department should consider whether this course should be taught over the summer. Comparing fall and spring pre/post numbers for the topic and the templates topic suggests that searching is learned as well as templates. This probably means that the balance between these topics is correct, and the action plan for this topic should also be to continue tracking and encouraging lagging students. But we need better assessment of big oh and trees and graphs, which are more important topics than linear and binary search. The plan is to assess these topics instead of searching in future assessments (starting in SP14).

**Plan for topic "Students completing the course will understand the differences among the various search techniques (linear, binary, and binary search trees) and can implement all of them."**: 2012/13

The linear search technique is exercised in assignments throughout the semester. But the binary search technique is not given a lot of time, and the one assignment that deals

**Plan for topic "Students completing the course will be able to create C++ templates for custom data structures that allow saving, retrieving, and removing values."**: 2011/12

This is a primary skill set for a class like this. We pretty much expect that all students who make it to the end of the semester will succeed in this area. The curriculum should continue to introduce templates early in the semester, and use them week in and week out in a variety of exercises.

**Plan for topic "Students completing the course will be able to understand the differences among the various search techniques (linear, binary, and binary trees) and can implement all of them."**: 2011/12

The summer session's results are rather weak, maybe due to the 3X shorter time period. The department should consider whether this course should be taught over the summer. Comparing fall and spring pre/post numbers for the topic and the templates topic suggests that searching is learned as well as templates. This probably means that the balance between these topics is correct, and the action plan for this topic should also be to continue tracking and encouraging lagging students. But we need better assessment of big oh and trees and graphs, which are more important topics than linear and binary search. The plan is to assess these topics instead of searching in future assessments (starting in SP14).
### Plan for topic "Students completing the course will understand the differences among the various search techniques (linear, binary, and binary search trees) and can implement all of them."

- **2011/12**

  The linear search technique is exercised in assignments throughout the semester. The binary search technique is not given a lot of time, and the one assignment that deals with it is a bit confusing because the instructor and the book present it in ways that are different enough from each other so as to be confusing to the student. Starting in FA12, it will be made clear to the student that it will be done the instructor's way, explaining what are the differences.

### Plan for topic "Students completing the course will understand the difference among various O(n lg n) sorting algorithms and can implement quick sort, merge sort, and heap sort."

- **2011/12**

  This is about what we expected, and about the same as last year (85%). To get better than this, we'd have to introduce an exercise where students actually perform quicksort and mergesort by hand, using papers or playing cards. We may try that in FA12.

### Plan for topic "Students completing the course will be able to create C++ templates for custom data structures that allow saving, retrieving, and removing values."

- **2010/11**

  2011-01-25: Very satisfied with the student achievement of this outcome. Will try pre- and post-testing to make students more aware of the survey and SLOs.

  2011-06-02: New textbook has really helped. Much easier to read, with simpler explanations that are better at introducing complicated concepts with less material on full and detailed development. New self-paced grading paradigm helped, too, because students were able to work out problems when they got stuck, rather than leave them unsolved. Improved retention since SP'09 (62%).

### Plan for topic "Students completing the course will be able to understand the differences among the various search techniques (linear, binary, and binary trees) and can implement all of them."

- **2010/11**

  2011-06-02: Very satisfied with the student achievement of this outcome. Will try pre- and post-testing to make students more aware of the survey and SLOs.

  2011-06-02: New textbook has really helped. Much easier to read, with simpler explanations that are better at introducing complicated concepts with less material on full and detailed development. ### Course Action Plans

#### Plan for topic "Students completing the course will be able to write Java programs that use classes and objects.": 2017/18

These results are lower than they were 3 years ago, when the plan was to "affirm current methods and curriculum". But almost 100% did respond in the top two levels of achievement. So the plan remains unchanged -- affirm current methods and curriculum.

#### Plan for topic "Students completing the course will be able to write Java programs that use inheritance.": 2017/18

These results are lower than they were 3 years ago, when the plan was to "affirm current methods and curriculum". But more than 95% did respond in the top two levels of achievement. So the plan remains unchanged -- affirm current methods and curriculum.

#### Plan for topic "Students completing the course will be able to write Java programs that use the Graphical User Interface (GUI).": 2017/18

These results are lower than they were 3 years ago, when the plan was to "affirm current methods and curriculum". GUI is one important topic in Java, we may review and discuss why students didn't learn well as we expected. Should spend more time on GUI or more practice problems to assist students learn better?

But all but one did respond in the top two levels of achievement. So the plan remains unchanged -- affirm current methods and curriculum.

#### Plan for topic "Students completing the course will be able to write Java programs that use classes and objects.": 2014/15

Big improvement since the last assessment 3 years ago, when the plan was to "affirmation and reinforcement of current methods and curriculum". So no explanation for the improvement. High pre numbers is not a contributor, since 75% responded in the lower two achievement levels. The plan remains unchanged -- affirm current methods and curriculum.

#### Plan for topic "Students completing the course will be able to write Java programs that use inheritance.": 2014/15

These results are lower than they were 3 years ago, when the plan was to "affirm current methods and curriculum". But 100% did respond in the top two levels of achievement. So the plan remains unchanged -- affirm current methods and curriculum.

#### Plan for topic "Students completing the course will be able to write Java programs that use the Graphical User Interface (GUI).": 2014/15

These results are lower than they were 3 years ago, when the plan was to "affirm current methods and curriculum". But all but one did respond in the top two levels of achievement. One appears to not have gotten this class at all. So the plan remains unchanged -- affirm current methods and curriculum.

#### Plan for topic "Students completing the course will be able to write Java programs that use classes and objects.": 2011/12

Affirmation and reinforcement of current methods and curriculum. Do the pre-surveys for both the fall and spring semesters.

#### Plan for topic "Students completing the course will be able to write Java programs that use inheritance.": 2011/12

Affirmation and reinforcement of current methods and curriculum. Do the pre-survey for both Fall and Spring semesters.

#### Plan for topic "Students completing the course will be able to write Java programs that use the Graphical User Interface (GUI).": 2011/12

Affirmation and reinforcement of current methods and curriculum. Do pre-survey for both Fall and Spring semesters.
## Plan for topic "Students completing the course will be able to write Java programs that use classes and objects."

**2010/11**

- Very satisfied with the student achievement of this outcome, but not pleased with the level of participation in the survey. Will try pre- and post-testing to make students more aware of the survey and SLOs.

## Plan for topic "Students completing the course will be able to write Java programs that use inheritance."

**2010/11**

- Not pleased with the level of participation in the survey. Will try pre- and post-testing to make students more aware of the survey and SLOs.

## Plan for topic "Students completing the course will be able to write Java programs that use the Graphical User Interface (GUI)."

**2010/11**

- Not pleased with the level of participation in the survey. Will try pre- and post-testing to make students more aware of the survey and SLOs.

## Plan for topic "Students completing the course will be able to write Java programs that use classes and objects."

**2009/10**

- Affirmation and reinforcement of current methods and curriculum. Plan is to continue with this as a Friday evening class.

## Plan for topic "Students completing the course will be able to write Java programs that use inheritance."

**2009/10**

- Affirmation and reinforcement of current methods and curriculum. Plan is to continue with this as a Friday evening class.

## Plan for topic "Students completing the course will be able to write Java programs that use the Graphical User Interface (GUI)."

**2009/10**

- Affirmation and reinforcement of current methods and curriculum. Plan is to continue with this as a Friday evening class.

## Plan for topic "Students completing the course will be able to write Java programs that use classes and objects."

**2008/9**

- Affirmation and reinforcement of current methods and curriculum, but remove this as an alternative to Comsc-265 as a prerequisite for -210 and -265.

## Plan for topic "Students completing the course will be able to write Java programs that use inheritance."

**2008/9**

- Affirmation and reinforcement of current methods and curriculum, but remove this as an alternative to Comsc-265 as a prerequisite for -210 and -265.

## Plan for topic "Students completing the course will be able to write Java programs that use the Graphical User Interface (GUI)."

**2008/9**

- Affirmation and reinforcement of current methods and curriculum, but remove this as an alternative to Comsc-265 as a prerequisite for -210 and -265.
Plan for topic "Students completing the course will be able to write a Java program requiring the use of exception handling.": 2017/18

Only 3 students completed the pre survey and 6 students completed the post survey, so conclusions that can be drawn from the data are very limited. In future semesters, instructors should place a much greater emphasis on having students complete both the pre and post surveys. The results indicate that at the beginning of the semester, most of the students that took the pre survey (2/3) felt confident about slo #1 (exception handling), but none of the students felt confident about slo #2 (multithreading) or slo #3 (introspection) at the beginning of the semester, which is likely because they did not have any prior exposure to these topics. The success rate of slo #1 (exception handling) was the same in both the pre and post surveys (66.67%), although more students completed the post survey compared to the pre survey. This result may suggest that some students have had prior exposure to exception handling in other course(s). At the end of the semester, the post survey results indicate that students feel less confident about slo #3 (50% success rate) compared to slo #1 or slo #2 (66.67% success rate for both). Instructors may need to spend more time covering introspection (slo #3) and give more assignments on this topic to give students more practice with introspection in Java.

Plan for topic "Students completing the course will be able to write a Java program involving the use of multithreading.": 2017/18

Only 3 students completed the pre survey and 6 students completed the post survey, so conclusions that can be drawn from the data are very limited. In future semesters, instructors should place a much greater emphasis on having students complete both the pre and post surveys. ### DVC Instructional Course SLO Action Plans

**Plan for topic "Students completing the course will be able to write a Java program requiring the use of exception handling."**: 2016/17

Assess in FA18 and report ASAP

**Plan for topic "Students completing the course will be able to write a Java program requiring the use of exception handling."**: 2013/14

Much better participation since last assessment 2 years ago, in getting students to take the surveys. Exception handling is something they should already know coming into this course from Comsc-255, so the pre numbers are as expected. But no movement in the numbers at the end suggests that it was not developed any further in this course. Further, the topic does not match any of the SLOs. This needs to be replaced as a topic.

**Plan for topic "Students completing the course will be able to write a Java program involving the use of multithreading."**: 2013/14

Results indicate the learning in this optic did take place. 87% did place themselves in one of the top 2 achievement levels. Plan is to continue teaching this course as it is taught now by Khaja.

**Plan for topic "Students completing the course will be able to write a Java program involving the use of introspection."**: 2013/14

Results indicate the learning in this optic did take place. 80% did place themselves in one of the top 2 achievement levels. Plan is to continue teaching this course as it is taught now by Khaja.

**Plan for topic "Students completing the course will be able to write a Java program requiring the use of exception handling."**: 2011/12

There are too few students reporting to make any conclusions. The plan is to find a better way to get students to participate in the learning surveys.

**Plan for topic "Students completing the course will be able to write a Java program involving the use of multithreading."**: 2011/12

There are too few students reporting to make any conclusions. The plan is to find a better way to get students to participate in the learning surveys.

**Plan for topic "Students completing the course will be able to write a Java program involving the use of introspection."**: 2011/12

There are too few students reporting to make any conclusions. The plan is to find a better way to get students to participate in the learning surveys.

**Plan for topic "Students completing the course will be able to write a Java program requiring the use of exception handling."**: 2010/11

Not a lot of data -- instructor needs to encourage students to participate, perhaps in lab. Otherwise, affirmation and reinforcement of current methods and curriculum.

**Plan for topic "Students completing the course will be able to write a Java program involving the use of multithreading."**: 2010/11

Not a lot of data -- instructor needs to encourage students to participate, perhaps in lab. Otherwise, affirmation and reinforcement of current methods and curriculum.

**Plan for topic "Students completing the course will be able to write a Java program involving the use of introspection."**: 2010/11

Not a lot of data -- instructor needs to encourage students to participate, perhaps in lab. Otherwise, affirmation and reinforcement of current methods and curriculum.

Plan for topic "Students completing the course will be able to create an Assembly Language program that includes decisions, loops, and function calls." : 2017/18

Of the 3 topics, this one has the strongest improvement, but results for SP2018 suggest the results were not as good. The action plan is to monitor the FA2018 data to see if there is a trend, and if so, assess what may be the cause.

Plan for topic "Students completing the course will be able to explain how virtual memory is used to run a program larger than physical memory." : 2017/18

There were fewer responses to the ‘after’ survey for this topic than the first (8 vs. 12 responses - in the SP2018 survey) so the smaller sample size may be causing a higher variance. On the other hand, there is a downward trend with SP2018. The action is to see if this is confirmed by the FA2018 responses, and also encourage a higher response rate of the ‘after’ survey with the course instructors.

Plan for topic "Students completing the course will be able to call a function written in Assembly Language from a program written in a high level language." : 2017/18

This topic also has a lower response rate (8 vs. 12 - in the SP2018 survey) than the first topic, and has a similar possible downward trend. The action is to see if the FA2018 numbers confirm this, and to encourage the course instructors to push more students to take the ‘after’ survey, to increase the sample size and data quality.

Plan for topic "Students completing the course will be able to create an Assembly Language program that includes decisions, loops, and function calls." : 2014/15

Start programming right away, with registers. Get tools configured early on -- IDEs.

Plan for topic "Students completing the course will be able to explain how virtual memory is used to run a program larger than physical memory." : 2014/15

Use Fred’s virtual memory worksheet/quiz/exercise suite.

Plan for topic "Students completing the course will be able to call a function written in Assembly Language from a program written in a high level language." : 2014/15

Use Fred's high-level language C++ worksheet/quiz/exercise suite.

Plan for topic "Students completing the course will be able to create an Assembly Language program that includes decisions, loops, and function calls." : 2013/14

The main instructor focuses on the SLOs throughout the semester. Also, his first assignment in the course is directly related to SLOs. The dept chairman is to go over the results with other instructors before SP15's classes. Also, no more summer or online sections are to be scheduled.

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to call a function written in Assembly Language from a program written in a high level language." : 2011/12

Incorporated the SLO's as part of the review process for the final exam. Reminded the students of what they did know. Had an extra credit virtual memory worksheet which the majority of the students completed. Plan to make the worksheet mandatory for FA12. Affirmation and reinforcement of current methods and curriculum including the use of worksheets.

Plan for topic "Students completing the course will be able to call a function written in Assembly Language from a program written in a high level language." : 2010/11

Affirmation of instruction methods in use. Pleased with high participation and higher retention rate.

Plan for topic "Students completing the course will be able to call a function written in Assembly Language from a program written in a high level language." : 2009/10

Affirmation and reinforcement of current methods and curriculum. Plan is to bring another instructor into the rotation, for scheduling flexibility and redundancy.

348. Internship in Occupational Work Experience Education in COMSC [COMSC-296] belonging to Computer Science [COMSC]

Plan for topic "Students completing this course will be able to explain safety standards and protocols related to the industry.": 2017/18

The Construction Program feels that the students understand this topic and that other topics are more essential for Const 101. Therefore, the department recommends not assessing this topic during the next assessment cycle.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to describe construction job site protocols and safety standards": 2018/19

The Construction Program feels that the students understand this topic and that other topics are more essential for Const 105. Therefore, the department recommends not assessing this topic during the next assessment cycle.

Plan for topic "Students completing this course will be able to describe construction job site protocols and safety standards": 2015/16

This is a new course and this is it's first evaluation. The use of field trip and increasing the amount of hands on activities will increase the student's participation and possible retention in the course. The field trips allow the students to view actual working conditions found at constructions sites. We will look to leverage our association with our advisory committee and industrial partners to help facilitate these excursions.

This course slo information was presented to the department, advisory council and industry partners.
### Plan for topic "Students completing the course will be able to identify personal protection equipment."

- **2017/18**: The Construction Program feels that the students understand this topic and that other topics are more essential for Const 110. Therefore, the department recommends not assessing this topic during the next assessment cycle.

- **2014/15**: Results are acceptable. Will incorporate student feedback into future course design.

- **2013/14**: Results are acceptable. Will incorporate student feedback into future course design.

- **2011/12**: No SLO related changes are recommended for this course.

- **2009/10**: Affirmation and reinforcement of the current methods and curriculum. Because this is a safety course we must have 100% compliance.

---

### Plan for topic "Students completing the course will be able to correctly put on the safety equipment."

- **2017/18**: No SLO related changes are recommended for this course.

- **2014/15**: Results are acceptable. Will incorporate student feedback into future course design.

- **2013/14**: Results are acceptable. Will incorporate student feedback into future course design.

- **2011/12**: No SLO related changes are recommended for this course.

- **2009/10**: Affirmation and reinforcement of the current methods and curriculum. Because this is a safety course we must have 100% compliance.

---

### Plan for topic "Students completing the course will be able to identify the components of a hazardous materials response plan needed for a small business."

- **2017/18**: No SLO related changes are recommended for this course.

- **2014/15**: Results are acceptable. Will incorporate student feedback into future course design.

- **2013/14**: Results are acceptable. Will incorporate student feedback into future course design.

- **2011/12**: No SLO related changes are recommended for this course.

- **2009/10**: Affirmation and reinforcement of the current methods and curriculum. Because this is a safety course we must have 100% compliance.
### DVC Instructional Course SLO Action Plans

DVC Instructional Course SLO Action Plans

358. Topics in Construction [CONST-150] belonging to Architecture/Engineering [CONST]
Plan for topic "Students completing this course will be able to

1. Students will have the awareness of work ready essential skills needed in the field of construction, energy, engineering, architecture and manufacturing": 2018/19

The Construction Program feels that the students understand this topic. Therefore, the department recommends not assessing this topic during the next assessment cycle.

Plan for topic "Students completing this course will be able to

1. Students will have the awareness of work ready essential skills needed in the field of construction, energy, engineering, architecture and manufacturing": 2015/16

Results are acceptable. Will incorporate student’s feedback in the future course design.

Plan for topic "Students completing this course will be able to

2. Students will have an awareness of current career opportunities available in the fields of construction, energy, engineering, architecture and manufacturing": 2015/16

Results are acceptable. Will incorporate student’s feedback in the future course design.
### Plan for topic "Students completing the course will be able to identify code-compliant construction in buildings."

#### 2018/19

The Construction Program feels that the students understand this topic and that other topics are more essential for Const 101. Therefore, the department recommends not assessing this topic during the next assessment cycle.

#### 2015/16

I will assess this course in the fall of 2016.

#### 2011/12

No SLO related changes are recommended for this course.

#### 2009/10

**Plan for topic "Students completing the course will be able to use current California Mechanical Codes in practical situations."**: 2017/18

The Construction Program feels that the students understand this topic and that other topics are more essential for Const 192. Therefore, the department recommends not assessing this topic during the next assessment cycle.

**Plan for topic "Students completing the course will be able to use current California Mechanical Codes in practical situations."**: 2013/14

Results are acceptable. Will incorporate student feedback into future course design.

**Plan for topic "Students completing the course will be able to use current California Mechanical Codes in practical situations."**: 2012/13

Results are acceptable. Will incorporate student feedback into future course design.

**Plan for topic "Students completing the course will be able to interpret the California Mechanical Code."**: 2012/13

Results are acceptable. Will incorporate student feedback into future course design.

**Plan for topic "Students completing the course will be able to distinguish applicable sections of the California Mechanical Code among heating, ventilation, and refrigeration in a structure."**: 2012/13

Results are acceptable. Will incorporate student feedback into future course design.

**Plan for topic "Students completing this course will be able to apply principles of job site safety": 2017/18**

The Construction Program feels that the students understand this topic and that other topics are more essential for Const 215. Therefore, the department recommends not assessing this topic during the next assessment cycle.

**Plan for topic "Students completing this course will be able to apply principles of job site safety": 2015/16**

This is a new course and this is its first evaluation. The use of field trip and increasing the amount of hands on activities will increase the student's participation and possible retention in the course.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to determine the best unit of measure for each part of material take-off.":

2018/19
The Construction Program feels that the students understand this topic and that other topics are more essential for Const 244. Therefore, the department recommends not assessing this topic during the next assessment cycle.

Plan for topic "Students completing the course will be able to determine the best unit of measure for each part of material take-off.":

2015/16
Results are acceptable. Will incorporate students feedback in the future course design.

Plan for topic "Students completing the course will be able to use basic estimating terms.": 2015/16
Results are acceptable. Will incorporate students feedback in the future course design.

Plan for topic "Students completing the course will be able to determine the best unit of measure for each part of material take-off.":

2009/10
Affirmation and reinforcement of the current methods and curriculum.

Plan for topic "Students completing the course will be able to use basic estimating terms.": 2009/10
Affirmation and reinforcement of the current methods and curriculum.

Plan for topic "Students completing the course will be able to create a “take-off” sheet listing required quantities and materials for residential project.": 2009/10
Affirmation and reinforcement of the current methods and curriculum. We need to continue to have computer lab facility with Excel.
369. Electrical Codes: Articles 90-398 [CONST-266] belonging to Architecture/Engineering [CONST]

Plan for topic "Students completing the course will be able to interpret and apply the National Electrical Code, Articles 90 through 398 and Chapter Nine, tables": 2017/18

The Construction Program feels that the students understand this topic and that other topics are more essential for Const 266. Therefore, the department recommends not assessing this topic during the next assessment cycle.

Plan for topic "Students completing the course will be able to interpret and apply the National Electrical Code, Articles 90 through 398 and Chapter Nine, tables": 2013/14

Results are acceptable. Will incorporate student feedback into future course design.

Plan for topic "Students completing the course will be able to apply State Safety Orders, Articles 1 through 38 as applied to electrical installation practice.": 2013/14

Results are acceptable. Will incorporate student feedback into future course design.

Plan for topic "Students completing the course will be able to use current electrical codes in practical situations": 2013/14

Results are acceptable. Will incorporate student feedback into future course design.

Plan for topic "Students completing the course will be able to interpret and apply the National Electrical Code, Articles 90 through 398 and Chapter Nine, tables": 2011/12

No SLO related changes are recommended for this course.

Plan for topic "Students completing the course will be able to apply State Safety Orders, Articles 1 through 38 as applied to electrical installation practice.": 2011/12

No SLO related changes are recommended for this course.

Plan for topic "Students completing the course will be able to use current electrical codes in practical situations": 2011/12

No SLO related changes are recommended for this course.

Plan for topic "Students completing the course will be able to interpret and apply the National Electrical Code, Articles 90 through 398 and Chapter Nine, tables": 2009/10

Affirmation and reinforcement of the current methods and curriculum.

Plan for topic "Students completing the course will be able to apply State Safety Orders, Articles 1 through 38 as applied to electrical installation practice.": 2009/10

Affirmation and reinforcement of the current methods and curriculum.

Plan for topic "Students completing the course will be able to use current electrical codes in practical situations": 2009/10
Affirmation and reinforcement of the current methods and curriculum.
### 370. Electrical Codes: Articles 400-830 [CONST-267] belonging to Architecture/Engineering [CONST]

#### Plan for topic "Students completing the course will be able to interpret and apply the National Electrical Code, Articles 400 through 830 and Chapter nine, tables."

- **2017/18**: The Construction Program feels that the students understand this topic and that other topics are more essential for Const 267. Therefore, the department recommends not assessing this topic during the next assessment cycle.

- **2014/15**: Results are acceptable. Will incorporate student feedback into future course design.

#### Plan for topic "Students completing the course will be able to apply State Safety Orders, Articles 1 through 38 as applied to electrical installation practice."

- **2014/15**: Results are acceptable. Will incorporate student feedback into future course design.

- **2012/13**: Results are acceptable. Will incorporate student feedback into future course design.

#### Plan for topic "Students completing the course will be able to apply current electrical codes in practical situations."

- **2014/15**: Results are acceptable. Will incorporate student feedback into future course design.

- **2012/13**: Results are acceptable. Will incorporate student feedback into future course design.

No SLO related changes are recommended for this course.
### Plan for topic "Students completing this course will be able to identify and improve selected professional work habits and employability skills such as time management, communication, and teamwork."

WRKX department has built out a great team of supportive faculty members. In addition, we have redefined our SLOs (for more effective analysis) and have created an assessment tool which will be integrated into Canvas (once the updated SLOs are approved) and recreating the entire SLO assessment process. What works currently: receiving student perspective. Lots of other areas to work on, such as gathering more student responses, especially in post, and acquiring more reliable data.

### Plan for topic "Students completing this course will be able to Develop professional expertise related to a career path or strategy to secure employment."

WRKX department has built out a great team of supportive faculty members. In addition, we have redefined our SLOs (for more effective analysis) and have created an assessment tool which will be integrated into Canvas (once the updated SLOs are approved) and recreating the entire SLO assessment process. DVC Instructional Course SLO Action Plans

Plan for topic "Students completing COUNS-095 will be able to Students completing COUNS -095 will be able to enter two semesters of courses into their InSite Student Planning module.": 2014/15

Need to continually emphasize that there needs to be a sure way in which students can reset their passwords on their WebAdvisor accounts on Saturdays when no staff is available to assist. The online request to change password works only about 50% of the time. This is a fundamental goal of the COUNS 095 and will continue to be assessed.

Plan for topic "Students completing Couns 95 will be able to use Web Advisor to register for their classes.": 2014/15

Need to continually emphasize that there needs to be a sure way in which students can reset their passwords on their WebAdvisor accounts on Saturdays when no staff is available to assist. The online request to change password works only about 50% of the time. This is a fundamental goal of the COUNS 095 and will continue to be assessed.

Plan for topic "Students completing the course will be able to describe how many units are required to receive an AA degree or transfer to a four-year university.": 2014/15

Need to continually emphasize that there needs to be a sure way in which students can reset their passwords on their WebAdvisor accounts on Saturdays when no staff is available to assist. The online request to change password works only about 50% of the time. This is a fundamental goal of the COUNS 095 and will continue to be assessed.

Plan for topic "Students completing the course will be able to demonstrate an increased understanding of how to select appropriate courses for their goals.": 2013/14

This course is currently under review, and completion of an educational plan is a required component of the college's 3SP implementation.

Plan for topic "Students completing the course will be able to demonstrate an increased understanding of how to achieve their goals.": 2012/13

This topic is an important aspect of educational planning. The faculty will review its appropriateness for future assessment in the fall 2013.

Plan for topic "Students completing the course will be able to describe how many units are required to receive an AA degree or transfer to a four-year university.": 2012/13

This topic is an important aspect of educational planning. The faculty will review its appropriateness for future assessment in the fall 2013.

Plan for topic "Students completing the course will be able to demonstrate an increased understanding of how to select appropriate courses for their goals."": 2012/13

The department is considering a rewrite of the course outline for Couns 95. SLO's will be considered as those discussions are underway.

Plan for topic "Students completing the course will be able to describe how many units are required to receive an AA degree or transfer to a four-year university.": 2012/13

This SLO will be reviewed as a part of the complete review of the course for a possible revision to its content.

Plan for topic "Students completing Couns 95 will be able to use Web Advisor to register for their classes.": 2012/13

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to demonstrate an increased understanding of how to select appropriate courses for their goals.": 2005/6

Results support the notion that COUNS 105 is an effective mechanism in providing initial academic advising. Will review comments for use of “fine-tuning the 105’s.”
Plan for topic "Students completing the course will be able to demonstrate their ability to complete a comprehensive educational plan.": 2019/20

The move to a synchronous online format presented an anticipated challenge. The uniform access to technology was an issue relative to the fillable PDF completion, as some students did not have the necessary technology to easily complete the assignments (digital divide). To mitigate this, when possible most of the course should be taught in an "in person" format so that all students have equal access to the necessary technology. At the same time, a number of aspects of the course taught online did appear to be effective. A hybrid format will be explored for future offerings.

Plan for topic "Students completing the course will be able to accurately identify the five assumptions relative to the development of their athletic educational plans.": 2016/17

Won't be happy until I consistently get 100% of the students understanding. I have typically provided the class with the assumptions on the first day of class. I will review these assumptions again on the third day of the four day class.

Plan for topic "Students completing the course will be able to demonstrate their ability to complete a comprehensive educational plan.": 2016/17

As a requirement to compete, student athletes must complete this process. Each year will add educational planning guides for different/new majors as they become available.

Plan for topic "Students completing the course will be able to accurately identify the five assumptions relative to the development of their athletic educational plans.": 2014/15

Each year this continues to be a very important SLO for the program, so we will continue to assess this for each course and each section, and each year.

Plan for topic "Students completing the course will be able to identify with whom they must speak before dropping a course": 2014/15

Greater emphasis will be placed on the myriad of reasons student athletes need to see athletic counselors.

Plan for topic "Students completing the course will be able to demonstrate their ability to complete a comprehensive educational plan.": 2014/15

The process is very effective in completion of a comprehensive educational plan. Continued efficiencies in process will be sought from student feedback and instructor observations in the educational planning process for incoming student athletes..

Plan for topic "Students completing the course will be able to accurately identify the five assumptions relative to the development of their athletic educational plans.": 2013/14

2014-04-09: Review and determine effectiveness of content and structure, and tweak as deemed necessary.
2014-09-09: Met 90% correct criteria

379. Educational Planning for DSS Students [COUNS-097] belonging to Counseling [COUNS]
Plan for topic "Students completing this course will be able to develop a two semester educational plan and input into the InSite Portal Student Planning tool." 2018/19

| Will assess if ever offered again or will remove the course from the catalog. |
Develop additional SLO's for this class that will measure the SLO's as noted on the course outline.
381. Student Success [COUNS-120] belonging to Counseling [COUNS]

Plan for topic "Students completing the course will be able to receive the assistance that they need for a counseling appointment."

2016/17

Maintaining the emphasis of seeing a counselor is critical to student success and transfer given the complexities of the transfer processes. Instructors may want to more closely monitor during the course of the semester and remind students who have not made their counseling appointments and complete their educational plans to do so.

Plan for topic "Students completing the course will be able to demonstrate effective study skills."

2016/17

Given that COUNS 120 is a study skills class, these skills are important to the mission of the class and will remain an emphasis. Will explore the possibility of having more time for group discussion of the different strategies and students expressing/sharing their personal experiences of improving their study skills over the course of the class.

Plan for topic "Students completing the course will be able to demonstrate a better understanding of strategies and resources that can be utilized in improving study habits and time management skills."

2013/14

This is an important aspect of the course and should further inform the curriculum and methods of instruction. The results will be used by the instructors to further refine the course materials.

Plan for topic "Students completing COUNS-120 will be able to Demonstrate effective study skills: reading, time-management, memory, note-taking, and test-taking techniques."

2012/13

Criteria exceeded. Plan to review teaching of strategies across multiple sections of the course.

Plan for topic "Students completing the course will be able to demonstrate effective study skills."

2011/12

These results will be used to continuously evaluate the effectiveness of instruction and instructional materials.

Plan for topic "Students completing the course will be able to demonstrate a better understanding of strategies and resources that can be utilized in improving study habits and time management skills."

2007/8

Criteria exceeded

Plan for topic "Students completing the course will be able to receive the assistance that they need for a counseling appointment."

2007/8

Criteria exceeded

Plan for topic "Students completing the course will be able to demonstrate effective study skills."

2007/8

Criteria exceeded.
DVC Instructional Course SLO Action Plans

382. Transfer Planning [COUNS-130] belonging to Counseling [COUNS]
Plan for topic "Students completing the course will be able to produce an individualized academic, extra-curricular and support service plan for completing successful transfer."

Could use educational planning guides to facilitate the students’ completion of their educational plans.

Plan for topic "Students completing the course will be to utilize ASSIST.org to identify lower division major courses which may be taken at DVC prior to transfer to their respective universities of choice."

May consider adding a few more data points from ASSIST to the paper to help provide a deeper level of understanding of how to use the multiple features of the website

Plan for topic "Students completing this course will have learned how to identify 4 year colleges and universities most appropriate to their academic interests."

May consider requiring another paper summarizing their findings rather than demonstrations which are somewhat time consuming of class time.

Plan for topic "Students completing COUNS-130 will be able to identify 4 year colleges and universities most appropriate to their academic interests."

COUNS-130 SLO’s will be measured in Spring 2017.

Plan for topic "Students completing the course will be able to produce an individualized academic, extra-curricular and support service plan for completing successful transfer."

All criteria was met.

Plan for topic "Students completing the course will be to utilize ASSIST.org to identify lower division major courses which may be taken at DVC prior to transfer to their respective universities of choice."

All criteria was met.

DVC Instructional Course SLO Action Plans

384. Topics in Group Counseling [COUNS-155] belonging to Counseling [COUNS]
This was a collaborative participation with local High School Instructors, DVC Work force Development Department, participating local Industry companies and DVC Faculty. The week schedule of events for this program was intense very busy. Introductions were done, lecture on subject given, broken into groups, teachers demonstrated a skill; students practice that technique. As a group they would each make lunch for that dayâ€™s meal.
386. Introduction to the Kitchen [CULN-105] belonging to Culinary Arts [CULN]

Plan for topic "Students completing the course will be able to identify basic safety issues in the kitchen.": 2017/18

More detailed work must be done to ensure that 100% of enrolled students pass this criteria. More thorough training and repetitive practice must be done, as well as continued exposure should improve students results.

Plan for topic "Students completing the course will be able discuss selection and use of the appropriate knife for identified kitchen tasks.": 2014/15

Future plans are to try have more practical time in the lab to master the specified cuts so that students become one with the knife. Industry standards look for students who do well with the knife cuts. Might revisit extending the or making this class longer so that students are prepared for the next CULN phase.

Plan for topic "Students completing the course will be able to read and analyze safety related instructions.": 2014/15

The way we are working with the students in the fast two week course barely gets the students ready to get into the kitchen to work safely. We would like to see if this two week class can be longer in order to get all information to the students and time to practice what is taught.

Plan for topic "Students completing the course will be able discuss selection and use of the appropriate knife for identified kitchen tasks.": 2011/12

Overcrowding effects student practice prior to the cutting exam because of limited work space. Two sections of the class would eliminate overcrowding.

Plan for topic "Students completing the course will be able to identify basic safety issues in the kitchen.": 2011/12

This standard should be enforced and assessed in every foods class in the program.

Plan for topic "Students completing the course will be able to demonstrate personal hygiene practices.": 2011/12

The one student who did not comply was dropped from the class and told he/she could come back next semester providing they were in full and proper uniform.

Plan for topic "Students completing the course will be able to read and analyze safety related instructions.": 2011/12

Students who have difficulty reading MSDS effectively were recommended to take ESL classes.
### DVC Instructional Course SLO Action Plans

#### 387. Orientation to Hospitality [CULN-110] belonging to Culinary Arts [CULN]

**Plan for topic "Students completing this course will be able to write an acceptable and current resume for employment in the hospitality industry of their choice."**: 2016/17

<table>
<thead>
<tr>
<th>After review there are no items from the previous action plan that pertain to this current action plan. These SLO assessments will be shared with our CTE advisory board in our spring meeting.</th>
</tr>
</thead>
<tbody>
<tr>
<td>None of the SLO data affects the current certificate or degree.</td>
</tr>
<tr>
<td>After the review of our SLO data, the department determined that there are no needs that need to be forwarded in our program review.</td>
</tr>
</tbody>
</table>

---

**Plan for topic "Students completing this course will be able to demonstrate the skills and abilities needed to meet minimum qualifications for employment in an area of hospitality based on their interest areas.": 2013/14**

- The plan to show examples of past acceptable field trip reports so as to increase % of student success.

**Plan for topic "Students completing this course will be able to select and justify their job choice made."**: 2013/14

- The department will discuss adding a recommendation of English writing techniques for this course.

**Plan for topic "Students completing this course will be able to write an acceptable and current resume for employment in the hospitality industry of their choice."**: 2013/14

- Complete more power point presentations now that our new building has the technical equipment to show students examples of a well completed resume.
DVC Instructional Course SLO Action Plans

388. Culinary Mathematics [CULN-115] belonging to Culinary Arts [CULN]

Plan for topic "Students completing this course will be able to perform basic math functions such as percentages and interest calculations.": 2016/17

After review there are no items from the previous action plan that pertain to this current action plan. These SLO assessments will be shared with our CTE advisory board in our spring meeting.

None of the SLO data affects the current certificate or degree.

After the review of our SLO data, the department determined that there are no needs that need to be forwarded to our program.

Plan for topic "Students completing this course will be able to determine appropriate selling prices for food products.": 2013/14

Department will discuss the addition of a basic math recommendation to this course.

Plan for topic "Students completing this course will be able to perform basic math functions such as percentages and interest calculations.": 2011/12

41 out of the 45 students did 70% or more and we followed up that assessment process by asking the students to do a Food cost project for 50 people.

Plan for topic "Students completing this course will be able to calculate the cost of goods and food services being sold.": 2011/12

An afterthought, we wanted students to still get their demo in class and work in groups while in class to see how the students do their work. Then we did the quiz.
DVC Instructional Course SLO Action Plans

389. Fundamentals of Cuisine [CULN-120] belonging to Culinary Arts [CULN]

Plan for topic "Students completing the course will be able to demonstrate preparation of foods using appropriate cooking methods for the outcome."

- 2016/17
  Need to continue this Practical learning process to include new types of equipment available and in keeping with the American Culinary Standards. Need for any funds allowed to get those pieces of equipment.

Plan for topic "Students completing CULN120 will be able to Follow a recipe to a successful end. When students did their survey, most students were able to complete the task and teacher would like to demo this from start to finish. The purpose of this is to make sure all students know the complete steps start to finish on how and what the recipe is to look like. Also would like the students to know how to change quantities if they have to increase or decrease amounts on recipe."

- 2013/14
  The need for continued funding to keep up with today's equipment and practices and to keep up with ACF and industry standards.

Plan for topic "Students completing CULN120 will be able to Follow a recipe to a successful end. When students did their survey, most students were able to complete the task and teacher would like to demo this from start to finish. The purpose of this is to make sure all students know the complete steps start to finish on how and what the recipe is to look like. Also would like the students to know how to change quantities if they have to increase or decrease amounts on recipe."

- 2012/13
  New semester, teacher will spend more time in lecture on how to increase/decrease recipe amounts.

Plan for topic "Students completing the course will be able to demonstrate preparation of foods using appropriate cooking methods for the outcome."

- 2010/11
  Need 100% to fulfill prerequisite for CULN 220. The class size was too large (over the max) and the hours are too few (in course outline). Need a bigger kitchen because other classes are going on in the same space at the same time, and more hours in the course outline.

Plan for topic "Students completing the course will be able to follow a recipe to a successful end."

- 2010/11
  Need 100% to fulfill prerequisite for CULN 220. The class size was too large (over the max) and the hours are too few (in course outline). Need a bigger kitchen because other classes are going on in the same space at the same time, and more hours in the course outline.

Plan for topic "Students completing the course will be able to handle and track foods according to HACCP(Hazardous Analysis Critical Control Points), based on industry standards."

- 2010/11
  Need 100% to fulfill prerequisite for CULN 220. But we did not have infrared thermometer scanner required for students to achieve this outcome. We expect to have it for the fall 2010 semester.
390. Sauces of the World [CULN-123] belonging to Culinary Arts [CULN]
391. Garde Manger [CULN-127] belonging to Culinary Arts [CULN]

Plan for topic "Students completing the course will be able to identify and use tools and equipment for garde manger preparations."

2016/17

We will continue to plan the lesson the same way and give students apple time to practice each skill. This may take a few times for the students to feel comfortable. Most students do not have the level of expertise that they want. But most of the students have the will and want to try each skill.

Plan for topic "Students completing CULN-127 will be able to Prepare cold items that include sandwiches, canapes, hors d'oeuvres, marinades and relishes": 2016/17

This system has been working well over time. Most students are successful. Their is an end of semester gathering where students show off their skills to other teachers and guests that come to see the CULN recognition party.

Plan for topic "Students completing the course will be able to identify and use tools and equipment for garde manger preparations."

2013/14

Most if not all students were able to complete the class subject in good or above average standards. Guideline used are according to the American Culinary Standards. They meet these. Need to increase the length of the class to allow the class to practice the Garde Manger techniques over a longer period of time. Need to increase funding to bring in top of the line, up to date equipment to practice subject line

Plan for topic "Students completing the course will be able to demonstrate food presentation and food preservation techniques."

2013/14

With how long our semester is(12 weeks), it is not long enough for the students to get good quality time on each of the subject titles. Also the use of new and newer equipment are needed to be used, demonstrated and practice with for the students. Thus the need for more monies to be allocated so that we keep up with todays Industry practices.

Plan for topic "Students completing CULN-127 will be able to demonstrate food presentation and food preservation techniques".

2013/14

With how long our semester is(12 weeks), it is not long enough for the students to get good quality time on each of the subject titles. Also the use of new and newer equipment are needed to be used, demonstrated and practice with for the students. Thus the need for more monies to be allocated so that we keep up with todays Industry practices.

Plan for topic "Students completing the course will be able to identify and use tools and equipment for garde manger preparations."

2012/13

Continue to lay out all tools necessary for each preparation.

Plan for topic "b. Students completing the course will be able to prepare cold items that include sandwiches, canapes, hors d'oeuvres, marinade and relishes": 2012/13

Encourage minimum standard students to practice and improve their performance
Plan for topic "Students completing the course will be able to demonstrate food presentation and food preservation techniques.":

2012/13
Encourage minimum standard students to improve through practice.

Plan for topic "Students completing CULN-127 will be able to demonstrate food presentation and food preservation techniques": 2012/13
Encourage minimum standard students to improve through practice.

Plan for topic "Students completing CULN-127 will be able to Prepare cold items that include sandwiches, canapes, hors d'oeuvres, marinades and relishes": 2011/12
Will continue lecturing on subject, coming up with new trends to show students what industry is doing.

Plan for topic "b. Students completing the course will be able to prepare cold items that include sandwiches, canapes, hors d'oeuvres, marinade and relishes": 2009/10
After collecting the assessment scores and data chef and Chair will analyze data and make appropriate changes as needed to have students learn in the most perfect way.

Plan for topic "Students completing the course will be able to demonstrate food presentation and food preservation techniques.": 2009/10
(Department did not provide an action plan)

Plan for topic "Students completing CULN-127 will be able to demonstrate food presentation and food preservation techniques": 2009/10
(Department did not provide an action plan)

Plan for topic "Students completing the course will be able to produce decorative pieces for buffets.": 2009/10
(Department did not provide an action plan)

Plan for topic "b. Students completing the course will be able to prepare cold items that include sandwiches, canapes, hors d'oeuvres, marinade and relishes": 2009/10
After collecting the assessment scores and data chef and Chair will analyze data and make appropriate changes as needed to have students learn in the most perfect way.
DVC Instructional Course SLO Action Plans

392. Introduction to Urban Farming: Farm-to-Table [CULN-129] belonging to Culinary Arts [CULN]

Plan for topic "Students completing this course will be able to plan a menu that incorporates seasonal plantings.": 2017/18

We allocated more time for students to have hands-on lab experience preparing and cooking during each class session. We are bringing in additional guest speakers. We need to continue to develop the culinary aspect of this course by adding more lab time for food preparation and menu planning. ACF/CTE advisor reviewed this course with the instructor and conducted a site visit.

November 2018, ACF (American Culinary Federation) made a site visit to the farm who noted that this program is valuable and well-developed in comparison to other culinary schools that they review. This Action Plan was shared with our Advisory Board at the next Advisory Board meeting in 2018.

Plan for topic "Students completing this course will be able to plan a menu that incorporates seasonal plantings.": 2015/16

Over the six semesters of teaching this course, the semester project has been refined (the first semesters were as course #150).

This includes allocating class time every week to do research and consult with the professor specifically about the project.

The department feels that this course has enabled the students to apply the concepts in the course to the real world.

This was validated during our last review by the ACF (American Culinary Federation), who noted that this program is valuable and well-developed in comparison to other culinary schools that they review.

This Action Plan was shared with the Discipline Faculty and our Advisory Board.

It is also clear that farm-to-table is a significant trend in the food service industry. The website goodfoodjobs.com regularly has hundreds of jobs listed with farm-to-table in the title or job description, and there are many, many other indicators that farm-to-table is an trend. Therefore, we conclude that this DVC course is aligned with the industry, and that it contributes toward student success and ability to be hired.
DVC Instructional Course SLO Action Plans

Program Review:

Because the course is taught at an actual farm, budget needs to be established for activities well in advance of each semester. There are actions that must be performed to both maintain and prepare the farm prior to the beginning of a semester. In addition, there are supplies that are used during the course that must be ordered and used during the course.

Currently we have trouble because we don't have an established budget or permission to make expenditures outside of the actual class dates.
393. Topics in Culinary Arts [CULN-150] belonging to Culinary Arts [CULN]
394. Safety and Sanitation [CULN-153] belonging to Culinary Arts [CULN]

Plan for topic "Students completing the course will be able to identify critical control points during all food handling processes as a method for minimizing the risk of food borne illness." : 2019/20

Dept. Chair will assess SP20 sections and submit by 6/1/20 - posted by SLO Chair

Plan for topic "Students completing CULN-153 will be able to identify critical control points during all food handling process as a method for minimizing the risk of food borne illness." : 2015/16

The students taking the class and then test were beginning students in the program. Common knowledge of Safety and Sanitation was not familiar. Students can retake the test on their own within a year and then we will see how many more pass.

We decided to try and use more ServSafe examples in the teacher lecture part of class to help orientate the students to be better prepared

Plan for topic "Students completing CULN-153 will be able to identify critical control points during all food handling process as a method for minimizing the risk of food borne illness." : 2012/13

Will continue to talk about this subject every chance the teacher can. He will bring up situations constantly, so as to not have a problem or to reiterate the subject.

Plan for topic "Students completing the course will be able to recognize sanitary and safety design features of food production equipment and facilities." : 2009/10

Students have a SLO form with list of areas of the Kitchen and their jobs in those areas and as they complete that section they have the teacher or supervisor of that area sign off and give a grade.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to develop menus that reflect different types of food service establishments.": 2018/19

<table>
<thead>
<tr>
<th>Topic</th>

### DVC Instructional Course SLO Action Plans

#### 396. Fundamentals of Beverage, Wine and Spirits [CULN-160] belonging to Culinary Arts [CULN]

**Plan for topic "Students completing the course will be able to distinguish wines by grape or other fruit variety."**: 2016/17

An action plan that was given, we asked an example of how students taking the class, were able to experience of "feeling the music" or "felt the music in connection when analyzing or listening to actual music while experiencing a beverage, that made an emotional impact on you. (Did the wine speak to you). Using this type of plan for the students to see if they really came away with what is being taught is a good way to assess.

**Plan for topic "Students completing CULN-160 will be able to Write and explain the equation for the chemical pathway of fermentation."**: 2013/14

More funding for getting supplies for examples needed to help understand the underlining concepts.

**Plan for topic "Students completing CULN-160 will be able to Define and explain the processes by which coffee and tea are made."**: 2013/14

Continue to effectively impart knowledge using a proven system and also seek ways to improve it. Need funding in order to continue the weekly nose-on tastings.

**Plan for topic "Students completing CULN-160 will be able to Define and explain how wine is made."**: 2013/14

Continue to utilize an effective system, while always looking for ways to improve upon it. Some improvements made were to utilize more field trips. Need funding for expenses for those fiel trips.
### Plan for topic "Students completing this course will be able to describe properties and functions of various ingredients, and demonstrate proper scaling and measurement techniques."

**2017/18**

As a plan of action, the department will continue to regulate the available rubrics to reinforce the given SLO. This information will be gathered and shared at department meetings so that all instructors teaching this course will be able to incorporate these best practices.

### Plan for topic "Students completing this course will be able to demonstrate basic decorating and presentation techniques in cake decoration."

**2015/16**

This course was added to the curriculum to meet the baking requirements needed in the CULN certificate and degree. This course has slowly grown in enrollment. The focus of this course is to provide a breadth of baking knowledge to CULN students to meet the ACFEF competencies. The faculty will continue to fine tune this assessment process by standardizing the rubric and incorporating them into D2L during the next assessment cycle.
Plan for topic "Students completing this course will be able to demonstrate table settings in accordance with general dining service rules.": 2016/17

After review there are no items from the previous action plan that pertain to this current action plan. These SLO assessments will be shared with our CTE advisory board in our spring meeting.

None of the SLO data affects the current certificate or degree.

After the review of our SLO data, the department determined for the course that there are no needs that need to be forwarded in our program review.

Plan for topic "Students completing this course will be able to demonstrate table settings in accordance with general dining service rules.": 2015/16

We have been in the new facilities since Fall 2014 so we have been modifying the evaluation rubric reflect the new classroom environment for the last several semesters and we now feel we have a rubric that is reflective of the new space. We are still looking to move the assessment rubric to leverage an electronic tablet based version, instead of a paper and clipboard version. This is still in the works. The department reviewed the results among its faculty and shared its results with its advisory committee.

Plan for topic "Students completing this course will be able to demonstrate table settings in accordance with general dining service rules.": 2012/13

This course will be taught in the new facilities beginning in Fall 2014 so we be testing out a modified evaluation rubric to better reflect the new classroom environment. We are also looking to move the assessment rubric from a paper based system to an electronic tablet based version.

Plan for topic "Students completing this course will be able to perform service in various styles.": 2012/13

This course will be taught in the new facilities beginning in Fall 2014 so we be testing out a modified evaluation rubric to better reflect the new classroom environment. We are also looking to move the assessment rubric from a paper based system to an electronic tablet based version.

Plan for topic "Students completing this course will be able to effectively provide service in buffet, banquet,and a la carte settings.": 2012/13

This course will be taught in the new facilities beginning in Fall 2014 so we be testing out a modified evaluation rubric to better reflect the new classroom environment. We are also looking to move the assessment rubric from a paper based system to an electronic tablet based version.
Plan for topic "Students completing the course will be able to identify types of meat, fish and poultry, and describe the common food service cuts for each.": 2016/17

Overall, many of the students feel that the subject matter is relevant and useful. The students feel time spent learning the different parts of all the animals used have helped them appreciate what is being presented. Most of the students feel that the actual touching and feeling is very important.

Plan for topic "Students completing the course will be able to evaluate the selection and storage processes for types of seafood, whether fresh or frozen.": 2016/17

Department likes to have this course because it shows where the product comes from. After the butchery part is done, most students see how the product is used in the different areas of the kitchen process.

Plan for topic "Students completing CULN-175 will be able to Breakdown a carcass from whole piece to primal cuts, then to subprimal cuts and then to portion cuts in meat-fish- poultry based on anatomy.": 2013/14

In the future for this class, more time is needed for students to continue practicing what has been demonstrated or shown once or twice. Class is too short. Monies to be allocated for students to have more carcasses to practice on. Monies to keep up with new equipment, Vacuum Zip Lock Machine) used in preserving food item.

Plan for topic "Students completing CULN-175 will be able to Identify types of meat, fish and poultry; describe the common food service cuts, preferred cooking technique and proper garnish for each.": 2012/13

Teacher needs to repeat lecture notes and go over subject matter. This is a class that students need to review constantly and possibly quiz more often.

Plan for topic "Students completing the course will be able to identify types of meat, fish and poultry, and describe the common food service cuts for each.": 2011/12

Discuss with department and the chair to see if we need to change and decide that that is to be changed and how.
### 400. Fundamental Techniques of Baking and Pastry [CULN-181] belonging to Culinary Arts [CULN]

#### Plan for topic "Students completing this course will be able to identify equipment and utensils used in baking and discuss proper use and care."

<table>
<thead>
<tr>
<th>2017/18</th>
</tr>
</thead>
<tbody>
<tr>
<td>Although all were successful, there were certainly different degrees of success. Further refinement of the rubric by the department will help to refine these scores and outcomes. For example, the idea &quot;what is the proper name and use for this piece of equipment&quot; should be more stringent.</td>
</tr>
</tbody>
</table>

#### Plan for topic "Students completing this course will be able to interpret recipes and produce cookies, quick breads, pies, cakes, creams and custards, cobblers, and demonstrate basic decorating and presentation techniques."

<table>
<thead>
<tr>
<th>2015/16</th>
</tr>
</thead>
<tbody>
<tr>
<td>The faculty will continue to develop this 2 tiered rubric and determine if it is a sustainable process for determining the students success in achieve the outcomes.</td>
</tr>
<tr>
<td>Plan for topic &quot;Students completing the course will be able to discuss current dietary guidelines and methods for adapting recipes to meet those guidelines.&quot;: 2017/18</td>
</tr>
<tr>
<td>---------------------------------------------------------------</td>
</tr>
<tr>
<td>After a few semesters of teaching this class and with the end of semester student/teacher evaluation, there is no reason to change anything on the curriculum. Student's seem to grasp the importance of nutrition and how this relates to other courses offered to them.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing the course will be able to discuss current dietary guidelines and methods for adapting recipes to meet those guidelines.&quot;: 2013/14</th>

### DVC Instructional Course SLO Action Plans

**403. Purchasing Operations and Systems Laboratory [CULN-192] belonging to Culinary Arts [CULN]**

**Plan for topic "Students completing the course will be able to describe the commonly used purchasing methods.": 2016/17**

<table>
<thead>
<tr>
<th>Most part of how subject matter is being given has been good.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Actual practicing of how our purchasing process needs to be practice and have students involved. Lab hours are good and need to be used. for that purpose.</td>
</tr>
<tr>
<td>Taking offsite visits to other venues need to happen so there is a comparative view of how other places do their purchasing/receiving.</td>
</tr>
</tbody>
</table>

**Plan for topic "Students completing the course will be able to analyze market fluctuations and product cost.": 2013/14**

| Not working on a plan of action. New instructor can assess this semester Spring 2014 and make recommendations as needed. |
Plan for topic "Students completing this course will be able to demonstrate and apply the ability to order food products on line, by phone or with a salesperson to procure needed product for labs."

**2017/18**

Students were shown hands on how to do the ordering. Students worked with a menu, ordered what the menu was asking for, looked at different prices and finally did the ordering. Most students wanted to do this and seemed engaged with the process.

Worked with the students to do an opening inventory which helped students to find where all the products were shelved. After this was done, students went online to look at the price, get the unit cost and then to extend the inventory.

**2014/15**

Worked: Students enjoy using the online program for ordering. Access to laptops in the classroom has made this much more practical and has led to more in-depth analysis of products because students are engaged. Students are far more inclined to explore new products / research better pricing / compare quality with the online system. We will expand the use of the laptops to involve more research-related exercises. Expanding the network access to speed up the internet service in larger classes may require additional funds.

Didn't work: Almost all unsuccessful attempts were driven by a lack of appropriate math skills. We will consider making CULN 115: Culinary Math, a prerequisite. We will also explore giving a small basic math assessment at the beginning of semester to look for opportunities to remediate and prepare students better for assignments involving a lot of computations.
### 405. Supervisory Management in Food Service [CULN-195] belonging to Culinary Arts [CULN]

#### Plan for topic "Students completing this course will be able to identify management functions and theories."

**2016/17**

The shift in teaching strategy to a team based approach seems to be working well and is enthusiastically enjoyed by the students. We feel that this approach will continue to be successful because of the hands on exposure the students receive during the course of the class. This helps them mimic real life situations encountered in the current work environment today. We will monitor the success of learning objective using the process.

**2013/14**

The shift in teaching strategy to a team based approach seems to be working well and is enthusiastically enjoyed by the students. We feel that this approach will continue to be successful because of the hands on exposure the students receive during the course of the class. This helps them mimic real life situations encountered in a work environment. We will monitor the success of learning objective using the process.

#### Plan for topic "Students completing this course will be able to evaluate concepts of authority and leadership styles."

**2013/14**

We feel that this approach will continue to be successful because of the hands on exposure the students receive during the course of the class. This helps them mimic real life situations encountered in a work environment. We will monitor the success of learning objective using the process.

#### Plan for topic "Students completing this course will be able to identify management functions and theories."

**2012/13**

The faculty have determined that the current SLO assessments are sufficient but need to be further developed to better analysis assessment topics. The department will work with the SLO Center to develop these modified assessments. The new assessment system will be used during the next SLO cycle. In reviewing the gathered data, it is possible that additional activities/equipment pertaining to kitchen processes should be added to the curriculum. The department feels that it needs at least one more cycle of SLO data to make that determination.

#### Plan for topic "Students completing this course will be able to evaluate concepts of authority and leadership styles."

In reviewing the gathered data, it is possible that additional activities/equipment pertaining to kitchen processes should be added to the curriculum. The department feels that it needs at least one more cycle of SLO data to make that determination. |
Plan for topic "Students completing the course will be able to define key terms and describe key concepts related to cost controls in food and beverage service operations."

Students have frequently been on campus for 10 hours before this class begins. The course content is already difficult for many culinary students who struggle with English and Math.

Most students have already taken Culinary Math, but do not show an appropriate level of skill for this course.

Culinary Math will be made a prerequisite and the instruction in that class is under review.

We are exploring an earlier section time and/or combining this course with a morning Purchasing Lab (CULN 192). The subject matter is complimentary.

Weekly, low stakes quizzes will be implemented to encourage retention.

Gamified learning strategies - Jeopardy and team problem solving competitions, showed promise during this section in engaging students and encouraging participation and energy levels.
The network connectivity in Room 180 is typically when more than twenty students attempt connect at one time. While there are fifty laptops available, the wireless hub does not seem to adequately handle more than twenty. We are exploring how to increase connectivity, as the laptops are another way to keep students engaged, and are an important part of financial analysis exercises.

### Plan for topic "Students completing the course will be able to define key terms and describe key concepts related to cost controls in food and beverage service operations.": 2013/14

Plan continued success and hopefully the new building with more student computer stations will assist. Usually there are 40 students with 30 computers which caused over crowding and inadequate learning.

### Plan for topic "Students completing the course will be able to define key terms and describe key concepts related to cost controls in food and beverage service operations.": 2012/13

The faculty have determined that the current SLO assessments are sufficient but need to be further developed to better analysis assessment topics. The department will work with the SLO Center to develop these modified assessments. The new assessment system will be used during the next SLO cycle.
Plan for topic "Students completing this course will be able to produce different Artisan Breads while demonstrating personal safety.": 2016/17

We will continue to measure the SLO using the current process, but we are considering expanding the instructors rubric during the next cycle to include more than just 3 levels of achievement.

Plan for topic "Students completing this course will be able to recognize the workmanship, craftsmanship, artistry and detail of the trade.": 2016/17

This particular SLO may need to be re-evaluated, in order to achieve a higher class success rate.
DVC Instructional Course SLO Action Plans

408. Candies, Chocolates, and Truffles [CULN-212] belonging to Culinary Arts [CULN]
Plan for topic "Students completing this course will be able to analyze formulas, accurately mise en place, and prepare selected products according to instructions.": 2019/20

Dept. Chair will assess class next time it is offered - posted by SLO Chair

Plan for topic "Students completing this course will be able to analyze formulas, accurately mise en place, and prepare selected products according to instructions.": 2015/16

The faculty feel that this has been a successful course but would like to gather some additional assessment data. Enrollment has steadily declined in this course, causing a cancellation in the most recent offering. The faculty feels that offering this course every semester is not in the best interest of the students and the program, and is therefore only offering this course in the spring semester, beginning in spring 2017. This should help enrollment climb back to acceptable numbers.
DVC Instructional Course SLO Action Plans

409. Seasonal Spring Desserts [CULN-213] belonging to Culinary Arts [CULN]
Plan for topic "Students completing this course will be able to analyze formulas, accurately mise en place, and prepare selected products according to instructions." : 2019/20

Updated WebSLOs: "Dept. Chair will assess class next time it is offered - posted by SLO Chair"

Plan for topic "Students completing this course will be able to analyze formulas, accurately mise en place, and prepare selected products according to instructions." : 2015/16

The faculty feel that this has been a successful course but would like to gather some additional assessment data. During the next term, the course will incorporated a portfolio process. The instructor will use a rubric and evaluate the portfolio to help determine if the student met the learning objectives of the course.
DVC Instructional Course SLO Action Plans

410. Seasonal Fall Desserts [CULN-214] belonging to Culinary Arts [CULN]

Plan for topic "Students completing the course will be able to analyze formulas, accurately mise en place, and prepare selected products according to instructions." 2016/17

The faculty feel that this has been a successful program but would like to gather some additional assessment data.

Plan for topic "Students completing the course will be able to demonstrate and practice the appropriate basic skills/techniques of assigned pastry and dessert preparation." 2016/17

The faculty will continue to measure the SLO using the current process, but will consider expanding the instructors rubric during the next cycle to include more levels of achievement than just 3.

Plan for topic "Students completing the course will be able to plan, prepare, plate, and evaluate dessert using industry standards." 2016/17

The faculty have determined that the current levels of assessments are well developed, but could be expanded to include more than just 3 levels of achievement.

Plan for topic "Students completing the course will be able to plan, prepare, plate, and evaluate desserts using industry standards." 2013/14

The faculty feel that this has been a successful course but would like to gather some additional assessment data. During the next term, the course will incorporated a portfolio process. The instructor will use a rubric and evaluate the portfolio to help determine if the student met the learning objectives of the course.

The faculty have determined that the current level of assessments are well developed.

The faculty have determined that the current level of assessments are well developed. The faculty are discussing the inclusion of a quiz based assessment in addition to the kitchen demonstration.

We will continue displaying student sugar showpieces for the spring buffet and graduation reception, demonstrating competency in this outcome.

We will continue to emphasize safety at all times.

We will continue to display student sugar showpieces for our spring buffet and graduation ceremony.

We will most likely promote the use of isomalt sugar over regular sugar because high humidity causes real sugar showpieces to start melting.

No SLO-related changes are recommended for Title V course outline or instructional practice. At the time of a curriculum update for this course, no later than once every five years, measurement criteria for one of the stated student learning outcomes will be identified, implemented, and analyzed. Any recommended changes to the curriculum outline or in instruction will be noted on the e-SLO data site.

Any recommended changes to the curriculum outline or in instruction will be noted on the e-SLO data site.
or in instruction will be noted on the e-SLO data site.
### 412. Food and Wine Pairing [CULN-216] belonging to Culinary Arts [CULN]

#### Plan for topic "Students completing CULN-216 will be able to identify the primary wine producing regions of the world.":: 2017/18

| The department should reaccess after a semester of world maps with growing regions are passed out to students as part of the course |

#### Plan for topic "Students completing the course will be able to read a wine label and be able to determine which grape varietals and their characteristics are predominate.":: 2017/18

| Need to clarify ABC laws as it relates to taste and spit for educational purposes |

#### Plan for topic "Students completing the course will be able to successfully pair wines with menu items.":: 2017/18

| None needed |

#### Plan for topic "Students completing the course will be able to complete a wine and food evaluation.":: 2017/18

| None needed |

#### Plan for topic "Students completing the course will be able to state the main grape varietals consumed by the market": 2017/18

| The department should consider a stand-alone class in wine appreciation |

#### Plan for topic "Students completing CULN-216 will be able to identify the primary wine producing regions of the world.":: 2012/13

| 1-We need a wine appreciation class added to the program as recommended. 2-Separate beverage classes into two classes, one with wines only. |

#### Plan for topic "Students completing the course will be able to read a wine label and be able to determine which grape varietals and their characteristics are predominate.":: 2012/13

| 1-We need a wine appreciation class added to the program. 2-Split beverages into two separate classes with wines in one. |

#### Plan for topic "Students completing the course will be able to successfully pair wines with menu items.":: 2012/13

| 1-I will require this assignment to be completed in class with no outside resources. |

#### Plan for topic "Students completing the course will be able to complete a wine and food evaluation.":: 2012/13

| BRING AND SERVE NON-ALCOHOLIC WINE! |
### 413. Advanced Cuisine [CULN-220] belonging to Culinary Arts [CULN]

**Plan for topic "Students completing the course will be able to discuss and demonstrate the elements of plate presentation and meal composition."**: 2018/19

Classes that are larger have less opportunity to achieve a higher success rate than smaller classes because their days cooking in the restaurant are more limited. Lengthening the operational weeks would be advisable.

**Plan for topic "Students completing the course will be able to demonstrate proficiency in preparation of meats, and in food curing skills."**: 2018/19

Classes that are larger have less opportunity to achieve a higher success rate than smaller classes because their days cooking in the restaurant are more limited. Lengthening the operational weeks would be advisable.

**Plan for topic "Students completing the course will be able to develop menu items suitable for white tablecloth dining room service."**: 2018/19

None necessary

**Plan for topic "Students completing the course will be able to identify menu alternatives and ingredient substitution for special diets and to maximize use of seasonal products."**: 2018/19

This semester we are developing healthy alternatives including a wide variety of “Gluten-free” choices for future use.

**Plan for topic "Students completing the course will be able to discuss and demonstrate the elements of plate presentation and meal composition."**: 2017/18

The department will assess this class the next time it is offered.

**Plan for topic "Students completing the course will be able to develop menu items suitable for white tablecloth dining room service."**: 2013/14

Most students were able to pick up on what was needed for this assessment. There is more time needed to review this area of concern to allow students more practice in this area. More time to look, study what is being done in industry. Monies to be used to have outside restaurants come and show their style for the students or for students to go out to restaurants to see what is out there. This may be helpful for students to get time in those restaurants or employment and experience.

**Plan for topic "Students completing the course will be able to discuss and demonstrate the elements of plate presentation and meal composition."**: 2012/13

2012-10-12: Maintain customer critique and comments for every student dish prepared

2014-01-30: 1-Continue to use customer and industry feedback. 2-This rotation is only 8 days and some learning disabled students require more time to achieve competency. Increasing the hours of the class may help slow learners.

### 415. International Cuisine [CULN-228] belonging to Culinary Arts [CULN]

#### Plan for topic "Students completing the course will be able to compare and contrast the societal and geographical influences on multinational culinology.": 2017/18

- Students who have difficulty with writing were recommended to take remedial classes to improve their writing skills

#### Plan for topic "Students completing the course will be able to evaluate the relationship of historical events to recipes and foods of an area/country.":: 2017/18

- Students who have difficulty with writing were recommended to take remedial classes to improve their writing skills

#### Plan for topic "Students completing the course will be able to create typical menus for at least three non-European countries.":: 2017/18

- None needed

#### Plan for topic "Students completing the course will be able to compare and contrast the societal and geographical influences on multinational culinology.":: 2014/15

- Culinary would like to include visual maps and video of the particular country in order for students to see what part of the world is being discussed. Setting aside monies in order to facilitate this. Helps show why and how certain cuisines do what they do.

#### Plan for topic "Students completing the course will be able to create typical menus for at least three non-European countries.":: 2014/15

- Culinary Department would like to compile any and all assigned international cuisine menus and make a reference book for future class to use. This may require funding to have someone to type, laminate and secure information in a binder like book.
### DVC Instructional Course SLO Action Plans

#### 416. Culinary Competition I [CULN-230A] belonging to Culinary Arts [CULN]

**Plan for topic "Students completing this course will be able to compete in one category of the ACF student competition requirements":**

| 2017/18 | None needed |

**Plan for topic "Students completing this course will be able to draw out on paper their presentation of the selected category within ACF requirements":** 2017/18

| None needed |

**Plan for topic "Students completing this course will be able to write out a list of ingredients necessary to complete the category":** 2017/18

| None needed |

**Plan for topic "Students completing this course will be able to assist with the final presentation of the category":** 2017/18

| None needed |
DVC Instructional Course SLO Action Plans

417. Culinary Competition II [CULN-230B] belonging to Culinary Arts [CULN]
418. Off-Campus Catering I [CULN-235A] belonging to Culinary Arts [CULN]
Plan for topic "Students completing this course will be able to demonstrate basic food preparation, cooking techniques, and service used in catering events.": 2018/19

Being this is a beginning class, students working with the Chef-In-Charge and Instructional Assistants will help and learn the different categories of competition.

As students go thru the process, the retention of tis style of competition will advance the students to the next level and be able to mentor incoming students at this level of learning.

#### 422. On-Campus Catering III [CULN-240C] belonging to Culinary Arts [CULN]

**Plan for topic "Students completing this course will be able to help the teacher with the planning and supervising a variety of on-campus events."**: 2018/19

Teacher and Third semester Catering Class student will continue to have more catering events to continue the learning process of catering to a group. As a Department we would like to upgrade our Catering Supplies and equipment. We are trying to show off our Department and with upgrades Catering supplies and equipment, we will be able to continue this process. This was discussed in program and department review.

**Plan for topic "Students completing this course will be able to help the teacher with the planning and supervising a variety of on-campus events."**: 2015/16

Teacher and Third semester Catering Class student will continue to have more catering events to continue the learning process of catering to a group. As a Department we would like to upgrade our Catering Supplies and equipment. We are trying to show off our Department and with upgrades Catering supplies and equipment, we will be able to continue this process. This was discussed in program and department review.
Plan for topic "Students completing this course will be able to demonstrate appropriate techniques in preparation and presentation of pastries, cakes, plated desserts and spoon desserts.": 2015/16

The faculty will continue to develop this 2 tiered rubric and determine if it is a sustainable process for determining the students success in achieve the outcomes.
Plan for topic "Students completing this course will be able to improve their communication skills while working on a team with fellow peers.": 2017/18

Although the students did pass, a more stringent and complete rubric will be needed to improve the students outcomes.
425. Internship in Occupational Work Experience Education in CULN [CULN-296] belonging to Culinary Arts [CULN]
### DVC Instructional Course SLO Action Plans

#### 426. Independent Study [CULN-298] belonging to Culinary Arts [CULN]

Plan for topic "Students completing this course will be able to complete specific outcomes of an approved Independent Study application according to School requirements.": 2019/20

| This is an Independent Study Course Number and will be assessed next time it is utilized - posted by WebSLO's Chair |

Plan for topic "Students completing this course will be able to verify the learning skills from the Independent Study.": 2015/16

| Teacher/student to continue reviewing what Industry is teaching and that it meets DVC/Industry standards. Teachers should be given time to review and investigate possible independent studies to verify the standards. |
DVC Instructional Course SLO Action Plans

427. Student Instructional Assistant [CULN-299] belonging to Culinary Arts [CULN]
Plan for topic “Students completing CULN-299 will be able to A. Increase learning through involvement as a teacher's aide, lab assistant or research assistant.”: 2017/18

The department is happy with how the process is currently being handled. Most times, student is a third or fourth semester student who is familiar with the process which helps the assigned teacher an extra eye over the whole classroom.

Plan for topic “Students completing CULN-299 will be able to A. Increase learning through involvement as a teacher's aide, lab assistant or research assistant.”: 2013/14

Being this was the first semester to have this as a set class, our department will be setting up on an I-Pad the set goals for any student to use and follow. Hopefully there will be monies available for the department to get this state of the art machine.
### Plan for topic "Students completing this course will be able to propose a topic to be performed on a proscenium stage."

DVC Instructional Course SLO Action Plans

430. Music Theory for Dancers [DANCE-205] belonging to Kinesiology, Athletics and Dance [DANCE]

Plan for topic "Students completing the course will be able to assess music and sound as it relates to crafting dance(s).": 2018/19

This course is offered every other academic year and will be assessed next time it is offered which is Fall 2019.

Plan for topic "Students completing the course will be able to demonstrate rhythmic and structural components of music as it relates to dance making." : 2015/16

The quiz included notation of music notes and proved to be very difficult for dance students to fully understand and master. Students were highly discouraged and while a majority of students passed the quiz. It is clear that a more accessible textbook or worksheets are needed to give the students homework and reference materials more suited to their needs. A new textbook and online materials will be added to the course to help with student success.

Plan for topic "Students completing the course will be able to analyze choreography for rhythmic form and content." : 2015/16

These assignments were extremely successful because it followed a somewhat difficult quiz, included dance, and a student created Rhythm and Notation assignment. It would be helpful to gauge students understanding of the material if a less open parameter were assigned. This SLO should be assessed again with a stronger limitation included in the assignment.

Plan for topic "Students completing the course will be able to assess music and sound as it relates to crafting dance(s).": 2012/13

Continue to refine and improve checklist.

Plan for topic "Students completing the course will be able to demonstrate rhythmic and structural components of music as it relates to dance making." : 2012/13

Explore new ways of presenting the material. The rubric evaluation changes and evolves to meet the students needs.

Plan for topic "Students completing the course will be able to analyze choreography for rhythmic form and content." : 2012/13

Continue quest to find perfect method of presenting material. Each new group provides new challenges therefore methods are constantly evolving.
Plan for topic "Students completing the course will be able to demonstrate proper alignment and a degree of epaulement (genre-specific carriage of the body) while executing movement(s).": 2018/19

All but three students were successful during the assessment. A good number of students needed additional repetition and slower tempos. The Pre/Post planned assessment was abandoned after it was deemed too time consuming given the new plan to use additional repetition and tempo. For the next assessment a pre/post assessment will be done.

Plan for topic "Students completing the course will be able to demonstrate classical ballet vernacular such as croise devant, efface devant, quatrieme devant, ecarte devant, epaule devant and port de bras au corps cambre."; 2017/18

Canvas was used as a supplement to the course. The next time this course is offered an emphasis on using Canvas will be encouraged and an in class introduction and practice will be done.

Plan for topic "Students completing the course will be able to perform intermediate ballet technique, allegro, adagio and locomotor movements."; 2017/18

Students were given a pretest in small groups. All vocabulary was available on canvas. Students were allowed an opportunity to construct and practice material prior to testing. While some students were not successful the majority of students did well. This assessment should be done again with additional samples of vocabulary uploaded onto canvas.

Plan for topic "Identify ballet (elementary and intermediate) vernacular and vocabulary."; 2017/18

All students were given vocabulary on canvas. The students who referred to canvas showed success on the quiz. In future classes students will be encouraged to use canvas early into the semester and some vocabulary will be put on the board to remind students as well.

Plan for topic "Students completing the course will be able to demonstrate classical ballet vernacular such as croise devant, efface devant, quatrieme devant, ecarte devant, epaule devant and port de bras au corps cambre."; 2014/15

Students were directed to the new D2L system but some were not successful at accessing the material. Instructor will emphasize the use of D2L for supplemental material, update powerpoint information and check in with students regarding D2L usage including News updates and phone registration for alerts.

Plan for topic "Students completing the course will be able to demonstrate proper alignment and a degree of epaulement (genre-specific carriage of the body) while executing movement(s).": 2014/15

The results from this Academic year in comparison with the previously assessed academic year are similar, with the exception of the 2 students who did not complete the assessment. A pre and post assessment needs to happen on the next assessment for a comparison of students success and physical growth measurement within a semester.

Plan for topic "Students completing the course will be able to perform intermediate ballet technique, allegro, adagio and locomotor movements."; 2014/15

Center exercises and Dance movements were not as successful in this semester. A two part assessment (suggested previous assessment) was not utilized as the approach
DVC Instructional Course SLO Action Plans

was deemed too time consuming. It was noted that students needed more time and needed to be given an opportunity to perfect shorter phrases. Next assessment will focus on shorter dance phrases, more time, and small group work.

Plan for topic "Identify ballet (elementary and intermediate) vernacular and vocabulary.": 2014/15

After reviewing the results and polling the students it was discovered that the students did not access the vocabulary on D2L. Students will be reminded to review materials on D2L and instructor will check in throughout the semester to alert the students of materials and handouts in D2L.

Plan for topic "Students completing the course will be able to demonstrate classical ballet vernacular such as croise devant, efface devant, quatrieme devant, ecarte devant, epaule devant and port de bras au corps cambre.": 2011/12

Instructor will continue to use assessment method and encourage the students to review the materials provided on WebCT.

Plan for topic "Students completing the course will be able to demonstrate proper alignment and a degree of eaulement (genre-specific carriage of the body) while executing movement(s).": 2011/12

Instructor will continue using the current assessment method and compare future data to see if the current instruction method is the appropriate process for students success.

Plan for topic "Students completing the course will be able to perform intermediate ballet technique, allegro, adagio and locomotor movements.": 2011/12

Instructor will continue using the current assessment method however it was noted by the instructor that the assessment given was more challenging for the students and took a greater amount of time in the semester for students to complete. A possible two-part assessment will be considered if the next assessment on record notes the same results.

Plan for topic "Identify ballet (elementary and intermediate) vernacular and vocabulary.": 2011/12

Instructor observed better results than previous assessment however students new to WebCT need to be reminded early to study materials and prepare for the quiz. Instructor will continue with the current method and look at future assessments for comparison.

Plan for topic "Students completing the course will be able to demonstrate classical ballet vernacular such as croise devant, efface devant, quatrieme devant, ecarte devant, epaule devant and port de bras au corps cambre.": 2010/11

2011-02-10: Instructor will present an additional quiz prior to assessment to better prepare all the students in the class.

2011-08-10: Instructor will continue to use assessment method however a new worksheet will be made available on WebCt with a reminder to all students prior to assessment to study materials. Next assessment FA11

Plan for topic "Students completing the course will be able to demonstrate proper alignment and a degree of eaulement (genre-specific carriage of the body) while executing movement(s).": 2010/11

2011-08-10: Instructor will continue to encourage students on demonstrating genre specific classwork and rotate students in the classroom so that students having difficulties can be identified earlier in the semester.

2011-08-10: Instructor will continue using assessment method. Next assessment FA11
Plan for topic "Identify ballet (elementary and intermediate) vernacular and vocabulary.": 2010/11

Instructor will remind students to access study materials on WebCT to help prepare for quiz. Next assessment FA11
## DVC Instructional Course SLO Action Plans

### 432. Ballet II [DANCE-213] belonging to Kinesiology, Athletics and Dance [DANCE]

#### Plan for topic "Students completing the course will be able to identify ballet (intermediate and advanced) vernacular and vocabulary."

**2018/19**

Students were given plenty of notice and reminders regarding the quiz. Some students ignored the Canvas handouts which was reflected in their grades. Instructor will continue to remind students of the handout study guide and take a moment to check in with students on Canvas regarding usage and review of materials.

**Plan for topic "Students completing the course will be able to perform advanced ballet technique, allegro, adagio and locomotor movements."**

**2015/16**

All students were asked to perform either solo or duet. This made the degree of difficulty higher for both mastery and memory. The student with the highest score was at higher proficiency due to past experience and competitions. The students in the 80% range exceeded expectations while one student did not. This assessment was the first time a complete dance was required and video-taped. It was an excellent gauge of students' strengths and weaknesses. This assessment should be done again with students being required to watch the video and write an evaluation of their performance.

**Plan for topic "Students completing the course will be able to demonstrate classical ballet vernacular such as croise devant, efface devant, quatrieme devant, ecarte devant, epaule devant, port de bras through choreography."**

**2015/16**

Two semesters were assessed to better understand what the effects of a combined class have on an Intermediate level Student. Part 1, for both semesters showed a great deal of success with the exception of one student and Part 2 (Arabesques) showed success that was not as comparable to Part 1 but still within expectations (one student being the exception.) This SLO will be assessed again with an added "analysis and criticism" component for the student.

**Plan for topic "Students completing the course will be able to identify ballet (intermediate and advanced) vernacular and vocabulary."**

**2012/13**

This was not the results expected. Expectations for this group are higher as it is an Advanced Level. Students will be reminded earlier into the Semester that expectations for this class Level are higher.

**Plan for topic "Students completing the course will be able to demonstrate classical ballet vernacular such as croise devant, efface devant, quatrieme devant, ecarte devant, epaule devant, port de bras through choreography."**

**2012/13**

All students did well as they were well rehearsed. The student who failed was not prepared and did not complete the evaluation.

**Plan for topic "Students completing the course will be able to identify ballet (intermediate and advanced) vernacular and vocabulary."**

**2010/11**

The majority of students did well. Instructor will continue assessment method and remind students to access WebCT provided worksheets to study prior to quiz. Next assessment FA11.

**Plan for topic "Students completing the course will be able to demonstrate proper alignment and epaulement (genre-specific carriage of course Action PlansOutcome Assessment HistoryPage 800 of 2394**
### Plan for topic "Students completing the course will be able to demonstrate classical ballet vernacular such as croise devant, efface devant, quatrieme devant, ecarte devant, epaule devant, port de bras through choreography." : 2010/11

<table>
<thead>
<tr>
<th>Date</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2011-08-10</td>
<td>While students received a passing grade for their work. Very few students received high scores due to the quality of work presented. Instructor will present a quiz earlier in the semester to assist students.</td>
</tr>
<tr>
<td>2011-08-10</td>
<td>Instructor will continue utilizing assessment method and compare the next assessment results. Next assessment FA11</td>
</tr>
</tbody>
</table>
Plan for topic "Students completing the course will be able to perform complex movements at a high degree of difficulty within allegro, adagio and locomotor movements with emphasis on performance quality.”: 2018/19

The student enrolled did not meet the standard of the assessment. A video was made available for the student, as was suggested in previous action plan as a method to help student success, however the student was unable to complete the assignment at the degree considered successful. This course has a higher degree of excellence attached to its level. Future students will be advised of this early and a video of work in progress will be made available on canvas to help student success.

Plan for topic "Students completing the course will be able to perform classical ballet vernacular such as croise devant, efface devant, quatrieme devant, ecarte devant, epaule devant and port de bras an corps camber with an emphasis on performance qualitative expertise.”: 2016/17

While all students who took the quiz were successful, it is believed the points deemed as level of success is too low. At the level of this course a higher degree of excellence needs to be established and required. This SLO criteria will be changed to meet the new parameters for degree of excellence. Additionally, students will be given the opportunity to self assess themselves prior to the quiz using video technology playback posted on canvas.

Plan for topic "Students completing the course will be able to perform classical ballet vernacular such as croise devant, efface devant, quatrieme devant, ecarte devant, epaule devant and port de bras an corps camber with an emphasis on performance qualitative expertise.”: 2013/14

The results of this topic are not consistent with the performance topic assessments. A pre-assessment quiz would better prepare students for the final quiz and help student success on other assessments.

Plan for topic "Students completing the course will be able to perform proper alignment and epaulement (genre-specific carriage of the body) while executing movement(s) related to traditional classical ballet variations.”: 2013/14

Students completed the assigned task to Instructor satisfaction. Two contrasting shorter variations will be used to assess the students in upcoming semester.

Plan for topic "Students completing the course will be able to perform complex movements at a high degree of difficulty within allegro, adagio and locomotor movements with emphasis on performance quality.”: 2013/14

Instructor was satisfied with the results but feels a solo evaluation is a more accurate measure of student success. Next evaluation will include a minimum 64 measure solo.
434. Pointe Technique [DANCE-216] belonging to Kinesiology, Athletics and Dance [DANCE]

Plan for topic "Students completing the course will be able to demonstrate proper use and care of equipment and appropriate safety techniques for Pointe ballet."

<table>
<thead>
<tr>
<th>Year</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>2016/17</td>
<td>The students enrolled in the class did well on the quiz. It was concluded that the students should take this portion of the quiz earlier leaving room for an analysis and critique of their work as a final assessment. A video portion will be added to this assessment.</td>
</tr>
<tr>
<td>2013/14</td>
<td>All students assessed well. This topic is important to the course and the students success. A short answer quiz with questions relating to this topic will be added to this assessment.</td>
</tr>
<tr>
<td>2013/14</td>
<td>Instructor was satisfied with the results. The student with the lowest score needed metatarsal conditioning. An additional lecture on warm-up class conditioning will be added to help all student with stability challenges.</td>
</tr>
<tr>
<td>2013/14</td>
<td>Instructor was happy with the results however a reassessment needs to happen. A group ballet variation was given for the assessment and a solo should be given to better assess the students strengths.</td>
</tr>
<tr>
<td>2012/13</td>
<td>While students showed knowledge and demonstrated adequate capabilities with equipment it was noted that this degree of knowledge came late into the semester. A pre and post evaluation should be used to help students understand the importance of being successful in use and equipment care.</td>
</tr>
<tr>
<td>2012/13</td>
<td>The majority of the students had a difficult time performing movements without the Barre and it was noted that center work was impossible because the surface of the floor is too slippery. For future semesters a mandatory rubber shoe tip should be required at the beginning of the semester.</td>
</tr>
<tr>
<td>2010/11</td>
<td>Instructor will continue utilizing the current assessment method. Next assessment SP12</td>
</tr>

</table>
435. Jazz Dance I [DANCE-222] belonging to Kinesiology, Athletics and Dance [DANCE]  

Plan for topic "Students completing the course will be able to demonstrate intermediate level jazz warm-up."": 2017/18

- Technical quality was emphasized in this evaluation. The quality of movement was mixed with some students focusing on details while others showed some confusion. Some video was made available on canvas to great results for some students. Next semester more sample videos will be made available to inspire the students.

Plan for topic "Students completing the course will be able to perform instructor-choreographed jazz dance combinations."": 2017/18

- Students did well and the plan is to give them longer additional style of dances to assess their strengths.

Plan for topic "Students completing the course will be able to demonstrate intermediate level locomotor jazz movement."": 2014/15

- Students were challenged with an emphasis on technical esthetics and while they did well they were too fixated on the assessment and not excelling in the movement. Next assessment the focus will be on technical quality and reminding students to focus less on assessment and more on the movement.

Plan for topic "Students completing the course will be able to perform instructor-choreographed jazz dance combinations."": 2014/15

- A similar assessment was completed on a previous academic year with the exact same time frame for completion. The same parameters were used for this assessment but the results were underwhelming. Students needed more preparation for the class than previous semesters. Next assessment will focus on time management and upper level peer mentoring to help students feel more confident.

Plan for topic "Students completing the course will be able to demonstrate intermediate level jazz warm-up."": 2011/12

- Instructor will continue to use the assessment. Instructor noted that irregular attendance affected some student's mastery of skills. Students will be reminded that class attendance and participation directly affects their performance skills.

Plan for topic "Students completing the course will be able to demonstrate intermediate level locomotor jazz movement."": 2011/12

- Instructor was pleased with the results and will continue to use the assessment method. More emphasis on esthetics will be placed to see if the students can accomplish the skills at a higher level of mastery.

Plan for topic "Students completing the course will be able to perform instructor-choreographed jazz dance combinations."": 2011/12

- This assessment was done towards the end of the semester. The remainder of the students in the class worked extremely hard and made excellent progress. Instructor will continue to use assessment method.

Plan for topic "Students completing the course will be able to demonstrate intermediate level locomotor jazz movement."": 2010/11

- Instructor will continue to use the assessment and compare next semester data. Next assessment Fall 2011

Plan for topic "Students completing the course will be able to perform instructor-choreographed jazz dance combinations."": 2010/11

- Instructor will continue to use assessment method. Next assessment Fall 2011
DVC Instructional Course SLO Action Plans

436. Jazz Dance II [DANCE-223] belonging to Kinesiology, Athletics and Dance [DANCE]

Plan for topic "Students completing the course will be able to demonstrate advanced level warm-up techniques.":: 2017/18

Students at the advanced level should have done well on this assessment, and while the majority of the students did do well, the degree of excellence should be greater. A video for self evaluation will be made for the students to help them see where they can improve.

Plan for topic "Students completing the course will be able to demonstrate advanced level locomotor jazz movement(s).":: 2017/18

With the exception of 1 student all students achieved success. An additional assessment of the same rubric should be done to compare data. The video of the work should continue to be included as it is a great learning tool for the students.

Plan for topic "Students completing the course will be able to perform instructor-choreographed jazz dance combinations.":: 2017/18

For this level a higher degree of excellence is expected. Students will be given a video of their work in the future to do a self evaluation to help improve their technique.

Plan for topic "Students completing the course will be able to demonstrate advanced level locomotor jazz movement(s).":: 2014/15

This semester the students exceeded expectations. Instructor should evaluate students mid semester and add an improvisational component to the last assessment to better assess student skills and limitations.

Plan for topic "Students completing the course will be able to perform instructor-choreographed jazz dance combinations.":: 2014/15

This class is instructed with another level. Students at this level should be performing at a higher level than the other students. Next semester instructor will have students work with more responsibility including additional choreography manipulation assignments.

Plan for topic "Students completing the course will be able to demonstrate advanced level locomotor jazz movement(s).":: 2010/11

Instructor will continue utilizing assessment methods. Next assessment Fall 2011

Plan for topic "Students completing the course will be able to perform instructor-choreographed jazz dance combinations.":: 2010/11

The Advanced level students may need to be challenged more as the results reflect high marks in all categories. Same assessment method will be used. More content will be added and data from two semesters for comparison. Next assessment Fall 2011

Plan for topic "Students completing the course will be able to perform complex axial and locomotor dance movements at a higher degree of difficulty consistent with pre-professional level of performance quality." : 2016/17

This semester students were challenged for a higher degree of success. They were also the strongest students in ever experienced in this class level. This topic will be assessed again with the same degree of rigor. A video portion of the students' performance will be made available on canvas for the student to evaluate their work.

Plan for topic "Students completing the course will be able to perform complex axial and locomotor dance movements at a higher degree of difficulty consistent with pre-professional level of performance quality." : 2013/14

I am pleased with the results however during the assessments performance quality points were lower in comparison to technique. The next semester combinations should include variation in music to influence the students performance quality.

Plan for topic "Students completing the course will be able to perform complex axial and locomotor dance movements at a higher degree of difficulty perform advanced level warm-up technique with increased flexibility and high success of body alignment consistent with pre-professional level technique." : 2013/14

All students are expected to do well at this level as they are all AA Dance degree candidates. A longer series of movements should be added in the next semester to assess the students aerobic stamina as well as their ability to complete exercises given.

Plan for topic "Students completing the course will be able to perform instructor-choreographed modern dance combinations and supplement choreography to enhance performance quality." : 2013/14

The students assignment included a contact improvisation that was to be set for final presentation. One of the students did not work with a partner and therefore scored much lower than the other students. Students in this section are to be held to a pre-professional performance standard. For the next semester a lecture on the rigors of the professional demands of performance artists will be added to this class to help students understand the nature of performance demands.
Plan for topic "participate in the audition process.": 2017/18
The checklist previously developed was not available to the newest instructor of record. A more thorough checklist will be developed for the next course assessment.

Plan for topic "perform a choreographed piece in front of an audience.": 2017/18
Students worked well over a period of three shows with the exception of one student. To be more thorough a better rubric will be developed during flex week with the new instructors assigned to this course.

Plan for topic "demonstrate retention of movement patterns and comprehensive rhythmic skills.": 2017/18
Students accomplished all their work but they need to use their notebooks to better do work in class. Instructor will provide more in class time to work in their journals.

Plan for topic "participate in the audition process.": 2014/15
Continue to develop the checklist to assess students more accurately

Plan for topic "perform a choreographed piece in front of an audience.": 2014/15
Continue to try to develop the best possible rubric evaluation

Plan for topic "demonstrate retention of movement patterns and comprehensive rhythmic skills.": 2014/15
Continue to develop a rubric to assess these skills as clearly as possible

Plan for topic "participate in the audition process.": 2011/12
Continue to work on creating the perfect checklist evaluation.

Plan for topic "perform a choreographed piece in front of an audience.": 2011/12
Continue to assess and refine the rubric evaluation.

Plan for topic "demonstrate retention of movement patterns and comprehensive rhythmic skills.": 2011/12
Looking for the perfect rubric evaluation, like creating the perfect dance is a lifetime pursuit. The dancer/student is constantly working on creating the ideal instrument through practice, repetition, review, discussion and more practice. The perfect performance is a lifetime quest. It is in the doing. Again and again and again.
### Plan for topic "Students completing DANCE-243 will be able to Utilize staging techniques to realign instructor choreographed work to fit the size of the stage."

- **2017/18**: Students were led by peer leaders for all of the assignments which lead to greater degree of success. For the students in groups without a group leader it took more time to complete their task. Instructor will plan on always having a group leader for every assignment to ensure success.

- **2014/15**: Continue to work on the skills required to help students achieve success.

- **2013/14**: Each new group of dancer's and dances provide new challenges. We change and evolve to meet the needs of our student/dancer's.

- **2013/14**: Methods are constantly changing and evolving to fit each new group. New dances, new dancer's, new ways of achieving our goals.

### Plan for topic "Students completing this course will be able to" will be able to understand direction terminology (i.e upstage/downstage.)"

- **2017/18**: Students worked with four different instructors for this multi level class. All did well. Another topic will be assessed for this course.

- **2014/15**: Continue to try to improve the rubric.

- **2013/14**: The checklist changes with each new group and each new dance.

### Plan for topic "Students completing DANCE-243 will be able to Adapt movement and physicality to accomodate the variable lighting effects on an open elevated stage space."

- **2017/18**: Students were led by peer leaders for all of the assignments which lead to greater degree of success. For the students in groups without a group leader it took more time to complete their task. Instructor will plan on always having a group leader for every assignment to ensure success.

- **2014/15**: Continue to try to improve the rubric.

- **2013/14**: Each new group of dancer's and dances provide new challenges. We change and evolve to meet the needs of our student/dancer's.

- **2013/14**: Methods are constantly changing and evolving to fit each new group. New dances, new dancer's, new ways of achieving our goals.
Plan for topic "Students completing this course will be able to demonstrate retention of intermediate movement patterns and comprehensive rhythmic skills": 2017/18

The four students were upper level in a multiple section class. They worked well with others but showed greater independence. In future classes students will be assigned to lead a group for greater success in rehearsal and performance.
Plan for topic "Students completing this course will be able to understand direction terminology (i.e. upstage/downstage.)": 2017/18

The students in this class are more intermediate and more comfortable working on the stage. Future class will include a group assignment to lead a group of less experienced dancers. Another topic will be chosen to assess.

Plan for topic "Students completing this course will be able to utilize staging techniques to realign instructor choreographed work to fit stage.": 2017/18

All students worked independently to achieve staging. Two of the three students worked with a group independently to accomplish staging. For upcoming semesters a plan to use intermediate students to assist additional dances will be assigned to help show efficiency.

Plan for topic "Students completing this course will be able to perform and adjust instructor choreographed intermediate movements for costumes that differ from practice clothes.": 2017/18

The three students had differing challenges. One student could not complete an entire dance with a mask without hyper ventilating, one student had a wig problem and one student had a dress that ripped due to length. Future show costumes needs will be addressed more strenuously prior to technical rehearsals to alleviate future problems. The action plan will include: Half of all rehearsals will require props to be used and a minimum two weeks practice in elaborate costumes to help students be comfortable in costumes prior to performance.
Plan for topic "Students completing the course will have maintained a journal, recording from beginning to end, the process of producing and performing in a dance concert."

This assignment was done in three parts to ensure that students were completing their work. This process worked for all but 3 students. This process and assessment should be done again to ensure all students achieve success.

Plan for topic "Students completing the course will be able to prepare public relations information and publicity for the performance."

The scores in total for these assignments were lower than the instructor would have liked. While the majority of the students did well all did not receive 70% benchmark. Assignments will be uploaded on Canvas to encourage students to keep track of their work.

Plan for topic "Students completing the course will have maintained a journal, recording from beginning to end, the process of producing and performing in a dance concert."

The results of this assessment were not satisfactory. Some Students did not take the journal assignment seriously or became complacent. Next time the Instructor will give a 3 part evaluation in addition to the final submission and replace the check in and final Journal submission as the primary source of the evaluation.

Plan for topic "Students completing the course will have maintained a journal, recording from beginning to end, the process of producing and performing in a dance concert."

Instructor used pre-evaluation to track student progress with and used end of semester submission to receive final results. Instructor will continue this process to ensure student success on this student learning outcome. Next Evaluation SP12

Plan for topic "Students completing the course will be able to prepare public relations information and publicity for the performance."

Instructor will continue evaluating students utilizing current methods. Next assessment for comparison data will be SP12

Plan for topic "Students completing the course will be able to demonstrate retention of movement patterns and rhythmic comprehension skills."

Instructor will continue using developed rubric as a means of evaluation as the majority of the students proved successful. Next Evaluation SP12
Plan for topic "Students completing this course will be able to adapt movement to accommodate variable lighting effects on stage.": 2017/18

Some students were required to perform with Blue light and strobbing this year. All students managed to work well given this challenge. This Assessment topic needs to be completed again with a different set of lighting parameters.

Plan for topic "Students completing this course will be able to perform and adjust movement for costumes onstage.": 2017/18

A firm deadline was given and all students complied however it was noted that some props did not work well and had to be replaced. Future classes will be required to have a backup for props during tech week to avoid last minute problems.

Plan for topic "Students completing this course will be able to utilize staging techniques to realign student choreographed work to fit the size of the stage.": 2014/15

Students must complete the entire assignment with little to no loss of points. Instructor will remind students of the benefit of this assignment and check in with the students throughout the semester to keep them on target.

Plan for topic "Students completing this course will be able to perform and adjust movement for costumes onstage.": 2014/15

During the three days of observation several students did not have all of their costuming for their work, due to miscommunication. Next semester a firm deadline will be posted online to avoid confusion.
447. Dance Production II [DANCE-248] belonging to Kinesiology, Athletics and Dance [DANCE]

Plan for topic "Students completing this course will be able to apply comprehensive skills acquired from the total rehearsal experience to intermediate performance level material adequate for the final production."

- 2018/19: Student was successful at this SLO. A self assessment will be added to this SLO to track the progress of students in future classes.

- 2015/16: Student was adequately prepared but lacked a strong pre-performance quality that is necessary at the intermediate level. This SLO needs to be assessed again with an added emphasis on in-class performance quality.

Plan for topic "Students completing this course will be able to prepare public relations information and publicity for the performance and participate in the logistics (ticket printing and selling, program lay-out and production) of pre-program elements."

- 2015/16: The results of this SLO were unsatisfactory. Clearly the student did not intend to complete any of the assignments given. Instructor will continue evaluating this SLO utilizing current methods. The next course offered will include a short lecture on the value of the assignments to the success of the production class.

Plan for topic "Students completing this course will have maintained a journal, recording from beginning to end, the process of producing and performing in a dance concert."

- 2015/16: The results of this assessment were not satisfactory. Student did not take the journal assignment seriously. A 3 part evaluation prior to the final journal submission was utilized but the student did not hand in the materials. This SLO needs to be assessed again. Instructor will continue the process established and add an instructor check-in process to students who do not hand in their materials midterm.
Plan for topic "Students completing this course will be able to utilize intermediate staging techniques to realign student choreographed work to fit the size of a stage.

": 2018/19

At this level all students should have completed their stage hours. This was not a satisfactory SLO result. Additionally, the student factored feedback was not comprehensive enough to be added into the rubric evaluation. A new SLO needs to be written to exclusively reflect student choreographer feedback as part of the instructor feedback for staging.

Plan for topic "Students completing this course will be able to utilize intermediate staging techniques to realign student choreographed work to fit the size of a stage.

": 2015/16

Instructor was satisfied with the students work but the student choreographers feedback was not taken into account. This assessment should be done again with the addition of the student choreographers account in the rubric.
Plan for topic "Students completing this course will be able to demonstrate and perform compositional forms such as ABA, Rondo, Theme/Variation, etc.": 2016/17

Each student was given a series of assignments preceding the final performance. These assignments helped the students succeed. This assessment topic should be assessed again using the same methods to have a better comparison of results. Additional a greater sampling of pre-assignments should be included in the results.

Plan for topic "Students completing this course will be able to compose various types of movement studies.": 2016/17

While the students did well on the majority of assignments, some work needs to be done to the lower graded assignments. Video samples will be added to lectures to assist students in understanding the assignments.
DVC Instructional Course SLO Action Plans

450. Dance Production Choreography [DANCE-256] belonging to Kinesiology, Athletics and Dance [DANCE]

Plan for topic "Students completing this course will be able to demonstrate movement patterns and rhythmic comprehension.": 2018/19

This assignment is important as it is utilized in the next half class (co-req) and a technical crew. The students were late handing in the assignment and some needed to be redone for the technical week. This SLO should be done again with a firm understanding of due dates and an online canvas submission link.

Plan for topic "Students completing this course will be able to produce public relations information and publicity for the performance and participate in the logistics (ticket printing and selling, program lay-out and production) of pre-program elements.": 2018/19

Students were given samples to view prior to assignment. Those students who did well utilized the recommendations and samples to assist their success. The one student who did not achieve success did not take the assignment seriously and did not complete them. This SLO will be reassessed again utilizing the same process to see if results will improve for all students.

Plan for topic "Students completing this course will be able to apply individual techniques and performance skills to student choreography.": 2015/16

Students at this level should be capable of presenting above average work. This SLO needs to be assessed again. It should include participant feedback in the rubric that reflects the students process and observation.

Plan for topic "Students completing this course will be able to produce public relations information and publicity for the performance and participate in the logistics (ticket printing and selling, program lay-out and production) of pre-program elements.": 2015/16

Students did well on this SLO however some assignments proved to be difficult for students to complete in a timely fashion. This SLO will be assessed again. Students will be given sample works to better familiarize themselves on the expectations of the assignments.
Plan for topic "Students completing this course will be able to utilize staging techniques to direct dancers on realignment of choreographed work to fit the size of a stage."

While the instructor is satisfied with student staging, it should be noted that the staging assignment from the co-req class Dance 256 effected the efficiency of the overall staging process. Additionally the student feedback was not included in this evaluation due to students not handing in feedback form in a timely fashion. A Canvas feedback form link will be constructed to help with the feedback assignment.

Instructor was satisfied with the students work but, similar to the participant SLO assessment, the student participants feedback was not taken into account. This assessment should be done again with the addition of the student participants account in the rubric.
452. Student Instructional Assistant [DANCE-299] belonging to Kinesiology, Athletics and Dance [DANCE]

Plan for topic "Students completing DANCE-299 will be able to increase knowledge of subject by assisting instructor during class."

- **2018/19**
  This course has not been offered since Spring 2017. It will be assessed the next time it is offered.

- **2015/16**
  Overall the process was successful, but in future I would be even more clear as to expectations

Plan for topic "Students completing DANCE-299 will be able to improve skills related to student-teacher relations, subject matter, values and defining goals and objectives."

- **2015/16**
  I would use him even more as a demonstrator but overall the fact that he danced with many students was great for his development and theirs

- **2012/13**
  Student was able to receive class assignments prior to class meeting and recognized the skills needed to accomplish demonstrations. Little review of material was needed. It is helpful to have assistant meet instructor prior to class as they are able to better process information before demonstrations

Plan for topic "Students completing DANCE-299 will be able to increase knowledge of subject by assisting instructor during class."

- **2012/13**
  Student started off each class writing notes of class materials on the board following their log closely for accuracy. During class, early into the semester, instructor had to remind student to write vocabulary as class was moving along. The next Dance 299 Student should be given instruction on in class White Board maintenance prior to first class meeting.
Plan for topic "Students completing the course will be able to explain the terminology of dentistry.": 2017/18

Practice on the typodont with one on one feedback from faculty along with the skills assessment was a beneficial method for determining whether the students understood the basic terminology associated with instrumentation. The exam also demonstrated understanding of the terms.

To improve student comprehension of the basic terminology, assessing the students in a low stakes manner as the information is being presented may be helpful for the student. Such assessment could include interactive quizzes during the lecture, word associations, and group discussion.

Plan for topic "Students completing the course will be able to explain the basic terminology associated with Dental Hygiene instrumentation": 2017/18

Practice on the typodont with one on one feedback from faculty along with the skills assessment was a beneficial method for determining whether the students understood the basic terminology associated with instrumentation. The exam also demonstrated understanding of the terms.

To improve student comprehension of the basic terminology, assessing the students in a low stakes manner as the information is being presented may be helpful for the student. Such assessment could include interactive quizzes during the lecture, word associations, and group discussion.

Plan for topic "Students completing the course will be able to demonstrate basic instrumentation principles.": 2015/16

We will continue to review the curriculum in this course with faculty and our advisory committee to ensure we meet local, state, and national standards.

Plan for topic "Students completing DENHY-101 will be able to demonstrate college level critical thinking and writing skills.": 2014/15

We will continue to rotate essay topics to ensure candidates are not given an advantage based on conversations with previous candidates in the orientation course.

Plan for topic "Students completing DENHY-101 will be able to demonstrate college level critical thinking and writing skills.": 2014/15

We will continue to rotate essay topics to ensure candidates are not given an advantage based on conversations with previous candidates in the orientation course.

Plan for topic "Students completing the course will be able to articulate time management for the dental hygiene student.": 2014/15

Our goal is to have all students enrolled in DENHY 101 pass this assignment with a grade of 90% or higher. We plan to add more detail in the directions to ensure all students can meet the stated criteria.

Plan for topic "Students completing the course will be able to explain the basic terminology associated with Dental Hygiene instrumentation": 2013/14

Plan for topic "Students completing DENHY-120 will be able to create and design an electronic portfolio (e-folio) to showcase program competencies/SLO's": 2017/18

The students were first introduced to the information regarding e-folios, then shown an example, and given class time to develop their philosophy statement. This class time included discussion of why they entered the field of dental hygiene, and to describe qualities of a dental hygienist who influenced their decision to go into dental hygiene.

Lab time with faculty presence was provided to set up the framework of the e-folio and get feedback on its development.

In the future, it will be helpful to further explore how the students came to the decision to go into dental hygiene so that they can incorporate these ideas into their philosophy statement.

Plan for topic "Students completing DENHY-120 will be able toStudents completing this course will be able to create and design an electronic portfolio (e-folio) to showcase program competencies/SLO's and include their DH care philosophy statement.": 2017/18

Plan for topic "Students completing the course will be able to research topics through internet access and library resources." : 2014/15

No changes at this time. Students enjoyed the research project and the information was disseminated on D2L to all students in the course.

Plan for topic "Students completing DENHY-120 will be able to Students completing this course will be able to create and design an electronic portfolio (e-folio) to showcase program competencies/SLO's and include their DH care philosophy statement." : 2014/15

This is the first time the dental hygiene program has utilized the CCN platform. The templates do not exactly fit the program's needs however, we discovered a "work around" that will enhance the learning experiences for the students. I will incorporate our lessons learned in the assignment for the Summer 2016 semester.

Plan for topic "Students completing DENHY 120 will be able to create and design an electronic portfolio (e-folio) to showcase program competencies/SLO's": 2014/15
This is the first time the dental hygiene program has utilized the CCN platform. Plan for topic "Students completing DENHY-120 will be able to create and design an electronic portfolio (e-folio) to showcase program competencies/SLO's and include their DH care philosophy statement."

Based on the fact that all students passed successfully, no changes planned at this time.

Plan for topic "Students completing DENHY 120 will be able to create and design an electronic portfolio (e-folio) to showcase program competencies/SLO's": 2013/14

Based on the fact that all students passed successfully, no changes planned at this time.

Plan for topic "Students completing DENHY 120 will be able to create and design an electronic portfolio (e-folio) to showcase program competencies/SLO's": 2012/13

All students completed the assignment at 95% or above. No changes necessary at this time. They were fantastic!

Plan for topic "Students completing DENHY-120 will be able to create and design an electronic portfolio (e-folio) to showcase program competencies/SLO's and include their DH care philosophy statement.": 2012/13

All students completed the assignment at 95% or above. No changes necessary at this time. They were fantastic!

Plan for topic "Students completing the course will be able to identify the depth and scope of dental hygiene in relation to client care."

I am happy with the results on their achievement and this is reinforced in clinical application, therefore the clinical course supports this learning environment. An electronic version of this Process of Care form will need to be created for the clinical setting will add a checklist component which might improve their process for comprehension.

Plan for topic "Students completing the course will be able to research topics through internet access and library resources."

This has improved since last year at obtaining results on this assignment at 90% or above. This can be contributed to the excellent instruction from the Librarian, the competency of the students using the internet, and having a rubric for grading which gives the students the guidelines for their written work on the abstract.

Plan for topic "Students completing the course will be able to research topics through internet access and library resources.": 2011/12

Students were successful in passing the exam, however, I will provide a review session of materials before this particular unit test.

DVC Instructional Course SLO Action Plans

455. Introduction to Comprehensive Clinical Dental Hygiene Care [DENHY-121] belonging to Dental Hygiene [DENHY]

Plan for topic "Students completing the course will be able to demonstrate proper clinical techniques with basic instrumentation.": 2018/19

The skill evaluations are organized in a format that maximizes student understanding of the specific criteria expected of the student. A challenge for these evaluations is the execution of the evaluation process. With 19 students in a 3-hour clinic session, it is a challenge to complete evaluation of all students in one session. Typically, four faculty members rotate through the clinic to observe students. A strategy that has helped provide consistency is having one faculty observe the same criteria for all students. This strategy for faculty-student observation has helped immensely as it provides consistency in grading.

Plan for topic "Students completing the course will be able to demonstrate basic clinical techniques for proper instrumentation": 2018/19

The skill evaluations are organized in a format that maximizes student understanding of the specific criteria expected of the student. A challenge for these evaluations is the execution of the evaluation process. With 19 students in a 3-hour clinic session, it is a challenge to complete evaluation of all students in one session. Typically, four faculty members rotate through the clinic to observe students. A strategy that has helped provide consistency is having one faculty observe the same criteria for all students. This strategy for faculty-student observation has helped immensely as it provides consistency in grading.

Plan for topic "Students completing DENHY-121 will be able to demonstrate beginning level dental hygiene instrumentation skills focusing on safety for the clinician and client": 2018/19

The skill evaluations are organized in a format that maximizes student understanding of the specific criteria expected of the student. A challenge for these evaluations is the execution of the evaluation process. With 19 students in a 3-hour clinic session, it is a challenge to complete evaluation of all students in one session. Typically, four faculty members rotate through the clinic to observe students. A strategy that has helped provide consistency is having one faculty observe the same criteria for all students. This strategy for faculty-student observation has helped immensely as it provides consistency in grading.

Plan for topic "Students completing DENHY-121 will be able to develop a basic knowledge of dental hygiene process of care.": 2018/19

Going through the details of the dental hygiene process of care helped the students to put the fragmented pieces of knowledge into action. Student feedback for the experience demonstrated their enthusiasm for actually moving into caring for clients beyond their peers next semester. In the future, a rubric could be devised so that the faculty feedback given on the student evaluation forms could be given a rating to help the student better understand how to progress in specific clinical skills contributing to the dental hygiene process of care.

Plan for topic "Students completing the course will be able to describe assessment for dental hygiene care.": 2016/17

Working through the various skills that fall under the assessment phase of the dental hygiene process of care was a valuable exercise in helping the students understand the components. The skill evaluations successfully measured the studentsâ€™ ability to recognize and perform the various components as well. An assignment that will further enrich the studentâ€™s understanding of the assessment would be an observation of their senior dental hygiene buddy to visualize the assessment portion of the dental
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to perform an extra and intra oral exam identifying landmarks and atypical anatomy.": 2015/16

The power point presentations worked. Next year there should be one more quiz for "DIAGNOSTIC AND DESCRIPTIVE TERMINOLOGY" from Section 2 of Langlais, R.P., and Miller, C., Color Atlas of Common Oral Diseases. 5th ed. Philadelphia, PA: Lea & Febiger. 2016. Landmark and Lesion assignment should be required from other sources than Color Atlas of Common Oral Diseases, so the students will have exposure to many examples.

Plan for topic "Students completing DENHY-121 will be able to demonstrate assessment skills necessary to treatment plan comprehensive dental hygiene care": 2014/15

</table>
| "Students completing the course will be able to identify and perform health assessment procedures." | 2020/21  
Working through the various skills that fall under the assessment phase of the dental hygiene process of care was a valuable exercise in helping the students understand the components. The skill evaluations successfully measured the students’ ability to recognize and perform the various components as well. Including more case studies would help the students develop the skills to formulate the assessment portion of the dental hygiene process of care. Upon completion of the case studies, the students could then work to complete the dental hygiene process of care on a peer client.

Plan for topic "Students completing the course will be able to use diet counseling experience for a client to help determine caries risk."

**2019/20**

The students have demonstrated that they learned by demonstrating achieving above 75% which is required by our outside accrediting body CODA. The action plan is to utilize more online resources on this particular topic so that I can incorporate these into my course.

**Plan for topic "Students completing this course will be able to describe the methods for evaluation of personal mechanical oral hygiene practices."**: 2018/19

The level of learning for this assessment is successful. Our department will continue to assess this topic with the written assignment on this particular topic as it strongly correlates with the personal mechanical oral hygiene practices within our community and clinical department.

**Plan for topic "Students completing the course will be able to demonstrate appropriate use and indications of a variety of Interdental plaque devices."**: 2016/17

The display pages worked well. Most students use images obtained from the internet which allows a greater variety of products available to the consumer. This variety is what helps educate the client. Students exceeded this assignment and there is no need for improvement at this time.

**Plan for topic "Students completing the course will be able to use diet counseling experience for a client to help determine caries risk."

**2014/15**

Results showed all students met the criteria and 18 exceeded the criteria. No changes or actions are needed at this time

Plan for topic "Students completing the course will be able to use diet counseling experience for a client to help determine caries risk."**: 2012/13

13 students earned an A grade at 93% or above. 7 students earned a B grade at 84% or above. These meet the program standards. I am very happy with these results. The students did an outstanding job. No changes are necessary at this time.

Plan for topic "Students completing the course will be able to use diet counseling experience for a client to help determine caries risk."**: 2011/12

No changes—it's working beyond expectations

Plan for topic "Students completing the course will be able to use diet counseling experience for a client to help determine caries risk."**: 2010/11

All students use this manual to enhance and teach and increase their clients knowledge through good communication skills

Plan for topic "Students completing the course will be able to use diet counseling experience for a client to help determine caries risk."**: 2009/10

</table>
Plan for topic "Students completing the course will be able to demonstrate knowledge in basic radiation safety."": 2016/17
The exams are designed to show that students know enough basic safety prior to seeing their first patient. I will continue to use these exams as a safety check before students are allowed to see their first client.

Plan for topic "Students completing the course will be able to demonstrate the ability to facilitate the special needs client."": 2015/16
Overall our current action plan is successful with only tow students not successful in the course. Possible areas to enhance is to identify students who are having difficulty in the course early on and guide them. This would include early remediation or possibility of DSS service. However this semester 2 students elected not to take advantage of remediation or DSS services offered by the department. Department will continue to offer and encourage students to accept remediation.

Plan for topic "Students completing the course will be able to interpret radiographs."": 2014/15
No plans for changing this part of the course is indicated to do at this time. Will continue to monitor scores with assessments each semester.

Plan for topic "Students completing the course will be able to interpret radiographs."": 2013/14
We will continue with our current cohort as we continue to exceed our expectations of each student interpreting radiographs above 75 percent

Plan for topic "Students completing the course will be able to interpret radiographs."": 2012/13
no changes

Plan for topic "Students completing the course will be able to interpret radiographs."": 2011/12
No change-it's working beyond the expectation.

Plan for topic "Students completing the course will be able to demonstrate knowledge of radiographics, function, effects, procedures for scope of film evaluation on clients."": 2009/10
Ref: "DVC Accreditation Document, Dental Hygiene Course Objectives, Skill Development/Competencies" dated Oct 11, 2010

Plan for topic "Students completing the course will be able to demonstrate knowledge in basic radiation safety."": 2009/10
Ref: "DVC Accreditation Document, Dental Hygiene Course Objectives, Skill Development/Competencies" dated Oct 11, 2010

Plan for topic "Students completing the course will be able to demonstrate the ability to facilitate the special needs client."": 2009/10
Ref: "DVC Accreditation Document, Dental Hygiene Course Objectives, Skill Development/Competencies" dated Oct 11, 2010

Plan for topic "Students completing the course will be able to interpret radiographs."": 2009/10
Ref: "DVC Accreditation Document, Dental Hygiene Course Objectives, Skill Development/Competencies" dated Oct 11, 2010
Plan for topic "Students completing the course will be able to recognize & evaluate the micro anatomy of head & neck & embryological tissues.": 2020/21

As an action plan for the future, these matching challenges engaged the students in the learning process, & gave them control of what images to include. Students enjoyed working together as learning was reinforced by their sharing of knowledge with each other. Instructor feedback was given before final submissions to give students the opportunity to learn from misunderstanding of content, revise & re-submit before grading. Final submissions were posted on a discussion board to use as a study guide. Perhaps these matching exercises can be used as a weekly quiz instead of just being posted as a study guide.

Plan for topic "Students completing the course will be able to link the development of dental and facial anomalies to the process of human development.": 2018/19

The level of learning that students demonstrated was higher levels of critical thinking as they worked in groups to research, find, and determine what images best showed tooth anomalies at each stage of tooth development. This assignment challenged students to learn cellular details associated with tooth development and apply this knowledge to dental manifestations they may see in clinic. The effective communication necessary to complete this project encourages students to be successful in other areas of the program as they work together with common goals related to patient care. Ultimately, this sets them up for working in private practice.

Plan for topic "Students completing the course will be able to integrate knowledge of head and neck structures to the practice of dental hygiene.": 2016/17

Of the methods described, all of them were effective in meeting student success. However, the histology photo albums could be improved to further enhance their learning process. The students may be more interested in specifically understanding how histology plays a role when they are providing care to patients. Perhaps having students research the histology of different diseases or topics of special needs clients who are medically compromised would help solve this disconnect and nurture relevance to why and how knowledge of basic histology plays a role in patient care.

Plan for topic "Students completing the course will be able to recognize & evaluate the micro anatomy of head & neck & embryological tissues.": 2015/16

Not all students are comfortable searching the internet and working with PowerPoint which was used to create the histology photo albums. By having students work in small groups, this facilitated students teaching each other how to use technology and how to work with others to accomplish a common goal. In addition, students showed pride of ownership with their finished products as they customized each photo album to their liking while fulfilling the assignment. In the future, consider requiring students to change partners after each album to encourage bonding with other classmates.

Plan for topic "Students completing the course will be able to integrate knowledge of head and neck structures to the practice of dental hygiene.": 2015/16

<td>OutcomeDescription</td>
</tr>
<tr>
<td>----------------</td>
<td>---------------------</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to demonstrate a knowledge base for dental terminology for clinical care.&quot;</td>
<td>The vocabulary list and added points worked very well.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to identify variations in tooth form and structure.&quot;</td>
<td>The internet search was a “last minute” idea that came to me. I thought it might stimulate questions and have the entire class actively engaged. Of course lecture and descriptions of anomalies and normalcy preceded the internet exercise.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to demonstrate a knowledge base for dental terminology for clinical care.&quot;</td>
<td>Although all 20 students were successful in passing this portion of the course, I could enhance the learning by giving more “in class” exercises within groups as a practice drill or more games to perfect this invaluable skill.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to assess occlusion and deviations from normal with knowledge to refer to dental specialty.&quot;</td>
<td>This part of the course was most successful in that students brought in visuals and web pictures to amplify occlusion and malocclusion. It verified a picture is worth a thousand words.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to identify restorative charting for client care.&quot;</td>
<td>Again the entire class was successful, but many students asked for more homework and drills to become competent in this subject matter and I will definitely add this component to next year’s class.</td>
</tr>
<tr>
<td>&quot;Students completing DENHY-126 will be able to identify symbols and abbreviations used by the DVC Dental Hygiene Clinic to correctly chart restorations on clients of record that receive dental hygiene care.&quot;</td>
<td>Again the entire class was successful, but many students asked for more homework and drills to become competent in this subject matter and I will definitely add this component to next year’s class.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to deliver appropriate client care.&quot;</td>
<td>All twenty students were successful and to enhance the class I just need more class hours for more group activities. The students could benefit from more role-playing.</td>
</tr>
<tr>
<td>&quot;Students completing the course will be able to identify variations in tooth form and structure.&quot;</td>
<td>This portion was a very successful lecture. In the future I will enhance the lecture by bringing in more pictures of tooth anomalies in both child and adults.</td>
</tr>
</tbody>
</table>
Plan for topic "Students completing the course will be able to assess occlusion and deviations from normal with knowledge to refer to dental specialty.": 2014/15

This semester, I offered more homework and more credit for well done homework. The students responded to this very nicely. The homework, also, served as a good study guide that was reviewed by instructor and returned in enough time for student study before the test or quiz.

Plan for topic "Students completing the course will be able to identify restorative charting for client care.": 2014/15

The students in the first year of the Dental Hygiene Program will be seeing "real" clients of record in three months. Being able to perform a restorative charting assessment and to do it correctly is mandatory for the student because the record becomes a permanent and legal document for the client. The students have practiced and have been tested on their ability to perform this task and will be able to competently perform this assessment when they begin treating clients.

Plan for topic "Students completing DENHY-126 will be able to identify symbols and abbreviations used by the DVC Dental Hygiene Clinic to correctly chart restorations on clients of record that receive dental hygiene care.": 2014/15

Plan for topic "Students completing the course will be able to identify variations in tooth form and structure.": 2014/15

The homework assignment and assessment with strong recommendations and corrections by the instructor was valuable and critical for success.

Plan for topic "Students completing the course will be able to demonstrate a knowledge base for dental terminology for clinical care.": 2012/13

I think the results speak for themselves. I might try more group or team learning in Fall, 2013 to see if the results are improved.

Plan for topic "Students completing the course will be able to demonstrate a knowledge base for dental terminology for clinical care.": 2011/12

All students were successful and I am happy with the results and the results were better than a normal Bell Curve.

Plan for topic "Students completing the course will be able to demonstrate a knowledge base for dental terminology for clinical care.": 2009/10

### Plan for topic "Students completing the course will be able to explain infection control rationale and understand regulations."

This video demonstration assignment successfully included infection control protocols as set forth by federal and state regulations. This assignment was crucial for evaluating level of knowledge and understanding of these protocols which impact success within the dental hygiene program and as a dental hygiene professional. The next cycle might include an emphasis on student evaluation, feedback and discussion of the assignment. Understanding and implementing these infection control protocols support students' ongoing clinical skill evaluations and learning in subsequent dental hygiene clinic courses.

#### Plan for topic "Students completing the course will be able to describe and compare blood-borne pathogens." 

In general, the students were able to comprehend the required information. For the 5% who scored below the threshold, remediation was completed to help the student address deficient areas. In the future, incorporating activities to help apply the information may be helpful in obtaining a 100% passing rate for the bloodborne pathogen assessment.

#### Plan for topic "Students completing the course will be able to demonstrate instrument processing protocol."

The actual evaluation took place during another course's clinic session (DENHY 121). A possible improvement in the future is to add a lab component to this course to prevent use of time in another session. Despite the use of another course's clinic session, all subjects were covered, even with the campus closures that occurred this past Fall.

#### Plan for topic "Students completing DENHY-127 will be able to identify, explain and demonstrate infection control protocols related to chairside client care delivery." 

Although all the students were successful with this project, if we expanded the goal to include posting the videos online for continued use this would enable collaboration with students as well as integrate into other courses within the program. This would also enable the usage of the videos as an example for new students entering the dental hygiene program. The students could then recognize how they could continually apply the information and concepts in other courses or during the provision of patient care.

#### Plan for topic "Students completing the course will be able to explain infection control rationale and understand regulations." 

Although all students successfully passed our SLO and course, we plan to incorporate more student interaction and expand our teaching modalities for next year. In particular we will be adding a group project giving the students opportunity to film a short video demonstration and explanation of some of the infection control protocols included in our course. This will not only reinforce student learning but will also given all students immediate access to protocol demonstration at any time during the semester.

#### Plan for topic "Students completing the course will be able to demonstrate instrument processing protocol."

The methods of assessment worked well and addressed different student learning styles. All students successfully met SLO criteria however student learning was not fully achieved due to some equipment being inoperable. The student learning level needed for successful completion is a 3, which equates to a competent and safe beginner. This is appropriate for first semester student learning and is the level required by our professional accreditation regulations.
DVC Instructional Course SLO Action Plans

Note: A new Statim autoclave is needed for student success in learning this necessary dental office procedure.

## Plan for topic "Students completing the course will be able to educate the client about their periodontal disease process, and modalities to assist in its control."

The students were able to role play their scripts and report how the interaction went in an effort to practice educating clients about periodontal conditions. In the future, students can be asked to record the presentation of their script. Faculty and peers can review the recording and provide feedback on the presentation of the script to more closely simulate client-clinician interactions.

### Plan for topic "Students completing the course will be able to demonstrate skill in the implementation process of appropriate DH interventions to treat periodontal diseases."

This past semester I covered this course for a faculty member on maternity leave. I feel that the class was successful, but would like to see the knowledge obtained in the course used in the clinic with live patients when treatment planning.

### Plan for topic "Students completing this course will be able to describe the effects of biofilms on tissue and cellular processes involved in the pathogenesis of inflammatory periodontal diseases."

I have been fortunate to work with highly motivated students who regularly meet the expectations regarding performance on assessment tools. At this time, I am handing off the course to our new full-time hire and am heading into retirement. I will be recommending to stay the course with the structure of the course as it is fulfilling the mission of the college to enhance student success. Our department success rates are top notch!

### Plan for topic "Students completing this course will be able to discuss current concepts about the adjunctive use of chemical agents in the prevention and treatment of periodontal disease"

Maintain and continue to update current instruction on the topic.

### Plan for topic "Students completing the course will be able to identify the need for DH intervention based on understanding and recognition of disease states of the periodontium."

The outcomes are satisfactory. The dental hygiene program traditionally attracts highly motivated students, and we are fortunate to regularly meet out topics to evaluate SLO’s for courses and for the program. I will be continuing to update the course with more online information and experimenting with more case-based instruction as the next year unfolds.

### Plan for topic "Students completing the course will be able to make appropriate distinctions between the choices of: prophylaxis, non-surgical periodontal treatment, and periodontal maintenance care."

No action is planned at this time for this SLO.

### Plan for topic "Students completing the course will be able to make appropriate distinctions between the choices of: prophylaxis, non-surgical periodontal treatment, and periodontal maintenance care."

No action is planned at this time for this SLO.
DVC Instructional Course SLO Action Plans

No action is planned at this time for this SLO.

Plan for topic "Students completing the course will be able to conduct thorough client assessment using appropriate clinic form for DVC Clinic assessment.": 2012/13

I plan to continue with the current teaching methodology and also will be adding in information to augment teaching in another course in assessing restorative findings on clinic clients.

Plan for topic "Students completing the course will be able to make appropriate distinctions between the choices of: prophylaxis, non-surgical periodontal treatment, and periodontal maintenance care.": 2011/12

The group performed well. I plan to continue to increase the time spent on case presentations to assist students struggling with the concept of treatment approach.

DVC Instructional Course SLO Action Plans

463. Contemporary Dental Materials for the Dental Hygienist [DENHY-129] belonging to Dental Hygiene [DENHY]

Plan for topic "Students completing the course will be able to perform correct placement of light-cure and self-cure sealants.\": 2018/19

The skill evaluations are organized in a format that maximizes student understanding of the specific criteria expected of the student during sealant placement. A challenge for these evaluations was completion of the evaluation on actual patients. The experience to place sealants on patients was scheduled during the campus closures. Due to the compressed schedule, there were no clinic opportunities available to have the students place sealants on actual patients. This experience has been integrated into the students' upcoming Spring 2019 clinic schedule, so that they have an opportunity to place sealants on patients.

Plan for topic "Students completing the course will be able to identify specific examples of each type or class, intended use, properties and manipulation.\": 2017/18

Plan for topic "Students completing the course will be able to assess specific restorative materials by comparison of actual characteristics to the ideal.\": 2016/17

Discussing the various restorative materials helped students to understand the characteristics associated with each, assessment on quizzes, midterms, and final exams helped the student make associations between the materials. An activity that would assist the student in comprehending the characteristics of restorative materials would be to evaluate the dentition of classmates and review the attributes of the materials identified.

Plan for topic "Students completing the course will be able to describe characteristics of dental material covered in class, including class OP material, structure, physical and medicinal characteristics, uses and handling.\": 2015/16

Exam questions: from Power point on office and laboratory housekeeping practices that contribute to infection control and safety, was successful in evaluating the 20 students on recognize office and laboratory housekeeping practices that contribute to infection control and safety with a passing grade of 75% and/or above.

Case Presentation Homework Critical Thinking assignment: Dental Laboratories and Infection Control during didactic classroom discussion and written assignment also showed to be successful in having the 20 students recognize office and laboratory housekeeping practices that contribute to infection control and safety with a passing grade of 75% and/or above.

Fall 2017, I would incorporate more laboratory scenarios: Objective Structured Clinical Examination (OSCE) to examine and allow the students to demonstrate dental material infection control and safety skills through standardized laboratory scenarios.

Plan for topic "Students completing the course will be able to perform and demonstrate an understanding of the steps and technique for taking impressions.\": 2015/16
With the results of all students passing the dental impression skill assessment, our curriculum has proven to meet the student learning outcomes of the course. We will continue to evaluate the curriculum and revise as needed.

Plan for topic "Students completing this course will be able to recognize office and laboratory housekeeping practices that contribute to infection control and safety with a passing grade of 75% and/or above.": 2015/16

### DVC Instructional Course SLO Action Plans

#### 464. Expanded Functions for the Dental Hygienist [DENHY-131] belonging to Dental Hygiene [DENHY]

**Plan for topic "Students completing this course will be able to apply knowledge to clinical application for administering nitrous oxide/oxygen analgesia."**: 2020/21

The students completed the process more efficiently during the second skill evaluation. In the future, the students could simulate all steps prior to the first experience to help them understand the process.

**Plan for topic "Students completing the course will be able to link knowledge of nerve physiology, pharmacology, and possible complications to anesthetic assessment for client care needs."**: 2018/19

Video lectures by an expert in the field worked well. An opportunity for improvement is to emphasize the similarities among the injections to decrease the amount of memorizing some students thought they needed to do.

**Plan for topic "Students completing the course will be able to apply knowledge to clinical application for administering local anesthesia."**: 2018/19

We had challenges adjusting to the 16 week schedule. Round Robin vs. Instructors assigned to students assisted with calibration and expertise with each injection. Recommend using Round Robin for each clinic session.

**Plan for topic "Students completing the course will be able to identify the indications, management procedures, and complications related to nitrous oxide-oxygen sedation."**: 2018/19

On-line assignments helped students review the material before attending class. More emphasis on communication is needed.

**Plan for topic "Students completing this course will be able to apply knowledge to clinical application for administering nitrous oxide/oxygen analgesia."**: 2018/19

Allowing students to practice setting up the armamentarium as a team was helpful. New scheduling implemented in clinic provided more time to spend with the procedure as less time was needed for set-up and break-down of equipment.

**Plan for topic "Students completing this course will be able to apply knowledge to clinical application for administering nitrous oxide/oxygen analgesia."**: 2015/16

We will continue to monitor the curriculum content to ensure compliance with State regulations.

**Plan for topic "Students completing the course will be able to link knowledge of nerve physiology, pharmacology, and possible complications to anesthetic assessment for client care needs."**: 2014/15

No plan to change instructional information, teaching and assessment regarding this SLO topic.

**Plan for topic "Students completing the course will be able to apply knowledge to clinical application for administering local anesthesia."**: 2014/15

---

Course Action Plans | Outcome Assessment History | Page 853 of 2394
This course was revised in Fall 2014 and will be taught over an 18 week period in the Spring semester instead of a 9 week period. The curriculum content was updated to the new regulations of the California Dental Practice Act.

Plan for topic "Students completing the course will be able to identify the indications, management procedures, and complications related to nitrous oxide-oxygen sedation.": 2013/14

No plan of action is required. All students passed the exam pertaining to this Objective/SLO

Plan for topic "Students completing the course will be able to link knowledge of nerve physiology, pharmacology, and possible complications to anesthetic assessment for client care needs."; 2012/13

No changes at this time with this success.

Plan for topic "Students completing the course will be able to apply knowledge to clinical application for administering local anesthesia.": 2011/12

No changes. All students were successful and met all requirements for safety and administration of local anesthetics

Plan for topic "Students completing the course will be able to link knowledge of nerve physiology, pharmacology, and possible complications to anesthetic assessment for client care needs."; 2009/10

Ref: "DVC Accreditation Document, Dental Hygiene Course Objectives, Skill Development/Competencies" dated Oct 11, 2010

Plan for topic "Students completing the course will be able to apply knowledge to clinical application for administering local anesthesia."; 2009/10

Ref: "DVC Accreditation Document, Dental Hygiene Course Objectives, Skill Development/Competencies" dated Oct 11, 2010

Plan for topic "Students completing the course will be able to identify the indications, management procedures, and complications related to nitrous oxide-oxygen sedation."; 2009/10

Ref: "DVC Accreditation Document, Dental Hygiene Course Objectives, Skill Development/Competencies" dated Oct 11, 2010
Plan for topic "Students completing the course will be able to use good communication skills effectively in the dental hygiene setting."

This final project was broken into multiple assignments in which students had an opportunity to submit, receive instructor feedback for better understanding and resubmit for grading. In addition an entire class session was devoted to a workshop where each group met with instructor for discussion and feedback.

For next year's action plan, expansion of the workshop session could include other components of the final project such as "Human Needs" focusing on effective communication techniques.

Plan for topic "Students completing the course will be able to relate well to others in ways that meet their need to be appreciated and protected."

As a plan of action the department will encourage instructors to invite students to attend student hours and meet with course instructors. This gives students a chance to share any specific needs and feel supported in the learning process. The online format provides breakout room opportunities that allow students to meet in a friendly yet low stress environment.

Plan for topic "Students completing this course will be able to demonstrate options for teaching methods and evaluate each for learning principles applied."

As a plan of action the department will continue to communicate with fellow instructors to share best practices targeting this SLO. In addition the action plan includes employing new teaching methodologies from flex workshops and other available resources including those available through the professional Dental Hygiene association. A future goal would be to push the students toward a higher level of critical thinking and be able to produce even higher quality presentations.

Plan for topic "Students completing this course will be able to use good communication techniques when dealing with clients & that enhance group process."

As a plan of action the department will continue to communicate with fellow instructors to share best practices targeting this SLO. In addition the action plan includes employing new teaching methodologies from flex workshops and other available resources including those available through the professional Dental Hygiene association. A future goal would be to push the students toward a higher level of critical thinking and be able to produce even higher quality presentations.

Plan for topic "Students completing this course will be able to discuss communication strategies and techniques to better facilitate effective interaction with clients and groups of various ages and cultural backgrounds."

This Group Presentation and Demonstration Project was a success because it gave students the opportunity to enhance their learning through researching topics, appropriately applying communication skills into specific scenarios and giving a demonstration (hands-on learning). The level of learning was aligned with the program goal of reaching an
intermediate level of competency at this point in the program and set the students up for success in the upcoming Fall semester in the clinic. This project was carefully designed to compliment and integrate with the other summer course offered, DH 136 Dental Hygiene Care for Clients with Special Needs. After looking at the results and having students complete a course evaluation, it would be helpful next year to give students more information about this final project during the first week of summer session so they can manage their time better.

**Plan for topic "Students completing the course will be able to use good communication techniques when dealing with clients & that enhance group process."**: 2015/16

I plan to give the students have opportunity to work in groups to brainstorm, discuss and formulate successful instruction techniques for working with various types of groups and populations. This will help prepare students for written comprehensive exam essay.

**Plan for topic "Students completing the course will be able to use good communication skills effectively in the dental hygiene setting."**: 2015/16

In order to demonstrate more effectively the required techniques I plan to require all students to use a PowerPoint for the presentation.

**Plan for topic "Students completing the course will be able to use good communication techniques when dealing with clients & that enhance group process."**: 2009/10

Ref: "DVC Accreditation Document, Dental Hygiene Course Objectives, Skill Development/Competencies" dated Oct 11, 2010

466. Evaluation of Scientific Research [DENHY-134] belonging to Dental Hygiene [DENHY]

Plan for topic "Students completing the course will be able to explain the purpose research critiques and the role and responsibility of the reviewer." : 2018/19

Breaking the assignment into 2 submissions was helpful. A separate submission for each section might work better.

Plan for topic "Students completing this course will be able to identify and apply accepted standards to assess and evaluate current oral health research." : 2018/19

Breaking the assignment into 2 submissions was helpful. A separate submission for each section might work better.

Plan for topic "Students completing this course will be able to conduct a literature review following proper documentation of citations and referencing research sources." : 2016/17

Instructional videos were helpful for understanding content and expectation. More verbal communication would be helpful for some students. Feedback with opportunity for revision was also successful. This assignment could be improved with a verbal discussion of the rubric.

Plan for topic "Students completing the course will be able to discuss the functions of a professional journal." : 2014/15

Next spring I plan to incorporate this assignment earlier in the semester and partner with the chemistry students. I am hoping this will help the students describe the terms and concepts easier and be able to apply their knowledge by evaluating articles in professional journals.

Plan for topic "Students completing this course will be able to identify and apply accepted standards to assess and evaluate current oral health research." : 2013/14

I believe this assignment incorporated all topics covered in the reading/lecture portion of the course and gave the students the tools necessary to critically analyze scientific research and translate the research into practical experiences.

Plan for topic "Students completing the course will be able to explain the purpose research critiques and the role and responsibility of the reviewer." : 2013/14

I believe this assignment incorporated all topics covered in the reading/lecture portion of the course and gave the students the tools necessary to critically analyze scientific research and translate the research into practical experiences.

Plan for topic "Students completing this course will be able to identify and apply accepted standards to assess and evaluate current oral health research." : 2012/13

The plan is to retain this topic as is due to the fact that 20 out of 20 students received a 93% or above and was successful in the overall course.
### Plan for topic "Students completing the course will be able to identify tools and apply strategies to locate relevant information from a variety of research sources."

- **2009/10**

  Ref: "DVC Accreditation Document, Dental Hygiene Course Objectives, Skill Development/Competencies" dated Oct 11, 2010

  Ref: "DVC Accreditation Document, Dental Hygiene Course Objectives, Skill Development/Competencies" dated Oct 11, 2010
Plan for topic "Students completing the course will be able to demonstrate a working knowledge of the vocabulary and terminology of pharmacology in order that he or she can read, interpret and converse intelligently about technical information pertaining to drugs."

2019/20

Next time, I need to do sample ones with the students that don't count to give them more practice and then have them turn in a homework assignment. There was some missing information in some of the prescriptions that we fixed by having multiple choice questions on the exam.

Plan for topic "Students completing the course will be able to synthesize information based on a drug and medical history in order to determine when medical consultation is appropriate."

2019/20

Oral presentations proved to be a good way for students to hear and learn the material from someone else. I will continue doing oral presentations in the future.

Plan for topic "Students completing the course will be able to anticipate potential complications of dental treatment in relation to medications taken by the client and drugs administered at the dental visit."

2019/20

Lecture with review of the material throughout the course helped to reinforce the important points regarding medications and dental treatment.

Plan for topic "Students completing the course will be able to anticipate potential complications of dental treatment in relation to medications taken by the client and drugs administered at the dental visit."

2016/17

Continue instruction and make updates as needed to remain current with this fast-changing course. Students are performing well.

Plan for topic "Students completing the course will be able to demonstrate the ability to properly record information on a written dental prescription for medication according to the verbal direction of the dentist using appropriate abbreviations and terminology."

2019/20

More practice with sample prescriptions will be given in the future.

Plan for topic "Students completing this course will be able to apply pharmacologic information from the course to appropriate client management given a simulated client case."

2019/20

These cases worked well and will be used again in the future.

Plan for topic "Students completing this course will be able to apply pharmacologic information from the course to appropriate client management given a simulated client case."

2016/17

I am pleased with the formatting of this SLO topic as it allows students to synthesize complex information over a period of time for the assignment. We are fortunate to have motivated and successful students in the Dental Hygiene program. At this time, I plan to recommend that the instructor for this course in the future consider continuing this method of assessing the SLO.

Plan for topic "Students completing this course will be able to apply pharmacologic information from the course to appropriate client management given a simulated client case."

2015/16

Continue instruction and make updates as needed to remain current with this fast-changing course. Students are performing well.
The students in our program regularly excel in achieving educational goals and outcomes, and so we are fortunate. It is rare for a student to fail to achieve. This year, all
students are on a path for successful progression through our sequenced courses. I plan to continue on a similar course of action for this course, and will continue to update this
rapidly changing body of information in pharmacology. I am also working more on case examples in order to connect the information to it's clinical application. This is an ongoing
process as we go forward.

Plan for topic "Students completing the course will be able to demonstrate a working knowledge of the vocabulary and terminology of
pharmacology in order that he or she can read, interpret and converse intelligently about technical information pertaining to drugs."

2013/14
There are no plans to alter anything specific at this time other that to continue to encourage students to stay up to date with the rapid pace of this course. The student who failed
to meet the criteria had been warned multiple times in this and other courses that he was at risk for not being successful. We are fortunate in our program to have the great
majority of students meet our criteria successfully each semester.

Plan for topic "Students completing the course will be able to synthesize information based on a drug and medical history in order to
determine when medical consultation is appropriate." 2012/13
I plan to continue to utilize similar lecturing/testing methods to continue to disseminate and evaluate students in this Pharmacology course due to the success rate of these
methods.

468. Dental Hygiene Care for Clients with Special Needs [DENHY-136] belonging to Dental Hygiene [DENHY]

Plan for topic "Students completing the course will be able to recognize and assess characteristics of various physiological/psychological conditions and/or disease status for clients with special needs."

This final project was broken into multiple assignments in which students had an opportunity to submit, receive instructor feedback for better understanding and resubmit for grading. In addition an entire class session was devoted to a workshop where each group met with instructor for discussion and feedback.

For next year's action plan, expansion of the workshop session could include other components of the final project such as "Human Needs" and modifications for special needs clients.

Plan for topic "Students completing the course will be able to demonstrate how to interact with people with special needs."

As a plan of action, the department can encourage all students by inviting students to attend student hours to meet with instructors. This gives students a chance to share any specific needs and feel supported in the learning process. The online format provides opportunities that allow students to meet in a friendly yet low stress environment in breakout rooms.

Plan for topic "Students completing the course will be able to describe the dental hygiene care process and modifications for clients with special needs."

An plan of action the department will be to continued to communicate with fellow instructors to share best practices targeting this SLO. In addition the action plan includes employing new teaching methodologies from flex workshops and other available resources including those available through the professional Dental Hygiene association. A future goal would be to challenge students to produce even higher quality presentations.

Plan for topic "Students completing the course will be able to describe the dental hygiene care process and modifications for clients with special needs."

As a plan of action the department will continue to communicate with fellow instructors to share best practices targeting this SLO. In addition, the action plan includes employing new teaching methodologies from flex workshops & other available resources including those provided through the professional Dental Hygiene association. A future goal would be to push the students toward a higher level of critical thinking and be able to produce even higher quality presentations.

Plan for topic "Students completing the course will be able to recognize and assess characteristics of various physiological/psychological conditions and/or disease status for clients with special needs."

This Group Presentation and Demonstration Project was a success because it gave students the opportunity to enhance their learning through researching topics, appropriately applying information learned into specific scenarios and giving a demonstration (hands-on learning). The level of learning was aligned with the program goal of reaching an intermediate level of competency at this point in the program and set the students up for success in the upcoming Fall semester in the clinic. This project was carefully designed to compliment and integrate with the other summer course offered, DH 133, a Communications Course. Next year, it would be helpful to give students more information about
this final project during the first week of summer session so they can manage their time better.

469. Topics in Dental Hygiene [DENHY-150] belonging to Dental Hygiene [DENHY]
Plan for topic "Students completing the course will be able to recognize and synthesize information regarding common pathologic conditions, including their signs, symptoms, etiology and therapy."

Real life scenarios work well as a teaching method for students. It shows that they understand the material enough to make assessment about urgency and treatment options. Since this was a new course for me to present, I did not feel that I had enough time to apply more of these questions to homework assignments and examinations. The next time this course is presented, I will have more scenarios that help the students think through the conditions. I will also utilize Dental Jeopardy throughout the year (instead of one time at the end of the year) to help reinforce the material and the decision-making process.

Plan for topic "Students completing this course will be able to describe the normal development of the orofacial region and related pathologic processes occurring during development": 2015/16

I will plan to continue to teach and assess this topic using visual and lecture materials with updates as needed as topical changes occur. Otherwise, students are successful and no other changes are planned at this time.

Plan for topic "Students completing this course will be able to recognize specific traumatic lesions or traumatic conditions that are inflammatory in nature."

Things are generally working well. Most students easily meet the criteria established, but there always seems to be one or sometimes two who struggle in the course. I continue to explore additional ways to engage students and encourage immersion in the dental sciences.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the methodical diagnostic process for identifying oral lesions."

The current outcomes are satisfactory. I am fortunate to work with a highly motivated cohort of high achieving students. I plan to continue on the current path as well as continue to strive to present new and relevant topics regarding this important SLO. Our department is continuing to explore aspects of online learning via D2L and the flexibility it provides to "flip" the classroom with homework and learning aids posted online prior to class sessions. I plan to continue to add more content in this format in the future as it seems to enhance student learning and has positive student feedback.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the methodical diagnostic process for identifying oral lesions."

Since the students in this course are highly successful, there are no plans for change at this time.

Plan for topic "Students completing the course will be able to recognize and synthesize information regarding common pathologic conditions, including their signs, symptoms, etiology and therapy."

I am satisfied with the content and the results on this exam in the course. No changes at this time.

Plan for topic "Students completing denhy-225 will be able to Discuss communication strategies and techniques to better facilitate effective interaction with clients and groups of various ages and cultural backgrounds.": 2019/20

I would like to have more than one lecture on this topic to make sure they have a deeper experience.

Plan for topic "Students completing the course will be able to debate community water fluoridation as an ideal public health solution from political and preventive perspectives.

": 2019/20

I think it went well. The students were excited and had fun. They were able to debate with science. I would like for them to connect what they have learned to clinic when working with patients.

Plan for topic "Students completing this course will be able to debate community water fluoridation as an ideal public health solution from political and preventive perspectives.

": 2016/17

It was difficult to hear the online debate. Some students were in the same room, and there was feedback between the computers. Moving this course to a hybrid or back to a face to face format will allow the debate to be held in the classroom where it will be more effective.

Plan for topic "Students completing the course will be able to define community oral health with emphasis on its history, organizational structures and impacts on the public.": 2014/15

## 474. Advanced Periodontics and Dental Hygiene Topics [DENHY-227] belonging to Dental Hygiene [DENHY]

<table>
<thead>
<tr>
<th>Plan for topic</th>
<th>Outcome Assessment History</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Students completing the course will be able to demonstrate skill in the implementation of client care.</strong>: 2018/19</td>
<td>A formatted template for the written report worked well in order to capture the required information. In grading the reports I noticed small discrepancies with the template and the rubric. Those discrepancies have been updated to match going forward.</td>
</tr>
<tr>
<td><strong>Students completing the course will be able to evaluate instrument sharpening techniques and choices of instruments used.</strong>: 2017/18</td>
<td>While the students were successful in completing the assignment, all students expressed their dislike of sharpening instruments due to fear of damaging their instruments and lack of confidence in their ability to properly sharpen their instruments. I will be working with the 1st year coordinator who introduces the concept of sharpening instruments to the 1st year students in the Spring semester to create a hands-on experience that will build the skill and confidence of the students. We will continue this positive experience when I teach the students advanced sharpening techniques during their 2nd year, Fall semester.</td>
</tr>
<tr>
<td><strong>Students completing this course will be able to develop and present a case documentation for a periodontally involved client.</strong>: 2015/16</td>
<td>We are fortunate in the dental hygiene program to work with a group of highly motivated students. Overall, the students are doing well. Though the students work hard, there are some struggles to obtain the appropriate type of client case in clinic to carry out this report. In the future, it will be emphasized how important it is to recruit appropriate periodontally involved clients in the clinic course. Students also needed more emphasis on patient education in their reports, and this will be reviewed in more detail with them during the lectures in DenHy 227.</td>
</tr>
<tr>
<td><strong>Students completing the course will be able to demonstrate knowledge on how evidence-based decision making can enhance clinical skills and client education.</strong>: 2014/15</td>
<td>Students are currently successful in their topics projects and are well above the passing score of 75%. Students are well versed in special needs and achieve higher passing scores than expected.</td>
</tr>
<tr>
<td><strong>Students completing the course will be able to demonstrate skill in the implementation of client care.</strong>: 2013/14</td>
<td>All 20 students completed with 100% accuracy the skill of subgingival irrigation in the implementation of client care.</td>
</tr>
<tr>
<td><strong>Students completing the course will be able to demonstrate skill in the implementation of client care.</strong>: 2012/13</td>
<td>All students have successfully performed advanced fulcrums to level of competency. There are no changes at this time.</td>

DVC Instructional Course SLO Action Plans

475. Advanced Clinical Dental Hygiene Care I [DENHY-230] belonging to Dental Hygiene [DENHY]

Plan for topic "Students completing the course will be able to apply therapeutic dental hygiene care for individuals in a variety of settings.": 2018/19

Our current level of learning demonstrates a high level of competency in this assessment. We review these competencies on an annual basis to make sure we are aligned with our outside accrediting agencies. We also have consultation with our advisory committee meetings to assure that we are aligned with duties performed in the private sector of dentistry.

Plan for topic "Students completing the course will be able to assess, plan, and implement dental health care.": 2016/17

No improvement at this time. I will be keeping the worksheet form and not making additional changes

Plan for topic "Students completing the course will be able to apply therapeutic dental hygiene care for individuals in a variety of settings.": 2015/16

Method of instruction is currently working. Our students are dependent on the types of clients that come to our clinic for treatment. This can have an impact on student learning outcomes if we do not get enough appropriate clients to our clinic. Our department requests the help of our advisory committee for help in soliciting the local dentists to help send clients to our clinic. Our students are required to do recruitment of new clients for our clinic by visiting local sites (Walmart) and the DVC campus. Our accrediting board CODA only states that minimal competency is met by the therapeutic agents. Our department has determined over a period of years how many therapeutic agents need to be performed for a student to meet minimal competency.

Plan for topic "Students completing the course will be able to assess, plan, and implement dental health care.": 2014/15

Results show that 100% of students taking test cases passed with a 75% or above. No plan to change testing at this time.

Plan for topic "Students completing the course will be able to apply appropriate life support measures for medical emergencies they may encounter." : 2013/14

All students passed mock emergencies with a score of 85% or above.

Plan for topic "Students completing the course will be able to assess, plan, and implement dental health care.": 2012/13

The students reached the required level of competency. No remediation was necessary. No further plan of action required.

Plan for topic "Students completing the course will be able to apply therapeutic dental hygiene care for individuals in a variety of settings.": 2011/12

Acting plan is sufficient

Plan for topic "Students completing the course will be able to apply appropriate life support measures for medical emergencies they may encounter.": 2009/10

### DVC Instructional Course SLO Action Plans

#### 476. Advanced Clinical Dental Hygiene Care II [DENHY-231] belonging to Dental Hygiene [DENHY]

**Plan for topic "Students completing the course will be able to demonstrate client satisfaction with quality dental hygiene education and care."": 2018/19**

The dental programs will continue to use the client surveys as they are required for our accreditation agency Commission on Dental Auxillaries. We will continue to demonstrate that the public population that we see in our dental clinic are satisfied with the quality of dental hygiene care and information that they received from services from our students.

**Plan for topic "Students completing this course will be able to perform scaling and debridement, power scaling and debridement, gingival curettage, subgingival irrigation, administration of local anesthetic, administration of nitrous oxide, interim therapeutic restorations, pit and fissure sealants, fluoride therapy, whitening, nutritional counseling and imaging and interpreting radiographs."": 2016/17**

All students were successful in achieving the program's goal of 75% or above on the first try. No change is need in how the exam is conducted or its criteria. However, the success of the exam is directly related on student recruitment of new clients to our clinic. This can vary from semester to semester. I would like to see more advertisement of our clinic to the general public to help with this issue.

**Plan for topic "Students completing DENHY 231 will be able to provide dental hygiene care for client with special needs defined by having any physical or mental impairment that results in an inability for the client to perform oral hygiene care."": 2014/15**

No action is needed at this time. Will continue to assess each semester and adjust if necessary.

**Plan for topic "Students completing the course will be able to provide preventive, educational, collaborative and therapeutic dental hygiene care for individuals in a variety of settings."": 2013/14**

We plan to continue to with our current assessments and rubric with 100% students achieving 85-90% above the minimum of 75%. We feel confident with our goals and achievements in this area.

**Plan for topic "Students completing DENHY 231 will be able to provide dental hygiene care for client with special needs defined by having any physical or mental impairment that results in an inability for the client to perform oral hygiene care."": 2012/13**

No changes at this time.

**Plan for topic "Students completing the course will be able to provide preventive, educational, collaborative and therapeutic dental hygiene care for individuals in a variety of settings."": 2011/12**

Continue process—its working successfully.

**Plan for topic "Students completing the course will be able to provide preventive, educational, collaborative and therapeutic dental hygiene care for individuals in a variety of settings."": 2009/10**

### 477. Transitioning from Student to Dental Professional [DENHY-290] belonging to Dental Hygiene [DENHY]

#### Plan for topic "Students completing this course will be able to create a personal financial statement." : 2019/20

This was a very successful semester in DENHY 290. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

#### Plan for topic "Students completing this course will be able to create a personal financial statement." : 2016/17

This was the first semester the course was offered for both the dental assisting and hygiene cohorts. While both are dental professionals, the method of payment is different for hygienists and assistants. We will be revising this assignment to take all scenarios into consideration so the students can better budget their monthly expenses.

| Plan for topic "Students completing the course will be able to exhibit professionalism during the delivery of dental hygiene care."

2018/19

We will assess it next time it is offered as last offered in 2014. We will assess it next time it is offered.

Plan for topic "Students completing the course will be able to evaluate when clients meet the guidelines of the California RDH examination."

2018/19

This course was last assessed in 2014. Our plan to access this course the next time it is offered.

Plan for topic "Students completing the course will be able to evaluate when clients meet the guidelines of the California RDH examination."

2014/15

Student was 100% successful in choosing the appropriate client as put forth by the guidelines of the California RDH exam. Students also passed the exam for licensing.

Plan for topic "Students completing the course will be able to exhibit professionalism during the delivery of dental hygiene care."

2013/14

Excellent results. Each student passed with 100% accuracy according to the rubric.

Plan for topic "Students completing the course will be able to exhibit professionalism during the delivery of dental hygiene care."

2013/14

Students were successful in evaluation clients that meet the guidelines of the California RDH exam. Both students passed the exam. We had 100% pass rate on this exam.

Plan for topic "Students completing the course will be able to evaluate when clients meet the guidelines of the California RDH examination."

480. Student Instructional Assistant [DENHY-299] belonging to Dental Hygiene [DENHY]
481. Overview of the Dental Professions [DENTL-110] belonging to Dental Assisting [DENTL]
Plan for topic "Students completing the course will be able to demonstrate an understanding of the general concepts of dentistry."

This course has not been offered since 2016 due to a shortage of faculty able/willing to teach the course. We are hoping to offer this course again in 2020 or 2021 and it will be assessed next time it is offered.
Plan for topic "Students completing the course will be able to define the regulations required for health and safety to allow the students to perform chairside dental procedures.": 2011/12

The faculty have determined that SLO assessments should incorporate a variety of question types to better assess student's different learning styles. By using a variety of question types the faculty will be able to determine the students ability to comprehend material presented in a variety of formats. The faculty are discussing developing a "hands on" assessment process modeled on the system used in Dental Hygiene. The new assessment system will be used during the next SLO cycle.

</tr>
</tbody>
</table>

This information was shared with all discipline faculty and advisory group.
Plan for topic "Students completing the course will be able to demonstrate knowledge of the digestive system.": 2018/19

This was a very successful semester in DENTL 171. Last year, many changes were made in this class to help students understand the digestive system. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the anatomical terms of the oral cavity.": 2017/18

This was a very successful semester in DENTL 171. This year, many changes were made in this class to help students understand Dental Anatomy. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the bones of the skull.": 2016/17

In addition to the labeling exercises and Plickers, a digital assessment tool, the discipline faculty feel they would like to modify the existing rubrics so that they are better aligned with the Plickers technology. This is the first attempt at using this digital tool. This assessment tool helps to quickly identify subject areas and concepts that students are struggling with so the instructor address them in a future meeting. This is a flexible tool which can be used quickly and efficiently in multiple ways to gather data.

Students surveyed at the end of class said they enjoyed this activity and found it useful and engaging. In the survey, the students suggested that this assessment technique be utilized in other classes. This information has been shared with rest of Dental Assisting faculty. The department is already considering leveraging it in other courses so that it may be utilized in other SLO areas.
The department is determining whether to combine Plickers technology with clay anatomy activity that was used as the previous SLO assessment tool. But that will be determined on how much student assessment data can be derived once the faculty master the use of Plickers.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing this course will be able to demonstrate knowledge of landmarks and surfaces of the teeth": 2016/17

Charting exercises proved to work well in memory retention of tooth surfaces. Identifying projects helped with tooth identification.

Implementation of the Plickers technology proved in real time what components students struggled with. It was also helpful when used in a testing form versus a review format. The students love the use of technology and enjoyed it as an alternative to regular testing.

The charting exercises were on paper and moving the assignments into a digital/electronic format would improve the charting assignment process. The department is determining how to transition the assignment to Canvas to improve the charting experience for the instructor and the student. But that will be determined on how to best set up the assignments in Canvas to make it more efficient.

This information will be shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the anatomical terms of the oral cavity":
DVC Instructional Course SLO Action Plans

2014/15

During this cycle the faculty have initiated a two part assessment to this SLO (quiz & diagram) that we will track to see if it helps students understand the learning outcome. Currently the American Dental Association has not required any changes to our curriculum in this area.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the digestive system.": 2014/15

The faculty have determined that the current SLO assessments are well developed and see no need to change the assessment process. The faculty feel that to increase the effectiveness of the learning outcome by students they will introduce additional material covering the digestive system. They feel this additional material will better prepare the students for this SLO. Currently the American Dental Association has not required any changes to our curriculum in this area.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the bones of the skull." : 2014/15

The faculty piloted a new clay anatomy activity to help reinforce the relationships between bones and muscles in regard to their function in mastication and feel that it has been extremely successful. The faculty will keep using the current SLO assessments and monitor the performance of this new activity. Currently the American Dental Association has not required any changes to our curriculum in this area.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the anatomical terms of the oral cavity." : 2014/15

The faculty have determined that the current SLO assessments are well developed and see no need to change the assessment process but will monitor these objectives as we pilot a new clay anatomy activity to help reinforce the relationships between bones and muscles in regard to their function in mastication. Currently the American Dental Association has not required any changes to our curriculum.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the digestive system.": 2013/14

Plan for topic "Students completing the course will be able to identify instruments, burs, and accessories." : 2018/19

This was a very successful semester in DENTL 173. Last year, many changes were made in this class to help students understand instruments and burs. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to review a patient’s dental and medical history." : 2017/18

This was a very successful semester in DENTL 173. Since it was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to seat and dismiss patients." : 2016/17

In addition to the competency, faculty is going to add seating and dismissing patients to chair side procedures in the Fall semester to allow the students additional hands on experience before they see patients in the Spring semester.

Plan for topic "Students completing the course will be able to identify instruments, burs, and accessories." : 2015/16

In addition to the required textbook material, the discipline faculty feel they would like to increase the amount of hands on time during lab sessions to help the students recognize the different instruments/burs and their function. The discipline faculty feel by increasing the physical manipulation of instruments/burs, it will increase the students retention in identifying the instruments/burs and their functions. In addition to reading about the instruments/burs, students will actually hold and use instruments/burs in the lab setting.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to seat and dismiss patients." : 2014/15

The faculty have determined that the current SLO assessments are well developed and will attempted to incorporate an additional assessment method. Initially, the faculty
DVC Instructional Course SLO Action Plans

attempted to utilize digital photos to evaluate this process and did not find it easy and useful. The faculty will investigate using a digital video instead to assess this learning outcome. Currently the American Dental Association has not required any changes to our curriculum in this area.

Plan for topic "Students completing the course will be able to review a patient's dental and medical history.": 2014/15

The faculty have determined that the current SLO assessments are well developed and see no need to change the assessment process but will monitor these objectives. Plan for topic "Students completing the course will be able to identify instruments, burs, and accessories.": 2014/15

The faculty have determined that the current SLO assessments are well developed and see no need to change the assessment process but will monitor these objectives. The faculty also used digital photos to evaluate students' tray setups for assessment. Currently the American Dental Association has not required any changes to our curriculum in this area.

Plan for topic "Students completing the course will be able to seat and dismiss patients.": 2013/14

The faculty will be attempting to utilize digital photos by the class and allow students to document their successful tray setups for future review and preparation. Currently the American Dental Association has not required any changes to our curriculum.

Plan for topic "Students completing the course will be able to review a patient's dental and medical history.": 2013/14

This assessment emphasizes the need of the student to review the patient's dental and medical health history before the beginning of an dental procedure and the important role it plays in the patient's overall experience.

Plan for topic "Students completing the course will be able to identify instruments, burs, and accessories.": 2013/14

This assessment emphasizes the need of the student to review the patient's dental and medical health history before the beginning of an dental procedure and the important role it plays in the patient's overall experience.
### DVC Instructional Course SLO Action Plans

**Plan for topic "Students completing the course will be able to identify instruments, burs, and accessories."**: 2012/13

This assessment emphasizes the need of the student to be able to identifying instruments, burs and hand-pieces according to the dental procedure.

**Plan for topic "Students completing the course will be able to seat and dismiss patients."**: 2011/12

I would add to the competency that the students are evaluate reviewing the patient's health history and making note of any medical contraindications.

**Plan for topic "Students completing the course will be able to seat and dismiss patients."**: 2010/11

No further action plan is needed as the explanation, handouts and competencies along with the demonstrations provides the students with knowledge to perform the competency.

**Plan for topic "Students completing the course will be able to review a patient's dental and medical history."**: 2010/11

No further action plan is needed as the explanation, handouts, and demonstration provides the student with the knowledge to perform the competency.

**Plan for topic "Students completing the course will be able to identify instruments, burs, and accessories."**: 2010/11

No further action plan is needed as the explanation handouts and competencies along with the lecture and demonstration provides the student with the knowledge to perform the competency.
Plan for topic "Students completing the course will be able to identify and demonstrate the techniques used to trim maxillary and mandibular study models.": 2018/19

This was a very successful semester in DENTL 174. Last year, many changes were made in this class to help students understand maxillary and mandibular study models. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to identify and demonstrate the manipulative techniques used to mix dental luting cements.": 2017/18

This was a very successful semester in DENTL 174. Last year, many changes were made in this class to help students understand dental cements. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to demonstrate the ability to secure a bite registration using a facebow.": 2016/17

The facebow competency went as planned this year and we adapted the use of the rubric. The rubric helped with the grading process and we will continue to use rubrics with our competencies to evaluate students.

Plan for topic "Students completing the course will be able to identify and demonstrate the manipulative techniques used with composite resin restorative material.": 2015/16

The composite resin restorative material is continuously evolving. Keep an active awareness to update material techniques and stay current with new dental material achievements.

Plan for topic "Students completing the course will be able to identify and demonstrate the techniques used to trim maxillary and mandibular study models.": 2015/16

The discipline faculty are happy with these results and are continuing to add more hands on time where students can practice trimming maxillary and mandibular study models.
DVC Instructional Course SLO Action Plans

The discipline faculty feel by increasing the amount of time spent on trimming maxillary and mandibular study models, it will increase the students retention in identifying and demonstrating the techniques.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing DENTL-174 will be able to demonstrate the ability to secure a bite registration using a facebow."

2014/15

Based on the results, I will continue to teach this activity utilizing the information provided in lecture and laboratory.

Plan for topic "Students completing the course will be able to identify and demonstrate the manipulative techniques used to mix dental luting cements." 2011/12

Later in the semester the student upon request must be able to manipulate this material to a 100% competency.

Plan for topic "Students completing the course will be able to identify and demonstrate the manipulative techniques used to mix dental luting cements." 2009/10

No further action plan is needed as the explanation, handouts and competencies along with demonstration provides the student with knowledge to perform the competency.

Plan for topic "Students completing the course will be able to identify and demonstrate the manipulative techniques used with composite resin restorative material." 2009/10

No further action plan is needed as the explanation, handouts, and competencies along with demonstration provides the student with knowledge to perform the competency.

Plan for topic "Students completing the course will be able to identify and demonstrate the techniques used to trim maxillary and mandibular study models." 2009/10

Students are given handouts, competency and demonstration on trimming models to stated criteria.
Plan for topic "Students completing the course will be able to identify and demonstrate techniques of disinfection.": 2018/19
This was a very successful semester in DENTL 175. Last year, many changes were made in this class to help students understand the techniques of disinfection. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to identify and demonstrate techniques of sterilization": 2017/18
This was a very successful semester in DENTL 175. This year, many changes were made in this class to help students understand sterilization. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to identify and demonstrate techniques of sterilization": 2016/17
We are very happy with the changes that were made to the infection control course and find our students very prepared and knowledgeable in the principles of infection control.

Plan for topic "Students completing the course will be able to identify and demonstrate techniques of disinfection.": 2015/16
This course is always a work in progress. We will continue to monitor the progress of the student's work to ensure it complies with the State and accreditation standards.

Plan for topic "Students completing the course will be able to identify and demonstrate techniques of sterilization": 2015/16
In addition to the required textbook material, the discipline faculty feel they would like to increase the amount of hands on time during lab sessions to help the students be able to identify and demonstrate techniques of sterilization. The discipline faculty feel by increasing the time spent on techniques of sterilization, it will increase the students retention in identifying and demonstrating the techniques. In addition to reading about the instruments/burs, students will be required to complete each method of sterilization multiple times in a lab setting.
This information was shared with all discipline faculty and advisory group.

**Plan for topic "Students completing DENTL-175 will be able to demonstrate the principles of infection control including, handwashing and Standard Precautions (Personal Protective Equipment), according to state and federal regulations and guidelines."**: 2014/15

No further action is needed.

**Plan for topic "Students completing the course will be able to identify and demonstrate techniques of Standard Precautions."**: 2013/14

Revised outcome to 88% of students completing this course will be able to perform at 75% competency.

**Plan for topic "Students completing DENTL-175 will be able to identify and then chart a variety of existing and diagnosed conditions of teeth."**: 2013/14

Revised outcome to 88% of students completing this course will be able to perform at 75% competency.

**Plan for topic "Students completing the course will be able to identify and demonstrate techniques of disinfection."**: 2013/14

for Fall 2013: a. & b. 90% of students completing the course will be able to pass exams at 75% competency.

**Plan for topic "Students completing the course will be able to identify and demonstrate techniques of sterilization"**: 2013/14

The department will not be replacing the current assessment topic and will not be adjusting the criteria baseline. This program is cohort based, so this current course is only offered in the fall semester. The department recommends no changes at this time, but continued review of data gathered for this assessment topic.

**Plan for topic "Students completing DENTL-175 will be able to identify and then chart a variety of existing and diagnosed conditions of teeth."**: 2012/13

The department will be replacing the current assessment topic with a new assessment topic for the next cycle. This program is cohort based so this current course is only offered in the fall semester. This cohort has performed at the same level as previous cohorts so we would like to assess a different area of the course during the next cycle, thus the changing of the assessment topic.

**Plan for topic "Students completing the course will be able to identify and demonstrate techniques of Standard Precautions."**: 2012/13

The department will be replacing the current assessment topic with a new assessment topic for the next cycle. This program is cohort based so this current course is only offered in the fall semester. This cohort has performed at the same level as previous cohorts so we would like to assess a different area of the course during the next cycle, thus the changing of the assessment topic.

**Plan for topic "Students completing the course will be able to identify and demonstrate techniques of disinfection."**: 2012/13

The department will not be replacing the current assessment topic but will adjust the criteria baseline. This program is cohort based so this current course is only offered in the fall semester. This cohort has performed at a similar level as previous cohorts so we would like to adjust the criteria to a higher baseline and see if the students respond to this more stringent criteria. We will implement this in the next cycle. After evaluating the data for this outcome, increase the criteria to for both (a) and (b) to "At least 90% of students completing this course will be able to pass exams at 75% competency."
### Plan for topic "Students completing the course will be able to identify and demonstrate techniques of sterilization": 2012/13

The department will not be replacing the current assessment topic and will not be adjusting the criteria baseline. This program is cohort based so this current course is only offered in the fall semester. The department recommends no changes at this time but continued review of data gathered for this assessment topic.

488. Dental Office Management [DENTL-180] belonging to Dental Assisting [DENTL]

Plan for topic "Students completing the course will be able to identify and demonstrate the various factors necessary to effectively schedule patients for a dental practice.": 2019/20

This was a very successful semester in DENTL 180. Last year, many changes were made in this class to help students understand financial transactions. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing DENTL-180 will be able to complete a financial transaction.": 2019/20

This was a very successful semester in DENTL 180. Last year, many changes were made in this class to help students understand financial transactions. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to identify and demonstrate setting up a computerized dental office practice using Dentrix dental software.": 2018/19

This was a very successful semester in DENTL 180. Last year, many changes were made in this class to help students understand third-party dental insurance claims. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing DENTL-180 will be able to identify and demonstrate the various factors necessary to effectively process a third-party dental insurance claim.": 2018/19
This was a very successful semester in DENTL 180. Last year, many changes were made in this class to help students understand third-party dental insurance claims. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to identify and demonstrate the relationship of dental jurisprudence and ethics": 2017/18

This was a very successful semester in DENTL 180. Last year, many changes were made in this class to help students understand law and ethics. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing DENTL-180 will be able to complete a financial transaction.

The discipline faculty was very pleased with the results and the knowledge the students displayed in completing a financial transaction.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to identify and demonstrate the various factors necessary to effectively schedule patients for a dental practice.

The discipline faculty was very pleased with the results and the knowledge the students displayed in completing a financial transaction.
## DVC Instructional Course SLO Action Plans

This information was shared with all discipline faculty and advisory group.

### Plan for topic "Students completing DENTL-180 will be able to..."

**2015/16**

This course is always a work in progress. We will continue to monitor the progress of the student's work to ensure it complies with State and accreditation standards.

### Plan for topic "Students completing the course will be able to..."

**2015/16**

This course is always a work in progress. We will continue to monitor the progress of the student's work to ensure it complies with State and accreditation standards.

### Plan for topic "Students completing the course will be able to..."

**2014/15**

2014-09-29: The department recommends continuing to assess this topic at this revised level for at least another year, then consider increasing the competency to 80% if performance remains at a similar level.

2015-05-28: We would like to increase the criteria to 90% of the students completing the course will pass exams and assignments with a cumulative score of 75% or higher.

### Plan for topic "Students completing the course will be able to..."

**2014/15**

Revise to 85% of students completing the course will perform at 85% competency.

### Plan for topic "Students completing DENTL-180 will be able to..."

**2015/16**

Revise to 85% of students completing the course will perform at 85% competency.

### Plan for topic "Students completing the course will be able to..."

**2015/16**

The department will not be replacing the current assessment topic. This program is cohort based so this current course is only offered in the spring semester. The department will continue to assess this topic as revised for at least another semester.

### Plan for topic "Students completing DENTL-180 will be able to..."

**2015/16**

The department will not be replacing the current assessment topic. This program is cohort based so this current course is only offered in the spring semester. The department will continue to assess this topic as revised for at least another semester.

### Plan for topic "Students completing DENTL-180 will be able to..."

**2015/16**

The department will not be replacing the current assessment topic. This program is cohort based so this current course is only offered in the spring semester. The department will continue to assess this topic as revised for at least another semester.

### Plan for topic "Students completing DENTL-180 will be able to..."

**2012/13**

The department will not be replacing the current assessment topic. This program is cohort based so this current course is only offered in the spring semester. The department will continue to assess this topic as revised for at least another semester.
The department will be replacing the current assessment topic with a new assessment topic for the next cycle. This program is cohort based so this current course is only offered in the spring semester. This cohort has performed at the same level as previous cohorts so we would like to assess a different area of the course during the next cycle, thus the changing of the assessment topic.

Plan for topic "Students completing the course will be able to Identify and demonstrate setting up a computerized dental office practice using Dentrix dental software.": 2012/13

The department will be replacing the current assessment topic with a new assessment topic for the next cycle. This program is cohort based so this current course is only offered in the spring semester. This cohort has performed at the same level as previous cohorts so we would like to assess a different area of the course during the next cycle, thus the changing of the assessment topic.

Plan for topic "Students completing the course will be able to Identify and demonstrate the relationship of dental jurisprudence and ethics": 2012/13

The department will not be replacing the current assessment topic but adjusting the criteria baseline. This program is cohort based so this current course is only offered in the spring semester. This cohort has performed at a similar level as previous cohorts but we would like to see a slightly higher success rate. After evaluating the data for this outcome, we would like to increase the criteria to "90% pass at 75% competency." during the next cycle.

Plan for topic "Students completing the course will be able to identify and demonstrate the various factors necessary to effectively schedule patients for a dental practice.": 2012/13

The department will not be replacing the current assessment topic but will adjust the criteria baseline. This program is cohort based so this current course is only offered in the spring semester. This cohort has performed at a similar level as previous cohorts so we would like to adjust the criteria to a higher baseline and see if the students respond to this more stringent criteria. We will implement this in the next cycle. After evaluating the current data for this outcome, the department decided to revise Criteria 3a. to the following: "At least 85% of students completing the course will be able to pass exams at 80% competency." And for Criteria 3b. to the following: "100% of students completing the course will be able to perform this exercise at 80% competency."

Plan for topic "Students completing DENTL-180 will be able to complete a financial transaction.": 2012/13

The department will not be replacing the current assessment topic but will adjust the criteria baseline. This program is cohort based so this current course is only offered in the spring semester. **DVC Instructional Course SLO Action Plans**

*using Dentrix dental software.*: 2007/8

No changes. 5/11

**Plan for topic "Students completing DENTL-180 will be able to identify and demonstrate the various factors necessary to effectively process a third-party dental insurance claim."**: 2007/8

No changes. 5/11

**Plan for topic "Students completing the course will be able to identify and demonstrate the various factors necessary to effectively schedule patients for a dental practice."**: 2007/8

No changes.

**Plan for topic "Students completing DENTL-180 will be able to complete a financial transaction."**: 2007/8

No changes.
Plan for topic "Students completing the course will be able to recognize the signs and symptoms of allergic reactions.": 2018/19

This was a very successful semester in DENTL 181. Last year, many changes were made in this class to help students understand medical emergencies. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to recognize the signs and symptoms of syncope.": 2017/18

This was a very successful semester in DENTL 181. This year, many changes were made in this class to help students understand medical emergencies. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing this course will be able to explain the nitrous oxide sedation procedure.": 2017/18

While all students were successful with this assignment, students provided feedback that they would like to view videos on the topic of nitrous oxide sedation administration. I am planning on partnering with our dental hygiene faculty and students to produce a video utilizing the equipment in our clinic setting. Students and faculty from both programs could use this resource to review material any time.

Plan for topic "Students completing this course will be able to list the steps in cardiopulmonary resuscitation.".: 2015/16

The faculty have determined that incorporating a procedure simulation in addition to the in-class exam will give students the opportunity to show their CPR skills. This will help faculty identify students who may need additional instruction prior to internship placement in the Spring semester.

Plan for topic "Students completing the course will be able to demonstrate an understanding of the general concepts of emergency procedures associated with dental treatment.".: 2014/15

The high rate of success can be contributed to the use of small group discussions and hands-on learning simulations.

Plan for topic "Students completing the course will be able to recognize the signs and symptoms of syncope.".: 2011/12
The faculty have determined that the current SLO assessments are well developed because they incorporate both question based evaluations and skills based evaluation by placing students in simulated emergency situations.

**Plan for topic "Students completing the course will be able to demonstrate an understanding of the general concepts of emergency procedures associated with dental treatment."**: 2011/12

The faculty have determined that the current SLO assessments are well developed because they incorporate both question based evaluations and skills based evaluation by placing students in simulated emergency situations.

**Plan for topic "Students completing the course will be able to recognize the signs and symptoms of allergic reactions."**: 2011/12

The faculty have determined that the current SLO assessments are well developed because they incorporate both question based evaluations and skills based evaluation by placing students in simulated emergency situations.
### 490. Dental Radiography Laboratory [DENTL-182] belonging to Dental Assisting [DENTL]

**Plan for topic "Students completing the course will be able to demonstrate proper infection control techniques utilizing guidelines set forth by the Centers for Disease Control (CDC) regarding radiologic procedures."**: 2018/19

This was a very successful semester in DENTL 182. Last year, many changes were made in this class to help students achieve infection control protocol during radiographic exposure on patients. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

<table>

<tr>
<th>Plan for topic &quot;Complete miscellaneous types of intra- and extra-oral radiographic series utilizing x-ray manikins and human patients.&quot;</th>
<th>2015/16</th>
</tr>
</thead>
</table>

This course is always a work in progress. We will continue to monitor the progress of the student's work to ensure it complies with State and accreditation standards.

**Plan for topic "Complete miscellaneous types of intra- and extra-oral radiographic series utilizing x-ray manikins and human patients."**: 2014/15

This course is always a work in progress. We will continue to monitor the progress of the student's work to ensure it complies with State and accreditation standards.

**Plan for topic "Students completing the course will be able to demonstrate proper infection control techniques utilizing guidelines set forth by the Centers for Disease Control (CDC) regarding radiologic procedures."**: 2011/12

No changes anticipated.

**Plan for topic "Explain and demonstrate techniques for exposing, processing, and mounting dental radiographs."**: 2011/12

Continue teaching techniques as planned.

**Plan for topic "Complete miscellaneous types of intra- and extra-oral radiographic series utilizing x-ray manikins and human patients."**: 2011/12

Continue teaching techniques and competency evaluations as before.
Plan for topic "Students completing the course will be able to identify and demonstrate techniques for constructing five provisional crowns.": 2019/20

This was a very successful semester in DENTL 183. Last year, many changes were made in this class to help students understand provisional crowns. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to identify and demonstrate techniques of Coronal Polish.": 2018/19

This was a very successful semester in DENTL 183. Last year, many changes were made in this class to help students understand law and ethics. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to identify and demonstrate techniques of placing and removing orthodontic ligature ties.": 2017/18

This was a very successful semester in DENTL 183. Last year, many changes were made in this class to help students further understand orthodontics. Since it was very successful this year, I do not currently plan to make a change in how I teach orthodontics.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to identify and demonstrate techniques for constructing five provisional crowns.": 2016/17
The discipline faculty feel they would like to increase the amount of hands on time during lab sessions to help the students create additional crowns, especially posterior crowns. The discipline faculty feel by increasing the amount of posterior crowns, it will increase the students retention in constructing provisional crowns.

This information was shared with all discipline faculty and advisory group.

**Plan for topic "Students completing the course will be able to identify and demonstrate techniques of Coronal Polish."**: 2014/15

The course is adjusting its lab hours to all day format so we will see if this helps the students retain the hands on processes. The instructors will review the effectiveness of this format during our next assessment cycle. There are no changes required to this course COMDA.

**Plan for topic "Students completing the course will be able to identify and demonstrate techniques of Coronal Polish."**: 2011/12

The faculty have determined that the current SLO assessments are well developed because they incorporate both question based evaluations and skills based evaluation by placing students in a clinical situation.

**Plan for topic "Students completing the course will be able to identify and demonstrate techniques of placing and removing orthodontic ligature ties."**: 2011/12

The faculty have determined that the current SLO assessments are well developed because they incorporate both question based evaluations and skills based evaluation by placing students in a clinical situation.

**Plan for topic "Students completing the course will be able to identify and demonstrate techniques for constructing five provisional crowns."**: 2011/12

The faculty have determined that the current SLO assessments are well developed because they incorporate both question based evaluations and skills based evaluation by placing students in a clinical situation.

**Plan for topic "Students completing the course will be able to identify and demonstrate techniques of Coronal Polish."**: 2009/10

No further action plan is needed as the explanation, handouts, and competencies along with demonstration provides the student with knowledge to perform the competencies.

**Plan for topic "Students completing the course will be able to identify and demonstrate techniques of placing and removing orthodontic ligature ties."**: 2009/10

No further action plan is needed as the explanation, handouts, and competencies along with demonstration provides the student with knowledge to perform the competency.

**Plan for topic "Students completing the course will be able to identify and demonstrate techniques for constructing five provisional crowns."**: 2009/10

No further action plan is needed as the explanation, handouts, and competencies along with demonstration provides the student with knowledge to perform the competency.
### Plan for topic "Students completing the course will be able to demonstrate progression in competency of Dental Assistant (DA) and RDA skills in dental clinical settings, per American Dental Association accreditation requirements."

This was a very successful semester in DENTL 184. Last year, many changes were made in this class to help students understand DA and RDA duties as stated in California's Dental Practice Act. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

### Plan for topic "Students completing DENTL-184 will be able to identify the DA and RDA duties as stated in California's Dental Practice Act."

This was a very successful semester in DENTL 184. Last year, many changes were made in this class to help students understand DA and RDA duties as stated in California's Dental Practice Act. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

### Plan for topic "Students completing the course will be able to take the California state written board exam for their Registered Dental Assistant (RDA) license."

This was a very successful semester in DENTL 184. Last year, many changes were made in this class to help students understand law and ethics. It was very successful this year, so I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.
Plan for topic "Students completing this course will be able to take and pass the Mock California state written Law and Ethics exam for their Registered Dental Assistant (RDA) license.": 2017/18

This was a very successful semester in DENTL 184. Because this semester went well, I do not currently plan to make a change.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing DENTL-184 will be able to identify the DA and RDA duties as stated in California's Dental Practice Act." : 2016/17

In addition to the required textbook material, the discipline faculty feel they would like to increase the amount of time spent on DA and RDA duties during lecture and lab times to help students identify more duties. The discipline faculty feel by increasing the students amount of class time, it will increase the students retention in identifying the DA and RDA duties.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to demonstrate progression in competency of Dental Assistant (DA) and RDA skills in dental clinical settings, per American Dental Association accreditation requirements." : 2016/17

In addition to the required textbook material, the discipline faculty feel they would like to increase the amount of time spent on DA and RDA duties during lecture and lab times to help students identify more duties. The discipline faculty feel by increasing the students amount of class time, it will increase the students retention in identifying the DA and RDA duties.

This information was shared with all discipline faculty and advisory group.

Plan for topic "Students completing the course will be able to take the California state written board exam for their Registered Dental Assistant (RDA) license." : 2015/16

This course is always a work in progress. We will continue to monitor the progress of the student's work to ensure it complies with state and accreditation standards.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to create a professional resume and cover letter for employment search":

2014/15

Next Spring semester we will be utilizing the services of the Career and Transfer center to improve Student Learning Outcomes on cover letter and resume writing.

Plan for topic "Students completing the course will be able to take the California state written board exam for their Registered Dental Assistant (RDA) license.": 2013/14

After evaluating the data for this revised outcome, a. the department will keep analysis at 75% of the students completing the course will pass at 75%. b. increase the outcome to 80% of students completing the course to pass at 75%.

Plan for topic "Students completing the course will be able to demonstrate progression in competency of Dental Assistant (DA) and RDA skills in dental clinical settings, per American Dental Association accreditation requirements.": 2013/14

Per the Fall 2013 revised Action Plan, as the cohort has performed at same level as previous cohorts, this Topic will be replaced with a new assessment topic for Spring 2014. The department suggests: Topic #2: Students completing this course will be able to complete pre-clinical review skills. Assessment method: Demonstrated lab skills that will be measured using instructor-developed competency rubric as approved by Dental Board of California and American Dental Association for accreditation. Criteria: 90% of students completing the course will pass at 75%.

Plan for topic "Students completing DENTL-184 will be able to identify the DA and RDA duties as stated in California's Dental Practice Act.": 2013/14

Per the Fall 2013 revised Action Plan, as the cohort has performed at same level as previous cohorts, this Topic will be replaced with a new assessment topic for Spring 2014. The department suggests: Topic #2: Students completing this course will be able to complete pre-clinical review skills. Assessment method: Demonstrated lab skills that will be measured using instructor-developed competency rubric as approved by Dental Board of California and American Dental Association for accreditation. Criteria: 90% of students completing the course will pass at 75%.

Plan for topic "Students completing the course will be able to create a professional resume and cover letter for employment search": 2013/14

Since this particular exam was newly created as a separate exam, it will be reviewed for necessary revisions. The department suggests revising the Assessment Criteria to 77% of students completing the course to pass at 75%. The department will evaluate these changes for Spring 2014 course upon assessment results.

Plan for topic "Students completing the course will be able to take the California state written board exam for their Registered Dental Assistant (RDA) license.": 2012/13

After evaluating the data for this outcome, the department will further revise the mock exam to more closely replicate the current state boards. We will keep analysis at 75% of the students completing the course will pass at 75%, and reassess after the next cycle results.

Plan for topic "Students completing the course will be able to demonstrate progression in competency of Dental Assistant (DA) and RDA skills in dental clinical settings, per American Dental Association accreditation requirements.": 2013/14

Per the Fall 2013 revised Action Plan, as the cohort has performed at same level as previous cohorts, this Topic will be replaced with a new assessment topic for Spring 2014. The department suggests: Topic #2: Students completing this course will be able to complete pre-clinical review skills. Assessment method: Demonstrated lab skills that will be measured using instructor-developed competency rubric as approved by Dental Board of California and American Dental Association for accreditation. Criteria: 90% of students completing the course will pass at 75%.
DVC Instructional Course SLO Action Plans

**RDA skills in dental clinical settings, per American Dental Association accreditation requirements.**: 2012/13

The department will be replacing the current assessment topic with a new assessment topic for the next cycle. This program is cohort based so this current course is only offered in the spring semester. This cohort has performed at the same level as previous cohorts so we would like to assess a different area of the course during the next cycle, thus the changing of the assessment topic.

**Plan for topic “Students completing DENTL-184 will be able to identify the DA and RDA duties as stated in California's Dental Practice Act.”**: 2012/13

The department will be replacing the current assessment topic with a new assessment topic for the next cycle. This program is cohort based so this current course is only offered in the spring semester. This cohort has performed at the same level as previous cohorts so we would like to assess a different area of the course during the next cycle, thus the changing of the assessment topic.

**Plan for topic “Students completing the course will be able to take the California state written board exam for their Registered Dental Assistant (RDA) license.”**: 2007/8

- a. No modifications at this time. 5/08
- b. Mock national certification exam will be dropped, as too few students take it. Mock RDA board exam will be revised further (number of questions and nature of questions), for spring ’09. Also will reinforce need for students to utilize review book earlier in semester. 5/08

**Plan for topic “Students completing the course will be able to demonstrate progression in competency of Dental Assistant (DA) and RDA skills in dental clinical settings, per American Dental Association accreditation requirements.”**: 2007/8

- a. No modifications at this time. 5/08
- b. No modifications at this time. 5/08

**Plan for topic “Students completing DENTL-184 will be able to identify the DA and RDA duties as stated in California's Dental Practice Act.”**: 2007/8

- a. No modifications at this time. 5/08
- b. No modifications at this time. 5/08

**Plan for topic “Students completing the course will be able to create a professional resume and cover letter for employment search”**: 2007/8

Will revise measurement criteria to “at least 90% of students completing course will submit a correctly written resume and cover letter”. 5/08
DVC Instructional Course SLO Action Plans

493. Student Instructional Assistant [DENTL-299] belonging to Dental Assisting [DENTL]
### DVC Instructional Course SLO Action Plans

**494. Introduction to Lighting Design [DRAMA-111] belonging to Performing Arts [DRAMA]**

**Plan for topic "Students completing the course will be able to identify safety standards for working with electricity."**: 2020/21

| Students in DRAMA 200 and 201 have all successfully completed projects involving electricity. no action plan. |

**Plan for topic "Students completing the course will be able to identify safety standards for working with electricity."**: 2016/17

| The course syllabus being designed with several assignments directly related to safety standards is aiding in the student success in meeting this topic standard. The practice of designing assignments that are designed to address safety standards will continue to be the dept. practice. |

**Plan for topic "Students completing the course will be able to evaluate technological requirements and production procedures for stage lighting."**: 2016/17

| We will continue to assign partnered projects in Drama 111. The structure of the class is supporting topic success. A partnered project allows students to think, pair, share. It provides an environment where all students can display their content retention. |

**Plan for topic "Students completing the course will be able to utilize "trouble shooting" techniques to solve stage lighting issues."**: 2016/17

| Working in a project-based, hands on environment allows students practically apply learned content. The department will continue to encourage the practice of working in an active, hands-on environment. |

**Plan for topic "Students completing the course will be able to identify safety standards for working with electricity."**: 2013/14

| Full Time Drama Area Faculty will address action plan during August planning meeting; Based on student success, in current SLO, no change in action appears needed at this time. However, all students meeting the standard is the DVC Drama goal. Changes in action plan will be made, pending faculty cohort and agreement. |

DVC Instructional Course SLO Action Plans

DVC Drama Faculty have determined that there is a need for a different method for assessing SLOs. The faculty have determined that self-assessment surveys do not adequately capture SLO results due to several factors. Drama faculty are in the process of developing a pre and post assessment system to more accurately represent true student learning outcomes. The new assessment system will be used during the next SLO cycle.

### DVC Instructional Course SLO Action Plans

#### 495. Introduction to Stage Makeup [DRAMA-112] belonging to Performing Arts [DRAMA]

**Plan for topic "Students completing the course will be able to sketch a make-up design, for use in a theatrical production."**: 2018/19

- Our department has rubric standard for this topic. The topic has been tested several assessment cycles and a variety of methods have been used to test. The history of topic success provides evidence that this topic need no longer be assessed.

**Plan for topic "Students completing the course will be able to sketch a make-up design, for use in a theatrical production."**: 2015/16

- The class assignments are meeting the student learning objectives of Drama 112.

- New topics will be tested during the next cycle.

**Plan for topic "Students completing the course will be able to display their proficiency in make-up application."**: 2015/16

- Individual sketching techniques will be assessed during next assessment cycle.

- The student success topic is broad and currently isn't providing data that might help us in future instruction.

**Plan for topic "": 2012/13

- DVC Drama Faculty have determined that there is a need for a different method for assessing SLOs. The faculty have determined that self-assessment surveys do not adequately capture SLO results do to several factors. Drama faculty are in the process of developing a pre and post assessment system to more accurately represent true student learning outcomes. The new assessment system will be used during the next SLO cycle.

**Plan for topic "": 2011/12

- DVC Drama Faculty have determined that there is a need for a different method for assessing SLOs. The faculty have determined that self-assessment surveys do not adequately capture SLO results do to several factors. Drama faculty are in the process of developing a pre and post assessment system to more accurately represent true student learning outcomes. The new assessment system will be used during the next SLO cycle.

**Plan for topic "": 2011/12

- DVC Drama Faculty have determined that there is a need for a different method for assessing SLOs. The faculty have determined that self-assessment surveys do not adequately capture SLO results do to several factors. Drama faculty are in the process of developing a pre and post assessment system to more accurately represent true student learning outcomes. The new assessment system will be used during the next SLO cycle.

**Plan for topic "Students completing the course will be able to sketch a make-up design, for use in a theatrical production."": 2010/11

- 80% of all students assessed indicated success. No modification or change in action plan at this time. Will re-assess during next SLO cycle.
Drama 112 classroom lab hour usage will be redesigned to allow for additional in class instruction pertaining to execution of stage makeup designs, utilizing research based stimuli and critical thinking skills.

**Plan for topic "": 2010/11**

8 of 21 students in 1 section achieved this outcome (38%). Drama 112 curriculm will be modified to allow for additional in-class lecture and instruction focusing on utilizing proper terminology when discussing makeup design and theatrical processes.

**Plan for topic "Students completing the course will be able to sketch a make-up design, for use in a theatrical production."": 2008/9**

Repeat next semester.

**Plan for topic "": 2008/9**

Repeat next semester.

**Plan for topic "": 2008/9**

Repeat next semester.
Plan for topic "Design and execute the creation of a simple costume accessory.": 2017/18
The students are walked through the phases of simple costume accessory creation. The course is taught step-by-step and in a hands-on manner. We believe that the student success in Drama 113 is because of the methods of instruction utilized by our faculty. Demonstration when working with costuming students seems far more productive and successful than traditional lecture alone.

Plan for topic "Identify the steps needed to get costumes designed, made, and fitted on an actor on stage.": 2014/15
Addressing this assessment cycle: Lab By Arrangement format for Drama 113 will be changed. The new, set, lab hours will hopefully help to address the results of the SLO data collected. 16 of 21 students; met the topic standard. Establishing a regular, weekly lab, rather than allowing the students to chose the hours throughout the semester’s course, will ensure that all students receive 1:1 practicum experience on a consistent basis.

Plan for topic "Design and execute the creation of a simple costume accessory.": 2014/15
Addressing this assessment cycle: Lab By Arrangement format for Drama 113 will be changed. The new, set, lab hours will hopefully help to address the results of the 2014-15 SLO data collected. 21 of 21 students met this topic standard. Although this standard was clearly met (100%) establishing a regular, weekly lab, will ensure that all students receive 1:1 practicum experience on a consistent basis, and allow for expedited faculty intervention and redirection, if necessary.

Plan for topic "Demonstrate basic figure drawing, sewing, and costume fitting skills.": 2014/15

DVC Instructional Course SLO Action Plans

497. Script Analysis [DRAMA-114] belonging to Performing Arts [DRAMA]
Plan for topic "Students completing DRAMA-122 will be able to apply the basic acting techniques, which are detailed in class, to prepare and perform staged presentations.": 2016/17

The course projects and assignments, that are being created by Drama 122 instructors, aid in the student success visible in the 2017 data. Those students who do not complete the assigned projects are failing to meet the standard. The environment for student learning is being created. We continue in our current strategies.

Plan for topic "Students completing the course will be able to Communicate by using acting terminology in classroom tasks." 2016/17

In all sections, regardless of cohort or instructor, student topic success is apparent in the collected data.

Drama 122 instructors will continue to encourage their students to use proper, basic acting terminology in all 122 activities.

Plan for topic "Students completing the course will be able to apply self-assessment techniques in evaluating stage acting.": 2016/17

Drama 122 instructors will continue to develop curriculum that supports enhancing self-assessment skill.

Plan for topic "Students completing the course will be able to develop memorization skills utilizing scene presentations." 2016/17

Creating rubrics, specifically addressing memorization, is helpful in providing the feedback Drama 122 students need when developing that skill.

Plan for topic "Students completing the course will be able to demonstrate the ability to communicate non-verbally." 2016/17

The environment for student learning is being created. Drama 122 instructors will continue to use their developed strategies.

Plan for topic "Students completing DRAMA-122 will be able to apply the basic acting techniques, which are detailed in class, to prepare and perform staged presentations." 2014/15

The specific plan of attack is TBD. However, it is evident that re-testing the topics during the next cycle would be of value, as the class is a recent revival/offering. Re-assessment during 2015-16 would be of value to the students, and also the department.

Plan for topic "Students completing the course will be able to Communicate by using acting terminology in classroom tasks." 2012/13

Data will be addressed and assessed by Drama Area faculty during the SLO meeting scheduled for the summer of 2013. No specific action will be taken at this time. Drama Area faculty will utilize the data from this and other courses during a scheduled, "SLO findings session"* and develop a collective approach to further advance drama area success and student learning outcomes.

Plan for topic "Students completing the course will be able to apply self-assessment techniques in evaluating stage acting.": 2012/13

- No modification.

**Plan for topic "Students completing the course will be able to demonstrate the ability to communicate non-verbally."**: 2008/9

- Repeat next semester.
- No modification.
Plan for topic "Display the ability to execute a specific blocking pattern.": 2016/17
The Drama department will continue in our current 123 teaching strategies.

Plan for topic "Identify the physical adaptations that they will need to make, to accurately portray an assigned character from a play script." : 2016/17
The environment for student learning is being created.

Plan for topic "Integrate the use of the text, personal experience, and imagination when developing a character analysis.": 2016/17
Across all 3 sections, those students who missed classes when character analysis and the necessary components of text, experience and imagination were demonstrated, had a difficult time meeting the topic standard. The environment for student learning is being created. The Drama department will continue in our current 123 teaching strategies. Instructors will continue to re-introduce the content related to this topic a minimum of three times throughout the semester.

The environment for student learning is being created. Drama 123 instructors will continue their current teaching strategies.

Plan for topic "Identify the physical adaptations that they will need to make, to accurately portray an assigned character from a play script." : 2013/14
Drama 123 assessment results for this topic tested in 2013-14 indicate that there is no instructional modification required as the vast majority of students met all topic requirements. New assessment topic will be created and evaluated during the next cycle, as the students met the standards.

Plan for topic "Integrate the use of the text, personal experience, and imagination when developing a character analysis.": 2013/14
Drama 123a's assessment results for 2013-14 topic #2 brought to our attention that we need to develop an assignment/class task that focuses on the students' ability to access the imagination and gather outside source information for character development. A research project rubric will be developed and utilized by all instructors teaching 123. New assessment topics will be evaluated during the next cycle, as the students met the standards for #1 and #3, but we will keep the #2 topic in place and reevaluate our action plan's effectiveness.

Plan for topic "Present a staged performance, off book, without the need of cueing." : 2013/14
Drama 123 assessment results for this topic tested in 2012-13 indicate that there is no instructional modification required as the vast majority of students met all topic requirements. New assessment topic will be created and evaluated during the next cycle, as the students met the standards.

Plan for topic "Identify the physical adaptations that they will need to make, to accurately portray an assigned character from a play script." : 2011/12
DVC Drama Faculty have determined that there is a need for a different method for assessing SLOs. ### DVC Instructional Course SLO Action Plans

Student learning outcomes. The new assessment system will be used during the next SLO cycle.

**Plan for topic "Integrate the use of the text, personal experience, and imagination when developing a character analysis."**: 2011/12

DVC Drama Faculty have determined that there is a need for a different method for assessing SLOs. The faculty have determined that self-assessment surveys do not adequately capture SLO results due to several factors. Drama faculty are in the process of developing a pre and post assessment system to more accurately represent true student learning outcomes. The new assessment system will be used during the next SLO cycle.

**Plan for topic "Present a staged performance, off book, without the need of cueing."**: 2011/12

DVC Drama Faculty have determined that there is a need for a different method for assessing SLOs. The faculty have determined that self-assessment surveys do not adequately capture SLO results due to several factors. Drama faculty are in the process of developing a pre and post assessment system to more accurately represent true student learning outcomes. The new assessment system will be used during the next SLO cycle.

**Plan for topic "Identify the physical adaptations that they will need to make, to accurately portray an assigned character from a play script."**: 2010/11

6 of 9 students in 2 sections achieved this outcome (66%). There were 60 enrolled. Data is too narrow and limited to constitute any curricular modification at this time. Will re-assess during next SLO cycle. Students will be strongly encouraged to participate in survey monkey assessment method; Assignment of survey completion will be detailed in class and in syllabus to ensure knowledge of assessment tool and its importance to student learning outcome measurement.

**Plan for topic "Integrate the use of the text, personal experience, and imagination when developing a character analysis."**: 2010/11

7 of 9 students in 2 sections achieved this outcome (77%). There were 60 enrolled. Data is too narrow and limited to constitute any curricular modification at this time. Will re-assess during next SLO cycle. Students will be strongly encouraged to participate in survey monkey assessment method; Assignment of survey completion will be detailed in class and in syllabus to ensure knowledge of assessment tool and its importance to student learning outcome measurement.

**Plan for topic "Present a staged performance, off book, without the need of cueing."**: 2010/11

4 of 9 students in 2 sections achieved this outcome (44%). There were 60 enrolled. Data is too narrow and limited to constitute any curricular modification at this time. Will re-assess during next SLO cycle. Students will be strongly encouraged to participate in survey monkey assessment method; Assignment of survey completion will be detailed in class and in syllabus to ensure knowledge of assessment tool and its importance to student learning outcome measurement.

**Plan for topic "Integrate the use of the text, personal experience, and imagination when developing a character analysis."**: 2008/9

Repeat next semester.

No modification.

**Plan for topic "Present a staged performance, off book, without the need of cueing."**: 2008/9

Repeat next semester.
No modification.
Plan for topic "Verbally outline an effective personal approach when addressing unique vocal, physical, intellectual and emotional preparations during character development."": 2018/19

Drama Faculty mindfully alternate the teaching of our performance courses within the department to ensure that we are providing the opportunity for students to learn a wide-variety of character development tools. We are successful in this topic measure because the students who take Drama 124, more often than not have taken Drama 122 and 123 before entering the course. Faculty in both semesters reported that the students tested were articulate and verbally spoke to a broad and diverse pool of learned tools which they personally utilize when developing character.

Plan for topic "Demonstrate an in-depth method of analysis for creating a character": 2015/16

The student success in meeting this topic indicated that the class content which includes Stanislavsky and Meisner approaches to character creation are aiding student success. Drama 124 students are traditionally transfer students pursuing a degree in Theatre Performance. The ability to demonstrate an in-depth method of analysis utilizing Stanislavsky and/or Meisner techniques is a requirement for acceptance into most 4 yr. or professional actor training programs.

The topic needs to be assessed each cycle to maintain excellence in preparing Drama 124 students for further schooling and/or training in the craft of Acting.

Plan for topic "Display the ability to address the vocal, physical, intellectual, emotional aspects of a character."": 2015/16

While all students had obvious understanding of the required aspects, not all were able to display the ability to "do" in each category.

Vocal: 17 of 25

Physical: 15 of 25

Intellectual: 25 of 25

Emotional: 15 of 25

Courses that specifically address the Physical, Emotional and Vocal needs of acting students will be explored. Currently no specific classes are offered to develop specific
## DVC Instructional Course SLO Action Plans

### Plan for topic "Demonstrate an in-depth method of analysis for creating a character": 2012/13

Data will be addressed and assessed by Drama Area faculty during the SLO meeting scheduled for the summer of 2013. No specific action will be taken at this time. Drama Area faculty will utilize the data from this and other courses during a scheduled, "SLO findings session" and develop a collective approach to further advance drama area success and student learning outcomes.

### Plan for topic "Verbally outline an effective personal approach when addressing unique vocal, physical, intellectual and emotional preparations during character development.": 2012/13

Data will be addressed and assessed by Drama Area faculty during the SLO meeting scheduled for the summer of 2013. No specific action will be taken at this time. Drama Area faculty will utilize the data from this and other courses during a scheduled, "SLO findings session" and develop a collective approach to further advance drama area success and student learning outcomes.

### Plan for topic "Display the ability to address the vocal, physical, intellectual, emotional aspects of a character.": 2012/13

Data will be addressed and assessed by Drama Area faculty during the SLO meeting scheduled for the summer of 2013. No specific action will be taken at this time. Drama Area faculty will utilize the data from this and other courses during a scheduled, "SLO findings session" and develop a collective approach to further advance drama area success and student learning outcomes.

### Plan for topic "Demonstrate an in-depth method of analysis for creating a character": 2011/12

DVC Drama Faculty have determined that the SLO was met by the majority of students. The faculty have determined that self-assessment surveys will be replaced with a pre and post skills based assessment using a standardized rubric. The new assessment system will be used during the next SLO cycle.

### Plan for topic "Demonstrate an in-depth method of analysis for creating a character": 2010/11

6 of 9 students in 2 sections achieved this outcome (66%). There were 26 enrolled, including 155X. Only received responses from 9 students; Data is too narrow and limited to constitute any curricular modification at this time. Will re-assess during next SLO cycle.

### Plan for topic "Verbally outline an effective personal approach when addressing unique vocal, physical, intellectual and emotional preparations during character development.": 2010/11

Although only 9 students responded to the assessment survey, all 9 "strongly agreed," with the outcome statement #2. 100% success. No modification at this time; Will re-assess during next SLO cycle.

### Plan for topic "Display the ability to address the vocal, physical, intellectual, emotional aspects of a character.": 2010/11

Only received responses from 9 students; Data is too narrow and limited to constitute any curricular modification at this time. Will re-assess during next SLO cycle.
501. Advanced Styles in Scene Study: From Shakespeare to Shaw [DRAMA-125] belonging to Performing Arts [DRAMA]

Plan for topic "Students completing this course will be able to verbally outline an effective personal approach when addressing unique vocal, physical, intellectual and emotional preparations during character development.": 2018/19

Will report findings and action plan in 2019-2020 reporting cycle.

Plan for topic "New assessment topics will be created and tested during the Spring 2016 semester; Data will be entered after Spring 2016." : 2016/17

new topic created.

Plan for topic "Students will be able to perform a non-contemporary role integrating vocal, physical and advanced characterization." : 2016/17

SLO topic success is apparent in the collected data. Drama 125 instructors will continue applying their developed strategies.

Plan for topic "New assessment topics will be created and tested during the Spring 2016 semester; Data will be entered after Spring 2016." : 2014/15

Problem occurred during the switch to the new WebSLO system, Data collection in process and will be entered by the end of Spring 2016

DVC Instructional Course SLO Action Plans

504. Auditioning and Preparation for the Camera II [DRAMA-128] belonging to Performing Arts [DRAMA]
Plan for topic "Students completing this course will be able to utilize the vocabulary specific to the television and film industry.":
2016/17

This is a new course and this is the first assessment cycle.

We will reassess this topic during the next cycle and compare the data.
Plan for topic "Clarify and pre-plan the scope of their presenting work before attending the festival": 2018/19

Our determined success criteria, of meeting all of the standards as determined by the KCACTF rules, ensures that our students compete and showcase professional-level work. While this was not achieved by a few, the majority were festival-ready. The striving for is what is important to continue to encourage. The KCACTF rules are specific and the students who did not meet our criteria, went to the festival, where they received external feedback which echoed the suggestions of the department's faculty at the preview showcase.
Plan for topic "Discuss stage movement and staging elements utilizing proper theatrical terminology." 2018/19
While 87% of students met the standard, we will need to test more than one, small section to determine if students will continue to be successful with this particular learning outcome. We are cannot speak to success without testing a broader pool.

Plan for topic "Discuss stage movement and staging elements utilizing proper theatrical terminology." 2015/16
After discussing the written test results with the Drama 130 students, the success in meeting this standard was 100% for the students enrolled that had taken Drama 100 and 122 prior to enrolling in Drama 130. Prerequisite recommendation needs to be reviewed.

Plan for topic "Students completing the course will be able to analyze play scripts for directorial use." 2015/16
Being that all but 1 student received a 70% or higher, it appears as though the topic is being well covered within the class structure. Topic will not be re-assessed in the new SLO cycle as this topic standard

Plan for topic "Discuss stage movement and staging elements utilizing proper theatrical terminology." 2012/13
Data will be addressed and assessed by Drama Area faculty during the SLO meeting scheduled for the summer of 2013. No specific action will be taken at this time. Drama Area faculty will utilize the data from this and other courses during a scheduled, "SLO findings session" and develop a collective approach to further advance drama area success and student learning outcomes.

none at this time/ goal achieved review at next assessment
### DVC Instructional Course SLO Action Plans

**507. Introduction to Theater [DRAMA-139] belonging to Performing Arts [DRAMA]**

**Plan for topic "Students completing DRAMA-139 will be able to identify theatrical production team members and understand the specific duties assigned to each job."**: 2017/18

Our goal is that at least 90% of our students be able to accurately identify all design team members and their duties; We believe that to be attainable. After a deep review of the text utilized in most of our Drama 139 sections, we discovered that two of the design team members and their duties are barely addressed. The book identifies and is thorough in describing Scenic, Lighting, Costuming and Sound, but it lists Makeup and Props as sub-categories. We will encourage instructors to add additional Make-up and Prop content to their lectures and reassess during the next cycle.

**Plan for topic "Students completing DRAMA-139 will be able to identify theatrical production team members and understand the specific duties assigned to each job."**: 2014/15

The specific plan of attack is TBD. However, it is evident that re-testing the topics during the next cycle would be of value, as the class is a recent revival/offering. Re-assessment during 2015-16 would be of value to the students, and also to the department.

**Plan for topic "Students completing the course will be able to understand chronicle theatrical genres and the societies in which they existed and thrived."**: 2013/14

Drama 139 assessment results for this topic tested in 2013-14 indicate that there is no instructional modification required as the vast majority of students met all topic requirements. New assessment topic will be created and evaluated during the next cycle, as the students met the standards.

**Plan for topic "Students completing the course will be able to identify the various design and performance elements in the theatre throughout history."**: 2013/14

Drama 139 assessment results for this topic tested in 2013-14 indicate that there is no instructional modification required as the vast majority of students met all topic requirements. New assessment topic will be created and evaluated during the next cycle, as the students met the standards.

**Plan for topic "Students completing the course will be able to gain understanding of the historical origins of modern theatre."**: 2013/14

Drama 139 assessment results for this topic tested in 2013-14 indicate that there is no instructional modification required as the vast majority of students met all topic requirements. New assessment topic will be created and evaluated during the next cycle, as the students met the standards.
Plan for topic "Analyze a multi-cultural play script for plot, character, and theme.": 2018/19

Our department is excited by these findings. Reading and Writing Across the Curriculum has encouraged the use of specific tools and best practices and we are taking care to include into our coursework. We require a variety of college-level writing assignments in all of our lecture classes. This topic's success is a reflection of our department's focus and determined approach.

Plan for topic "Analyze a multi-cultural play script for plot, character, and theme.": 2015/16

All students met the topic standard. They were all able to identify the plots, characters and themes found in the play scripts that were studied in the course.

In the next SLO cycle for 142, new topics will be tested. The topic that was assessed is too broad. The Drama department determines that the topic/topics tested in 142 during future assessment cycles need to dig deeper to find data that might be used for future course improvement. 142 has been assessed, every student has met every assessment topic ever tested.

Plan for topic "Analyze a multi-cultural play script for plot, character, and theme.": 2012/13

Data will be addressed and assessed by Drama Area faculty during the SLO meeting scheduled for the summer of 2013. No specific action will be taken at this time. Drama Area faculty will utilize the data from this and other courses during a scheduled, "SLO findings session" and develop a collective approach to further advance drama area success and student learning outcomes.

Plan for topic "": 2012/13

Data will be addressed and assessed by Drama Area faculty during the SLO meeting scheduled for the summer of 2013. No specific action will be taken at this time. Drama Area faculty will utilize the data from this and other courses during a scheduled, "SLO findings session" and develop a collective approach to further advance drama area success and student learning outcomes.

Plan for topic "": 2012/13

Data will be addressed and assessed by Drama Area faculty during the SLO meeting scheduled for the summer of 2013. No specific action will be taken at this time. Drama Area faculty will utilize the data from this and other courses during a scheduled, "SLO findings session" and develop a collective approach to further advance drama area success and student learning outcomes.

Plan for topic "Analyze a multi-cultural play script for plot, character, and theme." : 2011/12

DVC Drama Faculty have determined that the SLO was met by the majority of students. The faculty have determined that self-assessment surveys will be replaced with a a pre and post assessment using a standardized rubric. The new assessment system will be used during the next SLO cycle.

Plan for topic "": 2011/12

DVC Drama Faculty have determined that the SLO was met by the majority of students. The faculty have determined that self-assessment surveys will be replaced with a a pre
and post assessment using a standardized rubric. The new assessment system will be used during the next SLO cycle.

**Plan for topic "": 2011/12**

DVC Drama Faculty have determined that the SLO was met by the majority of students. The department will monitor this SLO and see if the percent of students succeeding in this SLO increases after a few modifications. This class will be reassess in the next SLO cycle. The faculty have determined that self-assessment surveys will be replaced with a pre and post assessment using a standardized rubric.

**Plan for topic "": 2011/12**

DVC Drama Faculty have determined that the SLO was met by the majority of students. The faculty have determined that self-assessment surveys will be replaced with a pre and post assessment using a standardized rubric. The new assessment system will be used during the next SLO cycle.

DVC Instructional Course SLO Action Plans

510. Topics in Drama [DRAMA-155] belonging to Performing Arts [DRAMA]

Plan for topic "Students completing this course will be able to demonstrate the ability to perform/work on complex characters/projects.": 2016/17

The drama dept. will create topics courses that allow students to broaden their theatrical knowledge. 155 courses will be designed to enhance theatrical knowledge outside the scope of current DVC offerings and keep current to evolving industry standards. If a topics/experimental course is successful it will be submitted to WCS for new course development.

Drama 155KC has been submitted to WCS to include it in the department's cataloged course offerings.

Drama 155AD will be included in a future schedule. The department will assess its value to the students it serves.

Plan for topic "Students completing this course will be able to demonstrate an advanced level of discipline, theatrical ethics, and collaboration from rehearsal through performance. (155Y only)" : 2013/14

Drama 155 assessment results for 2013-14 indicate that there is no instructional modification required as the all of the assessed students met all topic requirements. New assessment topic(s) will be created and evaluated during the next cycle, as the students met the standards as stated.

Plan for topic "Students completing this course will be able to apply advanced acting/technical skills in a stage production and demonstrate comprehensive self-assessment techniques. (155Y only)" : 2013/14

Drama 155 assessment results for 2013-14 indicate that there is no instructional modification required as the all of the assessed students met all topic requirements. New assessment topic(s) will be created and evaluated during the next cycle, as the students met the standards as stated.

Plan for topic "Students completing this course will be able to demonstrate the ability to perform/work on complex characters/projects. (155Y only)" : 2013/14

511. Topics in Technical Theater [DRAMA-157] belonging to Performing Arts [DRAMA]
512. Introduction to Musical Theater [DRAMA-170] belonging to Performing Arts [DRAMA]

**Plan for topic "Articulate the elements inherit within the musical theatre genre, utilizing the proper theatrical terminology."**: 2018/19

| The language of this topic is very broad. The Department is satisfied with the results and will develop a different learning outcome topic, which has a narrower focus. |

**Plan for topic "Articulate the elements inherit within the musical theatre genre, utilizing the proper theatrical terminology."**: 2014/15

| Assessment in Spring 2016 |

**Plan for topic "Apply research-based inquiry to the discovery of the sociological, political and economic factors that have impacted musical theater."**: 2014/15

| Assessment in Spring 2016, action plan will be established after data entry and analysis. |

**Plan for topic "Exhibit, and participate in, a wide variety of musical theatre showcase selections."**: 2014/15

| Assessment in Spring 2016, action plan will be established after data entry and analysis. |
513. Musical Theater II [DRAMA-171] belonging to Performing Arts [DRAMA]
Plan for topic "Students completing this course will be able to integrate singing, dancing and acting when performing a advanced-level musical theatre scene."

2016/17

We will re-test this topic next cycle. This is a new class. Additional data needs to be collected before an action plan can be created.
514. Introduction to Technical Theater [DRAMA-200] belonging to Performing Arts [DRAMA]
Plan for topic "Students completing DRAMA-200 will be able to execute a variety of technical theatre tasks, safely and with competence." : 2016/17

The environment for successful learning is being created.

The two students who did not meet the topic standards chose to not attend or complete assignments.

Evidence proves a direct correlation with poor attendance and project completion

The two students were often absent and both neglected to actively participate.

Plan for topic "Students completing the course will be able to demonstrate the skills necessary to collaborate with a design team." : 2016/17

The Drama department will continue in our current Drama 200 teaching strategies.

A new topic will be assessed next SLO cycle.

Plan for topic "Students completing the course will be able to utilize proper theatrical vocabulary." : 2016/17

The structure of the class is supporting topic success. new topic will be assessed in the next SLO cycle.

Plan for topic "Students completing the course will be able to understand the relationships and responsibilities of theatrical designers and technicians." : 2016/17

The environment for successful learning is being created.

The two students who did not meet the topic standards chose to not attend or complete assignments.

Evidence proves a direct correlation with poor attendance.

Plan for topic "Students completing the course will be able to utilize proper theatrical vocabulary while carrying out theatrical tasks.": 2016/17

The students were able to utilize theatrical vocabulary.

We will continue in our current strategies.

Will assess new topic during the next SLO cycle.

Plan for topic "Students completing the course will be able to demonstrate knowledge on the workings of theatrical equipment.": 2016/17

The students were able to utilize theatrical vocabulary.

We will continue in our current strategies.

Will assess new topic during the next SLO cycle.

Plan for topic "Students completing the course will be able to master safe and proper use of all theatrical equipment used in theatrical tasks.": 2016/17

The Drama department will continue in our current Drama 201 teaching strategies.

The hands-on nature of the class allows for tactile learning and content retention.

A new topic will be assessed next SLO cycle.

Plan for topic "Students completing the course will be able to utilize proper theatrical vocabulary while carrying out theatrical tasks.": 2013/14

Drama 201 assessment results for 2013-14 indicate that there is no instructional modification required as all 23 of the assessed students met the topic requirements. New assessment topic(s) will be created and evaluated during the next cycle, as the students met the standards as stated.

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing DRAMA-202 will be able to display professional-level stage etiquette and work ethic."*: 2017/18

The "Snake Speech" method works. A student may enter a technical theatre production class as a novice, perhaps with little to no practical experience, but with professional-level stage etiquette instruction and practicum, they exit the class better prepared to find and keep gainful employment in the field. We will continue to find new technical theatre practicums which expose our students to real-life simulations.

Plan for topic "Students completing DRAMA-202 will be able to display professional-level stage etiquette and work ethic."*: 2014/15

Specific departmental action plan is TBD. However, due to the 100% reflection of topic, a new topic(s) will most definitely be determined and tested during the next SLO assessment cycle.

Plan for topic "Students completing DRAMA-202 will be able to utilize learned classroom knowledge in a fully mounted theatrical production."*: 2014/15

TBD. Most likely a new topic will be assessed after department SLO discussion and round table.

Plan for topic "Students completing DRAMA-202 will be able to translate classroom knowledge and practical application techniques to a fully realized stage production": 2013/14

The Drama dept. faculty will work collaboratively to develop a departmental rubric for evaluating SLO assessment topics. The rubric method of evaluation will be implemented in the Spring of 2015. All instructors teaching a section of a DVC Drama course will utilize a common rubric when collecting SLO topic data, to ensure departmental SLO cohesion.

The individual instructors will be asked to fill out the rubric for each student, in the section to be assessed, and at the semesterâ€™s end, turn the data into the departmentâ€™s SLO liaison for collection and insertion of data.

Plan for topic "Students completing DRAMA-202 will be able to display professional-level stage etiquette and work ethic."*: 2012/13

The Drama dept. faculty will work collaboratively to develop a departmental rubric for evaluating SLO assessment topics. The rubric method of evaluation will be implemented in the Spring of 2015. All instructors teaching a section of a DVC Drama course will utilize a common rubric when collecting SLO topic data, to ensure departmental SLO cohesion.

### 519. Stage Production [DRAMA-270] belonging to Performing Arts [DRAMA]

**Plan for topic "Students completing DRAMA-270 will be able to actively engage in a proper theatrical production process, in its entirety, from the initial audition or interview."**: 2018/19

The Department is satisfied with the results and will develop a different learning outcome topic for the next time this course is assessed. Particular attention will be paid to how the potential data from assessing this course might further support our PLOs.

**Plan for topic "Students completing DRAMA-270 will be able to display a professional attitude when working collaboratively with designers, actors, managers and fellow 270 students."**: 2014/15

TBD. Considering the 100% assessment, new topics will be explored.

**Plan for topic "Apply theatrical skills in a stage production and examine their effectiveness."**: 2013/14

Drama 270 assessment results for 2013-14 indicate that there is no instructional modification required as 44 of 45 assessed students met the topic requirements. New assessment topic(s) will be created and evaluated during the next cycle, as the students met the standards as stated.

**Plan for topic "Discover the discipline, ethics and collaboration necessary in an atmosphere of communal responsibility."**: 2013/14

Drama 270 assessment results for 2013-14 indicate that there is no instructional modification required as 45 of 45 assessed students met the topic requirements. New assessment topic(s) will be created and evaluated during the next cycle, as the students met the standards as stated.

**Plan for topic "Identify proper theatrical production process to audition/interview to close of show."**: 2012/13

Full Time Drama Area Faculty will address action plan during August planning meeting; based on student success, in current SLO, no change in action appears needed at this time. However, all students meeting the standard is the DVC Drama goal. Changes in action plan will be made, pending faculty cohort and agreement.

523. Independent Study [DRAMA-298] belonging to Performing Arts [DRAMA]

Plan for topic "Students completing DRAMA-298 will be able to Produce a product for final evaluation at the conclusion of the agreed upon project.": 2016/17

The faculty will strongly suggest that students develop and engage in independent projects to enhance a specific theatrical field of study.

The students will be made aware that the opportunity exists. We have discovered, through consultation with students, that many are unaware of the courses’ existence.

Plan for topic "Students completing DRAMA-298 will be able to Integrate their career goals and academic studies.": 2013/14

Unable To Assess- No Drama Enrollment in 298 (independent study) during the 2014-15 academic year. DVC Drama will attempt to assess the SLO Topics and their effectiveness/measurable success, during the next assessment cycle, pending student enrollment.

Plan for topic "Students completing DRAMA-298 will be able to Demonstrate accountability in meeting project deadlines.": 2013/14

Unable To Assess- No Drama Enrollment in 298 (independent study) during the 2014-15 academic year. DVC Drama will attempt to assess the SLO Topics and their effectiveness/measurable success, during the next assessment cycle, pending student enrollment.
In order to display proper class-specific technique, Drama-299 students need to have taken the class that they intend to assist with. Developing a departmental protocol would best serve the students enrolled in 299 and the students enrolled in the sections for which they are assisting.

Action will continue; The 299 objectives being established by the faculty of record is meeting the needs of the student, teaching/lab assistants. The 1:1 allows the student to identify and establish, in agreement with the faculty designee, duties specific to their individual skill set and academic goals.

Plan for topic "Students completing this course will be able to assess various types of media for developmental appropriateness": 2018/19

The last time this course was offered (fall, 2017) it was a 150 series course and "in process" with the curriculum committee to be approved as a permanent course (series 100). Therefore, it was not in the webslo's system to be assessed. This new course, ECE 101, will be assessed when it is offered.

Plan for topic "Students completing this course will be able to examine how popular media impacts the development of young children."": 2018/19

This proved an effective way of imparting information about the impact of media on children's development. A meaningful face-to-face class discussion followed the assignment due date and added to the learning process. It is recommended this assignment be used in future course offerings with the added action plan. Action Plan: Expand the assignment to include two or more web sites to broaden out students' perspective and comparative analysis of media usage.

Plan for topic "Students completing this course will be able to assess various types of media for developmental appropriateness": 2017/18

The last time this course was offered (fall 2017) it was a 150 series course and "in process" with the curriculum committee to be approved as a permanent course (series 100). Therefore,
### 527. Childhood and Nature [ECE-102] belonging to Early Childhood Education [ECE]

<tbody>
<tr>
<td>The professor felt the written assignment was a wonderful learning tool. Many students reportedly went up-and-beyond the basic requirements for the final exam.</td>
</tr>
<tr>
<td>The plan is to repeat the same SLO assessment for the next assessment cycle with an addition of a 5 minute presentation in order for students to share their learning with their fellow classmates.</td>
</tr>
<tr>
<td>This SLO assessment supports PLO’s addressing curriculum planning; working with young children; and knowledge in a specialize area.</td>
</tr>
</tbody>
</table>
DVC Instructional Course SLO Action Plans

528. Brain Development in Childhood [ECE-103] belonging to Early Childhood Education [ECE]
Plan for topic "Students completing this course will be able to identify factors that impact brain development in young children."

The professor plans to use this assignment again when teaching ECE-103. She plans to have the students complete the assignment in class, thereby ensuring a greater rate of completion. The feedback received from students suggests that the assignment was effective in bringing awareness of parenting practices that encourage or discourage problem solving and communication with young children. An additional plan is to give students a chance to practice techniques they learned through this assignment. This SLO course assessment supports the PLO’s for the ECE degrees and certificates. The professor plans to assess this SLO again during the next assessment cycle.
The plan:

Although this take home assignment was an effective teaching tool, the professor plans to use it next time as an in-class writing assignment. That way all students will complete it and be involved in a reflective discussion. In addition, the professor plans to have students reflect on their own childhood cultural upbringing as an antecedent to how they interact with children. Assess the same SLO during the next assessment cycle.
<table>
<thead>
<tr>
<th>Plan for topic &quot;Students completing this course will be able to describe the nature of emotional intelligence&quot;: 2018/19</th>
</tr>
</thead>
<tbody>
<tr>
<td>The last time this course was offered (fall 2017) it was a 150 series course and &quot;in process&quot; with the curriculum committee to be approved as a permanent course (series 100). </thead>
<tbody>
<tr>
<td>During fall 2017 this course was an experimental course -ECE 150 - After curriculum approval is now identified as ECE-100 and will be assessed the next time it is offered.</td>
</tr>
</tbody>
</table>
The professor felt this SLO assessment was an effective way to evaluate students on their knowledge of addressing challenging behaviors in a positive and systematic way. The plan is to repeat this assessment tool during the next assessment cycle with additional time for small group discussion prior to the due date. This SLO addresses ECE PLO™s for child development and techniques for working with young children.
DVC Instructional Course SLO Action Plans

Observational practice was valuable for understanding developmental concepts.

In the future, the action plan is to expand the assignment to have students describe how they use their understanding of cognitive development to enhance their teaching practice with infants and toddlers.

This assessment supports the department’s PLO’s by addressing current developmental knowledge and application of best practices with curriculum development.

These results were discussed with the ECE faculty at a department meeting on Oct 31, 2019.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to identify the factors that influence, and shape, healthy physical development in young children." : 2018/19

This assignment was helpful to enhancing awareness, and understanding, of the concept of containerized kids.

Action Plan:

In order to increase completion of this assignment the instructor plans to revise it and expand it into an in-class assignment. Small group discussions will also be included the next time this topic if offered.
### DVC Instructional Course SLO Action Plans

#### 535. Play and the Developing Child [ECE-113] belonging to Early Childhood Education [ECE]

Plan for topic "Students completing this course will be able to discuss major theoretical formulations concerning the nature and function of play."

<table>
<thead>
<tr>
<th>Outcome Assessment History</th>
</tr>
</thead>
<tbody>
<tr>
<td>The assignment broadened student’s knowledge about the nature and function of play. The plan is to repeat this assignment next SLO assessment cycle but with the addition of a requirement for students to restate the chosen theories in their own words. This is to increase student understanding of important concepts. This course SLO addresses Program PLO’s pertaining to child development in the social/emotional and motor domains.</td>

DVC Instructional Course SLO Action Plans

Plan for topic "Students completing this course will be able to describe Chess and Thomasâ€™s theory of temperament and its effect on personality development.": 2018/19

Students provided positive feedback about this assignment therefore the plan to use this assignment again when teaching ECE 144. In addition, the plan to make it an in-class assignment in order to strengthen the completion rate.

In the future, the professor plans to approach students who have not completed the assignment with the option to turn it in late for a reduced score. This is to encourage follow-through on completing work with appropriate consequences. This SLO will be assessed again during the next assessment cycle. This SLO course assessment addresses PLOs for programs and certificates.
DVC Instructional Course SLO Action Plans

537. Introduction to Curriculum in Early Childhood Education [ECE-123] belonging to Early Childhood Education [ECE]

Plan for topic "Students completing this course will be able to design curriculum that is integrated across different developmental domains and content areas.": 2018/19

Although course material was discussed in class, and students were given a Developmentally Appropriate Practice Sheet to work with, some struggled with appropriate infant/toddler developmental expectations. Students expected this age group to do more than they are able. The plan is to add an observation of an infant/toddler classroom to their assignment the next time this course is offered. This observation should precede the final curriculum project in order to allow for discussion of infant/toddler development.

Plan for topic "Students completing this course will be able to identify and apply developmentally appropriate principles and teaching strategies for curriculum development for young children.": 2016/17

Both classes benefited from access to the DVC Developmental Lab school to complete this assignment.

Opportunities to practice this skill set over the course of the semester demonstrated positive results.

Providing group experiences in the lab school for students to practice writing developmental objectives, in a variety of curriculum areas, supported the comprehension of this concept. Therefore, the plan is to assess a different SLO next time.

Plan for topic "Students completing the course will be able to identify developmentally appropriate activities for infants, toddlers and preschool age children.": 2013/14

The two instructors met and discussed their course SLO and results. Both felt their assignments and assessments were effect instruments to support student learning and the integration of course material. Both instructors currently plan to use these assignments in the near future and to continue to collaborate on methodologies for this course.

Plan for topic "Students completing the course will be able to create an age appropriate activity plan for preschool age children.": 2013/14

The one instructor who finished the SLO assessment feels that the curriculum project brings together the various concepts introduced throughout the semester. This project is a culminating experience for the student. Their learning is also demonstrated by obvious pride and self fulfillment exhibited. The remaining results (for the other instructor) will be
Plan for topic "Students completing the course will be able to create a developmentally appropriate activity plan for preschool age children.": 2013/14

The one instructor who finished the SLO assessment feels that the curriculum project brings together the various concepts introduced throughout the semester. This project is a culminating experience for the student. Their learning is also demonstrated by obvious pride and self fulfillment exhibited. The remaining results (for the other instructor) will be entered after they are given to the SLO rep. What was positive was that the instructors are collaborating and adjusting various assignments as needed to support student learning and success.

Plan for topic "Students completing the course will be able to identify developmentally appropriate activities for infants, toddlers and preschool age children.": 2011/12

This is a new class and the first time it was offered. There is a wide range of experience with children among the students in this class. Attention to modeling activities appears to be necessary and helpful. This will be taken into account next semester when offering the same assignment.

Plan for topic "Students completing the course will be able to create an age appropriate activity plan for preschool age children.": 2011/12

As previously mentioned for SLO #1 this is a new class with a wide range of student experiences working with children. Modeling and demonstrating the process for directed activities appears very beneficial for learning success. This will be taken into account next semester.

Plan for topic "Students completing the course will be able to create a developmentally appropriate activity plan for preschool age children.": 2011/12

As previously mentioned for SLO #1 this is a new class with a wide range of student experiences working with children. Modeling and demonstrating the process for directed activities appears very beneficial for learning success. This will be taken into account next semester.
The department reviewed and discussed the outcomes of the last SLO assessment for this course (fall, 2014). Since positive outcomes were found for SLO#1 and SLO#2 it was decided to assess a more specific aspect of the previous SLO (#3) and examine socializing agents that impact children and families.

THE FINDINGS: As the data analysis shows the SLO #3 on socializing agents was met. The department discussed the two questions most frequently missed and came up with the following plan.

THE PLAN:

The department plans to have instructors make sure to differentiate between cultural and societal influences on behavior and development. In addition, a few questions on the assessment tool will be rewritten to support ESL/ESS student's comprehension. Currently the department plans to use the same assessment instrument during the next assessment cycle. This SLO assessment supports Program SLO’s for the ECE A.S. and ECE Transfer degrees. This was discussed at the department meeting on 3/7/2018.

Plan for topic "Students completing the course will be able to identify major developmental milestones for children from conception through adolescence.": 2014/15

Currently faculty like this assessment of learning. However, the department will continue to discuss and explore ways to increase learning of the developmental domains.

Plan for topic "Students completing the course will be able to identify major developmental milestones for children, both typical and atypical, from conception through adolescence.": 2014/15

Currently faculty like this assessment of learning. However, the department will continue to discuss and explore ways to increase learning of the developmental domains.

Plan for topic "Students completing the course will be able to identify major developmental milestones for typical and atypical children.": 2014/15

Currently faculty like this assessment of learning. However, the department will continue to discuss and explore ways to increase learning of the developmental domains.

Plan for topic "Students completing ECE-124 will be able to categorize the three primary developmental domains.": 2014/15

Currently faculty like this assessment of learning. However, the department will continue to discuss and explore ways to increase learning of the developmental domains.

Plan for topic "Students completing the course will be able to...analyze the psychological, physical and cognitive influences on human
This section was also felt to be effective in assessing this SLO. The department will continue to discuss how to increase student distinctions of development.

**Plan for topic "Students completing ECE-124 will be able to distinguish determinates of behavior."**: 2014/15

This section was also felt to be effective in assessing this SLO. The department will continue to discuss how to increase student distinctions of development.

**Plan for topic "Students completing the course will be able to recognize the role of culture and social institutions in the development of children."**: 2014/15

The department felt that this is a weaker part of the assessment and needs to be revised. The department felt that the SLO needs to represent more relevant course material than what is currently assessed. This will be discussed and revised before the next assessment.

**Plan for topic "Students completing ECE-124 will be able to choose the best influence on child development from a variety of factors."**: 2014/15

The department felt that this is a weaker part of the assessment and needs to be revised. The department felt that the SLO needs to represent more relevant course material than what is currently assessed. This will be discussed and revised before the next assessment.

**Plan for topic "Students completing ECE-124 will be able to categorize the three primary developmental domains."**: 2012/13

Students demonstrated an ability to identify the developmental domains. The department dialogued about this particular course and the positive impact child observations have on student learning. The present plan is to continue to use the multiple choice exam to assess this course but to dialogue more about the structure of the child observation assignments and the use of the DVC Developmental Children's Lab.

**Plan for topic "Students completing the course will be able to identify major developmental milestones for typical and atypical children."**: 2012/13

Plan for topic "Students completing the course will be able to recognize the role of culture and social institutions in the development of children.": 2010/11

continue to use assessment tool. Consider reviewing content with students in order to increase retention of material.

Plan for topic "Students completing ECE-124 will be able to categorize the three primary developmental domains." : 2007/8

2010-02-26: Fall, 2007

Currently no modifications on this assessment instrument are planned.

2010-05-05: Spring, 2008

Faculty felt that the question #18 implied that there was only one right answer, when in fact there were two. Therefore, the wording on the instrument was changed to support multiple responses.

For question #11 the faculty discussed the phrasing of the question and made a slight adjustment in the wording to make the question more specific.

The SLO process has encouraged faculty discussion about classroom instruction and has supported a more uniformed classroom use of ECE language used in the field.

Plan for topic "Students completing the course will be able to identify major developmental milestones for children from conception through adolescence." : 2007/8

Plan for topic "Students completing this course will be able to distinguish the role of the teacher and environment as components in high quality centers": 2018/19

Overall high pass rate.

Past SLO assessment reported student struggled with understanding curriculum approaches and application. These areas appear improved. Current students struggled with understanding individualized Ed plans; interest centers; steps of emergent curriculum & scaffolding. ESL students continue to pass at a lower rate.

The Plan: In addition to emphasizing the above topics, more examples will be given in class on educational models for teaching Special Rights children. Also, the assessment tool will be rewritten to use clearer vocabulary to reduce confusion for ESL and all students.

Plan for topic "Students completing this course will be able to distinguish the role of the teacher and environment as components in high quality centers": 2016/17

Most students met the SLO criteria. Differences in success were related to confusion between differentiating curriculum approaches and the process by which all curriculum should be administered through developmentally appropriate practices. In addition, the ESL students had more difficulty with the ECE vocabulary in the questions.

The Plan:

The specific text used at DVC and SRC does not do an adequate presentation of these separate concepts. In the future the instructors will supplement the text with other materials and direct instruction to bridge the gap in the understanding of the two concepts, curriculum approaches and methodology. In addition, more time will be spent on reviewing terms used in the ECE field.

Plan for topic "Students completing ECE-125 will be able to Students will have an awareness of some of the historical figures and or theories of early childhood education": 2013/14

Instructors reported various responses to their assessment instruments. While they both liked their assessment one instructor wants to broaden the awareness of historical figures while the other instructor believes that deeper learning might occur if the assignment is given later in the semester.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing ECE-125 will be able to Assess and recognize what are some of the different program types and components of high quality learning environments.": 2013/14

Each instructor would use parts of their current assessment instrument but they both would make modifications with their assessments in the future to increase learning between theory to practice.

Plan for topic "Students completing ECE-125 will be able to identify what are developmentally, culturally, and linguistically appropriate practices.": 2013/14

Both instructors plan to modify the assignments they used. In addition, one instructor stated that he would emphasis specific developmentally appropriate practices and how they relate to the topics in question.

Plan for topic "Students completing the course will be able to analyze child development through study and observation.".: 2011/12

The number of students failed the meet the threshold for indicators of environment. ECE-125 has been revamped to meet the California Curriculum Alignment Project, as such in this semesters form the class was a hybrid of the previous observation course and the current curriculum course of which the current SLO's are based. The new observation course ECE-249, will not begin until the fall of 2012 necessitating this blended course. The new ECE-125 should be reassessed in the Fall 2012 to see if it is matched the desired outcomes.

Plan for topic "Students completing the course will be able to assess early childhood environments, curriculum and teaching strategies for indicators of development": 2011/12

<th>Plan for topic &quot;Students completing the course will be able to identify the underlying theoretical perspectives in forming a professional philosophy.&quot;: 2009/10</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Use of results. Both classes passed the assessment instruments goal. b) Impact on learning. There are variations between the classes. Due to the instructors retirement it is difficult to analyze the results full without the instructor's reflections. Plan is to assess again in the spring and have the department discuss the results in Fall, 2010. However, due to the fact that students primarily met expectations there is evidence that current teaching practices and assignments are successful in this course. Students benefit from observations conducted in the DVC lab school and through DVD's purchased for observation practice and education.</td>

### 540. Health, Safety, and Nutrition for the Young Child [ECE-126] belonging to Early Childhood Education [ECE]

**Plan for topic "Students completing the course will be able to design a safety checklist for an outside playground area.": 2019/20**

Review of previous assessment was done and implementation of the online videos was employed. Though success rate was lower for the online sections, most individual students demonstrated mastery. It was determined that failure to meet the SLO was related to ESL instruction issues and lack of quality play area online videos. This feedback will be shared with faculty who teach ECE 126 when SLOâ€™s are discussed at c-contract meeting.

The Plan: The current plan is to move onto a difference SLO next assessment cycle due to overall high mastery rates.

**Plan for topic "Students completing the course will be able to design a safety checklist for an outside playground area.": 2016/17**

As a result of this SLO assessment, the following plan will be implemented:

Playground videos will be provided to the online students in order for them to utilize their self-developed checklist. This should improve student success rates for the online course relative to the face-to-face course. Since many students take the online courses to be free from classroom activities online videos will eliminate the need to interface with play environments outside of the computer in order to complete the assignment. With the availability of virtual playgrounds all students who have limited access to playgrounds due to work schedule or location, can be similarly successful. Following future assessments this will be verified or discounted.

The DVC Developmental Childrenâ€™s Lab school continues to vital learning environment for students enrolled in ECE 126.

This information was discussed with the department 2/23/17. SLO data was shared at the c-contract / advisory meeting 1/19/17.

**Plan for topic "Students completing the course will be able to evaluate strategies to maximize the health, safety and nutrition of children in early childhood education programs.": 2013/14**

One instructor liked the questions the other instructor might not use them. The instructor who might change the assessment criteria stated that she would use a small group activity employing the text book to answer questions. The SLO representative will have faculty continue to dialog about SLO’s at the c-contract meeting in fall, 2014.

**Plan for topic "Students completing the course will be able to design a safety checklist for an outside playground area.": 2013/14**

Currently both instructors report that students like the assignment and that it is working well. The plan is to continue to collaborate and discuss classroom assignments. This assignment will be used next semester.

**Plan for topic "Students completing the course will be able to compare the nutritional needs of children at various ages.": 2013/14**
DVC Instructional Course SLO Action Plans

Instructors met and discussed the results. The instructors both agreed that students should be challenged more during their presentations to talk about the nutritional significance of their recipe. The SLO representative will have faculty continue to dialog about SLO's at the c-contract meeting in fall, 2014.

Plan for topic "Students completing the course will be able to evaluate strategies to maximize the health, safety and nutrition of children in early childhood education programs.": 2011/12

The two instructors teaching ECE 126 have collaborated around the SLO's and course material. The current plan is to keep the assessments used this semester.

Plan for topic "Students completing the course will be able to design a safety checklist for an outside playground area.": 2011/12

This was a thorough and effect assignment.

Plan for topic "Students completing the course will be able to compare the nutritional needs of children at various ages.": 2011/12

Planning this course and how to assess the SLO's generated discussion among the faculty teaching it. Current plan is to continue to use this assignment.

Plan for topic "Students completing the course will be able to compare and contrast factors necessary for quality childcare programs.": 2011/12

Continue to dialogue about assignments which support student learning.

Plan for topic "Students completing the course will be able to evaluate strategies to maximize the health, safety and nutrition of children in early childhood education programs.": 2008/9

To increase achievement it was decided to add case studies to the curriculum.

Plan for topic "Students completing the course will be able to design a safety checklist for an outside playground area.": 2008/9

Since the topic now includes appropriate emergency response, an Emergency Services Coordinator has been invited to speak to the class.

Plan for topic "Students completing the course will be able to compare the nutritional needs of children at various ages.": 2008/9

No changes needed at this time.

Plan for topic "Students completing the course will be able to compare and contrast factors necessary for quality childcare programs.": 2008/9

Achievement results have been linked to poor writing skills. The syllabus now includes directions for writing an organized and well-developed paper.
### Plan for topic "Students completing this course will be able to create planning webs for an activity": 2017/18

Review of the former SLO assessment was done. The professor did follow through with developing a handout specifying and comparing various theorists and approaches in the ECE field. This has been found very beneficial and supportive of student understanding and learning. For this assessment cycle, was decided to focus more specifically on planning webs. The professor created a new grading rubric to be used with the current assessment.

After the current assessment was completed the professor feels strongly that the web assignment is valuable and that the new grading rubric was helpful for evaluating mastery of the SLO.

The Plan:

In future classes, the professor plans to give out the rubric at the beginning of the assignment to increase understanding and learning. At the next assessment cycle the professor will assess a different SLO.

Reviewed with the ECE department on Dec 12, 2017

This SLO also address the AS Degree SLO #10

### Plan for topic "Students completing the course will be able to analyze educational philosophy.": 2014/15

This is a helpful assignment for engaging students in the course material. Since students use preschool sites in the community to gather information in order to present their projects in class the plan is to continue to expand on the available locations in order to broaden the student’s understanding of different curriculum approaches. This information has been updated by J. Mason per conversation with D. Hill during Sept, 2015

### Plan for topic "Students completing the course will be able to create a developmentally appropriate integrated curriculum.": 2014/15

This is a helpful assignment for engaging students in the course material. Since students use preschool sites in the community to gather information in order to present their projects in class the plan is to continue to expand on the available locations in order to broaden the student’s understanding of different curriculum approaches. This information has been updated by J. Mason per conversation with D. Hill during Sept, 2015

### Plan for topic "Students completing the course will be able to explain the key concepts in the Reggio Emilia Approach/Emergent Curriculum or Project Approach using the tenets of Lev Vygotsky’s Constructivism Theory.": 2014/15

This is a helpful assignment for engaging students in the course material. Since students use preschool sites in the community to gather information in order to present their projects in class the plan is to continue to expand on the available locations in order to broaden the student’s understanding of different curriculum approaches. This information has been updated by J. Mason per conversation with D. Hill during Sept, 2015
DVC Instructional Course SLO Action Plans

This is a helpful assignment for engaging students in the course material. Since students use preschool sites in the community to gather information in order to present their projects in class the plan is to continue to expand on the available locations in order to broaden the student’s understanding of different curriculum approaches. This information has been updated by J. Mason per conversation with D. Hill during Sept, 2015

**Plan for topic "Students completing the course will be able to describe trends in theories of Early Childhood Education."**: 2014/15

Of the 28 students who took the mid-term, 25 of them earned a “C” or better. However, it was felt that in the future increasing the time devoted to comparisons between theories would lead to a greater depth of student understanding. For example how a specific theoretical concept might be represented differently in a Project Approach vs. Montessori.

This information has been updated by J. Mason per conversation with D. Hill during Sept, 2015

Plan for topic "Students completing the course will be able to create a developmentally appropriate integrated curriculum."**: 2011/12

This exam was adequate for accessing the students’ learning outcome #1. In the future I would like to review whether the exam or an assignment would function better for this class.

Plan for topic "Students completing the course will be able to explain the key concepts in the Reggio Emilia Approach/Emergent Curriculum or Project Approach using the tenets of Lev Vygotsky’s Constructivism Theory."**: 2011/12

This exam was adequate for accessing the students’ learning outcome #1. In the future I would like to review whether the exam or an assignment would function better for this class.

Plan for topic "Students completing the course will be able to analyze educational philosophy."**: 2011/12

This exam was adequate for accessing the students’ learning outcome #1. In the future I would like to review whether the exam or an assignment would function better for this class.

Plan for topic "Students completing the course will be able to compare and contrast philosophical approaches, such as Montessori, High Scope, and Reggio Emilia": 2011/12

In the future I amy want to use a class assignment rather than the quiz.

Plan for topic "Students completing the course will be able to compare and contrast philosophical approaches, such as Montessori, High Scope, and Reggio Emilia": 2011/12

In the future I amy want to use a class assignment rather than the quiz.

Plan for topic "Students completing the course will be able to describe trends in theories of Early Childhood Education."**: 2011/12

May review whether I want to use this exam or use a class assignment for the course.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to explain the key concepts in the Reggio Emilia Approach/Emergent Curriculum or Project Approach using the tenets of Lev Vygotsky’s Constructivism Theory.": 2010/11
Continue assessment of this SLO.

Plan for topic "Students completing the course will be able to create a developmentally appropriate integrated curriculum.": 2010/11
Continue assessment of this SLO.

Plan for topic "Students completing the course will be able to analyze educational philosophy.": 2010/11
Continue assessment of this SLO.

Plan for topic "Students completing the course will be able to compare and contrast philosophical approaches, such as Montessori, High Scope, and Reggio Emilia": 2010/11
Continue assessment of this SLO.

Plan for topic "Students completing the course will be able to compare and contrast philosophical approaches, such as Montessori, High Scope, and Reggio Emilia.": 2010/11
Continue assessment of this SLO.

Plan for topic "Students completing the course will be able to describe trends in theories of Early Childhood Education.": 2010/11
Continue assessment of this SLO

Plan for topic "Students completing the course will be able to analyze educational philosophy.": 2008/9
I will continue to use the summary sheet for the educational philosophies. This sheet was used for the first time this semester.
Same action plan.

Plan for topic "Students completing the course will be able to create a developmentally appropriate integrated curriculum.": 2008/9
I will continue to use the summary sheet for the educational philosophies. This sheet was used for the first time this semester.
Same action plan.

Plan for topic "Students completing the course will be able to explain the key concepts in the Reggio Emilia Approach/Emergent Curriculum or Project Approach using the tenets of Lev Vygotsky’s Constructivism Theory.": 2008/9
I will continue to use the summary sheet for the educational philosophies. This sheet was used for the first time this semester.
Same action plan.

Plan for topic "Students completing the course will be able to compare and contrast philosophical approaches, such as Montessori, High Scope, and Reggio Emilia.": 2008/9
I will be rewriting Question #2 on the SLO quiz. This will be administered in the Fall 2009 to both sections of this course (ECE 128).
DVC Instructional Course SLO Action Plans

Rather than rewrite the question, I reviewed the material more extensively during the second cycle. Students achieved a 96% success rate on this question.

Plan for topic "Students completing the course will be able to compare and contrast philosophical approaches, such as Montessori, High Scope, and Reggia Emilia": 2008/9

I will be rewriting Question #2 on the SLO quiz. This will be administered in the Fall 2009 to both sections of this course (ECE 128).

Plan for topic "Students completing the course will be able to describe trends in theories of Early Childhood Education.": 2008/9

I will be rewriting Question #7 on the SLO quiz. This will be administered in the Fall 2009 to both sections of this course (ECE 128).
542. Strategies for Working with Challenging Behaviors [ECE-129] belonging to Early Childhood Education [ECE]

Plan for topic "Students completing the course will be able to develop intervention strategies for children's specific difficult/aggressive behavior." 2018/19

The professor finds this assignment to be a valuable learning tool and plans to use it in the future.

The future plan, is as follows:

Make sure students have hardcopies of the behavior charts that assist with mapping out the function and evaluation of behaviors. They need them during the assignment as a reference. Next, continue with the small group discussion during this assignment to enhance peer-to-peer learning.

Lastly, the plan for the next assessment is to move onto a different SLO.

Plan for topic "Students completing ECE-129 will be able to formulate intervention strategies for children's specific difficult/aggressive behavior": 2018/19

The professor finds this assignment to be a valuable learning tool and plans to use it in the future.

The future plan, is as follows:

Make sure students have hardcopies of the behavior charts that assist with mapping out the function and evaluation of behaviors. They need them during the assignment as a reference. Next, continue with the small group discussion during this assignment to enhance peer-to-peer learning.

Lastly, the plan for the next assessment is to move onto a different SLO.

Plan for topic "Students completing the course will be able to analyze possible reasons for children's difficult and aggressive behavior." 2017/18

Previous assessment/action plan (2014/15) was reviewed.

This semester the professor did address considerations for local community resources, as noted in the previous action plan.
Current Plan: The professor feels confident that course work and discussions effectively support student learning on this SLO. Future plan is to assess a different SLO. These findings were discussed with the ECE department on November 29, 2017.

Plan for topic "Students completing the course will be able to analyze possible reasons for children's difficult and aggressive behavior.": 2014/15
Plan: The instructor feels the written assignment was an appropriate evaluative process. As a result of students written work, the instructor plans to continue the assignment with expanded considerations for local community resources available to support/aide the protective process.

Plan for topic "Students completing the course will be able to develop curriculum activities to provide prevention strategies for difficult and aggressive behavior.": 2014/15
Plan: The instructor feels the exam is an appropriate evaluative process. However, as result of student's answers, and reflective comments provided through oral discussion and in class reflective writings, the instructor plans to explore various behavior management systems available for purchase to evaluate and compare the theoretical foundations on which each system is derived.

Plan for topic "Students completing ECE-129 will be able to design a curriculum component that incorporates prevention strategies for children's difficult and aggressive behavior": 2014/15
Plan: The instructor feels the exam is an appropriate evaluative process. However, as result of student's answers, and reflective comments provided through oral discussion and in class reflective writings, the instructor plans to explore various behavior management systems available for purchase to evaluate and compare the theoretical foundations on which each system is derived.

Plan for topic "Students completing the course will be able to develop intervention strategies for children's specific difficult/aggressive behavior": 2014/15
Plan: The assignment is considered effective in evaluating student learning for the slo. In the future it may be more beneficial to require more practice with targeted behavior charting.

Plan for topic "Students completing ECE-129 will be able to formulate intervention strategies for children's specific difficult/aggressive behavior": 2014/15
Plan: The assignment is considered effective in evaluating student learning for the slo. In the future it may be more beneficial to require more practice with targeted behavior charting.

Plan for topic "Students completing the course will be able to analyze possible reasons for children's difficult and aggressive behavior."; 2012/13
The instructor feels that the exam is an appropriate evaluative process. As a result of student's answers, the instructor plans to delve deeper into how culture influences behavior patterns along with providing more support strategies for handling challenging behaviors.

### Plan for topic "Students completing the course will be able to develop curriculum activities to provide prevention strategies for difficult and aggressive behavior." 2012/13

The short answer exam was helpful in exploring student learning with this SLO. After scoring the exams, the instructor has decided (for future classes) to go deeper into how relationships play a key role in successful prevention strategies for difficult classroom behaviors.

### Plan for topic "Students completing ECE-129 will be able to design a curriculum component that incorporates prevention strategies for children's difficult and aggressive behavior" 2012/13

The short answer exam was helpful in exploring student learning with this SLO. After scoring the exams, the instructor has decided (for future classes) to go deeper into how relationships play a key role in successful prevention strategies for difficult classroom behaviors.

### Plan for topic "Students completing the course will be able to analyze possible reasons for children's difficult and aggressive behavior." 2010/11

Assignment is consider effective in evaluating student learning for this outcome. However in the future it may be more effective to break the assignment into smaller components to increase depth of learning.

### Plan for topic "Students completing the course will be able to develop curriculum activities to provide prevention strategies for difficult and aggressive behavior." 2010/11

The assignment is considered effective in evaluating student learning for this SLO. However, in the future it may be more effective to break the assignment into smaller components to increase the depth of student learning.

### Plan for topic "Students completing ECE-129 will be able to design a curriculum component that incorporates prevention strategies for children's difficult and aggressive behavior" 2010/11

The assignment is considered effective in evaluating student learning for this SLO. However, in the future it may be more effective to break the assignment into smaller components to increase the depth of student learning.

### Plan for topic "Students completing the course will be able to develop intervention strategies for children's specific difficult/aggressive behavior." 2010/11

The assignment met the criterion for the SLO. The instructor feels that the assignment is a good measure of student learning. However, it was commented to break down the assignment into smaller components in the future to increase depth of content understanding.

### Plan for topic "Students completing ECE-129 will be able to formulate intervention strategies for children's specific difficult/aggressive behavior" 2010/11

The assignment met the criterion for the SLO. The instructor feels that the assignment is a good measure of student learning. However, it was commented to break down the assignment into smaller components in the future to increase depth of content understanding.
The assignment met the criterion for the SLO. The instructor feels that the assignment is a good measure of student learning. However, it was commented to break down the assignment into smaller components in the future to increase depth of content understanding.
543. Child, Family, and Community [ECE-130] belonging to Early Childhood Education [ECE]

Plan for topic "Students completing this course will be able to demonstrate familiarity with community agencies and sensitivity towards communicating with families around sensitive issues.": 2017/18

The professors reviewed the previous assessment and decided to continue to assess knowledge of community resources with the added dimensions of examining professional sensitivity and confidentiality when communicating with families. This in-class assessment was a valuable tool for examining lecture and small group learning. Similar worksheets will continue to be utilized in the course.

The plan: In addition to above, the plan is to assess a different SLO next assessment cycle. This assessment supports the ECE program SLO's regarding socializing agents impacting the lives of children and families. These results were reviewed with the department.

Plan for topic "Students completing the course will be able to analyze different community resources and their appropriateness to meet the needs of contemporary families.": 2015/16

This assignment is extremely helpful in educating students about the breadth of community resources available and how to access services. It will be continued to be used in future courses. Since the success rate was very high, it was decided that the next time this course is assessed the plan is to assess a different SLO (maybe one focusing on cultural factors that influence childcare practices).

Plan for topic "Students completing the course will be able to differentiate strategies that support and empower families.": 2015/16

This assignment is extremely helpful in educating students about the breadth of community resources available and how to access services. It will be continued to be used in future courses. Since the success rate was very high, it was decided that the next time this course is assessed the plan is to assess a different SLO (maybe one focusing on cultural factors that influence childcare practices).

Plan for topic "Students completing the course will be able to select the appropriate community resource for various child and family needs.": 2015/16

This assignment is extremely helpful in educating students about the breadth of community resources available and how to access services. It will be continued to be used in future courses. Since the success rate was very high, it was decided that the next time this course is assessed the plan is to assess a different SLO (maybe one focusing on cultural factors that influence childcare practices).

Plan for topic "Students completing the course will be able to analyze theories of socialization that address the interrelationship of child, family and community.": 2012/13

The current plan is to continue to use a multiple choice exam for assessing SLO's in this course. Instructors are exploring text book options to enhance learning and to bring in a fresh approach to the text portion of the course.

</tbody>
</table>
Two topics were identified as needing more classroom instruction. These included: 1) The need for the teacher to attend to the child before addressing other concerns.

2) Understanding that by not attending to a bias remark or action, that this actually reinforces the bias.

The action plan for the future is to conduct more role play activities in the classroom to solidify appropriate actions.

Plan for topic "Students completing the course will be able to recognize their own self-biases.": 2016/17

The instructor felt that the course content and discussions are effective in teaching students about self-biases. However, changes in the wording of the final paper will be done to increase depth of answers. During the next assessment cycle a different SLO will be assessed.

This was discussed 2/23/17 in a department meeting.

SLOs were discussed at the c-contract/advisory meeting held 1/19/17.

Continue assessment of the SLO.

#### Plan for topic "Students completing the course will be able to recognize biases in a diverse community.": 2009/10

2010-05-05: Item # 1 has a type error which will be corrected for the next cycle. This was confusing to some students.

Items #4, 6 and 7 were covered in several teaching techniques--readings from chapters, hand-outs and lecture. This will be repeated in the future.

Same process.

2010-05-27: Class taught and SLO administered by a part-time instructor. Data entered by Jmason. Discussion with pt instructor it was determined that the questions answered incorrectly may have been confusing to the students. Students however demonstrated that they benefit from using the DVC Children's Lab for observations on Anti-bias materials and interactions. Plan to assess in Fall, 2010 and revise assessment instrument.

#### Plan for topic "Students completing the course will be able to recognize biases in a diverse community.": 2009/10

2010-05-27: Numbers 2, 5 and 8 were introduced through the use of scenarios and followed by class discussions. These methods seem to be effective and will not be altered.

Repeat process.

2010-12-15: See SLO plan #1 for notation re: instructor. Evidence of results that students are learning the material and benefiting from activities performed in and outside of class including: observations at the DVC Children's Lab. Plan to run assessment in Fall 2010 and revise assessment instrument as seen necessary.

#### Plan for topic "Students completing the course will be able to recognize their own self-biases.": 2009/10

Plan for topic "Students completing the course will be able to critique appropriate levels of infant/toddler cognitive and language development.": 2018/19

The previous SLO assessment recommended additional practice/discussion before administering the assignment. This was completed and contributed to a greater understanding of the material. In addition, small group review was used to enhance peer mentoring. This assignment is found to be helpful in evaluating environments/practices that support appropriate care. It will continue to be administered. The Action Plan: Next time assess a different SLO. Results discussed with department Dec 2019

Plan for topic "Students completing the course will be able to illustrate appropriate levels of cognitive and language development for infants and toddlers." : 2018/19

The previous SLO assessment recommended additional practice/discussion before administering the assignment. This was completed and contributed to a greater understanding of the material. In addition, small group review was used to enhance peer mentoring. This assignment is found to be helpful in evaluating environments/practices that support appropriate care. It will continue to be administered. The Action Plan: Next time assess a different SLO. Results discussed with department Dec 2019

Plan for topic "Students completing ECE 230 will be able to describe appropriate play environments and care routines that support infant and toddler care and learning" : 2018/19

This course has recently been rewritten to align with the CA State Curriculum Alignment project. The assignment used for this SLO reflects course rewrite changes and addresses previous references to re-evaluating assignments that address environments and best practices.

Upon evaluation, the professor has concluded that the assignment is in fact valuable but that students need additional prior practice on critiquing best practices before they are given the assignment.

The Plan: In the future, the professor will include more concrete examples and small group discussion on the topic prior to giving the assignment. This should support the development of critical thinking skills. Additionally, the DVC Developmental Childrenâ€™s Laboratory continues to be a vital support to students by exhibiting environmental best practices.

infant and toddler care and learning": 2013/14

Understanding the importance of infant/toddler environments is critical for healthy development. The DVC Children's Developmental Lab is used to help students with this process. This assignment is valuable for student learning. Plan is to rewrite this course during Fall 2013 to align with the State Curriculum Project. This rewrite will assist students access to courses across California. Applications of the environment assignment will be adjusted if necessary to fit the new course requirements.

Plan for topic "Students completing the course will be able to differentiate their basic understanding of infant/toddler attachment behaviors and theory."": 2013/14

Plan is to rewrite this course during Fall 2013 to align with the State Curriculum Project. The application of licensing regulations assignment will be reviewed to adapt to any necessary curriculum changes. Some version of this assignment will continue. Consider assigning a grade to this assignment.

Plan for topic "Students completing the course will be able to assess attachment behaviors observed between infants/toddlers and those with whom they are attached."": 2013/14

Plan is to rewrite this course during Fall 2013 to align with the State Curriculum Project. The application of licensing regulations assignment will be reviewed to adapt to any necessary curriculum changes. Some version of this assignment will continue. Consider assigning a grade to this assignment.

Plan for topic "Students completing ECE-230 will be able to identify infant toddler programming/licensing issues and know how to find answers."": 2013/14

Plan is to rewrite this course during Fall 2013 to align with the State Curriculum Project. The application of licensing regulations assignment will be reviewed to adapt to any necessary curriculum changes. Some version of this assignment will continue. Consider assigning a grade to this assignment.

Plan for topic "Students completing ECE-230 will be able to analyze the developmental stages of physical, cognitive and social and emotional development": 2012/13

One section was offered and assessed fall, 2012. Students enrolled = 40. This is a helpful assignment. It generates discussion and interactions among the students. Students find it beneficial to use the DVC Developmental Children's Center for this assignment. Observation is critical for understanding child development. This assignment will continue to be used. Currently the ECE department is in discussion about observations as a result of the SLO process and course rewrites. The plan is to engage the part-time faculty in a discussion at the c-contract meeting on January 10, 2013 for their input on observation assignments and SLOs.

Plan for topic "Students completing ECE-230 will be able to describe and evaluate an infant toddler environment for its appropriateness": 2012/13

Much time and attention is given to infant/toddler environments. Therefore, students are well prepared to evaluate a caregiving setting. The assignment is detailed and guides the student to look for very specific elements in the classroom. This detail, and preparation, supports their successful learning. Students benefit from being able to use the DVC Developmental Children's Lab for this assignment. The importance of environments has been a topic of the department's discussions recently and the department will continue to explore the best ways to assess environmental SLO's.

### Plan for topic "Students completing this course will be able to differentiate typical development seen across the developmental domains at either 8 months, 18 months, or 36 months."

**2018/19**

Past assessment (2017) was reviewed. Pre-test activity given in class and homework assignment which followed supported student learning through: multiple exposures to course material and the use of CA Framework Developmental Foundations.

**Action Plan:** To assess a different SLO next assessment cycle.

---

### Plan for topic "Students completing this course will be able to identify basic components of infant /toddler physical development."

**2016/17**

All students did a thorough job on the homework assignment which employed the CA State Infant / Toddler Developmental Foundations (an important professional publication in the ECE field). After submitting the homework students share how helpful the exercise was. This was the first administration of this assignment. The Plan in the future is to give the same assignment but including it in a pre/post format in order to evaluate the SLO on a deeper level and to magnify the learning process for the students. This SLO assessment was discussed at the ECE department meeting May 4, 2017.

### Plan for topic "Students completing the course will be able to identify basic components of infant /toddler attachment behaviors."

**2013/14**

This assignment will be reworked for the next class. The instructor liked using an observation for this SLO but the structure of the assignment could be addressed better in the future. This course has recently been rewritten and aligned with other courses in CA.

### Plan for topic "Students completing the course will be able to identify basic components of infant /toddler cognitive/brain development."

**2013/14**

Again, this SLO was successful but the instrument will be rewritten to be more engaging in the future. This course has recently been rewritten and aligned with other courses in CA.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the stages of normal language development in young children."

The ECE 240 course (summer 2018) was cancelled due to unusual circumstances beyond the department's control. Assess the course the next time it is offered.

Plan for topic "Students completing ECE-240 will be able to demonstrate an awareness of the value of books and stories for children and how to select age-appropriate books for children ages 0-6 years."

The ECE 240 course (summer 2018) was cancelled due to unusual circumstances beyond the department's control. Assess the course the next time it is offered.

Plan for topic "Students completing the course will be able to demonstrate knowledge of the stages of normal language development in young children."

This assignment continues to be a good experience in applying the course principles. It requires students to synthesize material covered in several units of the course and demonstrate their understanding in a tangible, relevant way. As part of the assignment, after the session on literature selection, we take a field trip to a local well-known book seller, where students hear the children's book buyer describe how products are considered for marketing as well as how the children's book industry rates and awards outstanding literature. Students have the opportunity to see, firsthand, hundreds of books and to begin their assignment right then with the benefit of a myriad of possible book choices for inclusion in their project. The fieldtrip has proven an outstanding way to generate enthusiasm for the project. The only change would be to redistribute the assignment points, giving more weight to the a?orationale for selection/ clearly described reasonsa?¯ section, since this is where their understanding can truly be articulated and demonstrated.

Plan for topic "Students completing the course will be able to select appropriate science activities for young children.": 2018/19

The assignment worked well to assess the S.L.O. The topic of Developmentally Appropriate Practice covered in both text and class discussion which lead to a successful S.L.O outcome. However, the next semester the class is offered at least two assignments will be given to add clarification of Developmentally Appropriate Practice and therefore reach all students in case of absences.

In addition to the above, the plan for the next assessment cycle would be to assess a different S.L.O.

This assessment supports Program Learning Outcomes (PLOâ€™s) including those found in: ECE A.S. Degree; Teacher certificate and Master Teacher certificate.

Plan for topic "Students completing the course will be able to:

analyze the methods and materials used in developmentally appropriate science and math activities

": 2018/19

The assignment worked well to assess the S.L.O. The topic of Developmentally Appropriate Practice covered in both text and class discussion which lead to a successful S.L.O outcome. However, the next semester the class is offered at least two assignments will be given to add clarification of Developmentally Appropriate Practice and therefore reach all students in case of absences.

In addition to the above, the plan for the next assessment cycle would be to assess a different S.L.O.

Plan for topic "Students completing the course will be able to:

analyze the methods and materials used in developmentally appropriate science and math activities"

" 2016/17

Overall, the written homework assignments are beneficial for helping students analyze the methods and materials used in developmentally appropriate science and math activities. In the future the professor plans to decrease dramatically the number of written homework assignments in exchange for more in-class group work. This goal is in order to increase peer and group collaboration on this SLO topic. The plan for the next course assessment is to evaluate the SLO through one assignment only in order to more specifically identify student mastery.

Discussed with department 2/23/17. SLO’s were discussed at the c-contract/advisory meeting held 1/19/17.

Plan for topic "Students completing the course will be able to select appropriate science activities for young children.": 2015/16

Overall, the written homework assignments are beneficial for helping students analyze the methods and materials used in developmentally appropriate science and math activities. In the future it is advised to reduce the number of written homework assignments in place of more in-class group work. The goal is to increase peer collaboration and problem solving.
Plan for topic "Students completing the course will be able to:

analyze the methods and materials used in developmentally appropriate science and math activities"

"2015/16

551. Creative Art for the Young Child [ECE-243] belonging to Early Childhood Education [ECE]

Plan for topic "Students completing this course will be able to design ways to document and display children's art to highlight children's creative expression.": 2018/19

This SLO is important for supporting process oriented art activities in young children. Although students met the SLO the professor felt that the evaluation rubric needs much revision to support the depth of desired learning. The ACTION PLAN is to revise the rubric and to highlight the classroom instruction with visual examples. This SLO will be assessedes during the next assessment cycle. The DVC children’s developmental lab school continues to be a vital support for curriculum classes. Findings were reviewed and discussed with the department.

Plan for topic "Students completing ECE-243 will be able to set up a developmentally appropriate process-oriented art activity.": 2016/17

All students met the SLO criteria and the group assignment supported individual learning. However, when this specific SLO is assessed in the future the plan is for a different assessment method to be used in order to better determine individual mastery.

This course was primarily taught in the DVC Developmental Children’s Lab School in order for students to have access to art supplies and materials. It would be extremely difficult to teach this class without the use of the lab school.

Plan for topic "Students completing the course will be able to compare a process vs. product oriented art activity.": 2016/17

All students met the SLO criteria and the group assignment supported individual learning. However, when this specific SLO is assessed in the future the plan is for a different assessment method to be used in order to better determine individual mastery.

This course was primarily taught in the DVC Developmental Children’s Lab School in order for students to have access to art supplies and materials. It would be extremely difficult to teach this class without the use of the lab school.

Plan for topic "Students completing ECE-243 will be able to identify and classify the various stages of artistic development according to Rhoda Kellogg.": 2013/14

This one unit class was offered to 35 student during summer 2014. The reflective writing appears to help students discuss what they have learned. However this summer the instructor gave a reflective writing after every 4 hours of instruction which she felt was too often.

Plan for topic "Students completing the course will be able to compare a process vs. product oriented art activity.": 2013/14

This activity was great and it truly brought home the critical elements of process oriented (and open-ended importance) of children's art activities. The three students who struggled with this were international students and were having difficulty with the new concept of process art. In the future the instructor will have each group check in on their
Plan for topic "Students completing ECE-243 will be able to set up a developmentally appropriate process-oriented art activity.": 2013/14
This activity was great and it truly brought home the critical elements of process oriented (and open-ended importance) of children's art activities. The three students who struggled with this were international students and were having difficulty with the new concept of process art. In the future the instructor will have each group check in on their proposed art activity earlier in the afternoon in order to provide any needed support.

Plan for topic "Students completing ECE-243 will be able to Choose developmentally appropriate materials for an art activity.": 2013/14
The instructor was able to spend time with the struggling students after the assignment was completed in order to clarify their confusion and broaden their perspective of appropriate art activities for children. This was valuable. At the end of the weekend many students shared what they had learned about process art and expressed much gratitude for the experience. Next year continue to add it experiences that require students to think of children's art through process oriented mediums.

Plan for topic "Students completing ECE-243 will be able to identify and classify the various stages of artistic development according to Rhoda Kellogg.":: 2012/13
One section was offered and assessed during summer 2013. This is a one unit course and very kinesthetic (hands on). This brief in-class writing appeared to help student incorporate information gained thorough lecture and handouts. It is advised to continue to have students do reflective writings.

Plan for topic "Students completing the course will be able to compare a process vs. product oriented art activity.":: 2012/13
This was a valuable activity since it required the students to think through the set-up and elements of an art activity that is process focused. Continue to use this activity in the future. This course may be offered in the fall semester. If offered the teacher will evaluate the fall class against the summer's class on the effectiveness of the activity. Adjustments (if any) will be recorded in the fall.

Plan for topic "Students completing ECE-243 will be able to set up a developmentally appropriate process-oriented art activity.": 2012/13
This was a valuable activity since it required the students to think through the set-up and elements of an art activity that is process focused. Continue to use this activity in the future. This course may be offered in the fall semester. If offered the teacher will evaluate the fall class against the summer's class on the effectiveness of the activity. Adjustments (if any) will be recorded in the fall.

Plan for topic "Students completing ECE-243 will be able to Choose developmentally appropriate materials for an art activity.":: 2012/13
This was the first time this instructor taught this class. The SLO was appropriate and the classroom activity appeared to help students set up their activity. If the class is offered again in the fall the instructor will expand on the verbal report with a written one to enhance the learning process.

Plan for topic "Students completing ECE-243 will be able to set up a developmentally appropriate process-oriented art activity.": 2010/11
a) Use of results. The current assignment appears to demonstrate that the students grasp the difference between the two concepts. The assignment used in class is effective.
b) Impact on learning. The use of the DVC Children's Center is imperative to the success of this course. Being in a child environment supports the learning objectives. Continued funding of art supplies is also necessary for quality learning.
Plan for topic "Students completing the course will be able to compare a process vs. product oriented art activity.": 2010/11

| a) Use of results. The current assignment appears to demonstrate that the students grasp the difference between the two concepts. The assignment used in class is effective. |

Plan for topic "Students completing the course will be able to plan developmentally appropriate circle time activities.": 2019/20

This course was to be assessed spring 2020. Due to COVID-19 this assessment was unable to occur. The class will be assessed the next time it is offered face-to-face.

Plan for topic "Students completing the course will be able to plan developmentally appropriate circle time activities.": 2016/17

Although all of the students met this SLO, the professor found several struggled with writing the developmental objectives and required extra coaching. In the future, the professor plans to include more in-class opportunities for writing these objectives so that students will have clearer understanding of the purpose behind circle time activities. In addition, the evaluation rubric will be revised to be more specific to the desired SLO outcomes. This assessment was discussed with the ECE department April, 2017.

Plan for topic "Students completing the course will be able to examine the purpose behind a meaningful circle time.": 2013/14

The professor liked the assignment but would assign less questions next time in order to encourage deeper class discussion.

Plan for topic "Students completing the course will be able to plan developmentally appropriate circle time activities.": 2013/14

Professor liked that the students presented their circle times in small group presentations. Although the presentation were overall excellent a few of the written assignments lacked depth. In the future the instructor will share examples with students prior to assignment being due.

Plan for topic "Students completing the course will be able to develop identify key components for an effect teacher / child relationship.": 2013/14

Professor felt this was an engaging and positive learning activity. The professor feels there is so much material to cover that there is not enough time to cover it all. She recommends this course to be expanded in the long run.

Plan for topic "Students completing the course will be able to examine the purpose behind a meaningful circle time.": 2010/11

Met the measurement criteria. It was suggested that question #3 be adjusted to require students to think more critically about possible interventions.

Use of children's center supports student learning.

Plan for topic "Students completing the course will be able to plan developmentally appropriate circle time activities.": 2010/11

Met the measurement criteria. Question #6 had two correct answers and needs to be modified.

Use of children's center supports student learning.

Plan for topic "Students completing the course will be able to develop identify key components for an effect teacher / child relationship.": 2013/14
relationship:" 2010/11

Met the measurement criteria. Use of children’s center supports student learning.
Review and if necessary modify the SLO assessment process for this class when next assessed.
Review of past course assessment (14/15) was done and this course no longer has students implementing the previous stated. Therefore, the current plan was reworked to fit current course objectives.

After reviewing the current SLO results the following plan was constructed.

The plan:

The professor plans to break up the assignment into two components whereby students focus more specifically on different aspects of development in order to narrow their focus. This plan should also address the timing issue at mentor sites and make it easier for students to complete the assignment. In addition, this SLO will be assessed during the next SLO assessment.

This SLO supports the program SLO for the AS Degree in ECE. This SLO also demonstrates the importance of the Children’s Developmental Lab as a critical teaching tool.

These results were discussed with the ECE Department on wed November 29, 2017.

Plan for topic "Students completing the course will be able to complete and interpret a child observation in order to plan a curriculum activity." 2014/15

An Emphasis of Activity development and an encouragement for 249 students to submit activity plan to classroom teachers and implement them is suggested.

Plan for topic "Students completing the course will be able to plan and implement a developmentally appropriate curriculum activity for young children." 2011/12

New SLOs have been developed for this course since it has been completely revamped to match the current course description in the College Catalog. The Developmental Children Center is an invaluable facility which provides for the opportunity for students in ECE-249 to be able to complete their practical Early Childhood Education training. The Mentor sites, funded by the Mentor grant provide similar opportunities. Ece-249 will continue to utilize these facilities. The Professional Development Program, along with First 5 provides invaluable support for ECE-249 students, in terms of text books and lost wage funding. Students will continue to be directed to utilize the PDP services.
DVC Instructional Course SLO Action Plans

Plan for topic "Students completing the course will be able to identify the primary influences on the assessment process."
